Submission Cherwell Local Plan 2011 – 2031 (Part 1)

Partial Review – Oxford’s Unmet Housing Need

Proposed Modifications

Addendum to Statement of Consultation

February 2020

Introduction

1. Cherwell District Council has consulted on modifications to the Submission Cherwell Local Plan 2011-2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need, including modified Policies Maps and an update to the Sustainability Appraisal. The documents were published for consultation from 8 November 2019 to 20 December 2019 prior to submission to the Secretary of State for Housing, Communities and Local Government.
2. The Draft Partial Review of the Cherwell Local Plan was submitted to the Secretary of State for public examination on Monday 5 March 2018. The Council submitted the Proposed Submission Local Plan (July 2017) accompanied by Focused Changes and Minor Modifications (February 2018). The Submission Policies Map was included within the documents.
3. The Submission Local Plan was also accompanied by a Statement of Consultation (CD PR93) which detailed previous stages of consultation undertaken in preparing the Plan. The Statement remains part of the Local Plan evidence base and is available online at <https://www.cherwell.gov.uk/info/112/evidence-base/369/local-plan-part-1-partial-review---evidence-base>. A separate Duty to Cooperate Paper (February 2018) (CD PR90) was also submitted. An Addendum to the Duty to Cooperate Paper (CD PR115) was prepared in September 2019 which supplements, and should be read alongside, the Duty to Cooperate Paper. It provides details of the further work undertaken by the Council subsequent to the Inspector’s Post Hearings Advice Note (Document PC5).
4. A Preliminary Hearing took place on 28 September 2018. Main hearings were held between 5 and 13 February 2019.
5. The Inspector’s Post-Hearings Advice Note (Document PC5) was received on 13th July 2019. In the Note the Inspector confirmed his preliminary conclusions that:
 - the 4,400 dwellings figure that represents Cherwell’s apportionment of Oxford’s unmet housing need provides a sound basis for the Plan;
 - the approach of locating the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors, is an appropriate strategy;
 - the pressing need to provide homes, including affordable homes, to meet the needs of Oxford, that cannot be met within the boundaries of the city, in a way that minimises travel distances, and best provides transport choices

- other than the private car, provide the exceptional circumstances necessary to justify alterations to Green Belt boundaries;
- on density, whilst some additional capacity may be possible, the Council has struck a broadly sensible balance between the extent of land proposed to be removed from the Green Belt, and the need to accommodate development that respects its context; and
 - in transport terms, the principle of siting the required allocations along an established transport corridor is a sound one.
6. The Inspector also advised that, with the exception of site PR10 (land South East of Woodstock), he considers the site allocations and the process by which they have been arrived at as being sound in principle.
7. The Inspector indicated that the major change required to make the Plan sound is the deletion of Policy PR10, Land South East of Woodstock.
8. Following the receipt of the Inspector's Advice Note the Council has engaged with a range of key stakeholders, interested parties and site promoters in the preparation of the proposed modifications.
9. This addendum provides an account of the consultation undertaken since the February 2019 hearings. It also explains how the Proposed Modifications have been publicly consulted upon and provides a summary of the responses received.

Consultation post February 2019 Hearings

10. The Inspector requested that following the Hearings in February 2019 the Council submit a Transport Technical Note (CD HEAR 1) and a Housing Figures Note (CD HEAR 2). The two notes, together with Statements of Common Ground and other documents submitted during or following the Hearings were the subject of an informal consultation ending on 4 April 2019. Participants from the Hearing sessions were invited to make submissions and the Council was provided with an opportunity to respond to the submissions received by the Inspector.
11. A total of 38 submissions were received. Full copies of each submission and the Council's responses can be viewed online at <https://www.cherwell.gov.uk/info/83/local-plans/515/local-plan-part-1-partial-review---examination/9>.
12. A list of respondents is shown in Table 1 below.

Table 1 - List of Respondents

Respondent
Aiden Applegarth
Andrew Hornsby-Smith
Begbroke & Yarnton Green Belt Campaign
Bloombridge
Cherwell Development Watch Alliance
Daniel Scharf
David Lock Associates for PR8 parties
Edgars for Mr & Mrs Tomes
Graham Thompson
GreenWay Oxfordshire
Harbord Road Area Residents
Ian Middleton for North Oxford Green Party
Keith Johnston
Kidlington Development Watch
Lynne Whitley
Pegasus Group for Hill Residential & Barwood Securities
Red Kite for Kidlington Parish Council
Savills for North Oxford Consortium
Terence O'Rourke for Vanbrugh Unit Trust & Pye Homes
Turnberry for Exeter College
West Oxfordshire District Council
Woodstock Town Council
Yarnton Parish Council

Duty to Co-operate

13. The Council received the Inspector's Post-Hearings Advice Note (PC5) on 13 July 2019 and published it on the Council's website on 15 July 2019.
14. The preparation of proposed Main modifications was informed by further engagement with Oxfordshire County Council, the site promoters of all sites proposed for allocation in the Local Plan and the relevant 'prescribed bodies' for the purposes of implementing Section 33A of the 2004 Act.

Neighbouring Authorities	
Aylesbury Vale District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • The Inspector's post hearing advice note • How the 410 homes at the PR10 (Land south East of Woodstock) could be redistributed • Current timetable for the main modifications

	<ul style="list-style-type: none"> • without prejudice, Aylesbury's initial thoughts <p>No cross-boundary strategic issues were raised by the proposed modifications.</p>
Buckinghamshire County Council	<p>Unable to make contact prior to the publication of the modifications. No response received on the published Main Modifications.</p>
Northamptonshire County Council (West Northamptonshire Joint Planning Unit)	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector's preliminary advice note received following Hearings in February 2019. • the options being considered for modifications in light of the Inspector's view that the strategy is sound but that one proposed housing allocation should be removed • the likely direction of travel for the main modifications having regard to changes in circumstances, new information and evidence • how the continued and endorsed strategy to locate development in south Cherwell is likely to have limited impact on Northamptonshire • the expected programme for the Partial Review going forward • how West Northamptonshire JPU are currently undertaking an Issues Consultation on a review of the West Northamptonshire Core Strategy in order to produce a new Strategic Plan for West Northamptonshire working with Daventry District and South Northamptonshire district.
Oxford City Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector's preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence; and how this relates to Oxford City • discussions with the County Council on infrastructure implications • the rationale for options being discounted • without prejudice, Oxford's initial thoughts • the expected programme going forward • timings of the Oxford Local Plan examination <p>Regular updates on modification preparation given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>

Oxfordshire County Council	<p>Following receipt of the Inspector’s advice note CDC sought detailed advice from OCC on the transport, infrastructure, and education implications of redistributing the 410 homes previously proposed at Woodstock.</p> <p>CDC and OCC have worked closely and iteratively on preparing the proposed modifications. This working is enhanced through regular monthly meetings where progress on the modifications is discussed in detail.</p>
South Northamptonshire	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice note received following Hearings in February 2019. • the options being considered for modifications in light of the Inspector’s view that the strategy is sound but that one proposed housing allocation should be removed • the likely direction of travel for the main modifications having regard to changes in circumstances, new information and evidence • how the continued and endorsed strategy to locate development in south Cherwell is likely to have limited impact on Northamptonshire • the expected programme for the Partial Review going forward • how SNDC are currently undertaking an Issues Consultation on a review of the West Northamptonshire Core Strategy in order to produce a new Strategic Plan for West Northamptonshire working with Daventry District and South Northamptonshire district.
South Oxfordshire District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence • discussions with the County Council on infrastructure implications • the rationale for options being discounted <p>Regular updates on modification preparation is also given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>

<p>Stratford-on- Avon District Council</p>	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019. Main matters addressed:</p> <ul style="list-style-type: none"> • The scope of the Plan (Oxford’s unmet housing needs) and where we are in the process • The basis of the 4,400 homes (countywide cooperative process) • The overall housing need arising from the Oxon SHMA 2014 (c. 100,000) homes which informed the cooperative process • The fact that the adopted Cherwell Local Plan (2015) meets CDC’s needs (22,840 2011-2031) in full and that the 4,400 homes (2011-2031) fully meets Cherwell’s apportionment of Oxford’s unmet needs • The distribution of the housing proposals as submitted in 2018 – all in the southern part of the district near to Oxford • The Inspector’s preliminary advice (July 2019) following main Hearings in February 2019 (including his concern about land next to Woodstock) • The options being considered to address the Inspector’s concerns – all in in the southern part of the district.
<p>Vale of the White Horse District Council</p>	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019. Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence • discussions with the County Council on infrastructure implications • the rationale for options being discounted <p>Regular updates on modification preparation is also given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>
<p>Warwickshire County Council</p>	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019. Main matters discussed included:</p> <ul style="list-style-type: none"> • the partial review of the local plan • the inspector’s request to reallocate the 410 homes at Woodstock • the 410 being redistributed to existing sites to the south of the district

West Oxfordshire District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main modifications having regard to changes in circumstances, new information and evidence; and how this relates to West Oxfordshire • discussions with the County Council on infrastructure implications • the rationale for options being discounted • without prejudice, WODC initial thoughts • the expected programme going forward <p>Regular updates on modification preparation is also given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>

Prescribed Bodies & Other Bodies	
Civic Aviation Authority (CAA)	Spoke with CAA’s Planning department in September. Advised to speak to London Oxford Airport directly.
London Oxford Airport	Unable to make contact prior to the publication of the modifications. No response received on the published Main Modifications.
Environment Agency	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • The Inspector’s preliminary findings contained in his Post Hearings Advice Note, recommending deletion of site PR10 Woodstock and the re-distribution of 410 houses • The options being considered • The likely content of the main modifications • The testing of options through preparation of additional evidence base including Sustainability Appraisal <p>A degree of caution was expressed in terms of flood risk and the need to avoid flood risk areas in considering increased densities/extending developable areas.</p> <p>CDC confirmed that it would have the opportunity to comment on the proposed modifications when published in the usual way. Without prejudice, no other concerns raised.</p>

Homes Agency (previously Homes and Communities Agency)	Regular updates on plan making in Oxfordshire are provided through quarterly Oxfordshire Growth Deal meetings of which Homes England is a participant. Unable to make contact prior to the publication of the modifications. No response received on the published Main Modifications.
Highways England	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence • discussions with the County Council on infrastructure implications • the rationale for options being discounted • without prejudice, HE’s initial thoughts • the expected programme going forward <p>Without prejudice, no concerns were raised.</p>
Historic England	Unable to make contact prior to the publication of the modifications. However, formal response received on the published Main Modifications.
Natural England	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • The Inspector’s preliminary findings contained in his Post Hearings Advice Note, recommending deletion of site PR10 Woodstock and the re-distribution of 410 houses • The options being considered • The likely content of the main modifications • The testing of options through preparation of additional evidence base including addendums to the Habitats Regulations Assessment, Water Cycle Study and Ecological Advice on Cumulative Impacts <p>NE expressed a degree of caution in terms of any air quality implications from the re-distribution of 410 dwellings in relation to Oxford Meadows SAC. CDC confirmed that there would be the opportunity to comment on the proposed modifications when</p>

	<p>published, in the usual way. Without prejudice, no other concerns were raised.</p> <p>Formal response received on the published main modifications.</p>
NHS England South East Commissioning Board	<p>OCCG cover the majority of functions with exception of dentistry and ophthalmology.</p> <p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence • discussions on infrastructure implications • the rationale for options being discounted • without prejudice, initial thoughts • the expected programme going forward <p>Without prejudice, no concerns were raised.</p> <p>Regular liaison meeting between CDC and OCCG where updates on Partial Review are given. Last meeting August 2019.</p>
Office of Rail and Road (Office of Rail Regulation)	<p>Unable to make contact prior to the publication of the modifications. No response received on the published Main Modifications.</p>
Oxfordshire Clinical Commissioning Group (OCCG)	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence • discussions on infrastructure implications • the rationale for options being discounted • without prejudice, OCCG’s initial thoughts • the expected programme going forward <p>Without prejudice, no concerns were raised.</p> <p>In addition, regular liaison meetings take place between CDC and OCCG where updates on Partial Review are given. Last meeting August 2019.</p>
Oxfordshire Local Enterprise Partnership	<p>Frequent updates on progress of the Modifications to the Plan through regular liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning</p>

	meetings which acts as the project board for the Oxfordshire Plan.
The Oxfordshire Environment Board	Unable to make contact prior to the publication of the modifications. No response received on the published Main Modifications.
Sport England	Meeting in August 2019. Briefed on Inspector's advice note and the needs to reassess options for 410 dwellings.
Scottish & Southern Electric	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • the Inspector's preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence; and how this relates to infrastructure • discussions with the County Council on infrastructure implications • the rationale for options being discounted • without prejudice, SSE's initial thoughts • the expected programme going forward and future engagement
Thames Water	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • the Inspector's preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence; and how this relates to Thames Water • discussions with the County Council on infrastructure implications • without prejudice, TW's initial thoughts • the rationale for options being discounted • the expected programme going forward (Main Mods consultation) <p>Without prejudice, no concerns were raised.</p>

15. CDC officers contacted by email the main promoters of sites proposed for allocation inviting them to update the Council on their latest position, including any supporting

information, and any changes in circumstances the Council should take into account having regard to the Inspector's advice note.

16. Engagement with site promoters included:

Site	Promoter	Engagement	Considerations
PR6a – Land East of Oxford Road	Savills (Christ Church, Exeter & Merton Colleges and Oxford University)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> 40 more units could be accommodated in PR6a as a result of lower school land take requirements. No other change of circumstances. CDC to consider within the context of Inspector's Note (PC5).
PR6b – Land West of Oxford Road	Savills (Christ Church, Exeter & Merton Colleges and Oxford University)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> Arboriculture assessment leading to 18.4 net developable hectares and provision of c.740 new dwellings (40dph) CDC to sense check density information. CDC to consider within the context of Inspector's Note (PC5).
PR6c- Land at Frieze Farm	Turnberry (Exeter College)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> Allocation of PR6c for up to 410 new dwellings. No change of circumstances. CDC to consider within the context of Inspector's Note (PC5).
PR7a – Land SE Kidlington	Pegasus (Barwood Development Securities Ltd) Hill Residential Ltd	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> Concept masterplan for c.430 new dwellings on 11.4ha of residential area at 37.5dph CDC to sense check density information within the context of Inspector's Note (PC5).
PR7b – Land at Stratfield Farm	Carter Jonas (Manor Oak Ltd)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> Site layout illustrating a scheme for c.165 new dwellings CDC to sense check density information within the context of Inspector's Note (PC5).

Site	Promoter	Engagement	Considerations
PR8 – Land East of the A44	DLA (University of Oxford, Merton College and a private landowner: The Tripartite)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> No change in circumstances CDC to consider within the context of Inspector's Note (PC5).
PR8 – Land East of the A44	Carter Jonas (Newcore)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> No change in circumstances CDC to consider within the context of Inspector's Note (PC5).
PR8- Land East of the A44	Carter Jonas (Mr M Smith and Mr G Smith)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note 	<ul style="list-style-type: none"> No change in circumstances CDC to consider within the context of Inspector's Note (PC5).
PR9 – Land West of Yarnton	Gerald Eve (Merton College)	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Site visit and meeting held in August 2019 	<ul style="list-style-type: none"> 3 development concepts submitted increasing numbers on extended developable areas. CDC to sense check density information CDC to consider within the context of Inspector's Note (PC5).
PR10 – Land South East of Woodstock	Blenheim Estates	<ul style="list-style-type: none"> Request for information sent following receipt of Inspector's advice note. Meeting held in August 2019 	<ul style="list-style-type: none"> Updated development concept (500 new dwellings) CDC to consider within the context of Inspector's Note (PC5).

Consultation on Main Modifications

17. The Main Modifications and supporting documents were made available for public comment for a period of six weeks from 8 November 2019 to 20 December 2019. A

number of minor modifications were also published at the same time, although these were not required to be consulted upon. Comments made had to relate to the proposed modifications and supporting documents only. The Council did not consult on other aspects of the Plan that had previously been consulted upon.

18. Evidence supporting the proposed modifications was made publicly available at the commencement of the consultation. The modifications and all supporting documents remain available online at <https://www.cherwell.gov.uk/info/83/local-plans/515/local-plan-part-1-partial-review---examination/11>.
19. On 9 December 2019, officers held a joint meeting with the affected Parish Councils to answer any questions without prejudice to the Council's position and the examination process.

Responses to Consultation

20. All representations received on the modifications have been published on the Council's website at <https://www.cherwell.gov.uk/info/83/local-plans/515/local-plan-part-1-partial-review---examination/11>. Each has been individually reviewed.
21. A total of 96 representations were received in response to the Council's consultation on the proposed main modifications.
22. A summary of the issues raised against each proposed modification is set out below. However, it should be noted that a significant number of the representations were general in nature. For completeness these representations have also been summarised under the 'general' heading of the summaries.

General Comments

23. The following organisations advised that they had no substantive comments to make on the proposed main modifications and supporting documents:
 - Scottish and Southern Electricity Networks (PR-D-0002)
 - The Forestry Commission (PR-D-0003)
 - National Grid (PR-D-0009)
 - Natural England (PR-D-0012)
 - Environment Agency (PR-D-0053)
 - The Canal and River Trust (PR-D-0059)
 - South Oxfordshire and Vale of White Horse District Councils (PR-D- 0074)
24. Other general comments include:

Oxford City Council (PR-D-0076) welcomes the publication of the proposed modifications and supports the approach taken and evidence in following through on the Inspector's recommendations.

Historic England (PR-D-0072) advise that the proposed modifications do not substantively change their position as set out in its statement of common ground agreed on 4 February 2018 and addendum statement on 8 February 2019. However, the increased densities now proposed on some of the allocated sites could reduce the scope for the outcomes of archaeological investigation to be incorporated in to the development schemes. This will therefore need to be given particular attention, as plans for such sites develop, through both the plan-making and development management processes.

Gosford and Water Eaton PC (PR-D-0086) made the following points:

- We wish to reiterate our view that this proposal is inappropriate and excessive, both in size and location;
- Area PR7a, in the parish, has had its housing allocation almost doubled, this further increases our concerns about traffic, pollution etc;
- An increased allocation to other adjacent areas further exacerbates issues with reduction of the green gap between Oxford and Kidlington;
- The current burial site allocation will not be sufficient for future use with the increase in housing;
- The increase in allocation for housing in area PR7a significantly reduces the area allocated to sports provision and green space;
- The potential Oxford to Cambridge Expressway along the route of the A34 would have significant noise and pollution effect on PR7a's extended site.

One response criticised the timing of the consultation (PR-D-0001)

One response supported the Plan particularly the closure of Sandy Lane (PR-D-0007).

One response (PR-D-0013) made no specific comments on the modifications but was generally supportive of Policy PR8.

12 representations made general objections to the proposals in the Plan but did not comment on specific modifications. (PR-D-0005, PR-D-0011, PR-D-0015, PR-D-0040, PR-D-0042, PR-D-0049, PR-D-0050, PR-D-0066, PR-D-0079, PR-D-0089, PR-D-0095, PR-D-0096).

The main issues raised on each of the proposed Main Modifications, and an officer response, is set out in the Annex 1 below.

ANNEX 1

Representations – Summary of Issues Raised and Officer Response

Modification Number	Comment/Issue	Representation Number	Officer Response
<p>Main 3</p> <p><i>(P.9; Executive Summary Table 1; Policy PR6a-Land east of Oxford Road)</i></p> <p>Replace '650' with '<u>690</u>'</p>	<ul style="list-style-type: none"> • The proposed main modification is supported. • Concern raised over the further release of Green Belt land to accommodate additional homes. • Intensification of existing allocations is not supported. • Green Belt release at Kidlington gap is inappropriate given that: <ul style="list-style-type: none"> ○ The SHMA numbers do not reflect need and are therefore not considered exceptional circumstances ○ Sites outside the Green Belt should be prioritised ○ The Kidlington Gap is of great strategic importance in relation to the Oxford Green Belt and development that would have the effect of closing it is inappropriate. • The Burley in Wharfdale decision by the Secretary of State (3208020) is highlighted as supporting argument in respect to the application of Paragraph 11(b) of the NPPF and contend that there are no exceptional circumstances to justify the release of Green Belt. • The current version of the Plan should be rejected as it stands. It should be revisited when the final numbers 	<p>PR-D-0010 (North Oxford Consortium)</p> <p>PR-D-0067 (CPRE)</p> <p>PR-D-0083 (CDWA)</p> <p>PR-D-0093 (KDW)</p>	<p>Noted</p> <p>This modification relates to the Executive Summary in the Plan. This change is a consequence of the substantive modification at MM 17 and MM 59.</p> <p>Reference should therefore be made to the full response under MM 17.</p> <p>The Burley in Wharfdale decision by the Secretary of State (3208020) is noted.</p> <p>However, Green Belt very special circumstances (NPPF para' 87- planning applications) and exceptional circumstances (NPPF para' 82- Green Belt reviews) are respectively site and Plan specific. Further and in any event, the application of Green Belt tests is necessarily fact specific. The conclusions reached in respect of the area of Green Belt with which the Burley in Wharfdale decision was concerned cannot determine the</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
	<p>for Oxford have been examined, adopting higher densities and prioritising protection of the Green Belt.</p> <ul style="list-style-type: none"> • Green Belt should only be removed in exceptional circumstances. • The importance of Kidlington Gap as a separation between Oxford and Kidlington was raised at the examination but this will be all but obliterated. This is contrary to the spatial strategy in the adopted Cherwell Local Plan and the NPPF. • The Council should consider alternative sites outside the Green Belt. • The deletion of site PR10 and resultant reallocation of dwellings to the other strategic sites means the release of additional Green Belt. Alternative sites or strategies have not been properly considered. • Object to housing development in the Green Belt, the effective 'infill' of the Kidlington Gap and the loss of separation between the villages and between villages and Oxford, the loss of the North Oxford Golf Club, and the significant flaws in the Transport strategy and the closure of Sandy Lane. • The justification for removing additional Green Belt land is based on a supplementary LUC report which contradicts the original report. • The additional Oxford allocations along existing transport corridors could be extended to include sites with good rail links outside the Green Belt. • Traffic problems at Kidlington Roundabout will be worsened. 		<p>outcome of the Green Belt exceptional circumstances test in Cherwell. The Partial Review is being examined under NPPF 2012. Exceptional circumstances were discussed extensively at the hearings, following consideration of all the evidence the Inspector reached a judgement concluding in his preliminary advice note (document PC5) that exceptional circumstances exist in the individual case of the Partial Review but noted that the Council would need to demonstrate exceptional circumstances for any further changes. (Refer to full response under MM17)</p> <p>The Inspectors examining the Oxford City Local Plan published their preliminary findings in January 2020. They concluded that the capacity-based requirement as proposed to be modified by the City Council did not result in 'meaningfully different implications for planning in the wider Oxfordshire area compared with the assumptions used by the Growth Board, and do not raise any significant new issues in respect of the unmet need. Having regard to these conclusions there can be no reason for delaying the Partial Review Plan.</p>

	<ul style="list-style-type: none"> • Reference to the Transport Assessment Addendum and its lack of justification for the site to be allocated particularly it ranked 42 out of 44 sites. • Welcomes the deletion of site PR10 however the reallocation of the dwellings across site PR9 will detrimentally impact on sites PR8 and PR9. • Sites PR8 and PR9 are not served by premium bus routes. The Transport Assessment is inaccurate in relation to bus routes. • The proposed park and ride and its associated bus services have been cited as an important element of the rapid transit bus system. However, further data on the impact of the deletion of site PR10 on its viability needs to be provided to assess the sustainability of sites PR8 and PR9. • There are inaccurate factual representations in the Transport Addendum which indicates the relocation of dwellings away from PR10 will have a positive effect upon overall levels of traffic and congestion at peak times. • The impact of relocating 410 dwellings from site PR10 to sites PR6a, PR6b, PR7a, PR7b and PR9 on the A44 and A4260 has not been assessed. Detailed modelling work needs to be undertaken to ascertain the soundness of this modification to the Plan. • The extension of the site to provide more housing at a lower density does not represent exceptional circumstances, is not justified and therefore unsound. 		<p><i>its design and layout</i> prompted the Council to consider whether additional land to the west could be allocated.</p> <p>A number of key constraints were identified and where necessary additional evidence commissioned. The key constraints included:</p> <ul style="list-style-type: none"> • High and moderate value trees including veteran trees and the presence of important hedgerows situated along field boundaries, which divide the site into smaller parcels. • The need for an appropriate design response in relation to the A44. • Surface water drainage catchments falling towards the low-lying land in the eastern part of the site and the associated land take for sustainable drainage features (SuDS). • Landform rising westwards from the A44 creating level changes to a high point north west of Begbroke. Higher ground parcels form part of the ring of hills forming a key element of Oxford's historic setting and special character. • Absence of field boundaries in the centre of the site • Historic landscape features

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>The Landscape Assessment for the site (CD PR108) concluded that the landscape could accommodate residential development on the lower slopes in the east of the study area, avoiding rising up the steeper mid-slopes, so that the enclosing function of the landform to the lower-lying broad vale would be retained. The westward extent of development should be related to the 75m AOD contour, although the strong vegetation structure to the large central field could accommodate development to about the 78m contour. A substantial green infrastructure for the development and the outer buffer of accessible green space would need to be secured through a development brief and a long-term management plan.</p> <p>The Green Belt Study Addendum (CD PR104) stated that the Submission Plan's proposed western boundary followed, for the most part, existing field boundaries. These boundaries also marked a distinction between areas closer to Yarnton, rated at moderate and moderate-high harm, and land to the west which was rated at high harm. The rising landform and absence of field boundaries in the area into which further settlement expansion is proposed are the reasons for the higher harm rating, but</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>some gradation can be identified. There is a distinction between the more gentle lower slopes on which development is proposed and the steeper hillside beyond, which is more clearly countryside.</p> <p>The Cherwell Green Belt Study (PR40) also noted that the higher ground formed part of the ring of hills that constitutes a key element in Oxford's historic setting, contributing to the preservation of the City's setting and special character (the 4th Green Belt purpose), but that the lower slopes were also significant in this respect.</p> <p>It continued by stating that the change in slope is not dramatic, so the precise location of a new boundary would make little difference in Green Belt terms, but a new Green Belt edge approximating to the lower end of this topography (at around the 75m contour) would nonetheless define an area in which harm to the Green Belt purposes, although greater than that associated with the formerly proposed release, would be lower than the harm associated with the release of the higher slopes.</p> <p>The Council is aware that the extended site area includes surviving ridge and furrow. However, a service trench for a pipeline has</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>been excavated through the field which has truncated the surviving earthworks in a 16m wide strip across the field. Furthermore, it is surrounded by modern fields and is not related to any medieval settlement. There is therefore, limited potential for the medieval development of the area to be understood from these surviving earthworks. Having regard to the above the advice of the County Archaeologist is that the features are not of such significance to warrant physical preservation.</p>
<p>Main 22 <i>(P.64; Table 4; Policy PR10 – Land South East of Woodstock)</i> Delete Woodstock row from Table 4.</p>	<ul style="list-style-type: none"> • Agrees with the Inspector’s Post Hearing Advice note that site PR10 is too distant from Oxford which is likely to tempt residents away from more sustainable travel choices and welcome its deletion. • Welcomes the deletion of site PR10 however the reallocation of the dwellings across site PR9 will detrimentally impact on sites PR8 and PR9. • Sites PR8 and PR9 are not served by premium bus routes. The Transport Assessment is inaccurate in relation to bus routes. • The proposed park and ride and its associated bus services have been cited as an important element of the rapid transit bus system. However, further data on the impact of the deletion of site PR10 on its viability needs to be provided to assess the sustainability of sites PR8 and PR9. • There are inaccurate factual representations in the Transport Addendum which indicates the relocation of 	<p>PR-D-0083 (CDWA)</p>	<p>The comments in support of this modification are noted.</p> <p>Responses to the comments relating to the relocation of the 410 dwellings to alternative sites are set out under Main 17 – 21 above.</p>

Specifically, at para 11.51 the Study states that if the North Oxford Golf Course be redeveloped, the long-term shortfall in provision to meet the demands of the forecast population in the Kidlington sub-area alone may be in the order of 6 holes. The minimum replacement requirement to solely meet the needs of the Kidlington population is therefore one 9-hole golf course. The Study also notes at paragraph 11.53 that as golf has a significant commercial element provision will change to reflect patterns of demand. Over time the expectations for golf change and it will be important for clubs to respond to keep facilities as viable and vibrant as possible. England Golf advises that more flexibility in membership options and in course formats are part of the changes needed to ensure increased viability. England Golf commented that there is good open access to golf across the District but notes that there are no Par 3 courses or other shorter formats which are more suitable for the beginner and for young people. Officers can confirm that the Inspector was in receipt of all the documentation submitted as</p>

<p>Amend to read: 'Construction of 120 100 homes (net) on <u>5 4</u> hectares of land (the residential area). The dwellings to be constructed at an approximate average net density of 25 dwellings per hectare.'</p>	<ul style="list-style-type: none"> An illustrative plan is attached to the submission to demonstrate how 140 dwellings could be provided on the 5 ha development site area, considered to be the best and most efficient use of the available land. The illustrative plan excludes the listed farmhouse and its curtilage (including the orchards) from the proposed allocation area to ensure efficient development of the site is not hampered by heritage related constraints. The proposed main modification does not represent the most appropriate strategy for development. The proposed main modification fails under the terms of paragraph 84 of the NPPF which requires LPAs, when reviewing Green Belt boundaries, to take account of the need to promote sustainable patterns of development and the need to consider the consequences for sustainable development in their choices. The Council's preferred approach has departed from the advice provided by the Inspector. References to the respondent's evidence on landscape, Green Belt and transport that supports the PR6c site for residential. Opposed to the allocation of Green Belt to meet Oxford's unmet need. However, if Green Belt is to be developed, it is vital that it is used as efficiently as possible. The modification increases the land take to 275 hectares, comprising of all Green Belt land. Averaged 	<p>PR-D-0081 (Turnberry for Exeter College)</p> <p>PR-D-0067 (CPRE)</p>	<p>Reference should also be made to the officer response under MM 20 above.</p> <p>The Explanatory Note (November 2019) describes in detail the process the Council took in preparing Main Modifications. A sequential consideration of options took place to avoid unnecessary further alterations to the Green Belt boundaries and to ensure that, if required, there were exceptional circumstances for further alteration. Paragraphs 8.66 – 8.69 specifically refer to the consideration of Frieze Farm.</p> <p>The Inspector addressed the issue of density in his preliminary advice note (PC5). He stated that overall <i>'the Council has struck a broadly sensible balance between the extent of the land proposed to be removed from the Green Belt, and the need to accommodate</i></p>

<p>improved informal access to the countryside and significant ecological and biodiversity gains primarily through the establishment of publicly accessible informal parkland between the proposed built development and the retained agricultural land to the west. <u>There will also be opportunities for significant ecological and biodiversity gains.</u> The Council's priority will be the creation of a new Local Nature Reserve at the southern end of the site with good access to the primary school and the existing public rights of way.'</p>			
<p>Main 112</p> <p><i>(P.129; Policy PR9 – Land West of Yarnton; Policies Map – Land West of Yarnton)</i></p> <p>Extend residential area to 25.3 hectares Delete Public Access Land Amend Revised Green Belt boundary</p>	<ul style="list-style-type: none"> • Requests confirmation that the revised policy map provides sufficient land to meet Oxfordshire CC's requirements for the school site. 	<p>PR-D-0085 (Oxfordshire CC)</p>	<p>The revised policy map amends the area reserved for the improvement/replacement of playing fields and amenity space for William Fletcher School. The area proposed reflects the requirements set out in the County Council's representations to the Submission Plan (July 2017). OCC's representation to the Main modifications now refers to a revised layout for the school which is a result of discussions</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
<p>Add 24.8 hectares of new green space/parks Add 39.2 hectares of retained agricultural land</p>	<ul style="list-style-type: none"> Whilst supporting the extension of the residential area the respondent considers it should be extended further as contained in their submission PR122 Reference is made to evidence base documents PR110, PR108 and PR113b. 	<p>PR-D-0084 (Gerald Eve for Merton College)</p>	<p>between Oxfordshire CC and Merton College only. Officers are concerned that the extended site requested for the primary school extension is not proportionate and therefore contrary to the CIL Regulations. Oxfordshire CC have previously advised that a site of 2.2 ha is required for a new 2FE primary school. However, in this instance when the additional land now being requested (1.8 ha) is added to the existing school site (1.2 ha) the total site area extends to approximately 3 ha. Officers are therefore of the view that in the absence of a detailed justification there is no reason to release more land from the Green Belt above that already proposed by the modifications. Furthermore, having regard to the Council's landscape evidence (PR108) and the requirement for significant engineering works to grade the land it is considered that the extended site would have an unacceptable landscape impact.</p> <p>Policy PR9 of the Submission Plan proposes the construction of 530 dwellings on approximately 16 has of land to the west of Yarnton.</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
	<ul style="list-style-type: none"> • The representation is accompanied by a map showing the amendments sought, which also includes an area safeguarded for further housing to the west. • The revised Green Belt boundary should be adjusted westwards including to accommodate the County Council request in conjunction with William Fletcher Primary School • the green space/park is considered inappropriate and unrelated in scale and kind to the draft allocation and should be replaced with a buffer area (denoted as public access land) and defined edge to the Green Belt with areas and routes accessible to the public. • The Policies Map should be amended as set out in the plans accompanying the representation. If the public open green space area is to be delivered it should be made clear that the Local Nature reserve will be delivered within it. 		<p>In his Advice Note (PC5) the Inspector advised that he had sympathy with the promoter's view argued at the Hearings that a more satisfactory development might be achieved by extending the residential development area westwards. He also suggested that in doing so the Council considers whether some additional homes could be achieved.</p> <p>The Explanatory Note (November 2019) describes in detail the process the Council took in preparing Main Modifications. A sequential consideration of options took place to avoid unnecessary further alterations to the Green Belt boundaries and to ensure that, if required, there were exceptional circumstances for further alteration.</p> <p>A number of key constraints were identified and where necessary additional evidence commissioned. The key constraints included:</p> <ul style="list-style-type: none"> • High and moderate value trees including veteran trees and the presence of important hedgerows situated along field boundaries, which divide the site into smaller parcels. • The need for an appropriate design response in relation to the A44. • Surface water drainage catchments falling towards the low-lying land in the eastern part of the site and the

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>associated land take for sustainable drainage features (SuDS).</p> <ul style="list-style-type: none"> • Landform rising westwards from the A44 creating level changes to a high point north west of Begbroke. Higher ground parcels form part of the ring of hills forming a key element of Oxford's historic setting and special character. • Absence of field boundaries in the centre of the site • Historic landscape features <p>The Landscape Assessment for the site (CD PR108) concluded that the landscape could accommodate residential development on the lower slopes in the east of the study area, avoiding rising up the steeper mid-slopes, so that the enclosing function of the landform to the lower-lying broad vale would be retained. The westward extent of development should be related to the 75m AOD contour, although the strong vegetation structure to the large central field could accommodate development to about the 78m contour. A substantial green infrastructure for the development and the outer buffer of accessible green space would need to be secured through a development brief and a long-term management plan.</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>The Green Belt Study Addendum (CD PR104) stated that the Submission Plan's proposed western boundary followed, for the most part, existing field boundaries. These boundaries also marked a distinction between areas closer to Yarnton, rated at moderate and moderate-high harm, and land to the west which was rated at high harm. The rising landform and absence of field boundaries in the area into which further settlement expansion is proposed are the reasons for the higher harm rating, but some gradation can be identified. There is a distinction between the more gentle lower slopes on which development is proposed and the steeper hillside beyond, which is more clearly countryside.</p> <p>The Cherwell Green Belt Study (PR40) also noted that the higher ground formed part of the ring of hills that constitutes a key element in Oxford's historic setting, contributing to the preservation of the City's setting and special character (the 4th Green Belt purpose), but that the lower slopes were also significant in this respect.</p> <p>It continued by stating that the change in slope is not dramatic, so the precise location of a new boundary would make little difference in Green Belt terms, but a new</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>Green Belt edge approximating to the lower end of this topography (at around the 75m contour) would nonetheless define an area in which harm to the Green Belt purposes, although greater than that associated with the formerly proposed release, would be lower than the harm associated with the release of the higher slopes.</p> <p>In summary, the extension of the development area further west as advocated by the site promoters is not supported by the Council's evidence.</p> <p>Following the Inspector's Note three alternative schemes were submitted by the site promoters (PR122). All three schemes indicated substantial areas for biodiversity enhancement between retained agricultural land to the west and the residential areas to the east.</p> <p>This area is now reflected in the Council's modifications as 'new green space/parks'.</p> <p>Paragraph 81 of NPPF 1 states that local planning authorities should plan positively to enhance the beneficial use of Green Belt. This policy is continued in NPPF 2. Para 138 of the 2019 Framework also now states that local planning authorities should set out ways in which the impact of removing land from the</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
	<ul style="list-style-type: none"> • All reasonable alternatives have been considered including the scope for a reduced quantum of development on PR10 • Agree to CDC pragmatic approach which addresses the housing shortfall through higher densities and extensions to other existing allocations in the context of exceptional circumstances for development in the Green Belt already having been accepted by the Inspector • Objects to the deletion of allocation PR10 from the Plan and the consequential further release of Green Belt land which is contrary to national policy • Consider PR10 to be a sustainable site which is compliant with the 2012 NPPF and supported by council officers and Historic England • The SA identifies PR10 as a reasonable site option but the significant effects of PR10 (paragraphs 1.22 – 1.34) contains significant errors 	PR-D-0062 (Terence O'Rourke for the Vanbrugh Unit Trust & Pye Homes)	<p>The Council's evidence supporting the submitted plan considered the site to be a reasonable one to consider. The Council's original conclusion on site selection for site PR10 is recorded in the Sustainability Appraisal (CD PR43d, para's 10.23 to 10.36). It was concluded, "The Council considers that the site should be taken forward for residential development albeit with the need to restrict the residential development area". Additionally, it was originally concluded that the effects of development would be acceptable, and that development would contribute to the achievement of sustainable development (CD PR43 Section 10). The site was the only one identified as being appropriate outside the Oxford Green Belt.</p> <p>Having reviewed all written and oral evidence, the Inspector has provided a planning</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>judgement that allocation of the site would not be sound. He has made it clear that he does not believe “...that the impact on the setting, and thereby the significance of the nearby Blenheim Palace World Heritage Site (WHS) would be unacceptable, considered in isolation.” But, notwithstanding the potential for screen planting, his view is that ‘...the development of the site for housing would represent an incongruous extension into the countryside that would cause significant harm to the setting of Woodstock, and the character and appearance of the area...’.</p> <p>This planning judgement, with the Inspector’s additional concerns about travel distance to Oxford and the setting and significance of the World Heritage Site (also following the consideration of evidence), weighed heavily in the Council’s considerations. The Council presented the Inspector with an alternative proposal for site PR10 to which Historic England had no objection. The Inspector’s judgement was made with this information available to him. The Council is mindful that housing development on adjoining development to the north west is now under construction but the influence of that development (as a West Oxfordshire allocation and planning application approval) was previously considered. The Council is also cognisant of the landscape evidence</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
			<p>submitted by West Oxfordshire District Council (Chris Blandford Associates). In its written statement to the Examination (Matter 8 -Written Statement) West Oxfordshire District Council argued that the proposed allocation would, inter alia, have a potential adverse impact on the local landscape and setting of Woodstock.</p> <p>The Council has been conscious of Historic England's position and the fact that, following the publication of the Proposed Submission Plan, no objection was received from ICOMOS. It has also been mindful of the site's non-Green Belt location. However, it is clear that development of site PR10 would comprise a substantial development within close proximity to both Woodstock and the World Heritage Site and would change the local environment through the loss of countryside and the introduction of built development in an otherwise open setting. The SA addendum notes that a reduced and/or less dense PR10 would most likely reduce the area of open greenfield land that would be developed and the potential scope and significance of adverse effects against SA objectives 9 (Historic Environment) and 13 (Efficient Use of Land). However, it noted that the same sensitivities and therefore the potential for significant negative effects still exist as for the original SA of the site. The SA</p>

	<ul style="list-style-type: none"> • The closure of Sandy Lane to vehicular traffic will be detrimental to the residents of the surrounding villages. The concept of improving the sustainability of this route for use by pedestrians and cyclists is desirable but do not need to be to the detriment of vehicular travel. • The inclusion of a bus gate in Kidlington raises a number of questions regarding its operation, the impact on local roads and the impact on emissions and air quality. • Agrees that Sandy Lane should be kept open for pedestrians and cyclists but this shouldn't be to the detriment of vehicular use of Sandy Lane. It is an important road link between local villages. Improving cycle and pedestrian access alongside maintaining vehicular access would be welcomed. • The removal of planned bus lanes is unsound as ensuring efficient and reliable bus journey times both into and out of Oxford is essential for delivery of the sustainable transport plan. • Main 147 makes no reference to inclusion of a northbound bus lane on the A44 between Cassington Road and Loop Farm. This is the most heavily congested stretch of the A44. • It is not clear how the removal of the pedestrian / cycle bridge and bus priority at Kidlington Roundabout on the A4260 supports the soundness of the transport strategy and desire to encourage walking and cycling. 		<p>Regarding Sandy Lane, bus gate, bus lanes and access to site PR7b please refer to detailed response to MM 147 and Transport evidence.</p>

Modification Number	Comment/Issue	Representation Number	Officer Response
	<ul style="list-style-type: none"> • Access from PR7b onto an already congested roundabout needs to be planned and fully modelled prior to the release of this site from the Green Belt. • The removal of sustainable travel improvements on the A44 corridor to provide access to Woodstock is unsound. • The notion the canal can be a commuter route into Oxford is unsound. Protection measures including a dark canal corridor (Note 59) would render the towpath as only being suitable for recreational use due to the long periods where it will be too dark for safe usage. • Requests deletion of reference to Education and Skills Funding Agency as a source of funding. 		<p>Comment on Canal protection is noted, the Plan's Appendix 6 – Thematic Maps indicates 'strategic' and 'Other key cycle routes' linking the Plan's area with Oxford and other locations. Policy PR4a Sustainable Transport notes the provision of a Super Cycle way along the A4260 and provision of new and enhanced cycling routes into Oxford. There are a number of cycling routes which will have different functions. Transport including cycling provision was discussed extensively at the Local Plan hearings. MM147 responds to Canal protection without detriment to the Plan's cycling provision.</p> <p>County Council requests deletion of ESFA reference. The Infrastructure schedule reflects opportunities raised by the ESFA at Proposed Submission Stage (PR-C-0806). The infrastructure schedule is a live document not intended to replace the stages of infrastructure planning work at development brief and planning application stages which will inform infrastructure monitoring an update. A change to the MMs is not required.</p>

Main 147 <i>(Infrastructure Schedule Item 82)</i>	<ul style="list-style-type: none"> This project which is the 'Retention of c3 ha of land in agricultural as part of PR6a was, it is believed, put in place to protect far reaching views from Cutteslowe Park over the Cherwell Valley. It is requested that this aim be reflected in the Policy 'Main aim' by policy rewording. 	PR-D-0070 (Harbord Road Area Residents Assoc)	The points raised in this representation have been noted but they are not directly related to the proposed modification.
General (Policy PR7a Map)	<ul style="list-style-type: none"> Supports proposed modification 	PR-D-0014 (Pegasus for Barwood Developments)	Noted
General PR7a – Extension of site Page 156	<ul style="list-style-type: none"> this proposal is inappropriate and excessive, both in size and location; area PR7a, in the parish, has had its housing allocation almost doubled, this further increases concerns about traffic, pollution etc; an increased allocation to other adjacent areas further exacerbates issues with reduction of the green gap between Oxford and Kidlington; the current burial site allocation will not be sufficient for future use with the increase in housing; the increase in allocation for housing in area PR7a significantly reduces the area allocated to sports provision and green space; the potential Oxford to Cambridge Expressway along the route of the A34 would have significant noise and pollution effect on PR7a's extended site. 	PR-D-0086 (Gosford and Water Eaton PC)	Whilst acknowledging the concerns expressed by Gosford and Water Eaton PC officers consider that in the context of housing need and the plan's strategy, additional Green Belt release at site PR7a (10 hectares) can be justified while retaining a significant, albeit narrower, gap (11.5 hectares) to the A34 and the achievement of policy objectives for green infrastructure and sport and recreation. The Council's evidence demonstrates that additional development would be acceptable and contribute to the achievement of sustainable development. In relation to the concerns raised regarding the potential Oxford-Cambridge Expressway, Government has yet to announce its preferred route. The Partial Review requires the provision of 0.7 hectares of land within the developable area of site PR7a for an extension to Kidlington Cemetery. This is considered sufficient to meet the need resulting from the changes

Modification Number	Comment/Issue	Representation Number	Officer Response
Main 147 and Transport Evidence Page 163	Detailed points on adequacy of transport evidence and the Infrastructure schedule	PR-D-0083 (CDWA)	See below
<p>The reiteration of CDWA evidence given at the examination is noted, however the Inspector's Advice Note (document PC5) recognises the potential inconvenience of proposed changes to the highway network, such as the closure of Sandy Lane to through vehicular-traffic. This was discussed during Local Plan hearings in February 2019 and the impact of such changes was not considered by the Inspector to render CDC's approach unreasonable, or the Plan unsound.</p> <p>On the specific reference to frequency of bus service S3 (A44), in addition to regular 3 services per hour the S3 also provides 4 buses between Oxford and Yarnton/Begbroke within an hour at key time periods. This provides a high-frequency service linking these locations and Oxford at key commuting times.</p> <p>The Council disagrees with the representation's assertion that PR8 would have ranked similarly to PR9 in ITP's assessment (document PR52) if it was not for the above inaccuracies. Transport evidence including the ranking of sites (and specifically the reason for the scoring of PR9 which due to its size which distances its centroid from the existing network) was extensively debated at the Local Plan hearings.</p> <p>Comments on cycling and distances to employment locations are noted. Cycling distances were also debated extensively at the Local Plan hearings. Further transport evidence in addition to Transport Assessment (PR52) and Transport Topic Paper (PR102) was provided in a Transport Technical Note (document HEAR 1) specifically addressing cycling and accessibility to Oxford jobs from the allocated sites amongst other matters.</p>			

The transport assessment remains robust, its methodology is proportionate to the Plan and is applied consistently to all sites assessed.

The Council disagrees with the perceived Transport Assessment Addendum's erroneous representation of the A44 corridor bus links to Banbury, Woodstock and Oxford. The Transport Assessment Addendum (PR109) Table 3-1: 'Transport characteristics, opportunities and constraints' reflects the opportunities of existing and planned infrastructure and the alignment of the Plan with the Local Transport Plan (LTP). The LTP refers to strategic inter-urban bus network and shows the importance of the A44 and A4260 for high-speed, high-frequency services and its strategic importance for connections with Banbury – Oxford and/or Witney – Woodstock – Kidlington

Regarding comments on the deletion of public transport schemes: All transport schemes needed for modelling the corridors into Oxford City centre are detailed in the Transport Assessment (PR52) and were discussed in detail at the Local Plan examination. The Council's infrastructure schedule includes those schemes which require interventions within Cherwell District, it does not imply that all the transport highways schemes along this or other corridors planned for in the Local Transport Plan, Oxfordshire Infrastructure Strategy and Growth Deal whether in Cherwell District, Oxford City or West Oxfordshire (and their Local Plans) will not be addressed. Scheme 6 of the Infrastructure schedule reflects bus lane improvements on the A44 corridor. North bound and south bound lane schemes on the A44 in Cherwell are covered in Scheme 6a in one single scheme (previously split into two).

On the reference to 'absence of expected journey times from sites PR8 and PR9' in the Transport Assessment Addendum (PR109): the journey times expected from the proposed allocations are detailed in the Transport Technical Note (document HEAR 1) and re-presented in Appendix 2 of the Transport Assessment Addendum.

The Council disagrees with the perceived inaccurate representation of the facts in the Transport Assessment Addendum conclusion. The Addendum clearly states in paragraph 15 that the proposed reallocation of dwellings resulting from the deletion of site PR10 from the Plan is expected to have a positive effect upon overall levels of road traffic (and associated congestion at peak times) that have been forecast to result from the allocation of 4,400 homes being considered.

Oxfordshire County Council confirms in the Transport Assessment Addendum that 'the proposed redistribution will require minimal changes to the package of transport improvements developed to support the Local Plan, and Policy PR10-specific requirements can be removed from the Infrastructure Schedule.'

The Inspector's preliminary advice reaches a view on transport strategy having considered all evidence presented. The purpose of the Transport Assessment's addendum is to assess the potential impact of the modifications proposed and concludes that overall it reduces the transport impact previously forecasted for the allocations previously assessed.

The Transport evidence (documents PR52, PR102, HEAR 1 and PR109) provides a proportionate evidence base informing the Plan and responds to the Local Plan examination process in accordance with national policy and Planning Practice Guidance on 'Transport evidence bases in plan making and decision taking'. The Plan's Transport evidence and infrastructure schedule are not intended to present fully-worked highways solutions or to replace the Transport Assessments needed at planning application stage. The Local Plan process has been informed by an assessment of transport impacts in collaboration with Oxfordshire County Council and is consistent with the approach taken for the adopted Cherwell Plan and other Oxfordshire Plans.

The proposed modifications do not result in a different number of dwellings (4,400) or new growth locations. The purpose of the Transport Assessment Addendum (PR109) is not to repeat previous evidence but to anticipate the impact of proposed revisions to site allocations in terms of sustainable transport and highways considerations. The Addendum provides a proportionate and robust means to anticipate the impact the proposed Main Modifications.

Infrastructure planning is an iterative and collaborative process with infrastructure providers and other stakeholders.

The planning process to date has helped identify infrastructure, costs and means of funding and delivery as per the PPG and NPPF guidance. The Plan and its proposed modifications are supported by a schedule of infrastructure informed by the schemes and interventions sought by the relevant infrastructure providers including Oxfordshire County Council as Local Highways Authority. Infrastructure planning including identification of bus gates or other project-specific measures is a continuous process which will continue through more detailed planning stages such as the preparation of site development briefs. Upon plan adoption there will be yearly monitoring of infrastructure planning and provision by infrastructure providers.

Representations to the Sustainability Appraisal Addendum		
Comment	Respondent(s)	Response
Page 164 <ul style="list-style-type: none"> In certain respects, promoters support the findings of the SA in relation to sites PR7a, PR9 and proposed safeguarded land at PR3(c). 	Gerald Eve LLP for Merton College (PR-D-0084) Turley for the landowner land at south east Kidlington (PR-D-0054) Edgars for Mr and Mrs Tomes (PR-D-0087)	Noted.
<ul style="list-style-type: none"> The sustainability appraisal and the policy conclusions based on it are biased and flawed. The Council did not properly consider the option of not maintaining the PR10 allocation or of waiting until Oxford's housing need is tested and 	Kidlington Development Watch (PR-D-0093)	The legal requirements for SA (and SEA) have been met. The SA takes account of NPPF1 (2012) and government guidance on SA. The Inspector has not raised any concerns with the SA in his advice note. The Council considers the SA is comprehensive and proportionate.

<p>established. It has not acted to prevent further incursion into the Green Belt or to protect the spatial separation and integrity of our communities. If, as the sustainability appraisal update concludes, further incursion into the Green Belt is the only viable option then it can, and should, decline to provide the 410 homes.</p>		<p>In his Advice Note the Inspector considers that the 4,400 homes proposed provides a sound basis for the Plan. The 2017 SA Report (PR43) included an appraisal of providing 4,400 homes and alternatives.</p> <p>The 2019 SA Addendum (PR113b) concludes that although there will be negative effects associated with the reallocation of the 410 homes from PR10 to allocation Policies PR6a, PR6b, PR7a, PR7b and PR9, overall, the significance of these adverse effects has not changed from those already identified through the SA of the original number of homes allocated at each location. SA Addendum Appendix 1, setting out the additional evidence gathered to establish the likely effects of the redistribution also supports this.</p>
<ul style="list-style-type: none"> • It is not sufficient, on grounds of sustainability, to proceed through Major Modifications alone without reassessment of the Plan as a whole, especially given the high threshold for release of Green Belt. • The PR9 site is not considered to be sustainable as it was ranked 42 out of 44 sites assessed by ITP. The site should be reduced in size or deleted from the Plan. Given such poor performance, especially given these transport metrics would directly contribute to the rating of the site in the Sustainability Appraisal, it is not explained why PR9 was selected (nor indeed how this analysis led to the selection of Area A over the other identified areas). 	<p>Begbroke and Yarnton Green Belt Campaign (PR-D-0082)</p>	<p>In his Advice Note the Inspector considers that the 4,400 homes proposed provides a sound basis for the Plan. His preliminary findings indicate the approach of locating the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors is an appropriate strategy. The Council’s consideration of reasonable options for preparation of the Proposed Submission Plan is set out in sections 7, 8, 9 and 10 of the 2017 SA Report (PR43).</p> <p>The Council’s reasons for selecting sites, including PR9, is set out in Chapter 10 of the 2017 SA Report (PR43) and the reasons for the Council’s approach to the main modifications (including in respect of the PR9 allocation) is set out in the Council’s 2019 Explanatory Note and SA Addendum (PR113b). Transport evidence including the ranking of sites and specifically the reason for the scoring of PR9 (due to its size, which distances its centroid point</p>

		<p>from the existing network) was extensively debated at the examination. The sites selected for inclusion in the Plan were considered to be the most suitable for meeting the Plan's vision and objectives and achieving sustainable development.</p>
<ul style="list-style-type: none"> • The SA identifies PR10 as a reasonable site option. • The SA contains significant errors. The residential part of the allocation is not within the setting of the World Heritage Site. The effects on the historic environment are not uncertain and they are not significantly negative. The clear and significant public benefit has been completely overlooked. • The landscape evidence referred to in the SA is incorrect in its assessment of potential impacts and out of date. • The revised SA does not support the deallocation of PR10 in favour of other options and objection is raised to the removal of site PR10. 	<p>Terence O'Rourke Ltd for Vanbrugh Unit Trust and Pye Homes (PR-D-0062)</p>	<p>Having reviewed all written and oral evidence, the Inspector has provided a planning judgement that allocation of the site would not be sound. He has made it clear that he does not believe <i>"...that the impact on the setting, and thereby the significance of the nearby Blenheim Palace World Heritage Site (WHS) would be unacceptable, considered in isolation."</i> But, notwithstanding the potential for screen planting, his view is that <i>'...the development of the site for housing would represent an incongruous extension into the countryside that would cause significant harm to the setting of Woodstock, and the character and appearance of the area....'</i></p> <p>The Council's consideration of reasonable options for preparation of the Proposed Submission Plan is set out in sections 7, 8, 9 and 10 of the 2017 SA Report (PR43). All options have been subjected to SA using the assumptions set out in Appendix 2 and Table A2.1 in the SA Report that was published alongside the Proposed Submission Plan in 2017 (PR43).</p> <p>The 2019 SA Addendum (PR113b) contains an SA of reasonable options and of a schedule of proposed modifications to the Proposed Submission Plan (2017). The 2019 SA Addendum (PR113b) concludes that although there will be negative effects associated with the</p>

		<p>reallocation of the 410 homes from PR10 to allocation Policies PR6a, PR6b, PR7a, PR7b and PR9, overall, the significance of these adverse effects has not changed from those already identified through the SA of the original number of homes allocated at each location. SA Addendum Appendix 1, setting out the additional evidence gathered to establish the likely effects of the redistribution also supports this.</p> <p>While reducing the eastward extent of site allocation PR10 and or reducing the density of development within PR10 would most likely reduce the area of open greenfield land that would be developed reducing the potential scope and significance of adverse effects against SA objectives, the same sensitivities and therefore the potential for significant negative effects still exist.</p> <p>The SA does not contain the errors alleged. The SA correctly notes that the PR10 site is in close proximity to the Blenheim Palace World Heritage Site (1.22). The SA has made reasonable judgements about the nature of the heritage impacts. The benefits of the PR10 allocation have not been ignored. The Council is cognisant of the promoter’s representations and hearing statement where the benefits of development to support the World Heritage Site are set out and which the Inspector would have been aware of in making his decision. The Council’s reasons for selecting sites, including PR10, is set out in Chapter 10 of the 2017 SA Report (PR43).</p>
<ul style="list-style-type: none"> • The legal compliance of the SA Addendum is questioned. • In legal compliance terms, the reasonable alternatives test relates to the appropriateness of the strategy (i.e. the “geographical scope of the plan”, per SEA Regulation 12(2)), not the individual sites – the strategy is plainly a 	<p>Bloombridge LLP (PR-D-0069)</p>	<p>The legal requirements for SA (and SEA) have been met. It takes account of NPPF1 (2012) and government guidance</p>

plan-wide matter. As a minimum, this requires an addendum SA of the Kidlington Area of Search, as one of two “best performing areas” on sustainability grounds, per paragraph 1.39 of PR43(b), and this must also be set within the context of harm to the overall integrity of the Green Belt (which is wider than a site by site assessment).

- The Government’s guidance on sustainability appraisal confirms that the correct approach is to SA the Plan as a whole, not the sites, specifically to achieve relevant environmental, economic and social objectives.
- The Council has irrationally narrowed the scope of the Addendum Sustainability Appraisal (SA) to just the “existing strategy” and it should have considered the Kidlington Area of Search as a whole.
- The assessment can be iterative and therefore limited to a spatial strategy within the plan, if that strategy is settled, but the “existing strategy” still remains very much in question.
- The SA Addendum should have considered the Moors site as a reasonable alternative to the main modifications.
- There was no procedural benefit gained from limiting the Addendum SA to what paragraph 1.12 of PR113a describes as the “existing strategy”. A process that just looks at the existing sites (particularly in isolation to the rest of the Area of Search) is going to miss the ‘tipping point’ on the capacity of each site when avoidable or unacceptable harm is reached which, like any sustainability decision, is a balancing and comparative exercise, including in relation to reasonable alternatives.
- Land at the Moors scores well in the SA and its exclusion from the Plan is irrational.
- Reasonable alternatives to the modified strategy have been overlooked, making for less sustainable outcomes and unnecessary “high harm” to the Green Belt, its permanence and overall integrity.
- Even operating on the working assumption that the submitted sites are sound, it does not follow that extending these sites is sound, sustainable and minimising in terms of harm to the Green Belt (noting the debate at

on SA. The Council considers the SA is comprehensive and proportionate.

The Council’s consideration of reasonable options for the preparation of the Proposed Submission Plan is set out in sections 7, 8, 9 and 10 of the 2017 SA Report (PR43). All options have been subjected to SA using the assumptions set out in Appendix 2 and Table A2.1 in the SA Report (PR43) that was published alongside the Proposed Submission Plan in 2017. All site options in Areas of Search A and B, (those areas in closest proximity to Oxford), were assessed in the 2017 SA Report (PR43). Whilst the size of developable areas for certain site allocations would increase as a result of the Main Modifications, the increase would remain within the extent of the site appraised.

In the case of land north of the Moors, the reasons for not selecting the site are explained at paragraphs 10.95 to 10.100 of the 2017 SA Report (PR43), referencing the SA and other considerations. Overall, the sites selected for inclusion in the Plan were considered to be the most suitable for meeting the Plan’s vision and objectives and achieving sustainable development.

The Inspector has not raised any concerns with the 2017 SA in his Advice Note. His preliminary findings indicate the approach of locating the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors is an appropriate strategy. The Inspector considers that the Council has demonstrated exceptional circumstances to justify removal of land from the Green Belt.

the February Hearings that concluded that the site capacities were settled, and the proposed Green Belt boundaries set to endure).

- The SA mismatches with the Terms of Reference of the Plan. The key elements of this methodology require site selection decisions based on the “most sustainable locations”.
- Cherwell’s narrow approach to the addendum SA cannot, on the evidence, confirm that the Partial Review is sustainable or that the reconfigured sites are in the “most sustainable locations”.
- The SA downplayed the role of the Green Belt with too much focus on exceptional circumstances and not enough on the sustainability consequences associated with defining new Green Belt boundaries.

The Inspector has advised, ‘With one exception...I regard the various allocations, and the process by which they have been arrived at, as sound, in principle...’. The site that the Inspector has concerns with is the only site (PR10 – land south east of Woodstock) that the Council originally proposed which is situated outside of the Oxford Green Belt.

Other than this site, the Council has no reason to question its site selection process to date, including the non-selection of all reasonable alternatives to the proposed site allocations considered to date (including land north of the Moors).

Consequently, consideration of reasonable alternatives to the redistribution of the 410 homes in the 2019 SA Addendum (PR113b) has focussed exclusively on options that relate to accommodating additional homes within the scope of the existing strategy; specifically, on or in the immediate vicinity of the existing site allocations and options within the Plan Policies PR3a-PR10. All these options are considered to be reasonable to consider.

The 2019 SA Addendum (PR113b) contains an SA of reasonable options and an SA of a schedule of proposed modifications to the proposed submission Plan (2017). Paragraph 1.151 of the SA Addendum concludes that although there will be negative effects associated with the reallocation of the 410 homes from PR10 to allocation Policies PR6a, PR6b, PR7a, PR7b and PR9, the significance of these adverse effects has not changed from those already identified through the SA of the original number of homes allocated at each location. SA Addendum Appendix 1, setting out the additional evidence gathered to establish the likely effects of the redistribution also supports this.

		<p>More generally, the proposed modifications would contribute positively to, but not change, the overall cumulative effects of the Local Plan Partial Review as a whole, as recorded in the 2017 SA Report (PR43). Similarly, the potential sustainability effects of the proposed modifications to the Local Plan Partial Review in combination with the likely effects of other related plans, programmes and projects are not different from those recorded in the June 2017 SA Report.</p> <p>The 2019 SA Addendum (PR113b) and the Council's explanatory note explain the reasons for the approach set out in the Council's modifications. The Council has been aware that should it not be possible to accommodate the displaced development requirements within the Plan's original scope, there would be a need to consider other options. That has not been required however.</p>
<ul style="list-style-type: none"> • Objects to the approach that PR3(a) was assessed as a single option. The respondent's site should have been assessed as an independent option, given the relationship to PR8 proposals, the existing urban influences on this land and the opportunity to provide suitable access from the A44. • The SA addendum identifies that the likely significant effects of releasing land within PR3(a) are likely to be less harmful than the options taken forward. • Objection is raised for not taking forward option 2. This forms approximately 7.8 ha of land identified as suitable for removal from the Green Belt and as suitable for development. 	Edgars for Mr and Mrs Tomes (PR-D-0087)	<p>The Council's consideration of reasonable options for preparation of the proposed submission Plan is set out in sections 7, 8, 9 and 10 of the 2017 SA Report (PR43). All options have been subjected to SA using the assumptions set out in Table A2.1 in the SA Report that was published alongside the proposed submission Plan in 2017 (PR43). The sites selected for inclusion in the Plan were considered to be the most suitable for meeting the Plan's vision and objectives and achieving sustainable development.</p> <p>The proposed safeguarded land - Site PR3(a) was assessed in the SA. The Council's strategy had already been selected and further sites submitted were not considered.</p>

		<p>The 2019 SA Addendum (PR113b) and the Council's Explanatory Note explain the reasons for the approach set out in the Council's modifications.</p>
<ul style="list-style-type: none"> • The results of the SA cannot be supported by a reasonable person when comparing the findings in relation to PR6c with those for PR7a and PR7b. • An alternative appraisal of site PR6C is provided by the promoter and they contend that their promoted site be selected rather than those proposed to be allocated. • The credentials of PR6c are diluted or dismissed entirely as a result of CDC's decision to apply mitigating factors to sites PR7a and b without doing the same at PR6c, disregarding the fact that these could be included via an intricately worded policy. 	<p>Turnberry for Exeter College (PR-D-0081)</p>	<p>The Council's consideration of reasonable options for preparation of the proposed submission Plan is set out in sections 7, 8, 9 and 10 of the 2017 SA Report (PR43). All options have been subjected to SA using the assumptions set out in Table A2.1 in the SA Report (PR43) that was published alongside the proposed submission Plan in 2017. All site options in Areas of Search A and B, (those areas in closest proximity to Oxford), were assessed in the 2017 SA Report (PR43). The sites selected for inclusion in the Plan were considered to be the most suitable for meeting the Plan's vision and objectives and achieving sustainable development.</p> <p>In response to the promoter's representation concerning the application of mitigating factors, the Council's approach is consistent with the SA of reasonable alternatives set out in sections 7, 8 and 9 of the SA Report (PR43) prepared alongside the Proposed Submission Plan in 2017. Mitigation was considered in Chapter 10 of the 2017 SA report (PR43). The process followed for the assessment of PR6c is explained in paragraphs 1.117 to 1.118 of the SA addendum (PR113b).</p> <p>The 2019 SA Addendum (PR113b) at Table 1 sets out the options considered by the Council in preparing the main modifications. The Council considers the scoring and SA process undertaken in the 2019 SA addendum (PR113b) robust. The SA Addendum and the Council's Explanatory</p>

		note set out the methodology and explain the reasons for the approach set out in the Council's modifications.
<ul style="list-style-type: none"> Reference is made to paras 1.104 and 1.146 of the SA in support of the respondent's view that the development of homes at site PR9 could take place sensitively within a broader area. 	Gerald Eve LLP for Merton College (PR-D-0084)	Noted.
<ul style="list-style-type: none"> The SA is biased and does not address local concerns. The Plan does not protect or enhance landscape character and quality or make accessible countryside for use and enjoyment. The effect to water supply and water quality should be recognised as significant problem as part of the plan. Building in the floodplain is not advisable. 	Fiona Gibson (PR-D-0052)	<p>Natural England, the Environment Agency and Historic England were consulted on the SA Scoping Report published in January 2016 (PR25). Public consultation has also taken place on an Initial SA Report (PR23), SA Report (PR43) and SA addendum (PR113b). Appendix 3 of the SA Report (PR43) provides a summary of the consultation responses and explains how they were considered and addressed.</p> <p>The SA and plan-making have been informed by appropriate evidence throughout as evidenced by the Scoping Report (PR25), Issues and Options Consultation Papers, the Initial SA Report (PR23), the SA Report (PR43), the SA addendum (PR113b), the Statement of Consultation (PR93) and submitted evidence base.</p>
<ul style="list-style-type: none"> The representation compares the Council's original assessment of Policy PR7a in the 2017 SA Report (PR43) with the appraisal in the SA addendum (PR113) and provides a commentary. 	Turley for land south east of Kidlington (PR-D-0054)	<p>All options have been subjected to SA using the assumptions set out in Appendix 2 and Table A2.1 in the SA Report (PR43) that was published alongside the Proposed Submission Plan in 2017.</p> <p>The 2019 SA Addendum (PR113b) concludes that although there will be negative effects associated with the reallocation of the 410 homes from PR10 to allocation Policies PR6a, PR6b, PR7a, PR7b and PR9, overall, the significance of these adverse effects has not changed from</p>

		<p>those already identified through the SA of the original number of homes allocated at each location.</p> <p>The 2019 SA Addendum (PR113b) at Table 1 sets out the options considered by the Council in preparing the main modifications. The Council considers the scoring and SA process undertaken in the 2019 SA Addendum (PR113b) robust. The SA Addendum and the Council’s Explanatory note set out the methodology and explain the reasons for the approach set out in the Council’s modifications. Site PR7a is a site proposed for allocation by the Council in the Partial Review which the promoter is supporting.</p>
<ul style="list-style-type: none"> • Objection is raised to modification 80 and that the SA addendum does not provide any evidence to support the change. It implies that the change is made in order to mitigate the loss of agricultural land and the potential for soil improvement is limited. 	<p>Pegasus for Barwood (PR-D-0014)</p>	<p>The SA Addendum (PR113b) provides an assessment of the modification and no significant effects are identified. The change is made to mitigate against the effects of development generally. (see the Council’s response to modification 80 above).</p>

**Schedule of Proposed Main Modifications
to the Partial Review of the Cherwell Local Plan
September 2019**

These are modifications to the Proposed Submission Plan (July 2017) following receipt of the Inspector’s Post Hearing Advice Note (July 2019). This document replaces the published Proposed Focused Changes and Minor Modifications - February 2018

The proposed Modifications to the Partial Review of the Cherwell Local Plan Proposed Submission Plan July 2017 comprise the Schedule of proposed Main and Minor Modifications and the attached Main Proposed Map Changes and Infrastructure Schedule.

New text is shown in **bold and underlined**. Deleted text is shown in **bold and ~~struckthrough~~**.

The reasons for changes and modifications are further explained in the Council’s published Explanatory note (September 2019)

Proposed modifications highlighted in grey are those suggested since receipt of the Inspector’s Advice Note.

Appendix 4 - Infrastructure Schedule (September 2019)

Combined Schedules of Proposed Focused Changes and Minor Modifications
to the Partial Review of the Cherwell Local Plan September 2019

Main Modification (Main 147) Appendix 4 Infrastructure Schedule

The Infrastructure Schedule accompanying the Local Plan (Part1) Partial Review identifies infrastructure schemes to support growth and ensures that infrastructure needs for Cherwell are incorporated in the relevant Infrastructure providers' plans and programmes. The process of infrastructure planning is an iterative one with the Council working with infrastructure providers to support the plan's growth and feeding into the wider strategic infrastructure programme led by the Oxfordshire Growth Board. Work will continue through more detailed planning stages such as the preparation of site development briefs and yearly monitoring of infrastructure planning and provision.

Growth for Cherwell is committed in the adopted Local Plan (2015) and supported by an infrastructure programme in its associated Infrastructure Delivery Plan (IDP). The IDP is updated on a yearly basis with information from infrastructure providers as part of the Council's Annual Monitoring Report. The Local Plan Part 1 Partial Review addresses Oxford's unmet housing needs within Cherwell and its preparation has considered the growth already committed in the adopted plan as well as seeking to avoid undermining the adopted plan's strategy and delivery of growth. Strategic infrastructure matters in south Cherwell are of equal relevance for the adopted Local Plan (Part 1) and the Local Plan (Part1) Partial Review.

As the Local Plan (Part1) Partial Review progresses to adoption, infrastructure monitoring and delivery will form part of the Council's yearly IDP updates and AMR reporting.

**Schedule of Proposed Minor Modifications
to the Partial Review of the Cherwell Local Plan
September 2019**

These are modifications to the Proposed Submission Plan (July 2017) following receipt of the Inspector’s Post Hearing Advice Note (July 2019). This document replaces the published Proposed Focused Changes and Minor Modifications - February 2018

The proposed Modifications to the Partial Review of the Cherwell Local Plan Proposed Submission Plan July 2017 comprise the Schedule of proposed Main and Minor Modifications, the attached Minor Proposed Map Changes and Infrastructure Schedule.

New text is shown in **bold and underlined**. Deleted text is shown in **bold and ~~struckthrough~~**.

Minor modifications – generally cover factual updates, typographical corrections and presentational improvements

The reasons for changes and modifications are further explained in the Council’s published Explanatory note (September 2019)

Proposed modifications highlighted in grey are those suggested since receipt of the Inspector’s Advice Note.

MINOR MODIFICATIONS					
Ref No.	Page no.	Section/Policy/Paragraph/ Table/Diagram	Reference	Proposed Change	Reason
Min 1	-	Whole Plan	All Relevant Maps	Update the copyright on all maps (see attached Proposed Map Changes)	Updating
Min 2	-	Whole Plan	All Relevant Maps	Improve the scale bars on all maps (see attached Proposed Map Changes)	Presentation
Min 3	-	Whole Plan	All Relevant Maps	Improve differentiation between mapping designations/shading and ensure all mapping layers are clearly visible and ensure consistency with adopted Local Plan (see attached Proposed Map Changes)	Presentation
Min 4	-	Whole Plan	All Relevant Maps	Ensure all proposed land allocations appear on other policy maps (e.g. Policy PR6b on the map for Policy PR6a) and add labels for the policies being illustrated (see attached Proposed Map Changes)	Presentation
Min 5	-	Whole Plan	All Relevant Maps	Update layer including to show correct symbolology/labelling for Ancient Woodland	Presentational Correction / Representation PR-C-0766 from BBOWT
Min 6	-	Whole Plan	All Relevant Maps	Replace BAP habitat layer with S.41 NERC Act layer	Presentational correction
Min 7	-	Whole Plan	All Relevant Maps	Show Local Wildlife Sites	Presentational correction

MINOR MODIFICATIONS					
Ref No.	Page no.	Section/Policy/Paragraph/ Table/Diagram	Reference	Proposed Change	Reason
Min 8	-	Whole Plan	All Relevant maps	Ensure Conservation Target Area layer is clearly visible on all maps (see attached Proposed Map Changes)	Presentational correction
Min 9	-	Whole Plan	Plan Text and Footnotes	Update hyperlink to Evidence List on the Council's new website and document references.	Update
Min 10	-	All policies Maps - key	All policies Maps - key	Replace site reference number <u>on the key</u> with red site boundary notation and label it 'site boundary'.	Plan Improvement / clarification
Min 11	Page 9	Executive Summary, Paragraph xxii.	2nd sentence	Amend to read as 'The policy makes it clear that if monitoring indicates that the vision and objectives cannot be met, the Council will consider whether it wishes to ask the Secretary of State for Housing, Communities and Local Government to...'	Change to the Secretary of State's title
Min 12	Page 21	Table 3	Vale of White Horse	Replace '220' with ' 2200 '	Typo
Min 13	Page 21	Text Box (Memorandum of Cooperation, November 2016)	2 nd para.	Amend paragraph to read 'The Programme does not seek to identify, propose or recommend any site or sites for additional housing within any district. Each LPA will remain responsible for the allocation of housing sites within any district. Each LPA will remain responsible for the allocation of housing sites within its own district and through its own Local Plan process.'	Copy/paste error

Main Modifications 2019

Proposed Main Modifications
Partial Review of the Cherwell Local Plan 2011-2031 Part 1:
Oxford's Unmet Housing Need

Explanatory Note

November 2019

1. Background

- 1.1. The Council submitted the Partial Review of the Cherwell Local Plan (Oxford's Unmet Housing Need) to the Secretary of State for Housing, Communities and Local Government for formal Examination on Monday 5 March 2018. The Council submitted the Proposed Submission Local Plan (July 2017) accompanied by Focused Changes and Minor Modifications (February 2018). The Submission Policies Map was included within the documents.
- 1.2. A Preliminary Hearing took place on 28 September 2018. Main Hearings were held between 5 and 13 February 2019.
- 1.3. The Inspector requested that following the Hearings the Council submit a Transport Technical Note (CD HEAR 1) and a Housing Figures Note (CD HEAR 2). The two notes, together with Statements of Common Ground and other documents submitted at the time of the Hearings were the subject of an informal consultation ending on 4 April 2019. The Council was provided with an opportunity to respond to the submissions received by the Inspector.
- 1.4. In June/July 2019 Cherwell Development Watch Alliance, Kidlington Parish Council and Begbroke Parish Council wrote to the Inspector enquiring about the potential implications of the examination of the submitted Oxford City Local Plan. The Council responded to the correspondence and wrote to the Inspector regarding the Inspector's report on the examination of the Vale of White Horse Local Plan (CDC letters to Inspector 20/6/19, 27/6/19, 4/7/19).

2. Inspector's post hearings advice note

- 2.1. The Inspector's Post-Hearings Advice Note (Document PC5) was received on 13 July 2019. In the Note the Inspector confirmed his preliminary conclusions that:
 - the 4,400 dwellings figure that represents Cherwell's apportionment of Oxford's unmet housing need provides a sound basis for the Plan;
 - the approach of locating the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors, is an appropriate strategy;

- the pressing need to provide homes, including affordable homes, to meet the needs of Oxford, that cannot be met within the boundaries of the city, in a way that minimises travel distances, and best provides transport choices other than the private car, provide the exceptional circumstances necessary to justify alterations to Green Belt boundaries;
- on density, whilst some additional capacity may be possible, the Council has struck a broadly sensible balance between the extent of land proposed to be removed from the Green Belt, and the need to accommodate development that respects its context; and
- in transport terms, the principle of siting the required allocations along an established transport corridor is a sound one.

2.2. The Inspector also advised that, with the exception of site PR10 (land South East of Woodstock), he considers the site allocations and the process by which they have been arrived at as being sound in principle. However, his note contains detailed points in relation to some of the proposed allocations which are referred to in more detail below.

2.3. The Inspector indicated that the major change required to make the Plan sound is the deletion of Policy PR10, Land South East of Woodstock, stating:

“I do not believe that the impact on the setting, and thereby the significance, of the nearby Blenheim Palace World Heritage Site (WHS) would be unacceptable, considered in isolation. However, notwithstanding the potential for screen planting, it is my view that the development of the site for housing would represent an incongruous extension into the countryside that would cause significant harm to the setting of Woodstock, and the character and appearance of the area. That, alongside the travel distance to Oxford (which is likely to tempt residents away from more sustainable travel choices like public transport or cycling notwithstanding the proximity of the site to a proposed Park & Ride facility), and the impact on the setting and significance of the WHS, lead me to the conclusion that the allocation is unsound.”

2.4. It is therefore necessary for the Council to consider how it could make provision for 410 dwellings elsewhere and to respond to the Inspector’s invitation to propose Main Modifications to address this. Whilst not precluding other approaches, the Inspector suggested ways in which this could be addressed:

“1. There could be scope to divide the 410¹ dwellings around some of the other allocations, without having any undue impact on the character and appearance of the general area;

¹ The Inspector’s references to housing numbers (410) for Site Policy PR10 and other comments in his advice note (Document PC5) indicate that the Proposed Submission Plan July 2017 is the base Plan for the preparation of Main Modifications. The higher figure of 500 at site PR10 was advanced in the original Focused Changes (February 2018 and subject to Further Focused Changes as presented in a Statement of Common Ground with Historic England (SOCG5A)). These changes are now superseded.

2. That could be combined with additional dwellings on the Policy PR9 allocation which could lead to a better-designed layout (see above); or

3. There may be the possibility that the Policy PR6c – Land at Frieze Farm allocation could accommodate some housing (and possibly the link road) as well as any replacement golf course. However, this would necessitate further land-take from the Green Belt for which exceptional circumstances would need to be demonstrated. This might prove difficult to justify unless options 1 and 2 above and any other options outside the Green Belt were shown to be unsuitable.”

2.5. In preparing its response, the Council has been cognisant that the alternative of Land to the South East of Woodstock, i.e. maintaining the PR10 allocation in some form, needs to be taken into account.

3. Approach to main modifications

3.1. The identification of modifications has been an iterative process of testing informed by the following:

- i. the Inspector’s Post-Hearings Advice Note;
- ii. existing evidence;
- iii. changes in circumstances / new information;
- iv. engagement with site promoters and cooperation with partners;
- v. new evidence including Sustainability Appraisal.

4. Main modifications

4.1. The Council has prepared two schedules of modifications: first, a schedule of Main Modifications which the Council is consulting upon; and second, for completeness, a schedule of Minor Modifications which are a matter for the Council.

4.2. The Main Modifications and Minor Modifications alter the Plan as originally proposed in July 2017. They supersede the Focused Changes and Minor Modifications published in February 2018 and other Further Focused Changes and Further Minor Modifications previously suggested by the Council; for example those in Statements of Common Ground. The Council has brought forward all modifications it is seeking. The Main Modifications suggested since receipt of the Inspector’s Advice Note are highlighted grey in the schedule. In summary the key Main Modifications proposed by the Council are as follows:

Table 1:

Site	Number of dwellings in Submission Local Plan July 2017	Number of dwellings in Main Modifications September 2019	Net change
PR6a	650	690	+40
PR6b	530	670	+140

PR7a	230	430	+200
PR7b	100	120	+20
PR8	1950	1950	No change
PR9	530	540	+10
PR10	410	0 (deleted)	-410
Total	4400	4400	0

5. Process for preparing main modifications

5.1. The process for preparing modifications has involved the following stages:

1. internal review of plan/existing evidence base in the context of the Inspector’s advice;
2. scope of significant changes in circumstances / new information;
3. identification of reasonable options;
4. formation of initial working assumptions for testing;
5. engagement with promoters;
6. evidence testing and technical engagement;
7. formation of proposed modifications and further testing;
8. completion of sustainability appraisal and consideration of conclusions;
9. consideration of exceptional circumstances for additional Green Belt alterations;
10. consideration of deliverability and implementation;
11. further engagement and finalisation of modifications.

6. Initial review of plan and existing evidence base

6.1. Officers examined the Plan and its evidence to consider whether there were any significant changes in circumstances and any ‘tolerances’ within the Plan’s proposals and evidence having regard to the Inspector’s observations. Initial findings included:

- i. the Council’s approach to housing figures was ‘broadly sensible’ (CD HEAR2 and the Inspector’s advice note). Whilst it was necessary to consider the redistribution of 410 homes, recommencing work on housing figures from ‘scratch’ was not necessary in the interest of soundness. It was necessary to look for tolerances, changes in circumstances and any new evidence;
- ii. prior to submission (February 2018) the County Council had advised that a smaller primary school was required at site PR6a (land east of Oxford Road) than originally envisaged but that this had come too late in the plan-making process to factor in to site capacity work (i.e. taking account of a ‘freed-up’ one hectare of land);
- iii. The Green Belt Study (CD PR40h, Appendix 1 pp 251 and 252, site PR178) indicated that the release of the field immediately to the south of that already proposed in the submission plan would have the same impact on the harm to the Green Belt as the proposed site. There may therefore be more scope, if shown to be exceptionally

required, to extend the development area for site PR7a (land south east of Kidlington) in a southerly direction, notwithstanding the Council's original objective of maximising the remaining gap between new development and development to the south of the A34;

- iv. The Green Belt Study (CD PR40e, Appendix 1, pp145 and 146, site PR49) indicated that the release of the field immediately to the south of that already proposed in the submission plan would have the same impact on the harm to the Green Belt as the proposed site. There may therefore be more scope, if shown to be exceptionally required, to extend the development area at site PR7b (land at Stratfield Farm), notwithstanding the Council's environmental objectives;
- v. that delivery of additional homes at site PR8 (land east of the A44) was unlikely to be achievable by 2031.

6.2. The review highlighted that Focused Changes previously put forward by the Council would need to be screened to determine which needed to be brought forward as Main (and minor) Modifications.

7. Scoping of changes in circumstances / new information

7.1. The key changes in circumstances comprised:

- i. the Inspector's advice;
- ii. additional information on the significance of trees for site PR6b (land west of Oxford Road) arising from consideration by the Council's landscape adviser (CD PR110 Figure 2, CD PR124)
- iii. additional information on highway constraints for site PR7b (land at Stratfield Farm) arising from discussions with the County Council as Highway Authority (CD PR112);
- iv. hybrid application (ref 18/02065/OUTFUL) for planning permission submitted to Oxford City Council for development at 'Northern Gateway' (now referred to as Oxford North). The outline proposals comprise employment (up to 87,300 m2 B1 space), community space, commercial space (up to 2,500 m2 A1-A5 uses), a 180 bedroom hotel, up to 480 residential units and a link road between A40 and A44 through the site. The full application proposals include 15,850 m2 of B1 employment space, access junctions from the A40 and A44 and construction of a link road between the A40 and A44. At the time of writing this note, the application was recommended by officers for approval pending decision by Planning Committee on 24th of September 2019.

8. Consideration of Reasonable Options

8.1. The Council's consideration of reasonable site options for preparation of the original Plan is set out in section 9 of the Sustainability Appraisal (SA) (CD PR43d). Section 10 of the SA sets

out the key reasons for selecting the sites proposed in the Plan, and the key reasons for rejecting other sites within the areas of search. The Inspector has not raised any concerns with the SA in his advice note.

- 8.2. The Inspector considers that the 4,400 homes proposed provides a sound basis for the Plan. His preliminary findings indicate the approach of locating the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors is an appropriate strategy. All site options in Areas of Search A and B, (those areas in closest proximity to Oxford), were assessed in the SA. The sites selected for inclusion in the Plan were considered to be the most suitable for meeting the Plan’s vision and objectives and achieving sustainable development.
- 8.3. The Inspector considers that there are exceptional circumstances necessary to justify alterations to Green Belt boundaries.
- 8.4. The Inspector has advised, *‘With one exception...I regard the various allocations, and the process by which they have been arrived at, as sound, in principle...’*. The site that the Inspector has concerns with (PR10 – land south east of Woodstock) is the only site that the Council originally proposed which is situated outside of the Oxford Green Belt.
- 8.5. Other than that site, the Council has no reason to question its site selection.
- 8.6. The Council has been aware that should it not be possible to accommodate the displaced development requirements within the Plan’s original scope, there would be a need to consider other options.
- 8.7. The options considered by the Council in preparing Main Modifications are set out in the Council’s SA Reports sections 7, 9 and 10 of the SA (CD PR43) and section 01 of the new SA Addendum (CD PR113).
- 8.8. The Council’s consideration of the options has been intrinsically linked to the sequential consideration of options required to avoid unnecessary further alteration to Green Belt boundaries and, if required, the demonstration of exceptional circumstances for further alteration.
- 8.9. The Council considered first, whether there were options outside of the Green Belt; second whether there were options requiring no additional Green Belt release; and third, in the light of the conclusions on the first and second considerations, whether there were options within the scope of the existing strategy that would acceptably and exceptionally permit further revision of Green Belt boundaries. The options considered are presented in Table 2.

Table 2: Options Considered

Options outside of the Green Belt	Options requiring no additional Green Belt release	Options within the scope of the existing strategy requiring additional Green Belt release
1) Site PR10 – Land South East of Woodstock	2) Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)	13) Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)
	3) Site PR3(b) – Land between site PR8 and the railway (minor eastward extension of site PR8)	14) Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)
	4) Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)	15) Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)
	5) Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)	16) Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)
	6) Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)	17) Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)
	7) Site PR6a – Land East of Oxford Road – intensification of developable area	18) Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)
	8) Site PR6b - Land West of Oxford Road – intensification of developable area	
	9) Site PR7a – South East Kidlington – intensification of developable area	
	10) Site PR7b – Stratfield Farm – intensification of developable area	
	11) Site PR8 – Land to east of the A44 – intensification of developable area	
	12) Site PR9 Land West of Yarnton – Intensification of developable area	

8.10. The Council’s overall conclusions are presented below.

Options outside of the Green Belt

8.11 Evidence previously submitted and examined by the Inspector explained that there are no potentially suitable options available outside of the Green Belt other than the land comprising site PR10. The Areas of Search considered are set out in section 7 of the SA (CD PR43).

Option 1: Site PR10 – Land South East of Woodstock

8.12. The Council’s evidence supporting the submitted plan considered the site to be a reasonable one to consider. Further, it was selected for policy development. The Council’s original conclusion on site selection for site PR10 is recorded in the Sustainability Appraisal (CD PR43d, para’s 10.23 to 10.36). It was concluded, *“The Council considers that the site should be taken forward for residential development albeit with the need to restrict the residential development area”*. Additionally, it was originally concluded that the effects of development would be acceptable, and that development would contribute to the achievement of sustainable development (CD PR43 Section 10). The site was the only one identified as being appropriate outside the Oxford Green Belt.

8.10. Having reviewed all written and oral evidence, the Inspector has provided a planning judgement that allocation of the site would not be sound. He has made it clear that he does not believe *“...that the impact on the setting, and thereby the significance, of the nearby Blenheim Palace World Heritage Site (WHS) would be unacceptable, considered in isolation.”*

8.11. But, notwithstanding the potential for screen planting, his view is that *‘...the development of the site for housing would represent an incongruous extension into the countryside that would cause significant harm to the setting of Woodstock, and the character and appearance of the area....’*.

8.12. This planning judgement, with the Inspector’s additional concerns about travel distance to Oxford and the setting and significance of the World Heritage Site (also following the consideration of evidence), now weighs heavily in the Council considerations.

8.13. The Council presented the Inspector with an alternative proposal for site PR10 to which Historic England had no objection. The Inspector’s judgement was made with this information available to him. The Council is mindful that housing development on adjoining development to the north west is now under construction but the influence of that development (as a West Oxfordshire allocation and planning application approval) was previously considered. The Council is also cognisant of the landscape evidence submitted by West Oxfordshire District Council (Chris Blandford Associates). In its written statement to the Examination (Matter 8 -Written Statement) West Oxfordshire District Council argued

that the proposed allocation would, inter alia, have a potential adverse impact on the local landscape and setting of Woodstock.

- 8.14. The Council has been conscious of Historic England’s position and the fact that, following the publication of the Proposed Submission Plan, no objection was received from ICOMOS. It has also been mindful of the site’s non-Green Belt location. However, it is clear that development of site PR10 would comprise a substantial development within close proximity to both Woodstock and the World Heritage Site and would change the local environment through the loss of countryside and the introduction of built development in an otherwise open setting.
- 8.15. The SA addendum notes that a reduced and/or less dense PR10 would most likely reduce the area of open greenfield land that would be developed and the potential scope and significance of adverse effects against SA objectives 9 (Historic Environment) and 13 (Efficient Use of Land). However, it noted that the same sensitivities and therefore the potential for significant negative effects still exist as for the original SA of the site. The SA also notes uncertainty as the exact scale, design and layout of a smaller allocation in this location (and any mitigations/enhancements) are unknown.
- 8.16. Having regard to all of the above considerations, and the fact that the Inspector’s concerns relate to the principle of development rather than the quantum or configuration, the Council considered that site PR10 was not suitable for the purpose of preparing main modifications. A re-configuration of the residential area would not overcome the Inspector’s concern of development extending into the countryside, causing significant harm to the setting of Woodstock and the character and appearance of the area. Similarly, a reduced number of dwellings on the site would not overcome the Inspector’s concerns on travel distance to Oxford and the wider relationship with the World Heritage Site.

Initial Working Assumption: the site is not taken forward into Main Modifications.

Options involving no additional Green Belt release

Option 2: Site PR3(a) – Proposed Safeguarded Land (southern extension of site PR8)

- 8.17. The site comprises some 7.8 hectares of land proposed for safeguarding in the Plan. The SA addendum notes the contribution that the site could make to the provision of housing, its accessibility and the potential contribution to health and well-being. It also notes significant negative effects with regard to road-based transport, landscape and efficient use of land but also some uncertainty.
- 8.18. Para. 85 of NPPF1 (2012) states that when defining Green Belt boundaries, local planning authorities (LPAs) should, where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period. It also requires LPAs to make clear that the safeguarded land is not allocated for development at the present time. It advises that planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development. It further advises that LPAs should satisfy themselves that Green Belt boundaries will not need to be altered at

the end of the development plan period. The advice is brought through in the latest NPPF (para. 139).

- 8.19. The Partial Review is an unusual Plan in that a subsequent Plan of the same focused scope is unlikely to follow. Instead the long-term strategic needs of the county will be considered through the emerging Oxfordshire Plan 2050 followed by a full district Local Plan Review. It is important that altered Green Belt boundaries endure. The Council considers that the safeguarded land proposed (policy PR3a) provides the appropriate, proportionate contingency for the future:

“PR3(a) – we are safeguarding this land beyond the Plan period. The triangle of land is situated to the south of the land allocated under policy PR8. In this location the railway line to the east of Yarnton forms a consistent and strong Green Belt boundary down to the A44. PR3(a) is safeguarded for future consideration as it will make little contribution to Green Belt purposes following the development of land east of the A44. The land is not required to meet Oxford's development needs within this Plan period”. (2017 Plan, p.76).

- 8.20. The Inspector has not identified any concerns of principle with the Council's approach to safeguarding land and it is considered that proposing this land for development now would not accord with the requirements of the NPPF.

Initial Working Assumption – retain as safeguarded land

Option 3: Site PR3(b) – Land between site PR8 and the railway (minor eastward extension of site PR8)

- 8.21. This site comprises 0.7 hectares of land. The Plan states:

“PR3(b) – we are removing a small area of land from the Green Belt to the east of Yarnton adjacent to, and to the west of, the railway line. As a result of development to the east of the A44 (policy PR8), the railway line will become the consistent and strong Green Belt boundary at the eastern edge of the development site. There is no need for PR3(b) to be allocated, reserved or safeguarded for development.”

- 8.22. The SA Addendum notes significant positive effects with regard to housing, sustainable transport and health and well-being. Significant negative effects are noted for landscape and efficient use of land. The uncertainty of some effects is acknowledged. However, the Council considered that no additional development could reasonably be delivered as part of site PR8 by 2031.

Initial Working Assumption – not a deliverable option for 2031 for Main Modifications

Option 4: Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)

- 8.23. This site comprises 11.8 hectares of land. The SA Addendum notes significant positive effects with regard to housing, employment and sustainable transport. Significant negative effects are noted for the historic environment and efficient use of land. The uncertainty of some effects is acknowledged.

8.24. The Plan (2017, p.76) states:

“PR3(c) – we are removing an area of land from the Green Belt to the south of the A34 to the west of the strategic development site allocated under policy 6b. Following the development of land to the north of Oxford and to the west of Oxford Road, the A34 will form the logical, permanent Green Belt boundary is this location. PR3(c) is not considered to be suitable for residential development but connectivity will be expected through the site to Oxford’s Northern Gateway site to the south.”

8.25. The Council’s reasons for ruling out this area of land for development are articulated in the SA (CD PR43d, section 10 para’ 10.60) and in the Housing and Economic Land Availability Assessment (HELAA) (CD PR79). Although the proposed development at North Oxford within Oxford City’s boundary will change the relationship of site PR3(c) to the surrounding area, the Council stands by its original assessment.

Initial Working Assumption - not a suitable option for Main Modifications.

Option 5: Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)

8.26. The site comprises 9.9 hectares of transport infrastructure. The SA Addendum notes significant positive effects with regard to housing, employment and accessibility but mixed results for sustainable transport (noting the impact on transport infrastructure). Significant negative effects are noted for the historic environment and efficient use of land. Again, the uncertainty of some effects is acknowledged.

8.27. The Plan (2017, p.76) states:

“PR3(d) – we are removing the existing Oxford Parkway Railway Station and the Water Eaton Park and Ride from the Green Belt. The development of land in north Oxford to the east of Oxford Road (policy PR6a) results in other land in this area being removed from the Green Belt. Again, the A34 to the north will form the logical, permanent boundary.”

8.28. These are vital and, in part, new pieces of infrastructure. Whilst the County Council is seeking to establish new Park and Ride facilities further out from Oxford, it is for the County Council as Highways Authority to determine the longer-term transport use of the existing facilities through its Local Transport Plan. Proposing housing on an existing Park and Ride facility would require additional strategic transport work over a longer period of time.

Initial Working Assumption – not a suitable option for Main Modifications

Option 6: Site PR3e – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)

8.29. The site comprises 14.7 hectares of land identified for the expansion of Begbroke Science Park. The SA Addendum notes significant positive effects with regard to housing, services and facilities and health and well-being. Significant negative effects are noted for landscape and efficient use of land. The uncertainty of some effects is acknowledged.

8.30. The Plan (2017, p.76) states:

“PR3(e) – we are removing land from the Green Belt to the north, east and west of Begbroke Science Park to ensure that a logical and permanent Green Belt boundary is established. This is in the context of, and in response to, development to the east of the A44 (policy PR8) and the conclusion of the Small Scale Green Belt Review which considers the high value employment needs at Kidlington-Begbroke. The potential extension of the Science Park will be considered further in Local Plan Part 2. Policy PR8 seeks reservation of the land for the potential expansion of the Science Park.”

8.31. The identification of this land is pursuant to policy Kidlington 1 of the adopted Local Plan 2011-2031 and is clearly evidenced. Considering the land for residential development would be contradictory to the objectives of that policy.

Initial Working Assumption - not a suitable option for Main Modifications

Option 7: Site PR6a – Land East of Oxford Road – intensification of developable area

8.32. The SA Addendum notes significant positive effects with regard to housing, employment and sustainable transport but significant negative effects for the historic environment and efficient use of land. It is noteworthy that the SA highlights the potential downside of what might commonly be seen as positive intensification i.e. the potential for more greenfield land to be developed within the confines of the existing developable area. The uncertainty of some effects is acknowledged.

8.33. Policy PR6a of the Plan (July 2017) proposes the construction of 650 dwellings on approximately 24 hectares on land east of Oxford Road. The Council considered whether some additional development could be achieved.

8.34. The review of the Plan, evidence and changes in circumstances identified that an additional one hectare of land was potentially available for housing. Policy PR6a (2017) requires the provision of a primary school on the site with at least three forms of entry (3FE) on 3.2 hectares of land. During the consultation on the Proposed Submission Plan the County Council provided updated information (CD PR78, PR-C-0832) indicating that the school requirement could be reduced to a two-forms of entry primary school on 2.2 hectares of land.

8.35. The Council’s Explanatory Note on Housing Figures (HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 650 homes could be provided at a net density of 40dph. Table 2 shows that account was taken of the site’s edge of Oxford location whilst recognising the landscape setting to the east from the Cherwell Valley, and listed St Frideswide Farmhouse.

8.36. The slightly lower density (37dph) in Table 5 reflects the fact that the additional one hectare of land became available but that no allowance was made for additional dwellings. It was therefore considered that an additional 40 homes could in principle be achieved.

- 8.37. No other changes in circumstances were identified that would affect the Council's 'broadly sensible' approach to the Plan's housing figures. Having considered changes of circumstance and having regard to the fact that the Inspector considered the allocation to be 'sound' in principle, it is considered that there are no further tolerances in the context of the site's constraints.

Initial Working Assumption – an increase from 650 to 690 homes

Option 8: Site PR6b - Land West of Oxford Road – intensification of developable area

- 8.38. The SA Addendum notes significant positive effects with regard to housing, employment and sustainable transport but significant negative effects for the historic environment and efficient use of land. The uncertainty of some effects is acknowledged.
- 8.39. Policy PR6b of the Plan (July 2017) proposes the construction of 530 dwellings on 32 hectares on land west of Oxford Road. The Inspector's preliminary conclusions are that whilst he has no doubt that North Oxford Golf Club is a much valued facility, " *the site it occupies is an excellent one for the sort of housing the Plan proposes, given its location so close to Oxford Parkway, with its Park & Ride, and its proximity to the centre of Oxford.*"
- 8.40. The Council's Explanatory Note on Housing Figures (HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 indicates a density of 25 dph for site PR6b in the Proposed Submission Plan. The relatively low density reflected the need for caution on numbers in view of the need to retain significant trees on the site.
- 8.41. The review of the Plan, evidence and changes in circumstances identified that there was now more information on important trees that gave reason to reconsider the capacity of the site. This included information from the site promoters and from the Council's internal landscape advisers to assess the significance of trees. Following internal advice from landscape and tree officers (CD PR124) the Council identified groups of trees to be retained. The Council's internal officers' assessment followed the review of developer's information and an assessment of trees on site. The groupings of important and moderate significant trees identified through Council's internal advice are shown in Figure 2 of the Council's Site Capacity Sense Check, September 2019 (CD PR110).
- 8.42. Desk top analysis of this information suggested that there was potential to increase the capacity of the site. Being mindful of Policy PR6b place shaping principles guiding proposals to 'reflect the historic use of the site' and provision of 'larger plots and wider streets to accommodate the mature trees of the former golf course' officers estimated that about 600 homes might be accommodated subject to more detailed testing.

Initial Working Assumption – an increase from 530 to 600 homes

Option 9: Site PR7a – South East Kidlington – intensification of developable area

- 8.43. The SA Addendum notes significant positive effects with regard to housing, employment, sustainable transport and health and well-being. The uncertainty of some effects is acknowledged.

- 8.44. Policy PR7a of the Plan (July 2017) proposes the construction of 230 dwellings on approximately 11 hectares on land east of Bicester Road.
- 8.45. The Council’s Explanatory Note on Housing Figures (HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 230 homes could be provided at a net density of 35 dph (avoiding development in a small part of the site within Flood Zones 2 & 3).
- 8.46. No changes in circumstances were identified that would affect the Council’s ‘broadly sensible’ approach to the residential area already identified. Having regard to the fact that the Inspector considered the allocation to be ‘sound’ in principle, it was considered that there were no further tolerances in the context of the site’s constraints.

Initial Working Assumption – no additional dwellings on the existing developable area

Option 10: Site PR7b - Stratfield Farm – intensification of developable area

- 8.47. The SA Addendum notes significant positive effects with regard to housing, sustainable transport and health and well-being but significant negative effects for the efficient use of land. The uncertainty of some effects is acknowledged.
- 8.48. Policy PR7b of the Plan (July 2017) proposes the construction of 100 dwellings on approximately 4 hectares on land at Stratfield Farm.
- 8.49. The Council’s Explanatory Note on Housing Figures (HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 100 homes could be provided at a net density of 25 dph having regard to the setting of the listed farmhouse.
- 8.50. As a result of promoter engagement with the County Council as Local Highways Authority, a less rigid position on the number of homes that could be accessed from the Kidlington roundabout emerged (later confirmed in CD PR112).
- 8.51. However, the constraints of the site and the objectives of the policy led to a conclusion that no further development could be achieved on the development area already identified, having regard to the Council’s ‘broadly sensible’ approach and the Inspector’s advice that the allocation to be ‘sound’ in principle.

Initial Working Assumption – no additional dwellings on the existing developable area

Option 11: Site PR8 – Land to east of the A44 – intensification of developable area

- 8.52. The SA Addendum notes significant positive effects with regard to housing, sustainable transport and health and well-being but significant negative effects for landscape and efficient use of land. The uncertainty of some effects is acknowledged.
- 8.53. Policy PR8 of the Plan (July 2017) proposes the construction of 1950 dwellings on approximately 66 hectares on land next to Begbroke / Yarnton.
- 8.54. The Council’s Explanatory Note on Housing Figures (CD HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 1950 homes could be provided at a net

density of 45 dph having regard to the potential for some higher density development on parts of the site.

- 8.55. No changes in circumstances were identified that would affect the Council's 'broadly sensible' approach and having regard to the fact that the Inspector considered the allocation to be 'sound' in principle.
- 8.56. It was considered that additional homes could not be delivered on the site by 2031.

Initial Working Assumption: no change

Option 12: Site PR9 Land West of Yarnton – Intensification of developable area

- 8.57. The SA Addendum notes significant positive effects with regard to housing, sustainable transport and health and well-being but significant negative effects for employment and efficient use of land. The uncertainty of some effects is acknowledged.
- 8.58. Policy PR9 of the Plan (July 2017) proposes the construction of 530 dwellings on approximately 16 hectares of land on land west of Yarnton.
- 8.59. The Council's Explanatory Note on Housing Figures (CD HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 indicates a density of 35dph for site PR9 in the Proposed Submission Plan, but notes that this assumes the 30% gross to net discount being effectively removed due to potential for shared use of playing pitch, incorporation of play facilities on that land, and immediate access to open space to the west, otherwise gross density would be high at 47 dph.
- 8.60. Following representations from the site promoter the Council further considered the precise number of dwellings to be accommodated on the site to improve deliverability and achieve a high quality of design, bearing in mind the linear form of the site and its relationship with PR8. Table 5 (CD HEAR 2) indicated a reduction to 440 dwellings, reducing gross density to 28 dph.
- 8.61. The Inspector's preliminary conclusions refer to the depth of the developable area and implications for design and layout (i.e referring to the scope for a site extension).
- 8.62. The Council considered that no additional development could be achieved on the existing developable area as identified in the Plan (July 2017).

Initial working assumption: no change to density of development within the existing developable area

Options involving additional Green Belt release

- 8.63. During the initial assessment of options involving no additional Green Belt release it was evident that there was likely to be a shortfall in the number of dwellings required, and that the Council would need to consider whether exceptional circumstances exist to justify further release of Green Belt land to meet the housing requirements. Options involving additional Green Belt release within the scope of the Plan's strategy and in the context of

the Inspector's advice (CD PC5) were therefore considered. Consideration of exceptional circumstances are found in Section 13 below.

Option 13: Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)

- 8.64. The SA Addendum notes significant positive effects with regard to housing, employment and sustainable transport but significant negative effects for the historic environment and efficient use of land. The uncertainty of some effects is acknowledged.
- 8.65. For the reasons articulated in submitted evidence (CD PR51), an eastward expansion of the site was considered to be inappropriate in terms of landscape impact. The possibility of a northern extension is discussed at 8.26.

Initial Working Assumption: extension unsuitable

Option 14: Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)

- 8.66. The SA Addendum notes significant positive effects with regard to housing and sustainable transport but significant negative effects for landscape and efficient use of land. The uncertainty of some effects is acknowledged.
- 8.67. Policy PR6c of the Plan (July 2017) is reserved for a replacement Golf Course. No land at Frieze Farm was already identified for Green Belt release. The Inspector advised that there may be the possibility that this site could accommodate some housing as well as any replacement golf course. He also advised that development of the site might provide the opportunity for the development of a link road between the A44 and A34.
- 8.68. The Council's site selection conclusions as recorded at section 10, para's 10.130 – 10.132 of the Sustainability Appraisal (CD PR 43) included, "..... Residential development would be segregated from Oxford and separated from Kidlington and Yarnton. Development would breach the A34 and be perceived as a freestanding development and a new highly urbanising influence between Oxford and Cherwell. The relatively exposed and elevated nature of the site to the south would result in residential development being highly visible from the north. Central and eastern land parcels are land locked by road and rail corridors.
- 8.69. Development of the site for housing would entail the additional release of Green Belt land in a new location. The Council does not depart from its original conclusions and therefore did not consider that the site should be brought forward for further consideration in the first instance. However, in light of the Inspector's comments, it was considered that land at Frieze Farm should be kept within scope if preparation of Main Modifications should result in an unmet housing requirement. It would have to be clear that the homes could not be provided on the sites already identified for residential development, and, in view of the Council's original conclusions about its unsuitability for housing, the site would need to be considered along with other sites within Areas of Search A and B.

Initial Working Assumption – only within scope if homes could not be distributed on existing sites and exceptionally required in the context of other alternatives

Option 15: Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)

- 8.70. The SA Addendum notes significant positive effects with regard to housing, employment, sustainable transport and health and well-being.
- 8.71. The Green Belt Study (PR40, site PR178) indicated that the release of the field immediately to the south of that already proposed in the Plan would have the same impact on the harm to the Green Belt as the proposed submission site. It was considered that, exceptionally, there might be scope to extend the developable area for the site PR7a (land south east of Kidlington) in a southerly direction, notwithstanding the Council’s original objective of maximising the remaining gap between new development and development to the south of the A34. An existing field boundary, containing approximately 9 hectares on land, marks the extent of this land.
- 8.72. By continuing to apply the assumptions on density for this site set out in CDC document HEAR 2 it was estimated that extending the site by 9 hectares could accommodate an additional 200 dwellings.

Initial Working Assumption – if exceptionally required, an increase from 230 to 430 homes with an additional 9 hectares of Green Belt land released

Option 16: Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)

- 8.73. The SA Addendum notes significant positive effects with regard to housing, sustainable transport and health and well-being but significant negative effects for efficient use of land.
- 8.74. The Green Belt Study (PR40, site PR49) indicated that the release of the field immediately to the south and west of that already proposed in the submission plan would have the same impact on the Green Belt as the proposed submission site (approximately an additional one hectare of land). It was considered that, exceptionally, there might be scope to extend the developable area at site PR7b into this area of land (defined by a field boundary) while sufficiently accommodating the Council’s environmental objectives.
- 8.75. As a result of promoter engagement with the County Council as Local Highways Authority, a less rigid position on the number of homes that could be accessed from the Kidlington roundabout emerged (CD PR112 for confirmation).
- 8.76. It was considered that the setting of the listed farmhouse and important trees could be protected.
- 8.77. By continuing to apply the previous assumptions for this site (highlighted in CD HEAR 2) it was estimated that extending the site by one hectare could accommodate an additional 30 dwellings.

Initial Working Assumption – if exceptionally required, an increase from 100 to 130 homes with an additional 1 hectare of Green Belt land released.

Option 17: Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)

- 8.78. The SA Addendum notes significant positive effects with regard to housing, sustainable transport and health and well-being but significant negative effects for landscape and efficient use of land.
- 8.79. For the reasons set out in submitted evidence (e.g. Matter 6 – Written Statement-CDC), the Council considered that an extension of this site to the east of the railway line would not be suitable in terms of the impact on the Green Belt and the need to retain an appropriate gap between new development and Kidlington alongside the Oxford Canal.

Initial Working Assumption – extension unsuitable

Option 18: Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)

- 8.80. The SA Addendum notes significant positive effects with regard to housing, sustainable transport and health and well-being but significant negative effects for employment, landscape, the historic environment and efficient use of land.
- 8.81. Policy PR9 of the Plan (July 2017) proposes the construction of 530 dwellings on approximately 16 hectares on land next to the west of Yarnton.
- 8.82. The Inspector advised that he had sympathy with the promoter’s view that a more satisfactory development might be achieved by extending the residential development area westwards. He also suggested that, in doing so, the Council considers whether some additional homes could be achieved.
- 8.83. Initial engagement with the Council’s Landscape Adviser suggested that there could be some potential subject to more detailed analysis. In the context of the Inspector’s advice, a re-examination of the promoter representations and the Council’s existing evidence (particularly on landscape and Green Belt), it was considered that a working assumption of approximately 600 homes should be put forward for further testing but only if additional Green Belt land was required.
- 8.84. *Initial Working Assumption – if exceptionally required, an increase from 530 to 600 on an area of Green Belt land to the west of the existing developable area*

Summary of Initial Working Assumptions

- 8.85. The initial working assumptions, for further testing, were as shown below:

Table 2:

Site	Number of dwellings in 2017	Initial Working Assumption 2019	Potential Green Belt Change	Net change
PR6a	650	690	No additional Green Belt	+40

PR6b	530	600	No additional Green Belt	+70
PR7a	230	430	Green Belt affected	+200
PR7b	100	130	Green Belt affected	+30
PR8	1950	1950	(no change)	No change
PR9	530	600	Green Belt affected	+70
PR10	410	0	Land outside of the Green Belt removed	-410
	4400	4400		0

9. Engagement with promoters

9.1. Meetings were held with the following promoters to provide an opportunity for each to identify any key issues that they considered the Council needed to take into account. Each was subsequently provided with a formal opportunity to submit information. It was considered that wider promoter engagement would only be required if the requisite number of homes could not be accommodated.

- Blenheim Estate – Site PR10
- Savills – Sites PR6a & PR6b
- Turnberry – Site PR6c
- Barwood & Hill Residential – Site PR7a
- Carter Jonas & Manor Oak - Site PR7b
- David Lock & Carter Jonas – Site PR8
- Gerald Eve / Merton College – Site PR9

9.2. The formal information received (August 2019) is submitted as part of the Council’s evidence base.

Site PR10- Land South East of Woodstock

9.3. The site promoter for PR10 submitted an updated development concept (CD PR123) in response to the Inspector’s preliminary conclusions, to address matters relating to settlement morphology and seek to demonstrate that the site provides a suitable sustainable and deliverable site for a new garden neighbourhood for 500 homes. A copy of e-mail exchanges with ICOMOS was later submitted which confirms ICOMOS’s position on site PR10 (CD PR123h).

9.4. The Council had regard to these submissions but considered that they did not affect its consideration of the Inspector’s preliminary conclusions nor warranted the production of additional evidence. ICOMOS had been consulted on the Proposed Submission Plan but did not respond.

Site PR6a- Land East of Oxford Road

- 9.5. The site promoter considers that site PR6a can accommodate an additional 40 dwellings by virtue of the smaller site required for school provision (CD PR116).
- 9.6. This concurred with the Council's view on the number of additional units that could be accommodated as a result of lower land take requirements. No other change of circumstances was identified.

Site PR6b- Land West of Oxford Road

- 9.7. The site promoter provided two scenarios for site PR6b (CD PR117). Based on the groupings of important and moderate significant trees identified by the Council, the Council was advised that approximately 696 dwellings could be accommodated on 17.4 ha. Based on further assessment work by the site promoter in relation to trees on the site and their relationship to its proposed green infrastructure strategy, the Council was advised that 740 dwellings could be accommodated on 18.5 ha.
- 9.8. This information was used to inform further consideration of site capacity.

Site PR6c- Land at Frieze Farm

- 9.9. The site promoter recommended that Frieze Farm be brought forward as a new allocation to minimise disruption to the Plan, place the transport strategy on a sounder footing and bring clarity around golfing re-provision. The submission indicates that the site could accommodate 410 dwellings and a 9-hole golf course (CD PR118).
- 9.10. This information did not alter the Council's position.

Site PR7a- Land South East of Kidlington

- 9.11. The site promoter's submission considered that the site could deliver an additional 200 homes through an extension of the residential area southwards, as previously promoted. It was suggested that a revised Green Belt boundary could follow a strongly defined field boundary for much of its length and restore a historic hedgeline for the remaining section (a map extract indicating the historic field boundary was provided) (CD PR119).
- 9.12. This information was used to inform further consideration of site capacity and potential Green Belt release.

Site PR7b- Land at Stratfield Farm

- 9.13. The site promoter for PR7b submitted a site layout illustrating a scheme for approximately 165 new dwellings on an extended residential area involving additional Green Belt release (CD PR120).
- 9.14. This information was used to inform further consideration of site capacity and potential Green Belt release.

Site PR8- Land East of the A44

- 9.15. The site promoters' submissions (CD PR121) did not suggest that additional dwellings could be accommodated on PR8 or that there had been a change in circumstances since their original submissions.
- 9.16. This information was used to inform further consideration of the distribution of the 410 homes.

Site PR9- Land West of Yarnton

- 9.17. Three schemes were submitted by the promoter: one for 536 homes on 15.3 hectares of land, the second for 710 homes on 18.12 hectares and the third for 780 homes on 19.9 hectares of land. A draft framework plan was submitted with a capacity analysis and incorporating revisions to site layout and to accommodate an area of land for a primary school playing field. A Landscape Appraisal Addendum was also submitted (CD PR122).
- 9.18. This information was used to inform further consideration of site capacity and potential Green Belt release.

10. Evidence testing and technical engagement

- 10.1. Cooperative engagement commenced with the County Council immediately. It was recognised that its input on the transportation and infrastructure planning implications of any Main Modifications would be essential. The Council has worked with the County Council on a continuous, iterative basis.
- 10.2. Consultants were re-engaged to assist with the following matters.
- 10.3. **Landscape** (CD PR51) – additional work (CD PR108) was undertaken to determine the appropriateness of extending site PR9 westwards onto higher ground. A site meeting took place with the promoters and landscape advisers. It was initially concluded that there was some further potential to extend PR9. The Council brought this conclusion into its thinking with a view to obtaining more detailed assessment once it was clear whether a limited or wider expansion of the site might be required.
- 10.4. **Transport** (CD PR52) – additional work (CD PR109) identified no significant barriers to the redistribution of 410 homes across the three areas of north Oxford, Kidlington and the A44 corridor. The County Council was engaged as a partner on this work. It advised that there would be no significant change to the implementation of its transport strategy as a result of the initial working assumptions; that its proposed Park and Ride at London-Oxford airport and rapid transit proposals would not be affected (other than for matters such as the implementation of specific highway measures such as stops/laybys); and, that there would be no clear benefit from the provision of a link road across Frieze Farm.
- 10.5. **Green Belt** (CD PR40) – an addendum (CD PR104) to the Cherwell Green Belt Study (PR40) was commissioned to provide advice on potential Green Belt impacts and the positioning of revised Green Belt boundaries. The Council engaged with the consultants as it became clear that some additional Green Belt release was likely to be needed. Having regard to all

existing and emerging evidence and the initial working assumptions, it was clear that potential additional release needed to be considered at sites PR7a, PR7b and PR9.

- 10.6. **Water Cycle Study** (CD PR81) – an addendum (CD PR105) to the study was commissioned to assess the impact of the proposed redistribution of dwellings on the conclusions of the Water Cycle Study 2017 (PR81). The working assumptions being examined were not considered to be significant and the summary and recommendations of the 2017 WCS were still considered to be valid.
- 10.7. **Strategic Flood Risk Assessment (SFRA)** (CD PR31, PR32, PR94) – the Council’s consultants advised that further flood risk assessment work was not required, as the Council’s existing evidence base provided sufficient information to assess the proposed modifications to the proposed development sites. A check was undertaken against the latest flood risk maps. The potential new residential areas within allocated sites PR7a, PR7b and PR9 had already been assessed as part of the overall site assessments (sites SFRA178 (PR7a), SFRA49 (PR7b) and SFRA51 (PR9), and all lay within Flood Zone 1. There are small areas of surface water flooding shown as affecting the sites, but these were considered in the original site assessments and the drafting of policies.
- 10.8. **Ecological Cumulative Impacts** (CD PR34) and addendum (CD PR106) – consultants were commissioned to assess any changes in cumulative impacts and the significance on ecological features/sites identified including Rushy Meadows Site of Special Scientific Interest (SSSI). No significant changes were identified and the study’s recommendations (CD PR34) were not altered.
- 10.9. **Site capacity** – the Council’s urban design advisers examined the Council initial working assumptions in the context of any new information available including promoter submissions. Their conclusions (CD PR110) provided some variance from the Council’s initial working assumptions. In particular, it showed that:
 - i. **site PR6b** - greater layout efficiencies could be achieved while still delivering proposed place shaping principles. It was recommended that average density be increased to 30 dph on 22.4 hectares (672 dwellings);
 - ii. **site PR7a** – a potential new southern boundary could be accommodated which resulted in an acceptable design. No change to the working assumption for the additional number of new homes (200) was suggested;
 - iii. **site PR7b** - given site constraints, some flats would be required to achieve an increase in housing numbers to about 130 units should an additional field parcel be accommodated;
 - iv. **site PR9** - a reduction in density and increase in the developable area was an appropriate response to both the site’s constraints and character considerations. A reduction to about 30 dph was suggested.

- 10.10. **Sequential Test and Exception Test (Flooding)** - The Council’s Sequential Test produced in June 2017 (CD PR53) and updated in February 2018 (CD PR95) considers the flood risk for potential strategic development options and their wider sustainability informing the allocation of sites for new homes to meet some of Oxford’s unmet housing needs in the Council’s Partial Review. No change was being proposed to the Council’s development strategy. The potential extensions to the development areas being considered were within flood zone 1. The Council considered that the existing flood risk assessment work and sequential test were sufficient to inform and justify the Council’s proposed modifications. The Council’s adopted Local Plan seeks to manage and reduce flood risk and the site policies in the Partial Review require a flood risk assessment for planning applications and would address any remaining minor flood risk.
- 10.11. **Habitats Regulations Assessment (CD PR98)** – the Addendum (CD PR107) assessed whether the redistribution of 410 houses and associated modifications to the Plan were likely to affect the findings of the Habitats Regulations Assessment Stage 1 Screening and Stage 2 Appropriate Assessment August 2018 (PR98). The Addendum concluded that the working assumptions did not change the findings and conclusions of the HRA 2018.
- 10.12. **Sustainability Appraisal (CD PR43)** – A SA Addendum (September 2019, CD PR113) was commissioned to inform the proposed modifications. It informed site selection (see section 8 above) and policy development. It included
- a summary of developments in the Plan baseline, including updates to evidence base.
 - a summary of the new plans, policies and programmes published of relevance to the Plan.
 - a schedule of the proposed modifications to the Plan, and their alternatives, and SA of their likely effects.
- 10.13. The emerging findings from evidence were relayed to the County Council to enable it to continue with its consideration of transport and infrastructure matters.

11. Formation of proposed modifications and further testing

- 11.1. The conclusions from evidence and technical engagement were examined to reconsider the initial working assumptions and prepare draft modifications. The number of dwellings proposed for sites PR6b, PR7b and PR9 changed from the initial working assumptions:

Table 3:

Site	Number of dwellings in 2017	Initial Working Assumption (2019)	Revised Draft number of dwellings (2019)	Net change
PR6a	650	690	690	+40
PR6b	530	600	670	+140
PR7a	230	430	430	+200
PR7b	100	130	120	+20
PR8	1950	1950	1950	No change

PR9	530	600	540	+10
PR10	410	0	0	-410
Total	4400	4400	4400	0

11.2. As necessary, the draft modifications were fed back into evidence testing on matters of transport (CD PR109), landscape (CD PR108), the water cycle study (CD PR105), ecology (CD PR106), Green Belt (CD PR104), Habitats Regulations Assessment (CD PR107), the site capacity work (CD PR110) and Sustainability Appraisal (CD PR 113).

11.3. As a consequence, the following additional findings emerged.

11.4. The **Landscape Assessment for site PR9** (CD PR108) concluded that the landscape could accommodate residential development on the lower slopes in the east of the study area, avoiding rising up the steeper mid-slopes, so that the enclosing function of the landform to the lower-lying broad vale would be retained. The westward extent of development should be related to the 75m AOD contour, although the strong vegetation structure to the large central field could accommodate development to about the 78m contour. A substantial green infrastructure for the development and the outer buffer of accessible greenspace would need to be secured through a development brief and a long-term management plan.

11.5. **The Green Belt Study Addendum** (CD PR104) advised as follows:

- i. **Site PR7a** – an additional release of land to the south would further erode the size of this contained area of open land but would not represent a step-change in Green Belt harm. The Addendum considered two alternative Green Belt boundaries for the southern boundary of the triangle of land. Both involved the creation of a new boundary. The evidence did not suggest a material difference between the two alternative boundaries. The modifications propose that the new planted boundary follows the line of the former field boundary removed during the 20th century.
- ii. **Site PR7b** - the release of an additional field from the Green Belt in the central part of study parcel PR49 (rated as low-moderate for harm) would not lead to a significant change in harm. Although there would be advancement of the inset settlement edge by about 70m, a field boundary hedgerow would mark a clear Green Belt edge.
- iii. **Site PR9** - the Submission Plan's proposed western boundary followed, for the most part, existing field boundaries. These boundaries also mark a distinction between areas closer to Yarnton, rated at moderate and moderate-high harm, and land to the west which was rated at high harm.

The rising landform and absence of field boundaries in the area into which further settlement expansion is proposed are the reasons for the higher harm rating, but some gradation can be identified. There is a distinction between the more gentle lower slopes on which development is proposed and the steeper hillside beyond, which is more clearly countryside. The Cherwell Green Belt Study (PR40) also noted that the higher ground formed part of the ring of hills that constitutes a key element

in Oxford's historic setting, contributing to the preservation of the City's setting and special character (the 4th Green Belt purpose), but that the lower slopes were also significant in this respect.

The change in slope is not dramatic, so the precise location of a new boundary would make little difference in Green Belt terms, but a new Green Belt edge approximating to the lower end of this topography (at around the 75m contour) would nonetheless define an area in which harm to the Green Belt purposes, although greater than that associated with the formerly proposed release, would be lower than the harm associated with the release of the higher slopes.

- 11.6. **Site capacity work (CD PR110)** – the findings of landscape and Green Belt work were fed into the site capacity work to help finalise the conclusions.
- 11.7. The **Transport Assessment Addendum** (CD PR109) concluded that taken together, the proposed re-distribution of 410 dwellings were expected to have a net-positive overall effect on previously assessed transport impacts. Additional homes at sites PR6a, PR6b, PR7a and PR7b (located closer to Oxford and Oxford Parkway/Water Eaton Park and Ride) is expected to result in a net reduction of trips along the A44 corridor. Combined with greater scope for walking, cycling and public transport use the proposed re-distribution would help to ease forecast future congestion on the southern sections of the A44 corridor.
- 11.8. Oxfordshire County Council confirmed that the proposed re-distribution of 410 dwellings would require minimal changes to the package of transport improvements developed to support the Plan.
- 11.9. **Water Cycle Study** (CD PR105) - the analysis indicated that the proposals would result in a reduction in forecasted growth at Cassington and Woodstock Waste Water Treatment Works (WWTW), but an increase in forecasted growth for the Oxford WWTW. The change was not considered significant and the Addendum therefore confirms that the summary and recommendations of the 2017 WCS are still valid having regard to the proposed Main Modifications.
- 11.10. **Ecological Advice - Cumulative Impacts Addendum** (CD PR106) – this concluded that the proposed increase in dwellings on sites PR6a, PR6b, PR7a, PR7b and PR9 did not change the cumulative impact assessment for the strategic sites nor the recommendations in the original study (CD PR34).
- 11.11. **Habitats Regulations Assessment Addendum** (CD PR107) - this addendum to the Habitats Regulations Assessment Stage 1 Screening and Stage 2 Appropriate Assessment August 2018 (PR98) assessed the proposed modifications to determine whether the findings of the HRA 2018 are still pertinent. The Addendum concluded that the proposed modifications do not change the findings and conclusions of the HRA 2018. The proposed modifications will therefore not have an adverse effect on the integrity of Oxford Meadows SAC either alone or in-combination with other projects and plans.

12. Completion of sustainability appraisal and consideration of conclusions

- 12.1. The SA Addendum which considered the Main Modifications in the context of the original SA work, concluded that although there will be negative effects associated with the reallocation of the 410 homes from PR10 to the other existing proposed allocations (Policies PR6a, PR6b, PR7a, PR7b and PR9), the significance of these adverse effects has not changed from those already identified through the SA of the original number of homes allocated at each location.
- 12.2. More generally, it was concluded that the proposed modifications would contribute positively to, but not change, the overall cumulative effects of the Local Plan Partial Review as a whole, as recorded in the June 2017 SA Report. Similarly, the potential sustainability effects of the proposed modifications to the Local Plan Partial Review in combination with the likely effects of other related plans, programmes and projects are not different from those recorded in the June 2017 SA Report. The appraisal of alternatives in the SA addendum has informed the Council's modifications to the Proposed Submission Plan (July 2017). The Plan, with the modifications, with regard to the results of SA is considered to contribute towards the achievement of sustainable development.
- 12.3. Many of the proposed modifications do not alter the findings set out in the 2017 SA Report because they correct factual errors or represent minor updates to the wording of policies and supporting text for clarity rather than meaning.

13. Consideration of exceptional circumstances for additional Green Belt alterations

- 13.1. The Council's exceptional circumstances for the original Plan have been articulated in evidence. The Inspector has provided advice that he considers that there are exceptional circumstances for development in the Green Belt. The Inspector noted that the Council would need to demonstrate exceptional circumstances for any further changes.
- 13.2. The Council relies on its original evidence with the following additional circumstances:
 - i. the proposed housing requirement has been found to be sound;
 - ii. the Plan's strategy has been found to be sound;
 - iii. there are now no suitable options for development outside of the Oxford Green Belt (with the deletion of site PR10);
 - iv. all other proposed allocations have been found to be sound in principle;
 - v. the Council's approach to housing figures and the alteration to Green Belt boundaries has been found to be 'broadly sensible';
 - vi. in preparing modifications the Council has considered carefully whether additional development could be achieved without further alteration to Green Belt boundaries. Additional housing can be accommodated on sites PR6a and PR6b, however this would not account for all of the 410 dwellings shortfall resulting from the deletion of site PR10;

- vii. in the context of housing need and the plan’s strategy, additional Green Belt release at site PR7a (10 hectares) can be justified while retaining a significant, albeit narrower, gap (11.5 hectares) to the A34 and the achievement of policy objectives for green infrastructure and sport and recreation. The Council’s evidence demonstrates that additional development would be acceptable and contribute to the achievement of sustainable development;
- viii. in the context of housing need and the plan’s strategy, additional Green Belt release at site PR7b (1 hectare) can be justified while bringing development slightly further south from Kidlington. Whilst there is some impact on the environmental objectives for the site, it is considered that significant positive use of the Green Belt and net biodiversity gains can still be achieved as set out in the policy. The Council’s evidence demonstrates that additional development would be acceptable and contribute to the achievement of sustainable development;
- ix. in the context of housing need and the plan’s strategy, additional Green Belt release at site PR9 (9 hectares) can be justified while extending the development westwards. Whilst there is additional landscape impact, the Council’s additional evidence demonstrates that this would be acceptable. A deeper development can be achieved allowing for an improved layout and form of development and accommodating a wider playing pitch for the nearby school. The Council’s evidence demonstrates that the additional development would be acceptable and contribute to the achievement of sustainable development.

14. Consideration of deliverability and implementation

- 14.1. An updated infrastructure schedule was prepared informed by discussions with stakeholders including the County Council which forms part of the Schedule of Main Modifications.
- 14.2. The Housing Trajectory was updated and is included in the Proposed Modifications. The site phasing has been removed in light of the proposed deletion of site PR10 and the passing of time. The expected delivery rates at the proposed sites have been updated with the exception of the PR8 site (Land East of the A44) which remains unchanged. A 5.3-year supply can be achieved for 2021-2026; 2021 being the start date for monitoring delivery in accordance with the Oxfordshire Growth Board agreement (CD PR28, para. 3.5)
- 14.3. An update to the Plan’s viability assessment has been produced (CD PR111). This tested the viability of the proposed modifications as an addendum to the Viability Assessment 2017 (CD PR49). All sites are shown to be viable with 50% affordable housing.
- 14.4. The Council’s view is that the Plan with Main Modifications is deliverable by 2031.

15. Further Engagement and Finalisation of modifications

- 15.1 The ‘direction of travel’ on the Main Modifications was used to inform a series of discussions with prescribed bodies to determine whether there were any ‘show-stoppers’ or other key issues that required consideration (CD PR 114).

- 15.2 No issues were identified that required reconsideration of the modifications. Of note were informal comments seeking assurance that the Council would fully meet its housing requirements (to avoid the risk of subsequent overspill), interest in whether the modifications would lead to higher densities, and the need to avoid flood risk areas in considering increased densities/extending developable areas.
- 15.3 The modifications were subsequently finalised. The table below summarises the final housing numbers, areas and densities resulting from the proposed modifications, and supersedes Table 5 of HEAR 2 (CDC Housing Figures Note).

Site	Site Area (ha)	Gross Residential Area (excluding prescribed uses such as schools, land identified in site policy for specific uses) (ha)	Net Residential Area with 30% Discount	Proposed Number of Dwellings	Density on Gross Residential Area	Density on Net Residential Area
PR6a - Land East of Oxford Road	48	25	17.5	690	28	39
PR6b - Land West of Oxford Road	32	32	22.4	670	21	30
PR7a - Land South East of Kidlington	32	21	14.7	430	20	29
PR7b - Land at Stratfield Farm	10.5	5	3.5	120	24	34
PR8 - Land East of the A44	190	66	46.2	1950	30	42
PR9 - Land West of Yarnton	99	25	17.5	540	22	31
Total / Average				4400	24	34

16. Conclusions

- 16.1 The Council has prepared a Schedule of Main Modifications to respond to the Inspector's invitation in his Post Hearing Advice Note to make alternative provision for the 410 dwellings proposed in the submission plan at site PR10 (land south east of Woodstock).
- 16.2 The Main Modifications have been prepared having regard to the Plan's strategy and objectives; the results of the Sustainability Appraisal on site selection, through the detailed findings of evidence, including on transport, landscape, green belt, ecology, flood risk, a site capacity sense check, the process of Sustainability Appraisal and considerations of deliverability and viability. All reasonable spatial options have been considered and unsuitable options have been discounted. The Council considers that the proposed Main Modifications have been soundly prepared and will achieve sustainable development.
- 16.2 The Council has sought to minimise the additional land to be removed from the Green Belt. It considers that the harm caused to the Green Belt is outweighed by the benefits of locating

development in accordance with the Plan strategy and that exceptional circumstances have been demonstrated.

Cherwell Local Plan 2011-2031 (Part 1)
Partial Review – Oxford’s Unmet Housing Need
Inspector: Paul Griffiths BSc(Hons) BArch IHBC
Programme Officer: Ian Kemp
idkemp@icloud.com
Tel: 07723 009166

Post-Hearings Advice Note

Preamble

This Note sets out, in brief, the preliminary conclusions I have reached about the *Cherwell Local Plan 2011-2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need* (the Plan) as submitted, taking account of what I heard at the hearings in February 2019, and the various written submissions that have followed on from them. It deals with a series of points that have been made about the Plan and most importantly, at this stage of the process, sets out some changes that are required to make the plan sound. While I have briefly outlined my position on some key issues, my full reasoning will be provided in my final report.

The Quantification of Oxford’s Unmet Housing Need (the figure of 4,400 that represents Cherwell’s Apportionment)

This 4,400 figure, which provides the basis for the Plan, has drawn a lot of criticism both at the Hearings, and since. In particular, the Review of the Oxfordshire SHMA 2014 and Oxford City SHMA Update 2018 produced by ORS suggests that the base figure that leads to the identification of Oxford’s total unmet need as 15,000 units, of which Cherwell’s share is 4,400, is significantly inflated. I note that the Inspectors charged with examining the recently submitted Oxford Local Plan 2036 have raised some preliminary questions about Oxford’s base figure of 1,356 dpa suggesting, amongst other things, that the issue could have a bearing on the level of unmet need which would have to be accommodated in neighbouring authorities, and could potentially affect the amount of land released from the Green Belt.

With that in mind, some participants have suggested that the Examination should be suspended until Oxford’s housing needs, and following on from that, its unmet needs, are quantified through the examination of the Oxford Local Plan.

I appreciate, to some, that seems a reasonable position to take. Indeed, it might be said that some means of looking at the housing and other needs of Oxford, and the surrounding Boroughs, simultaneously, in a strategic way, would be a good idea. However, that is not the way in which the planning system is currently set up.

The Planning Inspectorate has a duty to appoint Inspectors to carry out an independent examination expeditiously on submission and is not involved in discussions between authorities about timetabling, or anything else, before Plans are submitted. I would also observe that the Council’s adopted Local Plan includes an undertaking to conduct a partial review to address Oxford’s unmet housing need within two years of adoption. That partial review is the subject of this examination.

In that context, there can be no reasonable justification for suspending the examination to allow the Oxford examination to be advanced to its final stages.

Turning to the 4,400 figure itself, it has been arrived at through what I regard as a robust process where Oxford, and (most of) the surrounding authorities, co-operated, through the Oxfordshire Growth Board (OGB) to identify Oxford's unmet need, and apportion it between them. In many ways, the OGB is a model of how the duty-to-co-operate should work.

The ORS Report criticises the basis for the 4,400 figure for Cherwell, but it offers no alternative. Likewise, it might well be argued that the figure is based on a SHMA that is of some vintage, but the Oxfordshire SHMA 2014 is the only basis for considering Oxford's needs in the context of the wider HMA before the examination and I consider the figure to be robust when considered against the (2012 version of) the Framework and the associated Guidance.

I accept that the Inspectors examining the Oxford Local Plan might have raised some preliminary questions about Oxford's housing needs, but they have yet to reach any conclusions on the matter and are likely to be some way off doing so.

All in all, like my colleagues who examined Local Plans in West Oxfordshire, and the Vale of White Horse, I find nothing problematic in the Plan's reliance on the figures produced and agreed through the OGB. I consider that the 4,400 figure provides a sound basis for the Plan.

The Strategy

Put simply, the approach taken is to locate the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors. To my mind, while most of the allocations proposed are in the Oxford Green Belt, this is an appropriate strategy because it is that most likely to foster transport choices other than the private car and minimise travel distances, and least likely to interfere with the delivery of housing elsewhere in Cherwell.

Exceptional Circumstances

The Council has set out why it considers that the exceptional circumstances to justify the removal of land from the Oxford Green Belt are in place. I agree that the pressing need to provide homes, including affordable homes, to meet the needs of Oxford, that cannot be met within the boundaries of the city, in a way that minimises travel distances, and best provides transport choices other than the private car, provide the exceptional circumstances necessary to justify alterations to Green Belt boundaries.

The Various Allocations

With one exception, that I deal with below, I regard the various allocations, and the process by which they have been arrived at, as sound, in principle. There are, however, detailed points that I need to address at this stage.

First, and most fundamental, is the allocation proposed in Policy PR10 – Land South East of Woodstock. I do not believe that the impact on the setting, and thereby the significance, of the nearby Blenheim Palace World Heritage Site (WHS) would be unacceptable, considered in isolation. However, notwithstanding the potential for screen planting, it is my view that the development of

the site for housing would represent an incongruous extension into the countryside that would cause significant harm to the setting of Woodstock, and the character and appearance of the area. That, alongside the travel distance to Oxford (which is likely to tempt residents away from more sustainable travel choices like public transport or cycling notwithstanding the proximity of the site to a proposed Park & Ride facility), and the impact on the setting and significance of the WHS, lead me to the conclusion that the allocation is unsound. I make some suggestions as to how this might be dealt with under the heading 'Main Modifications' below.

Second, I have no doubt that the North Oxford Golf Club is a much-valued facility. However, the site it occupies is an excellent one for the sort of housing the Plan proposes, given its location so close to Oxford Parkway, with its Park & Ride, and its proximity to the centre of Oxford. In that light, I do not find the allocation proposed in Policy PR6b – Land West of Oxford Road unsound, in principle.

I raised a question at the hearings about the reference in the policy (under criterion 17) to the need for any application to be supported by enough information to demonstrate that the tests contained in paragraph 74 of the (2012) NPPF are met, so as to enable development of the golf course. Policy PR6c – Land at Frieze Farm allocates land for a replacement golf course and from what I saw of the existing golf course, it could, if necessary, provide equivalent or better provision in terms of quantity and quality, on a site very close to the existing facility.

On that basis, notwithstanding questions around whether the existing gold course is surplus to requirements, which are addressed under criterion 21 in any event, the tests in paragraph 74 have been met and criterion 17 can be deleted.

In terms of Policy PR9 – Land West of Yarnton, I have some sympathy with the points made in relation to the depth of development allowed for in the overall allocation. From what I saw of the site, there is scope for the developable area to extend westward and this might well provide the scope for a development more interesting in its design and layout. I return to this matter below.

Density

As submitted, the various allocation policies in the Plan each refer to an expectation that dwellings would be built to conform with an approximate average net density. The Council has proposed what I would regard as a Main Modification (MM) removing these references. To my mind, that is a reasonable course. Each of the allocation policies sets out the number of dwellings to be provided on each respective site, so the reference to density is superfluous.

There are other issues raised on the subject too. Most important is the suggestion that in anticipating relatively low-density developments, the land take from the Green Belt proposed by the Plan is greater than it might be. However, in allocations of the type proposed, land take is not the only consideration. Higher density developments, on smaller sites, on the edge of what in some cases are quite small-scale settlements, would appear out of place and have a markedly harmful impact on their surroundings.

Some additional capacity may be possible, a matter I discuss further below, but overall, the Council has struck a broadly sensible balance between the extent of the land proposed to be removed from the Green Belt, and the need to accommodate development that respects its context. I see nothing unsound in that approach.

Access/Highways

It is fair to note at the outset that building 4,400 homes to accommodate Oxford's unmet need anywhere in Cherwell is likely to have significant impacts in traffic terms. However, as I have alluded to above, the principle of siting the required allocations along an established transport corridor is a sound one. I accept that traffic along this transport corridor is already relatively heavy, but the route clearly offers the best opportunity to provide incoming residents with opportunities to travel by means other than the private car. Moreover, development along the corridor can reasonably be expected to contribute to transport improvements along it, including those that encourage means of access into Oxford by means other than the private car.

It was put to me that if the land covered by Policy PR6c – Land at Frieze Farm was allocated for housing, then a link road between the A44 and A34 could be provided that would alleviate congestion at the roundabouts to the south. That might assist but I do not consider the possibility sufficient reason to justify allocation of the site, or part of the site, for housing. That said, there may be other reasons why housing on the site might prove necessary (see below).

I recognise that the allocations, and other factors, will lead to changes to the highway network, like the closure to vehicular traffic of Sandy Lane. However, while such changes might be inconvenient, to some, the impact they would involve is not such that it renders the Council's approach unreasonable, or the Plan unsound.

Main Modifications

The Council has already proposed a series of changes to the Plan and consideration will need to be given as to whether these are in fact MMs. As a guide, I consider that anything that meaningfully changes an actual Policy, or in the case of supporting text, goes to the heart of the approach, will be a MM and will need to be consulted upon. Anything that falls short of a MM is a matter for the Council. I have covered the example of the deletion to references to approximate average net densities above and this provides a guide as to where the line should be drawn.

The major change required to the Plan to make it sound is the deletion of Policy PR10. This gives rise to a necessity to make provision for 410 dwellings, 50% of which are to be affordable housing, elsewhere. While I do not seek to rule out other approaches the Council might wish to take, there seems to me to be several ways in which this might be addressed:

1. There could be scope to divide the 410 dwellings around some of the other allocations, without having any undue impact on the character and appearance of the general area;
2. That could be combined with additional dwellings on the Policy PR9 allocation which could lead to a better-designed layout (see above); or
3. There may be the possibility that the Policy PR6c – Land at Frieze Farm allocation could accommodate some housing (and possibly the link road) as well as any replacement golf course. However, this would necessitate further land-take from the Green Belt for which exceptional circumstances would need to be demonstrated. This might prove difficult to justify unless options 1 and 2 above and any other options outside the Green Belt were shown to be unsuitable.

The other major change I have set out is the deletion of criterion 17 in Policy PR6b – Land West of Oxford Road. On my analysis, that deletion would not necessitate any other change to the policy in general, or criterion 21 that deals with the provision of a replacement golf course in particular. However, that may be an aspect the Council would want to consider further.

On another issue, there are several references in the policies of the Plan to the (2012 version of the) NPPF. While the Plan is being examined under the auspices of that document, any planning applications that flow from the Plan will be considered against the February 2019 (or any subsequent) version. On that basis, while forms of words taken from it can be retained, specific references to the NPPF should be removed throughout the various policies.

Concluding Remarks

There are several matters here that will require careful consideration by the Council, and I am content for time to be allowed for that to take place (though I would appreciate an early indication of how long might be required). What the Council have already proposed, and what I cover here, may also require updates to the Sustainability Appraisal and other parts of the evidence base. The Council will need to consider such matters too.

Once all MMs, and any associated updates to the evidence base have been put together, I will want to consider them, and may have further comments having done so. After that, the MMs and associated updates will need to be consulted upon, of course, and it may be that another Hearing is required to discuss the results of that process. Alternatively, it may then be possible for me to proceed to my report. I will of course, keep this under review.

Sustainability Appraisal Addendum

Introduction

- 1.1 Cherwell District Council commissioned LUC in October 2015 to carry out a Sustainability Appraisal (SA) incorporating Strategic Environmental Assessment (SEA) of the Cherwell Local Plan Partial Review (the Plan). There have been four key outputs from the SA of the Local Plan Partial Review to date:
- A SA Scoping Report was prepared and consulted upon with an Issues Paper in January 2016.
 - An initial SA Report was prepared and consulted upon with an Options Paper in November 2016.
 - A full SA Report was prepared and consulted upon with the proposed submission Plan in June 2017.
 - A SA Addendum appraising a series of main and minor modifications to the proposed submission Plan was also submitted with the suite of documents for examination alongside the proposed submission Plan in February 2018.
- 1.2 Following each stage of consultation, all representations relating to the SA process were reviewed. Appendix 3 of the SA Report, consulted upon alongside the proposed submission Plan in June 2017, contains a summary of the representations received during the consultations on the Scoping Report and initial SA Report. Appendix 1 in the 2018 SA Addendum contained a summary of the representations received during the consultation on the proposed submission Plan and 2017 SA Report. This consultation summary includes SA responses to representations received; however, no updates to the 2017 SA Report were considered necessary.
- 1.3 This current, second SA Addendum has informed all the Council's proposed modifications to the Partial Review proposed submission Plan (2017) (referred to hereafter as the SA Addendum). It includes:
- A summary of the Plan examination process to date, including the Inspector's initial findings.
 - A summary of developments in the Plan baseline, including updates to its evidence base since the first SA Addendum (2018).
 - A summary of the new plans, policies and programmes published of direct and indirect relevance to the Plan since the first SA Addendum (2018).
 - A detailed schedule of all the proposed modifications to the proposed submission Plan (2017), including Main Modifications and Minor Modifications, and a SA of their likely effects.
 - A summary of the Council's consideration of reasonable alternatives to the proposed modifications to the proposed submission Plan and associated SA findings for each reasonable alternative.
- 1.4 **Appendix 2** contains a copy of the SA Framework used to appraise the effects of the Plan.

Local Plan Partial Review examination and initial Inspector findings

- 1.5 Cherwell District Council submitted the Local Plan Partial Review (Oxford's Unmet Housing Need) to the Secretary of State for Housing, Communities and Local Government for formal examination on 5th March 2018. Following a Preliminary Hearing on 28th September, the Main Hearings of the examination process were held between 5th-13th February 2019.

- 1.6 Following completion of the Main Hearing Sessions the Inspector then published an Advice Note setting out preliminary conclusions on 10th July 2019. In summary, the Inspector found *'that the 4,400 figure provided a sound basis for the Plan'* and referred to the spatial strategy for accommodating this growth within the Plan period as *'appropriate...because it is that most likely to foster transport choices other than the private car and minimise travel distances, and least likely to interfere with the delivery of housing elsewhere in Cherwell'*. The Inspector refers to *'the various allocations and the process by which they have been arrived at, as sound, in principle'* with one exception: the allocation proposed in Policy PR10 – Land South East of Woodstock. Allocation Policy PR10 is considered unsound by the Inspector due to the impact it would have on the countryside and setting of Woodstock, as well as the Blenheim Palace World Heritage Site and its travel distance to Oxford. This gives rise to a necessity to make provision for 410 dwellings, 50% of which are to be affordable housing, elsewhere. The Inspector makes reference to the possibility for the 410 dwellings to be reallocated amongst the remaining allocations.
- 1.7 The Inspector states that *'the Council has struck a broadly sensible balance between the extent of the land proposed to be removed from the Green Belt, and the need to accommodate development that respects its context'*. The Inspector endorsed the removal of the expectation within each allocation policy *'that dwellings would be built to conform with an approximate average net density'*, acknowledging that each allocation policy sets out the number of dwellings to be provided within each site.
- 1.8 Lastly, whilst the Plan is being examined under the 2012 National Planning Policy Framework (NPPF), any planning applications that follow the publication of the Plan will be considered against the February 2019 NPPF (or any subsequent version). Consequently, the Inspector recommended that references to the 2012 version of the NPPF be removed from the Plan.

Proposed modifications to the Plan

- 1.9 Following the examination hearings and receipt of the Inspector's note, Cherwell District Council has prepared a schedule of proposed modifications to the proposed submission Plan (2017) (see **Table 3**). The schedule sets out all the proposed modifications to the proposed submission Plan (2017) and the reasoning behind each proposed modification. All the modifications appraised in the first SA Addendum (published in February 2018) that have not been superseded in the examination process to date are appraised again here alongside the new modifications identified during the examination process. The most notable modification is the deletion of allocation Policy PR10 (proposed by the Inspector) and the reallocation of 410 homes amongst the remaining allocation policies, specifically allocation Policies PR6a, PR6b, PR7a, PR7b and PR9.
- 1.10 All the proposed modifications to the proposed submission Plan (2017) and their sustainability implications are considered in further detail in the section titled "Significant effects of the proposed modifications to the Plan" below.

Reasonable alternatives to the proposed modifications to the Plan

- 1.11 The SEA Directive requires the consideration of reasonable alternatives to the published proposed modifications.
- 1.12 Most of the modifications to the proposed submission Plan address minor details in the Plan, for example relating to the size of specific land uses on the proposed allocated sites and text clarifications and corrections. Such changes are not considered to have reasonable alternatives. However, there are a range of options for dealing with the modifications associated with the deletion of allocation Policy PR10 and the redistribution of the 410 dwellings elsewhere within the District. This section explores the range of options for redistributing additional development.
- 1.13 The Council's consideration of reasonable options for preparation of the proposed submission Plan is set out in sections 7, 8, 9 and 10 of the Sustainability Appraisal (2017) (CD PR43). The Inspector has not raised any concerns with the SA in his advice note.

- 1.14 The Inspector considers that the 4,400 homes proposed provides a sound basis for the Plan. His preliminary findings indicate the approach of locating the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors is an appropriate strategy. All site options in Areas of Search A and B, (those areas in closest proximity to Oxford), were assessed in the SA. The sites selected for inclusion in the Plan were considered to be the most suitable for meeting the Plan's vision and objectives and achieving sustainable development. The Inspector considers that there are exceptional circumstances necessary to justify alterations to Green Belt boundaries.
- 1.15 The Inspector has advised, '*With one exception...I regard the various allocations, and the process by which they have been arrived at, as sound, in principle...*'. The site that the Inspector has concerns with is the only site (PR10 – land south east of Woodstock) that the Council originally proposed which is situated outside of the Oxford Green Belt.
- 1.16 Other than this site, the Council has no reason to question its site selection process to date, including the non-selection of all reasonable alternatives to the proposed site allocations considered to date.
- 1.17 Consequently, consideration of reasonable alternatives to the redistribution of the 410 homes has focussed exclusively on options that relate to accommodating additional homes within the scope of the existing strategy; specifically, on or in the immediate vicinity of the existing site allocations and options within the Plan Policies PR3a-PR10. All these options are considered to be reasonable to consider.
- 1.18 The Council has been aware that should it not be possible to accommodate the displaced development requirements within the Plan's original scope, there would be a need to consider other options.
- 1.19 The options considered by the Council in preparing Main Modifications are set out in **Table 1** below. It has been important for the Council to consider options to avoid unnecessary further alteration to Green Belt boundaries and, if required, the demonstration of exceptional circumstances for further alteration.
- 1.20 The Council therefore considered 1) options outside of the Green Belt; 2) options requiring no additional Green Belt release; and 3) having regard to the conclusions on 1) and 2) whether there were options within the scope of the existing strategy that would acceptably and exceptionally permit further revision of Green Belt boundaries.

Table 1 – Reasonable site options considered by the Council and subjected to SA

Options outside of the Green Belt	Options requiring no additional Green Belt release	Options within the scope of the existing strategy requiring additional Green Belt release
1) Site PR10 – Land South East of Woodstock	2) Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)	13) Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)
	3) Site PR3(b) – Land between site PR8 and the railway (minor eastward extension of site PR8)	14) Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)
	4) Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)	15) Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)

Options outside of the Green Belt	Options requiring no additional Green Belt release	Options within the scope of the existing strategy requiring additional Green Belt release
	5) Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)	16) Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)
	6) Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)	17) Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)
	7) Site PR6a – Land East of Oxford Road – intensification of developable area	18) Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)
	8) Site PR6b - Land West of Oxford Road – intensification of developable area	
	9) Site PR7a – South East Kidlington – intensification of developable area	
	10) Site PR7b – Stratfield Farm – intensification of developable area	
	11) Site PR8 – Land to east of the A44 – intensification of developable area	
	12) Site PR9 Land West of Yarnton – Intensification of developable area	

Approach to the SA of reasonable alternatives

- 1.21 All options have been subjected to SA using the assumptions set out in **Appendix 2** and Table A2.1 in the full SA Report that was published alongside the proposed submission Plan in 2017 (CD PR43). In the absence of detailed and consistent information on the feasibility of each site option the assumptions give no consideration to the mitigation or enhancement measures that may come forward in each site. This approach is consistent with the SA of reasonable alternatives set out in sections 7, 8 and 9 of the full SA Report prepared alongside the proposed submission Plan in 2017 (CD PR43). In addition to the sources of evidence and data set out in the assumptions in **Appendix 2**, the updated evidence bases set out in **Appendix 1** have been used to inform judgements as appropriate. Detailed appraisal matrices for each reasonable site option are set

out in **Appendix 3**. The likely significant effects of each option are summarised below and presented in **Table 2**.

SA of reasonable alternatives outside of the Green Belt

Option 1 – Site PR10 – Land South East of Woodstock

Significant effects of Option 1

- 1.22 The proposed submission Plan allocates land at PR10 for the delivery of 410 homes on approximately 16 hectares south east of Woodstock. The area identified within Policy PR10 was previously appraised as site option 22 and also included a portion of site 25 (a much smaller site). The potential significant effects of a smaller allocation in this location are the same as those identified in the appraisal of site 22 in Appendix 6 of the SA Report that accompanied the proposed submission Plan (2017):
- Reducing the size of the allocation would likely result in the delivery of fewer homes within the allocation. Consequently, the significant positive effect previously recorded against SA objective 1 (Housing) is likely to be less significant. Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is still recorded against **SA objective 1 (Housing)** for Oxford.
 - Given the relatively remote location of the site to Oxford and the city's jobs as **significant negative** (--) effect is recorded against **SA objective 16 (Employment)** for Oxford. Reducing the scale of development in this location is not considered to change this effect.
 - Due to the high to medium sensitivity of the historic environment within and in the vicinity of the site evidenced in the Council's Archaeology and Heritage Assessment, most notably due to the close proximity of the site to a Scheduled Monument and the Blenheim Palace World Heritage Site, an uncertain **significant negative** (--) effect is recorded against **SA objective 9 (Historic Environment)** for Cherwell.
 - The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value.
- 1.23 Although site 25 scored a significant negative effect against SA objective 8 (Landscape), due to the fact that PR10 focussed development in site 22 and only covered the southern portion of site 22, an uncertain minor negative effect is recorded. The effects of less development in this location are considered to be similar.
- 1.24 While reducing the eastward extent of site allocation PR10 and or reducing the density of development within PR10 would most likely reduce the area of open greenfield land that would be developed reducing the potential scope and significance of adverse effects against SA objectives 9 (Historic Environment), 13 (Efficient Use of Land), and 8 (Landscape), the same sensitivities and therefore the potential for significant negative effects still exist. The uncertainty associated with these effects is in recognition of the fact that the exact scale, design and layout of a small allocation in this location are unknown. Furthermore, the potential and feasibility of mitigation and enhancement measures in a smaller allocation are unknown.
- The Council's Reasons for Site Selection / Rejection*
- 1.25 The Council notes the SA results.
- 1.26 The site is a reasonable option to consider. It was selected for policy development for the submitted Plan. The Council's original conclusion on site selection for site PR10 is recorded in the Sustainability Appraisal (CD PR43d, para's 10.23 to 10.36). It was concluded, "*The Council considers that the site should be taken forward for residential development albeit with the need to restrict the residential development area*". Additionally, it was originally concluded that the

effects of development would be acceptable and that development would contribute to the achievement of sustainable development (PR43 Section 10). The site was the only one identified as being appropriate outside the Oxford Green Belt.

- 1.27 Having reviewed all written and oral evidence, the Inspector has provided a planning judgement that allocation of the site would not be sound. He has made it clear that he does not believe *"...that the impact on the setting, and thereby the significance, of the nearby Blenheim Palace World Heritage Site (WHS) would be unacceptable, considered in isolation."*
- 1.28 But, notwithstanding the potential for screen planting, his view is that *'...the development of the site for housing would represent an incongruous extension into the countryside that would cause significant harm to the setting of Woodstock, and the character and appearance of the area...'*.
- 1.29 This planning judgement, with the Inspector's additional concerns about travel distance to Oxford and the setting and significance of the World Heritage Site (also following the consideration of evidence), now weighs heavily in the Council considerations.
- 1.30 The Council presented the Inspector with an alternative proposal for site PR10 to which Historic England had no objection. The Inspector's judgement was made with this information available to him. The Council is mindful that housing development on adjoining development to the north west is now under construction but the influence of that development (as a West Oxfordshire allocation and planning application approval) was previously considered. The Council is also cognisant of the landscape evidence submitted by West Oxfordshire District Council (Chris Blandford Associates). In its written statement to the Examination (Matter 8 -Written Statement) West Oxfordshire District Council argued that the proposed allocation would, inter alia, have a potential adverse impact on the local landscape and setting of Woodstock.
- 1.31 The Council has been conscious of Historic England's position and the fact that, following the publication of the proposed submission Plan, no objection was received from ICOMOS. It has also been mindful of the site's non-Green Belt location. However, it is clear that development of site PR10 would comprise a substantial development within close proximity to both Woodstock and the World Heritage Site and would change the local environment through the loss of countryside and the introduction of built development in an otherwise open setting.
- 1.32 It is noted that the effects of a potentially smaller/reconfigured allocation at PR10 are considered to perform broadly the same in SA terms when compared to the original site allocation PR10. However, having regard to all of the above considerations, and the fact that the Inspector's concerns relate to the principle of development rather than the quantum or configuration, site PR10 is not considered to be suitable for the purpose of preparing main modifications.
- 1.33 A re-configuration of the residential area would not overcome the Inspector's concern of development extending into the countryside, causing significant harm to the setting of Woodstock and the character and appearance of the area. Similarly, a reduced number of dwellings on the site would not overcome the Inspector's concerns on travel distance to Oxford and the wider relationship with the World Heritage Site.
- 1.34 The Council considers that site PR10 should not be taken forward into Main Modifications.

SA of reasonable alternatives involving no additional Green Belt release

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8) *Significant effects of Option 2*

- 1.35 The developable area identified in site allocation policy PR8 in combination with an expansion into safeguarded site PR3a is likely to result in the following significant effects:
 - Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, **a significant positive (+ +) effect** is recorded against **SA objective 1 (Housing)** for Oxford. However,

by extending the developable area this option is likely to generate a more significant positive effect than the original allocation against this SA objective.

- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell. The expansion of the developable area in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.
- The site is in close proximity to a GP surgery, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell. The expansion of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an expansion option is likely to be more positive for more people.
- Due to the contribution that the open land plays in and around PR8 in maintaining openness of the countryside to the east of Yarnton identified in the Council's Landscape Character Sensitivity and Capacity Assessment (2017) an uncertain **significant negative** (--) effect is recorded against **SA objective 8 (Landscape)** for Cherwell. A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of sensitive open countryside.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect. A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, including agricultural land.

1.36 Given the exact layout, scale and design of the potential expansion are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.37 The Council notes the SA results.

1.38 The site comprises some 7.8 hectares of land proposed for safeguarding in the Plan.

1.39 Para. 85 of NPPF1 (2012) states that when defining Green Belt boundaries, local planning authorities (LPAs) should, where necessary, identify in their plans areas of 'safeguarded land' between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period. It also requires LPAs to make clear that the safeguarded land is not allocated for development at the present time. It advises that planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development. It further advises that LPAs should satisfy themselves

that Green Belt boundaries will not need to be altered at the end of the development plan period. The advice is brought through in the latest NPPF (para. 139).

- 1.40 The Partial Review is an unusual Plan in that a subsequent Plan of the same focused scope is unlikely to follow. Instead the long-term strategic needs of the county will be considered through the emerging Oxfordshire Plan 2050 followed by a full district Local Plan Review. It is important that altered Green Belt boundaries endure. The Council considers that the safeguarded land proposed (policy PR3a) provides the appropriate, proportionate contingency for the future:

"PR3(a) – we are safeguarding this land beyond the Plan period. The triangle of land is situated to the south of the land allocated under policy PR8. In this location the railway line to the east of Yarnton forms a consistent and strong Green Belt boundary down to the A44. PR3(a) is safeguarded for future consideration as it will make little contribution to Green Belt purposes following the development of land east of the A44. The land is not required to meet Oxford's development needs within this Plan period". (2017 Plan, p.76).

- 1.41 The Inspector has not identified any concerns of principle with the Council's approach to safeguarding land and it is considered that proposing this land for development now would not accord with the requirements of the NPPF.
- 1.42 The Council considers that site PR3(a) should not be taken forward as a site for residential development into Main Modifications.

Option 3 – Site PR3(b) – Land between site PR8 and the railway (minor eastward extension of site PR8)

Significant effects of Option 3

- 1.43 The developable area identified in site allocation policy PR8 in combination with an expansion into safeguarded site PR3b is likely to result in the following significant effects:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by extending the developable area this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities) and 10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and Cherwell. The expansion of the developable area in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.
- The site is in close proximity to a GP surgery, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell. The expansion of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an expansion option is likely to be more positive for more people.
- Due to the contribution that the open land plays in and around PR8 in maintaining openness of the countryside to the east of Yarnton identified in the Council's Landscape Character Sensitivity and Capacity Assessment (2017) an uncertain **significant negative** (--) effect is recorded against **SA objective 8 (Landscape)** for Cherwell. An eastern extension to the

developable area of PR8 to include the safeguarded land PR3b would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of sensitive open countryside.

- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect. An eastern extension to the developable area of PR8 to include the safeguarded land PR3b would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, including agricultural land.

1.44 Given the exact layout, scale and design of the potential expansion are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.45 The Council notes the SA results.

1.46 This site comprises 0.7 hectares of land. The Plan states:

"PR3(b) – we are removing a small area of land from the Green Belt to the east of Yarnton adjacent to, and to the west of, the railway line. As a result of development to the east of the A44 (policy PR8), the railway line will become the consistent and strong Green Belt boundary at the eastern edge of the development site. There is no need for PR3(b) to be allocated, reserved or safeguarded for development."

1.47 It is considered that no additional development could reasonably be delivered as part of site PR8 by 2031.

1.48 The Council considers that site PR3(b) should not be taken forward as a site for residential development into Main Modifications.

Option 4 – Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)

Significant effects of Option 4

1.49 The developable area identified in site allocation policy PR6b in combination with an expansion into safeguarded site PR3c is likely to result in the following significant effects:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by expanding the area of development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
- The site has good accessibility to Oxford, specifically its employment centres. Consequently, a **significant positive** (++) effect is recorded against **SA objective 16 (Employment)**. The expansion of development in this location is unlikely to significantly change the significance of this effect.
- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities) and 10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and Cherwell. The expansion of

development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.

- Due to the high to medium sensitivity of the historic environment within and in the vicinity of the site evidenced in the Council's Archaeology and Heritage Assessment and the land within this site playing some role in the setting of historic Oxford, an uncertain **significant negative** (--) effect is recorded against **SA objective 9 (Historic Environment)** for Cherwell. A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect the setting of local historic assets as well as unknown archaeological assets.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, including agricultural land.

- 1.50 Given the exact layout, scale and design of the potential expansion are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

- 1.51 The Council notes the SA results.

- 1.52 This site comprises 11.8 hectares of land. The Plan (2017, p.76) states:

"PR3(c) – we are removing an area of land from the Green Belt to the south of the A34 to the west of the strategic development site allocated under policy 6b. Following the development of land to the north of Oxford and to the west of Oxford Road, the A34 will form the logical, permanent Green Belt boundary at this location. PR3(c) is not considered to be suitable for residential development but connectivity will be expected through the site to Oxford's Northern Gateway site to the south."

- 1.53 The Council's reasons for ruling out this area of land for development are articulated in the SA at Section 10, para' 10.60 and in the Housing and Economic Land Availability Assessment (HELAA) (CD 79). Although the proposed development at North Oxford within Oxford City's boundary will change the relationship of site PR3(c) to the surrounding area, the Council stands by its original assessment.
- 1.54 The Council considers that site PR3(c) should not be taken forward as a site for residential development into Main Modifications.

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)

Significant effects of Option 5

- 1.55 The developable area identified in site allocation policy PR6a in combination with an expansion into safeguarded site PR3d is likely to result in the following significant effects:
- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by expanding development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.

- The site has good accessibility to Oxford, specifically its employment centres. Consequently, a **significant positive** (++) effect is recorded against **SA objective 16 (Employment)**. However, the northward expansion would result in the loss, or a reduction in the size of the Water Eaton Park and Ride. The close proximity of Oxford Parkway railway station maintains the value of the location as a sustainable location; however the loss of or potential reduction in the size of the park and ride is likely to introduce additional negative effects. The significance of these negative effects is unknown until the extent, design and layout of a potential northward expansion are known. Consequently, an uncertain mixed (significant positive and minor negative effect (++/-?)) is recorded overall.
- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities) and 10 (Air Quality and Congestion)** for Oxford and Cherwell. A northward expansion to the developable area identified in PR6a would result in the loss, or a reduction in the size of the Water Eaton Park and Ride. An extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location; however the loss of or potential reduction in the size of the park and ride is likely to introduce additional negative effects. The significance of these negative effects is unknown until the extent, design and layout of a potential northward expansion are known. Therefore an uncertain mixed (significant positive/minor negative (++/-?)) is recorded against SA objective overall. The significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and Cherwell. The expansion of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation. How much the loss of or reduction in the size of the Water Eaton Park and Ride as a result of a northward expansion compounds the significant adverse effects against SA objective 10 is uncertain (?).
- Due to the high to medium sensitivity of the historic environment within and in the vicinity of the site evidenced in the Council's Archaeology and Heritage Assessment and the land within this site playing some role in the setting of historic Oxford, an uncertain **significant negative** (--) effect is recorded against **SA objective 9 (Historic Environment)** for Cherwell. A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation due to the fact that the land to the north is developed and used as the Water Eaton Park and Ride.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation due to the fact that the land to the north is developed and used as the Water Eaton Park and Ride.

1.56 Given the exact layout, scale and design of the potential expansion are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.57 The Council notes the SA results.

1.58 The site comprises 9.9 hectares of transport infrastructure.

1.59 The Plan (2017, p.76) states:

"PR3(d) – we are removing the existing Oxford Parkway Railway Station and the Water Eaton Park and Ride from the Green Belt. The development of land in north Oxford to the east of Oxford Road

(policy PR6a) results in other land in this area being removed from the Green Belt. Again, the A34 to the north will form the logical, permanent boundary."

- 1.60 These are vital and, in part, new pieces of infrastructure. Whilst the County Council is seeking to establish new Park and Ride facilities further out from Oxford, it is for the County Council as Highways Authority to determine the longer-term transport use of the existing facilities through its Local Transport Plan. Proposing housing on an existing Park and Ride facility would require additional strategic transport work over a longer period of time.
- 1.61 The Council considers that site PR3(d) should not be taken forward as a site for residential development into Main Modifications.

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)

Significant effects of Option 6

- 1.62 The developable area identified in site allocation policy PR8 in combination with an expansion into safeguarded site PR3e is likely to result in the following significant effects:
- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by extending the developable area this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
 - Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities) and 10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell. The expansion of the developable area in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.
 - The site is in close proximity to a GP surgery, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell. The expansion of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an expansion option is likely to be more positive for more people.
 - Due to the contribution that the open land plays in and around PR8 in maintaining openness of the countryside to the east of Yarnton identified in the Council's Landscape Character Sensitivity and Capacity Assessment (2017) an uncertain **significant negative** (--) effect is recorded against **SA objective 8 (Landscape)** for Cherwell. A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of sensitive open countryside.
 - The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing

developable area, increasing the significance of this effect. A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, including agricultural land.

- 1.63 Given the exact layout, scale and design of the potential expansion are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

- 1.64 The Council notes the SA results.

- 1.65 The site comprises 14.7 hectares of land identified for the expansion of Begbroke Science Park.

- 1.66 The Plan (2017, p.76) states:

"PR3(e) – we are removing land from the Green Belt to the north, east and west of Begbroke Science Park to ensure that a logical and permanent Green Belt boundary is established. This is in the context of, and in response to, development to the east of the A44 (policy PR8) and the conclusion of the Small Scale Green Belt Review which considers the high value employment needs at Kidlington-Begbroke. The potential extension of the Science Park will be considered further in Local Plan Part 2. Policy PR8 seeks reservation of the land for the potential expansion of the Science Park."

- 1.67 The identification of this land is pursuant to policy Kidlington 1 of the adopted Local Plan 2011-2031 and is clearly evidenced. Considering the land for residential development would be contradictory to the objectives of that policy.

- 1.68 The Council considers that site PR3(d) should not be taken forward as a site for residential development into Main Modifications.

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area *Significant effects of Option 7*

- 1.69 The intensification of the developable area identified in site allocation Policy PR6a is likely to generate the following significant effects:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
- The site has good accessibility to Oxford, specifically its employment centres. Consequently, a **significant positive** (++) effect is recorded against **SA objective 16 (Employment)**. The intensification of development in this location is unlikely to significantly change the significance of this effect.
- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and Cherwell. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.
- Due to the high to medium sensitivity of the historic environment within and in the vicinity of the site evidenced in the Council's Archaeology and Heritage Assessment and the land within

this site playing some role in the setting of historic Oxford, an uncertain **significant negative** (--) effect is recorded against **SA objective 9 (Historic Environment)** for Cherwell. The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.

- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.

1.70 Given the exact layout, scale and design of the intensified development in this location are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.71 The Council notes the SA results.

1.72 Policy PR6a of the Plan (July 2017) proposes the construction of 650 dwellings on approximately 24 hectares on land east of Oxford Road. The Council considered whether some additional development could be achieved.

1.73 The review of the Plan, evidence and changes in circumstances identified that an additional one hectare of land was potentially available for housing. Policy PR6a (2017) requires the provision of a primary school on the site with at least three forms of entry (3FE) on 3.2 hectares of land. During the consultation on the proposed submission Plan the County Council provided updated information (CD PR78, PR-C-0832) indicating that the school requirement could be reduced to a two-forms of entry primary school on 2.2 hectares of land. This land is available to consider for residential development.

1.74 The Council considers that the intensification option for site PR6a **should** be taken forward into Main Modifications.

Option 8 – Site PR6b - Land West of Oxford Road – intensification of developable area
Significant effects of Option 8

1.75 The intensification of the developable area identified in site allocation Policy PR6b is likely to generate the following significant effects:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
- The site has good accessibility to Oxford, specifically its employment centres. Consequently, a **significant positive** (++) effect is recorded against **SA objective 16 (Employment)**. The intensification of development in this location is unlikely to significantly change the significance of this effect.
- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site

are likely to load onto roads covered by AQMAS in Oxford and Cherwell. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.

- Due to the high to medium sensitivity of the historic environment within and in the vicinity of the site evidenced in the Council's Archaeology and Heritage Assessment and the land within this site playing some role in the setting of historic Oxford, an uncertain **significant negative** (--) effect is recorded against **SA objective 9 (Historic Environment)** for Cherwell. The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.

1.76 Given the exact layout, scale and design of the intensified development in this location are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.77 The Council notes the SA results.

1.78 Policy PR6b of the Plan (July 2017) proposes the construction of 530 dwellings on 32 hectares on land west of Oxford Road. The Inspector's preliminary conclusions are that whilst he has no doubt that North Oxford Golf Club is a much valued facility, " *the site it occupies is an excellent one for the sort of housing the Plan proposes, given its location so close to Oxford Parkway, with its Park & Ride, and its proximity to the centre of Oxford.*"

1.79 The Council's Explanatory Note on Housing Figures (HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 530 homes could be provided at a net density of 25 dph. The relatively low density reflected the need for caution on numbers in view of the need to retain significant trees on the site.

1.80 The review of the Plan, evidence and changes in circumstances identified that there was now more information on important trees that gave reason to re-consider the capacity of the site.

1.81 The Council considers that the intensification option for site PR6b **should** be taken forward into Main Modifications.

Option 9 – Site PR7a – South East Kidlington – intensification of developable area

Significant effects of Option 9

1.82 The intensification of the developable area identified in site allocation Policy PR7a is likely to generate the following significant effects:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, **a significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
- The site has good accessibility to Oxford, specifically its employment centres. Consequently, a **significant positive** (++) effect is recorded against **SA objective 16 (Employment)**.

The intensification of development in this location is unlikely to significantly change the significance of this effect.

- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.
- The site is in close proximity to Gosford Hill Medical Centre, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell. The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.

- 1.83 Given the exact layout, scale and design of the intensified development in this location are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

- 1.84 The Council notes the SA results.
- 1.85 Policy PR7a of the Plan (July 2017) proposes the construction of 230 dwellings on approximately 11 hectares on land east of Oxford Road.
- 1.86 The Council's Explanatory Note on Housing Figures (HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 230 homes could be provided at a net density of 35 dph (avoiding development in a small part of the site within Flood Zones 2 & 3).
- 1.87 The Inspector considers that the Council has taken a 'broadly sensible' balance with its housing figures. No changes in circumstances have been identified that would affect the Council's approach within the residential area identified.
- 1.88 The Council considers that the intensification option for site PR7a should not be taken forward into Main Modifications.

Option 10 – Site PR7b – Stratfield Farm – intensification of developable area

Significant effects of Option 10

- 1.89 The intensification of the developable area identified in site allocation Policy PR7b is likely to generate the following significant effects:
- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
 - Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the

fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.

- The site is in close proximity to Gosford Hill Medical Centre, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell. The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.

1.90 Given the exact layout, scale and design of the intensified development in this location are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

- 1.91 The Council notes the SA results.
- 1.92 Policy PR7b of the Plan (July 2017) proposes the construction of 100 dwellings on approximately 4 hectares on land at Stratfield Farm.
- 1.93 The Council's Explanatory Note on Housing Figures (HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 100 homes could be provided at a net density of 25 dph having regard to the setting of the listed farm house.
- 1.94 As a result of promoter engagement with the County Council as Local Highways Authority, a less rigid position on the number of homes that could be accessed from the Kidlington roundabout emerged.
- 1.95 The Inspector considers that the Council has taken a 'broadly sensible' balance with its housing figures. No changes in circumstances have been identified that would affect the Council's approach within the residential area already identified.
- 1.96 The Council considers that the intensification option for site PR7b should not be taken forward into Main Modifications.

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area

Significant effects of Option 11

- 1.97 The intensification of the developable area identified in site allocation Policy PR8 is likely to generate the following significant effects:
- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.

- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.
- The site is in close proximity to a GP surgery, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell. The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.
- Due to the contribution that the open land plays in and around PR8 in maintaining openness of the countryside to the east of Yarnton identified in the Council's Landscape Character Sensitivity and Capacity Assessment (2017) an uncertain **significant negative** (--) effect is recorded against **SA objective 8 (Landscape)** for Cherwell.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.

1.98 Given the exact layout, scale and design of the intensified development in this location are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.99 The Council notes the SA results.

1.100 Policy PR8 of the Plan (July 2017) proposes the construction of 1950 dwellings on approximately 66 hectares on land next to Begbroke / Yarnton.

1.101 The Council's Explanatory Note on Housing Figures (CD HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 shows that 1950 homes could be provided at a net density of 45 dph having regard to the potential for some higher density development on parts of the site.

1.102 The Inspector considers that the Council has taken a 'broadly sensible' balance with its housing figures. No changes in circumstances have been identified that would affect the Council's approach within the residential area already identified.

1.103 The Council considers that the intensification option for site PR8 should not be taken forward into Main Modifications.

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area

Significant effects of Option 12

1.104 The intensification of the developable area identified in site allocation Policy PR9 is likely to generate the following significant effects:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting

Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.

- The site has poor accessibility to Oxford, specifically its employment centres. Consequently, a **significant negative** (--) effect is recorded against **SA objective 16 (Employment)**. The intensification of development in this location is unlikely to significantly change the significance of this effect.
- The site is a location with good access to Cherwell's sustainable transport network and in close proximity to some of Yarnton's services and facilities, notably a primary school, a shop and a village hall. Therefore, a **significant positive** (++) effect is recorded against **SA objective 6 (Services and Facilities)** for Cherwell. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities, increasing the significance of this effect.
- The site is in close proximity to Yarnton Medical Practise, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell. The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value. The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.

1.105 Given the exact layout, scale and design of the intensified development in this location are unknown there is some uncertainty associated with some of these effects. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.106 The Council notes the SA results.

1.107 Policy PR9 of the Plan (July 2017) proposes the construction of 530 dwellings on approximately 16 hectares of land on land west of Yarnton.

1.108 The Council's Explanatory Note on Housing Figures (CD HEAR 2) clarifies the approach taken to housing figures for the site. Table 3 indicates a density of 35dph for site PR9 in the proposed submission Plan, but notes that this assumes the 30% gross to net discount being effectively removed due to potential for shared use of playing pitch, incorporation of play facilities on that land, and immediate access to open space to the west, otherwise gross density would be high at 47 dph.

1.109 The Inspector's preliminary conclusions refer to the depth of the developable area and implications for design and layout (i.e. referring to the scope for a site extension)

1.110 The Council has previously considered that no additional development could be achieved on the existing developable area as identified in the Plan (July 2017).

1.111 The Council considers that the intensification option for site PR9 in its current form should not be taken forward into Main Modifications.

SA of reasonable alternatives involving additional Green Belt release

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)

Significant effects of Option 13

- 1.112 Both the developable area identified in the site allocation policy and the land identified for a potential extension to the allocation to accommodate more homes fall within site option 50. The site was previously appraised in Appendix 6 of the SA Report that accompanied the proposed submission Plan (2017). Given the exact location, scale and extent of an extension are unknown the significant effects identified in the appraisal of site option 50 are considered to apply and are equally uncertain. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.
- 1.113 The significant effects identified in the appraisal of site 50 are:
- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford.
 - The site has good accessibility to Oxford, specifically its employment centres. Consequently, a **significant positive** (++) effect is recorded against **SA objective 16 (Employment)**.
 - Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities) and 10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and Cherwell.
 - Due to the high to medium sensitivity of the historic environment within and in the vicinity of the site evidenced in the Council's Archaeology and Heritage Assessment, most notably due to the site containing St. Frideswide's Farmhouse a Grade II* Listed Building and Grade II listed wall. There are also several other listed buildings in close proximity and 25 recorded, non-designated heritage assets, of which eight are located within the site. Furthermore, the low hilltops, floodplain and wooded character in the site provide a containing edge to views towards Oxford from the north adding to the rural character of Oxford's setting. Therefore, an uncertain **significant negative** (--) effect is recorded against **SA objective 9 (Historic Environment)** for Cherwell.
 - The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value.

The Council's Reasons for Site Selection / Rejection

- 1.114 The Council notes the SA results.
- 1.115 For the reasons articulated in submitted evidence (CD PR51) the Council considers that an eastward of the site is inappropriate in terms of landscape impact.
- 1.116 The Council considers that an eastward extension of the site would not be suitable and should not be taken forward into Main Modifications

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)

Significant effects of Option 14

1.117 The proposed submission Plan allocates land at PR6c for the delivery of a replacement golf course displaced from its current location within site allocation PR6b. In the Inspector's note, the Inspector raises the possibility that the allocation Policy PR6c "could accommodate some housing, (and possibly a link road) as well as a replacement golf course". The land identified within allocation Policy PR6c has been previously appraised as a potential residential development site, but only as part of a larger area of land (Site 39a) including an additional two parcels of land to the east of the A4260 and A34 respectively (see Appendix 6 of the SA Report that accompanied the proposed submission Plan (2017)). Consequently, a new option for delivering up to 410 homes within PR6c alongside the delivery of a golf course has been appraised as a new reasonable alternative. The potential significant effects of this option are:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford.
- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities) and 10 (Air Quality and Congestion)** for Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell.
- Due to the relatively exposed and elevated nature of the site to the south, which would result in residential and golf development being highly visible from areas to the north including the southern areas of Kidlington and Yarnton identified in the Council's Landscape Character Sensitivity and Capacity Assessment (2017) an uncertain **significant negative** (--) effect is recorded against **SA objective 8 (Landscape)** for Cherwell.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value.

1.118 The uncertainty associated with these effects is also in recognition of the fact that the exact scale, design and layout of residential and golf development in this location are unknown. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

The Council's Reasons for Site Selection / Rejection

1.119 The Council notes the SA results.

1.120 Policy PR6c of the Plan (July 2017) reserves this 30 ha site for a replacement Golf Course. The land is not proposed for Green Belt release. The Inspector advised that there may be the possibility that this site could accommodate some housing as well as any replacement golf course. He also advised that development of the site might provide the opportunity for the development of a link road between the A44 and A34.

1.121 The Council's original site selection conclusions as recorded at section 10, para's 10.130 – 10.132 of the SA (CD PR43) included, "..... Residential development would be segregated from Oxford and separated from Kidlington and Yarnton. Development would breach the A34 and be perceived as a freestanding development and a new highly urbanising influence between Oxford and Cherwell. The relatively exposed and elevated nature of the site to the south would result in residential development being highly visible from the north. Central and eastern land parcels are land locked by road and rail corridors".

- 1.122 Development of the site for housing would entail the additional release of Green Belt land in a new location. The Council does not depart from its original conclusions and therefore does not consider that the site should be brought forward for further consideration. However, in light of the Inspector's comments, it is considered that land at Frieze Farm should be kept within scope if preparation of Main Modifications resulted in an unmet housing requirement. It would have to be clear that the homes could not be provided on the sites already identified for residential development, and, in view of the Council's original conclusions about its unsuitability for housing, the site would need to be considered along with other sites within Areas of Search A and B.
- 1.123 In conclusion, the Council considers that this site should only be considered further if homes cannot be distributed on existing sites and if it is exceptionally required in the context of other alternatives within Areas of Search A and B.

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)

Significant effects of Option 15

- 1.124 Both the developable area identified in the site allocation policy and the land identified for a potential extension to the allocation to accommodate more homes fall within site options 202 and 178 (in combination). Both sites were previously appraised in Appendix 6 of the SA Report that accompanied the proposed submission Plan (2017). Given the exact location, scale and extent of an extension are unknown the significant effects identified in the appraisal of site options 202 and 178 are considered to apply and are equally uncertain. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.
- 1.125 The significant effects identified in the appraisal of sites 202 and 178 are:
- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford.
 - The site has good accessibility to Oxford, specifically its employment centres. Consequently, a **significant positive** (++) effect is recorded against **SA objective 16 (Employment)**.
 - Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and Cherwell.
 - The site is in close proximity to Gosford Hill Medical Centre, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell.

The Council's Reasons for Site Selection / Rejection

- 1.126 The Council notes the SA results.
- 1.127 The Green Belt Study (PR40, site PR178) indicated that the release of the field immediately to the south of that already proposed in the Plan would have the same impact on the harm to the Green Belt as the proposed submission site. Exceptionally, there may be scope to extend the development area for the site PR7a (land south east of Kidlington) in a southerly direction, notwithstanding the Council's original objective of maximising the remaining gap between new development and development to the south of the A34. An existing field boundary, containing approximately 9 hectares on land, marks the extent of this land.
- 1.128 The Council considers that a southern extension of the existing site **should** be taken forward into Main Modifications.

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)

Significant effects of Option 16

- 1.129 Both the developable area identified in the site allocation policy and the land identified for a potential extension to the allocation to accommodate more homes fall within site option 49 previously appraised in Appendix 6 of the SA Report that accompanied the proposed submission Plan (2017). Given the exact location, scale and extent of an extension are unknown the significant effects identified in the appraisal of site option 49 are considered to apply and are equally uncertain. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.
- 1.130 The significant effects identified in the appraisal of site 49 are:
- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford.
 - Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities)** and **10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell.
 - The site is in close proximity to Gosford Hill Medical Centre, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell.
 - The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value.

The Council's Reasons for Site Selection / Rejection

- 1.131 The Council notes the SA results.
- 1.132 The Green Belt Study (PR40, site PR49) indicated that the release of the field immediately to the south of that already proposed in the submission plan would have the same impact on the Green Belt as the proposed submission site (approximately an additional one hectare of land). Exceptionally, there may be scope to extend the development area at site PR7b into this area of land (defined by a field boundary) while sufficiently accommodating the Council's environmental objectives.
- 1.133 The County Council as Local Highways Authority has advised that is now has a less rigid position on the number of homes that could be accessed from the Kidlington roundabout.
- 1.134 It is considered that setting of the listed farmhouse and important trees could be protected.
- 1.135 The Council considers that a southern / western extension of the existing site **should** be taken forward into Main Modifications.

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)

Significant effects of Option 17

- 1.136 Both the developable area identified in the site allocation policy and the land identified for a potential extension to the allocation to accommodate more homes fall within site options 20a and

126 (in combination). Both sites were previously appraised in Appendix 6 of the SA Report that accompanied the proposed submission Plan (2017). Given the exact location, scale and extent of an extension are unknown the significant effects identified in the appraisal of site options 20a and 126 are considered to apply and are equally uncertain. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

1.137 The significant effects identified in the appraisal of sites 20a and 126 are:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford.
- Given the accessible location of the site to the sustainable transport network a **significant positive** (++) effect is recorded against **SA objectives 6 (Services and Facilities) and 10 (Air Quality and Congestion)** for Oxford and Cherwell. However, the significant positive effects recorded against SA Objective 10 (Air Quality and Congestion) are also mixed with **significant negative** (--) effects for both Oxford and Cherwell in acknowledgement of the fact that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAS in Oxford and Cherwell.
- The site is in close proximity to Yarnton Medical Practise and Gosford Hill Medical Centre, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell.
- The Council's Landscape Character Sensitivity and Capacity Assessment (2017) notes that there is medium to low capacity for development across portions of the site due to the potential for development within this area to result in the spread of the residential area of Yarnton to the east of the A44 Woodstock Road in an area that is disassociated with the smaller area of residential development to the north. Therefore an uncertain **significant negative** (--) effect is recorded against **SA objective 8 (Landscape)** for Cherwell.
- Notable sensitivities recorded include A significant negative effect is therefore expected on this SA objective.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value.

The Council's Reasons for Site Selection / Rejection

1.138 The Council notes the SA results.

1.139 For the reasons set out in submitted evidence (Matter 6 – Written Statement), the Council considers that an extension of this site to the east of the railway line would not be appropriate in terms of the impact on Green Belt and the need to retain an appropriate gap between new development and Kidlington alongside the Oxford Canal. The Council has no reason to depart from its original conclusions.

1.140 The Council considers that an eastern extension of the site to the east of the railway would not be suitable and should not be taken forward into Main Modifications.

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)

Significant effects of Option 18

1.141 Both the developable area identified in the site allocation policy and the land identified for a potential extension to the allocation to accommodate more homes fall within site option 51 previously appraised in Appendix 6 of the SA Report that accompanied the proposed submission Plan (2017). Given the exact location, scale and extent of an extension are unknown the

significant effects identified in the appraisal of site option 51 are considered to apply and are equally uncertain. Furthermore, the potential and feasibility of mitigation and enhancement measures in this alternative are unknown.

1.142 The significant effects identified in the appraisal of site 51 are:

- Given the general assumption set out in Appendix 2 and set out in Table A2.1 in the full SA Report (June 2017) that all sites are considered to make a significant contribution to meeting Oxford's unmet housing need, by virtue of their size and potential capacity, a **significant positive** (++) effect is recorded against **SA objective 1 (Housing)** for Oxford.
- The site has poor accessibility to Oxford, specifically its employment centres. Consequently, a **significant negative** (--) effect is recorded against **SA objective 16 (Employment)**.
- The site is a location with good access to Cherwell's sustainable transport network and in close proximity to some of Yarnton's services and facilities, notably a primary school, a shop and a village hall. Therefore, a **significant positive** (++) effect is recorded against **SA objective 6 (Services and Facilities)** for Cherwell.
- The site is in close proximity to Yarnton Medical Practise, a number of open spaces, sports facilities and public rights of way. New residents are therefore more likely to be encouraged to use these facilities as part of a more physically active and healthier lifestyle. As such, a **significant positive** (++) effect is recorded against **SA objective 2 (Health and Wellbeing)** for Cherwell.
- The Council's Landscape Character Sensitivity and Capacity Assessment (2017) notes that there is medium to low capacity for development across much of the site due to the land rising to a localised plateau making it highly visible within the surrounding area. Therefore an uncertain **significant negative** (--) effect is recorded against **SA objective 8 (Landscape)** for Cherwell.
- Due to the medium sensitivity of the historic environment within and in the vicinity of the site evidenced in the Council's Archaeology and Heritage Assessment, most notably due to the close proximity of a Registered Park and Garden, one Conservation Area and 40 Listed Buildings including Home Close, a Grade II Listed Building. Furthermore, the land within this site includes arable farmland on high ground, which contributes to the ring of hills around Oxford that form a key aspect of its distinctive setting. Therefore, an uncertain **significant negative** (--) effect is recorded against **SA objective 9 (Historic Environment)** for Cherwell.
- The site is located on greenfield land designated as a Grade 3 Agricultural Land. Therefore, a **significant negative** (--) effect is recorded against **SA objective 13 (Efficient Use of Land)** for Cherwell. Uncertainty is attached to this effect as it is unknown whether the Grade 3 agricultural land is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value.

The Council's Reasons for Site Selection / Rejection

1.143 The Council notes the SA results.

1.144 Policy PR9 of the Plan (July 2017) proposes the construction of 530 dwellings on approximately 16 hectares on land next to the west of Yarnton.

1.145 The Inspector has advised that he had sympathy with the promoter's view that a more satisfactory development could be achieved by extending the residential development area westwards. He also suggested that, in doing so, the Council considers whether some additional homes could be achieved.

1.146 Landscape analysis work suggests that some additional residential development could be accommodated on the lower slopes to the west of the existing residential area while avoiding rising up the steep mid-slopes.

1.147 The Council considers that a western extension of the existing developable area should be taken forward into Main Modifications.

Table 2 – Significant effects of reasonable alternative options

Significant effects of the proposed modifications to the Plan

- 1.148 Following the appraisal of all reasonable alternatives, the proposed modifications to the Plan have been appraised individually and as part of the Plan as a whole, taking into account the previously identified effects set out in the 2017 SA Report. The likely effects of each proposed modifications are set out in the final column of **Table 3**. Where effects have been identified, the cell in the final column has been coloured to reflect the effect identified.
- 1.149 In summary, most of the proposed modifications will not alter the findings set out in the 2017 SA Report because they correct factual errors and typos or represent minor updates to the wording of policies and supporting text for clarity rather than meaning. Notable proposed modifications which are likely to result in additional effects to those identified in the 2017 SA report accompanying the proposed submission Plan include:
- **The deletion of site allocation policy PR10 and the resulting redistribution of 410 homes that were to be delivered within this allocation to site allocation policies PR6a, PR6b, PR7a, PR7b and PR9.** The deletion of allocation Policy PR10 results in the loss of any negative effects associated with development and activity in this location; however, some of these negative effects will be transferred to the new locations for the development in allocations PR6a, PR6b, PR7a, PR7b and PR9. Nevertheless, given these locations are already allocated for significant numbers of homes, the relative increases in the scale and density of development in each location is not considered to be enough to change the significance of the effects already identified in the SA. These modifications will not result in a net increase in the number of homes being delivered by the Plan over the Plan period, resulting in no changes in the significance of the effect identified in relation to SA objective 1 (Housing).
 - **The proposed modifications to Policy PR1 and PR11 emphasising the need for all sites to contribute to the delivery of Local Plan infrastructure.** These changes would have minor positive effects on the majority of the SA objectives.
 - **Modifications to the site allocation policies to emphasise the need for the protection of notable species and habitats** would have minor positive effects on SA objective 7 (Conserving and Enhancing Biodiversity).
 - **Modifications to the site allocation policies to require that any mitigation recommendations from Heritage Impact Assessments and archaeological investigations be included in the proposed development scheme** would have minor positive effects on SA objective 9 (Protecting and Enhancing the Historic Environment). This will bring greater certainty that appropriate mitigation and enhancement measures will be implemented.
 - **The proposed modifications to allocation Policy PR6c (identified for the relocation of a golf course) include more detailed requirements for a development brief for the site** covering a range of planning issues, such as access, green infrastructure, the historic environment, landscape, flood risk and highways. Again, whilst many of the changes would contribute to the minor positive effects previously identified, the likely significance of these positive effects is not considered to change overall.

Table 3 – Detailed schedule of proposed modifications and implications for SA findings

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 1.	Contents	Woodstock Heading	Delete 'Woodstock' Heading and page number reference	It is not considered that a change to the Plan's contents page will alter the findings of the SA.
Main 2.	Executive Summary	Paragraph xiv	Amend to read: 'The Plan therefore focuses development on a geographic area extending north from Oxford to south Kidlington, and along the A44 corridor to Yarnton and Begbroke., and up to Woodstock in West Oxfordshire.	It is not considered that a change to the Plan's executive summary will alter the findings of the SA.
Main 3.	Executive Summary Table 1	Policy PR6a- Land East of Oxford Road	Replace '650' with ' <u>690</u> '	It is not considered that a change to the Plan's executive summary will alter the findings of the SA.
Main 4.	Executive Summary Table 1	Policy PR6b- Land West of Oxford Road	Replace '530' with ' <u>670</u> '	It is not considered that a change to the Plan's executive summary will alter the findings of the SA.
Main 5.	Executive Summary Table 1	Policy PR7a- Land South East of Kidlington	Replace '230' with ' <u>430</u> '	It is not considered that a change to the Plan's executive summary will alter the findings of the SA.
Main 6.	Executive Summary Table 1	Policy PR7b- Land at Stratfield Farm	Replace '100' with ' <u>120</u> '	It is not considered that a change to the Plan's executive summary will alter the findings of the SA.

Page 374

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 7.	Executive Summary, Table 1	Policy PR9 – Land West of Yarnton	Replace '530' with ' <u>540</u> '	It is not considered that a change to the Plan's executive summary will alter the findings of the SA.
Main 8.	Executive Summary, Table 1	-	Delete Woodstock row from Table 1.	It is not considered that a change to the Plan's executive summary will alter the findings of the SA.
Main 9.	Paragraph 1.7	-	Amend to read: The Partial Review means change for the area of the district which adjoins north Oxford and that which focuses on the A44 corridor. from Oxford to Woodstock in West Oxfordshire.	This minor change to the introductory text to the Local Plan is not considered to alter the findings of the SA.
Main 10.	How has this Plan been prepared?	Paragraph 2.2 – point 4.	Amend point 4 to read: 'prepared to be consistent with national policy – to meet the apportioned housing requirements so that they meet core planning principles and demonstrate clear, exceptional circumstances for development within the Oxford Green Belt removing land from the Oxford Green Belt for development. '	It is not considered that this change will alter the overall findings of the SA because it is a minor wording change that will not affect the overall aim of the Green Belt policy (PR3).
Main 11.	Paragraph 2.10	-	Amend to read: Seven Six residential development areas are identified in a geographic area extending north from Oxford (either side of the A4165 Oxford Road) and along the A44 corridor and to Woodstock in West Oxfordshire. 1. Land East of Oxford Road, North Oxford (policy PR6a) - Gosford and Water Eaton Parish 2. Land West of Oxford Road, North Oxford (policy PR6b) - Gosford and Water Eaton Parish	This minor change to the introductory text to the Local Plan is not considered alter the findings of the SA.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			<p>3. Land at South East Kidlington (policy PR7a) - Gosford and Water Eaton Parish</p> <p>4. Land at Stratfield Farm Kidlington (policy PR7b) - Kidlington Parish</p> <p>5. Land East of the A44 at Begbroke/Yarnton (policy PR8) - Yarnton and Begbroke Parishes (small area in Kidlington Parish)</p> <p>6. Land West of the A44 at Yarnton (policy PR9) - Yarnton and Begbroke Parishes</p> <p>7. Land East of Woodstock (policy PR10) - Shipton-on-Cherwell and Thrupp Parish.</p>	
Main 12.	Paragraph 3.57	-	Amend to read 'The Oxford Transport Strategy has three components: mass transit, walking and cycling, and managing traffic and travel demand. <u>The Strategy is supported by the Active and Healthy Travel Strategy and Oxfordshire County Council Cycling and Walking Design Guides.</u> Mass transit in Oxford is planned to consist of rail, Rapid Transit (RT) and buses and coaches.	It is not considered that this change will alter the findings of the SA because it is a clarification that will not affect any policies contained within the Local Plan.
Main 13.	Paragraph 3.66	Paragraph 3.66	Amend the first sentence of paragraph 3.66 to read: 'Woodstock is a focus for growth in West Oxfordshire's <u>new, emerging adopted</u> Local Plan. The draft Plan includes more extensive.....'	It is not considered that this change will alter the overall findings of the SA because it is a clarification on the status of West Oxfordshire District Council's Local Plan.
Main 14.	Paragraph 3.66	-	Amend to read: 'Woodstock is a focus for growth in West Oxfordshire's new, emerging Local Plan. The draft Plan includes more extensive growth at Witney	It is not considered that this change will alter the findings of the SA because it is a

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			and Chipping Norton, growth at Carterton comparable to that at Woodstock and less significant growth in the Burford-Charlbury Area. Larger strategic development is planned at Eynsham on the A40 to the west of Oxford, the majority of which is intended to address West Oxfordshire's contribution (2750 homes) to Oxford's unmet housing need. <u>Oxfordshire's Local Transport Plan (LTP4): A40 Strategy proposes a new link road in Cherwell between the A40 and the A44 to improve access from West Oxfordshire to the A44 and A34.</u>	clarification that will not affect any policies contained within the Local Plan.
Main 15.	Paragraph 3.73	-	Amend to read, 'A National Infrastructure Commission (NIC) report is expected by the end of on the Cambridge-Milton-Keynes-Oxford Arc was published in November 2017 including recommendations to the Government linking east-west transport improvements with wider growth and investment opportunities along this corridor'	It is not considered that this change will alter the findings of the SA because it is a wording update that will not affect any policies contained within the Local Plan.
Main 16.	Paragraph 3.76		Amend to read, ' <u>Approximately 30,000 homes are being planned in the emerging Vale of Aylesbury</u> Vale Local Plan (Draft Plan, 2016) proposes 33,300 new homes to be built in the district in <u>for</u> the period to 2033. The focus of the growth will be at Aylesbury which has recently been granted Garden Town status.	It is not considered that this update on the contents of a neighbouring Local Plan will alter the findings of the SA because it is a minor variant on the existing wording with regard to housing delivery.
Main 17.	Table 4	Policy PR6a- Land East of Oxford Road	Replace 650 with ' <u>690</u> '	It is not considered that updated references to the distribution of development amongst

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 18.	Table 4	Policy PR6b- Land West of Oxford Road	Replace 530 with ' <u>670</u> '	the Plan's site allocations will alter the findings of the SA.
Main 19.	Table 4	Policy PR7a- Land South East of Kidlington	Replace 230 with ' <u>430</u> '	
Main 20.	Table 4	Policy PR7b- Land at Stratfield Farm	Replace 100 with ' <u>120</u> '	
Main 21.	Table 4	Policy PR9 – Land West of Yarnton	Replace 530 with ' <u>540</u> '	
Main 22.	Table 4	Policy PR10 – Land South East of Woodstock	Delete Woodstock row from Table 4.	The removal of Policy PR10 from Table 4 is not considered to alter the findings of the SA.
Main 23.	Paragraph 5.16	-	Amend to read: Figure 10 illustrates our strategy for accommodating growth for Oxford. It shows the geographic relationship between Cherwell, Oxford and West Oxfordshire and specifically the proximity of north Oxford with Kidlington, Yarnton, and Begbroke and Woodstock along the A44 corridor.	It is not considered that this change will alter the findings of the SA because it is a text deletion in response to the fact that Policy PR10 (Land South East of Woodstock) has been removed from the Plan.
Main 24.	Paragraph 5.17	-	Amend to read: All of the sites we have identified other than land to the south-east of Woodstock lie within the Oxford Green Belt. We consider that there are exceptional circumstances for the removal of these sites (either in full or in part) from the Green Belt.	It is not considered that this change will alter the findings of the SA because it is a text deletion in response to the fact that Policy PR10 (Land South East of Woodstock) has been removed from the Plan.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 25.	Paragraph 5.17		Delete as follows: 8. the need to ensure a cautious approach at Woodstock (in terms of the number of new homes) due to the presence of international and national heritage assets while responding to the proximity and connectivity of a growing town to both Oxford and the growth areas on the A44 corridor.	It is not considered that this change will alter the findings of the SA because it is a text deletion in response to the fact that Policy PR10 (Land South East of Woodstock) has been removed from the Plan.
Main 26.	Paragraph 5.17		Renumber point 9 as point 8, point 10 as point 9, point 11 as point 10 and point 12 as point 11.	
Main 27.	Paragraph 5.18		Delete as follows: Land to the south-east of Woodstock lies outside but next to the Oxford Green Belt. Land at Frieze Farm is to remain in the Green Belt as we consider that its possible use as a replacement Golf Course would be compatible with the purposes of Green Belts.	It is not considered that this change will alter the findings of the SA because it is a text deletion in response to the fact that Policy PR10 (Land South East of Woodstock) has been removed from the Plan.
Main 28.	Policy PR1 - Achieving Sustainable Development for Oxford's Needs	Policy PR1	Amend to read: Cherwell District Council will work with Oxford City Council, West Oxfordshire District Council , Oxfordshire County Council, and the developers of allocated sites to deliver:	It is not considered that the removal of this text will alter the findings of the SA.
Main 29.	Policy PR1 - Achieving Sustainable Development for Oxford's Needs	Point (a)	Amend to read '4,400 homes to help meet Oxford's unmet housing needs <u>and necessary supporting infrastructure</u> by 2031	This change would further contribute to positive effects identified, particularly with regards to SA objectives 1 (Housing), 6 (accessibility to services and facilities), 2 (Improving Health and Well Being) and 5 (vibrant communities). However, there would

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				be no changes in the significance of these effects.
Main 30.	Policy PR2 – Housing Mix, Tenure and Size	Policy PR2 – point 2.	Change point 2 to read: ‘...Provision of 80% of the affordable housing (as defined by the NPPF) as affordable rent/social rented dwellings and 20% as other forms on intermediate affordable homes’	It is not considered that this change will alter the findings of the SA because it is a minor clarification that will not affect any policies contained within the Local Plan.
Main 31.	Paragraph 5.38	Paragraph 5.38	The Oxford Green Belt in Cherwell presently comprises some 8409 hectares of land. Policy PR3 sets out the area of land for each strategic development site that we are removing from the Green Belt to accommodate residential and associated land uses to help meet Oxford’s unmet housing needs. In total it comprises 253-275 hectares of land – a 3 3.3% reduction. Consequently, the total area of Cherwell that comprises Green Belt falls from 14.3% to 13. 98 %.	It is not considered that this change will alter the findings of the SA because it is a change as result of changes to the residential areas on sites. See the effects elsewhere in this schedule.
Main 32.	Paragraph 5.39	PR3(e)	Amend penultimate sentence to read, ‘The potential extension of the Science Park, provided for by Policy Kidlington 1 of the Local Plan, will be considered further in Local Plan Part 2...’	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification that will not affect any policies contained within the Local Plan.
Main 33.	Policy PR3: The Oxford Green Belt	Policy PR7a	Amend the sentence to read: Policy PR7a – removal of 10.8 21 hectares of land as shown on inset Policies Map PR7a	The release of more land from the Green Belt in this location reflects the increase in the extent of residential development within site PR7a. See the SA effects recorded against the row summarising the Main Modifications to Policy PR7a below for a summary of the likely effects of more development in this location.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 34.	Policy PR3: The Oxford Green Belt	Policy PR7b	Amend sentence to read: Policy PR7b – removal of 4.3 5 hectares of land as shown on inset Policies Map PR7b	The release of more land from the Green Belt in this location reflects the increase in the extent of residential development within site PR7a. See the SA effects recorded against the row summarising the Main Modifications to Policy PR7b below for a summary of the likely effects of more development in this location.
Main 35.	Policy PR3: The Oxford Green Belt	Policy PR9	Amend sentence to read: Policy PR9 – removal of 17.7 27 hectares of land as shown on inset Policies Map PR9	The release of more land from the Green Belt in this location reflects the increase in the extent of residential development within site PR7a. See the SA effects recorded against the row summarising the Main Modifications to Policy PR9 below for a summary of the likely effects of more development in this location.
Main 36.	Para 5.65	Last sentence	Amend last sentence to read: Site specific transport measures are identified in Policies PR6a, PR6b, PR7a, PR7b, PR8, and PR9, and PR10 .	It is not considered that this change will alter the findings of the SA because it is a text deletion in response to the fact that Policy PR10 (Land South East of Woodstock) has been removed from the Plan.
Main 37.	Policy PR4a: Sustainable Transport	Policy PR4a: Sustainable Transport	Amend to read: The strategic developments provided for under Policies PR6 to PR9 PR10 will be expected to provide proportionate financial contributions directly related to the development in order to secure necessary improvements to, and mitigations for, the highway network and to deliver necessary improvements to infrastructure and services for public transport.	It is not considered that this change will alter the findings of the SA because it is a text deletion in response to the fact that Policy PR10 (Land South East of Woodstock) has been removed from the Plan.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 38.	Para 5.67	Point 5	Amend sub-point v. to read ' creating high- quality built and natural environments <u>that can be sustained in the long term, and</u> Renummer sub-point vi. as sub-point vii. Add new sub-point vi. ' <u>the construction of sustainable urban drainage systems</u> '	It is not considered that these changes will alter the findings of the SA because they are clarifications in the supporting text to Policy PR5 (Green Infrastructure) describing the issues that the provision of Green Infrastructure covers. This clarification does not affect the overall policy aim.
Main 39.	Para 5.69	New Point	Add new point 11 to read ' <u>enhance health and well-being</u> '	It is not considered that this change will alter the findings of the SA because its addition only describes a broad benefit of Green Infrastructure already acknowledged in the SA of the original Policy PR5 under SA objective 2 (Health and Well Being).
Main 40.	Policy PR5: Green Infrastructure	First sentence	Amend to read '...Policies PR6 to PR9 PR10 ...'	It is not considered that this change will alter the findings of the SA because it is a text deletion in response to the fact that Policy PR10 (Land South East of Woodstock) has been removed from the Plan.
Main 41.	Policy PR5: Green Infrastructure	Point (1)	Amend to read, 'Applications will be expected to: (1) Identify existing GI and its connectivity and demonstrate how this will, as far as possible, be protected and incorporated into the layout, design and appearance of the proposed development'	This change would further contribute to positive effects identified in the SA of the original Policy PR5 by adding more certainty that existing GI and its connectivity will be protected and incorporated into new developments, particularly in relation to SA objective 7 (Biodiversity). However, there would be no change in the significance of the effects recorded.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 42.	Policy PR5: Green Infrastructure	Point (8)	Amend to read 'Demonstrate where multi-functioning GI can be achieved, <u>including helping to address climate change impacts and taking into account best practice guidance.</u> '	Explicit reference to climate change will increase the likelihood that new and improved multifunctional GI will help the District to adapt to the effects of climate change. The SA of the original Policy PR5 already acknowledges the potential for positive effects in relation to climate change adaptation through the SA of SA objectives 2 (Health and Well Being) and 12 (Flood Risk). However, there would be no changes in the significance of these effects.
Main 43.	Policy PR5: Green Infrastructure	Point (9)	Amend to read: 'Provide details of how GI will be maintained and managed <u>in the long term.</u> '	This change would further contribute to positive effects identified in the original SA of Policy PR5 by ensuring green infrastructure is maintained in the long term. However, there would be no changes in the significance of these effects.
Main 44.	Para 5.85	2 nd sentence	Amend to read' ...It will be necessary to have regard to adopted Development Plan policies for design and the built environment for both Cherwell and Oxford, to the <u>emerging</u> Cherwell Design Guide Supplementary Planning Document (SPD), and to Oxford City Council's SPD - High Quality Design in Oxford - Respecting Heritage and Achieving Local Distinctiveness, <u>and Oxfordshire County Council's Cycling and Walking Design Guides...</u>	It is not considered that this change will alter the findings of the SA because it is a clarification that will not affect any policies contained within the Local Plan.
Main 45.	Policy PR6a – Land East of Oxford Road - Policies Map	Land East of Oxford Road	Reduce land allocation for primary school use from 3.2 hectares to 2.2 hectares. Allocate 1 hectare to residential use.	No change to SA, as the same number of homes will be delivered, and a primary school will still be delivered. The area of the site that is developed will remain the same, but the

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				use of space will be different. However, this will not affect the conclusions of the SA.
Main 46.	Policy PR6a – Land East of Oxford Road	Point 1	Amend to read ‘Construction of 690 650 dwellings (net) on approximately 25 24 hectares of land (the residential area as shown). The dwellings are to be constructed at an approximate average net density of 40 dwellings per hectare ’	<p>The increase in number of dwellings to be provided would further contribute to the significant positive effect identified for Policy PR6a (Land East of Oxford Road) against SA objective 1 (Housing).</p> <p>It would also further contribute to the significant negative effect identified against SA objective 10 (Reducing Road Pollution and Congestion) and the minor negative effects identified against SA objectives 7 (Conserving and Enhancing Biodiversity), 8 (Landscape), 9 (Historic Environment) and 13 (Efficiency in Land Use). This is due to the fact that an increase in the number of dwellings will result in an increase in population and car users, which may increase pollution and traffic congestion. However, the addendum¹ to the Transport Assessment notes that the deletion of Policy PR10 and the reallocation of the homes amongst the remaining allocations (including PR6a) will have a net-positive overall effect on the previously identified transport impacts. An increase in the amount of development has the potential to put greater pressure on sensitive local ecological, historic and landscape features in close proximity to the site, whilst also</p>

¹ Addendum to Transport Assessment, ITP, 2019

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				potentially resulting in the felling of trees. Overall, there will be no change in the significance of the previously recorded effects.
Main 47.	Policy PR6a – Land East of Oxford Road	Point 3	Amend to read 'The provision of a primary school with at least three two forms of entry on 32.2 hectares of land in the location shown'	No change to SA as a primary school will still be provided. The SA process is not fine grained enough to account for how many forms a school will provide.
Main 48.	Policy PR6a– Land East of Oxford Road	Point 7	Amend first sentence to read, '...pedestrian, wheelchair and all-weather cycle route along the site's eastern boundary <u>within the area of green space</u> as shown <u>on the policies map.</u> '	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification on the location of the cycle route. It will not affect the overall aim of Policy PR6a.
Main 49.	Policy PR6a - Land East of Oxford Road	Policy PR6a – point 10 (a)	Add a second sentence to point 10 (a) to read: ' <u>Minor variations in the location of specific uses will be considered where evidence is available.</u> '	It is not considered that this change will alter the findings of the SA because the variations will only be minor. It is also assumed that the necessary evidence required to inform the judgements will include justification as to how any adverse effects currently being managed by the site allocation will continue to be managed and any positive effects will at least be maintained.
Main 50.	Policy PR6a – Land East of Oxford Road	Point 10 (b)	Amend to read ' <u>Two p</u> Points of vehicular access and egress from and to existing highways, primarily from Oxford Road'	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification on the number of vehicular access points. It will not affect the overall aim of Policy PR6a.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 51.	Policy PR6a – Land East of Oxford Road	Point 10 (c)	Amend to read 'An outline scheme for public vehicular, cycle, pedestrian and wheelchair connectivity within the site, to the built environment of Oxford, to Cutteslowe Park, to the allocated site to the west of Oxford Road (policy PR6b) enabling connection to Oxford City Council's allocated 'Northern Gateway' site, to Oxford Parkway and Water Eaton Park and Ride, and to existing or new points of connection off-site and to existing or potential public transport services. <u>Required access to existing property via the site should be maintained.</u>	It is not considered that this change will alter the findings of the SA because it provides clarification on maintaining access to the existing property via the site. It will not affect the overall aim of Policy PR6a.
Main 52.	Policy PR6a– Land East of Oxford Road	Point 13	Amend to read 'The application(s) shall be supported by a phase 1 habitat survey including habitat suitability index (HSI) survey for great crested newts, <u>and protected and notable species surveys as appropriate, including for</u> great crested newt presence/absence surveys (dependent on HSI survey), surveys for badgers, breeding birds and reptiles, an internal building assessment for roosting barn owl, a tree survey and an assessment of the watercourse that forms the south-eastern boundary of the site and Hedgerow Regulations Assessment"	This change would further contribute to positive effects identified for SA objective 7 (Conserving and Enhancing Biodiversity) by adding more clarity that a range of protected and notable species surveys may be appropriate. However, there would be no changes in the significance of these effects.
Main 53.	Policy PR6a– Land East of Oxford Road	Point 15	Amend to read 'The application shall be supported by a Heritage Impact Assessment which will include <u>identify</u> measures to avoid or minimise conflict with the identified heritage assets within the site, particularly the Grade 2* Listed St Frideswide Farmhouse. <u>These measures shall be incorporated or reflected, as appropriate, in any proposed development scheme.</u>	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that appropriate mitigation measures would be implemented. However, there would be no changes in the significance of these effects.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 54.	Policy PR6a– Land East of Oxford Road	Point 17	Amend to read 'The application should demonstrate that Thames Water <u>and the Environment Agency have been consulted regarding wastewater treatment capacity and agreement has been reached</u> has agreed in principle that foul drainage from the site will be accepted into <u>the drainage its</u> network.'	It is not considered that this change will alter the findings of the SA because it provides clarification on the consultation between Thames Water and the Environment Agency with regards to the application for the site. The minor wording clarifications will not affect the overall aim of Policy PR6a.
Main 55.	Policy PR6a– Land East of Oxford Road	Point 18	Amend to read'...mitigation measures. <u>The outcomes of the investigation and mitigation measures shall be incorporated or reflected, as appropriate, in any proposed development scheme.</u>	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that appropriate mitigation measures would be implemented. However, there would be no changes in the significance of these effects.
Main 56.	Policy PR6a– Land East of Oxford Road	New Point	Add new point 20 to read ' <u>The application shall include a management plan for the appropriate re-use and improvement of soils</u> ' Re-number subsequent points	Whilst it is acknowledged that this change may help to mitigate/compensate for loss of agricultural land, there would be no change to the effects recorded against SA objective 13 (Efficient Use of Land).
Main 57.	Policy PR6a - Land East of Oxford Road	Policy PR6a – point 21.	Amend the final sentence to read: 'The Delivery Plan shall include a start date for development, demonstration of how the development would be completed by 2031 and a programme showing how <u>the site will contribute towards maintaining</u> a five year supply of housing. (for the site) will be maintained year on year.'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR6a (Land East of Oxford Road).

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 58.	Policy PR6a– Land East of Oxford Road	Point 28	Amend to read 'The location of archaeological features, including the tumuli to the east of the Oxford Road, should be incorporated and made evident in the landscape design of the site.'	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that sensitive landscape design would be implemented. However, there would be no changes in the significance of these effects.
Main 59.	Policy PR6b - Land West of Oxford Road	Point 1	Amend to read: 'Construction of 670 530 dwellings (net) on 32 hectares of land (the residential area as shown). The dwellings are to be constructed at an approximate average net density of 25 dwellings per hectare.	The increase in number of dwellings to be provided would further contribute to the significant positive effect identified for Policy PR6b (Land West of Oxford Road) against SA objective 1 (Housing). It would also further contribute to the significant negative effect identified against SA objective 10 (Reducing Road Pollution and Congestion) and the minor negative effects identified against SA objectives 7 (Conserving and Enhancing Biodiversity), 8 (Landscape), 9 (Historic Environment) and 13 (Efficiency in Land Use). This is due to the fact that an increase in the number of dwellings and density will result in an increase in population and car users, which may increase pollution and traffic congestion. However, the addendum ² to the Transport Assessment notes that the deletion of Policy PR10 and the reallocation of the homes amongst the remaining allocations (including PR6b) will

² Addendum to Transport Assessment, ITP, 2019

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				have a net-positive overall effect on the previously identified transport impacts. An increase in the density of development has the potential to put greater pressure on sensitive local ecological, historic and landscape features in close proximity to the site, whilst also potentially resulting in the felling of trees. However, there will be no change in the significance of these effects.
Main 60.	Policy PR6b – Land West of Oxford Road	Policy PR6b – point 8 (a)	Add a second sentence to point 8 (a) to read: <u>'Minor variations in the location of specific uses will be considered where evidence is available.'</u>	It is not considered that this change will alter the findings of the SA because the variations will only be minor. It is also assumed that the necessary evidence required to inform the judgements will include justification as to how any adverse effects currently being managed by the site allocation will continue to be managed and any positive effects will at least be maintained.
Main 61.	Policy PR6b - Land West of Oxford Road	Point 8(b)	Amend to read ' <u>Two p</u> Points of vehicular access and egress from and to existing highways, <u>primarily from Oxford Road, and connecting within the site.</u>	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification on the number of vehicular access points, as well as clarification on which highways the policy is referring to. It will not affect the overall aim of Policy PR6b.
Main 62.	Policy PR6b - Land West of Oxford Road	Point 11	Amend to: 11. The application(s) shall be supported by a phase 1 habitat survey including habitat suitability index (HSI) survey for great crested newts, <u>and protected and notable species surveys as appropriate, including</u> great crested newt	This change would further contribute to the positive effect identified (as part of a mixed effect) for SA objective 7 (Conserving and Enhancing Biodiversity) by adding more clarity that a range of protected and notable

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			presence/absence surveys (dependent on HSI survey), surveys for badgers, breeding birds and reptiles, an internal building assessment for roosting barn owl, a tree survey and an assessment of water bodies	species surveys may be appropriate. However, there would be no changes in the significance of this effect.
Main 63.	PR6b - Land West of Oxford Road	Point 13	Amend to read 'The application(s) shall be supported by a desk-based archaeological investigation which may then require predetermination evaluations and appropriate mitigation measures. <u>The outcomes of the investigation and mitigation measures shall be incorporated or reflected, as appropriate, in any proposed development scheme.</u>	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that appropriate mitigation would be implemented. However, there would be no changes in the significance of these effects.
Main 64.	Policy PR6b - Land West of Oxford Road	Point 15	Amend to read 'The application should demonstrate that Thames Water <u>and the Environment Agency have been consulted regarding wastewater treatment capacity and agreement has been reached</u> has agreed in principle that foul drainage from the site will be accepted into <u>the drainage its</u> network.'	It is not considered that this change will alter the findings of the SA because it provides clarification on the consultation between Thames Water and the Environment Agency with regards to the application for the site. The minor wording clarifications will not affect the overall aim of Policy PR6b.
Main 65.	Policy PR6b - Land West of Oxford Road	New Point	Add new point 16 to read ' <u>The application shall include a management plan for the appropriate re-use and improvement of soils</u> Re-number subsequent points	Whilst it is acknowledged that this change may help to mitigate/compensate for loss of agricultural land, there would be no change to the effects recorded against SA objective 13 (Efficient Use of Land).
Main 66.	Policy PR6b – Land West of Oxford	Point 17	Delete point 17 and renumber subsequent points accordingly	The deletion of point 17 will not alter the findings of the SA due to the fact that it references National Planning Policy. The Inspector has concluded that the proposal

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				meets the tests set out in Paragraph 74 of the 2012 NPPF.
Main 67.	Policy PR6b - Land West of the Oxford Road	Policy PR6b – point 19	Amend the final sentence to read: 'The Delivery Plan shall include a start date for development, demonstration of how the development would be completed by 2031 and a programme showing how the site will contribute towards maintaining a five year supply of housing. (for the site) will be maintained year on year.	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR6b (Land West of the Oxford Road).
Main 68.	Policy PR6c – Land at Frieze Farm	Whole Policy	Amend to read: 'Land at Frieze Farm will be reserved for the potential construction of a golf course should this be required as a result of the development of Land to the West of Oxford Road under Policy PR6b. <u>Planning Application Requirements</u> 1. The application will be expected to be supported by, and prepared in accordance with, a Development Brief for the entire site to be jointly prepared and agreed in advance between the appointed representative(s) of the landowner(s) and Cherwell District Council and in consultation with Oxfordshire County Council. The Development Brief shall include:	This change is expected to lead to minor positive effects for SA objective 10 (Reducing Road Pollution and Congestion), as points 1 (c), 1 (d) and 7 promote sustainable modes of transport as a means of travelling to and from the site. This change would further contribute to the positive effects recorded against SA objective 7 (Conserving and Enhancing Biodiversity) and would remove the uncertainty associated with this, as points 1(f), 2 and 3 outlines how development of a golf course would be required to maintain and enhance biodiversity. The negative effect relating to SA objective 9 would be removed, as points 4, 5 and 6 will contribute to ensuring that adverse effects on the historic environment are avoided, minimised and/or mitigated. However, the uncertainty will remain as effects on the

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			<p><u>(a) A scheme and outline layout for delivery of the required land uses and associated infrastructure</u></p> <p><u>(b) Points of vehicular access and egress from and to existing highways</u></p> <p><u>(c) An outline scheme for public vehicular, cycle, pedestrian and wheelchair connectivity within the site, to the built environment, and to existing or new points of connection off-site and to existing or potential public transport services.</u></p> <p><u>(d) Protection and connection of existing public rights of way</u></p> <p><u>(e) incorporate design principles that respond to the landscape, canal-side and Green Belt setting and the historic context of Oxford</u></p> <p><u>(f) Outline measures for securing net biodiversity gains informed by a Biodiversity Impact Assessment in accordance with (2) below</u></p> <p><u>(g) An outline scheme for vehicular access by the emergency services</u></p> <p><u>2. The application(s) shall be supported by the Biodiversity Impact Assessment (BIA) based on the DEFRA biodiversity metric (unless the Council has adopted a local, alternative methodology), to be agreed with Cherwell District Council</u></p> <p><u>3. The application(s) shall be supported by a proposed Biodiversity Improvement and Management Plan (BIMP) informed by the findings of the BIA and habitat surveys and to be</u></p>	<p>setting of this feature depend on the detailed design, landscaping and layout of the site.</p> <p>Point 8 would further contribute to the positive effect recorded against SA objective 12 (Flood Risk). However, there would be no change in the significance of this effect.</p> <p>Whilst it is acknowledged that point 9 may help to mitigate/compensate for loss of agricultural land, there would be no change to the effects recorded against SA objective 13 (Efficient Use of Land). In addition, the landscaping scheme required by point 9 would further contribute to the minor positive effect identified against SA objective 8. Like the required development brief, it is expected to contribute to ensuring appropriate landscaping for this site. However, this remains uncertain until the details of the landscaping and land modelling are known, therefore there would be no change in the SA effect recorded.</p> <p>The other additional text in this policy would have no effect in terms of SA.</p>

A single comprehensive, outline scheme shall be approved for the entire site. The scheme shall be supported by draft Heads of Terms for developer contributions that are proposed to be secured by way of legal agreement. The application(s) shall be supported by a Delivery Plan demonstrating how the implementation and phasing of the development shall be secured comprehensively and how the provision of supporting infrastructure will be delivered. The Delivery Plan shall include a start date for development and a programme showing how and when the golf course would be constructed to meet any identified need as a result of the development of Land to the West of Oxford Road (Policy PR6b)</u></p>	

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 69.	Paragraph 5.90	Last sentence	Amend last sentence to read: A clearly defined field boundary <u>partially</u> marks the extent of the area that is identified for development <u>and the remainder of the southern boundary follows a former historic field boundary</u>	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification in the supporting text to Policy PR7a (Land South East of Kidlington) that will not affect the overall policy aim.
Main 70.	Paragraph 5.95	First and second sentence	Delete first two sentences and replace with the following: <u>The farmhouse looks south across land planted as an orchard. To the west of the farmhouse is an area of trees and a traditional orchard which forms an important part of its historic setting.</u>	It is not considered that this change will alter the findings of the SA because it is the deletion of two descriptive sentences in the supporting text to Policy PR7a (Land South East of Kidlington) that will not affect the overall policy aim.
Main 71.	Paragraph 5.96	New Point & Points 5 to 8	Renumber points 5 to 8 as 6 to 9 Insert new point 5. To read: ' <u>Retention and renovation of the Grade II Listed Stratfield Farmhouse and the protection of its historic setting.</u>	The reference to the need to retain and renovate the Grade II Listed Stratfield Farmhouse and protect its setting is likely to further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that appropriate mitigation would be implemented. However, there would be no changes in the significance of these effects.
Main 72.	Policy PR7a – Land South East of Kidlington	Policies Map – Land South East of Kidlington	Increase extent of residential area Reduce extent of Outdoor Sports Provision Amend revised Green Belt boundary (see attached)	The effect of increasing the extent of residential development is addressed under the proposed modification to point 1 and 4 of Policy PR7a below.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 73.	Policy PR7a – Land South East of Kidlington	Policies Map – Land South East of Kidlington	Amend the policies map to include ‘new green space/parks’ notation over (in addition to) ‘Outdoor Sports provision’ on the policies map (see attached).	This amendment to the policies map will not affect the overall findings of the SA.
Main 74.	Policy PR7a – Land South East of Kidlington	Point 1	Amend to read: ‘Construction of 430 230 dwellings (net) on 21 11 hectares of land (the residential area as shown). The dwellings to be constructed at an approximate average net density of 35 dwellings per hectare. ’	<p>The increase in number of dwellings to be provided would further contribute to the significant positive effect identified for Policy PR7a (Land South East of Kidlington) against SA objective 1 (Housing).</p> <p>It would also further contribute to the significant negative effect identified against SA objective 10 (Reducing Road Pollution and Congestion) and the minor negative effects identified against SA objectives 7 (Conserving and Enhancing Biodiversity), 8 (Landscape), 9 (Historic Environment) and 13 (Efficiency in Land Use). This is due to the fact that an increase in the number of dwellings will result in an increase in population and car users, which may increase pollution and traffic congestion. However, the addendum³ to the Transport Assessment notes that the deletion of Policy PR10 and the reallocation of the homes amongst the remaining allocations (including PR7a) will have a net-positive overall effect on the previously identified transport impacts. An increase in the density of development has the potential to put greater pressure on sensitive local ecological, historic and landscape features in</p>

³ Addendum to Transport Assessment, ITP, 2019

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				close proximity to the site, whilst also potentially resulting in the felling of trees. However, there will be no change in the significance of these effects.
Main 75.	Policy PR7a – Land South East of Kidlington	Point 4	Amend to read: The provision of 21.5 11 hectares of land to provide formal sports facilities for the development and for the wider community and green infrastructure within the Green Belt	In order to accommodate an additional 200 dwellings within the allocation, the area of land identified for outdoor sports provision has been almost halved. With an increased need for open space within the site as a result of the site's increased population, such a significant reduction in formal open space will reduce the positive effects associated with original allocation policy in relation to SA Objectives 2 (Health and Wellbeing) and 7 (Biodiversity). However, a minor positive effect is still recorded against SA objective 2 (Health and Wellbeing) and SA objective 7 (Biodiversity) in acknowledgement of the fact provision is still being made, encouraging new residents to be physically active and retaining space and investment in green infrastructure.
Main 76.	Policy PR7a – Land south east of Kidlington	Policy PR7a – point 9 (a)	Add a second sentence to point 9 (a) to read: <u>'Minor variations in the location of specific uses will be considered where evidence is available.'</u>	It is not considered that this change will alter the findings of the SA because the variations will only be minor. It is also assumed that the necessary evidence required to inform the judgements will include justification as to how any adverse effects currently being managed by the site allocation will continue to be managed and any positive effects will at least be maintained.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 77.	Policy PR7a – Land South East of Kidlington	Point 12	Amend to: ' The application(s) shall be supported by a phase 1 habitat survey including habitat suitability index (HSI) survey for great crested newts, <u>and protected and notable species surveys as appropriate, including</u> great crested newt presence/absence surveys (dependent on HSI survey), surveys for badgers, breeding birds and reptiles, an internal building assessment for roosting barn owl, a tree survey and an assessment of water bodies.'	This change would further contribute to the positive effect identified (as part of a mixed effect) for SA objective 7 (Conserving and Enhancing Biodiversity) by adding more clarity that a range of protected and notable species surveys may be appropriate. However, there would be no changes in the significance of this effect.
Main 78.	Policy PR7a – Land South East of Kidlington	Point 14	Amend to read 'The application should demonstrate that Thames Water, <u>Natural England has agreed in principle and the Environment Agency have been consulted regarding wastewater treatment capacity and agreement has been reached</u> in principle that foul drainage from the site will be accepted into <u>the drainage its</u> network.'	It is not considered that this change will alter the findings of the SA because it provides clarification on the consultation between Thames Water, the Environment Agency and Natural England with regards to the application for the site. The minor wording clarifications will not affect the overall aim of Policy PR7a.
Main 79.	Policy PR7a – Land South East of Kidlington	Point 16	Amend to read 'The application(s) shall be supported by a desk-based archaeological investigation which may then require predetermination evaluations and appropriate mitigation measures. <u>The outcomes of the investigation and mitigation measures shall be incorporated or reflected, as appropriate, in any proposed development scheme</u> '	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that appropriate mitigation would be implemented. However, there would be no changes in the significance of these effects.
Main 80.	Policy PR7a – Land South East of Kidlington	New Point	Add new point 17 to read ' <u>The application shall include a management plan for the appropriate re-use and improvement of soils</u> '	Whilst it is acknowledged that this change may help to mitigate/compensate for loss of agricultural land, there would be no change

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			Re-number subsequent points.	to the effects recorded against SA objective 13 (Efficient Use of Land).
Main 81.	Policy PR7a – Land south east of Kidlington	Policy PR7a – point 19.	Amend the final sentence to read: ‘The Delivery Plan shall include a start date for development, demonstration of how the development would be completed by 2031 and a programme showing how the site will contribute towards maintaining a five year supply of housing. (for the site) will be maintained year on year.	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR7a (Land South East of Kidlington).
Main 82.	Policy PR7b – Land at Stratfield Farm	Policies Map- Land at Stratfield Farm	Increase Residential area Reduce Nature Conservation Area Amend Revised Green Belt boundary Amend Green Space boundary (see attached)	The effect of increasing the extent of residential development is addressed under the proposed modification to point 1 of Policy PR7b below. The effect of reducing the size of the Nature Conservation Area is addressed under the proposed modification to point 7 of Policy PR7b below. With regard to the Green Space boundary, this has been amended to help accommodate an additional 20 dwellings within the allocation. With an increased need for open space within the site as a result of the sites increased population, such a significant reduction in formal open space will reduce the positive effects associated with original allocation policy in relation to SA Objectives 2 (Health and Wellbeing) and 7 (Biodiversity). However, minor positive effects are still recorded against SA objective 2 (Health and Wellbeing) and SA objective 7 (Biodiversity)

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				<p>in acknowledgement of the fact provision is still being made, encouraging new residents to be physically active and retaining space and investment in green infrastructure.</p>
Main 83.	Policy PR7b – Land at Stratfield Farm	Point 1	<p>Amend to read: ‘Construction of 120 400 homes (net) on 5.4 hectares of land (the residential area). The dwellings to be constructed at an approximate average net density of 25 dwellings per hectare.</p>	<p>The increase in the residential area would further contribute to the significant positive effects identified for Policy PR7b (Land at Stratfield Farm) against SA objective 1 (Housing).</p> <p>It would also further contribute to the significant negative effect identified against SA objective 10 (Reducing Road Pollution and Congestion) and the minor negative effects identified against SA objectives 7 (Conserving and Enhancing Biodiversity), 8 (Landscape), 9 (Historic Environment) and 13 (Efficiency in Land Use). This is due to the fact that an increase in the residential area and density will result in an increase in population and car users, which may increase pollution and traffic congestion. However, the addendum⁴ to the Transport Assessment notes that the deletion of Policy PR10 and the reallocation of the homes amongst the remaining allocations (including PR7b) will have a net-positive overall effect on the previously identified transport impacts. An increase in the density of development has the potential to put greater pressure on sensitive local</p>

⁴ Addendum to Transport Assessment, ITP, 2019

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				ecological, historic and landscape features in close proximity to the site, whilst also potentially resulting in the felling of trees. However, there will be no change in the significance of these effects.
Main 84.	Policy PR7b – Land at Stratfield Farm	Point 7	Amend to read: 'Creation of a nature conservation area on 6.3 5.3 hectares of land as shown on the inset Policies Map, incorporating the community orchard and with the opportunity to connect to and extend Stratfield Brake District Wildlife Site.'	In order to accommodate an additional 20 dwellings within the allocation, the area of land identified for a Community Orchard and associated Nature Conservation Area has been reduced by roughly a sixth. With an increased need for open space within the site as a result of the sites increased population, such a significant reduction in formal open space will reduce the positive effects associated with original allocation policy in relation to SA Objectives 2 (Health and Wellbeing) and 7 (Biodiversity). However, minor positive effects are still recorded against SA objective 2 (Health and Wellbeing) and SA objective 7 (Biodiversity) in acknowledgement of the fact provision is still being made, encouraging new residents to be physically active and retaining space and investment in green infrastructure. Furthermore, the policy still requires planning application(s) for the site to be supported by a proposed Biodiversity Improvement and Management Plan, as well as a Phase 1 habitat survey.
Main 85.	Policy PR7b - Land at Stratfield Farm	Point 9	Amend last sentence to read 'The Development Brief shall be prepared in consultation with Oxfordshire	It is not considered that this change will alter the findings of the SA because it relates the

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			County Council, and Oxford City Council <u>and the Canal and River Trust</u>	scope of the consultation on the development brief and does not affect the overall aim of Policy PR7b.
Main 86.	Policy PR7b – Land at Stratfield Farm	Policy PR7b – point 10 (a)	Add a second sentence to point 10 (a) to read: <u>'Minor variations in the location of specific uses will be considered where evidence is available.'</u>	It is not considered that this change will alter the findings of the SA because the variations will only be minor. It is also assumed that the necessary evidence required to inform the judgements will include justification as to how any adverse effects currently being managed by the site allocation will continue to be managed and any positive effects will at least be maintained.
Main 87.	Policy PR7b – Land at Stratfield Farm	Policy PR7b – Point 10 (b)	Points of vehicular access and egress from and to existing highways with, <u>unless otherwise approved,</u> at least two separate points:	It is not considered that this change will alter the findings of the SA because it is a minor addition to the wording that will not affect the overall aim of Policy PR7b (Land at Stratfield Farm).
Main 88.	Policy PR7b – Land at Stratfield Farm	Policy PR7b – Point 10 (c)	The scheme shall include an access road from the Kidlington roundabout to the easternmost development parcels and the Stratfield Farm building complex only, as shown on the inset Policies Map.	It is not considered that this change will alter the findings of the SA because it is the deletion of a reference to an inset Policies Map.
Main 89.	Policy PR7b - Land at Stratfield Farm	Point 13	Amend to read: ' The application(s) shall be supported by a phase 1 habitat survey including an habitat suitability index (HSI) survey for great crested newts, <u>and protected and notable species surveys as appropriate, including</u> great crested newt presence/absence surveys (dependent on HSI survey), hedgerow and tree survey, surveys for badgers, water vole, otter, invertebrate, dormouse, breeding birds and	This change would further contribute to the positive effect identified (as part of a mixed effect) for SA objective 7 (Conserving and Enhancing Biodiversity) by adding more clarity that a range of protected and notable species surveys may be appropriate.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			reptiles, an internal building assessment for roosting barn owl, and an assessment of water bodies'	However, there would be no changes in the significance of this effect.
Main 90.	Policy PR7b - Land at Stratfield Farm	Point 16	Amend to read 'The application should demonstrate that Thames Water, Natural England has agreed in principle and the Environment Agency have been consulted regarding wastewater treatment capacity and agreement has been reached in principle that foul drainage from the site will be accepted into the drainage its network.'	It is not considered that this change will alter the findings of the SA because it provides clarification on the consultation between Thames Water, the Environment Agency and Natural England with regards to the application for the site. The minor wording clarifications will not affect the overall aim of Policy PR7b.
Main 91.	Policy PR7b - Land at Stratfield Farm	Point 17	Amend to read '...a Heritage Impact Assessment which will identify include measures to avoid or minimise conflict with identified heritage assets within and adjacent to the site, particularly Stratfield Farmhouse. These measures shall be incorporated or reflected, as appropriate, in any proposed development scheme'	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that appropriate mitigation would be implemented. However, there would be no changes in the significance of these effects.
Main 92.	Policy PR7b - Land at Stratfield Farm	Point 18	Amend to read '...a desk-based archaeological investigation which may then require predetermination evaluations and appropriate mitigation measures. The outcomes of the investigation and mitigation measures shall be incorporated or reflected, as appropriate, in any proposed development scheme'	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 9 (Protecting and Enhancing the Historic Environment), as it adds more certainty that appropriate mitigation would be implemented. However, there would be no changes in the significance of these effects.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 93.	Policy PR7b - Land at Stratfield Farm	New Point	Add new point 19 to read ' <u>The application shall include a management plan for the appropriate re-use and improvement of soils</u> ' Re-number subsequent points	Whilst it is acknowledged that this change may help to mitigate/compensate for loss of agricultural land, there would be no change to the effects recorded against SA objective 13 (Efficient Use of Land).
Main 94.	Policy PR7b – Land at Stratfield Farm	Policy PR7b – point 21	Amend the final sentence to read: 'The Delivery Plan shall include a start date for development, demonstration of how the development would be completed by 2031 and a programme showing how <u>the site will contribute towards maintaining</u> a five year supply of housing. (for the site) will be maintained year on year.'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR7b (Land at Stratfield Farm).
Main 95.	Policy PR8 – Land East of the A44	Point 1	Amend to read: 'Construction of 1,950 dwellings (net) on approximately 66 hectares of land (the residential area as shown). The dwellings are to be constructed at an approximate average net density of 45 dwellings per hectare	It is not considered that this change will alter the findings of the SA because the removal of this text will not affect the overall aim of Policy PR8 (Land East of the A44), i.e. development will still occur in the location and at the scale planned.
Main 96.	Policy PR8 - Land East of the A44	Point 4	Amend to read 'The provision of a primary school with at least three forms of entry on 3.2 hectares of land in the location shown'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR8 (Land East of the A44).
Main 97.	Policy PR8 - Land East of the A44	Point 5	Amend to read 'The provision of a primary school with at least two forms of entry on 2.2 hectares of land in the location shown if required in consultation with the Education Authority and unless otherwise agreed with Cherwell District Council.'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR8 (Land East of the A44).

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 98.	Policy PR8 - Land East of the A44	Point 17	Amend last sentence to read 'The Development Brief shall be prepared in consultation with Oxfordshire County Council, and Oxford City Council, <u>Network Rail and the Canal and River Trust</u> '	It is not considered that this change will alter the findings of the SA because it is a reference to the scope of consultation on the Development Brief, which does not affect the overall aim of Policy PR8.
Main 99.	Policy PR8 – Land east of the A44	Policy PR8 – 18 (a)	Add a second sentence to point 18 (a) to read: ' <u>Minor variations in the location of specific uses will be considered where evidence is available.</u> '	It is not considered that this change will alter the findings of the SA because the variations will only be minor. It is also assumed that the necessary evidence required to inform the judgements will include justification as to how any adverse effects currently being managed by the site allocation will continue to be managed and any positive effects will at least be maintained.
Main 100.	Policy PR8 - Land East of the A44	Point 18 b	Amend to read: 'Points of vehicular access and egress from and to existing highways with at least two separate, <u>connecting</u> points from and to the A44 <u>and</u> including the use of the existing Science Park access road.'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR8.
Main 101.	Policy PR8 - Land East of the A44	Point 18 (f)	Amend to read: 'In consultation with Oxfordshire County Council <u>and Network Rail</u> , proposals for the closure/unadoption of Sandy Lane, the closure of Sandy Lane to motor vehicles...'	It is not considered that this change will alter the findings of the SA because it relates only to the scope of consultation and does not affect the overall aim of Policy PR8.
Main 102.	Policy PR8 -Land East of the A44	Point 19	Amend to read, 'The application(s) shall be supported by the Biodiversity Impact Assessment (BIA) based on the DEFRA biodiversity metric (unless the Council has adopted a local, alternative methodology), prepared in consultation and agreed with Cherwell District Council. The BIA shall <u>include be informed by a</u>	This change would further contribute to the positive effect identified (as part of a mixed effect) against SA objective 7 (Conserving and Enhancing Biodiversity). However,

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			<u>hydrogeological risk assessment to determine whether there would be any material change in ground water levels as a result of the development and any associated adverse impact, particularly on Rushy Meadows SSSI, requiring mitigation. It shall also be informed by investigation of any above-or below ground hydrological connectivity <u>with the SSSI and between Rowel Brook and Rushy Meadows SSSI</u></u>	neither the significance of this effect nor the overall effect of the policy would change.
Main 103.	Policy PR8 - Land East of the A44	Point 21	Amend to read: 'The application(s) shall be supported by a phase 1 habitat survey <u>and protected and notable species surveys as appropriate, including</u> and surveys for badgers, nesting birds, amphibians (in particular Great Crested Newts), reptiles and for bats including associated tree assessment, hedgerow regulations assessment.'	This change would further contribute to the positive effect identified (as part of a mixed effect) for SA objective 7 (Conserving and Enhancing Biodiversity) by adding more clarity that a range of protected and notable species surveys may be appropriate. However, there would be no changes in the significance of this effect.
Main 104.	Policy PR8 - Land East of the A44	Point 22	Amend to read: 'The application(s) shall be supported by a Transport Assessment and Travel Plan including measures for maximising sustainable transport connectivity, minimising the impact of motor vehicles on new residents and existing communities, and actions for updating the Travel Plan during construction of the development. <u>The Transport Assessment shall include consideration of the effect of vehicular and non-vehicular traffic on use of the railway level crossings at Sandy Lane, Yarnton Lane and Roundham.</u> '	It is not considered that this change will alter the findings of the SA because it provides further information on what the Transport Assessment will give consideration to, which will not affect the overall aim of Policy PR8.
Main 105.	Policy PR8 - Land East of the A44	Point 23	Amend to read '23. The application shall be supported by a Flood Risk Assessment informed by a suitable	The SA acknowledges that the land within Flood Zones 2 and 3 has been set aside for a

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			ground investigation, and having regard to guidance contained within the Council's Level 2 Strategic Flood Risk Assessment. A surface water management framework shall be prepared to maintain run off rates to greenfield run off rates and volumes, with use of Sustainable Drainage Systems in accordance with adopted Policy ESD7, taking into account recommendations contained in the Council's Level 1 and Level 2 SFRAs. <u>Residential development must be located outside the modelled Flood Zone 2 and 3 envelope.</u>	local nature reserve, informal publicly accessible open space and land for agricultural use. As such, the SA already assumes that residential development will not occur within Flood Zones 2 and 3. Consequently, this additional clarification is not considered to change the effects identified in the SA.
Main 106.	Policy PR8 - Land East of the A44	Point 24	Amend to read 'The application should demonstrate that Thames Water, Natural England has agreed in principle <u>and the Environment Agency have been consulted regarding wastewater treatment capacity and agreement has been reached</u> in principle that foul drainage from the site will be accepted into <u>the drainage its</u> network.'	It is not considered that this change will alter the findings of the SA because it provides clarification on the consultation between Thames Water, the Environment Agency and Natural England with regards to the application for the site. The minor wording clarifications will not affect the overall aim of Policy PR8.
Main 107.	Policy PR8 - Land East of the A44	Point 25	25. The application shall be supported by a Heritage Impact Assessment which will include <u>identify</u> measures to avoid or minimise conflict with the identified heritage assets within the site, particularly the Oxford Canal Conservation Area and the listed structures along its length. <u>These measures shall be incorporated or reflected, as appropriate, in any proposed development scheme.</u>	This change would add more certainty that appropriate mitigation would be implemented, which is consistent with the minor negative effect identified against SA objective 9 (Protecting and Enhancing the Historic Environment). There would be no changes in the SA effect identified or the significance of this effect.
Main 108.	Policy PR8 - Land East of the A44	Point 26	'...mitigation measures. <u>The outcomes of the investigation and mitigation measures shall be</u>	This change would add more certainty that appropriate mitigation would be implemented, which is consistent with the

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			<u>incorporated or reflected, as appropriate, in any proposed development scheme.'</u>	minor negative effect identified against SA objective 9 (Protecting and Enhancing the Historic Environment). There would be no changes in the SA effect identified or the significance of this effect.
Main 109.	Policy PR8 - Land East of the A44	New Point	Add new point 28 to read <u>'The application shall include a management plan for the appropriate re-use and improvement of soils'</u> Re-number subsequent points	Whilst it is acknowledged that this change may help to mitigate/compensate for loss of agricultural land, there would be no change to the effects recorded against SA objective 13 (Efficient Use of Land).
Main 110.	Policy PR8 – Land east of the A44	Policy PR8 – 30.	Amend the final sentence to read: 'The Delivery Plan shall include a start date for development, demonstration of how the development would be completed by 2031 and a programme showing how <u>the site will contribute towards maintaining</u> a five year supply of housing. (for the site) will be maintained year on year.'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR8 (Land east of the A44).
Main 111.	Paragraph 5.121	Paragraph 5.121	Amend to read: 'We are also seeking to enhance the beneficial use of the Green Belt within the site by requiring improved informal access to the countryside and significant ecological and biodiversity gains primarily <u>through the establishment of publicly accessible informal parkland between the proposed built development and the retained agricultural land to the west. There will also be opportunities for significant ecological and biodiversity gains.</u> The Council's priority will be the creation of a new Local Nature Reserve at the southern end of the site with	This change would further contribute to the positive effect identified for SA objectives 2 (Health and Wellbeing) and 7 (Conserving and Enhancing Biodiversity) (as part of a mixed effect) by adding more clarity as to how access to the countryside will be improved, whilst also stating that there will be opportunities for significant ecological and biodiversity gains. However, there would be no changes in the significance of this effect.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			good access to the primary school and the existing public rights of way.	
Main 112.	Policy PR9 – Land West of Yarnton	Policies Map – Land West of Yarnton	Extend residential area to 25.3 hectares Delete Public Access Land Amend Revised Green Belt boundary Add 24.8 hectares of new green space/parks Add 39.2 hectares of retained agricultural land	The effects of increasing the extent of the residential area is given under the proposed modification to point 1 of Policy PR9 below. The Public Access Land has been renamed 'green space/parks' and 'retained agricultural land'. The effects of this change are given under the proposed modification to point 5 of Policy PR9 below. The benefits are expected to remain the same.
Main 113.	Policy PR9 – Land West of Yarnton	Point 1	Amend to read, 'Construction of 540 dwellings (net) on approximately 25.16 hectares of land (the residential area as shown). The dwellings are to be constructed at an approximate average net density of 35 dwellings per hectare'	The increase in the extent of the residential area would further contribute to the significant positive effects identified for Policy PR9 (Land West of Yarnton) against SA objective 1 (Housing). It would also further contribute to the significant negative effects identified against SA objective 13 (Efficiency in Land Use) and the minor negative effects identified against SA objectives 10 (Reducing Road Pollution and Congestion), 7 (Conserving and Enhancing Biodiversity), 8 (Landscape) and 9 (Historic Environment). This is due to the fact that an increase in the extent of the residential area would result in further loss of Grade 3 agricultural land. The increase in the number of dwellings would also result in an increase in population and car users, which may increase pollution and traffic congestion.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				<p>However, the Landscape Assessment⁵ prepared to establish where additional residential development could be accommodated on the lower slopes to the east concludes that the extent of development could be extended up to between the 75m and 78m AOD contour with substantial green infrastructure within and at the outer buffer of the development.</p> <p>Furthermore, the addendum⁶ to the Transport Assessment notes that the deletion of Policy PR10 and the reallocation of the homes amongst the remaining allocations (including PR9) will have a net-positive overall effect on the previously identified transport impacts. An increase in the density of development has the potential to put greater pressure on sensitive local ecological, historic and landscape features in close proximity to the site, whilst also potentially resulting in the felling of trees. However, there will be no change in the significance of these effects.</p>
Main 114.	Policy PR9 – Land West of Yarnton	Point 3	<p>Amend to read:</p> <p>'The provision of 4.6 1.8 hectares of land for use by the existing William Fletcher Primary School to enable potential school expansion within the existing school</p>	<p>It is not considered that this change will alter the findings of the SA because it is a minor increase in the size of land for use by the William Fletcher Primary School, which will not affect the overall findings of the SA.</p>

⁵ Landscape Assessment for Site PR9, WYG, 2019

⁶ Addendum to Transport Assessment, ITP, 2019

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			site and the replacement of playing pitches and amenity space'	
Main 115.	Policy PR9 – Land West of Yarnton	Point 5	Amend to read: 'Public access within the 74 hectares of land <u>The provision of public open green space as informal parkland on 24.8 hectares of land</u> to the west of the residential area and a new Local Nature Reserve accessible to William Fletcher Primary School'	In order to accommodate an additional 10 dwellings within the allocation, the area of land identified for public access land has been reduced and renamed 'green space/parks' and 'retained agricultural land. With an increased need for open space within the site as a result of the sites increased population, a reduction in formal open space will reduce the positive effects associated with original allocation policy in relation to SA Objectives 2 (Health and Wellbeing) and 7 (Biodiversity). However, minor positive effects are still recorded against SA objective 2 (Health and Wellbeing) and SA objective 7 (Biodiversity) in acknowledgement of the fact provision is still being made, encouraging new residents to be physically active and retaining space and investment in green infrastructure.
Main 116.	Policy PR9 – Land West of Yarnton	Point 7	Insert <u>'The retention of 39.2 hectares of land in agricultural use in the location shown'</u>	The Public Access Land has been renamed 'retained agricultural land' 'green space/parks', as well as being reduced in size. The effects of this change are given above, under the proposed modification to point 5 of Policy PR9. The benefits are expected to remain the same.
Main 117.	Policy PR 9 - Land east of the A44	Policy PR 9 – point 8 (a)	Add a second sentence to point 8 (a) to read: <u>'Minor variations in the location of specific uses will be considered where evidence is available.'</u>	It is not considered that this change will alter the findings of the SA because the variations will only be minor. It is also assumed that

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				the necessary evidence required to inform the judgements will include justification as to how any adverse effects currently being managed by the site allocation will continue to be managed and any positive effects will at least be maintained.
Main 118.	Policy PR9 – Land West of Yarnton	Point 8 (b)	Amend to read: ' <u>At least two separate p</u> Points of vehicular access and egress to and from the A44 <u>with a connecting road between.</u>	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification on the number of vehicular access points with reference to a connecting road that will not affect the overall aim of Policy PR9.
Main 119.	Policy PR9 – Land West of Yarnton	Point 11	Amend to: "11. The application(s) shall be supported by a phase 1 habitat survey including habitat suitability index survey for great crested newts, <u>and protected and notable species surveys as appropriate, including</u> great crested newt presence/absence surveys (dependent on HSI survey), for badgers, breeding birds, internal building assessment for roosting barn owl, dormouse, reptile, tree and building assessment for bats, bat activity, hedgerow regulations assessment and assessment of water courses"	This change would further contribute to the positive effect identified (as part of a mixed effect) for SA objective 7 (Conserving and Enhancing Biodiversity) by adding more clarity that a range of protected and notable species surveys may be appropriate. However, there would be no changes in the significance of this effect.
Main 120.	Policy PR9 – Land West of Yarnton	Point 14	Amend to read 'The application should demonstrate that Thames Water <u>has agreed in principle and the Environment Agency have been consulted regarding wastewater treatment capacity and agreement has been reached</u> in principle that foul drainage from the site will be accepted into <u>the drainage its</u> network.'	It is not considered that this change will alter the findings of the SA because it provides clarification on the consultation between Thames Water and the Environment Agency with regards to the application for the site. The minor wording clarifications will not affect the overall aim of Policy PR9.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 121.	Policy PR9 – Land West of Yarnton	Point 16	Amend to read '...mitigation measures. <u>The outcomes of the investigation and mitigation measures shall be incorporated or reflected, as appropriate, in any proposed development scheme.</u> '	This change would add more certainty that appropriate mitigation would be implemented, which is consistent with the minor negative effect identified against SA objective 9 (Protecting and Enhancing the Historic Environment). There would be no changes in the SA effect identified or significance of this effect.
Main 122.	Policy PR9 – Land West of Yarnton	New Point	Add new point 17 to read ' <u>The application shall include a management plan for the appropriate re-use and improvement of soils</u> ' Re-number subsequent points	Whilst it is acknowledged that this change may help to mitigate/compensate for loss of agricultural land, there would be no change to the effects recorded against SA objective 13 (Efficient Use of Land).
Main 123.	Policy PR9 – Land west of Yarnton	Policy PR9 – point 18.	Amend the final sentence to read: 'The Delivery Plan shall include a start date for development, demonstration of how the development would be completed by 2031 and a programme showing how <u>the site will contribute towards maintaining</u> a five year supply of housing. (for the site) will be maintained year on year.'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR9 (Land West of Yarnton).
Main 124.	Woodstock – Paragraphs 5.124 to 5.139	-	Delete paragraphs 5.124 to 5.139.	This text has been deleted because Policy PR10 (Land South East of Woodstock) has been taken out of the Plan. The removal of this text will not affect the overall findings of the SA.
Main 125.	PR10 – Policies Map – Land	Proposals Map	Delete Proposals Map and Key	The map and key have been deleted because Policy PR10 (Land South East of Woodstock)

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
	south East of Woodstock			has been taken out of the Plan. The removal of the map and key will not affect the overall findings of the SA.
Main 126.	PR10 – Land South East of Woodstock	Policy PR10	Delete Policy PR10	<p>The removal of Policy PR10 from the Plan will result in the area-based effects identified in the original SA of Policy PR10 (positive and negative effects) not being realised. However, the redistribution of all 410 dwellings and associated supporting infrastructure previously allocated within Policy PR10 amongst the remaining site allocations means that the significant positive effects recorded against SA objective 1 (Housing) will not be lost. These positive effects, and the other effects associated with the preferred redistribution of the 410 dwellings are acknowledged in the SA findings above for the Main Modifications to Policies:</p> <ul style="list-style-type: none"> • PR6a – Land East of Oxford Road (650 to 690 dwellings). • PR6b – Land West of Oxford Road (530 to 670 dwellings). • PR7a – Land South East of Kidlington (230 to 430 dwellings). • PR7b – Land at Stratfield Farm (100 to 120 dwellings). • PR9 – Land West of Yarnton (530 to 540).

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 127.	Paragraph 5.143	-	Amend to read: 'The Council's emerging Supplementary Planning Document provides guidance on Developer Contributions associated with new development. The Council has consulted on a draft Charging Schedule for a possible Community Infrastructure Levy, a potential complementary means of acquiring funds for infrastructure. However, it has not yet been determined whether the Council will introduce CIL, particularly as the Government is reviewing how CIL functions, and its relationship with securing developer contributions through 'Section 106' legal obligations and options for reform. An announcement is expected by the Government at the Autumn Budget 2017. '	It is not considered that these changes will alter the findings of the SA because they are minor wording changes in the supporting text to Policy PR11 (Infrastructure Delivery) that will not affect the overall policy aim.
Main 128.	Paragraph 5.148	-	Amend to read: '...liaison on infrastructure issues will be required with partner authorities including the County Council, and Oxford City Council and West Oxfordshire District Council ...'	It is not considered that the removal of this text will alter the findings of the SA.
Main 129.	Paragraph 5.148	-	In delivering the developments identified in this Plan, liaison on infrastructure issues will be required with partner authorities including the County Council and Oxford City Council and West Oxfordshire District Council for example to ensure a joined-up approach to the provision of additional school places and public open space where there are cross-boundary implementation matters to consider.	It is not considered that the removal of this text will alter the findings of the SA.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 130.	Policy PR11 – Infrastructure Delivery	Point 1.	The Council's approach to infrastructure planning to contribute in meeting Oxford's unmet housing needs will be to ensure delivery by: 1. Working with partners including central Government, the Local Enterprise Partnership, Oxford City Council, West Oxfordshire District Council , Oxfordshire County Council and other service providers to:...	It is not considered that the removal of this text will alter the findings of the SA.
Main 131.	Policy PR11 - Infrastructure Delivery	Point 1(a)	Amend to read 'provide and maintain physical, community and green infrastructure'	The addition of emphasis on the need to maintain physical, community and green infrastructure in addition to the provision of new infrastructure is likely to result in positive effects against all SA objectives, with the exception of SA objectives 4 (Crime), 13 (efficient Use of Land), 14 (efficient Use of Resources) and 15 (Waste) for which negligible effects are recorded. However, these effects are considered to be no more significant than the effects already identified in in the original SA of Policy PR11.
Main 132.	Policy PR11 – Infrastructure Delivery	Policy PR11 – point 2	Amend point 2 of the Policy to read: Completing and k Keeping up-to-date a Developer Contributions	It is not considered that this change will alter the overall findings of the SA because it is a clarification on the status of Cherwell District Council's Development Contributions Supplementary Planning Documents.
Main 133.	Policy PR11 – Infrastructure Delivery	Point 3	Amend to read ' Ensure that Dd development proposals will be required to demonstrate that infrastructure requirements can be met including the provision of transport, education, health, social, sport , leisure and	This change will further contribute to the positive effects identified in relation to SA objective 2 (Improving Health and Well

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			community facilities, wastewater treatment and sewerage, and with necessary developer contributions in accordance with adopted requirements <u>including those of the Council's Developer Contributions SPD.</u>	Being). However, there would be no changes in the significance of this effect.
Main 134.	Policy PR11 - Infrastructure Delivery	Policy PR11	Add new point 4: <u>'4. All sites are required to contribute to the delivery of Local Plan infrastructure. Where forward funding for infrastructure has been provided, for example from the Oxfordshire Growth Board as part of the Oxfordshire Housing and Growth Deal, all sites are required to contribute to the recovery of these funds as appropriate.'</u>	This change will further contribute to the positive effects identified for Policy PR11 (Infrastructure Delivery) in relation to SA objectives 1 (Housing), 16 (Employment), 17 (Creating Economic Growth), 3 (Poverty and Social Exclusion), 6 (Accessibility), 10 (Reducing Road Pollution and Congestion), 2 (Improving Health and Well Being), 5 (Vibrant Communities), 7 (Conserving and Enhancing Biodiversity), 8 (Landscape), 9 (Historic Environment), 11 (Water Quality) and 12 (Flood Risk) by virtue of the fact that the addition of the text is likely to increase the likelihood that sites will secure the necessary funding for such Local Plan infrastructure. However, there would be no changes in the significance of this effect.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 135.	Paragraph 5.165	Point 2	Delete point 2	The removal of the possibility for the delivery of two sites earlier in the plan period reduces the flexibility within the Plan to deliver the five year land supply over the period 2021 to 2026. Therefore, uncertainty is attached to the positive effects recorded against SA objectives 1 (Housing), 16 (Employment), 17 (Economic Growth), 3 (Social Inclusion) and 5 (Vibrant Communities). However, given that the Plan still allocates the required number of homes within the Plan period and will still manage their supply, there is considered to be no change to the range and significance of the effects identified.
Main 136.	Policy PR12a – Delivering Sites and Maintaining Housing Supply	Paragraph 5.165 – point 3	Amend paragraph 5.165 as follows: ‘3. we are requiring developers to clearly show that they can maintain contribute towards maintaining a five year supply. for their own sites. ’	It is not considered that this change will alter the findings of the SA because it is a minor wording change in the supporting text to Policy PR12a (Delivering Sites and Maintaining Housing Supply) that will not alter the overall policy aim.
Main 137.	Policy PR12a	3 rd paragraph	Delete the paragraph: Land South East of Kidlington (Policy PR7a – 230 homes) and Land South East of Woodstock (Policy PR10 – 410 homes) will only be permitted to commence development before 1 April 2026 if the calculation of the five year land supply over the period 2021 to 2026 falls below five years.	See above response to Main 135.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Main 138.	Policy PR12a - Delivering Sites and Maintaining Housing Supply	5 th Paragraph	Amend to read: 'Permission will only be granted for any of the allocated sites if it can be demonstrated at application stage that they will contribute in delivering a continuous five year housing land supply on a site specific basis (i.e. measured against the local plan housing trajectory allocation for the site). This will be achieved via the Delivery Plans required for each strategic development site.	It is not considered that these changes will alter the findings of the SA because the proposed modifications will not affect the overall aim of Policy PR12a.
Main 139.	Policy PR12b - Sites Not Allocated in the Partial Review	Point (3)	Amend as follows: 'the site has been identified in the Council's Housing and Economic Land Availability Assessment as a potentially D developable site'	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR12b.
Main 140.	Policy PR12b - Sites Not Allocated in the Partial Review	Point (5) (a)	Amend to read 'A comprehensive Development Brief and place shaping principles for the entire site to be agreed in advance by the Council in consultation with Oxfordshire County Council and Oxford City Council	Reference to the need to establish the place shaping principles behind each application with the relevant local planning authorities is likely to increase the likelihood of the positive effects recorded against the SA objectives, particularly in relation to SA objective 5 (Vibrant Communities). Uncertainty is still attached to the minor positive effects in acknowledgement of the fact that need for additional allocations has yet to be established.
Main 141.	Policy PR12b – Sites not allocated in the Partial Review	Policy PR12b – Point 5 (b)	Amend the second sentence of the paragraph to read: 'The Delivery Plan shall include a start date for development, demonstration of how the development would be completed by 2031 and a programme showing how the site will contribute towards	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR12b (Sites Not Allocated in the Partial Review).

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
			maintaining a five year supply of housing. (for the site) will be maintained year on year.'	
Main 142.	Policy PR12b - Sites Not Allocated in the Partial Review	Point 5(h)	Amend to read 'a Heritage Impact Assessment which will identify include measures to avoid or minimise conflict with identified heritage assets within and adjacent to the site. <u>These measures shall be incorporated or reflected, as appropriate, in any proposed development scheme'</u>	This change would further contribute to the positive effect identified against SA objective 9 (Protecting and Enhancing the Historic Environment), as it would add more certainty that appropriate mitigation, and potential enhancement measures, would be implemented. However, there would be no changes in the significance of the minor positive effect recorded. Some uncertainty is still attached to the effect recorded in acknowledgement of the fact that the need for additional allocations has yet to be established.
Main 143.	Policy PR12b - Sites Not Allocated in the Partial Review	Point 5(i)	Amend to read 'a desk-based archaeological investigation which may then require predetermination evaluations and appropriate mitigation measures. <u>The outcomes of the investigation and mitigation measures shall be incorporated or reflected, as appropriate, in any proposed development scheme'</u>	This change would further contribute to the positive effect identified against SA objective 9 (Protecting and Enhancing the Historic Environment), as it would add more certainty that appropriate mitigation would be implemented. However, there would be no changes in the significance of the minor positive effect recorded. Some uncertainty is still attached to the effect recorded in acknowledgement of the fact that the need for additional allocations has yet to be established.
Main 144.	Policy PR12b – Sites Not Allocated	New point	Add as new point (3) <u>'50% of the homes are provided as affordable housing as defined by the</u>	The reiteration of the national planning policy requirement for 50% of delivered homes to be affordable provides helpful clarity and

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
	in the Partial Review		<u>National Planning Policy Framework</u> .’ Renumber Existing points 3 to 5 as 4 to 6.	consistency; however, as a national requirement it is not going to change the significance of the effects already identified.
Main 145.	Policy PR13 – Monitoring and Securing Delivery	3 rd paragraph	Amend last sentence to read, ‘This will include the implementation of Local Plans and County wide strategies such as the Local Transport Plan and the Oxfordshire Infrastructure Strategy <u>and associated monitoring</u> .’	It is not considered that this change will alter the findings of the SA because the addition of this text will not affect the overall aim of Policy PR13.
Main 146.	Appendix 3 – Housing Trajectory	Allocation Column	Update housing trajectory as indicated on revised trajectory attached.	The effect of removing allocation Policy PR10 and the redistribution of 410 dwellings within remaining site allocations is considered under the proposed modifications to allocation Policies PR6a, PR6b, PR7a, PR7b and PR9 above.
Main 147.	Appendix 4 – Infrastructure Schedule	-	Update infrastructure schedule (see attached updated schedule)	The updates to the Infrastructure Schedule will not affect the overall findings of the Local Plan SA.
Main 148.	Whole Plan	Policies Maps	Remove policy shading for PR3b, PR3c, PR3d and PR3e (land to be removed from the Green Belt) (<i>note: retain shading for safeguarded land – PR3a</i>) (see attached Proposed Map Changes)	Removing this policy shading will not affect the overall findings of the SA.
Minor Modifications				
Min 1.	Whole Plan	All Relevant Maps	Update the copyright on all maps (see attached Proposed Map Changes)	Updating the copyright on all maps will not affect the overall findings of the SA.
Min 2.	Whole Plan	All Relevant Maps	Improve the scale bars on all maps (see attached Proposed Map Changes)	Improving the scale bars on all maps will not affect the overall findings of the SA.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Min 3.	Whole Plan	All Relevant Maps	Improve differentiation between mapping designations/shading and ensure all mapping layers are clearly visible and ensure consistency with adopted Local Plan(see attached Proposed Map Changes)	Improving these mapping features so as to ensure consistency throughout the Local Plan will not affect the overall findings of the SA.
Min 4.	Whole Plan	All Relevant Maps	Ensure all proposed land allocations appear on other policy maps (e.g. Policy PR6b on the map for Policy PR6a) and add labels for the policies being illustrated (see attached Proposed Map Changes)	Ensuring all proposed land allocations and policy labels appear on the maps will not affect the overall findings of the SA.
Min 5.	Whole Plan	All Relevant Maps	Update layer including to show correct symbology/labelling for Ancient Woodland	Updating the layer to display the correct symbology/labelling for Ancient Woodland will not affect the overall findings of the SA.
Min 6.	Whole Plan	All Relevant Maps	Replace BAP habitat layer with S.41 NERC Act layer	The replacement of the BAP habitat layer will not affect the overall findings of the SA.
Min 7.	Whole Plan	All Relevant Maps	Show Local Wildlife Sites	Displaying the Local Wildlife Sites will not affect the overall findings of the SA.
Min 8.	Whole Plan	All Relevant maps	Ensure Conservation Target Area layer is clearly visible on all maps (see attached Proposed Map Changes)	Ensuring this layer is visible will not affect the overall findings of the SA.
Min 9.	Whole Plan	Plan Text and Footnotes	Update hyperlink to Evidence List on the Council's new website and document reference.	The updated hyperlink and document references will not affect the overall findings of the SA.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Min 10.	All policies Maps - key	All policies Maps - key	Replace site reference number <u>on the key</u> with red site boundary notation and label it 'site boundary'.	This change to the maps will not affect the overall findings of the SA.
Min 11.	Executive Summary, Paragraph xxii.	2nd sentence	Amend to read as 'The policy makes it clear that if monitoring indicates that the vision and objectives cannot be met, the Council will consider whether it wishes to ask the Secretary of State for <u>Housing</u> , Communities and Local Government to...'	This additional word in the Executive Summary will not affect the overall findings of the SA, which focuses on the areas of search, site allocations and policies, as well as the vision and strategic objectives.
Min 12.	Table 3	Vale of White Horse	Replace '220' with ' <u>2200</u> '	The correction of this typo will not affect the overall findings of the SA.
Min 13.	Text Box (Memorandum of Cooperation, November 2016)	2 nd para.	Amend paragraph to read 'The Programme does not seek to identify, propose or recommend any site or sites for additional housing within any district. Each LPA will remain responsible for the allocation of housing sites within any district. Each LPA will remain responsible for the allocation of housing sites within its own district and through its own Local Plan process.'	This change to the wording will not affect the overall findings of the SA, which focuses on the areas of search, site allocations and policies, as well as the vision and strategic objectives.
Min 14.	Paragraph 3.17	-	In this growth context, the Oxfordshire councils continue to cooperate on cross-boundary strategic matters, including on an Oxfordshire Infrastructure Strategy (OxIS)(30), the first stage of which was completed in April 2017.	It is not considered that this change will alter the overall findings of the SA because it is a minor wording change.
Min 15.	Figure 10: Spatial Strategy – Key Diagram	Site PR7a	Extend proposed growth area	The effects of removing allocation Policy PR10 and the redistribution of 410 dwellings within remaining site allocations are considered

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Min 16.	Figure 10: Spatial Strategy – Key Diagram	Site PR7b	Extend proposed growth area	under the proposed modifications to allocation Policies PR6a, PR6b, PR7a, PR7b and PR9 above.
Min 17.	Figure 10: Spatial Strategy – Key Diagram	Site PR9	Extend proposed growth area	
Min 18.	Figure 10: Spatial Strategy – Key Diagram	Site PR10	Remove whole site from diagram	
Min 19.	Para 5.17	Point 2	Amend to read 'the clear inability for Oxford City to fully meet its own housing needs'	It is not considered that this change will alter the overall findings of the SA because it is a minor wording clarification.
Min 20.	Para 5.39	PR3(c)	Amend to read 'Following the development of land to the north of Oxford and to the west of Oxford Road, the A34 will form the logical, permanent Green Belt boundary in is this location.	It is not considered that this change will alter the overall findings of the SA because it is a minor wording clarification.
Min 21.	Policy PR3 - The Oxford Green Belt	Paragraph 5.39 PR3(e)	Amend the third sentence of paragraph 5.39 PR3 (e) to read: 'The potential extension of the Science Park will be considered further in the next Local Plan Local Plan Part 2. '	It is not considered that this change will alter the overall findings of the SA because it is a minor wording clarification.
Min 22.	Policy PR3	(b)	Amend to read: '0.7 hectares of land adjoining and to the west of the railway (to the east of the strategic development site allocated under policy PR8 as shown on inset Policies Map PR8 the map at Appendix 2)	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR3.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Min 23.	Policy PR3	(c)	Amend to read: '11.8 hectares of land south of the A34 and west of the railway line (to the west of the strategic development site allocated under policy PR6b as shown on inset Policies Map PR6b <u>the map at Appendix 2)</u> '	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR3.
Min 24.	Policy PR3	(d)	Amend to read: '9.9 hectares of land comprising the existing Oxford Parkway Railway Station and the Water Eaton Park and Ride (as shown on inset Policies Map 6a <u>the map at Appendix 2)</u> '	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR3.
Min 25.	Policy PR3	(e)	Amend to read: '14.7 hectares of land to <u>the</u> north, east and west of Begbroke Science Park (as shown on inset Policies Map PR8 <u>the map at Appendix 2)</u> '	It is not considered that this change will alter the findings of the SA because it is a minor wording change that will not affect the overall aim of Policy PR3.
Min 26.	Paragraph 5.57	2 nd sentence	Amend to read 'In particular cycle improvements between Oxford Parkway <u>and</u> Cutteslowe Roundabout could help to complete an improved route between Kidlington and Oxford'.	This grammatical correction will not affect the overall findings of the SA.
Min 27.	Paragraph 5.78	Line 3	Amend to read '...far outweigh the those adverse effects...'	This grammatical correction will not affect the overall findings of the SA.
Min 28.	Policies Map	Policy PR6a	Remove 'existing green space' falling within Oxford City Council's administrative boundary	It is not considered that this change will alter the findings of the SA because the removal of this constraint will not affect the overall aim of Policy PR6b.
Min 29.	Policies Map	Policy PR6b	Remove 'existing green space' falling within Oxford City Council's administrative boundary.	It is not considered that this change will alter the findings of the SA because the removal of

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
				this constraint will not affect the overall aim of Policy PR6b.
Min 30.	Policies Map	Policy PR6c	Remove 'existing green space' falling within Oxford City Council's administrative boundary.	It is not considered that this change will alter the findings of the SA because the removal of this constraint will not affect the overall aim of Policy PR6c.
Min 31.	Policy PR6c	1 st paragraph	Amend to read 'Land at Frieze Farm (30 hectares) will be reserved ..'	It is not considered that this change will alter the findings of the SA because the removal of this constraint will not affect the overall aim of Policy PR6c.
Min 32.	Paragraph 5.697	Paragraph number	Renumber paragraph no. 5.697 as ' 5.97 '	It is no considered that the renumbering of this paragraph will alter the overall findings of the SA.
Min 33.	Policy PR7b – Policies Map	Land at Stratfield Farm	Indicate location of orchard referred to in Policy PR7b, point 6 (See attached Proposed Map Changes)	It is not considered that this change will alter the findings of the SA because it is a presentational correction.
Min 34.	Policy PR7b	Point 8	Amend to read '...Land East of the A44 (PR9) (PR8) across the Oxford Canal,....'	It is not considered that this change will alter the findings of the SA because it is the correction of a typo.
Min 35.	Policy PR7b – Land at Stratfield Farm	PR7b – 10 (g)	Amend to read: The maintenance and enhancement of significant the protected trees, existing tree lines and hedgerows	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification.
Min 36.	Policy PR7b	Point 13	Amend to read '...phase 1 habitat survey including A An habitat suitability index...'	It is not considered that this change will alter the findings of the SA because it is the correction of a typo.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Min 37.	Policy PR8	Point 18m	A An outline scheme for vehicular access by the emergency services.	It is not considered that this change will alter the findings of the SA because it is the correction of a typo.
Min 38.	Policy PR9 - Land West of Yarnton	Policy PR 9 - point 15	Amend to read: The application shall be supported by a Heritage Impact Assessment which will include identify measures to avoid or minimise conflict with identified heritage assets within or adjacent to the site' (point 15 ends)	It is not considered that this change will alter the findings of the SA because it is a minor wording clarification.
Min 39.	Paragraph 5.139	-	Amend to read: '...and the emerging Cherwell Design Guide'	It is not considered that this change will alter the overall findings of the SA because it is a clarification on the status of Cherwell District Council's Design Guide.
Min 40.	Policy PR11 – Infrastructure Delivery	Point 2	Amend to read: 'Completing and keeping up-to-date a Development perment Contributions Supplementary Planning Document...'	It is not considered that this change will alter the findings of the SA because it is the correction of a typo.
Min 41.	Paragraph 5.157	1 st sentence	Amend to read 'We need to ensure...'	This grammatical correction will not affect the overall findings of the SA.
Min 42.	Policy PR13 – Monitoring and Securing Delivery	Final para.	Amend text to read: 'If monitoring indicates that the vision and objectives cannot be met, the Council will consider whether it wishes to ask the Secretary of State for Housing , Communities and Local Government to....'	It is not considered that this change will alter the findings of the SA because it is a minor update to the Secretary of State's title.
Min 43.	Appendix 1 - Policies Map	Policies Map	Add PR3a reference on Polices Map for the Safeguarded land to the south of policy PR8.	It is not considered that this change will alter the overall findings of the SA because it is a minor wording clarification.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Min 44.	Appendix 1	Policies Map	Update reflecting changes to other Policies Maps (see attached)	These changes to Appendix 1 to reflect the updated policy maps will not alter the overall findings of the SA.
Min 45.	Appendix 2	Proposed Modifications to the Green Belt within Cherwell District	Add labels for PR3a, PR3b, PR3c, PR3d and PR3e	The addition of these labels will not alter the overall findings of the SA.
Min 46.	Appendix 2	Proposed Modifications to the Green Belt in Cherwell District	Amend Green Belt to be removed for sites PR7a, PR7b and PR9	The release of more land from the Green Belt in these locations reflects the increase in the extent of residential development within each site. See the SA effects recorded against the rows summarising the Main Modifications to allocation Policies PR7a, PR7b and PR9 above for a summary of the likely effects of more development in these locations.
Min 47.	Appendix 3 – Housing Trajectory	Allocation Column	Insert lines to identify 5 year period	This presentational correction will not affect the overall findings of the SA.
Min 48.	Appendix 5 – Monitoring Framework	Policy PR3 Local Plan Indicators	PR7a- replace 10.75 ha with 20.7 ha Add PR7 b– 5.2 ha PR9 – replace 17.6 ha with 27.2 ha	See the SA effects recorded against the rows summarising the Main Modifications to allocation Policies PR7a, PR7b and PR9 above for a summary of the likely effects of more development in these locations.
Min 49.	Appendix 5 – Monitoring Framework	Policy PR6a Local Plan Indicators	Delete Local Plan Indicators and replace with <u>'Residential completions'</u>	This minor change of the wording in the table in Appendix 5 will not affect the overall findings of the SA.

Ref No.	Section/ Policy/ Paragraph/ Table/ Diagram	Reference	Proposed Modification	Will the Proposed Modification alter the SA findings set out in the 2017 SA Report?
Min 50.	Appendix 5	Policy PR10	Delete row associated with PR10	Removing the row will not affect the overall findings of the SA.
Min 51.	Appendix 6 - Thematic Maps	-	Make the following changes to the theme maps - Remove Woodstock housing allocation and the associated green infrastructure at site PR10	Removing the Woodstock housing allocation from the theme map will not affect the overall findings of the SA.
Min 52.	Appendix 7 - Evidence Base	-	Update Evidence link as follows: https://www.cherwell.gov.uk/info/112/evidence-base/369/local-plan-part-1-partial-review---evidence-base	The provision of this evidence link will not affect the overall findings of the SA.

Cumulative and in-combination effects of the proposed modifications to the Plan

- 1.150 In response to the need to reallocate 410 homes from Woodstock (PR10) to elsewhere in the District, Cherwell District Council commissioned a range of evidence updates, covering ecology, transport, water, landscape and the historic environment, to establish whether the redistribution of the homes to PR6a, PR6b, PR7a, PR7b and PR9 would result in additional cumulative and in-combination effects. The additional evidence consistently concludes that there would be no significant change to the effects identified for the original distribution of growth including PR10, and for some issues the redistribution would in fact result in more positive (or less negative) effects.
- 1.151 In conclusion, although there will be negative effects associated with the reallocation of the 410 homes from PR10 to allocation Policies PR6a, PR6b, PR7a, PR7b and PR9, the significance of these adverse effects has not changed from those already identified through the SA of the original number of homes allocated at each location. More generally, the proposed modifications would contribute positively to, but not change, the overall cumulative effects of the Local Plan Partial Review as a whole, as recorded in the June 2017 SA Report. Similarly, the potential sustainability effects of the proposed modifications to the Local Plan Partial Review in combination with the likely effects of other related plans, programmes and projects are not different from those recorded in the June 2017 SA Report.

Habitats Regulations Assessment (HRA)

- 1.152 The June 2017 HRA of the Cherwell Local Plan 2011-2031: Partial Review - Oxford's Unmet Housing Needs proposed submission Plan concluded that there would be 'no likely significant effects' on any Natura 2000 Sites as a result of the proposals within the Plan.
- 1.153 An HRA Addendum (February 2018) considered the focused changes and minor modifications proposed to the Partial Review following consultation on the proposed submission Local Plan Review and concluded that the findings of the 2017 HRA and its conclusions still apply. Following the Court of Justice of the European Union ("CJEU") judgment in April 2018 *People Over Wind and Sweetman v Coillte Teoranta (C-323/17)*, the HRA was updated again to reflect the implications of the judgement and incorporate the Stage 2 Appropriate Assessment.
- 1.154 The latest HRA (September 2019) has assessed whether the Main Modifications and Minor Modifications involving the re-allocation of 410 houses from site PR10 to determine whether the findings of the HRA August 2018 are still valid. It has concluded that the main modifications and minor modifications do not change the findings and conclusions of the HRA Stage 1 and Stage 2 Appropriate Assessment of the Partial Review of the Cherwell Local Plan 2011 – 2031 (Part1): Oxford's Unmet Housing Need proposed submission Plan.

Monitoring indicators

- 1.155 In light of the above, the proposed monitoring indicators for monitoring the effects of the Plan in the SA Report which accompanied proposed submission Plan in June 2017 remain unchanged.

Appendix 1
Baseline and evidence updates

Baseline and evidence base updates

- 1.1 Since the publication of the first SA Addendum in February 2018, the following additional key evidence documents of relevance to the SA have been produced by the Council and described below. All evidence relating to the Partial Review is available on the Council's website.
- Land North of Shipton Road, Woodstock Heritage Assessment (June 2018).⁷
 - Open Space, Sport and Recreation Assessment and Strategies (October 2018).⁸
 - Cherwell Water Cycle Study Addendum (September 2019).⁹
 - Landscape Assessment for site PR9 (September 2019).¹⁰
 - Transport Assessment Addendum (September 2019).¹¹
 - Housing and Economic Land Availability Assessment (HELAA) Addendum (September 2019).¹²
 - Ecological Advice – Cumulative Impacts Addendum (September 2019).¹³
 - Green Belt Study Addendum (September 2019).¹⁴
 - Site Capacity Sense Check (September 2019).¹⁵

Land North of Shipton Road, Woodstock Heritage Assessment (June 2018)

- 1.2 A Heritage Impact Assessment was prepared by WYG on behalf of Cherwell District Council. The Heritage Impact Assessment was produced to identify heritage constraints and determine the suitability and nature of development within the site and will be used to inform the requirement for further archaeological assessment in the area.

Open Space, Sport and Recreation Assessment and Strategies (October 2018)

- 1.3 Paragraph 3.88 of the 2017 SA Report referred to the consultation carried out as part of the preparation of the Open Space, Sport and Recreation, Assessment and Strategies document under preparation by Nortofts Partnership Ltd, making reference to its initial findings. The Council published a Playing Pitch Strategy and Sports facility Strategy in October 2018 which has informed the proposed modifications to the Plan.

Cherwell Water Cycle Study Addendum (September 2019)

- 1.4 Paragraph 3.42 of the 2017 SA Report sets out the baseline with regard to wastewater treatment capacity in the District. The November 2017 Water Cycle Study (WCS) identifies that four (rather than six, as stated in the SA) Wastewater treatment works (WwTWs) (Banbury, Bloxham, Former RAF Upper Heyford and Woodstock) have potential to contribute to significant water quality impacts on the receiving watercourse of the River Cherwell, the River Glyme, Bloxham Brook and Gallos Brook, if capacity is utilised in line with currently proposed growth. However, as the WCS still concludes that feasible solutions are available to ensure legislative objectives are met, the November 2017 WCS does not affect the conclusions of the 2017 SA Report in relation to SA objective 11 (water quality and quantity).
- 1.5 Analysis of the redistribution of the dwellings from the Woodstock site has demonstrated that the changes resulted in a reduction to the forecasted growth at Woodstock WwTW but an increase to the forecasted growth to Oxford Wastewater Treatment Works (WwTW). It was therefore necessary to undertake additional analysis.

⁷ Land North of Shipton Road, Woodstock Heritage Assessment, WYG, June 2018

¹¹ Transport Assessment Addendum, ITP, September 2019

¹² Housing and Economic Land Availability Assessment Addendum, Cherwell District Council, September 2019

¹³ Ecological Advice – Cumulative Impacts Addendum, WYG, September 2019

¹⁴ Addendum to Cherwell Green Belt Study, LUC, September 2019

¹⁵ Site Capacity Sense Check, Alan Baxter Ltd (ABA), September 2019

- 1.6 The analysis of the redistribution of housing concluded that there would be no material change to other assessments (including the water resource assessment) undertaken and reported in the 2017 WCS report; this is because there has been no overall change in housing number delivery. Therefore, no re-analysis has been undertaken of any other element of the 2017 study, other than wastewater and water quality.
- 1.7 Additional analysis of the change in wastewater flows likely to be generated within the Cassington, Oxford and Woodstock WwTW catchments has been undertaken, and statistical water quality modelling¹ revisited for Oxford WwTW. This statistical-based water quality modelling was required to determine the discharge permit quality conditions required to ensure compliance with regulatory and legislative water quality objectives. An updated water quality assessment has not been undertaken for either Woodstock or Cassington WwTW because the forecasted growth at both sites will be less than presented in the 2017 WCS report. Woodstock WwTW already had available flow capacity for all planned growth and the forecast is now lower than planned, and the reduction in forecasted growth received by Cassington WwTW will result in no adverse effect.
- 1.8 The updated water quality modelling for Oxford WwTW shows a small change to the future permit quality condition required. This change is not significant, therefore the summary and recommendations of the 2017 WCS are still valid and have not been updated.

Landscape Assessment for site PR9 (September 2019)

- 1.9 WYG was instructed by Cherwell District Council (CDC) to assess, in landscape terms, the potential westward extent of an allocation for site PR9 and advise on the possible treatment of the new urban edge. A proposal for a school playing field in the south of the area was also evaluated. The addendum concludes that the landscape of the site could accommodate residential development on the lower slopes in the east of the area, avoiding rising up the steeper mid-slopes, so that the enclosing function of the landform to the lower-lying broad vale would be retained. The addendum recommends that the westward extent of development should be related to the 75m AOD contour, although the strong vegetation structure to the large central field and the shallower slopes continuing to about the 78m contour here could accommodate development to about that level. Substantial green infrastructure for the development and the outer buffer is also recommended. Further details on the findings are set out in the published landscape assessment.

Transport Assessment (September 2019)

- 1.10 An addendum to the Council's Transport Assessment for the proposed submission Plan has been prepared in collaboration with Oxfordshire County Council's Transport officers, on behalf of Cherwell District Council (CDC) in relation to its Local Plan 2011-2031 Partial Review in response to the Inspector's post hearing advice note. The Addendum provides:
- A summary of Inspector's advice, and comments, on the sustainable transport strategy and rationale that supported the Submission Plan.
 - Anticipated impacts of revisions to site allocations in terms of sustainable transport and highways considerations.
 - A review of the case for a new link road between the A44 and A4260, in the vicinity of Loop Farm roundabout.
- 1.11 The addendum concludes that taken together, the revised Local Plan site allocations proposed by CDC officers, in response to Inspector's Post-Hearing Advice Note (PC5)¹⁶, are expected to have a net-positive overall effect on previously assessed transport impacts.

Ecological Advice - Cumulative Impacts (September 2019)

- 1.12 WYG was commissioned in September 2019 to produce an Addendum to the Partial Review of the Cherwell Local Plan 2011-2031: Oxford's Unmet Housing Need: Ecological Advice – Cumulative Impacts (WYG, 2017).

¹⁶ Inspector Post-Hearing Advice Note. Available at: <https://www.cherwell.gov.uk/download/downloads/id/9135/pc5---inspectors-post-hearing-advice-note.pdf>

- 1.13 The objectives of this addendum report are to:
- Assess any changes in the cumulative impacts from the redistribution of housing units within the six remaining sites and the significance on ecological features identified; and
 - Assess any changes in cumulative impacts from the redistribution of housing units within the six remaining sites upon Rushy Meadows SSSI.

- 1.14 The cumulative impacts are considered to be consistent with the assessment in 2017. Policies PR6a – PR9 remain consistent with the avoidance, mitigation or compensation measures of the six remaining proposed strategic sites, contained within the Partial Review of the Cherwell Local Plan 2011-2031: Oxford's Unmet Housing Need: Ecological Advice – Cumulative Impacts (WYG, 2017).

Green Belt Study Addendum (September 2019)

- 1.15 Cherwell District Council commissioned LUC to produce a further addendum to the Cherwell Green Belt Study and addendum, to comment on the positioning of revised Green Belt boundaries associated with three allocation policies:

- PR7a – Land South East of Kidlington.
- PR7b – Land at Stratfield Farm.
- PR9 – Land West of Yarnton.

- 1.16 The conclusions are provided in the addendum.

Site Capacity Sense Check (September 2019)

- 1.17 Alan Baxter Ltd (ABA) has been asked to provide further support to Cherwell District Council (CDC) on site housing yields in response to the Inspector's advice note. Support has previously been provided to CDC on strategy development and with the peer review of site capacities. The findings are set out in the document.

Review of SA Report Baseline

- 1.18 A review has also been undertaken of the baseline set out in the 2017 SA report, which covers a range of topics including the landscape and historic environment of the District, biodiversity, transport and climate change, energy consumption and efficiency, population and health, housing, the economy, social inclusion and deprivation, and education. No significant changes to the key issues and opportunities reported in the 2017 SA report were identified. These new evidence bases have informed the Local Plan Partial Review and the SA; however, **it is not considered that the information they contain materially affects the SA effects previously identified.**

Review of plans, policies and programmes

- 1.19 Since the publication of the proposed submission Plan, the following national and regional plans, policies and programmes have been updated/published that are relevant to the Cherwell Local Plan Partial Review:

National

- **National Planning Policy Framework (2019)**¹⁷: The NPPF sets out the government's planning policies for England and how these are expected to be applied. The original NPPF was published in March 2012, before being updated in July 2018. The latest version of the NPPF was published in June 2019. Notable changes made since the publication of the original 2012 version include:
 - Design policies are considered instrumental in delivering new homes, and local planning authorities (LPAs) must make sure that the quality of approved developments does not materially diminish between permission and completion.

¹⁷ National Planning Policy Framework, MHCLG, 2019: <https://www.gov.uk/government/publications/national-planning-policy-framework--2>.

- Planning policies and decisions should promote the diversification of town centres as this is key to their long-term vitality and viability. They should clarify the range of uses permitted in such locations.
- Planning policies and decisions should promote effective use of land, giving substantial weight to the value of using suitable brownfield land. There is also support for upward extensions and for local authorities to take a positive approach to applications for alternative uses on land which is currently developed but not allocated.
- Planning policies and decisions should consider the social, economic and environmental benefits of estate regeneration. There is also additional recognition of the role that planning can play in promoting social interaction and healthy lifestyles.
- Clarity on the ways in which transport should be considered as part of the planning process from the earliest stages of plan-making and development proposals.
- Plans are to have regard to the cumulative impacts of flood risk, rather than just to or from individual development sites.
- Updates also align with the 25 Year Environment Plan, including taking air quality into account in planning policies and decisions.
- **National Planning Practice Guidance (NPPG)¹⁸** : The NPPG was last updated in July 2019. It now contains further guidance on how Green Belt openness and enhancement can be assessed, guidance on maintaining housing supply and delivery, and the effective use of land.
- **A Green Future: Our 25 Year Plan to Improve the Environment¹⁹** : This document was published in January 2018 and last updated in May 2019. It sets out government actions to help the natural world regain and retain good health. It aims to deliver cleaner air and water in our cities and rural landscapes, protect threatened species and provide richer wildlife habitats.
- **The Road to Zero²⁰** : This document was published in July 2018. It puts the UK at the forefront of the design and manufacturing of zero emission vehicles and aims for all new cars and vans to be effectively zero emission by 2040.
- **UK Plan for tackling roadside nitrogen dioxide concentrations²¹** : This document was published in July 2017 and last updated in October 2018. It is the UK air quality plan for bringing nitrogen dioxide (NO₂) air pollution within statutory limits in the shortest possible time. It contains a number of actions to be undertaken across the UK.
- **Clean Air Strategy 2019²²** : This document was published in January 2019, replacing the draft version published in 2018. It sets out what actions are required to tackle air pollution, such as Clean Air Zones. The will help ensure that targets set by government to tackle air pollution are met.
- **Making the country resilient to a changing climate²³** : This document was published by the National Adaptation Programme in July 2018 and replaces the previous version published in July 2013 that covered the period 2013 to 2018. This document covers the period 2018 to 2023. It sets out the actions the government is and will be taking to address the risks and opportunities posed by a changing climate.

- **Heritage Statement 2017²⁴** : This document was published in 2017. It sets out how the government will support the heritage sector and help it to protect and care for our heritage and historic environment in coming years.

Sub-Regional/County

- **Thames Water Draft Water Resources Management Plan²⁵**: This Plan looks ahead over the next 80 years to 2100. The Plan looks at demand management options to make best use of existing water as well as new water resource supplies. The Plan proposes the South East Strategic Reservoir Option to improve the resilience of both the Thames Water and Affinity Water regions (parts of Bedfordshire, Buckinghamshire, Essex, Greater London, Hertfordshire, Surrey and Kent) through the creation of a regional storage and transfer hub. This will capture and store water falling on the wetter west side of the region to meet the growing needs Swindon and Oxford. Development of this new reservoir is earmarked from 2037.
- **Oxfordshire Housing and Growth Deal²⁶**: In February 2018, all of the local authorities in Oxfordshire signed a Housing and Growth Deal, whereby the authorities would receive up to £215 million of central government funding in return for delivering 100,000 homes by 2031. The assumption built in to this figure was that 1,400 dwellings per annum were required in Oxford to 2031. This requires achievement of a series of milestones to be achieved by the local authorities, with funding contingent on the achievement of each milestone.
- **Oxfordshire Infrastructure Strategy²⁷**: The Oxfordshire Growth Board published the Oxfordshire Infrastructure Strategy in November 2017. This sets out ambitions for new and improved infrastructure to 2031 and beyond. Regionally and county-wide, the strategy supports an East-West rail link between Oxford, Bicester, Milton Keynes and Bedford; rail improvements between Oxford and Didcot; redevelopment of Oxford Station, and upgrades to the A34. In the long term, it also supports an Oxford-Cambridge expressway, which will provide a new high-quality road link between Oxford, Milton Keynes and Cambridge. Once completed, the new road is expected to take up to 40 minutes off journeys between the M4 and the M1, bringing Oxford and Cambridge to within a 45-minute drive of Milton Keynes.
- **Oxfordshire Joint Health and Wellbeing Strategy²⁸**: This Strategy was published in March 2019 and sets out how the NHS, Local Government and Healthwatch will work together to improve people's health and wellbeing in Oxfordshire. They aim to: (1) prevent ill health before it starts; (2) give patients and service users a high-quality experience; (3) work with residents on re-shaping their local services; and (4) tackle chronic workforce shortages.
- **Oxfordshire Local Industrial Strategy²⁹**: This Strategy was published in July 2019 and sets out a plan to build on Oxfordshire's strong foundations and world-leading assets, to deliver transformative growth which is clean and sustainable and delivers prosperity for all communities across the county. It will deliver the aims of the national Industrial Strategy, government's long-term plan to boost productivity, by backing businesses and investing in skills, industries and infrastructure.
- **Oxford-Milton Keynes-Cambridge 'knowledge arc'³⁰**: The high growth planned for Oxfordshire is part of the development of a 'knowledge arc' between Oxford, Milton Keynes and Cambridge. The 'knowledge arc' is being promoted by all of the local authorities along this corridor, and by the National Infrastructure Commission. In particular, the National

- **The Oxford-Cambridge Arc**³¹: This document was published in March 2019 and provides an update on government's overarching ambition for the Arc, including a joint declaration between government and local partners, signalling the importance of collaboration to achieve these aims.
- **Oxfordshire Walking Design Standards**³²: This guidance has been produced for developers, scheme designers, engineers and master planners to ensure an attractive and functional environment for walking that is available to all users.
- **Oxfordshire Cycling Design Standards**³³: This guidance aims to draw attention to key issues and to outline the application of contemporary cycle design thinking from across the country in the Oxfordshire context. Several similar documents from other parts of the country have been used to inform this guidance.
- **Oxford Housing and Homelessness Strategy**³⁴: This document represents and update to the previous Oxford Housing Strategy referenced in the SA Report (2017). The strategy reemphasises Oxford significant housing challenges, focussing around high demand and limited supply. These issues are increasing the Borough's homelessness pressures. The ambition of the new Strategy is for '*Oxford to be a City where people have access to affordable and high-quality homes that enable them to build settled, safe and healthy lives, within sustainable and thriving communities.*'

Oxfordshire Local Plans

1.20 The most recent versions of the remaining four Oxfordshire Districts' Local Plans aim to deliver at least 68,750 additional dwellings, including contributions to Oxford City's unmet housing need, albeit over different time periods. In combination with the 22,840 dwellings allocated within the adopted Cherwell Local Plan and the additional 4,400 homes allocated in the Local Plan Review, a total of 96,000 net additional dwellings. **Table A1** below provides a summary of the Districts' planned housing delivery.

Table A1 - Planned housing delivery

District	Planned Additional Dwellings	Local Plan Period	Status of Local Plan
Oxfordshire Authorities			
Cherwell	22,840	2011-31	Adopted Dec 2016
Cherwell's delivery of Oxford City's unmet needs	4,400	2019-31	Proposed Submission Partial Review July 2017
Oxford City	8,620	2016-36	Proposed Submission Nov 2018
South Oxfordshire District	17,825	2011-34	Publication Version 2 nd Scrutiny Version Jan 2019
South Oxfordshire's Delivery of Oxford City's unmet needs	4,950	2011-31	
Vale of White Horse District	20,560	2011-31	Adopted Dec 2016

Cherwell Neighbourhood Plans

- 1.21 Since the publication of the 2017 SA report the Council has 'made' the Mid-Cherwell Neighbourhood Plan³⁶ (March 2018) and the Adderbury Neighbourhood Plan³⁷ (July 2018). The Mid-Cherwell Neighbourhood Plan covers the Plan Period 2018-2031 and includes a range of planning policies to contribute towards managing development around and in between the areas category A and B villages. The Plan also promotes the protection of important local views and vistas, local green spaces, the control of light pollution, small-scale, affordable, adaptable and extra-care housing schemes. The Adderbury Neighbourhood Plan covers the Plan Period 2014-2031 and includes a range of planning policies designed to protect local green infrastructure, local green spaces and manage design in Conservation Areas and other areas of notable important local character.

³⁵ Excludes strategic urban extensions to the Northampton Related Development Area (NRDA), which are allocated in the West Northamptonshire Joint Core Strategy Policy S3 (December 2014)

³⁶ Mid-Cherwell Neighbourhood Plan (March, 2018) Available at: <https://www.cherwell.gov.uk/NeighbourhoodPlans>

³⁷ Adderbury Neighbourhood Plan (July, 2018) Available at: <https://www.cherwell.gov.uk/NeighbourhoodPlans>

Appendix 2

Assumptions to be applied in the SA of options using the SA framework

Assumptions applied during the SA of areas of search and residential site options for the Cherwell Local Plan Partial Review

SA Objective	Sub-objectives	Assumptions
SA Objectives related to meeting Oxford's Needs (Oxford Effects Recorded)		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	1. Will it contribute to meeting Oxford's unmet housing requirements? 2. Will it increase the supply of affordable homes, including for the homeless? 3. Will it encourage a mixed use and range of housing tenure, including meeting affordable housing needs?	<p>The driver for the Partial Review of the Plan is to fulfil the District's Duty to Cooperate by working to accommodate some of Oxford's housing shortfall. Cherwell's Local Plan already makes provision for Cherwell's housing needs over the Plan period. Therefore, effects against SA objective 1 have only been assessed and recorded in relation to meeting Oxford's housing needs.</p> <p>All potential areas of search/sites are expected to have positive effects on this objective for Oxford, due to the nature of the proposed development. It is assumed that all areas of search/sites will make provision for affordable housing (either on site or by way of financial contribution).</p> <p>All areas of search/sites are considered to make a significant contribution (++) to meeting Oxford's unmet housing need, as they would be likely to accommodate a substantial amount of the residential development required.</p>
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	1. Will it promote accessible employment opportunities? 2. Will it contribute to reducing short and long-term unemployment?	<p>The driver for the Partial Review of the Plan is to fulfil the District's Duty to Cooperate by working to accommodate some of Oxford's housing shortfall, including associated facilities and infrastructure to service this growth. Cherwell's Local Plan already makes provision for Cherwell's housing needs and its associated employment needs over the Plan period.</p> <p>Population growth associated with new development could have an effect on this objective by increasing the number of economically active people in close proximity to Oxford.</p> <p>Good accessibility to employment is important for developing and strengthening the relationship between labour and workplace ensuring economic growth in Oxford. Although it is not possible to predict whether new residents would choose to work in Oxford, the relative accessibility of each area of search/site to jobs in Oxford, either by walking and cycling, public transport or private car has been used to determine their contribution to this SA objective.</p> <ul style="list-style-type: none"> • Areas of search/sites which scored 'Green' in both ITP's assessments of 'access to jobs' are likely to have a significant positive (++) effect.

SA Objective	Sub-objectives	Assumptions
		<ul style="list-style-type: none"> • Areas of search/sites which scored 'Green' in one of ITP's two assessments of 'access to jobs' are likely to have a minor positive (+) effect. • Areas of search/sites which scored 'Amber' in both ITP's assessments of 'access to jobs' are likely to have a minor negative (-) effect. • Minor mixed effects (+/-) are likely where areas of search/sites fall under both 2 and 3 above or contain both 'Green' and 'Amber' or 'Red' scores. • Areas of search/sites which scored 'Red' in both ITP's assessments of 'access to jobs', or one 'Amber' and one 'Red' are likely to have a significant negative (-) effect.
<p>17. To sustain and develop economic growth and innovation, an educated/skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.</p>	<ol style="list-style-type: none"> 1. Will it encourage new business start-ups and opportunities for local people? 2. Will it improve business development and enhance productivity? 3. Will it enhance the image of Oxford as a business location? 4. Will it encourage inward investment? 5. Will it make land and property available for business development? 6. Will it assist in increasing the viability of the rural and farming economy? 7. Will it promote development in key sectors? 8. Will it promote regeneration; reducing disparities with surrounding areas? 	<p>The driver for the Partial Review of the Plan is to fulfil the District's Duty to Cooperate by working to accommodate some of Oxford's housing shortfall, including associated facilities and infrastructure to service this growth. Cherwell's Local Plan already makes provision for Cherwell's housing needs and its associated education and employment needs over the Plan period.</p> <p>The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive (+) effect. Indirect minor positive (+) effects on economic growth are also likely in the short term as a result of the increased rates of construction associated with the new developments.</p>

SA Objective	Sub-objectives	Assumptions				
	<p>9. Will it promote development in key clusters?</p> <p>10. Will it increase business opportunities in the tourism sector?</p>					
SA objectives with particular spatial relevance to Oxford (Oxford and Cherwell Effects Record)						
3. To reduce poverty and social exclusion.	<p>1. Will it assist in reducing poverty and social exclusion in Cherwell and Oxford?</p> <p>2. Does the spatial option provide opportunities to contribute towards the regeneration of more deprived neighbourhoods?</p>	<p>The creation of attractive, mixed and well-balanced communities is influenced by a range of factors – the provision of a mix of housing types, schools, shops, healthcare, open space/sports facilities – which relate to the detail (in particular the design) of developments, and will be influenced through Local Plan policies. Therefore, the likely effect on creating attractive, mixed and well-balanced communities will more easily be assessed alongside policies and criteria in Development Plans and specific site proposals which address the particular circumstances of the site and its location. Therefore, consideration is given to the potential for new development to contribute to the regeneration of currently deprived areas instead, and the location of the areas of search/sites in relation to such areas will be taken into account as follows:</p>				
		<table border="1"> <tr> <td>Oxford</td> <td> <p>Where an area of search/site is within or adjacent to a neighbourhood that is among the most deprived in Oxford, a minor positive (+) effect is likely.</p> <p>Where an area of search/site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford, a negligible (0) effect is likely.</p> </td> </tr> <tr> <td>Cherwell</td> <td> <p>Where an area of search/site is within or adjacent to a neighbourhood that is among the most deprived in Cherwell (i.e. within the bottom 30%), a minor positive (+) effect is likely.</p> <p>Where an area of search/site is not within or adjacent to a neighbourhood that is among the most deprived (i.e. above 30%) in Cherwell, a negligible (0) effect is likely.</p> </td> </tr> </table>	Oxford	<p>Where an area of search/site is within or adjacent to a neighbourhood that is among the most deprived in Oxford, a minor positive (+) effect is likely.</p> <p>Where an area of search/site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford, a negligible (0) effect is likely.</p>	Cherwell	<p>Where an area of search/site is within or adjacent to a neighbourhood that is among the most deprived in Cherwell (i.e. within the bottom 30%), a minor positive (+) effect is likely.</p> <p>Where an area of search/site is not within or adjacent to a neighbourhood that is among the most deprived (i.e. above 30%) in Cherwell, a negligible (0) effect is likely.</p>
		Oxford	<p>Where an area of search/site is within or adjacent to a neighbourhood that is among the most deprived in Oxford, a minor positive (+) effect is likely.</p> <p>Where an area of search/site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford, a negligible (0) effect is likely.</p>			
Cherwell	<p>Where an area of search/site is within or adjacent to a neighbourhood that is among the most deprived in Cherwell (i.e. within the bottom 30%), a minor positive (+) effect is likely.</p> <p>Where an area of search/site is not within or adjacent to a neighbourhood that is among the most deprived (i.e. above 30%) in Cherwell, a negligible (0) effect is likely.</p>					
6. To improve accessibility to all services and facilities.	1. Will it promote compact, mixed-use development, with good accessibility to local	The location of areas of search/sites will not directly affect the nature of developments, as these would be more influenced by development management policies. However, the location of housing could affect this objective by influencing people's ability to access good				

SA Objective	Sub-objectives	Assumptions		
	<p>facilities (e.g. employment, education, health services, shopping, leisure, green spaces and culture) that improves accessibility and decreases the need to travel?</p> <p>2. Will it provide convenient access to the cultural offer of Oxford via existing transport links?</p>	<p>quality local services including education, retail, leisure and cultural opportunities. (In addition, a large scale development could also potentially stimulate the provision of new services and facilities). It is important that there is sustainable and affordable access to these services and facilities including in order to maintain social linkages. For example, students living outside of university-provided accommodation need access to Oxford's higher education institutions. Oxford contains an extensive range of services and facilities including shops, leisure opportunities, restaurants, theatres, schools, colleges, public services and hospitals, including the John Radcliffe hospital.</p> <table border="1" data-bbox="949 437 2089 1018"> <tr> <td data-bbox="949 437 1093 1018">Oxford</td> <td data-bbox="1093 437 2089 1018"> <ul style="list-style-type: none"> • Where an area of search/site is directly linked to sustainable transport routes that serve Oxford (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. • Where an area of search/site is in close proximity to sustainable transport routes that serve Oxford (i.e. scored 'Amber' in ITP's assessment of 'proximity to current sustainable transport'), a minor positive (+) effect is likely. • Where an area of search/site is removed from existing sustainable transport routes that serve Oxford (i.e. scored 'Red' in ITP's assessment of 'proximity to current sustainable transport'), a significant negative (--) effect is likely. <p>Access to employment opportunities is assessed under SA objective 16.</p> <p>Access to existing open space and sports facilities is considered in the appraisal of Areas of Search/sites against SA Objective 2, which is concerned with health and well-being.</p> </td> </tr> </table> <p>The location of areas of search will not directly affect the nature of developments, as these would be more influenced by development management policies. However, the location of housing could affect this objective by influencing people's ability to access good quality local services including education, retail, leisure and cultural opportunities in a particular location (in addition, a large scale development could also potentially stimulate the provision of new services and facilities).</p> <p>Cherwell's two main towns of Bicester and Banbury, and to a lesser extent Kidlington, have a good range of retail and cultural services and facilities, and public transport links. The</p>	Oxford	<ul style="list-style-type: none"> • Where an area of search/site is directly linked to sustainable transport routes that serve Oxford (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. • Where an area of search/site is in close proximity to sustainable transport routes that serve Oxford (i.e. scored 'Amber' in ITP's assessment of 'proximity to current sustainable transport'), a minor positive (+) effect is likely. • Where an area of search/site is removed from existing sustainable transport routes that serve Oxford (i.e. scored 'Red' in ITP's assessment of 'proximity to current sustainable transport'), a significant negative (--) effect is likely. <p>Access to employment opportunities is assessed under SA objective 16.</p> <p>Access to existing open space and sports facilities is considered in the appraisal of Areas of Search/sites against SA Objective 2, which is concerned with health and well-being.</p>
Oxford	<ul style="list-style-type: none"> • Where an area of search/site is directly linked to sustainable transport routes that serve Oxford (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. • Where an area of search/site is in close proximity to sustainable transport routes that serve Oxford (i.e. scored 'Amber' in ITP's assessment of 'proximity to current sustainable transport'), a minor positive (+) effect is likely. • Where an area of search/site is removed from existing sustainable transport routes that serve Oxford (i.e. scored 'Red' in ITP's assessment of 'proximity to current sustainable transport'), a significant negative (--) effect is likely. <p>Access to employment opportunities is assessed under SA objective 16.</p> <p>Access to existing open space and sports facilities is considered in the appraisal of Areas of Search/sites against SA Objective 2, which is concerned with health and well-being.</p>			

SA Objective	Sub-objectives	Assumptions
		<p>villages and rural areas have a smaller range and fewer services, facilities and public transport links.</p> <p>Therefore, proximity to those centres, with their varying levels and ranges of services and facilities, can be used as an indicator of proximity to services and facilities.</p> <p>Cherwell (Areas of Search)</p> <ul style="list-style-type: none"> • Areas of search within or adjacent to Bicester, Banbury and Kidlington will have a significant positive (++) effect. • Areas of search within or adjacent to Category A Villages (Service Centres), excluding Kidlington, will have a minor positive (+) effect. • Areas of search within or adjacent to Category A Villages, excluding Kidlington, and within 800m of a primary school and a secondary school will be upgraded from a minor positive (+) to a significant positive (++) effect. • Areas of search not within or adjacent to the main towns or Category A Villages (Service Centres), excluding Kidlington, but are within walking distance (800m) of public transport links (bus stops, cycle paths and railway stations) will have a minor positive but uncertain (+?) effect. • Areas of search not within or adjacent to the main towns or Category A Villages (Service Centres), excluding Kidlington, and are not within walking distance of public transport links (bus stops, cycle paths and railway stations) will have a significant negative (--) effect. <p>Access to existing open space and sports facilities is considered in the appraisal of Areas of Search/sites against SA Objective 2, which is concerned with health and well-being.</p>

SA Objective	Sub-objectives	Assumptions			
		Cherwell (Sites)	<ul style="list-style-type: none"> Where a site is directly linked to sustainable transport routes that serve Cherwell (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. Where a site is in close proximity to sustainable transport routes that serve Cherwell (i.e. scored 'Amber' in ITP's assessment of 'proximity to current sustainable transport'), a minor positive (+) effect is likely. Where a site is removed from existing sustainable transport routes that serve Cherwell (i.e. scored 'Red' in ITP's assessment of 'proximity to current sustainable transport'), a significant negative (--) effect is likely. <p>The main source of services and facilities is expected to be Oxford. However at the site level there are varying opportunities for walking and cycling to access services and facilities at Kidlington, the villages and north Oxford and there may be barriers. Considering this, where there are more or fewer opportunities to access services and facilities the score provided for Cherwell will be changed.</p> <p>Access to existing open space and sports facilities is considered in the appraisal of Areas of Search/sites against SA Objective 2, which is concerned with health and well-being.</p>		
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	<p>1. Will it address any particular air quality impacts arising from specific operational and/or construction related development activities?</p> <p>2. Will it improve air quality particularly within identified AQMAs?</p> <p>3. Will it promote more sustainable transport patterns and reduce the need to travel, particularly in areas of high</p>	The location of development will influence levels of air pollution by affecting the level of likely car use amongst residents. Access to sustainable and affordable transport is key to determining accessibility to jobs in Oxford. There are currently three Air Quality Management Areas (AQMAs) with another recommended AQMA within Cherwell, where existing air quality issues would be exacerbated as a result of new development. Oxford City in its entirety is an AQMA.	<table border="1"> <tr> <td data-bbox="952 1045 1086 1300">Oxford (Areas of Search)</td> <td data-bbox="1086 1045 2083 1300"> <ul style="list-style-type: none"> Where an area of search is located along existing strategic walk/cycle routes, rail lines or high frequency bus routes to Oxford (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. Where an area of search is served by lower frequency bus routes, or an interchange away from higher frequency services, and not directly on, but linked to strategic walk/cycle routes to Oxford (i.e. scored 'Amber' in ITP's </td> </tr> </table>	Oxford (Areas of Search)	<ul style="list-style-type: none"> Where an area of search is located along existing strategic walk/cycle routes, rail lines or high frequency bus routes to Oxford (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. Where an area of search is served by lower frequency bus routes, or an interchange away from higher frequency services, and not directly on, but linked to strategic walk/cycle routes to Oxford (i.e. scored 'Amber' in ITP's
Oxford (Areas of Search)	<ul style="list-style-type: none"> Where an area of search is located along existing strategic walk/cycle routes, rail lines or high frequency bus routes to Oxford (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. Where an area of search is served by lower frequency bus routes, or an interchange away from higher frequency services, and not directly on, but linked to strategic walk/cycle routes to Oxford (i.e. scored 'Amber' in ITP's 				

SA Objective	Sub-objectives	Assumptions	
	<p>congestion, including public transport, walking and cycling?</p> <p>4. Will it promote more sustainable transport patterns in rural areas?</p> <p>5. Will it reduce journey times between key employment areas and key transport interchanges?</p>		<p>assessment of 'proximity to current sustainable transport')), a minor positive (+) effect is likely.</p> <ul style="list-style-type: none"> Where an area of search is divorced from existing strategic walk/cycle routes, rail, or frequent bus corridors that serve central Oxford (i.e. scored 'Red' in ITP's assessment of 'proximity to current sustainable transport'), a significant negative (--) effect is likely. <p>Areas of search within (or adjacent to) an Air Quality Management Area (AQMA) could impact on local air quality and health, particularly if vehicle movements associated with the new development (including potentially HGVs) compound existing air quality problems. Therefore, in addition, which could lead to mixed effects with the above:</p> <p>Areas of search that are within or directly linked to an AQMA would have a minor negative (-) effect on this SA objective.</p>
		Oxford (Sites)	<ul style="list-style-type: none"> Where a site is directly linked to sustainable transport routes that serve Oxford (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. Where a site is in close proximity to sustainable transport routes that serve Oxford (i.e. scored 'Amber' in ITP's assessment of 'proximity to current sustainable transport'), a minor positive (+) effect is likely. Where a site is removed from existing sustainable transport routes that serve Oxford (i.e. scored 'Red' in ITP's assessment of 'proximity to current sustainable transport'), a significant negative (--) effect is likely. <p>In addition to sites' proximity to sustainable transport options, sites from which road traffic is likely to compound local air quality issues are likely to result in adverse effects against this objective, which may result in mixed effects overall:</p> <ul style="list-style-type: none"> Sites from which a high proportion of road-based trips generated by proposed development(s) are considered likely to load onto roads covered by AQMAs in Cherwell and Oxford (i.e. scores 'Red' in ITP's assessment of proximity to Cherwell and Oxford AQMAs) are likely to have a significant adverse effect (--) against this objective.

SA Objective	Sub-objectives	Assumptions	
			<ul style="list-style-type: none"> Sites from which some road-based trips generated by proposed development(s) are considered likely to load onto roads covered by AQMAs in Cherwell and Oxford (i.e. scores 'Amber' in ITP's assessment of proximity to Cherwell and Oxford AQMAs) are likely to have a minor adverse effect (-) against this objective.
	Cherwell (Areas of Search)		<p>Areas of search that are within 800m of three or more sustainable transport links (bus stops, railway stations or cycle paths) are likely to have a significant positive (++) effect.</p> <ul style="list-style-type: none"> Areas of search that are either within 800m of one or two sustainable transport links (bus stops, railway stations or cycle paths) are likely to have a minor positive (+) effect. Areas of search that are more than 800m from any sustainable transport links are likely to have a minor negative (-) effect. <p>Areas of search within (or adjacent to) an Air Quality Management Area (AQMA) could impact on local air quality and health, particularly if vehicle movements associated with the new development (including potentially HGVs) compound existing air quality problems. Therefore, in addition, which could lead to mixed effects with the above:</p> <ul style="list-style-type: none"> Areas of search that are within or directly linked to an AQMA would have a minor negative (-) effect on this SA objective.
	Cherwell (Sites)		<ul style="list-style-type: none"> Where a site is directly linked to sustainable transport routes that serve Cherwell (i.e. scored 'Green' in ITP's assessment of 'proximity to current sustainable transport'), a significant positive (++) effect is likely. Where a site is in close proximity to sustainable transport routes that serve Cherwell (i.e. scored 'Amber' in ITP's assessment of 'proximity to current sustainable transport'), a minor positive (+) effect is likely. Where a site is removed from existing sustainable transport routes that serve Cherwell (i.e. scored 'Red' in ITP's assessment of 'proximity to current sustainable transport'), a significant negative (--) effect is likely. <p>In addition to sites' proximity to sustainable transport options, sites from which road traffic is likely to compound local air quality issues are likely to result in</p>

SA Objective	Sub-objectives	Assumptions
		<p>adverse effects against this objective, which may result in mixed effects overall:</p> <ul style="list-style-type: none"> • Sites from which a high proportion of road-based trips generated by proposed development(s) are considered likely to load onto roads covered by AQMAs in Cherwell and Oxford (i.e. scores 'Green' in ITP's assessment of proximity to Cherwell and Oxford AQMAs) are likely to have a significant adverse effect (--) against this objective. • Sites from which some road-based trips generated by proposed development(s) are considered likely to load onto roads covered by AQMAs in Cherwell and Oxford (i.e. scores 'Amber' in ITP's assessment of proximity to Cherwell and Oxford AQMAs) are likely to have a minor adverse effect (-) against this objective.
Other Social and Economic SA objectives (Cherwell Effects Recorded)		
<p>2. To improve the health and well-being of the population & reduce inequalities in health.</p>	<p>1. Will it improve access to doctors' surgeries and health care facilities?</p> <p>2. Will it encourage healthy lifestyles and provide opportunities for sport and recreation?</p>	<p>Areas of search/sites that are within walking distance (800m) of healthcare facilities (i.e. GP surgeries or hospitals), open spaces and footpaths and cycle routes will ensure that residents have good access to healthcare facilities and may encourage them to make more journeys on foot or by bicycle and to be active outdoors in open space, thus promoting physical activity and healthy lifestyles.</p> <ul style="list-style-type: none"> • Areas/sites that are within 800m of a healthcare facility, an area of open space or sports facility and at least one PRoW/cycle path will have a significant positive (++) effect. • Areas/sites that are within 800m of either a healthcare facility, an area of open space, sports facility or PRoW/cycle path will have a minor positive (+) effect. • Areas/sites that are more than 800m from either a healthcare facility, an area of open space, sports facility or PRoW/cycle paths will have a minor negative (-) effect. <p>Areas/Sites relative accessibility/proximity to Oxford, including Oxford's medical facilities, and the associated health and well-being benefits of being able to be more active and less isolated is appraised under SA Objective 6.</p>

SA Objective	Sub-objectives	Assumptions
4. To reduce crime and disorder and the fear of crime.	1. Are the principles of good urban design in reducing crime promoted as part of the proposal? 2. Will it assist in reducing actual levels of crime? 3. Will it assist in reducing the fear of crime?	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effects of potential sites on this SA objective will be negligible (0).
5. To create and sustain vibrant communities	1. Will it improve residential amenity (including potential to reduce light, smell and noise pollution) and sense of place? 2. Will it improve the satisfaction of people with their neighbourhoods as places to live and encourage ownership?	The location of areas of search/sites will not directly affect residents' satisfaction with neighbourhoods or provision, protection and enhancement of cultural activities, as these would be more influenced by development management policies. Therefore, the effects of potential sites on most of this SA objective will be negligible (0). However, where new development is proposed within close proximity of sensitive receptors (e.g. existing houses, schools, hospitals etc.) there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas (as indicated on the GIS base map) may result in noise pollution affecting residents in the longer term. Therefore areas of search/sites that are in close proximity to existing residential development or other sensitive receptors may have a minor negative (-) effect during the construction phase, and sites that are directly adjacent to an 'A' road, motorway or railway line, or industrial area would have a minor negative (-) effect in the longer-term. Note that the potential for effects on air quality are assessed under SA objective 10.
Environmental SA objectives (Cherwell Effects Recorded)		
7. To conserve and enhance and create resources for biodiversity	1. Will it, protect, enhance or restore a locally or nationally designated site of nature conservation importance (including those in Oxford that	Areas of search/sites that are close to an international, national or local designated conservation site have the potential to affect the biodiversity or geodiversity of those sites, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, increased recreation pressure etc. Conversely, there may be opportunities to promote habitat connectivity if new developments include green infrastructure.

SA Objective	Sub-objectives	Assumptions	
	<p>may be affected by new development in Cherwell)?</p> <p>2. Will it assist Cherwell District Council's Biodiversity Action Plan (BAP) and/or the Oxfordshire BAP achieve its targets?</p> <p>3. Will it conserve or enhance biodiversity assets or create new habitats?</p> <p>4. Will it minimise the fragmentation of existing habitats and enhance, restore or create networks of habitats?</p> <p>5. Will it conserve and enhance species diversity; and in particular avoid harm to protected species?</p> <p>6. Will it encourage protection of and increase the number of trees?</p>	<p>Therefore, while proximity to designated sites provides an indication of the potential for adverse effects, uncertainty exists, as appropriate mitigation may avoid adverse effects and may even result in positive effects.</p> <p>The HRA accompanying the Local Plan Partial Review highlights the potential for effects³⁸ on European biodiversity sites within and in the vicinity of Cherwell District. However, the in-combination assessment with other projects and plans identified no significant effects on Oxford Meadows SAC in combination with the proposals contained in the Partial Review proposed submission Plan, provided that any mitigation measures identified for other projects and plans are put in place. The HRA Stage 1 (Screening) assessment has determined that the Partial Review of the Cherwell Local Plan 2011-2031: Oxford's Unmet Housing Need proposed submission Plan will not lead to likely significant effects, either alone or in combination, on the qualifying features of Oxford Meadows SAC.³⁹</p>	<p>The impacts on biodiversity and geodiversity present in each area of search, including undesignated habitats and species, cannot be determined with certainty at this strategic level of assessment. This will be determined once more specific proposals are developed and submitted as part of a planning application.</p> <p>Areas of Search</p> <ul style="list-style-type: none"> • Areas of search that are within 250m of one or more designated biodiversity or geodiversity sites may have a significant negative (--?) effect. • Areas of search that are between 250m and 1km of one or more designated biodiversity or geodiversity sites may have a minor negative (-?) effect. • Areas of search that are more than 1km from any designated biodiversity or geodiversity sites may have a negligible (0?) effect.

³⁸ The HRA considers all policies in the Local Plan Partial Review, the adopted Local plan Partial Review, as well as the growth within neighbouring authorities.

³⁹ Cherwell Local Plan 2011-2031 Partial Review, Oxford's Unmet Housing Need – proposed submission Plan Habitat Regulations Assessment Screening Report, Atkins, June 2017.

SA Objective	Sub-objectives	Assumptions	
		Sites	<p>Cherwell District Council's Landscape Character Sensitivity and Capacity Assessment (2017) includes a site-based ecological assessment of each site option. This assessment has been used to determine the potential impacts of site options on this SA objective.</p> <p>Each site's 'Nature Conservation Assessment' score indicates the potential sensitivity of each site.</p> <ul style="list-style-type: none"> Sites assessed as having a 'High' and 'Medium/High' sensitivity are considered to have a significant negative (--?) effect on this objective. Sites assessed as having a 'Medium' and 'Medium/Low' sensitivity are considered to have a minor negative (-?) effect on this objective. Sites assessed as having a 'Low' sensitivity are considered to have a negligible (0?) effect on this objective.
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	<p>1. Will it protect, enhance and restore the District's natural environment assets (e.g. the countryside, parks and green spaces, common land, woodland and forest reserves, AONBs etc.)?</p> <p>2. Will it promote the accessibility of the District's countryside in a sustainable and well-managed manner?</p> <p>3. Will it improve the landscape, ecological quality and character of open spaces?</p> <p>4. Will it enhance the townscape and public realm?</p>	Areas of Search	<p>A small area of land to the north-west of the District lies within the nationally designated Cotswolds Area of Outstanding Natural Beauty (AONB).</p> <p>Development within the AONB could have a negative effect on the quality of the landscape although that is uncertain until the design of the development is known.</p> <ul style="list-style-type: none"> Areas of search that are within, or within 250m of the AONB could have a significant negative effect (--?) on the landscape. <p>Outside of this designated landscape area the character of the local environment is still likely to be affected.</p> <p>Specific impacts on the landscape and countryside will be dependent on individual planning applications.</p> <ul style="list-style-type: none"> Areas of Search around the District's main settlements, i.e. Banbury, Bicester and Kidlington, may be able to accommodate housing growth as extensions to their existing urban edges without significant adverse effects on the landscape character of the wider countryside. Land immediately adjacent to motorway junctions may be able to accommodate housing development without significant adverse effects on the wider countryside. However, a minor negative (-?) but uncertain effect will be recorded.

SA Objective	Sub-objectives	Assumptions	
	5. Will it prevent coalescence between settlements?		<ul style="list-style-type: none"> Areas of Search within more open, rural locations, including around villages, are more likely to have significant adverse (--) effects on the character of the wider countryside.
		Sites	<p>Green Belt is a policy designation so the Council considers the potential impact on the Green Belt separately. Green Belt purposes 1, 2 and 3 are most related to this SA objective. There is potential for development to contribute to the sprawl of Oxford (purpose 1), the merger of settlements (purpose 2) and the encroachment of the countryside (purpose 3). However, this is uncertain until the exact location, layout and landscaping of each development location is unknown.</p> <p>Cherwell District Council's Landscape Character Sensitivity and Capacity Assessment (2017) includes a detailed site-based landscape assessment of each site option.</p> <p>Each site's score related to its capacity for residential development has been used to determine the potential impacts of site options on this SA objective.</p> <ul style="list-style-type: none"> Sites assessed as having a 'High' capacity to accommodate residential development are considered to have a negligible (0?) effect on this objective. Sites assessed as having a 'Medium/High' to 'Medium' capacity to accommodate residential development are considered to have a minor negative (-?) effect on this objective. Sites assessed as having a 'Medium/Low' to 'Low' capacity to accommodate residential development are considered to have a significant negative (--?) effect on this objective.

SA Objective	Sub-objectives	Assumptions
<p>9. To protect, enhance and make accessible for enjoyment, the historic environment.</p>	<p>1. Will it protect, enhance and restore Cherwell’s cultural and heritage assets (e.g. World Heritage Sites, Scheduled Ancient Monuments, Listed Buildings, Historic Parks and Gardens and Conservation Areas) and the setting of historic Oxford?</p> <p>2. Will it promote the accessibility of the District’s historic environment in a sustainable and well-managed manner?</p> <p>3. Will it help preserve and record archaeological features?</p>	<p>Historic England bases its definition of the setting of a heritage asset on the previous national Planning Policy Statement 5, as ‘the surroundings in which [the asset] is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance, or may be neutral⁴⁰. Detailed impacts on the setting of individual historic assets are difficult to determine during a strategic level of assessment such as this SA for potential sites to be allocated in the Local Plan Partial Review. Effects would be more able to be determined once specific proposals are developed for a site and submitted as part of a planning application.</p> <p>Consequently, in all cases, potential effects are recorded as uncertain (?) until the exact scale, design and layout of the new development, including opportunities to enhance the setting of heritage features (e.g. where sympathetic development replaces a derelict brownfield site which is currently having an adverse effect) are known.</p> <p>The issue of promoting the accessibility of the District’s historic environment in a sustainable and well-managed manner is appraised under SA objective 6 which determines whether each area of search/ Site would provide convenient access to the cultural offer of Oxford via existing transport links. The cultural offer of Oxford is considered an appropriate proxy for historic Oxford.</p>

⁴⁰ English Heritage (now Historic England). The Setting of Heritage Assets REVISION NOTE June 2012.

SA Objective	Sub-objectives	Assumptions	
		Areas of Search	<p>In the absence of detailed assessment work on the historic environment of each of the areas of search, the following assumptions have been made as an indication of potential effects on heritage assets:</p> <ul style="list-style-type: none"> • A potential significant negative effect (--?) will be identified where an area of search is adjacent to or includes a statutory heritage asset (e.g. World Heritage Sites, Listed Buildings (all grades), Scheduled Monuments plus other nationally important archaeological sites, Registered Parks and Gardens, Registered Battlefields and Conservation Areas). • A potential minor negative effect (-?) will be identified where an area of search is within 5km of statutory heritage assets, including Historic Oxford. <p>Green Belt is a policy designation so the Council considers the potential impact on the Green Belt separately. Green Belt purpose 4 is most related to this SA objective. There is potential for impacts on the setting and special character of historic Oxford. However, this is uncertain until the exact location, layout and landscaping of each development location is unknown.</p>
		Sites	<p>Cherwell District Council's Landscape Character Sensitivity and Capacity Assessment (2017) includes a site-based historic environment assessment of each site option. This assessment has been used to determine the potential impacts of site options on this SA objective.</p> <p>Each site's 'Cultural Sensitivity Assessment' score indicates the potential sensitivity of each site.</p> <ul style="list-style-type: none"> • Sites assessed as having a 'High' and 'Medium/High' sensitivity are considered to have a significant negative (--?) effect on this objective. • Sites assessed as having a 'Medium' and 'Medium/Low' sensitivity are considered to have a minor negative (-?) effect on this objective. • Sites assessed as having a 'Low' sensitivity are considered to have a negligible (0?) effect on this objective. <p>Cherwell District Council's Green Belt Study (2017) includes a site-based assessment against the five purposes of Green Belt. In this study, the land within each site has been assessed to determine its role in preserving the setting and special character of historic Oxford (purpose 4).</p>

SA Objective	Sub-objectives	Assumptions
		<ul style="list-style-type: none"> Sites considered to make a strong contribution to purpose 4 are considered to have a significant negative effect on the setting and special character of historic Oxford. Sites considered to make a contribution to purpose 4 are considered to have a minor negative effect (-) on the setting and special character of historic Oxford. Sites considered to make no contribution to purpose 4 are considered to have a negligible effect (0) on the setting and special character of historic Oxford.
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	<ol style="list-style-type: none"> Will it improve the water quality of the District's rivers and inland water? Will it enable recycled water to be used? Will it promote sustainable water resource management, provision of new facilities/ infrastructure or water efficient measures? 	<p>The location of areas of search/sites could affect water quality, depending on whether they are in an area where there is capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. However, the Local Plan Part 2 will determine the specific location of development within the Plan area. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all areas of search/sites will have a negligible (0) effect on this SA objective.</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	<ol style="list-style-type: none"> Will it reduce the risk of flooding from rivers, watercourses and sewer flooding to people and property? Will it result in inappropriate development in the flood plain? Will it increase the provision of sustainable drainage in new developments? 	<p>Development on greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk, particularly where the sites are within high risk flood zones.</p> <p>National Planning Practice Guidance identifies residential properties as a 'more vulnerable use', which is suitable in areas of flood zone 1 and 2 but would require an exception test in flood zone 3a, and is unsuitable in flood zone 3b. While offices and general industry are defined as a 'less vulnerable use', which is suitable in areas of flood zone 1, 2 and 3a but is unsuitable in flood zone 3b. However, flood zone data for Cherwell does not distinguish between zones 3a and 3b, therefore significant effects are identified for all sites within flood zone 3.</p> <p>While new development in any location may offer good opportunities to incorporate SuDS, and therefore have a positive effect on reducing flood risk, this would depend on the design of the proposed development and not on the location of the site.</p>

SA Objective	Sub-objectives	Assumptions
		<ul style="list-style-type: none"> • Areas of search/sites that are entirely or mainly on land within flood zone 3 could have a significant negative (--?) effect although this is uncertain. • Areas of search/sites that are either entirely or mainly on greenfield land outside of flood zone 3 or are entirely or mainly on brownfield land which contains portions of flood zone 3 are likely to have a minor negative (-) effect. • Areas of search/sites that are on brownfield land outside of flood zone 3 are likely to have a negligible (0) effect.
<p>13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.</p>	<ol style="list-style-type: none"> 1. Will it maximise the provision of housing development on previously developed land as opposed to greenfield sites? 2. Will it maximise the provision of employment development on previously developed land as opposed to greenfield sites? 3. Will it maximise housing densities to make efficient use of land? 4. Will it ensure land is remediated where appropriate? 5. Will it reduce the loss of soil and high grade agricultural land to development? 	<p>The location of development can influence the efficient use of land, as sites on high quality agricultural land would result in that land being lost to other uses. Development on brownfield land represents a more efficient use of land in comparison to the development of greenfield sites.</p> <ul style="list-style-type: none"> • Areas of search/sites that are mainly or entirely on greenfield land which is classed as being of Grade 1 or Grade 2 agricultural quality would have a significant negative (--) effect. • Areas of search/sites that are mainly or entirely on greenfield land which is classed as being of Grade 3 agricultural quality could have a significant negative effect although this is uncertain (--?) depending on whether it is Grade 3a or Grade 3b which is not known. • Areas of search/sites that are mainly or entirely on greenfield land that is classed as Grade 4 or below, or urban land, would have a minor negative (-) effect. • Areas of search/sites that are mainly (but not entirely) on brownfield land could have a minor positive (+?) effect although this is uncertain depending on the quality of land in the rest of the site and how the development within the site would eventually be laid out. • Areas of search/sites that are entirely on brownfield land would have a significant positive (++) effect. <p>Green Belt is a policy designation so the Council considers the potential impact on the Green Belt separately. However Green Belt purpose 5 is most related to this SA objective due to the fact that the location of development can assist in urban regeneration.</p>
<p>14. To reduce the global, social and environmental impact of consumption of resource by using</p>	<ol style="list-style-type: none"> 1. Will it promote the adoption of sustainable design in construction practices and the use of recycled materials? 	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effects of areas of search/sites</p>

SA Objective	Sub-objectives	Assumptions
sustainably produced and local products.	<p>2. Will it promote the use of locally and sustainably sourced, and recycling of materials in construction and renovation?</p> <p>3. Will it lead to an increase in the proportion of energy needs being met from renewable sources?</p> <p>4. Will it promote the incorporation of small-scale renewable in developments?</p>	<p>on this SA objective will be negligible (0), unless specific proposals indicate a contribution to any of the sub-objectives would occur.</p> <p>However, all new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas (identified through the Oxfordshire Minerals Local Plan) as development in those areas may sterilise mineral resources and restrict the availability of resources in the Districts. Therefore:</p> <ul style="list-style-type: none"> • Areas of search/sites that are within Minerals Consultation Areas⁴¹ are likely to have a minor negative (-) effect. • Areas of search/sites that are not Minerals Consultation Areas would have a negligible (0) effect.
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	<p>1. Will it promote sustainable waste management practices through a range of waste management facilities?</p> <p>2. Will it reduce hazardous waste?</p> <p>3. Will it increase waste recovery and recycling?</p>	<p>All new development will inevitably involve an increase in waste generation, but it may also offer good opportunities for incorporating sustainable waste management practices, regardless of the location.</p> <p>Levels of recycling will not be influenced by the location of site options, as the whole of the Cherwell District is covered by kerbside recycling collections for residential properties and levels of recycling within employment developments will depend on the practices of the businesses that locate their.</p> <p>Where areas of search/sites are on brownfield land there may be opportunities for re-using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <ul style="list-style-type: none"> • Areas of search/sites on brownfield land may have a minor positive (+?) effect. • Areas of search/sites on greenfield land would have a minor negative (-) effect.

⁴¹ Mineral Consultation Areas – areas of potential mineral resource wherein district planning authorities should consult the County Council on applications for development, to prevent mineral resources being lost ('sterilised').

Appendix 3

Detailed SA matrices for new site options

Options outside of the Green Belt

Option 1 – Site PR10 – Land South East of Woodstock

Option 1 – Site PR10 – Land South East of Woodstock		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	The delivery of homes in this location, 50% of which are likely to be affordable homes, is likely to generate a significant positive effect on this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford --	The area identified within Policy PR10 was previously appraised as site options 22 and 25, with the vast majority of the site falling within site 22. Site option 22 was identified as having very limited access to jobs as the site option scored 'Red' in both ITP's assessments of 'access to jobs' in Oxford. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have limited access to Oxford jobs via a range of sustainable transport modes and the road network. A significant negative effect is therefore recorded against this SA objective.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +	The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford		

Option 1 – Site PR10 – Land South East of Woodstock			
SA Objectives	SA Score		Justification
	Oxford	Cherwell	
3. To reduce poverty and social exclusion.	0	0	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective
6. To improve accessibility to all services and facilities.	+	++	<p>The area identified within Policy PR10 was previously appraised as part of the larger site options 22 and 25, with the vast majority of the site falling within site 22. Site option 22 was identified as having recorded as having a minor positive effect on this SA objective due to its relatively close proximity to sustainable transport routes to Oxford and a significant positive effect against this objective for Cherwell due to its close proximity to Woodstock which contains a number of services and facilities including a primary school, secondary school, a doctor's surgery, shops and places to eat.</p> <p>Therefore, a minor positive effect is recorded for this objective for Oxford and a significant positive effect is recorded for this objective for Cherwell.</p>
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	+	+	<p>The area identified within Policy PR10 was previously appraised as part of the larger site options 22 and 25, with the vast majority of the site falling within site 22. Site 22 was identified as having a mixed minor positive on this objective due to the good sustainable transport links to both Oxford and Cherwell. It was not expected that the site is not considered to have any effect on AQMAs in Oxford or Cherwell due to its peripheral rural location. The south west boundary of the site follows the A44 (Woodstock Road) and the south east boundary of the site however, lies directly adjacent to the A4095 (Grove Road).</p> <p>Therefore a minor positive effect is retained on this SA objective.</p>
Other socio-economic SA objectives (scores only relate to Cherwell District)			
2. To improve the health and well-being of the population & reduce inequalities in health.		+	The site does not lie within 800m of a health facility. There are several public footpaths within 800m and the site is adjacent to a cycle route, which may encourage residents to partake of more active modes of transport. As such, a minor positive effect is likely for this SA objective is likely.

Option 1 – Site PR10 – Land South East of Woodstock		
SA Objectives	SA Score	Justification
4. To reduce crime and disorder and the fear of crime.	0?	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR10 lies within close proximity to existing residential communities of Woodstock and Hesington. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is adjacent to Perdiswell farm House on Shipton Road to the north. In addition the A4095 (Upper Campsfield Road) and the A44 (Oxford Road) are adjacent to the site. Therefore, a minor negative effect is expected on this SA objective during the construction phase and longer term.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR10 was previously appraised as site options 22 and 25, with the vast majority of the site falling within site 22. Site options 22 and 25 were identified as having an uncertain minor negative effect due to the sites' wide variety of habitats on site and their potential for protected species.</p> <p>It is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species. Overall an uncertain minor negative effect is recorded for this SA objective The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.</p>

Option 1 – Site PR10 – Land South East of Woodstock		
SA Objectives	SA Score	Justification
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The area identified within Policy PR10 was previously appraised as site options 22 and 25, with the vast majority of the site falling within site 22. Site option 22 was identified as having an uncertain minor negative effect as it is considered by the Landscape Character Sensitivity and Capacity Assessment (2017) that there is a medium capacity for development, considering the presence of certain constraints, notably the Scheduled Ancient Monument located in the southwest of the site. Site 25 was identified as having a significant and uncertain effect as it is considered by the Landscape Character Sensitivity and Capacity Assessment (2017) that there is a medium to low capacity for development. Visibility of site 25 from the north as the site rises to a high point on the northern boundary and the general indivisibility from the agricultural landscape from the east is cited as the main justification. The developable area of PR10 is located largely within site 22, with only a primary school being located in the southern half of site 25.</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective. The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The area identified within Policy PR10 was previously appraised as site options 22 and 25, with the vast majority of the site falling within site 22. Site option 22 was identified as having an uncertain significant negative effect due to the site having a High/Medium sensitivity as it contains one Scheduled Monument. In addition, the site is in close proximity to the Blenheim Palace World Heritage Site located in the District of West Oxfordshire to the west. Site 25 was identified as having a neutral and uncertain effect. The site is not located in the Oxfordshire Green Belt and therefore the contribution of the land within the site to the setting and special character of historic Oxford has not been assessed within the Cherwell Green Belt Study (2017).</p> <p>Overall, the Archaeology and Heritage Assessment found the site to have High/Medium sensitivity and so a significant negative effect is expected on this SA objective. The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.</p>

Option 1 – Site PR10 – Land South East of Woodstock		
SA Objectives	SA Score	Justification
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017).</p>
12. To reduce the risk of flooding and resulting detriment to public well- being, the economy and the environment	-	<p>The development boundary of the site is located to the east of Woodstock. This land lies outside of flood zones 2 and 3; however, the land is greenfield. Therefore a minor negative effect is likely.</p> <p>However, it should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the site contains areas susceptible to groundwater and sewer flooding incidents.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The development boundary of the site located to the east of Woodstock. However, this land is greenfield land which lies entirely on Grade 3 Agricultural Land.</p> <p>The development of the site would result in a net loss of greenfield land in the District, including Grade 3 agricultural land. Therefore, a significant negative effect is recorded against this objective. An uncertain effect is also attached as it is unknown whether this is Grade 3a, which is classified as best and most versatile, or Grade 3b which has a lower agricultural value.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	0	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p>

Option 1 – Site PR10 – Land South East of Woodstock

SA Objectives	SA Score	Justification
		<p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p> <p>This site is not within a Minerals Consultation Area; therefore a negligible effect is expected.</p>
<p>15. To reduce waste generation and disposal, and achieve the sustainable management of waste</p>	-	<p>The development boundary of the site is located to the east of Woodstock. However, this land is greenfield land limiting the potential for the re-use of existing buildings and materials present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p>

Options requiring no additional Green Belt release

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, it would likely deliver more homes which would contribute to a more significant positive effect.</p>
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford +/-	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having limited access to jobs as both site options scored 'Amber' in ITP's assessment of 'access to jobs' in relation to access to Oxford jobs by walking and public transport, yet the site options scored 'Green' in relation to access to Oxford jobs by road.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. New homes within the site will have limited access to Oxford jobs via a range of sustainable transport modes and the road network.</p> <p>Therefore a minor mixed effects (+/-) are likely in relation to this SA objective.</p>
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support	Oxford +	<p>The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in</p>

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)			
SA Objectives	SA Score		Justification
the long term competitiveness of the District and Oxford and Oxfordshire.			Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site, including the extension into PR3a, is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective.
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a significant positive effect on this SA objective due to its close proximity to sustainable transport routes to Oxford and Cherwell. This site's east boundary is located directly adjacent to Kidlington which contains a number of services and facilities including shops, banks, restaurants, a public library, one secondary school and several primary schools. In addition, the site's north west boundary lies directly adjacent to Begbroke which contains a village hall and one public house. Furthermore, the east boundary of the site lies directly adjacent to Yarnton, which includes one primary school, a shop and a village hall.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location.</p> <p>Therefore, a significant positive effect is recorded for this objective.</p>
	++	++	
10. To reduce air pollution (including greenhouse gas emissions) and road congestion.	Oxford	Cherwell	The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a mixed significant positive/significant negative effect on this objective. These effects were identified due to the site's good access to existing sustainable transport routes into Oxford and Cherwell but also in acknowledgement of the fact that a proportion of road based trips
	++/--	++/--	

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)			
SA Objectives	SA Score		Justification
			<p>generated by the proposed development were forecasted to load onto roads covered by the Oxford City Air Quality Management Area.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. New homes within the site will have good access to sustainable transport links into Oxford and Cherwell and that some road traffic will still load on to roads within the Oxford City Air Quality Management Area.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location. It would also like result in more road traffic on connecting roads including Air Quality Management Areas.</p> <p>Therefore, overall, a mixed (significant positive/significant negative) effect is likely on this SA objective.</p>
Other socio-economic SA objectives <i>(scores only relate to Cherwell District)</i>			
2. To improve the health and well-being of the population & reduce inequalities in health.	++		<p>The development boundary of the site identified within PR8 and extended southwards into safeguarded site PR3a has good access to a range of sustainable transport modes and the road network, is in close proximity to a number of open spaces, public rights of way and a GP Surgery. These local facilities and services will encourage new residents to be physically active and improve the health and well-being of the local population.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location.</p> <p>Therefore, a significant positive effect is recorded for this objective.</p>
4. To reduce crime and disorder and the fear of crime.	0		<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety,</p>

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)		
SA Objectives	SA Score	Justification
		particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR8 and extended southwards into safeguarded site PR3a lies within close proximity to existing residential communities, Kidlington, Yarnton and Begbroke. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the west section of the site lies directly adjacent to the roundabout connecting the A44 (Woodstock Road) and a train line bisects the site from north to south. Meaning that longer term, road traffic along these strategic highways and train line could adversely affect the new residents within the site.</p> <p>Therefore, a minor negative effect is recorded against this SA objective.</p>
Environmental SA objectives (scores only relate to Cherwell District)		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site option 20a was identified as having negligible effects due to the site's limited habitats consisting of mostly artificial habitats. Site option 126 was identified as having a minor negative effect due to the presence of linear features and potential to support roosting/nesting and foraging protected species in the trees and hedgerows around the site boundary.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of protected ecological habitat.</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective until the detailed design, landscaping and layout of the development have been finalised.</p>

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)		
SA Objectives	SA Score	Justification
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	--?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having an uncertain significant negative effect due to the site's recorded capacity for new residential development being 'Medium-Low' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017).</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of sensitive open countryside.</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective until the detailed design, landscaping and layout of the development have been finalised.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a minor negative effect due to the 'Medium' sensitivity of the historic environment in the area to new development. In addition, Cherwell District Council's Green Belt Study (2017) assesses the land within the site as making a contribution to the setting of historic Oxford due to its strong connection to the Oxford Canal, which marks a clear distinction between settlement and countryside.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect the setting of local historic assets as well as unknown archaeological assets.</p> <p>Therefore an uncertain minor negative effect has been identified until the detailed design, landscaping and layout of the development have been finalised.</p>
11. To maintain and improve the water quality of rivers and	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence</p>

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)		
SA Objectives	SA Score	Justification
to achieve sustainable water resources management		<p>sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019).</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development boundary of the site has been confined to the urban edge of Kidlington, Yarnton and Begbroke. The land to the north, north east, east and south east lies within flood zones 2 and 3; and land is greenfield.</p> <p>A brook runs through the southern portion of the site following the edge of site 126 and safeguarded site PR3a (the location of the potential PR8 extension) to the south.</p> <p>Therefore, a minor negative effect is recorded against this objective.</p> <p>A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of permeable greenfield land, increasing the significance of the effect identified.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The development boundary of the site has been confined to the urban edge of Kidlington, Yarnton and Begbroke. However, this land is greenfield land and the majority of it lies on Grade 2 and Grade 3 Agricultural Land.</p> <p>The development of the site would result in a net loss of greenfield land in the District, including Grade 2 and Grade 3 agricultural land. A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation.</p> <p>Therefore, a significant negative effect is recorded against this objective. Uncertainty is attached to this effect in acknowledgement of the fact that it is unknown where the Grade 3 Agricultural Land represents some of the best and most versatile agricultural land (3a).</p>

Option 2 – Site PR3(a) - Proposed Safeguarded Land (southern extension of site PR8)		
SA Objectives	SA Score	Justification
		A southern extension to the developable area of PR8 to include the safeguarded land PR3a would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, including agricultural land.
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p> <p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p> <p>This site is within a Minerals Consultation Area; therefore a minor negative effect is likely.</p>
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.

Option 3 – Site PR3(b) – Land between site PR8 and the railway (minor eastward extension of site PR8)

Option 3 – Site PR3(b) – Land between site PR8 and the railway (minor eastward extension of site PR8)		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	<p>Oxford</p> <p style="font-size: 2em; font-weight: bold;">++</p>	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.</p> <p>An eastern extension to the developable area of PR8 to include the safeguarded land PR3b would not change the likely effect of the allocation. However, it would likely deliver more homes which would contribute to a more significant positive effect.</p>
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	<p>Oxford</p> <p style="font-size: 2em; font-weight: bold;">+/-</p>	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having limited access to jobs as both site options scored 'Amber' in ITP's assessment of 'access to jobs' in relation to access to Oxford jobs by walking and public transport, yet the site options scored 'Green' in relation to access to Oxford jobs by road. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have limited access to Oxford jobs via a range of sustainable transport modes and the road network.</p> <p>Therefore a minor mixed effects (+/-) are likely in relation to this SA objective.</p> <p>An eastern extension to the developable area of PR8 to include the safeguarded land PR3b would not change the likely effect of the allocation.</p>
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness	<p>Oxford</p> <p style="font-size: 2em; font-weight: bold;">+</p>	<p>The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in</p>

		<p>Quality Management Area. Therefore, overall, a mixed (significant positive/significant negative) effect is likely on this SA objective.</p> <p>A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location. It would also like result in more road traffic on connecting roads including Air Quality Management Areas.</p>
Other socio-economic SA objectives (scores only relate to Cherwell District)		
2. To improve the health and well-being of the population & reduce inequalities in health.	+	<p>The development boundary of the site identified within PR6b has good access to a range of sustainable transport modes and the road network and is in close proximity to a number of open spaces and public rights of way.</p> <p>Therefore, a minor positive effect is recorded for this objective.</p> <p>A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location.</p>
4. To reduce crime and disorder and the fear of crime.	0	<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p>

Option 4 – Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	The development boundary of the site identified within PR6b and extended westward into safeguarded site PR3c lies within close proximity to existing residential communities, Cutteslowe Park and a sports facility. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the north eastern boundary of the site lies within close proximity to a Park and Ride facility, the north west section of the site lies adjacent to the A34 and a train line, and the eastern border of the site follows the A4165 (Banbury / Oxford Road) meaning that longer term, road traffic along these strategic highways and train line could adversely affect the new residents within the site. Therefore, a minor negative effect is expected on this SA objective during the construction phase and over the longer term.
Environmental SA objectives (scores only relate to Cherwell District)		
7. To conserve and enhance and create resources for biodiversity	-?	The area identified within Policy PR6b was previously appraised as part of the larger site option 38. Site option 38 was recorded as having an uncertain minor negative effect due to the site's wide variety of habitats on site and their potential for protected species. Although the development boundary of the site has been refined, it is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species. Overall, an uncertain minor negative effect is recorded for this SA objective. A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of protected ecological habitat.
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	The area identified within Policy PR6b was previously appraised as part of the larger site option 38. Site option 38 was recorded as having an uncertain minor negative effect due to the site's recorded capacity for new residential development being 'medium' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017). This was because development here would form a natural extension to the northern edge of Cutteslowe, resulting in infilling of land between the A4165 Oxford Road and the A34 for the central and west parts of the site

Option 4 – Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)		
SA Objectives	SA Score	Justification
		<p>Overall an uncertain minor negative effect is recorded for this SA objective. This effect is recorded as uncertain as it depends largely on the appearance and impact of development sites including in comparison to what was on the site previously.</p> <p>A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of sensitive open countryside.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	--?	<p>The area identified within Policy PR6b was previously appraised as part of the larger site option 38. Site option 38 was recorded as having a significant negative effect due to the High to Medium sensitivity of the historic environment in the area to new development. Furthermore, Cherwell District Council's Green Belt Study (2017) assesses the low hilltop location and wooded character as providing a containing edge in views towards Oxford's setting.</p> <p>Therefore, an uncertain significant negative effect has been retained until the detailed design, landscaping and layout of the development have been finalised.</p> <p>A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect the setting of local historic assets as well as unknown archaeological assets.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019).</p>

Option 4 – Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)		
SA Objectives	SA Score	Justification
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development boundary of the site has been confined to the urban edge of Oxford. This land is outside of flood zones 2 and 3; however, the land is greenfield.</p> <p>However, it should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2 and areas susceptible to surface water, groundwater and sewer flooding incidents.</p> <p>Therefore, a minor negative effect is recorded for this objective.</p> <p>A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of permeable greenfield land, increasing the significance of the effect identified.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The development boundary of the site has been confined to the urban edge of Oxford. However, this land is greenfield land and is recognised as Grade 3 and 4 Agricultural Land.</p> <p>The development of the site would result in a net loss of greenfield land in the District, including Grade 3 agricultural land. Overall, a significant negative effect is likely. Although this is uncertain depending on whether it is, Grade 3a or Grade 3b which is not known.</p> <p>A western extension to the developable area of PR6b to include the safeguarded land PR3c would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, including agricultural land.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	0	<p>The development boundary of the site has been confined to the urban edge of Oxford, but falls outside of a Minerals Consultation Area.</p> <p>Therefore a negligible effect is recorded against this SA objective.</p>
15. To reduce waste generation and disposal, and	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p>

Option 4 – Site PR3(c) – Land to the south of the A34 to the west of site PR6b (westward extension of site PR6b)		
SA Objectives	SA Score	Justification
achieve the sustainable management of waste		

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.</p> <p>A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation. However, it would likely deliver more homes which would contribute to a more significant positive effect.</p>
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford ++/-?	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was identified as have easy access to jobs as the site option scored 'Green' in both ITP's assessments of 'access to jobs' in Oxford. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to Oxford jobs via a range of sustainable transport modes and the road network.</p> <p>However, the northward expansion would result in the loss, or a reduction in the size of the Water Eaton Park and Ride. The close proximity of Oxford Parkway railway station maintains the value of the location as a sustainable location; however the loss of or potential reduction in the size of the park and ride is likely to introduce additional negative effects. The significance of these negative effects is unknown until the extent, design and layout of a potential northward expansion are known.</p> <p>An uncertain mixed (significant positive and minor negative effect) is therefore likely on this SA objective.</p>
17. To sustain and develop economic growth and	Oxford +	<p>The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor</p>

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)			
SA Objectives	SA Score		Justification
innovation, an educated/skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.			positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site, including the extension into PR3d, is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective.
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having a significant positive effect on this SA objective due to its close proximity to sustainable transport routes to Oxford and Cherwell.</p> <p>A northward expansion to the developable area identified in PR6a would result in the loss, or a reduction in the size of the Water Eaton Park and Ride. An extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location; however the loss of or potential reduction in the size of the park and ride is likely to introduce additional negative effects. The significance of these negative effects is unknown until the extent, design and layout of a potential northward expansion are known. Furthermore the southern boundary of the site is within close proximity to Cutteslowe which contains a number of services and facilities including a primary school, a community centre and a doctor's surgery.</p> <p>Therefore, an uncertain mixed (significant positive/minor negative) effect is recorded for this objective.</p>
	++/-?	++/-?	
	Oxford	Cherwell	

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)			
SA Objectives	SA Score		Justification
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	++/--?	++/--?	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having a mixed significant positive/significant negative effect on this objective. These effects were identified due to the site's good access to existing sustainable transport routes into Oxford and Cherwell but also in acknowledgement of the fact that a proportion of road based trips generated by the proposed development were forecasted to load onto roads covered by the Oxford City Air Quality Management Area.</p> <p>Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to sustainable transport links into Oxford and Cherwell and that some road traffic will still load on to roads within the Oxford City Air Quality Management Area.</p> <p>A northward expansion to the developable area identified in PR6a would result in the loss, or a reduction in the size of the Water Eaton Park and Ride. An extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location. It would also like result in more road traffic on connecting roads including Air Quality Management Areas. The close proximity of Oxford Parkway railway station maintains the value of the location as a sustainable location; however the loss of or potential reduction in the size of the park and ride is likely to introduce additional negative effects. The significance of these negative effects is unknown until the extent, design and layout of a potential northward expansion are known.</p> <p>Therefore, overall, a uncertain mixed (significant positive/significant negative) effect is likely on this SA objective.</p>
Other socio-economic SA objectives <i>(scores only relate to Cherwell District)</i>			
2. To improve the health and well-being of the population & reduce inequalities in health.	+		<p>The development boundary of the site identified within PR6a has good access to a range of sustainable transport modes and the road network and is in close proximity to a number of open spaces and public rights of way.</p> <p>Therefore, a minor positive effect is recorded for this objective.</p>

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)		
SA Objectives	SA Score	Justification
		A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location.
4. To reduce crime and disorder and the fear of crime.	0	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.
5. To create and sustain vibrant communities	-	The development boundary of the site identified within PR6a and extended northward into safeguarded site PR3d lies adjacent to existing residential communities, Cutteslowe Park and a sports facility. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the northern boundary of the site borders a Park and Ride facility and the western border of the site follows the A4165 (Banbury / Oxford Road) meaning that longer term, road traffic along this strategic highway could adversely affect the new residents within the site. Therefore a minor negative effect is likely.
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having an uncertain minor negative effect due to the site's wide variety of habitats on site and their potential for protected species. Although the development boundary of the site has been refined, it is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species. Overall an uncertain minor negative effect is recorded for this SA objective.

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)		
SA Objectives	SA Score	Justification
		A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation due to the fact that the land to the north is developed and used as the Water Eaton Park and Ride.
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having an uncertain minor negative effect due to the site's recorded capacity for new residential development being 'medium' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017).</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective.</p> <p>A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation due to the fact that the land to the north is developed and used as the Water Eaton Park and Ride.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment	--?	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having a significant negative effect due to the High to Medium sensitivity of the historic environment in the area to new development. Furthermore, Cherwell District Council's Green Belt Study (2017) assesses the land within this site as playing some role in the setting of historic Oxford due to its location in the Cherwell valley. However, uncertainty is retained until the detailed design, landscaping and layout of the development have been finalised.</p> <p>A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation due to the fact that the land to the north is developed and used as the Water Eaton Park and Ride.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)		
SA Objectives	SA Score	Justification
		<p>through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019)</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development boundary of the site has been confined to the urban edge of Oxford. This land is outside of flood zones 2 and 3; however, the land is greenfield and it should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2 and areas susceptible to surface water, groundwater and sewer flooding incidents.</p> <p>Therefore, a minor negative effect is recorded for this objective.</p> <p>A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation due to the fact that the land to the north is developed and used as the Water Eaton Park and Ride.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The development boundary of the site has been confined to the urban edge of Oxford. However, this land is greenfield recognised as Grade 3 and 4 Agricultural Land.</p> <p>Therefore, a significant negative effect is likely. Although this is uncertain depending on whether it is, Grade 3a or Grade 3b which is not known.</p> <p>A northern extension to the developable area of PR6a to include the safeguarded land PR3d would not change the likely effect of the allocation due to the fact that the land to the north is developed and used as the Water Eaton Park and Ride.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	0	<p>The development boundary of the site has been confined to the urban edge of Oxford which falls outside the eastern areas of the site which sit within a Minerals Consultation Area.</p> <p>Therefore a negligible effect is recorded for this objective.</p>

Option 5 – Site PR3(d) – Oxford Parkway Railway Station and Water Eaton Park and Ride (northward extension of PR6a)

SA Objectives	SA Score	Justification
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, it would likely deliver more homes which would contribute to a more significant positive effect.</p>
	++	
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having limited access to jobs as both site options scored 'Amber' in ITP's assessment of 'access to jobs' in relation to access to Oxford jobs by walking and public transport, yet the site options scored 'Green' in relation to access to Oxford jobs by road. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have limited access to Oxford jobs via a range of sustainable transport modes and the road network.</p> <p>Therefore a minor mixed effects (+/-) are likely in relation to this SA objective.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would result in the loss of land safeguarded for future employment uses north of the Begbroke Science Park with negative effects against this objective in the long term. However, it would also result in the development of new homes close to the science park. Overall, there is considered to be no change to the likely effect of the allocation.</p>
	+/-	
	Oxford	

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)			
SA Objectives	SA Score		Justification
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	+/-		<p>The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would result in the loss of land safeguarded for future employment uses north of the Begbroke Science Park with negative effects against this objective in the long term. However, it would also result in the development of new homes close to the science park. Overall, a mixed minor positive/minor negative effect is recorded against this SA objective.</p>
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site, including the extension into PR3e, is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective.
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a significant positive effect on this SA objective due to its close proximity to sustainable transport routes to Oxford and Cherwell. This site's east boundary is located directly adjacent to Kidlington which contains a number of services and facilities including shops, banks, restaurants, a public library, one secondary school and several primary schools. In addition, the site's north west boundary lies directly adjacent to Begbroke which contains a village hall and one public house. Furthermore, the east boundary of the site lies directly adjacent to Yarnton, which includes one primary school, a shop and a village hall.</p> <p>Therefore, a significant positive effect is recorded for this objective.</p>
	++	++	

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)

SA Objectives	SA Score		Justification
			A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location.
10. To reduce air pollution (including greenhouse gas emissions) and road congestion.	Oxford	Cherwell	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a mixed significant positive/significant negative effect on this objective. These effects were identified due to the site's good access to existing sustainable transport routes into Oxford and Cherwell but also in acknowledgement of the fact that a proportion of road based trips generated by the proposed development were forecasted to load onto roads covered by the Oxford City Air Quality Management Area.</p> <p>Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to sustainable transport links into Oxford and Cherwell and that some road traffic will still load on to roads within the Oxford City Air Quality Management Area.</p> <p>Therefore, overall, a mixed (significant positive/significant negative) effect is likely on this SA objective.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location. It would also like result in more road traffic on connecting roads including Air Quality Management Areas.</p>
Other socio-economic SA objectives <i>(scores only relate to Cherwell District)</i>			
2. To improve the health and well-being of the population & reduce inequalities in health.	++		The development boundary of the site identified within PR8 has good access to a range of sustainable transport modes and the road network, is in close proximity to a number of open spaces, public rights of way and a GP Surgery.

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)		
SA Objectives	SA Score	Justification
		<p>These services and facilities will encourage new residents to be physically active and improve the health and well-being of the local population. Therefore, a significant positive effect is recorded for this objective.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would deliver more homes and put more people in close proximity to the sustainable transport network and local services and facilities enjoyed in this location.</p>
4. To reduce crime and disorder and the fear of crime.	0	<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p>
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR8 and extended northward into safeguarded site PR3e lies within close proximity to existing residential communities, Kidlington, Yarnton and Begbroke. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the west section of the site lies directly adjacent to the roundabout connecting the A44 (Woodstock Road) and a train line bisects the site from north to south. Meaning that longer term, road traffic along these strategic highways and train line could adversely affect the new residents within the site.</p> <p>Therefore, a minor negative effect is recorded against this SA objective.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site option 20a was identified as having negligible effects due to the site's limited habitats consisting of mostly artificial habitats. Site option</p>

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)		
SA Objectives	SA Score	Justification
		<p>126 was identified as having a minor negative effect due to the presence of linear features and potential to support roosting/nesting and foraging protected species in the trees and hedgerows around the site boundary.</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective until the detailed design, landscaping and layout of the development have been finalised.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of protected ecological habitat.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	--?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having an uncertain minor negative effect due to the site's recorded capacity for new residential development being 'Medium-Low' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017).</p> <p>Overall an uncertain significant negative effect is recorded for this SA objective until the detailed design, landscaping and layout of the development have been finalised.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect a greater area of sensitive open countryside.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a minor negative effect due to the 'Medium' sensitivity of the historic environment in the area to new development. In addition, Cherwell District Council's Green Belt Study (2017) assesses the land within the site as making a contribution to the setting of historic Oxford due to its strong connection to the Oxford Canal, which marks a clear distinction between settlement and countryside.</p>

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)		
SA Objectives	SA Score	Justification
		<p>Therefore an uncertain minor negative effect has been identified until the detailed design, landscaping and layout of the development have been finalised.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, with the potential to affect the setting of local historic assets as well as unknown archaeological assets.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019).</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development boundary of the site has been confined to the urban edge of Kidlington, Yarnton and Begbroke. The land to the north, north east, east and south east lies within flood zones 2 and 3; and land is greenfield.</p> <p>Therefore, a minor negative effect is recorded against this objective.</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of permeable greenfield land, increasing the significance of the effect identified.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and	--?	<p>The development boundary of the site has been confined to the urban edge of Kidlington, Yarnton and Begbroke. However, this land is greenfield land and the majority of it lies on Grade 2 and Grade 3 Agricultural Land.</p>

Option 6 – Site PR3(e) – Land north, east and west of Begbroke Science Park (northward extension of residential area into land reserved for employment)

SA Objectives	SA Score	Justification
encouraging urban renaissance.		<p>The development of the site would result in a net loss of greenfield land in the District, including Grade 2 and Grade 3 agricultural land. Therefore, a significant negative effect is recorded against this objective. Uncertainty is attached to this effect in acknowledgement of the fact that it is unknown where the Grade 3 Agricultural Land represents some of the best and most versatile agricultural land (3a).</p> <p>A northern extension to the developable area of PR8 to include the safeguarded land PR3e would not change the likely effect of the allocation. However, an extension would most likely result in the loss of a greater area of greenfield land, including agricultural land.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p> <p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p> <p>This site is within a Minerals Consultation Area; therefore a minor negative effect is likely.</p>
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p>

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford ++	The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was identified as have easy access to jobs as the site option scored 'Green' in both ITP's assessments of 'access to jobs' in Oxford. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to Oxford jobs via a range of sustainable transport modes and the road network. A significant positive effect is therefore likely on this SA objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +	The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area			
SA Objectives	SA Score		Justification
			The intensification of development in this location is unlikely to significantly change the significance of this effect.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having a significant positive effect on this SA objective due to its close proximity to sustainable transport routes to Oxford and Cherwell. The north west site boundary lies adjacent to Water Eaton Park and Ride, furthermore the southern boundary of the site is within close proximity is to Cutteslowe which contains a number of services and facilities including a primary school, a community centre and a doctor's surgery. Therefore, a significant positive effect is recorded for this objective. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities.
	++	++	
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	Oxford	Cherwell	The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having a mixed significant positive/significant negative effect on this objective. These effects were identified due to the site's good access to existing sustainable transport routes into Oxford and Cherwell but also in acknowledgement of the fact that a proportion of road based trips generated by the proposed development were forecasted to load onto roads covered by the Oxford City Air Quality Management Area. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to sustainable transport links into Oxford
	++/--	++/--	

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area		
SA Objectives	SA Score	Justification
		<p>and Cherwell and that some road traffic will still load on to roads within the Oxford City Air Quality Management Area. Therefore, overall, a mixed (significant positive/significant negative) effect is likely on this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.</p>
Other socio-economic SA objectives <i>(scores only relate to Cherwell District)</i>		
2. To improve the health and well-being of the population & reduce inequalities in health.	+	<p>The development boundary of the site identified within PR6a has good access to a range of sustainable transport modes and the road network and is in close proximity to a number of open spaces and public rights of way.</p> <p>Therefore, a minor positive effect is recorded for this objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.</p>
4. To reduce crime and disorder and the fear of crime.	0	<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR6a lies adjacent to existing residential communities, Cutteslowe Park and a sports facility. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the northern boundary of the site borders a Park and Ride facility and the western border of the site follows the A4165 (Banbury / Oxford Road) meaning that longer term, road traffic along this strategic highway could adversely affect the new residents within the site.</p> <p>Therefore a minor negative effect is likely.</p> <p>The intensification of development in this location will put more residents in close proximity to these adverse effects, although their significance is not likely to change.</p>
Environmental SA objectives (scores only relate to Cherwell District)		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having an uncertain minor negative effect due to the site's wide variety of habitats on site and their potential for protected species.</p> <p>Although the development boundary of the site has been refined, it is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species. Overall an uncertain minor negative effect is recorded for this SA objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including habitats within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having an uncertain minor negative effect due to the site's recorded capacity for new residential development being 'medium' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017).</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective.</p>

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area		
SA Objectives	SA Score	Justification
		The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.
9. To protect, enhance and make accessible for enjoyment, the historic environment	--?	<p>The area identified within Policy PR6a was previously appraised as part of the larger site option 38. Site option 38 was recorded as having a significant negative effect due to the High to Medium sensitivity of the historic environment in the area to new development. Furthermore, Cherwell District Council's Green Belt Study (2017) assesses the land within this site as playing some role in the setting of historic Oxford due to its location in the Cherwell valley. However, uncertainty is retained until the detailed design, landscaping and layout of the development have been finalised.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019).</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area		
SA Objectives	SA Score	Justification
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development boundary of the site has been confined to the urban edge of Oxford. This land is outside of flood zones 2 and 3; however, the land is greenfield and it should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2 and areas susceptible to surface water, groundwater and sewer flooding incidents.</p> <p>Therefore, a minor negative effect is recorded for this objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The development boundary of the site has been confined to the urban edge of Oxford. However, this land is greenfield recognised as Grade 3 and 4 Agricultural Land.</p> <p>Therefore, a significant negative effect is likely. Although this is uncertain depending on whether it is, Grade 3a or Grade 3b which is not known.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	0	<p>The development boundary of the site has been confined to the urban edge of Oxford which falls outside the eastern areas of the site which sit within a Minerals Consultation Area.</p> <p>Therefore a negligible effect is recorded for this objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including minerals within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>

Option 7 – Site PR6a – Land East of Oxford Road – intensification of developable area

SA Objectives	SA Score	Justification
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 8 – Site PR6b - Land West of Oxford Road – intensification of developable area

Option 8 – Site PR6b - Land West of Oxford Road – intensification of developable area		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford ++	<p>The area identified within Policy PR6b was previously appraised as part of the larger site option 38. Site option 38 was identified as have easy access to jobs as the site option scored 'Green' in both ITP's assessments of 'access to jobs' in Oxford. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to Oxford jobs via a range of sustainable transport modes and the road network.</p> <p>A significant positive effect is therefore likely on this SA objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness	Oxford +	The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.

However, this land is greenfield land and is recognised as Grade 3 and 4 Agricultural Land.</p> <p>The development of the site would result in a net loss of greenfield land in the District, including Grade 3 agricultural land. Overall, a significant negative effect is likely. Although this is uncertain depending on whether it is, Grade 3a or Grade 3b which is not known.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
14. To reduce the global, social and environmental impact of consumption of resource by	0	<p>The development boundary of the site has been confined to the urban edge of Oxford, but falls outside of a Minerals Consultation Area.</p>

Option 8 – Site PR6b - Land West of Oxford Road – intensification of developable area

SA Objectives	SA Score	Justification
using sustainably produced and local products.		Therefore a negligible effect is recorded against this SA objective.
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 9 – Site PR7a – South East Kidlington – intensification of developable area

Option 9 – Site PR7a – South East Kidlington – intensification of developable area		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford ++	The area identified within Policy PR7a was previously appraised as part of the smaller site options 178 and 202. Site options 178 and 202 were identified as having easy access to jobs as the site option scored 'Green' in both ITP's assessments of 'access to jobs' in Oxford. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to Oxford jobs via a range of sustainable transport modes and the road network; therefore a significant positive effect is likely. The intensification of development in this location is unlikely to significantly change the significance of this effect.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +	The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments. Therefore, a minor positive effect is identified on this SA objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.

Option 9 – Site PR7a – South East Kidlington – intensification of developable area			
SA Objectives	SA Score		Justification
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	<p>The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	<p>The area identified within Policy PR7a was previously appraised as part of the smaller site options 178 and 202. Site options 178 and 202 were recorded as having a significant positive effect on this SA objective due to their close proximity to sustainable transport routes to Oxford and Cherwell. The north and west boundaries of the site are located directly adjacent to Kidlington which contains a number of services and facilities including shops, banks, restaurants, a public library, one secondary school and several primary schools.</p> <p>Therefore a significant positive effect is recorded against this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities, increasing the significance of this effect.</p>
	++	++	
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	Oxford	Cherwell	<p>The area identified within Policy PR7a was previously appraised as part of the smaller site options 178 and 202. Site option 178 was recorded as having a mixed significant positive/significant negative and site option 202 was recorded as having a mixed minor positive/significant negative effect on this objective. These effects were identified due to the site's good access to existing sustainable transport routes into Oxford and Cherwell but also in acknowledgement of the fact that a proportion of road based trips generated by the proposed development were forecasted to load onto roads covered by the Oxford City Air Quality Management Area.</p> <p>Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to sustainable transport links into Oxford</p>
	++/--	++/--	

Option 9 – Site PR7a – South East Kidlington – intensification of developable area			
SA Objectives	SA Score		Justification
			<p>and Cherwell and that some road traffic will still load on to roads within the Oxford City Air Quality Management Area. Therefore, overall, a mixed (significant positive/significant negative) effect is likely on this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.</p>
Other socio-economic SA objectives <i>(scores only relate to Cherwell District)</i>			
2. To improve the health and well-being of the population & reduce inequalities in health.	++		<p>The development boundary of the site identified within PR7a has good access to a range of sustainable transport modes and the road network and is in close proximity to a number of open spaces and public rights of way. Furthermore, the site is in close proximity Gosford Hill Medical Centre. V</p> <p>Therefore, a significant positive effect is recorded for this objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.</p>
4. To reduce crime and disorder and the fear of crime.	0		<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 9 – Site PR7a – South East Kidlington – intensification of developable area		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR7a lies within close proximity to existing residential communities, Kidlington and a sports facility. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the south east section of the site lies directly adjacent to the A34 and a train line, and the eastern border of the site follows the A4260 (Oxford Road) meaning that longer term, road traffic along these strategic highways and train line could adversely affect the new residents within the site.</p> <p>Therefore a minor negative effect is recorded against this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these adverse effects, although their significance is not likely to change.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR7a was previously appraised as part of the smaller site options 178 and 202. Site options 178 and 202 were recorded as having an uncertain minor negative effect due to the site's wide variety of habitats on site and their potential for protected species.</p> <p>Although the development boundary of the site has been refined, it is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species. Overall an uncertain minor negative effect is recorded for this SA objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including habitats within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The area identified within Policy PR7a was previously appraised as part of the smaller site options 178 and 202. Site option 178 was recorded as having an uncertain minor negative effect due to the site's recorded capacity for new residential development being 'medium to high' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017).</p>

Option 9 – Site PR7a – South East Kidlington – intensification of developable area		
SA Objectives	SA Score	Justification
		<p>Whereas site option 202 was recorded as having an uncertain negligible effect due to the site's recorded capacity for new residential development being 'high'.</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The area identified within Policy PR7a was previously appraised as part of the smaller site options 178 and 202. The development boundary of the site for Policy PR7a has been refined and merged to combine both site options. Site option 178 was recorded as having a negligible effect due to the Low sensitivity of the historic environment in the area to new development. Site option 202 however, was recorded as having a minor negative effect due to the Medium to Low sensitivity to the of the historic environment in the area to new development. In addition, Cherwell District Council's Green Belt Study (2017) assessed the land within sites 178 and 202 as making a contribution to the rural setting of historic Oxford as perceived from the A34, one of the major approaches to the City and due to its location in the Cherwell Valley.</p> <p>Therefore the uncertain minor negative effect has been retained until the detailed design, landscaping and layout of the development have been finalised.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>

Option 9 – Site PR7a – South East Kidlington – intensification of developable area		
SA Objectives	SA Score	Justification
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019).</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The area identified within Policy PR7a was previously appraised as part of the smaller site options 178 and 202, both of which lie on greenfield land. Aside from a small section (less than 10%) of site option 202 that lies partially within flood zone 3, the remaining areas of the refined area lie outside of flood zone 2 and 3.</p> <p>It should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the site contains areas susceptible to surface water, groundwater and sewer flooding incidents.</p> <p>A minor negative effect has therefore been recorded against this objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and	-?	<p>The development boundary of the site has been confined to the urban edge of Kidlington. This site is on greenfield land and the majority of the site (82%) is classed as Grade 4 Agricultural Land, while the remainder is classed as Grade 3 (18%). A minor negative effect therefore is likely. Uncertainty is attached to the effect due to the fact that it is not known whether the Grade 3 Agricultural Land is best and most versatile (Grade 3a) land or not.</p>

Option 9 – Site PR7a – South East Kidlington – intensification of developable area		
SA Objectives	SA Score	Justification
encouraging urban renaissance.		<p>This effect is uncertain until it is established whether the lost Grade 3 agricultural land qualifies as best and most versatile agricultural land (Grade 3a).</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The development boundary of the site has been confined to the urban edge of Kidlington and falls within a Minerals Consultation Area.</p> <p>Therefore a minor negative effect is recorded for this objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including minerals within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 10 – Site PR7b – Stratfield Farm – intensification of developable area

Option 10 – Site PR7b – Stratfield Farm – intensification of developable area		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford +/-	The area identified within Policy PR7b was previously appraised as part of the site option 49. Site option 49 was identified as having more limited access to jobs as the site option scored 'Amber' in ITP's assessment of 'access to jobs' in relation to access to Oxford jobs by walking and public transport, yet the site option scored 'Green' in relation to access to Oxford jobs by road. Although the development boundary of the site has been refined, it is considered that the new homes within the site will continue to have more limited access to Oxford jobs via a range of sustainable transport modes and the road network. Therefore, a minor mixed effects (+/-) are likely in relation to this SA objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +	The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments. Therefore, a minor positive effect is identified on this SA objective.

SA Objectives	SA Score		Justification
			<p>within the Oxford City Air Quality Management Area. Therefore, overall, a mixed (significant positive/significant negative) effect is likely on this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.</p>
Other socio-economic SA objectives <i>(scores only relate to Cherwell District)</i>			
2. To improve the health and well-being of the population & reduce inequalities in health.	++		<p>The development boundary of the site identified within PR7b has good access to a range of sustainable transport modes and the road network and is in close proximity to a number of open spaces and public rights of way and Gosford Hill Medical Centre.</p> <p>Such facilities and services are likely to encourage new residents to like more active and healthy lifestyles. Therefore, a significant positive effect is recorded for this objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.</p>
4. To reduce crime and disorder and the fear of crime.	0		<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 10 – Site PR7b – Stratfield Farm – intensification of developable area		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR7a lies within close proximity to existing residential communities at Kidlington. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the west section of the site lies directly adjacent to the roundabout connecting the A4260 (Frieze Way), A4165 (Banbury Road) and A4260 (Oxford Road) meaning that longer term, road traffic along these strategic highways and train line could adversely affect the new residents within the site.</p> <p>Therefore minor negative effects are recorded against this objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these adverse effects, although their significance is not likely to change.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR7b was previously appraised as part of site option 49. Site option 49 was recorded as having an uncertain minor negative effect due to the site's wide variety of habitats on site and their potential for protected species.</p> <p>It is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species. Overall an uncertain minor negative effect is recorded for this SA objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including habitats within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The area identified within Policy PR7b was previously appraised as part of site option 49. Site option 49 was recorded as having an uncertain minor negative effect due to the site's recorded capacity for new residential development being 'medium to high' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017).</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective.</p>

Option 10 – Site PR7b – Stratfield Farm – intensification of developable area		
SA Objectives	SA Score	Justification
		The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The area identified within Policy PR7b was previously appraised as part of site option 49. Site option 49 was recorded as having a minor negative effect due to the Medium sensitivity of the historic environment in the area to new development. In addition, the Cherwell District Council's Green Belt Study (2017) assessed the land within this site having a strong relationship with the Oxford Canal, an important historic route into the City; however, its proximity to the urban edge of Kidlington limits this role.</p> <p>Overall an uncertain minor negative effect is identified on this SA objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019).</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 10 – Site PR7b – Stratfield Farm – intensification of developable area		
SA Objectives	SA Score	Justification
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development boundary of the site has been confined to the urban edge of Kidlington. The Oxford Canal follows the western edge of the site. The site is on greenfield land and is mainly outside of flood zone 3 (less than 5% of the site is within Flood Zone 3); therefore, a minor negative effect is likely.</p> <p>It should also be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2 and areas susceptible to surface water, groundwater and sewer flooding incidents.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The development boundary of the site has been confined to the urban edge of Kidlington. The location of development can influence the efficient use of land, as sites on high quality agricultural land would result in that land being lost to other uses. Development on brownfield land represents more efficient use of land in comparison to the development of greenfield sites.</p> <p>This site is on greenfield land and the majority of the site (approximately 44%) is classed as Grade 3 Agricultural Land, while the remainder is classed as urban land (41%) and Grade 4 Agricultural Land (15%); therefore a significant negative effect is likely. Although this is uncertain depending on whether it is Grade 3a or Grade 3b which is not known.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The development boundary of the site has been confined to the urban edge of Kidlington and falls within a Minerals Consultation Area. Therefore a minor negative effect is recorded for this objective.</p>

Option 10 – Site PR7b – Stratfield Farm – intensification of developable area

SA Objectives	SA Score	Justification
<p>15. To reduce waste generation and disposal, and achieve the sustainable management of waste</p>	<p>-</p>	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including minerals within the confines of the existing developable area. Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford +/-	The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having limited access to jobs as both site options scored 'Amber' in ITP's assessment of 'access to jobs' in relation to access to Oxford jobs by walking and public transport, yet the site options scored 'Green' in relation to access to Oxford jobs by road. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have limited access to Oxford jobs via a range of sustainable transport modes and the road network. Therefore a minor mixed effects (+/-) are likely in relation to this SA objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness	Oxford +	The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area			
SA Objectives	SA Score		Justification
of the District and Oxford and Oxfordshire.			The intensification of development in this location is unlikely to significantly change the significance of this effect.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a significant positive effect on this SA objective due to its close proximity to sustainable transport routes to Oxford and Cherwell. This site's east boundary is located directly adjacent to Kidlington which contains a number of services and facilities including shops, banks, restaurants, a public library, one secondary school and several primary schools. In addition, the site's north west boundary lies directly adjacent to Begbroke which contains a village hall and one public house. Furthermore, the east boundary of the site lies directly adjacent to Yarnton, which includes one primary school, a shop and a village hall. Therefore, a significant positive effect is recorded for this objective. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities, increasing the significance of this effect.
	++	++	
10. To reduce air pollution (including greenhouse gas emissions) and road congestion.	Oxford	Cherwell	The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a mixed significant positive/significant negative effect on this objective. These effects were identified due to the site's good access to existing sustainable transport routes into Oxford and Cherwell but also in acknowledgement of the fact that a proportion of road based trips generated by the proposed development were forecasted to load onto roads covered by the Oxford City Air Quality Management Area.
	++/--	++/--	

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area			
SA Objectives	SA Score		Justification
			<p>Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to sustainable transport links into Oxford and Cherwell and that some road traffic will still load on to roads within the Oxford City Air Quality Management Area.</p> <p>Therefore, overall, a mixed (significant positive/significant negative) effect is likely on this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.</p>
Other socio-economic SA objectives <i>(scores only relate to Cherwell District)</i>			
2. To improve the health and well-being of the population & reduce inequalities in health.	++		<p>The development boundary of the site identified within PR8 has good access to a range of sustainable transport modes and the road network, is in close proximity to a number of open spaces, public rights of way and a GP Surgery.</p> <p>These services and facilities will encourage new residents to be physically active and improve the health and well-being of the local population. Therefore, a significant positive effect is recorded for this objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.</p>
4. To reduce crime and disorder and the fear of crime.	0		<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each</p>

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area		
SA Objectives	SA Score	Justification
		<p>site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR8 lies within close proximity to existing residential communities, Kidlington, Yarnton and Begbroke. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, the west section of the site lies directly adjacent to the roundabout connecting the A44 (Woodstock Road) and a train line bisects the site from north to south. Meaning that longer term, road traffic along these strategic highways and train line could adversely affect the new residents within the site.</p> <p>Therefore, a minor negative effect is recorded against this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these adverse effects, although their significance is not likely to change.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site option 20a was identified as having negligible effects due to the site's limited habitats consisting of mostly artificial habitats. Site option 126 was identified as having a minor negative effect due to the presence of linear features and potential to support roosting/nesting and foraging protected species in the trees and hedgerows around the site boundary.</p> <p>Overall an uncertain minor negative effect is recorded for this SA objective until the detailed design, landscaping and layout of the development have been finalised.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including habitats within the confines of the existing developable area.</p>

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area		
SA Objectives	SA Score	Justification
		Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	--?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having an uncertain minor negative effect due to the site's recorded capacity for new residential development being 'Medium-Low' in the Council's Landscape Character Sensitivity and Capacity Assessment (2017).</p> <p>Overall an uncertain significant negative effect is recorded for this SA objective until the detailed design, landscaping and layout of the development have been finalised.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The area identified within Policy PR8 was previously appraised as part of the smaller site options 20a and 126 and new areas. Site options 20a and 126 were identified as having a minor negative effect due to the 'Medium' sensitivity of the historic environment in the area to new development. In addition, Cherwell District Council's Green Belt Study (2017) assesses the land within the site as making a contribution to the setting of historic Oxford due to its strong connection to the Oxford Canal, which marks a clear distinction between settlement and countryside.</p> <p>Therefore an uncertain minor negative effect has been identified until the detailed design, landscaping and layout of the development have been finalised.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area		
SA Objectives	SA Score	Justification
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and Addendum (2019).</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development boundary of the site has been confined to the urban edge of Kidlington, Yarnton and Begbroke. The land to the north, north east, east and south east lies within flood zones 2 and 3; and land is greenfield.</p> <p>Therefore, a minor negative effect is recorded against this objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The development boundary of the site has been confined to the urban edge of Kidlington, Yarnton and Begbroke. However, this land is greenfield land and the majority of it lies on Grade 2 and Grade 3 Agricultural Land.</p> <p>The development of the site would result in a net loss of greenfield land in the District, including Grade 2 and Grade 3 agricultural land. Therefore, a significant negative effect is recorded against this objective. Uncertainty is attached to this effect in acknowledgement of the fact that it is unknown where the Grade 3 Agricultural Land represents some of the best and most versatile agricultural land (3a).</p>

Option 11 – Site PR8 – Land to east of the A44 – intensification of developable area		
SA Objectives	SA Score	Justification
		The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p> <p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p> <p>This site is within a Minerals Consultation Area; therefore a minor negative effect is likely.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including minerals within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective. However, by intensifying development this option is likely to generate a more significant positive effect than the original allocation against this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford --	The area identified within Policy PR9 was previously appraised as part of the larger site option 51. Site option 51 was identified as having very limited access to jobs as the site option scored 'Red' in both ITP's assessments of 'access to jobs' in Oxford. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have limited access to Oxford jobs via a range of sustainable transport modes and the road network. Therefore, significant negative effects are likely in relation to this SA objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +	The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments. Therefore, a minor positive effect is identified on this SA objective.

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area			
SA Objectives	SA Score		Justification
			The intensification of development in this location is unlikely to significantly change the significance of this effect.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell. Therefore, a negligible effect is recorded for this objective. The intensification of development in this location is unlikely to significantly change the significance of this effect.
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	The area identified within Policy PR9 was previously appraised as part of the larger site option 51. Site option 51 was identified as having recorded as having a minor positive effect on this SA objective due to its relatively close proximity to sustainable transport routes to Oxford and a significant positive effect against this objective due to its relatively good access to sustainable transport links to Cherwell centres, specifically Begbroke and Yarnton. This site's north boundary is located directly adjacent to Begbroke which contains a village hall and one public house. Furthermore, the south eastern boundary of the site lies directly adjacent to Yarnton which includes one primary school, a shop and a village hall. The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities, increasing the significance of this effect.
	+	++	
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	Oxford	Cherwell	The area identified within Policy PR9 was previously appraised as part of the larger site option 51. Site option 51 was identified as having a mixed minor positive/minor negative effect on this objective. These effects were identified due to the site's good access to existing sustainable transport routes into Oxford and Cherwell but also in acknowledgement of the fact that a proportion of road based trips generated by the proposed development were forecasted to load onto roads covered by the Oxford City Air Quality Management Area. Although the development boundary of the site has been refined, it is considered that the new homes within the site will have good access to sustainable transport links into Oxford, Begbroke and Yarnton and that some road traffic will still load on to roads within the Oxford
	+/-	+/-	

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area			
SA Objectives	SA Score		Justification
			<p>City Air Quality Management Area. Therefore, overall, a mixed (minor positive/minor negative) effect is retained on this SA objective.</p> <p>The intensification of development in this location will put more residents in close proximity to sustainable transport routes and local facilities; however, it will also increase road congestion, which will have adverse effects on local air quality. Consequently, these effects are likely to be more significant than those of the original allocation.</p>
Other socio-economic SA objectives (scores only relate to Cherwell District)			
2. To improve the health and well-being of the population & reduce inequalities in health.	++		<p>Yarnton Medical Practise is within the eastern area of the site. The site is also located in close proximity to a number of open spaces, sports facilities and public rights of way which may encourage new residents to make use of these facilities as part of a more physically active and healthier lifestyle. Therefore, a significant positive effect is recorded for this objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these local facilities and services. Although this is unlikely to change the significance of the effect, the effect of an intensification option is likely to be more positive for more people.</p>
4. To reduce crime and disorder and the fear of crime.	0		<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>The development boundary of the site identified within PR9 lies within close proximity to existing residential communities of Begbroke and Yarnton. Therefore, the construction of the site has the potential to generate noise and air pollution which will have an adverse effect on the areas existing communities. Furthermore, east boundary of the site lies directly adjacent to the A44 (Woodstock Road), road traffic along this strategic highway could adversely affect the new residents within the site.</p> <p>Therefore a minor negative effect is recorded against this objective.</p> <p>The intensification of development in this location will put more residents in close proximity to these adverse effects, although their significance is not likely to change.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR9 was previously appraised as part of the larger site option 51. Site option 51 was identified as having an uncertain minor negative effect due to the site containing several local wildlife sites and a network of hedgerows.</p> <p>Although the development boundary of the site has been refined, it is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species, as even though these local biodiversity designations lie outside the refined boundary, they lie directly adjacent to the boundary of the site. Overall, an uncertain minor negative effect is recorded for this SA objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including habitats within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The area identified within Policy PR9 was previously appraised as part of the larger site option 51. Site option 51 was identified as having an uncertain significant negative effect due to most of the site having a 'medium to low' capacity for development as the land rises to a localised plateau making it highly visible within the surrounding area.</p>

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area		
SA Objectives	SA Score	Justification
		<p>However, the refined developable area is confined to urban edges of Yarnton and Begbroke and the lower slopes, where there is less landscape sensitivity.</p> <p>Therefore an uncertain minor negative effect is recorded for this SA objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The area identified within Policy PR9 was previously appraised as part of the larger site option 51. Site option 51 was identified as having a minor negative effect due to the 'Medium' sensitivity of the historic environment in the area to new development.</p> <p>The development boundary of the site has been refined and confined to the urban edge of Yarnton and Begbroke. However, the areas earmarked for development were assessed within the Cherwell District Council's Green Belt Study (2017) as including arable farmland on high ground that contributes to the ring of hills around historic Oxford and form a key aspect of its distinctive setting.</p> <p>Overall, an uncertain minor negative effect has been retained until the detailed design, landscaping and layout of the development have been finalised.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land and increased urbanisation and densification, including taller buildings, increasing the potential for negative effects on this objective. The scale of intensification will affect how significant this negative effect will be. As this is unknown, the existing significance has been retained, but there is more uncertainty.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined</p>

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area		
SA Objectives	SA Score	Justification
		<p>through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District’s Water Cycle Study (2017) and Addendum (2019).</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>
<p>12. To reduce the risk of flooding and resulting detriment to public well- being, the economy and the environment</p>	-	<p>The area identified within Policy PR9 was previously appraised as part of the larger site option 51 which lies on greenfield land which lies outside of flood zone 2 and 3.</p> <p>The developable area is still on greenfield land; therefore a minor negative effect is likely.</p> <p>It should also be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the site contains areas susceptible to surface water, groundwater and sewer flooding incidents.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>
<p>13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.</p>	--?	<p>The development boundary of the site has been confined to the urban edge of Yarnton and Begbroke. However, this land is greenfield land recognised as Grade 2 and 3 Agricultural Land.</p> <p>The development of the site through Policy PR9 would result in a net loss of greenfield land in the District, including Grade 3 agricultural land. Therefore, a significant negative effect is recorded against this objective. This effect is uncertain as it is not known whether the lost Grade 3 agricultural land is some of the best and most versatile (Grade 3a) agricultural land.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land within the confines of the existing developable area, increasing the significance of this effect.</p>

Option 12 – Site PR9 Land West of Yarnton – Intensification of developable area

SA Objectives	SA Score	Justification
<p>14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.</p>	-	<p>The development boundary of the site has been confined to the urban edge of Yarnton and Begbroke and falls partially within a Minerals Consultation Area.</p> <p>Therefore a minor negative effect is recorded for this objective.</p> <p>The intensification of development within the site has the potential to result in the loss of more greenfield land, including minerals within the confines of the existing developable area. Although this has the potential to result in more negative effects. The overall significance of the effect is unlikely to change.</p>
<p>15. To reduce waste generation and disposal, and achieve the sustainable management of waste</p>	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p> <p>The intensification of development in this location is unlikely to significantly change the significance of this effect.</p>

Options within the scope of the existing strategy requiring additional Green Belt release

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)			
SA Objectives	SA Score		Justification
SA objectives which relate to meeting Oxford's needs			
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++		All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford ++		Good accessibility to employment is important for developing and strengthening the relationship between labour and workplace ensuring economic growth in Oxford and Oxfordshire. This site is within easy access of more than 20,000 Oxford jobs by walking/cycling or public transport and more than 75,000 Oxford jobs by road (i.e. scored 'Green' in both ITP's assessments of 'access to jobs') ; therefore a significant positive effect is likely.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +		The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford			
	Oxford	Cherwell	

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)			
SA Objectives	SA Score		Justification
3. To reduce poverty and social exclusion.	0	0	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell (above 30%); therefore a negligible effect is likely.
6. To improve accessibility to all services and facilities.	Oxford ++	Cherwell ++	<p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). Key bus services include 2, 2A, 2B, 2C, 2D, S5 (15 minute frequency); 700, S4 (20/30 minute frequency) and 25A (60 min frequency). Therefore, a significant positive effect is likely.</p> <p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). Key bus services include 2, 2A, 2B, 2C, 2D, S5 (15 minute frequency); 700, S4 (20/30 minute frequency) and 25A (60 min frequency). Therefore, a significant positive effect is likely.</p> <p>This site is located adjacent to Cutteslowe which lies outside of the Cherwell District administrative boundary; however, the area contains a number of services and facilities including a primary school, a community centre and a doctor's surgery.</p>
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	Oxford + +/--	Cherwell + +/--	<p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). Key bus services include 2, 2A, 2B, 2C, 2D, S5 (15 minute frequency); 700, S4 (20/30 minute frequency) and 25A (60 min frequency). Therefore, a significant positive effect is likely. In addition, it has been identified that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and therefore this site scored 'red' in ITP's Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed significant positive and significant negative (+ +/--) effect is likely.</p> <p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). Key bus services include 2, 2A, 2B, 2C, 2D, S5 (15 minute frequency); 700, S4 (20/30 minute frequency) and 25A (60 min frequency). Therefore, a significant positive</p>

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)		
SA Objectives	SA Score	Justification
		effect is likely. In addition, it has been identified that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Cherwell and therefore this site scored 'red' in ITP's Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed significant positive and significant negative (+ +/--) effect is likely.
Other socio-economic SA objectives (scores only relate to Cherwell District)		
2. To improve the health and well-being of the population & reduce inequalities in health.	+	The site does not lie within 800m of a health facility. The site is also located in close proximity to a number of open spaces and public rights of way which may encourage new residents to make use of these facilities as part of a more physically active and healthier lifestyle. There are a number of amenity greenspace features within 800m of this site including Stratfield Brake Sports Ground and Stratfield Brake. Nearby sports facilities include, Oxfordshire Sports Partnership, Spirit Health Club and Banbury Road North Sports Ground. There are two which intersect the site public footpaths within 800m of the site and several more within 800m of the site. There is also a cycle path which intersects the central area of the site. These routes may encourage residents to partake of more active modes of transport. As such, a minor positive effect is likely for this SA objective is likely.
4. To reduce crime and disorder and the fear of crime.	0	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>Where new development is proposed within close proximity to existing residential communities there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The southern area of the site is adjacent to residential properties, Cutteslowe Park and a sports facility. In addition, the western area of the site is bisected A4165 (Banbury / Oxford Road) and a train line is adjacent to the western area of the site. Therefore, a minor negative effect is expected on this SA objective during the construction phase and over the longer term.</p>
Environmental SA objectives (scores only relate to Cherwell District)		
7. To conserve and enhance and create resources for biodiversity	-?	<p>Site options that are close to an international, national or local designated conservation site have the potential to affect the biodiversity or geodiversity of those sites, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, increased recreation pressure etc. Conversely, there may be opportunities to promote habitat connectivity if new developments include green infrastructure.</p> <p>The recent Ecological Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found five statutory designated sites and eleven non statutory designated sites within the 2km area of search. The statutory sites are Oxford Meadows SAC located approximately 1.2km to the south and west, Pixey and Yarnton Meads and Wolvercote Meadows SSSI lie within the SAC. Port Meadow and Wolvercote Common and Green SSSI (grazed neutral grassland) lies approximately 1.1km to the south and Hook Meadow and the Trap Grounds (unimproved neutral meadow) lies approximately 1.5km to the south.</p> <p>The non-statutory sites include eight Local Wildlife Sites (LWS), one provisional LWS (pLWS) and two District Wildlife Sites (DWS); Meadows West of the Oxford Canal, Wet wood and Swamp near Yarnton, Cassington to Yarnton Gravel Pits, Loop Farm Flood Meadows and Dukes Lock Pond all lie to the west, beyond the A34. Canalside Meadows/Oxford Canal Marsh and Meadow North of Goose Green lie to the south beyond</p>

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)		
SA Objectives	SA Score	Justification
		<p>A40. Almonds Farm and Burnt Mill Fields lies to the south-east also beyond the A40. One pLWS, Bypass Meadows, is located to the south-west beyond the A40. Stratfield Brake DWS lies approximately 200m to the north-west beyond the A34 and North Meadow West of Canal DWS lies approximately 1km to the west.</p> <p>Overall, the Ecological Assessment considers the site’s ecological sensitivity to future redevelopment is to be Medium/Low. This value is due to the wide variety of habitats on site, including hedgerows and woodland and their potential for protected species.</p> <p>The potential impacts on biodiversity and geodiversity present on each site, or undesignated habitats and species adjacent to the potential development sites, cannot be determined with certainty at this strategic level of assessment. This would be determined once more specific proposals are developed and submitted as part of a planning application so this effect is also recorded as uncertain.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The site area comprises approximately 154.64 ha of land which is mix of primarily arable land to the east of the A4165 Oxford Road and North Oxford Golf Club located to the west of Oxford Road. To the south of the site area is the settlement of Summertown; to the east and west is agricultural land which is crossed by a network of major and minor roads. Beyond the A34 to the north is the southern edge of Kidlington.</p> <p>The Landscape Character Sensitivity and Capacity Assessment (2017) assessed the overall landscape capacity score for residential development at this site as having a ‘medium’ capacity considered to have a medium capacity to accommodate residential development in some areas of the site. The contained area of the existing North Oxford Golf Club would be capable of accommodating residential development however the area to the east of the A4165 Oxford Road is considered to be less capable. A minor negative effect is therefore expected on this SA objective. This effect is recorded as uncertain as it depends largely on the appearance and impact of development sites including in comparison to what was on the site previously.</p>
9. To protect, enhance and make accessible for	--?	<p>The recent Archaeology and Heritage Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found the site itself contains St. Frideswide’s Farmhouse a Grade II* Listed Building and Grade II listed wall. Within the</p>

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)		
SA Objectives	SA Score	Justification
enjoyment, the historic environment.		<p>study area, a 500m buffer around the site boundary, there are six Listed Buildings including Middle farmhouse, a Grade II Listed Building.</p> <p>There are 25 recorded, non-designated heritage assets within the study area, of which eight are located within Site 50. There are also two archaeological events within the study area.</p> <p>Overall, the Archaeology and Heritage Assessment found the site to have High to Medium sensitivity.</p> <p>Cherwell District Council's Green Belt Study (2017) assesses the contribution of the land within each site in preserving the setting and special character of the historic city of Oxford (purpose 4). While there is no relationship between the land within this site and the historic core of Oxford, the low hilltops, floodplain and wooded character in the site provide a containing edge to views towards Oxford from the north adding to the rural character of Oxford's setting.</p> <p>Therefore, overall, a significant negative effect is expected on this SA objective.</p> <p>The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017).</p>
12. To reduce the risk of flooding and resulting	-	<p>The development of new housing on greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk, particularly where</p>

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)		
SA Objectives	SA Score	Justification
detriment to public well-being, the economy and the environment		<p>the sites are within high risk flood zones. National Planning Practice Guidance identifies residential properties as a 'more vulnerable use', which is suitable in areas of flood zone 1 and 2 but would require an exception test in flood zone 3a, and is unsuitable in flood zone 3b.</p> <p>A watercourse follows the eastern edge of the site. The site is on greenfield land and is mainly outside of flood zone 3 (less than 20% of the site is within Flood Zone 3); therefore, a minor negative effect is likely.</p> <p>It should also be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2 and areas susceptible to surface water, groundwater and sewer flooding incidents.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The location of development can influence the efficient use of land, as sites on high quality agricultural land would result in that land being lost to other uses. Development on brownfield land represents more efficient use of land in comparison to the development of greenfield sites.</p> <p>This site is on greenfield land and the majority of the site (approximately 69%) is classed as Grade 3 Agricultural Land, while the remainder (approximately 31%) is classed as Grade 4 Agricultural Land. Overall, a significant negative effect is likely. Although this is uncertain depending on whether it is, Grade 3a or Grade 3b which is not known.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p> <p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p>

Option 13 – Site PR6a – Land east of Oxford Road (eastwards extension into Green Belt)

SA Objectives	SA Score	Justification
		This eastern area of this site is within a Minerals Consultation Area; therefore a minor negative effect is likely.
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)		
SA Objectives	SA Score	Justification
SA objectives which relate to meeting Oxford's needs		
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.</p> <p>Development of a golf course is considered to have a negligible effect on this objective.</p>
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford +/-	<p>The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Although the extent of development within this development option has been slightly reduced to include the land to the west of the A4260, the effect identified against this objective for site 39A is still considered to apply.</p> <p>Good accessibility to employment is important for developing and strengthening the relationship between labour and workplace ensuring economic growth in Oxford and Oxfordshire. This site scored 'amber' in relation to criteria 4 (Access to Oxford jobs by walking and public transport) and 'green' in relation to criteria 5 (Access to Oxford jobs by road). Therefore, minor mixed effects (+/-) are likely in relation to this SA objective.</p> <p>The allocation development of a golf course is considered to have a negligible effect on this objective.</p>
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness	Oxford +	<p>The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on</p>

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)			
SA Objectives	SA Score		Justification
of the District and Oxford and Oxfordshire.			economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell (above 30%). Therefore a negligible effect is likely.
	0	0	
6. To improve accessibility to all services and facilities.	Oxford	Cherwell	<p>The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Although the extent of development within this development option has been slightly reduced to include the land to the west of the A4260, the effect identified against this objective for site 39A a still considered to apply.</p> <p>This site is in close proximity to sustainable transport routes (i.e. scored 'Amber' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). The site is within 2.5km of a railway station and partially within 500m of a premium bus route. Key bus services include: 2, 2A, 2B, 2C and S3, which run at a 20 min frequency, and S4, which runs at a 30 min frequency. Therefore, a minor positive (+) effect is likely on Oxford.</p> <p>This site is in close proximity to sustainable transport routes (i.e. scored 'Amber' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). The site is within 2.5km of a railway station and partially within 500m of a premium bus route. Key bus services include: 2, 2A, 2B, 2C and S3, which run at a 20 min frequency, and S4, which runs at a 30 min frequency. The site is not located next to a settlement and there are no services and facilities in the immediate vicinity however there are links to Kidlington (for example to the supermarket) which is close by are possible. Therefore, a significant positive (+ +) effect is likely on Cherwell.</p>
	+	++	
	Oxford	Cherwell	

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)			
SA Objectives	SA Score		Justification
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	++/--	++/--	<p>The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Although the extent of development within this development option has been slightly reduced to include the land to the west of the A4260, the effect identified against this objective for site 39A a still considered to apply.</p> <p>This site is in close proximity to sustainable transport routes (i.e. scored ‘Amber’ in ITP’s criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). The site is within 2.5km of a railway station and partially within 500m of a premium bus route. Key bus services include: 2, 2A, 2B, 2C and S3, which run at a 20 min frequency, and S4, which runs at a 30 min frequency. Therefore, a significant positive effect is likely. In addition, it has been identified that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and therefore this site scored ‘red’ in ITP’s Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed minor positive and mixed negative (++/--) effect is likely.</p> <p>This site is in close proximity to sustainable transport routes (i.e. scored ‘Green’ in ITP’s criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). The site is within 2.5km of a railway station and partially within 500m of a premium bus route. Key bus services include: 2, 2A, 2B, 2C and S3, which run at a 20 min frequency, and S4, which runs at a 30 min frequency. Therefore, a significant positive effect is likely. In addition, it has been identified that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Cherwell and therefore this site scored ‘red’ in ITP’s Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas).</p> <p>Given the fact that the new golf course proposed in this location would replace an existing golf course located approximately 400m to the east, the new golf course is unlikely to generate a significant net increase in traffic generation in the wider network.</p>

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)		
SA Objectives	SA Score	Justification
		Therefore, overall a mixed significant positive and significant negative (+ +/--) effect is likely.
Other socio-economic SA objectives (scores only relate to Cherwell District)		
2. To improve the health and well-being of the population & reduce inequalities in health.	+	<p>The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Although the extent of development within this development option has been slightly reduced to include the land to the west of the A4260, the effect identified against this objective for site 39A a still considered to apply.</p> <p>The site is not located within 800m of a healthcare facility, however there are several sports facilities, PRoW, areas of open space and two cycle routes with 800m of the site boundary. New residential communities in close proximity to these services and facilities, as well as a new golf course are likely to encourage new residents to make use of these facilities as part of a more physically active and healthier lifestyle. Overall, given that the golf course is a replacement for a lost facility to the east of the new site location, a minor positive effect is recorded on this SA objective.</p>
4. To reduce crime and disorder and the fear of crime.	0	<p>The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.</p> <p>The development of a replacement golf course is not considered to have an effect on this SA objective.</p>

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Although the extent of development within this development option has been slightly reduced to include the land to the west of the A4260, the effect identified against this objective for site 39A is still considered to apply.</p> <p>Where new development is proposed within close proximity to existing residential communities there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The site lies directly adjacent to an A road. A minor negative effect is therefore likely on this SA objective.</p> <p>The construction of a new golf course has the potential to contribute positively to local amenity and the public realm. However, as this site allocation policy replaces an existing golf course located approximately 400m to the east of the reserved site (site allocation policy PR6a), there is unlikely to be a significant net increase in traffic generation in the wider network. Consequently, in isolation, the golf course is not considered to affect this SA objective.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Site option 39A was recorded as having an uncertain minor negative effect due to the site's wide variety of habitats on site and their potential for protected species.</p> <p>Although the development boundary of the site has been refined, it is considered that there is still potential for direct and indirect adverse effects on these potential habitats and species.</p> <p>The golf course will help to safeguard some of site's ecological assets and promote habitat connectivity.</p>

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)		
SA Objectives	SA Score	Justification
		<p>The recent Ecological Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found five statutory designated sites and nine non-statutory designated sites within the 2km area of search. The statutory designated sites are the Oxford Meadows SAC located approximately 1km to the south and west, Pixey and Yarnton Meads and Wolvercote Meadows SSSI located within the SAC. Port Meadow and Wolvercote Common and Green SSSI (grazed neutral grassland) lies approximately 1.4km to the south and Hook Meadow and the Trap Grounds (unimproved neutral meadow) lies approximately 1.9km to the south.</p> <p>The non-statutory sites include seven Local Wildlife Site (LWS) and two District Wildlife Sites (DWS); Meadows West of the Oxford Canal lies immediately to the west of the site beyond the canal. Wet Wood and Swamp near Yarnton, Cassington to Yarnton Gravel Pits, Loop Farm Flood Meadows and Dukes Lock Pond all lie to the west, beyond the A44. Canalside Meadows/Oxford Canal Marsh and Meadow North of Goose Green lie to the south beyond A40. Stratfield Brake DWS is located on the northern boundary of the site and North Meadow West of Canal DWS lies approximately 250m to the north-west.</p> <p>Overall, the Ecological Assessment considers the site's ecological sensitivity to future redevelopment is to be Medium/Low due the variety of habitats on site and their potential for protected species. The potential impacts on biodiversity and geodiversity present on each site, or undesignated habitats and species adjacent to the potential development sites, cannot be determined with certainty at this strategic level of assessment. This would be determined once proposals that are more specific are developed and submitted as part of a planning application so this effect is also recorded as uncertain.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	--?	The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Site option 39A was recorded as having an uncertain significant negative effect due to relatively exposed and elevated nature of the site to the south, which would result in residential development being highly visible from areas to the north including the southern areas of Kidlington and Yarnton. This assessment was informed by the assessment findings for site 39A in the Landscape Character

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)		
SA Objectives	SA Score	Justification
		<p>Sensitivity and Capacity Assessment (2017). Furthermore, the significant landscaping associated with the construction of a golf course has the potential to adversely affect the rural setting.</p> <p>This effect is recorded as uncertain as it depends largely on the appearance and impact of development including in comparison to what was on the site previously.</p>
<p>9. To protect, enhance and make accessible for enjoyment, the historic environment.</p>	-?	<p>The area identified within Policy PR6c was previously appraised as part of the larger site option 39A. Site option 39A was recorded as having an uncertain minor negative effect due to the site’s medium sensitivity and contribution to the setting and special character of historic Oxford.</p> <p>The recent Archaeology and Heritage Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found the site itself contains one Grade II Listed Building. Additionally within the study area, a 500m buffer around the site boundary, there are two Listed Buildings and one Conservation Area, the Oxford Canal.</p> <p>There are 20 recorded, non-designated heritage assets within the study area, of which two are within the boundary of Site 39A.</p> <p>Overall, the Archaeology and Heritage Assessment found the site to have Medium sensitivity.</p> <p>Cherwell District Council’s Green Belt Study (2017) assesses the contribution of the land within each site in preserving the setting and special character of the historic city of Oxford (purpose 4). While the site lacks direct association with the historic core of Oxford, the openness of the land within this site sloping away from Oxford contributes to the City’s rural setting. Furthermore, its relationship with the Oxford Canal, an important historical route into the City, adds to its contribution to setting. The development of homes and a new golf course has the potential to adversely affect the rural setting of these historic assets.</p>

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)		
SA Objectives	SA Score	Justification
		However, the effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, a negligible effect is recorded against this SA objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017) and associated Addendum (2019).</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-?	<p>The development of new housing on greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk, particularly where the sites are within high risk flood zones. National Planning Practice Guidance identifies residential properties as a 'more vulnerable use', which is suitable in areas of flood zone 1 and 2 but would require an exception test in flood zone 3a, and is unsuitable in flood zone 3b.</p> <p>The Oxford Canal runs along the western edge of the site. The site is on greenfield land and is mainly outside of flood zone 3 (less than less than 5% of the site is within Flood Zone 3); therefore, a minor negative effect is likely.</p> <p>It should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2 and areas susceptible to surface water, groundwater and sewer flooding incidents.</p> <p>Although it is possible that residential development would be located adjacent to the existing urban edge of Oxford away from the area of flood risk, with much or the remaining area being used as a location for a new golf course thereby ensuring that permeable surfaces are retained on the majority of the site, the exact scale, location</p>

Option 14 – Site PR6c – Land at Frieze Farm (new housing proposal within the Green Belt i.e. with Golf Course)		
SA Objectives	SA Score	Justification
		and layout of development within the site is unknown. Therefore an uncertain minor negative effect is recorded against this SA objective.
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	The development boundary of the site may be confined to the urban edge of Oxford. However, the site is on greenfield land and the majority of the site (over 80%) is classed as Grade 3 Agricultural Land, while the remainder is classed as Grade 4 (less than 20%). The development of the site to accommodate new homes and a golf course would result in a significant net loss of agricultural land. A significant negative effect is therefore likely on this SA objective. Although this is uncertain depending on whether it is Grade 3a or Grade 3b which is not known.
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible. However, the site lies entirely within a Minerals Consultation Area so a minor negative effect is identified on this SA objective.
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)			
SA Objectives	SA Score		Justification
SA objectives which relate to meeting Oxford's needs			
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++		All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford ++		Good accessibility to employment is important for developing and strengthening the relationship between labour and workplace ensuring economic growth in Oxford and Oxfordshire. This site is within easy access of more than 20,000 Oxford jobs by walking/cycling or public transport and more than 75,000 Oxford jobs by road (i.e. scored 'Green' in both ITP's assessments of 'access to jobs') ; therefore a significant positive effect is likely.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +		The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell (above 30%); therefore a negligible effect is likely.
	0	0	
	Oxford	Cherwell	

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)			
SA Objectives	SA Score		Justification
6. To improve accessibility to all services and facilities.	++	++	<p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). The site is within 500m of a premium bus route. Key bus services include: S5 (15 min frequency) and 25A (60 min frequency). Therefore, a significant positive effect is likely.</p> <p>The site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). The site is within 500m of a premium bus route. Key bus services include: S5 (15 min frequency) and 25A (60 min frequency). Therefore, a significant positive effect is likely.</p> <p>Although separated from Kidlington by the Bicester Road, this site is located directly adjacent to Kidlington which contains a number of services and facilities including shops, banks, restaurants, a public library, one secondary school and several primary schools.</p>
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	Oxford	Cherwell	<p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). The site is within 500m of a premium bus route. Key bus services include: S5 (15 min frequency) and 25A (60 min frequency). Therefore, a significant positive effect is likely. In addition, it has been identified that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and therefore this site scored 'red' in ITP's Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed significant positive and significant negative (++) effect is likely.</p> <p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). The site is within 500m of a premium bus route. Key bus services include: S5 (15 min frequency) and 25A (60 min frequency). Therefore, a significant positive effect is likely. In addition, it has been identified that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Cherwell and therefore this site scored 'red' in ITP's Criteria 10 (Proximity to Cherwell and</p>
	++/--	++/--	

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		Oxford Air Quality Management Areas). Therefore, overall a mixed significant positive and significant negative (+ +/--) effect is likely.
Other socio-economic SA objectives (scores only relate to Cherwell District)		
2. To improve the health and well-being of the population & reduce inequalities in health.	++	The site is located within 800m of a healthcare facility (Gosford Hill Medical Centre), several sports facilities, areas of open space, a number of PRow and a cycle path. These facilities are likely to encourage new residents to make use of these facilities as part of a more physically active and healthier lifestyle. As such, a significant positive effect is therefore likely on this SA objective.
4. To reduce crime and disorder and the fear of crime.	0	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.
5. To create and sustain vibrant communities	-	Where new development is proposed within close proximity to existing residential communities there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. The site's south east boundary lies directly adjacent to the A34 and the south west boundary lies directly adjacent to the A4165. Furthermore, an existing residential development is located to the north west of the site. A minor negative effect is therefore likely on this SA objective.

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
Environmental SA objectives (scores only relate to Cherwell District)		
7. To conserve and enhance and create resources for biodiversity	-?	<p>Site options that are close to an international, national or local designated conservation site have the potential to affect the biodiversity or geodiversity of those sites, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, increased recreation pressure etc. Conversely, there may be opportunities to promote habitat connectivity if new developments include green infrastructure.</p> <p>The recent Ecological Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found no statutory designated sites and seven non statutory sites within the 2km area of search.</p> <p>The non-statutory sites include one Local Wildlife Site (LWS), two provisional Local Wildlife Sites (LWS) and four District Wildlife Sites (DWS); Meadows West of the Oxford Canal LWS lies 900m to the south-west of the site. Branson Lake pLWS and Scrub and Kidlington Meadows pLWS lie to the north-west beyond Bicester Road and the River Cherwell. Kidlington Copse DWS is located approximately 1.7km to the north-west. St Mary’s Fields DWS is located approximately 1.9km to the north-west. Stratfield Brake DWS and North Meadow West of Canal DWS are located approximately 250m and 775m to the south-west respectively.</p> <p>Overall, the Ecological Assessment considers the site’s ecological sensitivity to future redevelopment is to be Medium/Low. This value is due to the hedgerows on site and their potential for protected species and so a minor negative effect is expected on this SA objective.</p> <p>The potential impacts on biodiversity and geodiversity present on each site, or undesignated habitats and species adjacent to the potential development sites, cannot be determined with certainty at this strategic level of assessment. This would be determined once proposals that are more specific are developed and submitted as part of a planning application so this effect is also recorded as uncertain.</p>

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The site area comprises approximately 27.76 ha of land used as pasture, at the time of the site visit used for grazing cattle. Beyond the A34 to the east of the site and to the south the land use is predominantly arable extending towards the edge of Summertown. To the west and north-west is the southern edge of Kidlington.</p> <p>The Landscape Character Sensitivity and Capacity Assessment (2017) assessed the overall landscape capacity score for residential development at this site as having a 'medium to high' capacity as it is located immediately adjacent to the existing residential edge of Kidlington, is well screened on the site boundaries and forms a natural extension of the existing residential area up to the well-defined physical boundary of the A34. A minor negative effect is therefore expected on this SA objective. This effect is recorded as uncertain as it depends largely on the appearance and impact of development sites including in comparison to what was on the site previously.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The recent Archaeology and Heritage Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found the site itself contains no designated heritage assets. However within the study area, a 500m buffer around the site boundary, there are two Listed Buildings, Kings Arms Public House and attached mounting block and Stratfield Farmhouse.</p> <p>There are 15 recorded, non-designated heritage assets within the study area, one of which extends into Site 178. There are also three archaeological events within the study area.</p> <p>Overall, the Archaeology and Heritage Assessment found the site to have Low sensitivity</p> <p>Cherwell District Council's Green Belt Study (2017) assesses the contribution of the land within each site in preserving the setting and special character of the historic city of Oxford (purpose 4). The land within the site falls within the Cherwell valley is an important element in Oxford's historic setting, but the parcel is not close enough to the river to make a strong contribution, with the A34 effectively limiting its relationship with the valley core. However the parcel does contribute to the rural setting of Oxford as perceived from the A34, one of the major approaches to the City.</p> <p>Therefore, overall, a minor negative effect is expected on this SA objective.</p>

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017).</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The site does not lie within a flood zone is on greenfield land, so a minor negative effect is likely on this SA objective.</p> <p>However, it should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the site contains areas susceptible to surface water, groundwater and sewer flooding incidents.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	-?	<p>The location of development can influence the efficient use of land, as sites on high quality agricultural land would result in that land being lost to other uses. Development on brownfield land represents more efficient use of land in comparison to the development of greenfield sites.</p> <p>This site is on greenfield land and the majority of the site (82%) is classed as Grade 4 Agricultural Land, while the remainder is classed as Grade 3 (18%). An uncertain minor negative effect therefore is likely. This effect is uncertain until it is established whether the</p>

Option 15 – Site PR7a – South East Kidlington (southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		lost Grade 3 agricultural land qualifies as best and most versatile agricultural land (Grade 3a).
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p> <p>The majority of the site lies within a Mineral Consultation Area so a minor negative effect is likely on this SA objective.</p>
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)			
SA Objectives	SA Score		Justification
SA objectives which relate to meeting Oxford's needs			
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++		All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford +/-		Good accessibility to employment is important for developing and strengthening the relationship between labour and workplace ensuring economic growth in Oxford and Oxfordshire. This site scored 'amber' in relation to criteria 4 (Access to Oxford jobs by walking and public transport) and 'green' in relation to criteria 5 (Access to Oxford jobs by road). Therefore, a minor mixed effects (+/-) are likely in relation to this SA objective.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +		The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell (above 30%); therefore a negligible effect is likely.
	0	0	
	Oxford	Cherwell	

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)			
SA Objectives	SA Score		Justification
6. To improve accessibility to all services and facilities.	++		<p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). This site partially falls within 500m of a premium bus route. It is served by key bus services: 2, 2A, 2B, 2C, 2D, S5 (15 min frequency) and S4, 700 (20/30 mins frequency). Therefore, a significant positive effect is likely.</p> <p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). This site partially falls within 500m of a premium bus route. It is served by key bus services: 2, 2A, 2B, 2C, 2D, S5 (15 min frequency) and S4, 700 (20/30 mins frequency). Therefore, a significant positive effect is likely.</p> <p>This site is located directly adjacent to Kidlington which contains a number of services and facilities including shops, banks, restaurants, a public library, one secondary school and several primary schools.</p>
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	Oxford	Cherwell	<p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). This site partially falls within 500m of a premium bus route. It is served by key bus services: 2, 2A, 2B, 2C, 2D, S5 (15 min frequency) and S4, 700 (20/30 mins frequency). Therefore, a significant positive effect is likely. In addition, it has been identified that the proportion of road based trips generated by proposed development at this site are likely to load onto roads covered by AQMAs in Oxford and therefore this site scored 'red' in ITP's Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed significant positive and significant negative (++) effect is likely.</p> <p>This site is directly linked to sustainable transport routes (i.e. scored 'green' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). 	++/--	++/--	

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		scored 'red' in ITP's Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed significant positive and significant negative (+ +/--) effect is likely.
Other socio-economic SA objectives (scores only relate to Cherwell District)		
2. To improve the health and well-being of the population & reduce inequalities in health.	++	This site is approximately 732m south of Gosford Hill Medical Centre. The site is also located in close proximity to a number of open spaces and public rights of way which may encourage new residents to make use of these facilities as part of a more physically active and healthier lifestyle. There are a number of amenity greenspace features within 800m of this site including Stratfield Brake Sports Ground and Stratfield Brake adjacent to southern area of the site and Croxford Gardens Amenity Greenspace, which is adjacent to the northern area of the site. Nearby sports facilities include Stratfield Brake and Ron Groves Park. There are several public footpaths within 800m of the site, the nearest is adjacent to the western area of the site and there is a cycle path adjacent to the eastern area of the site. These routes may encourage residents to partake of more active modes of transport. As such, a significant positive effect is likely for this SA objective.
4. To reduce crime and disorder and the fear of crime.	0	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>Where new development is proposed within close proximity to existing residential communities there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The site is adjacent to residential roads within the settlement at Kidlington to the east of the site. In addition, the A4260 (Frieze Way) is adjacent to the eastern area of the site. Therefore, a minor negative effect is expected on this SA objective during the construction phase and over the longer term.</p>
Environmental SA objectives (scores only relate to Cherwell District)		
7. To conserve and enhance and create resources for biodiversity	-?	<p>Site options that are close to an international, national or local designated conservation site have the potential to affect the biodiversity or geodiversity of those sites, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, increased recreation pressure etc. Conversely, there may be opportunities to promote habitat connectivity if new developments include green infrastructure.</p> <p>The recent Ecological Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found three statutory designated sites and three non-statutory designated sites within the 2km area of search. The statutory sites are Oxford Meadows SAC, Pixey and Yarnton Meads SSSI located within the SAC and Rushy Mead SSSI located approximately 1.8km north-west of the site.</p> <p>The non-statutory sites include one Local Wildlife Site (LWS) and two District Local Wildlife Sites (DLWS); Stratfield Brake DLWS abuts the southern boundary of the site and both Meadows West of the Oxford Canal LWS and North Meadow West of Canal DLWS are located approximately 340m south-west of the site to the west of Oxford Canal.</p> <p>Overall, the Ecological Assessment considers the site's ecological sensitivity to future redevelopment is to be Medium. This value is due to the wide variety of habitats on site and their potential for protected species. There are two areas of woodland onsite, both appear to be semi-natural and both appear to exceed 0.25ha in size. The grassland in particular in</p>

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		<p>the east of the site has a diverse forb community and the site supports a good network of hedgerows around and within the centre of the site. The site also abuts the Oxford Canal (an important wildlife corridor) to the west and a DLWS to the south. A minor negative effect is expected on this SA objective.</p> <p>The potential impacts on biodiversity and geodiversity present on each site, or undesignated habitats and species adjacent to the potential development sites, cannot be determined with certainty at this strategic level of assessment. This would be determined once more specific proposals are developed and submitted as part of a planning application so this effect is also recorded as uncertain.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	-?	<p>The site area comprises approximately 10.46 ha of land which is a mixture of rough grassland, scrub, and amenity land associated with Stratfield Farm building which appears to be unused (unconfirmed).</p> <p>The Landscape Character Sensitivity and Capacity Assessment (2017) assessed the overall landscape capacity score for residential development at this site as having a 'medium to high' capacity as this would form a natural extension to the south edge of Kidlington with the existing playing fields and Stratfield Brake providing a strong southern limit to development. A minor negative effect is therefore expected on this SA objective. This effect is recorded as uncertain as it depends largely on the appearance and impact of development sites including in comparison to what was on the site previously.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The recent Archaeology and Heritage Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found the site itself contains one designated heritage assets, a Listed Building. Within the study area, a 500m buffer around the site boundary, there are two Listed Buildings and one Conservation Area. These include Oxford Canal Kidlington Green Lock, a Grade II Listed Building and Oxford Canal Conservation Area.</p> <p>There are seven recorded, non-designated heritage assets within the study area, of which none are located within Site 49. There are also two archaeological events within the study area, one of which is located within the site.</p>

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		<p>Overall, the Archaeology and Heritage Assessment found the site to have Medium sensitivity.</p> <p>Cherwell District Council’s Green Belt Study (2017) assesses the contribution of the land within each site in preserving the setting and special character of the historic city of Oxford (purpose 4). The land within this site has a strong relationship with the Oxford Canal, an important historic route into the City; however, its proximity to the urban edge of Kidlington limits this role.</p> <p>Therefore, overall, a minor negative effect is expected on this SA objective.</p> <p>The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District’s Water Cycle Study (2017).</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development of new housing on greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk, particularly where the sites are within high risk flood zones. National Planning Practice Guidance identifies residential properties as a ‘more vulnerable use’, which is suitable in areas of flood zone 1 and 2 but would require an exception test in flood zone 3a, and is unsuitable in flood zone 3b.</p> <p>The Oxford Canal follows the western edge of the site. The site is on greenfield land and is mainly outside of flood zone 3 (less than 5% of the site is within Flood Zone 3); therefore, a minor negative effect is likely.</p>

Option 16 – Site PR7b – Stratfield Farm (potential western/southern extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		It should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2 and areas susceptible to surface water, groundwater and sewer flooding incidents.
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The location of development can influence the efficient use of land, as sites on high quality agricultural land would result in that land being lost to other uses. Development on brownfield land represents more efficient use of land in comparison to the development of greenfield sites.</p> <p>This site is on greenfield land and the majority of the site (approximately 44%) is classed as Grade 3 Agricultural Land, while the remainder is classed as urban land (41%) and Grade 4 Agricultural Land (15%); therefore a significant negative effect is likely. Although this is uncertain depending on whether it is Grade 3a or Grade 3b which is not known.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p> <p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p> <p>The majority of this site is within a Minerals Consultation Area; therefore a minor negative effect is likely.</p>
15. To reduce waste generation and disposal, and achieve the sustainable management of waste	-	This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)			
SA Objectives	SA Score		Justification
SA objectives which relate to meeting Oxford's needs			
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++		All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford +/-		Good accessibility to employment is important for developing and strengthening the relationship between labour and workplace ensuring economic growth in Oxford and Oxfordshire. This site scored 'amber' in relation to criteria 4 (Access to Oxford jobs by walking and public transport) and 'green' in relation to criteria 5 (Access to Oxford jobs by road). Therefore a minor mixed effects (+/-) are likely in relation to this SA objective.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +		The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)		
SA Objectives	SA Score	Justification
Other socio-economic SA objectives (scores only relate to Cherwell District)		
2. To improve the health and well-being of the population & reduce inequalities in health.	++	This site is within 800m of three healthcare facilities, the closest being Yarnton Medical Practise approximately 294m to the south of the A44 (Woodstock Road West) and the furthest Gosford Hill Medical Centre is approximately 526m to the east of the A4260 (Oxford Road). The site is also located in close proximity to a number of open spaces and public rights of way which may encourage new residents to make use of these facilities as part of a more physically active and healthier lifestyle. There are a number of amenity greenspace features located within 800m of the site including Croxford Gardens Amenity Greenspace, Yarnton Pitches, The Phelps Amenity Greenspace, Lyne Road Amenity Greenspace and Cassington Road Amenity Greenspace, Yarnton. Nearby sports facilities include Little Marsh Playing Field, Yarnton Park, Kidlington Football Club, Ron Groves Park and Begbroke Sports and Social Club. There are several public footpaths which intersect the site around the northern and southern areas of the site. There are two and a cycle route approximately 224m to the east and 44m to the west of the site. These routes may encourage residents to partake of more active modes of transport. As such, a significant positive effect is likely for this SA objective.
4. To reduce crime and disorder and the fear of crime.	0	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)		
SA Objectives	SA Score	Justification
5. To create and sustain vibrant communities	-	<p>Where new development is proposed within close proximity to existing residential communities there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The site is adjacent to residential roads within the settlement at Kidlington to the east of the site, Yarnton to the south and Begbroke to the west. In addition, there is a train line which bisects the eastern area of the site and the A44 (Woodstock Road) is adjacent to the western area of the site. Therefore, a minor negative effect is expected on this SA objective during the construction phase and over the longer term.</p>
Environmental SA objectives <i>(scores only relate to Cherwell District)</i>		
7. To conserve and enhance and create resources for biodiversity	-?	<p>Site options that are close to an international, national or local designated conservation site have the potential to affect the biodiversity or geodiversity of those sites, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, increased recreation pressure etc. Conversely, there may be opportunities to promote habitat connectivity if new developments include green infrastructure.</p> <p>The recent Ecological Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found three statutory designated sites and ten non statutory sites within the 2km area of search. The statutory sites are Oxford Meadows SAC located approximately 1.7km to the south-west of the site beyond the A40, Pixey and Yarnton Meads SSSI located within the SAC and the Rushy Meadows SSSI, a statutory designation, is located immediately adjacent to the north-eastern corner of this site. The non-statutory sites include six Local Wildlife Sites (LWS) and four District Wildlife Sites (DWS); The Meadows west of Oxford Canal LWS and North Meadow west of Canal DWS are located approximately 300m to the south of this site and the Stratfield Brake woodland DWS is a short distance further east of them, on the opposite side of the Oxford Canal. Begbroke Wood LWS is also located approximately 500m to the west of the sites westernmost extent, lying beyond the A44. North Meadow West of Canal and Stratfield</p>

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)		
SA Objectives	SA Score	Justification
		<p>Brake DWS lie 500 and 700m to the south-east respectively. Frogwelldown Lane and Yarnton Sidings are located to the south-west beyond the A44.</p> <p>Overall, the Ecological Assessment considers the site’s ecological sensitivity to future redevelopment is to be Medium/Low. This value is due to portions of the site being of poor ecological value for wildlife (arable). However the presence of linear features and potential to support roosting/nesting and foraging protected species in the trees and hedgerows around the site boundary. A minor negative effect is expected on this SA objective.</p> <p>The potential impacts on biodiversity and geodiversity present on each site, or undesignated habitats and species adjacent to the potential development sites, cannot be determined with certainty at this strategic level of assessment. This would be determined once more specific proposals are developed and submitted as part of a planning application so this effect is also recorded as uncertain.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	--?	<p>The site area comprises approximately 175 ha of land which is primarily in agricultural use but also contains Begbroke Science Park in the centre of the site, Parker’s Farm in the east and Yarnton Allotments adjacent to the A44 in the west of the area.</p> <p>The Landscape Character Sensitivity and Capacity Assessment (2017) assessed the overall landscape capacity score for residential development at this site as having a ‘medium-low’ capacity as some areas within the site are considered most suitable for development including to the east of the railway line. This does not however rule out other areas of the site subject to detailed assessment of any proposals coming forwards. A minor negative effect is therefore expected on this SA objective. Notable sensitivities recorded include development within this area would result in the spread of the residential area of Yarnton to the east of the A44 Woodstock Road in an area that is disassociated with the smaller area of residential development to the north. A significant negative effect is therefore expected on this SA objective. This effect is recorded as uncertain as it depends largely on the appearance and impact of development sites including in comparison to what was on the site previously.</p>

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)		
SA Objectives	SA Score	Justification
9. To protect, enhance and make accessible for enjoyment, the historic environment.	-?	<p>The recent Archaeology and Heritage Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found the site itself contains one Listed Building within the boundary, Grade II listed Begbroke Farmhouse. Additionally within the study area, a 500m buffer around the site boundary, there are a further 27 Listed Buildings and four Conservation Areas, including Tudor Cottage, a Grade II Listed Building and Begbroke Conservation Area Conservation.</p> <p>There are 49 recorded, non-designated heritage assets within the study area, of which 32 are within the boundary of the site. There is some duplication within these records and the designated heritage sites, such as those associated with the canal. There are also eleven archaeological events within the study area, of which four are within the site.</p> <p>Overall, the Archaeology and Heritage Assessment found the site to have Medium sensitivity.</p> <p>Cherwell District Council's Green Belt Study (2017) assesses the contribution of the land within each site in preserving the setting and special character of the historic city of Oxford (purpose 4). Portions of the land within this site adjoin the Oxford Canal, a conservation area which marks a clear distinction between settlement and countryside that makes some contribution to the historic setting of Oxford, albeit limited by distance.</p> <p>Therefore, overall, a minor negative effect is expected on this SA objective.</p> <p>The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p>

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)		
SA Objectives	SA Score	Justification
		Further details are provided in the District's Water Cycle Study (2017).
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development of new housing on greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk, particularly where the sites are within high risk flood zones. National Planning Practice Guidance identifies residential properties as a 'more vulnerable use', which is suitable in areas of flood zone 1 and 2 but would require an exception test in flood zone 3a, and is unsuitable in flood zone 3b.</p> <p>Rowel Brook runs through the northern tip of the site and the Oxford Canal follows its north eastern edge. The site is on greenfield land and is mainly outside of flood zone 3 (less than 25% of the site is within Flood Zone 3); therefore, a minor negative effect is likely.</p> <p>However, it should be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the area contains flood zone 2, is susceptible to surface water and groundwater flooding and sewer flooding incidents.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	-	<p>The location of development can influence the efficient use of land, as sites on high quality agricultural land would result in that land being lost to other uses. Development on brownfield land represents more efficient use of land in comparison to the development of greenfield sites.</p> <p>This site is on greenfield land and the majority of the site (approximately 44%) is classed as Grade 2 Agricultural Land, while the remainder is classed as Grade 3 (approximately 41%) Agricultural Land and urban (approximately 4%); therefore a significant negative effect is likely.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.

Option 17 – Site PR8 – Land east of the A44 (eastern extension of residential area into Green Belt to the east of the railway)

SA Objectives	SA Score	Justification
		<p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p> <p>This site is within a Minerals Consultation Area; therefore a minor negative effect is likely.</p>
<p>15. To reduce waste generation and disposal, and achieve the sustainable management of waste</p>	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p>

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)			
SA Objectives	SA Score		Justification
SA objectives which relate to meeting Oxford's needs			
1. To ensure that everyone has the opportunity to live in a decent, sustainably constructed and affordable home.	Oxford ++		All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. All the site options appraised for the Part 1 Review are above 2 ha in size and are therefore likely to contribute significantly to the number of affordable homes. A significant positive effect is therefore likely on this SA objective.
16. To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District and Oxford and Oxfordshire.	Oxford --		Good accessibility to employment is important for developing and strengthening the relationship between labour and workplace ensuring economic growth in Oxford and Oxfordshire. This site scored 'red' in relation to criteria 4 (Access to Oxford jobs by walking and public transport) and 'red' in relation to criteria 5 (Access to Oxford jobs by road). Therefore, significant negative effects are likely in relation to this SA objective.
17. To sustain and develop economic growth and innovation, an educated/ skilled workforce and support the long term competitiveness of the District and Oxford and Oxfordshire.	Oxford +		The increased provision of affordable housing in Oxfordshire will make it easier for the County to retain and grow its skilled workforce, which is likely to have an indirect minor positive effect on this objective in Oxford and for the Oxfordshire economy. Furthermore, there are likely to be indirect minor positive effects in the short term on economic growth in Oxford and Cherwell including as a result of the increased rates of construction associated with the new developments.
SA objectives with particular spatial relevance to Oxford			
3. To reduce poverty and social exclusion.	Oxford	Cherwell	The site is not within or adjacent to a neighbourhood that is among the most deprived in Oxford or Cherwell (above 30%); therefore a negligible effect is likely.
	0	0	
	Oxford	Cherwell	

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)			
SA Objectives	SA Score		Justification
6. To improve accessibility to all services and facilities.	+	++	<p>This site is in close proximity to sustainable transport routes (i.e. scored 'Amber' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). The site is within 500m of a premium bus route. A key bus service is S3 (20 min frequency). Therefore, a minor positive (+) effect is likely.</p> <p>This site is in close proximity to sustainable transport routes (i.e. scored 'Amber' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). The site is within 500m of a premium bus route. A key bus service is S3 (20 min frequency). The south eastern boundary of the site lies directly adjacent to Yarnton which includes one primary school, a shop and a village hall. Therefore, a significant positive (++) effect is likely.</p>
10. To reduce air pollution (including greenhouse gas emissions) and road congestion	Oxford	Cherwell	<p>This site is in close proximity to sustainable transport routes (i.e. scored 'Amber' in ITP's criteria 2 -Proximity to current sustainable transport services and infrastructure that serve Oxford). The site is within 500m of a premium bus route. A key bus service is S3 (20 min frequency). Therefore, a minor positive (+) effect is likely. In addition, some road based trips generated by proposed development are likely to load onto roads covered by AQMAs in Oxford and therefore this site scored 'amber' in ITP's Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed minor positive and minor negative (+/-) effect is likely.</p> <p>This site is in close proximity to sustainable transport routes (i.e. scored 'Amber' in ITP's criteria 3 -Proximity to current sustainable transport services and infrastructure that serve Cherwell). The site is within 500m of a premium bus route. A key bus service is S3 (20 min frequency). Therefore, a minor positive (+) effect is likely. In addition, some road based trips generated by proposed development are likely to load onto roads covered by AQMAs in Cherwell and therefore this site scored 'amber' in ITP's Criteria 10 (Proximity to Cherwell and Oxford Air Quality Management Areas). Therefore, overall a mixed minor positive and minor negative (+/-) effect is likely.</p>
	+/-	+/-	
Other socio-economic SA objectives (scores only relate to Cherwell District)			

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
2. To improve the health and well-being of the population & reduce inequalities in health.	++	Yarnton Medical Practise is within the eastern area of the site. The site is also located in close proximity to a number of open spaces and public rights of way which may encourage new residents to make use of these facilities as part of a more physically active and healthier lifestyle. There are a number of amenity greenspace features located within 800m of the site including Yarnton Playing Fields, Cassington Road Amenity Greenspace, Yarnton and the Paddocks, Yarnton. Nearby sports facilities include Yarnton Park and Begbroke Sports and Social Club. There are several public footpaths which intersect the site and two which are adjacent to the north western and western areas of the site. The eastern area of the site is also adjacent to a cycle path. These routes may encourage residents to partake of more active modes of transport. As such, a significant positive effect is likely for this SA objective.
4. To reduce crime and disorder and the fear of crime.	0	The effects of new developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within developments which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, the effect of new housing development within the site is likely to have a negligible effect on this objective.
5. To create and sustain vibrant communities	-	Where new development is proposed within close proximity to existing residential communities there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. The site is adjacent to residential roads within the settlement at Yarnton to the east of the site. In addition the A44 (Woodstock Road West) is adjacent to the north as well as a train line to the southwest and Bladon Park to the west. Therefore, a minor negative effect is expected on this SA objective during the construction phase and over the longer period.
Environmental SA objectives (scores only relate to Cherwell District)		

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
7. To conserve and enhance and create resources for biodiversity	-?	<p>Site options that are close to an international, national or local designated conservation site have the potential to affect the biodiversity or geodiversity of those sites, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, increased recreation pressure etc. Conversely, there may be opportunities to promote habitat connectivity if new developments include green infrastructure.</p> <p>The recent Ecological Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found five statutory sites within the 2km area of search and six non statutory designated sites within the 1km area of search. Rushy Meadows SSSI, statutory designated site, is located 1km to the east of the site adjacent to Oxford Canal at Kidlington. The second is Blenheim Park which is located approximately 1.9km north-west of the site west of Bladon. The other three statutory sites include Oxford Meadows SAC and Pixey and Yarnton Meads SSSI and Cassington Meadows SSSI both of which are located within the SAC. All three statutory designated sites all located between approximately 1km and 1.5km south of the site and located just south of the A40.</p> <p>The non-statutory sites include three Local Wildlife Sites (LWS) and two District Local Wildlife Sites (DLWS); Frogwelldown Lane DLWS is located onsite along a woodland corridor where the footpath known as Shakespeare’s Way between Yarnton and Begbroke is also located. Yarnton Sidings DLWS is located approximately 20m south-west of the site along the railway line and to the south of Cassington Road. Beyond this site are two LWS’s; Cassington to Yarnton Gravel Pits LWS is located approximately 500m to the south of the site and Acrey Pits LWS, a disused quarry, is located approximately 1km to the south-west of the site. In the middle of site, but not part of the site, is Begbroke Wood an ancient woodland and a LWS designated for its lowland mixed deciduous woodland which is semi-natural in the south and native plantation in the north.</p> <p>Overall, the Ecological Assessment considers the site’s ecological sensitivity to future redevelopment is to be Medium. This value is due to the site containing a DLWS, abuts several other LWS and the diverse habitats recorded onsite. The network of hedgerows, which are a UK Priority Habitat, are likely to include some species rich hedges in particular those in the west of the site. The hedges also provide an important wildlife corridor between the DLWS, LWS, and the woodlands both in the centre and surrounding the site.</p>

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		<p>Several notable birds have previously been recorded within the site and although not included in the desk study the wide variety of habitats on site have potential to support a range of protected species. A minor negative effect is expected on this SA objective.</p> <p>The potential impacts on biodiversity and geodiversity present on each site, or undesignated habitats and species adjacent to the potential development sites, cannot be determined with certainty at this strategic level of assessment. This would be determined once more specific proposals are developed and submitted as part of a planning application so this effect is also recorded as uncertain.</p>
8. To protect and enhance landscape character and quality and make accessible for enjoyment, the countryside.	--?	<p>The site area comprises approximately 230.80 ha of agricultural land which is in a mix of arable and pastoral use; the land in the south west primarily being arable land and in the north east pastoral. Immediately north east of the site is Begbroke and to the east is Yarnton with the site boundary bordering the village of Yarnton. To the south and west the land is primarily a rolling arable landscape. To the north-west there are large areas of woodland which are Ancient and Semi-Natural woodland and Ancient Replanted woodland.</p> <p>The Landscape Character Sensitivity and Capacity Assessment (2017) assessed the overall landscape capacity score for residential development at this site as having a 'medium to low' within most of the site as the land rises to a localised plateau making it highly visible within the surrounding area. There may however be localised opportunity in the south east of the site adjacent to the existing urban edge of Yarnton which is considered to have a medium capacity. A significant negative effect is therefore expected on this SA objective. This effect is recorded as uncertain as it depends largely on the appearance and impact of development sites including in comparison to what was on the site previously.</p>
9. To protect, enhance and make accessible for enjoyment, the historic environment.	--?	<p>The recent Archaeology and Heritage Assessment undertaken as part of the Landscape Character Sensitivity and Capacity Assessment (2017) found the site itself contains no designated heritage assets, although one Listed Building is located at the centre of the site, but is excluded from the site boundary. However within the study area, a 500m buffer around the site boundary, there is one Registered Park and Garden, one Conservation Area and 40 Listed Buildings including Home Close, a Grade II Listed Building.</p>

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		<p>There are 27 recorded, non-designated heritage assets within the study area, of which three are located within Site 51. There is some duplication within these records and the designated heritage sites, such as the Church of St. Michael and Yarnton Manor. There are also nine archaeological events within the study area.</p> <p>Overall, the Archaeology and Heritage Assessment found the site to have Medium sensitivity.</p> <p>Cherwell District Council's Green Belt Study (2017) assesses the contribution of the land within each site in preserving the setting and special character of the historic city of Oxford (purpose 4). The land within this site includes arable farmland on high ground, which contributes to the ring of hills around Oxford that form a key aspect of its distinctive setting.</p> <p>Therefore, overall, a significant negative effect is expected on this SA objective.</p> <p>The effect is uncertain as the effect will depend on the exact scale, design and layout of the new development and opportunities which may exist to enhance the setting of heritage features.</p>
11. To maintain and improve the water quality of rivers and to achieve sustainable water resources management	0	<p>The location of potential development sites could affect water quality. However the nature of the effect is dependent on the scale of the development and the capacity at the local sewage treatment works to treat additional wastewater generated by the overall scale of development proposed. In addition, the location of potential sites is unlikely to influence sustainable resource management and use of recycled water, which would be determined through the detailed proposals for each development. Therefore, all sites have a negligible effect on this objective.</p> <p>Further details are provided in the District's Water Cycle Study (2017).</p>
12. To reduce the risk of flooding and resulting detriment to public well-being, the economy and the environment	-	<p>The development of new housing on greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk, particularly where the sites are within high risk flood zones. National Planning Practice Guidance identifies residential properties as a 'more vulnerable use', which is suitable in areas of flood zone 1 and 2 but would require an exception test in flood zone 3a, and is unsuitable in flood zone 3b.</p>

Option 18 – Site PR9 – Land to the west of the A44 (western extension of residential area into Green Belt)		
SA Objectives	SA Score	Justification
		<p>A few small watercourses flow through the site. This site is on greenfield land outside of flood zone 3; therefore a minor negative effect is likely.</p> <p>It should also be noted that the Cherwell Level 1 Strategic Flood Risk Assessment Update identifies that the site contains areas susceptible to surface water, groundwater and sewer flooding incidents.</p>
13. To improve efficiency in land use through the re-use of previously developed land and existing buildings and encouraging urban renaissance.	--?	<p>The location of development can influence the efficient use of land, as sites on high quality agricultural land would result in that land being lost to other uses. Development on brownfield land represents more efficient use of land in comparison to the development of greenfield sites.</p> <p>Approximately 98% of the site is on greenfield land classed as Grade 3 Agricultural Land, with the remaining 2% on Grade 2 Agricultural Land; therefore a significant negative effect is likely. Although this is uncertain depending on whether it is Grade 3a or Grade 3b which is not known.</p>
14. To reduce the global, social and environmental impact of consumption of resource by using sustainably produced and local products.	-	<p>The effects of new developments on the adoption of sustainable design and construction techniques, use of locally and sustainably sourced materials and use of renewable energy is not influenced by the location of development sites (rather they will be determined through the detailed proposals for each site). Therefore, in general, the effects of development within sites on this objective will be negligible.</p> <p>All new development will result in the increased consumption of minerals for construction and the location of development sites can influence the efficient use of primary minerals by their proximity to Minerals Safeguarding Areas as development in those areas may sterilise mineral resources and restrict the availability of resources in the districts</p> <p>The eastern part of this site is within a Minerals Consultation Area; therefore a minor negative effect is likely.</p>
15. To reduce waste generation and disposal, and	-	<p>This site is located on greenfield land and therefore development at this location would not involve the re-use of existing buildings and materials which may be present on brownfield sites. As such, a minor negative effect is expected on this SA objective.</p>

**Cherwell Local Plan 2011 – 2031 (Part 1) Partial Review –
Oxford's Unmet Housing Need**

Proposed Modifications

November 2019

**Addendum to
Statement of Consultation**

Addendum to Statement of Consultation

Introduction

1. Cherwell District Council is consulting on modifications to the Submission Cherwell Local Plan 2011-2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need, including modified Policies Maps and an update to the Sustainability Appraisal. The documents are being published for consultation from 8 November 2019 to 20 December 2019 prior to submission to the Secretary of State for Housing, Communities and Local Government.
2. The Draft Partial Review of the Cherwell Local Plan was submitted to the Secretary of State for public examination on Monday 5 March 2018. The Council submitted the Proposed Submission Local Plan (July 2017) accompanied by Focused Changes and Minor Modifications (February 2018). The Submission Policies Map was included within the documents.
3. The Submission Local Plan was also accompanied by a Statement of Consultation (CD PR93) which detailed previous stages of consultation undertaken in preparing the Plan. The Statement remains part of the Local Plan evidence base and is available online at <https://www.cherwell.gov.uk/info/112/evidence-base/369/local-plan-part-1-partial-review---evidence-base>. A separate Duty to Cooperate Paper (February 2018) (CD PR90) was also submitted. An Addendum to the Duty to Cooperate Paper (CD PR115) was prepared in September 2019 which supplements, and should be read alongside, the Duty to Cooperate Paper. It provides details of the further work undertaken by the Council subsequent to the Inspector’s Post Hearings Advice Note (Document PC5).
4. A Preliminary Hearing took place on 28 September 2018. Main hearings were held between 5th and 13th February 2019.
5. The Inspector’s Post-Hearings Advice Note (Document PC5) was received on 13th July 2019. In the Note the Inspector confirmed his preliminary conclusions that:
 - the 4,400 dwellings figure that represents Cherwell’s apportionment of Oxford’s unmet housing need provides a sound basis for the Plan;
 - the approach of locating the housing and infrastructure required as close as possible to Oxford, along the A44 and A4165 transport corridors, is an appropriate strategy;
 - the pressing need to provide homes, including affordable homes, to meet the needs of Oxford, that cannot be met within the boundaries of the city, in a way

that minimises travel distances, and best provides transport choices other than the private car, provide the exceptional circumstances necessary to justify alterations to Green Belt boundaries;

- on density, whilst some additional capacity may be possible, the Council has struck a broadly sensible balance between the extent of land proposed to be removed from the Green Belt, and the need to accommodate development that respects its context; and
 - in transport terms, the principle of siting the required allocations along an established transport corridor is a sound one.
6. The Inspector also advised that, with the exception of site PR10 (land South East of Woodstock), he considers the site allocations and the process by which they have been arrived at as being sound in principle.
 7. The Inspector indicated that the major change required to make the Plan sound is the deletion of Policy PR10, Land South East of Woodstock.
 8. Following the receipt of the Inspector's Advice Note the Council has engaged with a range of key stakeholders, interested parties and site promoters in the preparation of the proposed modifications.
 9. This addendum provides an account of the consultation undertaken since the February 2019 hearings. It also explains how the Proposed Modifications are being publicly consulted upon.

Consultation post February 2019 Hearings

10. The Inspector requested that following the Hearings in February 2019 the Council submit a Transport Technical Note (CD HEAR 1) and a Housing Figures Note (CD HEAR 2). The two notes, together with Statements of Common Ground and other documents submitted during or following the Hearings were the subject of an informal consultation ending on 4th April 2019. Participants from the Hearing sessions were invited to make submissions and the Council was provided with an opportunity to respond to the submissions received by the Inspector.
11. A total of 38 submissions were received. Full copies of each submission and the Council's responses can be viewed online at <https://www.cherwell.gov.uk/info/83/local-plans/515/local-plan-part-1-partial-review---examination/9>.

12. A list of respondents is shown in Table 1 below.

Table 1 - List of Respondents

Respondent
Aiden Applegarth
Andrew Hornsby-Smith
Begbroke & Yarnton Green Belt Campaign
Bloombridge
Cherwell Development Watch Alliance
Daniel Scharf
David Lock Associates for PR8 parties
Edgars for Mr & Mrs Tomes
Graham Thompson
GreenWay Oxfordshire
Harbord Road Area Residents
Ian Middleton for North Oxford Green Party
Keith Johnston
Kidlington Development Watch
Lynne Whitley
Pegasus Group for Hill Residential & Barwood Securities
Red Kite for Kidlington Parish Council
Savills for North Oxford Consortium
Terence O'Rourke for Vanbrugh Unit Trust & Pye Homes
Turnberry for Exeter College
West Oxfordshire District Council
Woodstock Town Council
Yarnton Parish Council

Duty to Co-operate

13. The Council received the Inspector's Post-Hearings Advice Note (PC5) on 13th July 2019 and published it on the Council's website on 15th July 2019.
14. The preparation of proposed Main modifications has been informed by further engagement with Oxfordshire County Council, the site promoters of all sites proposed for allocation in the Local Plan and the relevant 'prescribed bodies' for the purposes of implementing Section 33A of the 2004 Act.

Neighbouring Authorities	
Aylesbury Vale District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • The Inspector’s post hearing advice note • How the 410 homes at the PR10 (Land south East of Woodstock) could be redistributed • Current timetable for the main modifications • without prejudice, Aylesbury’s initial thoughts <p>No cross-boundary strategic issues were raised by the proposed modifications.</p>
Buckinghamshire County Council	<p>Unable to make contact during September but will continue to attempt to engage during the consultation period.</p>
Northamptonshire County Council (West Northamptonshire Joint Planning Unit)	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice note received following Hearings in February 2019. • the options being considered for modifications in light of the Inspector’s view that the strategy is sound but that one proposed housing allocation should be removed • the likely direction of travel for the main modifications having regard to changes in circumstances, new information and evidence • how the continued and endorsed strategy to locate development in south Cherwell is likely to have limited impact on Northamptonshire • the expected programme for the Partial Review going forward • how West Northamptonshire JPU are currently undertaking an Issues Consultation on a review of the West Northamptonshire Core Strategy in order to produce a new Strategic Plan for West Northamptonshire working with Daventry District and South Northamptonshire district.
Oxford City Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence; and how this relates to Oxford City • discussions with the County Council on infrastructure implications

	<ul style="list-style-type: none"> • the rationale for options being discounted • without prejudice, Oxford's initial thoughts • the expected programme going forward • timings of the Oxford Local Plan examination <p>Regular updates on modification preparation given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>
Oxfordshire County Council	<p>Following receipt of the Inspector's advice note CDC sought detailed advice from OCC on the transport, infrastructure, and education implications of redistributing the 410 homes previously proposed at Woodstock.</p> <p>CDC and OCC have worked closely and iteratively on preparing the proposed modifications. This working is enhanced through regular monthly meetings where progress on the modifications is discussed in detail.</p>
South Northamptonshire	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector's preliminary advice note received following Hearings in February 2019. • the options being considered for modifications in light of the Inspector's view that the strategy is sound but that one proposed housing allocation should be removed • the likely direction of travel for the main modifications having regard to changes in circumstances, new information and evidence • how the continued and endorsed strategy to locate development in south Cherwell is likely to have limited impact on Northamptonshire • the expected programme for the Partial Review going forward • how SNDC are currently undertaking an Issues Consultation on a review of the West Northamptonshire Core Strategy in order to produce a new Strategic Plan for West Northamptonshire working with Daventry District and South Northamptonshire district.
South Oxfordshire District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector's preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence

	<ul style="list-style-type: none"> • discussions with the County Council on infrastructure implications • the rationale for options being discounted <p>Regular updates on modification preparation is also given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>
Stratford-on- Avon District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • The scope of the Plan (Oxford’s unmet housing needs) and where we are in the process • The basis of the 4,400 homes (countywide cooperative process) • The overall housing need arising from the Oxon SHMA 2014 (c. 100,000) homes which informed the cooperative process • The fact that the adopted Cherwell Local Plan (2015) meets CDC’s needs (22,840 2011-2031) in full and that the 4,400 homes (2011-2031) fully meets Cherwell’s apportionment of Oxford’s unmet needs • The distribution of the housing proposals as submitted in 2018 – all in the southern part of the district near to Oxford • The Inspector’s preliminary advice (July 2019) following main Hearings in February 2019 (including his concern about land next to Woodstock) • The options being considered to address the Inspector’s concerns – all in in the southern part of the district.
Vale of the White Horse District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence • discussions with the County Council on infrastructure implications • the rationale for options being discounted <p>Regular updates on modification preparation is also given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>

Warwickshire County Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed included:</p> <ul style="list-style-type: none"> • the partial review of the local plan • the inspector’s request to reallocate the 410 homes at Woodstock • the 410 being redistributed to existing sites to the south of the district
West Oxfordshire District Council	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters addressed:</p> <ul style="list-style-type: none"> • the Inspector’s preliminary advice • the options being considered • the likely direction of travel for the main mods having regard to changes in circumstances, new information and evidence; and how this relates to West Oxfordshire • discussions with the County Council on infrastructure implications • the rationale for options being discounted • without prejudice, WODC initial thoughts • the expected programme going forward <p>Regular updates on modification preparation is also given at fortnightly liaison meetings for the Oxfordshire Plan 2050 and monthly Heads of Planning meetings which acts as the project board for the Oxfordshire Plan.</p>

Prescribed Bodies & Other Bodies	
Civic Aviation Authority (CAA)	Spoke with CAA’s Planning department in September. Advised to speak to London Oxford Airport directly.
London Oxford Airport	Unable to make contact during September but will continue to attempt to engage during the consultation period.
Environment Agency	<p>Informal notification of preliminary Main Modifications preparation and discussions in September 2019.</p> <p>Main matters discussed:</p> <ul style="list-style-type: none"> • The Inspector’s preliminary findings contained in his Post Hearings Advice Note, recommending deletion of site PR10 Woodstock and the re-distribution of 410 houses • The options being considered • The likely content of the main modifications • The testing of options through preparation of additional evidence base including Sustainability Appraisal <p>A degree of caution was expressed in terms of flood risk and the need to avoid flood risk areas in considering</p>

	<p>increased densities/extending developable areas. CDC confirmed that it would have the opportunity to comment on the proposed modifications when published in the usual way. Without prejudice, no other concerns raised.</p>

Consultation on Main Modifications

17. The Main Modifications will be made available for public comment for a period of six weeks before they are formally submitted to the Secretary of State. A number of minor modifications are also being made at the same time. Comments made must relate to the proposed modifications only. The Council is not consulting on other aspects of the Plan.

Responses to Consultation

18. Representations received on the modifications will be published on the Council's website. They will be reviewed and analysed in order to identify the key issues. These will be considered in finalising the Main Modifications and will be summarised in the final Statement of Consultation. They will also be reported to full Council when Members receive the final, 'Submission' version of the proposed modifications for formal approval for submission to the Secretary of State.

19. Once approved, the modifications, together with the representations received and other supporting documents, will be submitted to the Secretary of State. The appointed Inspector will consider representations and relevant evidence and complete the Local Plan Examination before issuing a report with recommendations to the Council.

**Cherwell Local Plan 2011 – 2031 (Part 1)
Partial Review – Oxford’s Unmet Housing
Need**

**Proposed Main Modifications to the
Submission Plan**

**Duty to Cooperate Statement Addendum
September 2019.**

1. Introduction

- 1.1 This addendum supplements, and should be read alongside, the Duty to Cooperate Statement published by Cherwell District Council in February 2018 (Ref CD PR90) for the submission of the Cherwell Local Plan 2011 – 2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need (The Partial Review Plan).
- 1.2 It provides details of the further work undertaken by the Council subsequent to the Inspector’s Post Hearings Advice Note (Document PC5) received 13 July 2019, following the Examination Main Hearings in February 2019.
- 1.3 This addendum demonstrates further active, constructive and continuing engagement with relevant local authorities and specified bodies on strategic matters through the preparation of the proposed modifications to the Partial Review Plan.
- 1.4 The September 2019 Addendum to the Council’s Consultation Statement (CD PR114) details the key means of engagement that have taken place in the preparation of the main modifications to the Partial Review Plan.

2. Strategic Cooperation

- 2.1 The Council continues to be an active member of the Oxfordshire Growth Board which is overseeing the implementation of the 2018 Oxfordshire Housing and Growth Deal.
- 2.2 A key strand of the Growth Deal is the preparation of a Joint Statutory Spatial Plan (JSSP) now known as the Oxfordshire Plan 2050. The preparation of this Plan is managed by the Heads of Planning of the Oxfordshire local planning authorities supported by OxLEP. In addition, there are regular liaison group meetings for local authority officers directly involved in the preparation of the Oxfordshire Plan.
- 2.3 Recent meetings have been updated on the cross-boundary implications of the proposed modifications to the Partial Review Plan. No specific relevant cross-boundary strategic matters have been raised for the Main Modifications.
- 2.4 Engagement with all other adjoining authorities outside Oxfordshire did not result in any relevant cross-boundary strategic matters for the Main Modifications.

3. Infrastructure needs

- 3.1 The Council has liaised closely with all infrastructure providers and relevant agencies to produce an updated Infrastructure Delivery Plan (IDP).
- 3.2 The Council has liaised closely on an ongoing basis with neighbouring local planning authorities, Oxfordshire County Council (OCC) and Highways England to consider the implications of the proposed modifications in transport terms. Oxfordshire County Council has been fully engaged throughout the preparation of the updated Transport Study.
- 3.3 The Council has liaised closely with OCC to consider future school capacity, and to ensure that the future development is adequately supported by additional school provision and/or expansion where required.
- 3.4 Further details of relevant engagement and work associated with infrastructure planning are provided within the IDP.

4. Conclusions

- 4.1 The Duty to Cooperate is an ongoing process that will continue through the examination in to the Partial Review Plan and beyond. This Duty to Cooperate Statement provides an update and sets out the steps that CDC has undertaken to address Duty to Co-operate issues raised during the preparation of main modifications to support a sound Local Plan.

Cherwell Local Plan 2011-2031 (Part 1)

Partial Review – Oxford’s Unmet Housing Need

Submission Plan

February 2018

Statement of Consultation

**Required under Regulation 22 of the Town and Country Planning (Local Planning)
(England) Regulations 2012 (as amended)**

Introduction

This Statement of Consultation has been prepared to support the submission of the Partial Review of the adopted Cherwell Local Plan 2011-2031 (Part 1) for examination under Regulation 22 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended). It reports on public consultation, engagement and co-operation undertaken in preparing the Local Plan.

This document sets out how the Council has involved the local community, stakeholders and statutory bodies in the preparation of the Partial Review of the Cherwell Local Plan. It describes the various stages of consultation undertaken, who was consulted and when. This document summarises the main points raised during each consultation stage and, where required, gives an indication of how these points were taken in to account in preparing the Partial Review Plan.

Part One of this document consists of the Statement of Consultation for the Issues Paper.

Part Two of this document consists of the Statement of Consultation for the Options Paper.

Part Three of this document consists of the Statement of Consultation for the Proposed Submission Plan.

The Plan has been prepared in accordance with the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended). In preparing a local plan Regulation 18 states that a local planning authority must consult on the subject of a local plan which it proposes to prepare and invite representations about what the local plan ought to contain. In preparing the local plan, the local planning authority must take in to account any representations made to them.

Regulation 19 states that before submitting a local plan to the Secretary of State the local planning authority must consult on the proposed submission documents together with a 'Statement of the Representations Procedure' for a minimum of six weeks.

The Plan has also been prepared in accordance with the Council's adopted Statement of Community Involvement (SCI).

Table 1 below summarises the key stages in the preparation of the Plan and acts as a useful navigation tool between the individual consultation statements prepared for each formal consultation stage.

There have been three main stages of consultation undertaken by the Council in the plan making process.

There is 'A Report of Consultation' for each consultation stage. Each is appended to this document. Each 'Report of Consultation' sets out:

- The purpose of the consultation
- The 'Duty to Cooperate'
- Consultation arrangements
- How we consulted
- Distribution
- Details of Exhibitions, workshops and meetings
- Consultation with statutory and non-statutory bodies
- Responses to the Sustainability Appraisal
- Representations – Summary of Issues raised and, where required, how they have been considered.

All consultation responses are available to view online [Local Plan Part 1 Partial Review - Evidence Base | Local Plan Part 1 Partial Review - Evidence Base | Cherwell District Council](#) (Evidence Document PR78).

They are also summarised in the Appendices to this Statement. Officers used the full responses for each stage of the Plan's preparation process.

Table 1: Partial Review Timeline

Table 2 below identifies the documents that formed each stage in the consultation. Documents were placed in a range of 'deposit' locations including libraries and Council offices. They were also available on the Council's website. Public Notices were placed in the appropriate local newspapers.

Table 2: Public Consultation Documents

Date	Public Consultations – Main Documents

Summary of Local Plan Consultation Stages

Issues Paper Consultation

In January 2016, the Council published a consultation paper which highlighted issues that needed to be considered in undertaking a Partial Review of the Local Plan. The Issues Paper invited comments, and discussion of the issues encouraged; a 'call for sites' was also made. A total of 148 responses were received which generated a total of 955 comments.

The full consultation statement can be viewed in Stage 1: Issues Consultation

Options Consultation

On 14 November 2016 the Council published an Options Paper for consultation. The Paper was prepared to engage with local communities, partners and stakeholders in developing options on how to meet Oxford's housing needs when preparing a partial review of the adopted Cherwell Local Plan Part 1. A total of 1225 representations were received.

The full consultation statement can be viewed in Stage 2: Options Consultation

Proposed Submission Plan

The Council published its Proposed Submission Plan on 17 July 2017. It invited comments on the Plan, particularly whether the Plan was considered to be legally compliant and sound: Positively Prepared, Justified, Effective and Consistent with National Policy. A total of 1460 representations were received.

The full consultation statement can be viewed in Stage 3: Proposed Submission Plan.

Who have we consulted during formal consultations?

The Council has consulted the general public and other groups as required by the Regulations and as set out in its Statement of Community Involvement. This included all those registered on the Council's database, which now includes approximately 5,000 bodies and individuals. The database is regularly updated as required and requested.

Consultation with Statutory and Non-Statutory Bodies

The Council has consulted widely to meet its statutory requirements. This includes neighbouring local authorities, and organisations such as the Environment Agency, Historic England, Natural England, Highways England and utility providers.

Consultation with stakeholders has included formal one to one meetings, topic meetings and joint working to inform preparation of the Partial Review Plan. This has included, but is not restricted to meetings and dialogue with the stakeholders listed in Table 3.

Oxfordshire Growth Board

In 2013, The Oxfordshire Local Planning Authorities (LPA) commissioned a new Strategic Housing Market Assessment (SHMA), supported by joint working on economic forecasting to establish the appropriate level of planned growth across the Oxfordshire Housing Market Area and the level of housing need arising in each District.

Officers from all Oxfordshire Authorities met on 17 May 2013 to discuss how the results of the SHMA should be considered, incorporated in to emerging plans where possible, and used as the basis for further joint working between the Councils. The purpose was to reach agreement and formalise joint working, provide a common basis on which to progress the SHMA and avoid unnecessary delay to Local Plan preparation.

In April 2014 the Oxfordshire Local Authorities, published the SHMA for Oxfordshire. The document suggested that the demographic trends and growth of the County economy and the level of affordable housing need required would necessitate 100,060 additional new homes in Oxfordshire between 2011 and 2031.

In November 2014, the Oxfordshire Growth Board, a Joint Committee which, on behalf of OxLEP is charged with the delivery of projects agreed in the ‘Oxford and Oxfordshire City Deal’ and ‘Local Growth Deals’ agreed a programme of work for addressing the unmet need arising from the SHMA. This programme of work would help the Local Planning Authorities meet the Duty to Co-operate whilst protecting the ‘sovereignty’ of individual councils over their Local Plans.

A Project Team was established to progress the work, co-ordinated by the Growth Board's Programme Manager and reporting to an Executive Officer Group which in turn reports to the Growth Board. This Project Team met regularly to consider the implications of the SHMA and how best to meet the identified unmet housing need of Oxford. This is in the context of recognising that the administrative boundaries of the City of Oxford are constrained and consequently it is seeking effective ways to address this issue in line with the Duty to Cooperate. The members of the formal Growth Board comprise the leaders of each council who were presented with periodic updates and took key decisions at scheduled public meetings.

From January 2015 to September 2016, the Project Team generally met on a fortnightly basis to progress, on a co-operative basis, the following projects:

- An understanding of the urban capacity of Oxford and the level of unmet housing need
- Oxford Green Belt Study to assess the extent to which the land within the Oxford Green Belt performs against the purposes of Green Belts
- Oxford Spatial Options Assessment to help inform the apportionment or distribution of unmet housing need to the district and city councils.
- High Level Transport Assessment of Spatial Options
- Education Assessment of Spatial Options.

This programme of work culminated in a decision of the Growth Board on 26 September 2016 on the apportionment of Oxford's unmet housing need to the individual district and city councils. (NB South Oxfordshire DC did not sign the Growth Board's Memorandum of Cooperation). This programme of work and the Growth Board's decision has informed the preparation of the Partial Review of the Cherwell Local Plan.

All six Councils have continued to meet on matters associated with the Partial Review including a Countywide Infrastructure Assessment (OXIS) and preparations for a statutory Joint Spatial Plan for Oxfordshire.

General Consultation Bodies

These include voluntary bodies and groups which represent the interests of different sections of the community, and local business groups.

Other Consultees

These include those that have requested to be consulted such as agents, developers, landowners and individuals. Clubs, societies, residents groups, charities and special interest groups are also included.

What other consultation has taken place in preparing the Local Plan?

In addition to the formal consultation periods, the Council has consulted on an on-going basis and to varying levels with a wide range of stakeholders including developers, parish councils, local organisations, national organisations and statutory bodies.

Forms of Additional Consultation

Meetings with Town and Parish Councils

The Council hosts biannual Parish Liaison Meetings where all Town and Parish Councils are invited to hear the latest work being undertaken by the District Council and to ask questions. The Partial Review Local Plan has featured regularly at these meetings with the most recent being 21 June 2017. Officers have at times held ‘surgeries’ for attendees to come and ask any specific questions.

Additionally, Council officers have met with Parishes on an individual basis to discuss issues arising.

Duty to Cooperate

A ‘Statement of Compliance with the Duty to Cooperate’ supports the Partial Review Local Plan.

Consultation with key stakeholders is highlighted above. On-going and constructive engagement with neighbouring authorities and relevant organisations has taken place since work on the Partial Review Plan began. The Council benefits from possessing a series of very well developed, interlocking relationships with neighbouring Councils and a particularly close engagement with the Oxfordshire Districts and the County Council through the Oxfordshire Growth Board; and South Northamptonshire District Council (part of the same organisation as Cherwell). Through the various forums, regular discussion and coordination takes place on strategic planning, growth strategies, transport and economic development issues facing the sub-region, county and district.

The Council will continue to work with neighbouring authorities and others on planning issues which cross administrative boundaries.

**CHERWELL LOCAL PLAN 2011-2031 PARTIAL REVIEW
OXFORD'S UNMET HOUSING NEED**

**SUBMISSION PLAN
STATEMENT OF CONSULTATION
FEBRUARY 2018**

**PART 1
CONSULTATION ON THE ISSUES PAPER
NOVEMBER 2016**

1.0 Introduction

- 1.1 This Statement of Consultation describes the consultation undertaken in progressing the Partial Review of the adopted Cherwell Local Plan 2011-2031 (Part 1). It will be updated as the Council proceeds through the statutory stages of plan-making.
- 1.2 This statement has been prepared to support a formal 'Options' consultation under Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012. It reports on public consultation, engagement and co-operation undertaken in reaching this Options Stage.
- 1.3 The Council has a statutory duty to consult and seek representations in preparing a Local Plan. It must also ensure that there is on-going co-operation with prescribed bodies under a 'Duty to Co-operate'.
- 1.4 The Council's policy on how it engages in plan-making is described in its Statement of Community Involvement 2016. The SCI is available on-line at www.cherwell.gov.uk/planningpolicy

2.0 The 'Duty to Cooperate'

- 2.1 Section 33A (1) and (3) of the Planning and Compulsory Purchase Act 2004 (as amended) places a duty on a local planning authority to co-operate with other local planning authorities and other prescribed bodies when it undertakes certain activities, including the preparation of development plan documents, activities that can reasonably be considered to prepare the way for such preparation and activities that support such preparation so far as they relate to a strategic matter. This is to maximise the effectiveness with which those activities are undertaken.
- 2.2 Section 33A (4) states that a strategic matter is: *“sustainable development or use of land that has or would have a significant impact on at least two planning areas, including (in particular) sustainable development or use of land for, or in connection with, infrastructure that is strategic and has or would have a significant impact on at least two planning areas.”*
- 2.3 Section 33A (2) requires a local planning authority *“to engage constructively, actively and on an on-going basis”* in respect of the activities that are subject to the duty.
- 2.4 The local planning authorities that border Cherwell District are:
- Aylesbury Vale District Council
 - Buckinghamshire County Council
 - Northamptonshire County Council*
 - Oxford City Council
 - Oxfordshire County Council
 - South Northamptonshire Council*
 - South Oxfordshire District Council
 - Stratford-on-Avon District Council
 - Vale of White Horse District Council
 - Warwickshire County Council
 - West Oxfordshire District Council

* Daventry District Council, Northampton Borough Council, South Northamptonshire Council and Northamptonshire County Council have established the West Northamptonshire Joint Planning Unit to prepare joint development plan documents, including the Joint Core Strategy and other joint Supplementary Planning Documents.

2.5 The Oxfordshire Councils are assisted in meeting the Duty to Co-operate by an 'Oxfordshire Growth Board' (a joint committee) which includes the local authorities within the Oxfordshire Local Enterprise Partnership (LEP) comprising, Cherwell District Council, Oxford City Council, South Oxfordshire District Council, Vale of White Horse District Council, West Oxfordshire District Council and Oxfordshire County Council. It also includes co-opted non-voting named members from the following organisations:

- LEP: Chairman
- Oxford Universities
- Skills Board
- Harwell/Diamond Light Source
- LEP Business Representative
- LEP Oxford City Business Representative
- Homes and Communities Agency

2.6 In addition, when considering matters that sit under the purview of the Local Transport Board then Network Rail and the Highways England have the right to attend the Growth Board as non-voting investment partners.

2.7 The Growth Board is supported by officer and working groups as required.

2.8 Regulation 4 of the Town and Country Planning (Local Planning) (England) Regulations 2012 sets out the other prescribed bodies for the purposes of implementing Section 33A of the 2004 Act. Of those bodies listed in the Regulation it is considered that the following bodies are relevant to Cherwell District:

- The Environment Agency
- Historic Buildings and Monuments Commission for England (Historic England)
- Natural England
- The Civil Aviation Authority
- The Homes and Communities Agency
- The NHS Oxfordshire
- The Office of Rail Regulation
- The Highway Authority – Section 1 of the Highways Act 1980:
 - Oxfordshire County Council (Highways)
 - The Highways Agency (Highways England)
- Local Enterprise Partnerships:
 - The Oxfordshire Local Enterprise Partnership (OxLEP)
 - The South East Midlands Local Enterprise Partnership (SEMLEP)
- The Oxfordshire Local Nature Partnership

2.9 The application of the 'Duty to Co-operate' is also informed by the National Planning Policy Framework (NPPF) and Planning Practice Guidance (PPG).

3.0 Consultation and Engagement

Oxfordshire Growth Board

- 3.1 In 2013, the Oxfordshire Local Planning Authorities (LPA) commissioned a new Strategic Housing Market Assessment (SHMA), supported by joint working on economic forecasting to establish the appropriate level of planned growth across the Oxfordshire Housing Market Area and the level of housing need arising in each District.
- 3.2 Officers from all Oxfordshire Authorities met on 17 May 2013 to discuss how the results of the SHMA should be considered, incorporated into emerging plans where possible and used as the basis for further joint working between the Councils. The purpose was to reach agreement and formalise joint working, provide a common basis on which to progress the SHMA and avoiding unnecessary delay to Local Plan preparation.
- 3.3 In April 2014 the Oxfordshire Local Authorities, published the SHMA for Oxfordshire.
- 3.4 In November 2014, the Oxfordshire Growth Board, a Joint Committee which, on behalf of the Oxfordshire Local Enterprise Partnership or 'OxLEP' is charged with the delivery of projects agreed in the 'Oxford and Oxfordshire City Deal' and 'Local Growth Deals, agreed a programme of work for addressing the unmet need arising from the SHMA which would help the Local Planning Authorities meet the Duty to Cooperate whilst protecting the 'sovereignty' of individual councils over their Local Plans.
- 3.5 A Project Team was established for progressing the work, co-ordinated by the Growth Board's Programme Manager and reporting to an Executive Officer Group which in turn reports to the Growth Board. Meetings of the Project Team and Executive Group have occurred regularly and been attended by officer representatives of the six Oxfordshire council. The members of the formal Growth Board comprise the Leaders of each council who were presented with periodic updates and took key decisions at scheduled public meetings.
- 3.6 From January 2015 to September 2016, the Project Team generally met on a fortnightly basis to progress, on a co-operative basis, the following projects:
- An understanding of the urban capacity of Oxford and the level of unmet housing need
 - Oxford Green Belt Study
 - Oxford Spatial Options Assessment
 - High Level Transport Assessment of Spatial Options
 - Education Assessment of Spatial Options
- 3.7 This programme of work culminated in a decision of the Growth Board on 26 September 2016 on the apportionment of Oxford's unmet housing need to the individual district and city Councils. The programme of work and the Growth Board's decision has informed the early stage of the Partial Review of the Local Plan and the Options Paper (November 2016).
- 3.8 The Councils continue to cooperate on other strategic and joint matters.
- Meetings / Discussions with Statutory and Non-Statutory Bodies***
- 3.9 In addition to meeting with bodies through the Oxfordshire Growth Board, Council officers have so far separately engaged with statutory and non-statutory bodies as follows:

- regular liaison meetings with officers at Oxfordshire County Council
- meetings with Oxford City Council and West Oxfordshire District Council
- on-going joint management arrangements with South Northamptonshire Council
- engagement with bodies on evidence gathering including Highways England and the Environment Agency
- formal consultation as part of the statutory Sustainability Appraisal process with Natural England, the Environment Agency and Historic England
- Parish and Town Council workshops (described later in this statement)
- Meeting with Oxford Neighbourhood Forums (described later in this statement)

Cherwell Local Plan 2011 – 2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need, Issues Consultation: 29 January to 11 March 2016

Consultation Arrangements

- 3.10 On 29 January 2016 the Council published an Issues Paper for consultation. The Paper was prepared to engage with local communities, partners and stakeholders in the early stages of the partial review of Cherwell Local Plan Part 1, specifically to help meet Oxford’s unmet housing need. A copy of the Public Notice is attached at Appendix 1.

How did we consult?

- 3.11 The formal consultation ran for six weeks from 29 January 2016 – 11 March 2016.

Distribution

- 3.12 The consultees listed in the Statement of Community Involvement and anyone who had registered on the Council’s database were notified by letter or email and were asked to comment on the Issues Paper generally and answer specific questions.
- 3.13 Hard copies were also placed at deposit locations across the district including libraries and Council offices. In addition hard copies were placed at some locations in Oxford (Oxford City Council offices, Oxford Central Library, Old Marston Library and Summertown Library). A consultation summary leaflet and poster were also produced and were made available at these locations as well as the Council’s website. These are included in Appendix 2 and 3.
- 3.14 The document was available to view online on the Council’s website. The consultation arrangements were discussed in advance with officers from Oxford City Council and publicity material provided to the City Council to enable it to advertise the consultation as it preferred.

Press Coverage

- 3.15 A statutory notice was placed in the Oxford Times, Bicester Advertiser and Banbury Guardian to advertise the commencement of the consultation (see Appendix 1).

Social Media

- 3.16 A press release regarding the consultation was published on the Council’s Facebook and Twitter pages. The press release explained the purpose of the consultation document and provided details of the consultation including dates and locations where the documents are available to view.

Representations

- 3.17 A total of 148 representations were received which generated a total of 955 comments. A table setting out each representation in full is attached at Appendix 8.

Sustainability Appraisal

- 3.18 An initial Sustainability Scoping Report was produced for consultation to accompany the Issues Paper. All comments made are set out in Appendix 8.

Call for Sites

- 3.19 The consultation was also accompanied by a 'call for sites'. The call for sites site submission form is available at Appendix 5. A list of sites promoted through the consultation is available at Appendix 7.

Representations - Summary of Issues Raised and How They Have Been Considered

- 3.20 Set out below are summaries of the representations received in response to the Issues consultation. We also explain how they have been taken into account. The representations will be considered further as we progress to developing specific proposals.

Cherwell's Contribution to Oxford's Housing Needs

Question 1: Is 3,500 homes a reasonable working assumption for Cherwell in seeking to meet Oxford's unmet housing need?

3,500 IS TOO HIGH

- Strong objection to the obligation to meet Oxford's unmet needs. CDC has the discretion to examine whether that need can be fully met.
- CDC should challenge the accuracy of Oxford's own assessments
- The figure of 3,500 is too high because it will not commit Oxford City to finding more opportunities for growth.
- There is additional housing capacity in Oxford City; Oxford City should provide more housing/review their planning policies to encourage additional development before relying on neighbouring councils. It should be Oxford City's obligation to demonstrate that it cannot meet the target. Considerable undeveloped areas within the city which should be aggressively investigated.
- Oxford City should use more brownfield land and green belt land, as well as private college owned land, accommodating as much housing as it can, before allowing the spread of its requirements to other areas.
- Oxford needs to make more of a contribution in light of its past low delivery rates.
- CDC should challenge the SHMA because: the Oxfordshire figures as a whole reflect London overspill; the SHMA has not been subject to independent scrutiny or Examination; its figures are too high and unrealistic; it is light on

evidence; hypothetical; produced by consultants with close connections to the development industry; it is based on economic growth forecasts and not housing needs; SHMA methodology is flawed because the Universities do not need to be accommodated in or near Oxford; it does not accurately represent either Cherwell or Oxford's housing needs. There should be a critical review of the SHMA and its forecasts as part of the Partial Review.

- Cherwell has already increased its housing requirement to an excessive amount during the Local Plan Examination (by 36% from that originally proposed)
- The priority must be to ensure that the Council will meet in full the housing need for the district identified in the Local Plan Part 1 and delivering on the spatial strategy and objectives set out in the Local Plan Part 1.
- Question whether a significant uplift in housing can be delivered given the scale of growth proposed at Banbury and Bicester and in light of actual completions recorded over the five year period preceding the start of the Local Plan period (2006-2011).
- Growth allocated for in the Local Plan Part 1 already reflects a higher amount of population change than 'natural increase' and therefore Oxford's housing needs are already allowed for.
- Concern regarding the impact accommodating this amount of development would have on the aspirations and objectives of communities in the District i.e. through the Neighbourhood Planning process.
- Building more houses will only make traffic congestion worse and no new building should occur until transport problems are solved.
- 3,500 is too high given transport and traffic constraints, and other infrastructure
- The 3,500 figure should be a ceiling.
- The sites chosen should be 'non-strategic' in scale.

3,500 IS TOO LOW

- 3,500 is too low given limited capacity in Oxford City
- The true figure for Oxford's capacity is lower than the working assumption, hence the overall shortfall is actually greater and the ultimate figure is likely to be higher than 3,500.
- Oxford City has reviewed its capacity subject to a thorough check and challenge process, process was found compliant with government policy by an independent Critical Friend.
- The role of Cherwell in meeting the longer term needs of Oxford City has been underestimated.
- The 3,500 should be a floor not a ceiling
- The 3,500 is based on the midpoint of the SHMA's estimates whereas to accord with the NPPF's requirements relating to the need to 'boost significantly' the supply of housing, and to be 'positively prepared', the upper limits should be used which equates to 32,000 dwellings, rather than 28,000.

- Cherwell should provide for whatever capacity it should deliver, potentially more than 3,500.
- The uplift of 500 dwellings to take into account differences in sustainability between the districts is too low. Cherwell is the least constrained district and capable of accommodating more.
- The figure is more likely to be between 3,500 and 4,000.
- Cherwell's share of the unmet need may be proportionately higher given the strong transport, economic, social, historic and geographic links and other relationships Cherwell has with Oxford, in comparison to the other districts. 3,500 is unreasonably low.
- 3,500 is a minimum and should only be considered as an intermediate working assumption pending the outcome of the ongoing joint work. The final apportionment is likely to be higher.
- The unmet housing need relates only to Oxfordshire's HMA whereas Oxfordshire & in particular, Cherwell, might be required to meet unmet housing needs arising from London where there is a significant residual shortfall.
- A figure of 6,000 is more appropriate
- A figure of 7,000 is more appropriate
- The Partial Review needs to address in full Cherwell's contribution to Oxford's unmet needs, it should not be 'light touch'.

METHODOLOGY – NOT REASONABLE AT THIS POINT

- More should have been done to establish an evidenced working figure prior to the consultation.
- The 3,500 figure has not been consulted on
- Too early to say whether the figure is appropriate, it will be informed by evidence but 3,500 is likely to be the lower end of the possible range
- The figure of 3,500 is premature and lacks an evidence base, and precedes the Oxfordshire Growth Board's Memorandum of Understanding scheduled for August/September 2016. It should not predetermine the outcome of a sustainability appraisal process.
- Until the scale of unmet need has been identified and scrutinised through and examination, no working figure should be applied.
- Premature ahead of production of Oxford City's Local Plan.
- It is not simply a case of evenly distributing need across authorities. It is a question of capacity and contribution to strategic priorities and spatial strategy.
- The distribution of need across Oxfordshire has yet to be determined. All other authorities are awaiting the Oxfordshire Growth Board evidence base.
- Opportunities and constraints of each local authority will inform how the unmet need is distributed across the County. Some districts are more constrained than Cherwell including in terms of the Green Belt, AONB, Ancient Woodlands, SSSIs, Areas of Landscape Value, Special Areas of Conservation, Scheduled Ancient Monuments, etc. Cherwell must take a

greater share of at least 5000+ homes in order to reflect the nature and extent of constraints to development within other 'partner' authorities and to negate potential shortfalls in other districts.

- An equal split is not justified given the differing constraints in the local authority areas (Cherwell being relatively unconstrained; Vale of White Horse and West Oxfordshire Districts being the most constrained in terms of landscape designations and having inferior transport connections to Oxford). A figure of 6,000 is more appropriate for Cherwell.
- Capacity – large allocations at Didcot and Wantage/Grove are in the process of being delivered but this will take 20 years to achieve and so there is limited capacity in other districts.
- Oxford should take a higher share than other districts in order to reduce the burden on those other areas. Oxford already has more jobs than people.
- 3,500 is an unsatisfactory approach as it fails to take account of technical and environmental factors that will ultimately determine the appropriate division. Infrastructure constraints, policy constraints & ability to deliver growth should also be considered.
- The figure should be informed by capacity within Cherwell
- Cherwell has a compelling advantage in Bicester in terms of relations to Oxford, a primary focus for growth in the Local Plan Part 1 and excluded from the Green Belt, and so Cherwell should accommodate more growth than neighbouring districts.
- The size and nature of Cherwell relative to other authorities indicates that its proportion should be higher, not equal. Cherwell has two of the largest towns in Oxfordshire and the largest village in the UK at Kidlington.
- The evidence base needs to be more sophisticated than a simple mathematical calculation. A study is required to assess capacity with options tested through Sustainability Appraisal and viability testing.
- The evidence base from which the figure is derived (SHMA) has not been produced independently of the construction industry (and it is therefore biased) and was not consulted upon. The SHMA should be reviewed.
- The process is biased too much towards development (concerns over the make-up of the Oxfordshire Growth Board, its countywide housing predictions, working arrangements, and the Oxford Green Belt Study).
- Duty to Cooperate is not a duty to agree and the Council only needs to consider the extent to which unmet need arising from Oxford City may be accommodated within the District.
- Instead of using one working figure of 3,500, which is too specific, the Council should use a range of 2,500-4,500 with reasonable indicative lower and upper figures (Oxfordshire County Council).
- Options should be tested above 3,500 given that the shortfall is likely to be higher than estimated. The emerging spatial strategy should be responsive and flexible rather than capacity being fettered by the imposition of an indicative threshold based on equal apportionment.
- 3,500 is not a reasonable assumption; the calculation should be 15,000 divided by 4 not by 5 because Oxford City should not be included in the distribution, as it is their unmet need that needs to be accommodated. If

Oxford were able to meet its own unmet needs this would, by definition, not be an unmet need. The 3,500 is therefore too low. Dividing the 15,000 figure by 4 gives 3,750 units. A working assumption should therefore be made of 4,250 homes. The public interest is better served by an over provision of housing through the Plan process than an under provision at this stage in the Plan making process.

- The apportionment of additional dwellings to the Districts should await decisions on the unitary authority proposal.

METHODOLOGY – REASONABLE AT THIS POINT

- The figure of 3,500 is a reasonable assumption at this stage although it should be a minimum target to reflect tighter landscape constraints in other local authority areas.
- Even if there is no county-wide apportionment agreed by September 2016, by this time the jointly prepared evidence should allow a reasonable degree of precision and steer to identify strategic sites for meeting Oxford's unmet needs.
- Support for proceeding on this basis ahead of the Oxfordshire Growth Board's conclusions
- Support for splitting the housing requirement equally across all districts

How the identified issues have been taken into account

- The Options Paper explains the conclusions of the Oxfordshire Strategic Housing Market Assessment (2014), how the SHMA was prepared and how the level of Oxford's unmet need was identified. It also explains how the unmet housing need has been apportioned as a result of the Oxfordshire Growth Board's decision on 26 September 2016.
- The Options Paper seeks views on whether the apportioned 4,400 homes would be an appropriate housing requirement.
- The potential housing requirement has been considered in the Initial Sustainability Appraisal.

Providing for Employment

Question 2: Should additional housing in Cherwell to meet Oxford's needs be supported by additional employment generating development?

YES

- Various site specific promotions made for allocation for employment use within the Partial Review.
- Various strategies promoted i.e. supporting more employment in villages/Banbury
- Opportunities do exist for any new housing to be supported by employment development.

- Yes. What economic attractors are there in Banbury?
- Yes, this is essential; there is important future demand for logistics and manufacturing in Cherwell. The economic benefits offered by logistics should be pursued through the Partial Review.
- There is sufficient evidence to justify the allocation of additional employment sites which will assist in sustaining the planning additional housing growth.
- Yes, to do so would minimise journey lengths and provide a good balance of land uses in accordance with the NPPF and would contribute to the creation of sustainable mixed communities.
- Yes, there is a clear link between housing need and employment growth
- Yes, to reduce the need to travel
- Yes, employment generating development can include a wide variety of uses including schools, shops, community facilities as well as office and industrial space.
- Working far from home creates traffic and transport problems
- Need to avoid creating dormitory residential zones which lead to commuting for work and activities/recreation/shopping etc.
- Sustainability benefits and to reduce long distance commuting.
- Sustainable communities need a mix of uses
- Yes housing should be considered as part of a joined up strategy in order to ensure proper planning
- Yes, the NPPF has a central focus on delivering sustainable development and supporting economic growth. This means new housing should be delivered in locations that are well served by employment and community uses and infrastructure.
- Yes, para B.95 of the Local Plan notes that the 'joint work will need to comprehensively consider how spatial options could be supported by necessary infrastructure to ensure an integrated approach to the delivery of housing, jobs and services.'
- The Partial Review offers the opportunity to realise economic benefits that would otherwise have been unachievable (in accommodating what would have been Oxford's resident population). More ambitious economic development can be achieved. As Oxford's unmet need in respect of Cherwell will be concentrated around North Oxford, it would be appropriate to take advantage of the opportunity created by the cluster of world class economic assets i.e. high value employment.
- Given that the need for housing arises in part through the forecast employment growth, there is a need to align policies and provision for housing and employment generating development in the partial review. There are also benefits to doing so in terms of transport and infrastructure.
- Yes as per the aims of OCC's LTP4 (colocation).
- Yes there is already an under provision of employment opportunities in Cherwell i.e. Banbury.
- Yes, local planning authorities need to consider all development requirements (not just homes) when fulfilling their duty to cooperate. It is important that

sufficient employment land is also allocated to support the growth of Oxford and this should be in an area with a strong relationship to the City.

- There is no employment land supply issue in Oxford City which needs to be resolved in Cherwell through this review. However there may be specific employment needs to be accommodated alongside housing through mixed uses. Consideration could also be given to collocating expanding employment uses with options for meeting Cherwell's local employment needs (Oxfordshire County Council).

NO

- Oxford is the main driver of economic growth and housing need in the area and it is not therefore necessary to plan for additional employment development.
- Cherwell's own jobs need has been accommodated in the Local Plan Part 1. Additional employment provision would not meet Cherwell's own needs and so would contravene the Local Plan.
- There is low unemployment in this area; the provision of additional employment will increase the need for housing.
- New housing should not be accompanied by employment development; this would result in out-commuting from Oxford and would not be seeking to meet Cherwell's own needs.
- The housing figures are already based on unrealistic forecasts of growth in employment, to provide for more employment is creating a vicious circle.
- No, the suspect assumptions leading to the overstated housing needs in the SHMA were based on employment growth already
- More employment would generate more demand for housing, exacerbating the problem & creating a cycle of continuing growth pressure
- It makes no sense to supply new housing in Cherwell to meet Oxford's needs, if the additional employment is created in Cherwell to serve those homes. That would result in both housing and employment having nothing to do with Oxford where the need is, as Oxford already has more jobs than people to fill them.
- No, it would be inappropriate to create more jobs in Cherwell to employ people already required for jobs being created in Oxford
- No, flawed concept. If employment is identified for Oxford City's growth then the housing to support it should also be within Oxford City.
- A review of the empty employment buildings in Oxford should be undertaken first.
- If the root cause of the housing need is from those employed in Oxford, London, Reading, etc then no, similarly if it relates to those commuting into Cherwell then the answer is no.
- There is plenty of employment in Oxford/close to Oxford already (such as Begbroke, the Airport etc). There is an excessive amount of employment already.
- No, this would prejudice Cherwell's own strategy. An exception would be to relocate some of the higher technology business planned for Oxford to

Bicester, where employment opportunities otherwise may not match housing growth.

- No because there is no evidence to support a housing need at all so therefore no employment need either.
- The purpose of the Partial Review is to accommodate Oxford's housing needs.
- This would damage other areas of the UK which have more housing stock but few employment opportunities.
- Need not greed. Use a rigorous method of assessing need by reassessing the baseline figure.

MAYBE/OTHER

- The two issues can be joined up by providing the necessary housing on the appropriate sites near to existing employment locations.
- Oxford is already a major employment hub so it is questionable if additional employment is required. Any new employment should be sustainably located with access by public transport, positioned along the Oxford-Bicester railway line or the A34 corridor. New employment, particularly B8 uses, should be located on transport corridors or where public transport can be utilised, not in rural areas.
- Wherever possible employment should be local to housing. This may mean moving some major sources of employment outside Oxford.
- Should refer to the NPPF's guidance on sustainability. Careful thought must be given to economic links with Oxford City and existing centres. Consideration should be given to economic links within Cherwell and suitable locations to deliver new homes and employment (i.e. Bicester)
- Any employment provided should be ancillary to the housing being planned for or responding to a specific need arising from one of Oxford's key sectors. Overprovision would create further pressure on the housing stock and require a greater level of housing growth required.
- Additional employment development must be consistent with the economic objectives established for Oxford and should not undermine the strategies and objectives for Cherwell. Any new employment must not dilute the value of existing employment provision i.e. RAF Upper Heyford.
- Presumably Oxford's identified housing need is based partly on that needed to support economic growth. If that economic growth was then to be provided outside of Oxford, it would be reasonable to expect the overall housing need of Oxford to be reduced accordingly (Historic England).

How the identified issues have been taken into account

- Cherwell's employment needs are provided for by the adopted Local Plan Part 1. The purpose of the Partial Review is to contribute in meeting Oxford's unmet housing need. The SHMA's projection of need is based on a committed economic growth scenario. The Options Paper considers the responses received to the question including the views of Oxford City Council in relation to the need for additional employment development.

- Paragraph 3.37 refers to Oxford City Council's advice that support will be given to the provision of further employment that is either ancillary to the housing being planned for, to support the principles of sustainable mixed-use development, or responds to a specific need arising from one of Oxford's key sectors.

Oxford's Key Issues

Question 3: What are Oxford's key issues that we need to consider in making a significant contribution to meeting the City's unmet housing need?

- Specific sites/locations for growth promoted or suggested.
- CDC must consider Oxford City Council's adopted vision; development patterns within Oxford; employment provision within Oxford; the employment needs/opportunities of Oxford and how these relate to Cherwell; transport connections with Oxford City which can be utilised; infrastructure provision; constraints such as Green Belt and flood risk; housing need; and social and historic connections.
- Agree with the summary of housing issues in the consultation document
- Need to retain large green spaces particularly the Kidlington Gap
- The relationship of new housing to the City itself
- Development potential of / protection of Green Belt land and demonstration of exceptional circumstances (housing need, homes/jobs imbalances, affordability, traffic congestion, recruitment issues, housing capacity in the City, lack of alternatives).
- Need to consider land beyond the Green Belt.
- CDC should consult with developers in a Developers Forum and also run a 'Constraints & Opportunities workshop to help define strategic inputs to the new spatial plan.
- Is the housing target figure correct/evidence base concerns
- What is the capacity in Oxford City (spare space and empty premises)
- Additional documents highlighted for review which summarise the key issues
- Housing location is the key issue and that should be defined by transport and infrastructure availability
- Housing affordability (various including Oxfordshire County Council) / Starter Homes
- Difficulties in staff recruitment caused by poor affordability and housing choice as well as overcrowding, homelessness and poor living conditions. New housing should provide a very wide mix of housing types and tenures
- Need to review the City boundaries to ensure the level and type of housing is consistent with the economic requirements of the growing city
- Maintaining the historic environment
- Flood risk
- Other environmental constraints

- Growth should be diverted away from Oxford across the County and beyond i.e. Oxford Brookes University could be relocated to Bicester
- Oxford requires improved public transport infrastructure i.e. use of a tram system and improving access from Kidlington & Witney, and improved cycle routes into the city. Congestion charging should be introduced.
- The need for sites to have good accessibility by fast and frequent public transport; cycling and walking into the City Centre and to other key employment locations in Oxford (Oxfordshire County Council)
- Traffic movements in and out of the city; the need to minimise travel demand (Historic England)
- Opportunities to improve sustainable transport infrastructure including investment in high quality public transport corridors
- New housing should focus on existing transport corridors, or corridors which could be enhanced through additional funding.
- Relationships between new housing sites and the Oxford Transport Strategy should be considered i.e. locating housing near to Park & Rides of a Rapid Transport Route. Sites should support such infrastructure and not prejudice the delivery of these measures (Oxfordshire County Council).
- Quality and design of new housing is key
- Oxford aims to be a Low Carbon City
- Key issue is to accommodate needs as close to possible as to where it arises, sustainability benefits of doing so.
- Scarcity of previously developed land in Oxford City.
- Protection and enhancement of the built and natural environment.
- Need to not destroy what makes Oxford special
- Views into and over the city, including those identified in the Oxford Viewcones Study, and how they contribute to the significance of the city (Historic England)
- Whether land has historic significance – check the Historic Environment Record and the Historic Landscape Characterisation (Historic England)
- The need to avoid adverse effects on the character, appearance and special interest of the Conservation Area (Historic England)
- Nature conservation assets
- Protection of open areas within the City which contribute to its character.
- Extensive open areas which are not in public use which should be considered for housing
- It is up to Oxford City to define its own issues
- It will never be possible to accommodate all of Oxford's needs within the City boundary
- The City Council needs to re-examine its priorities to achieve a better balance between housing and employment.
- Constraints assessments of the designations affecting all the local authority areas surrounding Oxford will inform capacity.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 of the Options Paper.

Question 4: What are the key principles or goals that the additional growth in the District should be aiming to achieve?

- Site specific promotions made
- To make the best use of existing and planned infrastructure and to minimise the need for new infrastructure (Oxfordshire County Council)
- Should consider issues such as quality of life, prosperity, happiness and health of existing residents.
- Protect Cherwell
- The key goal is to limit impact of development on Cherwell, and its inherent infrastructure impacts.
- Bicester needs more local employment and an improved town centre.
- Maintaining the vitality of Kidlington and its ability to serve its hinterland
- Maximising the regeneration of Banbury
- New communities should be balanced and not impose unreasonably on established settlements.
- Development should be sensitive to the setting context of its existing surroundings.
- To preserve the relationships between villages in terms of size and access to services
- Too early to comment upon this until the evidence base is complete as well as the strategic work of the Growth Board, which should be reflected in the vision.
- Until the spatial strategy is set, the apportionment of unmet need cannot be determined.
- Should not compromise the existing vision for growth/objectives in Cherwell Local Plan Part 1
- Additional growth at the locations focused upon in the Local Plan Part 1 would support the foundations laid by the Part 1.
- Growth should be distributed around some parts of Cherwell in stages, monitored and reduced downwards if necessary.
- The unmet need should be met in full across the Oxfordshire HMA in a sustainable, deliverable and transparent manner.
- Should reflect existing strategies including the adopted Local Plan Part 1 and LTP4.
- Making the most of existing exceptional transport links

- Bringing forward development in areas with transport links to Oxford.
- The most sustainable locations should be identified and given greater weight including consideration of infrastructure and sustainable transport links.
- Due consideration should be given to locations that meet local needs, but also to the identification of locations that accommodate sustainable transport opportunities to Oxford.
- New housing should have ready access to public transport/allow for travel to Oxford and beyond in an environmentally friendly way.
- Providing for better public transport, safer cycling and eliminating congestion.
- Considering car free or low car use development
- Meeting housing need as close as possible to where it arises
- As per the three aspects of sustainable development defined in the NPPF (economic, social, environmental)
- Consideration should be given to the NPPF, NPPG, the Oxford Core Strategy and Local Plan Part 1.
- Secure high quality yet affordable design, exemplar high quality developments.
- Key aim should be to provide affordable accommodation for those who are employed in Oxford
- People should have access to suitable and affordable accommodation which they cannot attain within Oxford City.
- Provision of key worker housing
- Development should be truly sustainable, well designed and planned
- Secure a good living environment
- Development should promote healthy living
- Creating sustainable, inclusive, mixed communities
- New development to be physically and socially integrated with Oxford's existing communities
- Bringing forward housing in locations with socio-economic links to Oxford
- Achieve an enhancement to Oxfordshire's economy
- Any additional growth should have excellent access to existing and future employment sites
- Development should foster research and development to boost the local economy
- Facilitating economic growth to support housing which compliments Oxford City and Cherwell's economies
- Harnessing the value generated by new strategic development to deliver economic benefits
- Retaining a skilled labour force within the district
- Providing new development close to, and providing for investment in, existing centres.

- Providing services, facilities, and infrastructure or providing for good access to these
- Deliver infrastructure before not after housing
- Contribution to providing improvements to infrastructure to benefit existing residents and visitors
- Twinning the provision of housing and infrastructure
- Planning new development in such a way as to facilitate new infrastructure i.e. a concentration of 1,000 homes needed to make a new primary school viable (Oxfordshire County Council).
- Sites on strong public transport corridors (both bus and rail) should be considered for low car or car free development (Oxfordshire County Council).
- Providing sufficient facilities on sites to serve the needs of future residents
- Planning at the neighbourhood level to deliver services necessary to support day-to-day needs within walking distance
- Limiting growth in rural settlements
- Avoiding sprawl
- Avoiding coalescence
- Retention of the Green Belt
- Protecting the environments
- Need to avoid development in protected areas including AONB and other areas protected for their inherent qualities or constraints (such as floodplain)
- Unused sites of lesser environmental value need to be brought forward
- Maintain, enhance and protect biodiversity
- Addressing climate change.
- Meeting Oxford's needs in a sustainable manner
- Minimising the use of non-renewable resources
- Making efficient use of land
- Achieve the conservation and enhancement of the District's historic environment and the heritage assets therein (Historic England)
- Looking beyond the plan period, as the need from Oxford is likely to continue well beyond then
- Housing to be deliverable in the medium term (by 2031) and supported by a clear delivery plan.
- Cooperation and communication between the Oxfordshire local authorities
- Making a significant contribution to Oxford's unmet housing need.

How the identified issues have been taken into account

- The issues were taken into account in considering the draft Vision and Objectives for meeting Oxford's unmet housing needs in Cherwell in Section 5 of the Options Paper.

Question 5: What should the focused Vision for meeting Oxford's unmet need contain?

- Since the Partial Review is only an Addendum to the Adopted Local Plan, it must contain the same vision, aims, objectives and spatial strategy of the Local Plan Part 1. To alter the directions of growth would undermine a clear vision or direction for the Local Plan.
- To achieve additional growth without adversely impacting Cherwell's own growth strategy
- It should accord with the existing Vision for Cherwell District Council if it is to be considered as an Addendum.
- It is not possible for there to be an 'Addendum' vision or strategy as the whole basis of the Local Plan would have to be rethought as neither of the two major towns have any additional capacity.
- Too early to comment upon this until the evidence base is complete as well as the strategic work of the Growth Board, which should be reflected in the vision.
- Emphasise the need for better road, rail & cycling infrastructure. Cherwell needs a focal point in the south of the district (economic and leisure activity) to reduce pressure on Oxford i.e. comparable to Abingdon.
- The focused vision should build on the existing vision and seek to provide balanced housing supply in locations which are sustainable and meet the needs of Oxford City Council. This should be addressed through strategic allocations at established settlements with strong transport and socio-economic links to Oxford City, i.e. Bicester.
- New development should ensure significant investment in open space, sport and recreation provision, and the enhancement of biodiversity, and full infrastructure which is easiest to achieve on larger sites
- New allocations should take local character and the enhancement of heritage assets into account
- Development should be delivered without unacceptably affecting Cherwell's natural, built and historic environment (Historic England).
- It should promote sustainability
- Additional documents listed for review to inform the new Vision including LTP4 and the Oxford Transport Strategy (Oxfordshire County Council)
- There is a danger of Cherwell's communities, particularly Banbury, becoming dormitory/commuter towns which would be a complete negation of the County Council's transport strategy.
- To provide new balanced communities that form part of Oxford
- Exemplar design requirements
- Provide for a range of household types and incomes. Good quality, realistically priced, low cost housing for purchase and rent must be prioritised.

- Ensure sustainable, affordable and convenient access to Oxford employment opportunities
- The Vision should deliver the key principles and use them to Masterplan high quality neighbourhoods that enhance the District and offset the loss of Green Belt.
- Make a clear commitment to meeting unmet housing needs in the most sustainable way
- Achieve a review of the Green Belt VS Protection of the Green Belt.
- Allow for the colocation of jobs and homes on an area wide basis
- Ensure that the day to day requirements of new residents in terms of facilities and services are met
- The most sustainable solution may not be Cherwell or indeed Oxfordshire. Consideration should be given to areas of the country with vacant employment land and less expensive housing
- Promoting the prosperity of the Oxford region as a whole
- Oxford's international ties and recognition should be a key focus of the vision.
- There must be provision of a range of employment opportunities suitable for a wide spread of abilities and skills
- Need to consider the Duty to Cooperate with other authorities not just Oxford.

How the identified issues have been taken into account

- The issues were taken into account in considering the draft Vision and Objectives for meeting Oxford's unmet housing needs in Cherwell in Section 5 of the Options Paper.

Defining an 'Area of Search' or Plan Area

Question 6: Do you agree that the 'area of search' or plan area for the Partial Review document should be well related to Oxford City?

YES

- Support for this, particularly where access to Oxford is sustainable.
- Yes, since the options are to meet Oxford's unmet need; anything else would not be sustainable development (Oxfordshire County Council)
- Yes, the relationship should be geographical, taking into account connectivity and accessibility to the city centre.
- The area of search should be well related to Oxford City and this means land closest to the City, but outside of the Green Belt, with excellent transport links and access to day to day services and facilities without significant travel (i.e. on the edge of existing settlements).
- The housing should be well related to Oxford City in a location that is well connected to the strategic transport network.

- The area of search should be within 5 miles of Oxford or within easy reach of frequent public transport with plenty of parking
- Yes this would enable development of the areas being served by the new Oxford Parkway mainline station.
- Meeting the need close to where it arises would be most sustainable
- There are transport and sustainability concerns in accommodating development at a distance from Oxford (i.e. Banbury). The focus should not be around Banbury but closer to Oxford.
- Yes, consistent with sustainable development (in terms of reducing commuter traffic) and minimising contributions to climate change
- Yes, to reflect economic links to Oxford and significant employment provision in Oxford.
- Yes, to avoid longer distance commuting
- Yes, with areas directly accessible to rail services into Oxford from either existing or potential new stations
- Yes, the scale of the housing need and the social and economic problems which would arise by not making provision close to Oxford provides an exceptional reason to review the Green Belt.
- District wide would be an irrelevance, the issue is to accommodate the large number of people who work in Oxford but cannot afford to live there. Otherwise the housing provision would not be likely to meet Oxford's housing need
- Yes, to do otherwise would run counter to the objectives of sustainability and risk undermining social cohesion by directing housing to some distance away from where needs are being generated.
- Yes, but Green Belt loss should be entirely justified.
- Yes, with Green Belt land swaps considered
- Yes, well related in terms of functional relationship and with connectivity and accessibility in terms of infrastructure and transport
- Yes but other considerations need to be taken into account, including the potential effects on the historic environment (Historic England).
- Yes, to reflect the catchment orders of higher order services at Oxford
- Yes, the new housing locations should have a strong relationship with Oxford and be on the knowledge spine, so as not to undermine the existing plans and strategies for Oxfordshire.
- Yes, and in particular, the Oxford Gateway could accommodate more housing, rather than eating further into Green Belt land.
- Yes, and more housing can be accommodated within Oxford.
- Yes, and a sieved approach undertaken with all sites considered but more constrained sites sieved out.
- The potential for an urban extension to Oxford or new garden village close to Oxford should be examined (accommodating the housing need in one location for ease of infrastructure provision).

- There are major infrastructure constraints at Bicester limiting future development potential.

NO

- It is not always possible, practicable or environmentally sustainable to concentrate the unmet need close to its source.
- Oxford is the major employment hub for the whole region; the area of search should include the whole district.
- Oxford should not be the sole driver
- Adjoining SHMA areas have also identified the pressures for additional development.
- The most sustainable settlements in Cherwell are located further away from Oxford City.
- New development should be located far from Oxford, but with highly efficient public transport links.
- Closer settlements i.e. Kidlington are constrained by the Green Belt

MAYBE/OTHER

- The existing Spatial Strategy is the most appropriate model
- Given that Cherwell are undertaking only a partial review it is important that the area of search is consistent with the adopted plan strategy which was found sound only last year.
- The tests should be how well different areas relate to Oxford. Accessibility to Oxford should be a key criterion
- Not necessarily, there will be different priorities in different areas i.e. protecting the Green Belt.
- No area of search needed. There is a single Housing Market Area within Oxfordshire. The entire Oxfordshire HMA is therefore well related to Oxford City.
- The area of search should be well related to Oxford City but not necessarily the area in closest proximity.
- Areas in close proximity to the City will not necessarily perform better than other areas which may be more conducive to sustainable travel
- Constraints should also be considered
- Close proximity but in combination with other sustainability factors
- No, growth should be directed beyond the County altogether
- Area of search should not rule out Green Belt release
- The Council should establish an effective, continuous ring fence policy area
- Meeting the needs of Oxford in Cherwell should deliver benefits to both the district and the City. There should therefore be the delivery of significant infrastructure.

- Concerns at potential conurbations being created in the south western part of the district around Oxford.
- Location/Site specific promotions made.

How the identified issues have been taken into account

- Section 6 of the Options Paper sets out the options identified for meeting Oxford's unmet housing needs which there are nine areas of search being considered.

Question 7: What factors should influence the 'area of search' or plan area for the Partial Review document?

- Site/location specific promotions made
- It should focus on existing settlements.
- Need to protect rural areas in Cherwell.
- The sheer number of homes required means an extensive area of search is required.
- Oxford is the major employment hub for the whole region; the area of search should include the whole district.
- The area of search should not be overly prescriptive
- Assessment of capacity within Oxford itself
- Sustainability of the location
- Opportunities to create new freestanding communities
- Proximity to Oxford (using Green Belt if required) (various including Historic England)
- Connectivity to Oxford.
- Provision of sustainable transport options particularly in terms of providing sustainable access to Oxford.
- Transport links to Oxford and key employment locations within the City (public transport, also walking, cycling)/transport corridors and the need to address existing connectivity issues (various including Historic England and Oxfordshire County Council)
- Existing commuting patterns
- Supporting the County's transport strategies
- Ability to deliver new (transport) infrastructure
- Cuts to bus services in rural areas should be taken into account, combined with a lack of road improvements to roads in the north of the County.
- Proximity to sources of employment and 'travel time', ensuring that economic efficiencies & quality of life are not affected by commuting.
- Local employment

- Economic links to Oxford, access to the employment market of Oxford
- Consideration should be given in defining the Area of Search to how housing growth could complement/support existing strategic employment locations and support economic growth as a direct benefit.
- The plan review should also consider unmet employment needs from the City.
- If employment generating development is provided alongside the new housing, then area of search could be wider (Historic England).
- Access to services and facilities
- Capacity
- The opportunities to deliver new housing including proposed infrastructure improvements.
- Accepting additional development is unlikely to be popular and it is important to address political opinion for example there may be opportunities for development to provide solutions to longstanding issues including through the delivery of 'game changing' infrastructure. Including the delivery of a regional scale sport and leisure facility.
- Proximity to existing allocations
- Functional relationship with Oxford
- Availability of unused brownfield land
- Potential for high density development
- Equitable growth across rural areas
- Environmental efficiency
- Planning policy considerations
- Green belt protection VS. using areas of the Green Belt that do not meet the five Green Belt purposes
- Housing affordability
- Physical constraints
- Environmental issues
- SEA
- Landscape value
- Social connections to Oxford
- Social and community facilities/ services such as education and catchment areas
- Cherwell settlement hierarchy
- Flood Risk
- Impact on heritage/historic environment (Historic England)
- Contribution to existing strategic priorities and the spatial strategy as well as other strategies such as the Oxfordshire Strategic Economic Plan, LTP4, Growth Deal, and City Deal which requires supporting connectivity along the knowledge spine.

How the identified issues have been taken into account

- Section 6 of the Options Paper sets out the options identified for meeting Oxford's unmet housing needs for which there are nine areas of search being considered.
- A list of identified sites is also provided in Section 6 of the Options Paper.
- The consideration of the areas of search is included in Section 7 of the Options Paper.

Question 8: Would a district-wide area be appropriate?

YES

- Support for and against this question
- Oxford is the major employment hub for the whole region; the area of search should include the whole district.
- The whole district should be considered but strategic allocations will be required, particularly in locations with the closest relationship to Oxford.
- The most sustainable settlements are not necessarily those closest to Oxford.
- Yes and as per the existing spatial strategy in terms of distributing growth to the most sustainable locations and protecting important areas.
- Yes and the Adopted Local Plan Part 1 provides an appropriate starting point and basis for considering the most appropriate distribution of sites across the District as per the established settlement hierarchy. A District wide approach will enable the potential for additional housing development to assist in providing other investment across the District in accordance with the hierarchy.
- Yes as one of the most sustainable locations in Oxfordshire (Banbury) is in the northern part of the district
- Yes, the District as a whole forms part of the Oxfordshire HMA and there is no specific requirement to identify sites that relate well to Oxford in order to deliver the additional housing required within the HMA. Proximity to Oxford must be weighed in the balance amongst many other economic, social and environmental factors including deliverability.
- The imposition of areas of search might close off options/locations within which growth can be sustainable accommodated and would be unduly limiting. Assessments of accessibility and connectivity should be considered.
- Yes, if employment generating development and other facilities and services are provided alongside the new housing (Historic England).

NO

- No, some areas of Cherwell do not relate well to Oxford (Oxfordshire County Council)

- No, access to Oxford from rural areas in the north of the County is difficult (with cuts to train and bus services and improvements needed to the road network).
- No, this would effectively increase the Local Plan Part 1 housing requirement still further, to levels which are unlikely to be achievable within the current spatial strategy.
- A district wide approach would displace the population
- It would increase potentially unsustainable transport journeys/commuting patterns back into Oxford
- No, the existing Local Plan seeks to reduce out commuting so development should be as close to Oxford as possible.
- It should reflect accessibility to Oxford as an employment centre.
- It would conflict with the Local Plan policy of restricting development in the rural areas
- Parts of the district have no great economic connection to Oxford
- This would put all parts of the district, at every tier of the settlement hierarchy, at risk of speculative development.
- Need should be met where it arises i.e. Oxford/close to Oxford.
- In locations already proposed for significant growth i.e. Banbury, Bicester, Upper Heyford, the market is unlikely to deliver significant additional housing to meet Oxford's unmet needs.
- Only if all suitable and deliverable sites close to Oxford have been appraised, and allocated where appropriate, should sites further from Oxford be considered.
- A district wide area of search would include the Green Belt, the boundaries of which should only be amended in exceptional circumstances.
- Parts of the district lie on the very periphery of the strategic housing market area.
- No, the area of search should be influenced by seeking to reduce commuting and protecting the rural areas of Cherwell.
- The Area of Search should concentrate on the Oxford Fringe where infrastructure is more readily available in order to ensure that rural infrastructure does not become overstretched.
- An Area of Search approach would provide a more pragmatic and manageable solution as well as providing certainty to the areas that will be subject to additional development pressures and so that the established spatial strategy of the Local Plan Part 1 can be preserved.

MAYBE/OTHER

- The potential for an urban extension to Oxford or new garden village close to Oxford should be examined (accommodating the housing need in one location for ease of infrastructure provision).
- Sites should be suggested anywhere in Cherwell, but priority should be given to locations within 5 miles of Oxford City

- A District wide area of search is appropriate however an initial sieve map approach will quickly rule out certain areas due to environmental constraints or the lack of infrastructure
- There should be a focus on utilising brownfield land
- Although a district wide area may not be appropriate, there is justification for an area of search wider than the southern part of the district.
- Only if improvements to road infrastructure are made and the modal shift detailed in LTP4 achieved.
- To be determined by the Sustainability Appraisal
- Scope for further allocations around Banbury and Bicester is limited and questionable in terms of actual deliverability. The alternative is other strategic locations, lower tier settlements, or sites located in the Green Belt.
- In the locations already proposed for significant growth – Banbury, Bicester, Upper Heyford – the market is unlikely to be able to deliver significant additional housing to meet Oxford's unmet needs (Oxfordshire County Council)
- A variety of sites in the widest possible range of locations will meet the widest possible demand and therefore maximise delivery. The extent of the unmet need and the immediate urgency of doing so means sites must be deliverable in the short term.
- It may well be the case that multiple Areas of Search are identified, responding to appropriate development opportunities.
- Site specific promotions made.

How the identified issues have been taken into account

- Section 6 of the Options Paper sets out the options identified for meeting Oxford's unmet housing needs for which there are nine areas of search being considered.
- A list of identified sites is also provided in Section 6 of the Options Paper.
- The consideration of the areas of search is included in Section 7 of the Options Paper.

Question 9: Should an area based on the Oxford Green Belt be considered?

YES

- Yes, site/location specific promotions made.
- Yes, re-evaluate what is set aside to produce a better mix of open spaces and urban edges.
- Yes, far more environment harm is being created by commuting into Oxford than any benefits of keeping the Green Belt particularly land which no longer fulfils the purposes of designation. Instead, rural belts should be defined around the rural settlements in the district.

- Yes, the Green Belt has been one of the principal inhibitors of the natural growth of a dynamic city.
- Incursion into the Green Belt is required to deal with housing shortages and traffic congestion.
- Yes, the Green Belt continues to restrict the location of development in what is the most sustainable and logical location i.e. close to Oxford City
- Yes to reduce commuting distances from Oxford – proximity and transport links and promote sustainable patterns of development.
- Yes, the Green Belt land in Cherwell is well situated to provide new homes for workers at Oxford's key employment hubs along the Knowledge Spine.
- Yes, the Green Belt in the Kidlington area is a major transport interchange particularly with the new development of Oxford Parkway station which has been constructed with sufficient capacity to support growth in the local area.
- Yes but only to the extent that siting development in the Green Belt does not lead to significant and demonstrable harm which undermines the very purpose of designating land as Green belt – prevention of urban sprawl.
- Yes following Cambridge's successful examples.
- Yes with a focus on linear development in existing corridors which already impact on the Green Belt.
- Yes with potentially the use of Green Belt land swaps/replacement elsewhere to maintain its function in restricting urban sprawl
- Parts of the Green Belt have lost their green nature over time and development in these areas would be better than in more rural parts of Oxfordshire.
- Yes, certain parts of the Green Belt contribute less to its functions and purpose than others.
- Green Belt boundaries are due a review, it is 40 years since designation.
- Yes, LUC's Green Belt Study identified where locations make limited contributions to some of the Green Belt purposes. A more refined study of the Green Belt is now required.
- Yes the Green Belt is a clearly defined geographic area, close to Oxford, and is the obvious 'area of search'.
- Yes, there are clear exceptional circumstances for Green Belt Review.
- Yes, with a focus on the inner boundaries adjoining the built edge of Oxford City
- Yes as per the Inspector's recommendations
- Yes, in order to accommodate the growth required and for the Partial Review to be 'positively prepared' and therefore sound.
- Yes particularly where growth could help to support the sustainability of a settlement within the Green Belt.
- Yes, protection of the 'Kidlington Gap' is no more important than preventing coalescence between other settlements in the district (which is not always achieved). Prevention of coalescence should be applied to all Category 1 villages.

- Yes, as a preference over development at villages being consumed by towns i.e. Bodicote/Banbury.

NO

- Oxford is the major employment hub for the whole region; the area of search should include the whole district.
- No. Individual small scale housing supported in small Green Belt villages but not large scale estates in the Green Belt. Woodeaton Quarry should be restored as agricultural land and not used for housing. Any mass building on the Oxford Green Belt will make transport problems in and around the city worse.
- Development in southern Cherwell could impact the Green Belt so there should be clear justification for this.
- Strong objection to any development on the Oxford Green Belt: the Green Belt has a very special function, in Cherwell as elsewhere, to protect the countryside and open and green spaces and to act as a buffer against the spread of urban development and coalescence between settlements. In Kidlington, the Green Belt surrounding the village is precious and highly cherished by the community for its health, environmental, visual, and recreational value.
- Development around Kidlington would be unsustainable particularly in the Kidlington gap.
- The Kidlington gap serves to prevent coalescence
- This would open the door for further encroachments on the Green Belt
- Undermines the permanence of the Green Belt
- National policy says that housing need is not a reason to build on the Green Belt
- The Government has made a commitment to protect the Green Belt
- If there are opportunities to jump the Green Belt to deliver the necessary housing and associated development, these should be explored before the Green Belt is reviewed.
- No, there should be more review of the housing potential within Oxford before Green Belt is considered for housing.
- All Green Belt parcels contribute to the purposes of the Green Belt therefore justifying its original designation.
- An area of search based on the Green Belt would not necessarily lead to options which have good accessibility to public transport services to Oxford Centre and key employment locations within the city. The area of search should include Green Belt land within transport corridors through the Green Belt but should not be contiguous with the Green Belt boundary (Oxfordshire County Council).
- No, the area of search should be district wide and in conformity with the existing spatial strategy i.e. Banbury and Bicester. An 'addendum' to the Local Plan Part 1 should be in conformity with that plan, and a full strategic review of the Green Belt could result in an entirely new vision and strategy and be unsound.

- No, ample opportunities exist for housing in areas beyond the Green Belt.
- No, eroding the Green Belt would take benefits away from future generations that they would otherwise have enjoyed hence unsustainable.
- Green Belt land around Kidlington is used for recreation; loss of this land to housing would increase obesity.
- No, because the housing need arising is not Oxford specific, it arises from hypothetical future jobs which could be realised anywhere.
- No, this would lead to unrestricted sprawl, contrary to national policy
- No as per the Local Plan Inspector, he did not indicate that the Partial Review should be focused only the Oxford Green Belt.
- No, the area of search should take in the whole District and the Green Belt should ideally be excluded from the search areas altogether. The importance of the Green Belt particularly in terms of preventing settlement coalescence (and linked to this the protection of village identity) is noted in the consultation paper.

MAYBE/OTHER

- Green Belt land could be considered, informed by a review, but not where development would be using best and most versatile agricultural soils (Natural England)
- It should be ensured that any options put forward within existing Green belt land are in fact viable options for development in order to accord with the NPPF (Natural England)
- It is clearly important to maintain the Green Belt to ensure that urban sprawl is controlled and coalescence does not occur, but a Green Belt review must be undertaken to consider if the designation is fit for purpose.
- Continued work should be undertaken by the Oxfordshire Growth Board to determine the potential release of some of the designated Green Belt land. Await further progress of the Oxfordshire Growth Board work first prior to use of Green Belt land for housing.
- The Oxfordshire authorities should take a closer look at the submarkets within the Oxfordshire HMA and define the 'area of search' or plan area from this.
- Oxford Green Belt constrains the potential to meet the 'objectively assessed needs' and this is a valid constraint.
- Green Belt is not the only reasonable alternative to consider.
- Green Belt locations should not be automatically excluded from consideration; this must be weighed in the balance of all relevant factors. Green Belt releases should only be considered where alternatives have been exhausted including brownfield sites, which should be prioritised over greenfield land, and which are shown to be suitable, deliverable and achievable.
- Concern that the Oxford Green Belt Study by LUC categorises parcels of the Green Belt surrounding Oxford with an OX prefix rather than a Gosford and Water Eaton/Cherwell District prefix (Gosford & Water Eaton Parish Council).
- Historic England should have been consulted on the Oxford Green Belt Study given their remit & the purposes of the Green Belt which includes preserving

the setting and special character of historic towns. The consideration of impacts on the historic environment should inform the allocation of sites (references made to sources of further information) (Historic England).

- The Area of Search shouldn't be narrowed too far; broad areas should be considered initially even if later discounted based on constraints (Natural England).
- The Partial Review needs to give weight to the Government's position on protecting the Green Belt, on the NPPF presumption against development of the Green Belt, on the recommendations of the Oxford Green Belt Study regarding minimising harm to the Green belt, and the Inspector's view that Kidlington's housing need can be addressed without Green Belt review, and to the Local Plan's spatial strategy and objectives.
- If an area based on the Green Belt is selected then the contribution of a site to the purposes of the Green Belt will obviously be a major issue (Historic England).
- Site specific promotions made.

How the identified issues have been taken into account

- Section 6 of the Options Paper sets out the options identified for meeting Oxford's unmet housing needs for which there are nine areas of search being considered.
- A list of identified sites is also provided in Section 6 of the Options Paper.
- Section 6 explains that the starting point is the whole district which falls wholly within the Oxfordshire Housing Market Area.
- The consideration of the areas of search is included in Section 7 of the Options Paper.
- Paragraph 7.29 and 7.30 states that all areas of search should proceed as reasonable options and that options in the Green Belt must be considered to be reasonable due to their proximity to Oxford but noting the national test of 'exceptional circumstances' in order to release land from the Green Belt through a Local Plan.

Key Themes:

Housing

Identifying a Deliverable and Developable Supply of Land

Question 10: Should a specific housing supply be identified for meeting Oxford's needs with its own five year supply of deliverable sites?

YES

- Essential for accountability

- Yes in accordance with the NPPF
- Yes to avoid prejudicing Cherwell's own five year supply. In the event of no 5 year land supply, it would be inappropriate for the unmet need to then be met in areas within a poorer relationship with Oxford.
- Yes, a ring fenced approach should be taken as per South Oxfordshire District Council and the Vale of White Horse for housing growth in Science Vale. In order to operate a ring fence, the homes should be located in as few locations as possible.
- A specific housing supply approach should be followed, and this must be limited to the geographical area of search identified as having a strong relationship with Oxford. Sites close to Oxford have a good prospect of delivery
- Oxford City's need cannot be allowed to influence Cherwell's five year supply. The priority for Cherwell should be meeting its own identified housing needs.
- Failure to distinguish will put all settlements at risk from more development and result in a free for all
- This would enable developments aimed at meeting the distinct housing needs of Oxford and Cherwell District to be effectively monitored
- Yes, given that new specific sites are being identified to meet the need then a specific housing supply calculation is required
- Yes, and met in an area outside of Cherwell.
- Yes, but only for monitoring purposes.

NO

- Examples given of similar situations elsewhere (appeal decisions in Devon and Leicester) where the Inspector has made no argument for disaggregation of housing supply into sub areas.
- Once the apportionment has been agreed, CDC should review its housing target in the Local Plan to reflect the additional need, & there should be a single housing target for Cherwell. The 5 year housing supply calculation would be reviewed and the unmet need would become CDC's responsibility to deliver.
- Both Cherwell's housing need and its proportion of Oxford's unmet need are to be met within Cherwell's administrative boundary and the need figures should be combined and planned comprehensively through a single approach over the Plan period.
- The NPPF does not set out any justification for anything other than a district wide 5 year supply calculation. Housing needs must be met in full across the housing market area. The additional requirement arising from the Duty to Cooperate forms part of the full objectively assessed need and should not be treated differently from other housing need.
- Given that Cherwell lies within the Oxfordshire HMA in its entirety then the delivery of units across the whole of Cherwell District will contribute to meeting Oxford's unmet housing need.
- Cherwell and Oxford's housing needs are not distinct but are overlapping.

- A separate housing land supply figure would delay housing delivery.
- Essential to ensure the land supply calculation is a comprehensive figure
- This would be a simplistic and unrealistic approach to a complex matter
- This would not be appropriate, housing should be delivered on an overall basis
- The partial review period is the same as the plan period (to 2031).
- Overall District delivery level should be increased
- Any split would be artificial and difficult to monitor in terms of the need they are addressing; sites in the District are likely to contribute to both housing needs at a District level and those in the wider Housing Market Area.
- It cannot be known which houses have been occupied by whom.
- Housing need is housing need whether it is Cherwell or Oxford generated; it would not be appropriate to limit occupation of the 3,500 houses to those that have a local/familial/economic link to Oxford.
- One housing market area has been identified. Both authorities form part of the same market area and the need of Oxford is already affecting the availability and affordability of housing in Cherwell District.
- Existing allocations could contribute towards Oxford's unmet housing need and additional sites identified could in fact contribute towards Cherwell need
- Particularly difficult to monitor a split housing supply calculation for windfall sites.
- Would require strict regulations to avoid double counting
- A comprehensive approach is required to support the assessment, planning, funding and delivery of infrastructure.

MAYBE/OTHER

- Even if combined into one housing requirement, it is quite possible that sites will come forward early in the plan period and enable a good supply of deliverable and developable sites (Oxfordshire County Council). Build rates could exceed those identified within the Housing Trajectory of the Local Plan Part 1.
- No specific supply should be identified until a 'need' has been properly demonstrated and all other solutions investigated and found unachievable.
- All of the 15,000 homes required to meet Oxford's unmet housing need should be allocated to a separate Oxford Fringe requirement. The Oxford Fringe should be a geographically defined, cross boundary area around the current boundary of Oxford (across authority boundaries).
- The housing land requirement would be set across the districts, based on a spatial strategy, with a shortfall in one being addressed in the policy areas.
- Conversely another representation considers that this would new additional housing need area 'ghettoise' one particular area around Oxford.
- The formulation of a separate land supply would need to be consistent with the evidence base underlying the SHLAA.

- Oxford is the major employment hub for the whole region; the area of search should include the whole district. The potential for an urban extension to Oxford or new garden village close to Oxford should be examined (accommodating the housing need in one location for ease of infrastructure provision).
- Need additional information to be fully clear on the exact detail of Oxford's unmet need. Also need more information on whether infrastructure costs would be associated with the city council or the district. Cherwell should be flexible at this stage.
- There should be one figure for housing land supply purposes- one higher OAN number including Oxford's unmet need, and Cherwell's housing requirement with a 20% buffer.
- The overall housing target for Cherwell should also be reviewed to ensure it is up to date and spans a 15 year time horizon as per the NPPF.
- Would prefer integrating housing and employment land that is allocated into the approved Cherwell Local Plan in stages.

How the identified issues have been taken into account

- These responses were considered in preparing Section 8 of the Options Paper which sets out the delivery options for meeting Oxford's unmet housing needs including the implications of the five year housing land supply.

Question 11: How could Cherwell ensure that a five year supply for Oxford is managed without the existing Cherwell strategy and its housing requirements being adversely affected?

RING FENCE/DISAGGREGATE etc

- Adopt a ring fenced approach (various including Oxfordshire County Council) and limit it to the area of search or plan area. This would avoid impinging on the existing strategy.
- Example given of the ring fencing of one spatial area in South Oxfordshire.
- A clear separation would avoid a free for all across the district.
- Cherwell should remain in control of its own destiny especially its five year land supply. Essential that Cherwell's own strategy is insulated from the separate needs of Oxford.
- The most important thing is that Cherwell's ability to meet its own five year obligations is not undermined. One combined requirement could make meeting the supply requirements so onerous such that the ability to demonstrate a five year housing land supply cannot be achieved. This puts all settlements at risk from speculative developments.
- A separate, ring fenced approach limited to one geographical area would be complementary to the implementation of the Local Plan Part 1 with its proposed growth and Banbury and Bicester.

- The area of search approach may provide a geographically separate area within which requirements relating to Oxford's unmet need can be applied and an appropriate and separate land supply calculation established.
- The separate monitoring of land supply in relation to Oxford's needs could tie in with the geographical area of the Green Belt as currently this contributes little to meeting housing needs.
- A separate housing land supply calculation will prevent meeting the needs of Oxford from adversely affecting the existing Cherwell strategy.
- Cherwell must ensure that it can demonstrate a five year land supply for both housing needs – Cherwell's and Oxford's unmet needs. This requires a range of sites across the plan period.
- A pragmatic approach to delivering development must be undertaken, there should be no delays to delivering housing whilst the Partial Review progresses.
- To ensure that a five year supply for Oxford can be managed without conflict with the Cherwell strategy, sites would need to be identified as separate to those already allocated

COMBINE INTO ONE HOUSING REQUIREMENT etc

- Once the apportionment has been agreed, CDC should review its housing target in the Local Plan to reflect the additional need, & there would be a single housing target for Cherwell. The 5 year housing supply calculation would be reviewed and the unmet need would become CDC's responsibility to deliver.
- If not combined into one housing delivery target, the integration of new housing and communities will not be satisfactory
- Disaggregation is unrealistic
- By adopting an integrated strategic approach, linked to effective delivery, to meeting both needs.
- Aggregation is required to achieve NPPF objectives to encourage sustainable development to boost housing supply and address current supply failings.
- The urgent need for new housing relating to Oxford City is already affecting Cherwell and the surrounding areas in terms of affordability.
- The point of the Partial Review is to integrate the extra housing provision to become a part of the Cherwell strategy.
- There are no separate housing market areas within Cherwell.

OTHER

- Site promotions made.
- Disagreement with the question
- The potential for an urban extension to Oxford or new garden village close to Oxford should be examined (accommodating the housing need in one location for ease of infrastructure provision). Development in the Bicester area should

be limited for infrastructure reasons (Highways, Power supply and Foul water capacity).

- Alternatively the housing land requirement would be set across districts, based on a spatial strategy, with a shortfall in one being addressed in the policy areas.
- Any increase in the rate of development around Oxford will only worsen the infrastructure situation.
- Duty to cooperate is not obligation to accept housing. Cherwell should say no.
- If an area of search with Oxford City is identified then it should meet Oxford City's need only.
- Only allow development in parts of Oxford's Green Belt with sites close to Oxford prioritised.
- To assist the housing land supply, CDC should allow for flexibility in changes of use from employment to residential. This will reduce pressure on greenfield land. There is sufficient protection of employment land.
- Development should be directed to where the services and infrastructure are
- The Green Belt should be built on and replaced elsewhere
- Consider building on some of the open spaces around Oxford.
- The best strategy is to delay until more detail on the housing need is established. i.e. meeting unmet housing needs should be phased to the final 10 years of the plan.
- Evidence – More evidence required. Cherwell can, through the Oxford Growth Board, determine more objectively the locations within which job growth might occur and therefore where housing will be needed. The implications for five year housing land supply should be carefully considered after the Oxfordshire Growth Board's recommendations in September 2016.
- There should be flexibility to allow for districts to make contributions to the unmet housing need when they have the availability to do so.
- The range in a choice and sizes and types of sites will enable Cherwell to bring sites forward earlier in the plan period to address housing land supply issues. Smaller sites are not subject to long lead in times. The potential to expand upon existing strategic allocations should not be overlooked.
- Given the high level of housing need it is unlikely that the existing Cherwell strategy will be adversely affected by ensuring that there is also a five year housing land supply for Oxford's unmet need.
- It is important that a range of sites receive full and proper consideration, recognising the contribution of smaller sites to the early delivery of homes which address short term housing need in combination with larger strategic/mixed use sites.
- Site specific promotions made.

How the identified issues have been taken into account

- These responses were considered in preparing Section 8 of the Options Paper which sets out the delivery options for meeting Oxford's unmet housing needs including the implications of the five year housing land supply.

Housing Issues

Question 12: Do you have any comments on the housing issues identified above?

- Oxford Brookes University supports the proposals which would provide a partial solution to Oxford's chronic shortage of affordable housing.
- The scale of unmet housing needs still has to be justified.
- Villages that have experienced new housing development recently should not be asked to take any additional housing intended to cover Oxford's needs.
- The NPPF highlights that new housing can sometimes be best achieved through planning for larger scale development, such as new settlements or extensions to existing villages and towns. This should apply to Oxford.
- New housing will not necessarily meet Oxford's needs; there is already competition for housing stock in the area from commuters to London, Birmingham and places inbetween.
- Transportation infrastructure is already inadequate and more housing can only make it worse.
- There should be more explicit emphasis on access by public transport (Oxfordshire County Council).
- All the housing issues identified in the consultation paper should be taken into account. Planning policies should be based on robust evidence and meet housing needs in full, in a sustainable manner.
- There is no shortage of brownfield sites ripe for development in Oxford.
- It is likely that there will be more vacant retail units in future given changes to shopping patterns which could be used for housing
- There is an increased need for more sheltered housing for older people to free up homes for families. Such developments must be near public transport.
- It is inescapable that locations with good transport links and close to Oxford need to be pursued.
- Affordable housing needs to be planned as part of a balanced mix of housing. The severity and long standing nature of the affordable housing crisis in Oxford, and the impact this has on the local economy, needs to be recognised.
- The shortage of housing in Oxford is constraining its economic potential.
- The Council should pursue Starter Homes alongside the other traditional forms of affordable housing. The unaffordable nature of Oxford is acting as a barrier to the retaining and recruiting of workers.

- Oxford's housing requirements (i.e. mix, tenure) are different from the needs of Cherwell residents. Research quoted on household types in Oxford. It will be a challenge to replicate this range of housing in the more rural environment.
- Particular agreement with the key housing issues for rural areas as identified in the consultation paper.
- There should be no deviation from the Local Plan Part 1.
- Housing need should be met close to where it arises. The housing demand pressures are greatest in Oxford.
- The potential for an urban extension to Oxford or new garden village close to Oxford should be examined (accommodating the housing need in one location for ease of infrastructure provision).
- Conversely, wider areas of the district have good public transport links and high levels of sustainability and warrant consideration for new housing.
- There are infrastructure constraints in the area immediately surrounding Oxford.
- More sustainable settlements elsewhere in the district are less constrained by the Green Belt.
- Category A villages which are the focus for development in the rural areas under the Local Plan Part 1 do not necessarily have capacity to accommodate additional development. This risks undermining the Local Plan strategy.
- A flexible approach should be taken to changes of use from employment to residential use.
- The use of Green Belt land for housing should be avoided. Green Belt land designated to prevent coalescence.
- Avoid a piecemeal approach to development.
- If housing is the issue, focus on housing development and limit employment development.
- The use of the word 'sprawl' is ambiguous and should be avoided, given that well planned extensions to settlements can be designed to cause minimal impact on, and potential enhancement to, the setting of affected settlements.
- Paragraph 5.34 in this section states that the Former RAF Upper Heyford is not situated on an A road, but this does not acknowledge that it is well located for access onto the A43 from the east and the A4260 from the west and therefore the primary highway network for the main part of any journey to Oxford, as well as being in proximity to the rail station at Lower Heyford.
- Site/location promotions made.

How the identified issues have been taken into account

- These issues were considered when developing the draft Vision and Objectives in Section 5 and identifying the areas of search in Section 6 of the Options Paper.

Question 13: Are there any additional issues that Cherwell District Council needs to consider?

- The consideration of issues is heavily focused on existing issues but consideration needs to be given to future issues at the point of adoption of the partial review as well as beyond the plan period, when the need for housing near the Oxford City boundary will be increased.
- All the housing issues identified in the consultation paper should be taken into account. Planning policies should be based on robust evidence and meet housing needs in full, in a sustainable manner.
- If Cherwell is having to accommodate housing for Oxford, a financial contribution should be made towards additional costs incurred in the process and infrastructure
- Residents feel let down by planning/District Councillors.
- CDC should promote design codes and emphasise the importance of making development sites/area attractive in terms of design. An independent design review panel should be created.
- Higher density housing should be provided in the vicinity of transport hubs.
- Provide less expensive/starter housing at higher densities.
- The consultation document makes no reference to Neighbourhood Plans and the potential for the Oxford overspill to render existing plans out of date/undermined.
- More community engagement needed.
- Increase the standard of new development to create exemplar development
- The impacts of the use of greenfield land for housing can be mitigated through efficient use of land, and good design and masterplanning.
- Cherwell and Oxford's housing needs are so different (i.e. in terms of student population) so is it likely that providing housing away from Oxford will actually help to address the housing shortfall in the City?
- The Partial Review must build upon what is good and sound in the adopted Plan. Consistency with the adopted plan should be key.
- Oxford's relationship with London should be considered in terms of the amount of housing required and where it should be accommodated. An increase in out migration from London is already very likely.
- The summary of housing issues does not recognise the transport corridors to which the Kidlington, Yarnton and Begbroke area are related including the railway, canal and A44 as well as the good public transport links.
- The conservation of the historic environment and heritage assets (Historic England).
- Concerns that accommodating additional housing will cause coalescence and cause villages to lose their identity, district wide, but particularly in the south of the District.
- Housing provision should be informed by wider transport issues and the strategy set out in the LTP.

How the identified issues have been taken into account

- These issues were considered when developing the draft Vision and Objectives in Section 5 and identifying the areas of search in Section 6 of the Options Paper.

Housing Objectives

Question 14: What are the specific housing objectives for meeting Oxford's unmet needs within Cherwell that we need to consider?

- CDC should receive funding from Oxford to create the infrastructure required.
- Detailed representation proposing a number of housing objectives including promoting mixed communities, improving affordability, bringing forward new housing in areas with good socio-economic and transport links to Oxford City, and providing sufficient infrastructure.
- Affordability a key issue
- High densities are required
- Flats are appropriate for some housing needs
- Housing mix needs to be appropriate taking Oxford and the relevant areas of Cherwell together, not just replicating the housing mix within Oxford. Housing market in Oxford different to Cherwell.
- The type of housing to be provided can be controlled through planning applications rather than through a separate policy category which reflects Oxford's differing housing needs.
- Housing mix should accord with the findings of the SHMA
- Proximity to (sustainable) transport links
- Proximity to sources of employment
- Proximity to services and facilities
- Disagreement with housing needs figures
- Oxford needs to consider all reasonable options to accommodate its own needs
- Objectives as per the Local Plan Part 1
- Need to ensure that travelling and carbon footprints are kept to a minimum.
- Improve public transport
- New housing should be of exemplar design which integrates well with Oxford, ensures convenient sustainable access to the whole of Oxford, with a balanced housing mix, significant affordable housing, and incorporation of low carbon technologies.
- New housing to meet accessibility standards
- New housing to meet internal space standards
- Include provision for super-fast broadband

- Include provision for vehicle charging points for all new dwellings where parking is provided.
- Housing sites should be well related to Oxford
- Increased commuting to Oxford would result from distributing additional housing and employment across the District.
- Key objectives should focus on not making existing traffic problems worse
- Housing sites should offer opportunities to preserve and enhance key environmental and heritage assets
- Sustainability of location in terms of capacity
- Maintenance of the Green Belt and preventing urban sprawl of Oxford.
- Housing development should provide funds for new services and facilities/improvements to existing.
- Need to not unacceptably affect Cherwell's natural, built and historic environment (Historic England).

How the identified issues have been taken into account

- These issues were considered in preparing Section 5 of the Options Paper which sets out the draft Vision and Objectives for meeting Oxford's unmet housing needs in Cherwell.

Housing Locations

Question 15: What locations should the Council be considering for the identification of strategic housing sites to meet Oxford's unmet needs?

- Full list of sites submitted as representations to the Partial Review consultation is available at Appendix 7.

GENERAL COMMENTS

- Promote the creation of sustainable new communities and avoid dormitory locations.
- Linkages to the growth locations within the adopted strategy (Local Plan Part 1)
- What is meant by strategic sites?
- Sites for the Partial Review should adhere to the Local Plan Part 2's maximum of 99 dwellings. All strategic sites form part of the Local Plan Part 1.
- The Council should not rely on strategic sites of a significant size but should instead distribute growth to distribute impacts.
- Sustainability of the housing location should be considered including its location in the settlement hierarchy

- Locations must accord with the strategy and the settlement hierarchy set out in the Local Plan Part 1.
- Availability (ownership) and deliverability of sites.
- Ability of the local housing market to absorb higher build rates
- The potential for an urban extension to Oxford or new garden village close to Oxford should be examined (accommodating the housing need in one location for ease of infrastructure provision). Development in the Bicester area should be limited for infrastructure reasons (Highways, Power supply and Foul water capacity).
- Suggest locating new housing as far from Oxford as possible to discourage commuting/travelling into Oxford city.
- Conversely, housing need should be accommodated as close as possible to where it arises
- No site should be in an unsustainable location. All should be within easy reach of public transport links which should have adequate parking spaces, or should have physical proximity to Oxford (walking, cycling). Aim should be to reduce the need for travel and to improve air quality.
- Accessibility not just to the centre of Oxford but to a range of locations within Oxford.
- Proximity to employment and provision of employment
- Proximity to existing transport infrastructure including Oxford Parkway station.
- Proximity to Oxford.
- Oxford should look to its own Colleges to supply land for housing within its own boundaries.
- As per sources of evidence which have not yet been completed.
- Wherever adequate infrastructure is available or can be provided. Bus services are not secure.
- Locations must take account of existing infrastructure and capacity for improvements.
- Provision of new infrastructure and facilities
- Sites of low agricultural land value
- Sites with no major constraints for example in terms of flooding
- Constraints in terms of ecology
- Opportunities presented by natural resources i.e. Oxford Canal
- Historic environment constraints
- Growth areas should be identified across the district, focusing on key settlements as identified in the settlement hierarchy. The growth areas should have good links to Oxford City, such as Bicester
- Sites should be adjacent to existing larger settlements
- Sites & locations informed by a review of the Green Belt according to the purposes of including land in Green Belt. Sites/land closest to Oxford should

be prioritised. Conversely, locations should be determined by protection of the Green Belt.

- Sites should be located along transport corridors which have existing, planned or potential fast and frequent public transport services to Oxford City Centre and to key employment locations within the City and locations which would encourage cycling and walking as a mode of travel to and/or within Oxford (Oxfordshire County Council)
- Should take into account safeguarding of sites for minerals resources and infrastructure and waste management infrastructure (Oxfordshire County Council)
- Growth should be directed to the main towns in Cherwell where substantial infrastructure investment is already planned, and to villages with due consideration afforded to their size, service provision and relative connectivity/accessibility to Oxford.
- Banbury and Bicester are already the focus of growth in the Local Plan Part 1 and locating additional development there is not appropriate as they will not be delivered in the short term. Kidlington offers scope for new development. Sites on the edge of the sustainable larger villages can complement the large scale sites allocated in the adopted Local Plan. They are often free from constraints, can be delivered quickly, and without major investment in new infrastructure.
- Locations which would not unacceptably affect the District's natural, built and historic environment.

How the identified issues have been taken into account

- These issues have been considered in preparing Section 6 of the Options Paper which sets out the options identified for meeting Oxford's unmet housing needs including the nine areas of search being considered.
- A list of potential sites is also provided in Section 6 of the Options Paper.
- Sections 6 and 7 explain that the starting point is the whole district which falls wholly within the Oxfordshire Housing Market Area. The Paper explains that it is reasonable to consider the Oxford Green Belt due to its proximity to Oxford.

Transport

Question 16: Are there any transport issues you would like to raise?

- Capacity improvements needed for A43 and improved access to Junction 9 of M40
- Suggest upgrading the A34 and the Oxford ring road to 3 lanes
- There should be improved access from the ringroad to Oxford City at key points i.e. to serve the JR hospital.
- Support for the provision of a new junction on the M40 to the south of Junction 9.

- Sustainable travel could be enhanced by a station on HS2 on A43 between Bicester and Brackley.
- No development should commence until the Oxford-Bicester train line is operational.
- Additional development should be located along the Cambridge-Oxford Expressway.
- Sustainability issues can be addressed via policies in the Local Plan (Pt1 & 2) and SPDs.
- Recent transport improvements i.e. Oxford Parkway have made traffic congestion worse with more people trying to get through Kidlington in rush hour.
- Additional housing will only make Oxford's traffic problems worse.
- Propose introducing congestion charging in Oxford
- Need to promote more and safer cycle routes
- Promote the use of trams in Oxford
- Reinstate rail links from Witney, Thame & Abingdon and rail links between Banbury & Kidlington.
- Some commercial operations at Oxford London airport would support the local economy.
- Do not support distribution hubs at motorway junctions.
- There is a need for public transport improvement across the district including closer working across a range of stakeholders
- Public transport improvements in areas accommodating Oxford's housing overspill must be funded by Oxford
- Relief Road required for Banbury
- Concerns that rail electrification will temporarily increase traffic problems at Banbury
- Additional housing in and around Kidlington will exacerbate traffic problems in Kidlington.
- Additional housing to serve Oxford's employment needs outside of Oxford would worsen commuting pressures.
- New housing development should not take place without improved sustainable transport capacity including improvements to bus networks, improving links between residential areas, key employment, leisure and retail destinations and rail stations.
- It is inevitable that residents of the new housing will commute into Oxford so the focus should be on improving bus & train capacity & parking outside of Oxford.
- Support new Park & Ride sites but do not support moving existing sites away from Oxford. The loss of Water Eaton would be a retrograde step.
- To help reduce commuting, new housing development should be accompanied by employment development.

- To help reduce journeys, new development should be located as close to Oxford as possible
- To alleviate traffic problems it is essential that additional housing is located to allow sustainable access to a range of key facilities and services.
- The area surrounding Oxford gives much better prospects for acceptability and deliverability in transport terms, compared with more remote locations where transport mitigation would be far more costly and would do less to encourage private car use for travel into Oxford and elsewhere.
- Concerns there are no specific clear proposals for transport improvements
- Predicted transport impacts are not based on correct evidence
- Updates to the evidence base documents listed are highlighted i.e. the County Council's Park & Ride Study is now underway; the East West rail connection with Milton Keynes is now due to open from 2019 (Oxfordshire County Council).
- LTP4 requires review in light of the increase in housing numbers
- Not clear how the Partial Review fits with County Council transport strategies.
- Concerns at cuts to bus services
- Transport opportunities should be recognised i.e. at Upper Heyford
- Rail services should be supported over bus services which are too slow and expensive for commuters
- Space needs to be reserved for high quality rapid transit
- The provision of safe, segregated cycle lanes should be designated from the outset.
- There is no reference in the consultation paper to freight and distribution related transport, there is a sole focus on the movement of people and this should not be at the expense of also considering the needs for transport connectivity to enable the movement and storage of goods and materials. There is also a need for sites for such uses.
- Transport infrastructure in and around Bicester is due to be upgraded significantly.
- Good accessibility is essential for staff retention and recruitment
- Dispersed housing at a distance from Oxford, generating car borne trips, will have negative impacts on congestion, carbon and air quality.
- The location of housing at settlements around Oxford could transform the transport accessibility of these settlements including improving the quality and availability of public transport options with potentially a new Park & Ride at Begbroke; facilitating the delivery of Mass Transit on the A44 by increasing the travel demand generated by a fully built out Begbroke Masterplan; a new railway station at Begbroke, and upgrading traffic-free cycle routes into the city centre.
- There should not be reliance on the measures in LTP4 (Bus Rapid Transit system and proposed new Park & Ride sites) coming forward. Even if these do come forward, they are unlikely to substitute the need for new housing to be located close to Oxford.

- Concern about the accuracy of traffic modelling techniques
- Want more information on the proposed transport improvements particularly regarding Junction 10
- Concern at the transport impact of new development (commuting) on towns and rural villages and high levels of traffic through small villages.
- Concern that transport projects are not thought through i.e. Oxford Parkway causing parking problems within the centre of Kidlington by commuters seeking to avoid paying for parking by using free parking in the centre.
- Developer funding should be used to improve amenities for passengers at railway stations particularly at Bicester North and Banbury stations.
- Transport improvements required across the district with Government funding.

How the identified issues have been taken into account

- Transport issues are considered in the Initial Transport Assessment and in the Initial Sustainability Appraisal, October 2016 (PR22 & PR23) and in the consideration of Areas of Search and potential strategic development sites.

Question 17: How do these issues affect the potential development locations to meet Oxford's unmet needs?

- Existing problems on the A40, A34 and A34 highlight the need to plan new development close to existing infrastructure and services in order to reduce the need for travel. Sites in proximity to Oxford City Centre and its associated road and rail network are highly favourable development locations.
- The residents of the new homes will commute into Oxford; it is essential to protect existing residents from the intrusion and pollution of this commute by providing extra bus and train capacity and sufficient extra parking outside Oxford.
- The issues emphasise the need to locate development close to Oxford/Kidlington and sustainable transport infrastructure
- Housing should be built within walking distance of railway stations to connect new residents to employment, education and leisure opportunities within the wider region.
- Where housing is not served by railway stations, new housing should be accompanied by bus links, cycle paths and pedestrian access from houses to stations.
- Should take the opportunities presented to improve public transport services i.e. the critical mass of demand to justify commercial investment in mass transit.
- The root cause of Oxford's unmet need requires careful consideration, and locations and density of dwellings determined
- Kidlington should play a greater part with housing in Bicester limited due to poor transport infrastructure

- Housing pressures at Kidlington cannot be accommodated within the existing boundaries.
- Growth should take place at Bicester as it is far superior in transport terms.
- Growth at Banbury should be limited due to transport constraints.
- Growth should take place at Banbury due to proposed transport improvements and connections with Oxford.
- Locations in the southern half of the district that are well connected by public transport are the most sustainable locations for future development.
- Cycling needs to be made safer which cannot happen while additional traffic is being generated around Oxford.
- The development of 'commuter hubs' with rail facilities should be encouraged
- Conversely too much reliance should not be placed on commuter hubs due to the resulting lack of housing type variety as high density schemes become the main type of development.
- A range of housing types is required.
- There must be clarity on how development would affect access to services for existing residents
- Unless there is a reappraisal of the location of employment developments then Oxford will cease to be an attractive place to do business.
- Although road improvements may be physically possible in some cases, this should not be at the expense of established rural communities.
- The Partial Review will need to take account of the conclusions and recommendations of the Park & Ride Study (Oxfordshire County Council)
- The vision and strategy of the Adopted Local Plan Part 1 should be followed
- Locations in the southern half of the district that are well connected by public transport are the most sustainable locations for future development.
- Support for the measures proposed in LTP4, which should be considered when considering potential development locations.

How the identified issues have been taken into account

- Transport issues are considered in the Initial Transport Assessment and in the Initial Sustainability Appraisal, October 2016 (PR22 & PR23) and in the consideration of Areas of Search and potential strategic development sites.

Infrastructure

Question 18: Are there any infrastructure issues you would like to raise?

- Cherwell's infrastructure is already stressed by the amount of development required in the Local Plan Part 1.
- Infrastructure is located at Banbury, Bicester and Kidlington

- Infrastructure is being provided at Heyford Park which serves the new community and the surrounding settlements
- Existing transport infrastructure provides opportunities for locating housing at sustainable locations (i.e. rail station at Lower Heyford).
- Linkages to employment areas in the south and southeast of the City should be provided i.e. a shuttle bus service between Oxford rail station and those destinations.
- Highways, power supply and foul water capacity infrastructure limited at Bicester
- Bicester is already failing to provide appropriate required infrastructure and the needs of existing local residents are not provided for.
- Growth should be focused in locations such as Bicester, with strong socio-economic links with Oxford City and opportunities to utilise existing infrastructure and capacity to deliver further infrastructure.
- There are major infrastructure constraints at Bicester limiting future development potential.
- Further information is required on allocations for infrastructure providers to comment in detail (Scottish & Southern Energy & Thames Water). Happy to work closely with the Council as the site allocations process progresses (Thames Water).
- Infrastructure, with the exception of transport, can be adapted as necessary
- Traffic congestion is already a problem
- Need to improve road access to Oxford from north of the County.
- New housing estates need the whole range of social and educational infrastructure to minimise car travel
- Concerns that arterial routes and junctions in and around Banbury are at or over their capacity. Requirement for a South East link road.
- Requirement for better transport linkages within Banbury including in and around Tramway and Canalside areas
- Opportunities posed by Bicester Town railway station in terms of links to Oxford.
- Shuttle bus service required between Oxford train station and the science parks and employment areas in the south and southeast of the City.
- A network of easily accessible pedestrian and cycle routes should be developed to encourage non car travel.
- OCC has not sought a primary school at Drayton Lodge Farm (Oxfordshire County Council).
- Concerns regarding primary school capacity in rural areas
- Concerns with flooding and drainage infrastructure as well as water supply
- Important to consider the availability of water recycling infrastructure
- Water supply and water treatment infrastructure concerns particularly in rural areas
- Cherwell District is in an area of water stress (Environment Agency)

- A Water Cycle Study should support the Sustainability Appraisal (Environment Agency)
- Suitable foul drainage capacity/water supply capacity is required to support any additional growth (Environment Agency).
- Electricity supply concerns
- Electricity connections for new developments from existing infrastructure can be provided subject to cost and time-scale. Any upgrades required can be funded between developer and Distribution Network Operator within a 2 year period therefore not impeding delivery of any proposed housing. (Scottish and Southern Energy).
- Overhead power lines on development sites should be accommodated by a considered layout with open space, parking, garages or public highways generally being permitted in proximity to the overhead lines. Otherwise, agreement will need to be reached in terms of identifying alternative routing for the circuits prior to planning permission being granted without burdening the existing customer base with any costs arising (Scottish and Southern Energy)..
- Concerns at cuts to bus services
- Requirement for additional burial grounds
- Concerns about mobile phone coverage in rural areas
- Concerns about health care provision in rural areas
- Concerns about local/community policing
- In order for development to be sustainable, it should not exacerbate existing infrastructure problems and demonstrate real improvements to existing infrastructure to be betterment of existing and new residents
- Infrastructure must be located in proximity to new homes to promote sustainable living patterns.
- The likely infrastructure requirements arising from the additional housing should be investigated, as should existing infrastructure/infrastructure shortfalls/capacity for infrastructure expansion. This should consider both Cherwell and Oxford City and should inform the options for growth.
- Lack of confidence that adequate infrastructure will be provided. Onsite infrastructure provision must be addressed at an early stage of plan making.
- Concerns that service sector infrastructure (health/education) struggle to find employees because they find it too expensive to live in Oxford City or travel to it.
- Opportunities for making efficient use of existing infrastructure is essential
- New development should be of a scale to provide for its own local needs. Spreading smaller development sites to meet housing needs would be inappropriate as it would be difficult to deliver new schools, health facilities etc. Conversely the concentration of larger scale developments provides the opportunity for focused delivery of all necessary infrastructure.
- As well as education, health, community infrastructure, there should be a strong policy steer on green infrastructure

- The Partial Review does not appear to consider the impact of increased housing provision on open space, sports and recreation facilities. An up to date playing pitch strategy and built facilities strategy should be produced to ensure the Partial Review is robust.
- There is a lack of sports and leisure infrastructure across Oxfordshire particularly a 'regional' scale facility. A development of around 4,000 homes could enable the delivery of such a facility which would act as a regional attraction, bring visitors into the district, whilst still addressing an unmet need of the County as a whole.
- There is already a need to address a funding gap for strategic infrastructure required to support planning growth. Options for meeting Oxford's unmet need should not significantly increase the infrastructure funding shortfall (Oxfordshire County Council).
- Impacts on existing infrastructure must be thoroughly assessed and careful consideration given to the phasing of new infrastructure with development. The planning and delivery of infrastructure requires a comprehensive approach to planning for growth i.e. rather than developing a separate housing requirement and strategy for accommodating Oxford's unmet need (Oxfordshire County Council).
- Concerns that existing infrastructure deficiencies will not be addressed by new development. No confidence that proposed improvements will be delivered (Thames Water)
- An infrastructure delivery vehicle is required
- Suggest delaying work on the Council's CIL (Regulation 123 list) until after the unmet needs of Oxford have been allocated to ensure a more accurate list can be produced.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Question 19: How do these issues affect the potential development locations to meet Oxford's unmet needs?

- In general water supply terms there are no major concerns about supporting an additional 3,500 properties. The preference would be for additional growth to be focused in either Banbury or Kidlington and to a lesser extent Bicester (Thames Water)
- Thames Water is currently delivering a reinforcement main to Banbury to secure supplies to the area for the next 40 years. Local reinforcements may still be required, and the storage capacity of the Bretch Hill reservoir will need to be reviewed. In terms of waste water at Banbury, there is an existing scheme being design to relieve existing pressures on sewer network capacity and to prevent sewage flooding (Thames Water).

- Kidlington has adequate strategic water supply infrastructure and any proposed development in this area would only require local reinforcements (Thames Water).
- If growth is greater than previously predicted for Bicester, additional water supply upgrades may be required and the capacity of the Ardley reservoirs reviewed. Upgrades to the existing sewerage infrastructure and drainage infrastructure are likely to be required (Thames Water).
- Additional housing in the rural areas will require a case by case review in terms of water supply capacity. If any strategic upgrades are required, these could take significant time to implement due to the distances involved in the networks (Thames Water).
- At the Former RAF Upper Heyford, both sewerage network and waste water treatment capacity will need to be upgraded to cater for the scale of development envisaged. A strategic wastewater infrastructure solution will be required to serve the scale of development proposed (Thames Water).
- Careful consideration should be given to the phasing of new infrastructure with development (Oxfordshire County Council).
- Infrastructure must be located in proximity to new homes to promote sustainable living patterns.
- Lack of infrastructure provision will limit growth
- Infrastructure must be provided before development commences
- Infrastructure, with the exception of transport, can be adapted as necessary
- Consideration should be given to spatial options which can take advantage of planned investment in strategic infrastructure, or which might strengthen the business case for new or improved strategic infrastructure (Oxfordshire County Council)
- Development should either be located where existing services/infrastructure would benefit from additional population, or where infrastructure could be expanded cost effectively, or clustered in such a way as to make the creation of new infrastructure viable.
- Employment development locations should be sited to ensure that there is affordable access to them
- Locating significant additional growth in the District will make existing infrastructure problems worse
- Locations for growth should be selected which take advantage of existing and planned investment in strategic infrastructure or which might strengthen the business case for new or improved strategic infrastructure
- The ability to provide infrastructure onsite as well as links to existing infrastructure should be considered
- An infrastructure delivery vehicle is required to deliver future development quickly and efficiently.
- The most appropriate locations are Bicester and Banbury, in accordance with the vision and spatial strategy of the Local Plan Part 1. This will ensure that Cherwell has a clear vision, rather than creating a different vision for the delivery of the additional housing which would conflict with the aims of the Local Plan Part 1 and also confuse matters.

- Growth should be focused in locations such as Bicester, with strong socio-economic links with Oxford City and opportunities to utilise existing infrastructure and capacity to deliver further infrastructure.
- Bicester is receiving funding associated with the Eco Town and Garden Town designations and is therefore able to accommodate additional development.
- Bicester is the most appropriate when considered against the reasonable alternatives.
- Additional growth in Bicester should be limited by the capacity of the rail and road infrastructure linking it to Oxford, and other infrastructure required to support housing.
- The infrastructure capacity at Banbury is uncertain
- In comparison with other settlements in the District, Banbury contains the infrastructure to support development
- Kidlington will offer the best solution given the factors listed in the consultation document's section on infrastructure, having significant services and facilities
- Existing infrastructure provision at Oxford is a strong positive factor in considering options for growth, particularly in the north of Oxford area.
- Growth locations should be in the south of the county and closer to Oxford and the knowledge spine
- Site specific promotions made

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Transport Assessment's (PR22) and Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Economy

Question 20: Are there any economic issues you would like to raise?

- Full list of sites submitted as representations to the Partial Review consultation is attached.
- Employment development should be located next to transport hubs & should consist of different uses.
- Tourism should be promoted.
- Tourism is a key part of Cherwell's economy, particularly associated with Bicester Village. Through integrating Bicester town centre with Bicester Village, Bicester will be able to harness the status that Bicester Village has brought to the area and tourism will become a greater element of the District's economy. As such the existing tourism assets of Cherwell should be supported.
- The waste management industry is not adequately accommodated in Oxford.
- A thriving local economy does not need to be synonymous with more people, more traffic and more housing.

- It should be recognised that as well as being the economic centre of the County, the Oxford economy is of national and international significance.
- The diversity of employment types in Oxford should be more clearly recognised including manual based work (BMW & Unipart).
- Concerns raised about the economic impact of providing housing which is supposed to help alleviate Oxford's shortfall in locations that are not well related to Oxford or its employment hubs.
- Additional housing is intended to house workers based in Oxford so it is important that housing sites are located along established or proposed public transport corridors. References made to additional documents for the Partial Review to consider (Oxfordshire Creative Cultural Heritage and Tourism Investment Plan (Oxfordshire County Council)).
- Housing and economic issues are closely linked; the Partial Review should consider both.
- It needs to be ensured that job growth in Bicester matches housing growth. There is no mention made of the role of the Eco Business Centre in supporting environmental business growth.
- Bicester needs high tech/high skills employment commensurate with the Oxfordshire Knowledge Spine rather than warehousing.
- In Banbury there is a need to increase skills (not necessarily academic achievement) including vocational/apprenticeship training.
- Banbury needs smaller high tech industries not only manufacturing jobs.
- Upper Heyford is a major employment location and can be utilised to create a dynamic third major settlement in the District
- Acknowledgement should be given to the Knowledge Spine. Concentrating development along the knowledge spine will help to secure the economic growth aspirations of the City Deal as well as meeting the needs of residents of the additional housing.
- The lack of affordable housing to workers in Oxford is a drag on the economic development of the City and the County (recruitment and retention problems particularly in key local services as well as the universities and associated research industries).
- Oxford Gateway will increase the housing pressures, it is indicative of the lack of balance between housing and employment uses.
- It may be difficult to limit Oxford's future growth.
- The housing needs are based on aspirational projections of Oxford's housing employment growth
- If Oxford is restricted in its ability to expand its boundaries then eventually it will cease to be an attractive investment opportunity and economic growth will be constrained.
- Issues identified for the Partial Review should involve scoping the cooperation between Cherwell and Oxford City regarding strategic employment sites considered alongside accommodating housing needs.
- The issue of accommodating strategic large scale logistics sites should be addressed in the Partial Review; the partial review provides a logical

opportunity to broaden the debate to include employment land issues. Delaying would be unsound.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Question 21: How do these issues affect the potential development locations to meet Oxford's unmet needs?

- There is a need to provide additional land for employment as well as for housing.
- New housing should be located near to where employment exists/could be expanded.
- Economic growth can be supported by locating housing in the right place where trips can be made by sustainable modes.
- In terms of acknowledging the role of the waste business sector in Oxford, this means requiring appropriate sites (B2 use) close to Oxford.
- No evidence that if the additional housing is built, whether residents would actually work in Oxford
- Firms in Oxford should relocate to Cherwell to occupy vacant buildings.
- Economic considerations include viability, land ownership, and capturing value uplift to help fund infrastructure. Any site that is identified should be deliverable.
- The Local Plan Part 1 over allocates employment land which should now be used for housing to avoid new large greenfield housing allocations on the edge of towns.
- Employment allocations should be flexible in the uses they accommodate and they should be reviewed to assess their potential to contribute to housing land supply.
- Employment land is not needed (the area is one of full employment); more employment land will increase the need for housing.
- The contributions that any allocated site can make to increasing spend in the local economy, to easing housing affordability, and enhancing public transport viability, should be considered.
- The Council should use the association and relationship with the city of Oxford to help grow Cherwell's economy. This can be accelerated through a greater provision of employment. This would allow for a range of companies to base in Cherwell, potentially attracting Oxford habitants.
- Accommodating the infrastructure required to support the housing and business development will require support funding from the Government and County Council which is unlikely to be available due to finance cuts.

- Development locations should be remote from Oxford to avoid exacerbating Oxford's traffic problems
- Proximity to Oxford is important as the main economic centre of the County.
- Locating new housing close to Oxford will reduce travel distances and limit negative impacts on economic efficiencies and output/productivity.
- Locating significant new housing close to Oxford is vital to support Oxford's long term economic well-being and competitiveness. It is also vital to provide housing for key workers etc to sustain the world class clinical and research activities
- Locating new housing immediately north of Oxford would support significant proposed economic growth at existing sites to the north of Oxford, to the benefit of Cherwell and Oxford's spatial strategies.
- The City needs to expand its boundaries
- It needs to be ensured that job growth in Bicester matches housing growth. There is no mention made of the role of the Eco Business Centre in supporting environmental business growth.
- In order to provide for a balance between housing and employment, land should be allocated for additional employment, preferably in locations that support other sustainability objectives, such as in Bicester.
- Cherwell should be aiming to support Bicester (and Cherwell's) residents, not Oxford's future residents.
- At Banbury, there should be a diversification of the town's economic base and for current and future residents to live and work sustainably within the town.
- Reflecting existing commuting patterns, Banbury has a strong economic relationship with Oxford and would be an appropriate location to accommodate the additional housing.
- Site promotions made.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Transport Assessment's (PR22) and Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Sustainability

Question 22: Are there any sustainability issues you would like to raise?

- Sustainability is a key principle in determining growth locations (Oxfordshire County Council).
- The approach to sustainability in the Partial Review should reflect the NPPF in terms of the broad consideration of a range of issues within the three dimensions of sustainable development. The delivery of housing to meet the

needs of present and future generations is a key part of sustainable development & underpins soundness.

- The conservation and enhancement of the historic environment is an integral part of sustainable development as defined in the NPPF (Historic England).
- Sustainable travel could be enhanced by a station on HS2 on A43 between Bicester and Brackley. No development should commence until the Oxford-Bicester train line is operational. Additional development should be located along the Cambridge-Oxford Expressway. Other sustainability issues can be addressed via policies in the Local Plan (Pt1 & 2) and SPDs.
- Highly efficient houses close to where the housing need arises will provide sustainability
- The additional housing will undermine sustainability through strains on infrastructure and environment. Additional housing is inherently unsustainable.
- It is unsustainable (as per the NPPF) to release Green Belt or AONB land for housing. This removes a benefit from future generations which they otherwise would have enjoyed.
- It is unsustainable to locate housing far from Oxford in North Oxfordshire villages and towns as this would increase commuting. Support staff in hospitals and other vital services need to live close to the workplace, as do all lower paid workers and shift workers.
- Oxford's sustainability standards should apply to the Oxford related housing.
- Support for high sustainability standards, references to Healthy New Towns.
- Examples given of unsustainable development in Bicester (biodiversity concerns)
- Existing roads around Banbury are considered inadequate for current housing needs with insufficient parking provided
- Heyford Park is being developed as a sustainable development and community and this should be expanded upon.
- The Local Plan Part 1 seeks to avoid coalescence between settlements; and further residential development between Kidlington and Oxford would be contrary to this objective.
- The provision of infrastructure is essential to deliver sustainable development.
- The Council should explore eco-friendly transport methods whilst also promoting public transport services, encouraging cycling, introducing road pricing, and building good (not bus) public transport links.
- More housing and more people will add to more air and noise pollution, road congestion, and loss of open countryside and rural areas.
- Need to consider issues of community identity, reducing crime, increasing social cohesion and harmony. Recent developments around Kidlington and Gosford are threatening the appeal of the villages.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Transport Assessment's (PR22) and Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Question 23: How do these issues affect the potential development locations to meet Oxford's unmet needs?

- The need to conserve and enhance the significance of heritage assets and their settings should be considered, both as a constraint and an opportunity (Historic England).
- There is a need to tackle sustainability issues. Otherwise, additional housing should be a long way from Oxford.
- New housing should be spatially closely related to Oxford.
- A sustainable urban extension to Oxford, and development in the southern areas of the District in proximity to Oxford, offers the greatest opportunity for sustainable modes of travel.
- There is scope for mitigation if additional development is located close to Oxford.
- The City needs to expand its boundaries
- Development in designated areas such as Green Belt and AONB should be avoided
- There needs to be more certainty that the housing need is real and that it has to be met in Cherwell
- Cherwell should be aiming to support Bicester's and Cherwell's residents, not future Oxford's residents
- Better management required of the relationships between road users and other users of the space particularly residents, users of open spaces/play areas. Need to reduce the amount of straight roads in new developments and use more 'sleeping policemen'.
- The release of greenfield land for housing should not be seen as an unsustainable approach. Natural environment assets should be protected and where protection is not possible, impacts mitigated, but there are areas of greenfield land that are not protected assets.
- Onsite sustainability standards should not be restrictive or unnecessary as this can lead to long delays/non delivery.
- The Local Plan Part 1 strategy to control development in the open countryside should be adhered to and such proposals rejected.
- European examples given of considering sustainability issues in a unified way along with economic issues and financial viability.
- Sustainability is not just about the environmental aspects. All economic, social and environmental factors carry equal weight and should be considered through Sustainability Appraisal to pursue the most appropriate strategy.

- The key sustainability issue of air quality relates primarily to transport, which in turn is directly influenced by the location of development to achieve a modal shift away from the car.
- Bicester is a sustainable location for more development.
- Banbury is a sustainable location for more development, where the need to travel can be minimised and the use of sustainable travel options can be encouraged.
- Locating the growth in larger settlements such as Kidlington will ensure that residents have good access to a range of facilities without the need to travel.
- There is the opportunity to join up the two issues of accommodating Oxford's unmet housing needs, and accommodating Oxford's overflow business needs within Kidlington's hinterland by developing sites at Kidlington.
- Site specific promotions made and the sustainability credentials emphasised.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Transport Assessment's (PR22) and Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Natural Environment

Question 24: Are there any natural environment issues you would like to raise?

- Additional housing and traffic will damage the natural environment and generate air pollution.
- Need to protect the countryside for its amenity and biodiversity value and value to existing and future generations.
- Should protect flood plain to reduce flooding & designate & protect green spaces
- Areas close to Oxford are at risk of flooding (and across the district), which will be exacerbated by increased surface water run-off.
- Flooding could be alleviated by better undergrowth control and dredging of the Rivers Ray & Cherwell
- Flood risk areas should be avoided as per the NPPF. Cherwell District has significant areas of land at the lowest risk of flooding (Flood Zone 1) and there is no reason to allocate any additional housing in Flood Zones 2 or 3 (Environment Agency).
- CIL and New Homes Bonus should be used to provide funding for flood defence schemes in the areas downstream of large developments.
- The District is in an area of water stress, which will be exacerbated by additional development.
- The Oxford Meadows SAC should be protected.

- All potential allocations should be subject to ecological assessment to ensure there will be no significant negative impacts on biodiversity in accordance with policy ESD 10.
- The cumulative ecological impact of the additional development, including any development along the District's boundaries, should be considered for sensitive receptors particularly in terms of impacts on the SAC but also SSSIs and Local Wildlife Sites (various including Oxfordshire County Council). Direct and indirect impacts (including hydrology, air quality and recreational pressure) should be assessed.
- Conservation Target Areas and other Green Infrastructure linkages should be maintained/protected (various including Oxfordshire County Council).
- Minimise disturbance to nature conservation sites and areas including SSSIs and BBOWT nature reserves, habitats and species.
- The principles of the Oxford City policies on biodiversity should be applied to the new housing being planned for.
- Need to protect the biological value of water meadows and other environmental habitats.
- The Council should designate additional nature reserves and designated green spaces which must not be developed.
- Development should be restricted to areas of low value environmental importance
- Green Belt is a major component of the District's natural capital.
- Green Belt is not a natural environment constraint but relates to the setting of Oxford.
- Green Belt land is a high quality landscape which is also important for farming and wildlife habitats, where a network of footpaths serves as a recreational facility.
- The Green Belt is not sacrosanct; it should not be protected at the expense of other spaces within the District.
- Consideration required of the impact on the District's rural character of house building.
- More could be done to promote recreational use of Cherwell's countryside including improving footpaths.
- Need to tackle littering in the countryside.
- There is a need for appropriate planting on development sites in terms of appropriate location and limited ongoing maintenance particularly with maintenance budgets shrinking.
- As per the NPPF guidance in paragraphs 109 to 125 and paragraph 113's distinction between the hierarchy of protected sites. Landscape designations outside of those specifically mentioned in the NPPF footnote 9 are not absolute constraints.
- Development should be accommodated without impacting on the Cotswolds AONB (Natural England).
- Consideration should be given to the natural environment constraints in the local authorities around Oxford. CDC could accommodate a higher level of

housing than other Oxfordshire authorities as it has a lower amount of Green Belt. Areas with strong socio-economic links with Oxford City should be the focus for growth areas.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Question 25: How do these issues affect the potential development locations to meet Oxford's unmet needs?

- Impacts on the natural environment should be taken into account.
- A balanced view should be taken between environmental constraints and the need for development.
- The large areas of land close to Oxford are protected by natural environment designations means that there are only limited development locations to meet Oxford's unmet need. The least restricted areas are Green Belt, which are not subject to natural environment restriction.
- Some areas will be 'no go's' for development and development should be directed to locations which minimise the loss of important and valued natural assets/landscapes.
- Oxford City is unable to meet its housing need because of policy and environmental constraints, such as flood risk. The same approach should apply in Cherwell i.e. development should not be located in areas of flood risk (Flood Zone 2 or 3) or nature conservation value (Environment Agency).
- Less housing will mean less litter
- Consideration should be given to the natural environment constraints. CDC could accommodate a higher level of housing than other Oxfordshire authorities. It has a lower amount of Green Belt and fewer natural environment constraints. Areas with strong socio-economic links with Oxford City should be the focus for growth areas.
- There is scope for mitigation if additional development is located close to Oxford.
- Development should not be at the expense of Cherwell's natural environment whilst allowing Oxford to protect its areas that may be of lesser environmental importance.
- Realistic reappraisal of the Green Belt is required.
- Housing opportunities around Kidlington are limited by flood risk.
- There is some flood plain land north of Oxford, but there is also much land outside of the flood plain.
- The Oxford Meadows SAC is already compromised by traffic. Additional housing close to Oxford could help to alleviate this when compared with other alternatives more likely to generate additional traffic on the A34.

- The area around the Oxford Meadows SAC is particularly sensitive with development potentially leading to changes in hydrology, increases in air pollution, or recreational pressure on the site.
- The issue of cumulative impact on the SAC could affect locations for growth particularly in terms of the air pollution generated by additional traffic (Oxfordshire County Council)
- Options for growth in the more rural areas away from Oxford are likely to have a greater impact on the character of the open countryside.
- Cherwell should be aiming to support Bicester's and Cherwell's residents, not future residents of Oxford.
- Site specific promotions made.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Built and Historic Environment

Question 26: Are there any built and historic environment issues you would like to raise?

- Updates required to the number of Scheduled Ancient Monuments, Registered Parks & Gardens, and non-designated archaeological heritage assets (Oxfordshire County Council)
- The District's traditional rural villages and rural agricultural landscapes are already threatened by the amount of development required.
- Recent development around Cherwell's villages has damaged local distinctiveness and rural nature of approaches to the village/local views.
- Development as part of the Local Plan Part 1 has already had a substantial and detrimental effect on Banbury's attractiveness as a historic market town, including impacts on Salt Way, Crouch Hill and Banbury Circular Walk, and increasing coalescence. Development has also compromised the historic integrity and tourism potential of the former RAF Upper Heyford.
- Additional development threatens the integrity of the built and historic environment and heritage assets.
- Little value to the built environment in Cherwell in central towns, with some exceptions as noted in the consultation paper.
- Kidlington has a historic centre, recognised by the Conservation Area designation.
- There is potential for careful redevelopment in the urban areas of Bicester or Kidlington.

- A key issue is the protection and enhancement of the historic setting of the City, which is particularly relevant to the areas of open countryside around Oxford i.e. green wedges/green lungs.
- The rural character of the landscape immediately surrounding Oxford is an asset
- Internationally renowned sites within Oxford must be protected.
- Views into and over the city, including those identified in the Oxford Viewcones Study, contribute to the significance of the city and that significance.
- Evidence base sources suggested include the Historic Environment Record & the Historic Landscape Characterisation
- Developments of over 10 houses should not be located in or next to Conservation Areas
- Factual updates to the number of historic assets in the District as listed in the consultation paper.
- CDC should have a positive strategy for the conservation & enjoyment of the historic environment as per the NPPF. New development should be sympathetic to and complement the built and historic environment of Cherwell District (Historic England).
- Protection of designated and undesignated assets can extend to their settings. A development that affects Heritage Assets should however not be excluded from the site selection process, it should be considered whether harm does arise, whether the harm arises can be mitigated and whether there are reasonable alternatives. Also, heritage assets can in some cases be enhanced by development.
- Need to protect ridge and furrow landscapes.
- The NPPF requires Local Plans to contain a clear strategy for enhancing the built and historic environment and to identify land where development would be inappropriate.
- The possibility of retaining the outer shell of historic buildings and bringing premises back into use should be considered before building new houses.
- Regard should be had to the Statutory List of Buildings of Special Architectural or Historic Interest and Designated Conservation Areas.
- As per the guidance in the NPPF paragraphs 126 to 141, historic assets should not be considered as absolute constraints.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Question 27: How do these issues affect the potential development locations to meet Oxford's unmet needs?

- Impacts on heritage assets should be taken into account including 'showstoppers'
- Development within Conservation Areas or close to other historic assets is acceptable to meet Oxford's needs, provided historic settings are respected.
- Heritage assets should be viewed both as potential constraints and also potential opportunities in terms of securing the future of historic buildings or to better reveal their significance. This should include the contribution of a site to the purpose of the Green belt to preserve the setting and special character of Oxford (Historic England).
- Growth options should take into account the likely impacts on Green Belt purposes but also consider the exceptional circumstances which justify a review of the Green Belt boundary.
- Promote higher density development in Oxford including on specific redevelopment sites.
- CDC should have a positive strategy for the conservation & enjoyment of the historic environment. New development should be sympathetic to and complement the built and historic environment of Cherwell District.
- The issues identified limit future growth and it is necessary to recognise the limits of what can sensibly be achieved.
- New development should be directed to locations which protect and enhance the District's heritage assets.
- There is scope for mitigation if additional development is located close to Oxford.
- No justification to build over historic landscapes/historically sensitive locations and towns, instead of the Green Belt of Oxford.
- Need to improve the attractiveness of Bicester in its own right to alleviate Oxford's traffic problems
- Further developments around Banbury would threaten the separate identities of the surrounding villages. There are far more sustainable locations for growth which are within shorter travelling distance of the City and which have fewer constraints and where built development has already impacted upon character.
- Further development at RAF Upper Heyford would erode its remaining Cold War ambiance.
- Site specific promotions made.

How the identified issues have been taken into account

- The issues were considered when developing the draft Vision and Objectives in Section 5 and through the Initial Sustainability Appraisal's (PR23) examination of Areas of Search and potential strategic development sites.

Call for Sites

Question 28: Do you wish to submit details of sites to deliver housing development to meet Oxford's unmet housing needs within Cherwell?

- Full list of sites submitted as representations to the Partial Review consultation is available at Appendix 7.
- Cross reference made to sites proposed as part of representations on the Local Plan Part 2 consultation.

How the identified issues have been taken into account

- Promoted sites that meet the minimum size criterion for considering strategic development (two hectares) in order to identify sites that potentially could accommodate at least 100 homes are identified in Section 6 of the Options Paper.

General Comments

- No reference is made specifically to Parish Meetings. Where a meeting is in place, everybody on the electoral roll is a member and PMs are therefore the most democratic form of government. PMs are often confused with Parish Councils which have different legislation.
- Oxford City Council, South of Oxfordshire & Vale of White Horse District Councils and other Duty to Cooperate bodies look forward to continuing to work positively with Cherwell District Council and the other Oxfordshire authorities to assist with post SHMA work programme for the Oxfordshire Growth Board.
- Support for the building of individual houses in small rural communities on carefully chosen sites to support the sustainability of the community.
- No building supported in some villages.
- There is a need to have regard to potential impacts on the historic environment when considering potential housing sites. This includes the impacts of any sites proposed in the Oxford Green Belt on its function to preserve the setting and special character of Oxford. Policies should be based on an adequate, up to date and relevant evidence based as regards the historic environment. Links to information on heritage assets provided. Historic Environment would be pleased to offer comments on potential sites in terms of the impact on the significance of designated heritage assets (Historic England)

How the identified issues have been taken into account

- Reflected in work since the issues consultation and in the Options Paper.
- Issues are considered by the Initial Sustainability Appraisal (PR23) and Interim Transport Assessment (PR22) as described in Section 7 of the Options Paper.

Town and Parish Council/Meeting Workshops

- 3.21 Town and Parish Councils/Meetings were invited to a consultation workshop as part of the issues consultation on the Cherwell Local Plan Part 2 and the Partial Review of the Cherwell Local Plan Part 1 during January – March 2016. Consultation on the Community Infrastructure Levy was also highlighted at the workshop although this was not the focus of the workshops. The workshops took the form of group discussions on the agenda items set out below (the agenda was circulated in advance to the parishes). On arrival, parishes were split into groups and each group discussed each agenda item. The group discussions were facilitated by a member of the Planning Policy Team with support from other officers.
- 3.22 Two workshops took place for parishes in the north and south of the district on 23 and 24 February respectively. The issues arising from the workshops insofar as they relate to the Partial Review of the Local Plan are summarised below.

23 February 2016

Table 1

- Concerns that the Green Belt in Cherwell should be protected
- The focus for new development should be in the south of the district where there are better transportation links, although this will depend on site availability
- Roads in the south of the district can better accommodate HGVs
- Jobs already existing Oxford so no employment should be provided.
- Employment provision would cause additional issues (mainly in relation to transport)
- There is a lack of thought in planning in general (i.e. layout of M40) although there was some positive discussion of recent transport improvements
- Concerns about additional housing and impacts on village coalescence

Table 2

- Development should be located at Kidlington or Bicester and it would not be sensible to locate development in the north of the district so far from Oxford.
- Upper Heyford former airbase was raised as an option.
- Infrastructure should be provided as well as dwellings and transport will be a major consideration.
- The Green Belt should be protected and more sites should be considered in Oxford but the importance of the skyline should be recognised.

Table 3

- Need more information on why Cherwell needs to accommodate Oxford's needs.
- Obvious opportunities for accommodating Oxford's needs that are not in Cherwell i.e. Grenoble Road.

- If Oxford didn't keep attracting new employment growth, then there would be ample land supply for housing within the City boundaries – they can redress the balance within their own area.
- Query whether the housing is actually for people who will join the Oxford/south of Cherwell community – it is for London commuters or Birmingham commuters.
- A 'hierarchy' of preferred responses was discussed: Firstly – not accepted that there is an unmet housing need, either that Oxford cannot meet its own needs or that Cherwell should be accepted this. Secondly – any provision in Cherwell to meet Oxford needs should be as close to Oxford as possible, well linked in transport terms. Kidlington is an obvious candidate given size of settlement, ability to accommodate development and links to Oxford. New train station linking to Oxford & beyond. Thirdly – development in the Green Belt, as long as there is replacement Green Belt designation elsewhere i.e. no overall loss in quantity.
- All agreed that Green Belt itself is not sacrosanct; it can be replaced elsewhere (not like a wildlife designation for example).
- Area of Search should be in the south of the district.
- No implications for 5 year housing supply in the rest of the district, there should be a north of Cherwell 5 year supply calculation, and a south of Cherwell 5 year supply calculation.

Table 4

- Houses to meet Oxford's housing need should be located where people want to buy them
- Development should be located close to Oxford but there are constraints e.g. biodiversity
- The need should be met in Oxford
- Green Belt land should be used to ensure development is close to Oxford
- Concern at even more development in the district to meet Oxford's unmet need- where does it stop?

Table 5

- Apprehensive about how the excess Oxford city demand would be divided up per village
- Should the villages closer to Oxford take proportionately more
- Would the housing need of Oxford's overflow displace Cherwell's own housing need
- Where possible, should concentrate new development around the Transport Hubs
- Concerned about the increase in traffic, and the knock-on effects of developments not just in their villages, but also in nearby villages

24 February 2016

Table 1

- Concern was expressed that the gap between Kidlington and Oxford could be lost and other areas including a site to the south of Oxford would be preferable.
- Oxford is pursuing employment land and won't allow it to be re-developed. This should be examined. There is an opportunity to bring employment from Oxford to Bicester.
- Transport should be a major consideration for the location of development. The railway crossing at London Road will need addressing if there is continued growth at Bicester.
- Bicester is the right location for housing and employment but links need to be improved between Bicester and Oxford.
- Concern was expressed that villages will have to accommodate Oxford's needs.

Table 2

- New infrastructure development is concentrated from Bicester to Kidlington/Oxford; it would make sense for development to be located towards Oxford.
- Better to review the Green Belt for development rather than targeting villages being consumed by towns.
- Loss of Green Belt could be replaced by new Green Belt/buffers around villages.
- Oxford should meet its own needs, including employment.
- There are already problems in Kidlington with the new station; parking at the station and park and ride is causing overspill into the village free parking areas.

Table 3

- Shared view that Oxford should accommodate its own needs, and if it cannot, then the housing should just not be provided, rather than provided elsewhere.
- Wherever the housing is located, if it is meeting Oxford's needs (i.e. to support employment growth in Oxford), then it will increase commuting into Oxford. This is not sustainable development, even if locations close to Oxford are used.
- Want Oxford to look again at its capacity and if necessary use large areas of private green space.
- Would not support Green Belt land being lost to housing development. Concerns that there is already high out commuting in the district i.e. to Oxford and out from Bicester, more housing in the south of the District will worsen this. Why not focus on more jobs in Cherwell.
- Shared concern about impact of accommodating Oxford's housing needs on the Cherwell housing land supply.

Table 4

- Questioned whether or not new areas could be designated as Green Belt if other areas are being removed from the Green Belt in order to meet Oxford's unmet housing need.
- Questioned if a new SHMA will be prepared in light of Oxford's unmet housing need and Oxford's Local Plan Review.
- Questioned if Cherwell is speaking with other Oxfordshire authorities regarding the additional 15,000 dwellings in Oxfordshire.
- Questioned if employment will be considered.
- Parishes agree with the Government's priority on the use of brownfield land before greenfield land
- Raised concerns over the planning process – Cherwell has prepared a new Local Plan which was adopted last year and now seeking changes to the Plan due to changes in circumstances. Communities will lose interest and things could further change.
- Questioned the status of the Garden Town application and the strategy, how will the funding received be used.
- Future residents at the Eco-Town development at Bicester should be encouraged to live and work within the development.

How the identified issues have been taken into account

- The issues raised have been considered in preparing the draft Vision and Objectives, in identifying the Areas of Search and in the initial consideration of Areas of Search and potential strategic development sites.

Meeting with Wolvercote & Cutteslowe, and Summertown & St Margarets Neighbourhood Forums, 2 March 2016

- 3.23 On 2 March 2016, a meeting was held with the two Neighbourhood Forums representing communities in the north of Oxford. An officer from Oxford City Council also attended the meeting.
- 3.24 The purpose of the Partial Review was explained including the background to the Examination of the now adopted Cherwell Local Plan, the Strategic Housing Market Assessment, the Duty to Co-operate, the Oxfordshire Growth Board, and the process of preparing the Partial Review.
- 3.25 Cherwell officers took the Members of the Forums through the Issues consultation paper prompting discussion on the issues raised. The main issues were as follows:
- Relationship between housing needs for housing/economic reasons is confusing

- Concern that more housing will produce more traffic. The impacts will be significant for Oxford wherever the growth is located
- need better cycle links between Oxford and areas to the north of Oxford i.e. Kidlington.
- Air quality is a particular issue and has a direct impact on what can be considered 'sustainable'
- People will commute not just to Oxford but to Birmingham and London
- will the sites being promoted around the edge of Oxford make any difference to the sites being promoted within Oxford?
- There could be coalescence issues around Kidlington
- concern that a strategic approach to meeting the housing need is not being considered (i.e. sites of 3,000 dwellings)
- is the Green Belt still important? Still protected?
- what happens if it is determined that the housing cannot be accommodated in Cherwell?
- Will affordable housing and key worker housing be provided for?

How the identified issues have been taken into account

- The issues raised have been considered in preparing the draft Vision and Objectives, in identifying the Areas of Search and in the initial consideration of Areas of Search and potential strategic development sites.

Appendix 1 – Public Notice

**PLANNING POLICY CONSULTATIONS
29 JANUARY 2016 TO 11 MARCH 2016**

**1. Partial Review of the Cherwell Local Plan (Part 1):
Oxford's Unmet Housing Need – Issues Paper**

The Cherwell Local Plan Part 1 was adopted in July 2015 and includes plans to fully meet the District's development needs to 2031. Consultation is now being undertaken to inform a partial review of Local Plan Part 1, specifically to help meet Oxford's unmet housing need. An Issues Consultation Paper is being published and comments are invited. The issues paper and related documents, including a Sustainability Appraisal Scoping Report and representation forms, are available to view on line at www.cherwell.gov.uk/policypublicconsultation or at the locations listed.

**2. Cherwell Local Plan 2011-2031 (Part 2): Development
Management Policies and Sites – Issues Paper**

An Issues Consultation Paper is being published for Part 2 of the Cherwell Local Plan. Part 2 will contain more detailed planning policies and smaller, non-strategic development sites for housing, employment, open space and recreation, travelling communities and other land uses. It must conform with and build upon the strategy within the adopted Local Plan Part 1. Comments are invited. The Issues Paper and related documents, including a Sustainability Appraisal Scoping Report and representation forms, are available to view on line at www.cherwell.gov.uk/policypublicconsultation or from the locations listed.

Call for Sites

Both Issues Consultations are accompanied by a "Call for Sites". If you wish to promote a site for development please complete a form at www.cherwell.gov.uk/policypublicconsultation, or request one from the Planning Policy Team at planning.policy@cherwell-dc.gov.uk.

3. Draft Statement of Community Involvement

The Council has revised its Statement of Community Involvement (SCI). The SCI sets out who the Council will engage with on the preparation of Local Development Documents and in carrying out development management, and how and when they will be engaged. The draft SCI is available to view at www.cherwell.gov.uk/policypublicconsultation and your comments are invited as part of this consultation.

Document Locations

Cherwell Local Plan 2011 – 2031 (Part 1)

Partial Review – Oxford's Unmet Housing Need

your place • your space
• your say

Issues Consultation - Summary Leaflet

Page 692

January 2016

Cherwell District Council recently adopted the Cherwell Local Plan Part 1 (July 2015) which plans for growth to fully meet Cherwell's development needs to 2031. Consultation is now being undertaken to inform a partial review of the Local Plan Part 1. It relates specifically to addressing the unmet housing needs from Oxford City.

The Cherwell Local Plan 2011-2031 (Part 1) was published in July 2015. It meets Cherwell's identified development needs. It also commits to helping Oxford meet its housing need, in accordance with Government policy and with the findings of the Local Plan 'public examination'. This requires a 'Partial Review' of Local Plan Part 1.

A consultation paper has been prepared outlining the key issues that the Partial Review may need to address.

This leaflet explains some of the key issues and questions asked in the consultation paper. It is only a summary and we recommend that the full consultation paper is read. It can be viewed at: www.cherwell.gov.uk/policypublicconsultation and at Cherwell District Council offices and public libraries

throughout the district, and selected locations in Oxford City (see page 13)

This leaflet includes information on:

- The background to the Partial Review
- The context – for Cherwell District and Oxford City
- The "Area of Search"
- Establishing a vision
- Key themes
- The "Call for Sites"

Some planning terms shown in ***bold italics*** are explained at the end of this booklet.

We would like your views on the issues raised and how we contribute in meeting Oxford's unmet housing need.

Background to the Partial Review

The ***Oxfordshire Strategic Housing Market Assessment*** (2014) indicates that there is a very high level of housing need to be met across the County. The Cherwell Local Plan makes allocations for growth to meet the level of housing need identified for the Cherwell District. The Government's ***National Planning Policy Framework*** and the statutory ***Duty to Cooperate*** require local authorities to work together to meet development requirements which cannot be met within their own areas.

Paragraph B.95 of the Local Plan

Part 1 commits the council to seeking to address the unmet housing needs arising from elsewhere in the ***Oxfordshire Housing Market Area***, particularly Oxford City. A consultation paper has been prepared as part of the early stages of a 'partial review' of the Local Plan 1.

The Partial Review of the Local Plan will effectively be an Addendum to the Local Plan Part 1. The Partial Review will sit alongside the Part 1 document and form part of the statutory Development Plan for the district. It must be supported by robust evidence, thorough community and stakeholder engagement and detailed assessments.

The Partial Review is not a wholesale review of the Local Plan Part 1. The Partial Review focuses specifically on how to accommodate additional housing and associated infrastructure within Cherwell in order to help meet Oxford's housing need.

The Oxfordshire local authorities are working together through the **Oxfordshire Growth Board** to identify how and where the unmet housing need might best be distributed across Oxfordshire.

We are asking for your views on the issues that need to be considered in meeting Oxford's unmet housing need, whether they be environmental, economic or social matters. No sites are being proposed yet although we are inviting the submission of site details for consideration. At this stage we have not determined what size of site might be suitable but promoted sites must be for over 10 dwellings

If you wish to promote a site for consideration please use the Site Submission form available at www.cherwell.gov.uk/policypublicconsultation

The context – Cherwell District and Oxford City

Oxford has a high level of housing need. As a relatively compact, historic city, Oxford has some characteristics which constrain its ability to accommodate new development including the Oxford Green Belt, which encircles and extends into the city, a tightly drawn administrative boundary, flooding, areas of nature conservation, and historic assets.

The Cherwell District adjoins the Oxford City boundary and there are geographic, social, economic and historic relationships between the two.

The Area of Search

We need to consider whether we should define a particular area of the district for meeting Oxford's unmet development needs, for example, based on proximity to Oxford, or key transport corridors. Parts of Cherwell District have a more direct relationship with Oxford for different reasons.

Do you consider that the 'area of search', or plan area, for the Partial Review should be well related to

Oxford City

Page 696

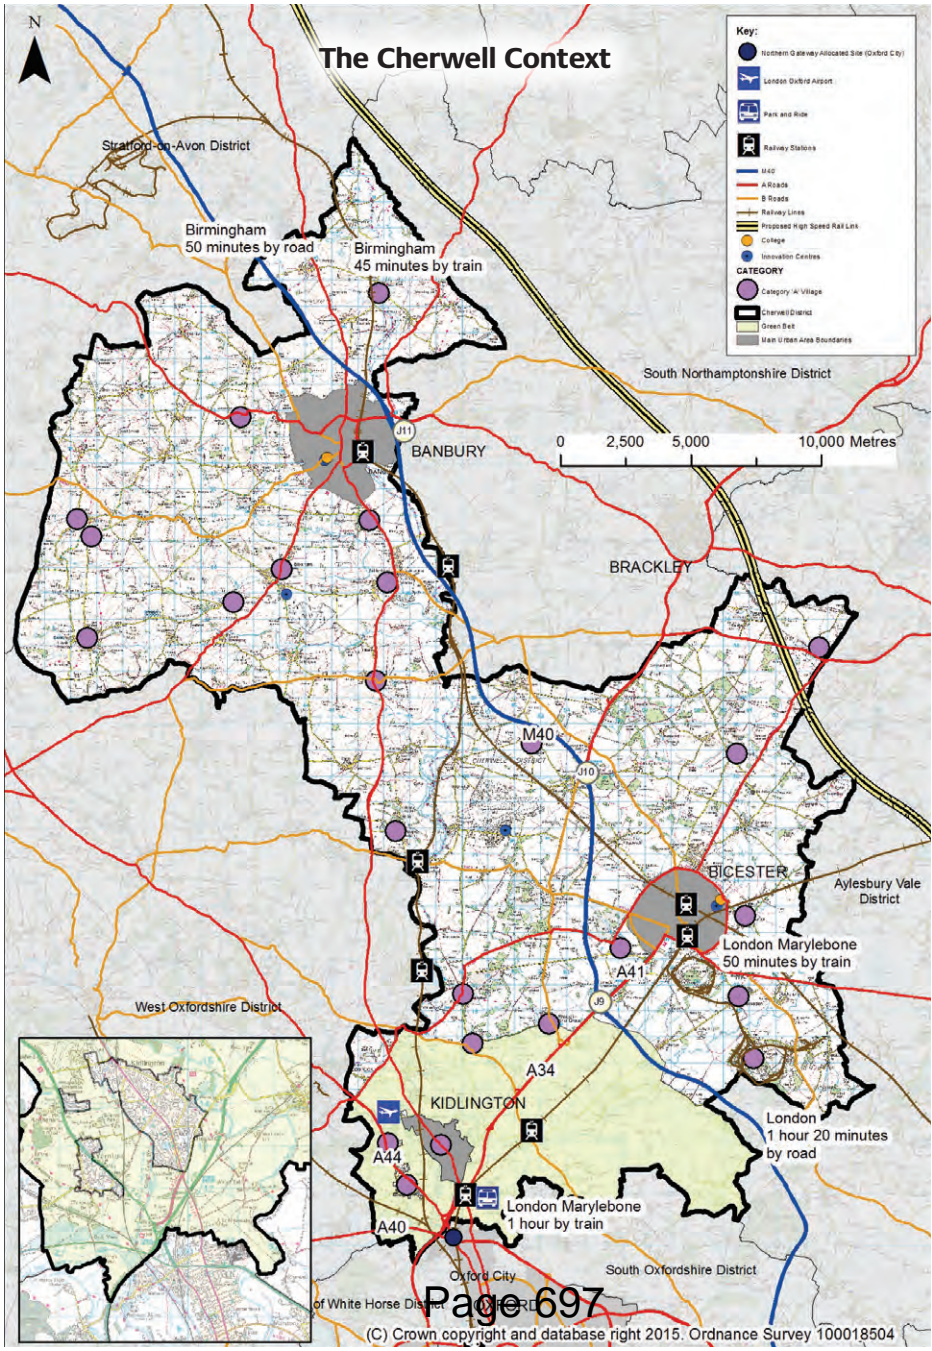

The Oxford Green Belt

The Oxford Green Belt surrounds Oxford City, and covers the southern part of the Cherwell District. It is different from green fields which refer to undeveloped countryside beyond our towns and villages and from 'greenfield land' which refers to all land that has not been previously developed.

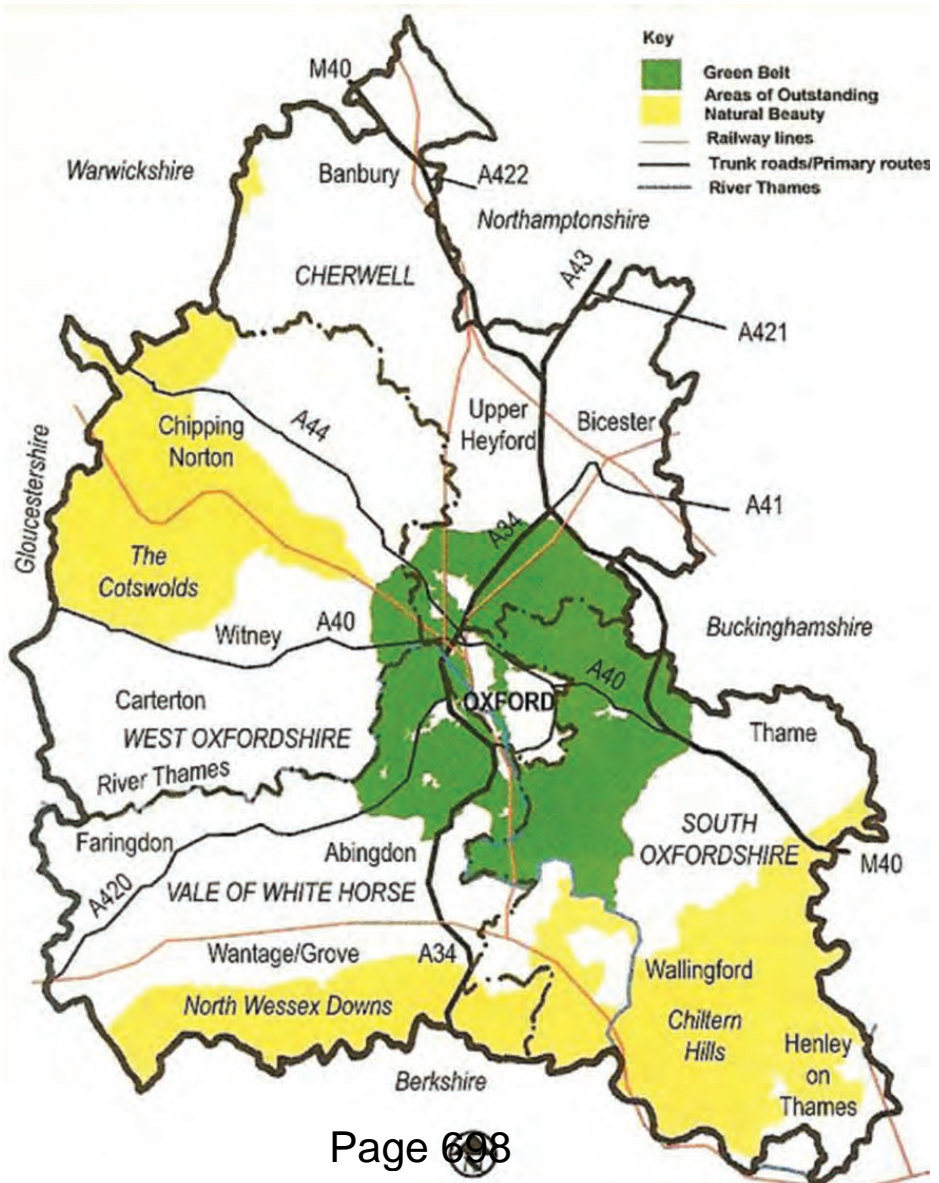

Government policy restricts development in the Green Belt and Green Belt boundaries should only be altered through the Local Plan making process in exceptional circumstances.

A strategic review of the Oxford Green Belt boundaries may be necessary to meet the unmet housing needs in Oxfordshire. A Green Belt Study has been carried out on behalf of the Oxfordshire Growth Board (available on the council's website) and it will be used as one source of information in considering potential locations for growth.

The Oxford Green Belt

Establishing a Vision

By 2031, Cherwell District will be an area where all residents enjoy a good quality of life. It will be more prosperous than it is today. Those who live and work here will be happier, healthier and safer.

The Vision for Cherwell District (above) established in the Local Plan Part 1 must form the starting point for this partial review, but we also need to establish a vision and strategy for meeting Oxford's unmet housing needs in the Cherwell District.

What are the key goals that any additional growth in the District should be aiming to achieve?

What do you think?

Key themes

Housing

How much housing?

The working figure for Oxford's unmet housing need is 15,000 homes (2011-2031). Were these to be distributed evenly across the local authorities this would result in 3,000 homes per authority area. Allowing for some flexibility might suggest approximately 3,500 homes. This remains a working figure until the **Oxfordshire Growth Board** completes its countywide work in Summer 2016. To deliver sustainable development, housing will need to be accompanied by the necessary infrastructure, including services and facilities, and possibly some employment development.

The consultation paper highlights the key housing issues facing both Cherwell District and Oxford City, including housing affordability and a need to provide an appropriate housing mix to meet the different needs of all communities.

Transport

Cherwell District has good transport links and a number of transport improvements have recently been completed including to Junctions 9 & 10 of the M40, to rail transport at Bicester and a new station has recently opened at 'Oxford Parkway' south of Kidlington. The adopted Cherwell Local Plan locates the majority of new development at Bicester and Banbury where good road, rail and public transport infrastructure can provide access to employment, services and facilities. Significant further improvements to the transport infrastructure at Banbury, Bicester and Kidlington, and for Oxford City, are contained in Oxfordshire County Council's fourth Local Transport Plan (LTP4).

Infrastructure

There will be investment in infrastructure across the Cherwell District to 2031 and this is detailed in the Infrastructure Delivery Plan accompanying the Local Plan. Similarly, planning policies in Oxford seek to ensure that new development is supported by all necessary physical, social, economic and green infrastructure. The availability of infrastructure such as schools, healthcare, and utilities will all influence the location of additional growth. It is also important that the additional growth does not worsen any existing infrastructure challenges.

What do you think are the main infrastructure issues we should consider?

How do these issues affect the location of new development?

What do you think are the main transport issues we should consider? How do these issues affect the location of new development?

Economy

The adopted Cherwell Local Plan supports economic growth and competitiveness, and seeks to reduce the level of out-commuting and to provide a more locally self-sufficient and sustainable economy. Oxford, as the only City in Oxfordshire and with its universities and history, is the economic centre of the county. There are a number of shared economic influences for Cherwell and Oxford City including commuting patterns; the proximity of Kidlington, London-Oxford Airport and Begbroke Science Park to Oxford; Bicester's growing influence; and the international tourism draw of both Oxford City and Bicester Village.

What do you think are the main economic issues we should consider? How do these issues affect the location of new development?

Sustainability

The Cherwell Local Plan Part 1 seeks to deliver sustainable development, to ensure that the need to travel is reduced and sustainable travel is promoted, and to ensure that resources such as energy, water and waste are managed more efficiently. The development of the North West Bicester Eco-Town, a 'zero

carbon' development, is central to this strategy. Identifying additional locations for growth to meet Oxford's unmet housing needs will need to support the sustainable Cherwell strategy.

How do these issues affect the location of new development?

Similarly in Oxford City, sustainable development is promoted including low and zero carbon development that demonstrates the efficient use of natural resources. In Oxford City air pollution and traffic noise are particular issues.

What do you think are the main sustainability issues we need to consider

The Natural Environment

Cherwell is a rural district with attractive and high quality built and natural environments. Cherwell has dispersed rural settlements and the countryside surrounding the towns and villages plays an important part in the open and agricultural setting and identity of these places. The adopted Local Plan seeks to strictly control development in the

open countryside and directs most of the growth to the urban areas. The constraints and opportunities presented by the District's natural environment will need to be a key consideration in determining where to locate new growth. For example, both Cherwell and Oxford have areas at risk of flooding.

What do you think are the main natural environment issues we need to consider?

How do these issues affect the location of new development?

Built and Historic Environment

Cherwell District has a high quality and distinctive built and historic environment. It includes many designated heritage assets and Conservation Areas. Banbury, Bicester and Kidlington each display their own unique character, and in the rural areas the wider countryside setting of Cherwell's villages plays an important role in their identity. Oxford is a world-renowned historic city with important designated and undesignated heritage assets. The Oxford Green Belt plays a particular role in preserving the setting and

special character of historic Oxford. Protecting and improving the built and historic environments will be essential in identifying locations for additional development.

What do you think are the main built and historic environment issues we need to consider?

How do these issues affect the location of new development?

Call for Sites

The consultation paper does not propose any development sites. We are inviting the submission of sites with potential to deliver housing development in the Cherwell District in the interest of meeting some of Oxford's unmet housing needs. Promoted sites must be for over 10 dwellings. We are also consulting on the size of the strategic sites that should ultimately be included in the Partial Review document.

Do you wish to promote a site for development? Please provide details using the form at www.cherwell.gov.uk/policypublicconsultation

Have Your Say

Where can you find out more about the Partial Review of the Local Plan?

The Partial Review – Issues Consultation and related documents, including representation form, are available to view online at www.cherwell.gov.uk/policypublicconsultation

The consultation paper is accompanied by a Sustainability Appraisal Scoping Report, on which comments are also invited. Sustainability Appraisal will assess the social, economic and environmental effects of the Partial Review's proposals. A Scoping Report has been produced which sets out the proposed scope and level and detail of the appraisal process.

Copies of the consultation documents are available to view at public libraries across the Cherwell District, at the council's Linkpoints at Banbury, Bicester and Kidlington, at Banbury and Bicester Town Councils and Cherwell District Council's main office at Bodicote House, Bodicote, Banbury. In Oxford, hard copies are available at the Oxford City Council offices at St Aldate's Chambers, at Oxford Central Library (Westgate Centre), at Old Marston Library and at Summertown Library.

How can you get involved?

Consultation is taking place from Friday 29 January to Friday 11 March 2016.

The responses received to this consultation will inform preparation of the next stage, consultation on the spatial options, currently

timetabled for late Summer 2016.

Please complete a representation form at www.cherwell.gov.uk/policypublicconsultation

Alternatively pick up a representation form from one of the locations listed.

Email or postal representations should be headed 'Partial Review of the Cherwell Local Plan' and sent to:

Planning Policy Team,
Strategic Planning and the Economy,
Cherwell District Council,
Bodicote House,
Bodicote,
Banbury,
OX15 4AA

Planning.policy@cherwell-dc.gov.uk

Representations should be received no later than
Friday 11 March 2016.

Glossary of Terms

Duty to Cooperate – a legal duty introduced by the Localism Act 2011. In preparing Local Plans, Local Authorities must engage constructively, actively and on an on-going basis.

National Planning Policy Framework – national guidance produced by the Government to be followed in preparing Local Plans and determining planning applications.

Oxfordshire Growth Board – a joint committee including local authorities in Oxfordshire and other non-voting members including the Environment Agency, Network Rail & Highways England. Through the Oxfordshire Growth Board the Oxfordshire authorities are working together under the legal ‘Duty to Cooperate’.

Oxfordshire Housing Market Area – the subregional housing market that Cherwell falls within. It includes the whole of the county of Oxfordshire.

Oxfordshire Strategic Housing Market Assessment – a study produced in 2014 by consultants on behalf of the Oxfordshire local authorities which contains an ‘objective’ assessment of housing needs across Oxfordshire. It is objective in that it does not apply constraints to the level of need.

THE CHERWELL LOCAL PLAN 2011 – 2031 (PART 1)
PARTIAL REVIEW – OXFORD’S UNMET HOUSING NEED
ISSUES AND SCOPING CONSULTATION JANUARY 2016
DRAFT STATEMENT OF COMMUNITY INVOLVEMENT JANUARY 2016

Representation Form

Cherwell District Council is currently consulting on a Partial Review of the Cherwell Local Plan Part 1. The Partial Review is not a wholesale review of the Local Plan Part 1, which was adopted by the Council on 20 July 2015. It focuses specifically on how to accommodate additional housing and supporting infrastructure within Cherwell in order to help meet Oxford’s unmet housing needs.

It will be available to view and comment on from 29 January – 11 March 2016.

To view and comment on the document, and to view the accompanying Sustainability Appraisal Scoping Report and a summary leaflet visit www.cherwell.gov.uk/policypublicconsultation. The documents are also available to view at public libraries across the Cherwell District, at the Council’s Linkpoints at Banbury, Bicester and Kidlington, at Banbury and Bicester Town Councils and Cherwell District Council’s main office at Bodicote House, Bodicote, Banbury. In Oxford, hard copies are available at the Oxford City Council offices at St Aldate’s Chambers, at Oxford Central Library (Westgate Centre), at Old Marston Library and at Summertown library.

We are also consulting on a Draft Statement of Community Involvement at the same time.

Please use this representation form to make your comments. **This representation form is available to complete and submit online** at www.cherwell.gov.uk/policypublicconsultation

Please note that all comments received will be made publicly available.

Please complete one box/sheet per question.

Comments are invited on:

Site Submission Form

Please return this Site Submission Form with a site plan by 11 March 2016.

Submissions should be sent to:

**Planning Policy Team, Strategic Planning and the Economy, Cherwell District Council,
Bodicote House, Bodicote, Banbury, OX15 4AA.
Or by e-mail to planning.policy@cherwell-dc.gov.uk**

If you have any queries in completing this form please contact the Planning Policy Team on 01295 227985.

The Local Plan Part 1 Partial Review will make strategic site allocations in the interest of meeting Cherwell's contribution to Oxford's unmet housing needs. The Local Plan Part 1 applies a minimum threshold of 100 dwellings for strategic residential or mixed use sites. However, the Council will need to determine the appropriate threshold for the allocation of sites in the Partial Review of the Local Plan Part 1.

The Local Plan Part 2 will provide for non-strategic site allocations in accordance with Local Plan Part 1. Non-strategic housing sites are considered to be sites for up to 100 dwellings. There is no threshold for sites for the travelling communities. Non-strategic employment sites are considered to be sites of about 3 hectares or less. We will also consider sites to meet other identified needs such as for leisure, open space and community needs.

Sites promoted for residential development must be capable of accommodating at least 10 dwellings.

Site submissions will be made publicly available and will be considered in preparing the Council's plan-making evidence base.

Please indicate whether you wish to promote a site for consideration in the Cherwell Local Plan Part 1 Partial Review, the Cherwell Local Plan Part 2 document, or both. Please complete a separate form for each site you are promoting.

8. Site Designation as Local Green Space

Are you putting land forward for designation as Local Green Space?

Yes/No

If you are putting land forward for designation as Local Green Space, please explain how this land meets the requirements for Local Green Space designation (as per the National Planning Policy Framework and the National Planning Practice Guidance)¹

¹ See paragraph 77 of the NPPF at <https://www.gov.uk/government/publications/national-planning-policy-framework--2>) and guidance in the NPPG at <http://planningguidance.communities.gov.uk/blog/guidance/open-space-sports-and-recreation-facilities-public-rights-of-way-and-local-green-space/local-green-space-designation/>

9. Other Supporting Information

Please include any further supporting information for the site.

Thank you for completing this form. Please ensure that it is submitted with your plan to the Council no later than 11 March 2016.

Appendix 6 – List of Attendees: Town and Parish Council/Meeting Workshops

Cherwell Local Plan 2011-2031 (Part 2 and Cherwell 2011-2031 Local Plan (Part 1) Partial Review – Oxford’s Unmet Housing Need

Parish Council Workshops 23rd – 24th February 2016

List of Attendees

- Ambrosden Parish Council
- Ardley with Fewcott Parish Council
- Banbury Town Council
- Bicester Town Council
- Bletchingdon Parish Council
- Bloxham Parish Council
- Bodicote Parish Council
- Bourton Parish Council
- Bucknell Parish Council
- Caversfield Parish Council
- Chesterton Parish Council
- Claydon with Clattercote Parish Council
- Cropredy Parish Council
- Duns Tew Parish Council
- Fringford Parish Council
- Fritwell Parish Council
- Hook Norton Parish Council
- Horley Parish Council
- Kidlington Parish Council
- Kirtlington Parish Council
- Launton Parish Council
- Lower Heyford Parish Council
- Middleton Stoney Parish Council
- Milcombe Parish Council
- Mollington Parish Council
- Noke Parish Council
- North Newington Parish Council
- Sibford Ferris Parish Council
- Souldern Parish Council
- South Newington Parish Council
- Stoke Lyne Parish Council
- Stratton Audley Parish Council
- Upper Heyford Parish Council
- Wardington Parish Council
- Wendlebury Parish Council
- Weston-on-the-Green Parish Council
- CDC Councillor K. Atack
- CDC Councillor D. Webb

95	PR-A-061	Land West of A44/Rutten Lane, North of Cassington Road, surrounding Begbroke Wood	Yarnton	Residential
96	PR-A-129	Knightsbridge Farm	Yarnton	Residential

(*) Location is as per stated in the representation unless this refers to the site as being outside of Cherwell District in which case a check has been made against GIS and the correct CDC parish boundary stated in brackets. Amendments have been proposed to the stated location of two sites (in brackets) (North Oxford Triangle and Little Chesterton) but no other sites have been checked as to the actual parish in which the site is located.

Appendix 8 – Representations to the Issues Consultation

Rep No.	Representative Respondent	Question No.	Question number assigned to in summary	Comments
PR-A-001	R E Everitt		13	<p>This particularly deals with planning some of the housing that should not be placed in Oxford City is to be placed in Cherwell District. The majority will end in Banbury, Bicester and Kidlington. All three cases it is essential that the accomodation as such does not cause abutting onto nearby villages so losing their village identity. This is already in danger with Banbury and Bodicote.</p> <p>Employment possibilities must be considered to account for this extra population. This overflow would indicate very serious consideration as to how after 2031 with Oxford City unable to take any more housing, the four districts will cope with any planned expansions.</p>
PR-A-002	Godington Parish Meeting		General & SCI	<p>Parish meetings were set up under the 1972 Local Government Act as an organisation to take part in local government. Where a meeting is in place everybody on the electoral roll is a member. PMs are in fact the most democratic form of local government and should certainly be consulted on relevant matters in a plan. Why are parish meetings not mentioned in the proposed local plan? PMs are often confused with Parish Councils which in fact have quite different legislation.</p>
PR-A-003	T Snow		3	<p>Oxford's housing needs are well described. It is hard to exaggerate the effect of high house prices and rents in Oxford. Employers in the public and private sectors find it impossible to recruit and retain the staff they need. I see this in schools in Blackbird Leys. Good staff are desperately wanted but those few who join find they cannot afford to stay.</p>
PR-A-003	T Snow		6	<p>Yes, the area should be close to Oxford to try to accommodate the large number of people who work in Oxford but cannot afford to live there. District wide would be an irrelevance.</p>
PR-A-003	T Snow		7	<p>Houses should be within the affordable range of those on average incomes. They should be near to public transport links. 'Development gains' must be recaptured to provide infrastructure.</p>
PR-A-003	T Snow		9	<p>Yes, Green Belt building should indeed be considered. The Green Belt is a thick tight corset around Oxford and has been one of the principal inhibitors of the natural growth of a dynamic city. Sites have been identified of no great landscape value to allow major construction. It has always been accepted that incursion to the Green Belt would have to be made to deal with housing shortage and traffic congestion and we have both of these in spades.</p>
PR-A-003	T Snow		14	<p>Affordability and near transport links as I have said already. Also consider flats - perfectly ok for singles, families with no children and old people who are going to be increasing by numbers.</p>
PR-A-004	Strutt & Parker LLP / Dairystock Limited		1	<p>It is considered that the working figure of 3,500 homes is a reasonable assumption at this stage in the process. However, it is recommended that this figure is set as a minimum target for Cherwell District to meet because neighbouring authorities, most notably West Oxfordshire, may not be able to accommodate a similar number of houses due to the environmental constraints within those authorities, such as the proportion of the district that is designated an Area of Outstanding Natural Beauty (AONB). Because Cherwell has less areas of 'protected landscape' it is considered that it could meet somewhere between 4,000 and 5,000 new homes.</p>
PR-A-004	Strutt & Parker LLP / Dairystock Limited		2	<p>While it is not considered essential for the additional housing to be supported by additional employment generating development, it is apparent that opportunities exist for the housing growth to be complimented by further employment development within the district. Our client's site to the north of Kidlington (as shown on the attached location plan) is in close proximity to essential services and facilities and is well linked to the future expansion of Begbroke Science Park set out in Policy Kidlington 1 (Accommodating High Value Employment Needs) of the Council's adopted Local Plan. The construction of new homes near to jobs and employment would minimise journey lengths and provide a good balance of land uses, as encouraged by paragraph 37 of the National Planning Policy Framework (NPPF). The site would therefore contribute to the creation of a sustainable, mixed community. The prospect of further expansion at the Science Park will be improved by providing new housing on our client's land as it will create a larger workforce in the local area.</p>

PR-A-004	Strutt & Parker LLP / Dairystock Limited	4	<p>The additional growth in the district should aim to fulfil the three aspects of sustainable development as defined by the National Planning Policy Framework (NPPF): economic, environmental and social. By locating development in the most sustainable location – near to existing services, facilities and employment opportunities – will ensure that these three aims are met. Development on our client’s land would result in the release of some Green Belt land to the north of Kidlington and, in turn, would result in some landscape change. However, the logical and sustainable location of this land and the economic and social benefits that would be gained from developing the site would outweigh any environmental harm. In any case, suitable landscaping could be planted along the northern boundary of the site to reinforce the edge of the development and a substantial area of the site could remain undeveloped so that it could be used as recreational/amenity space with the potential of creating a country park for the benefit of the wider Kidlington community.</p>
PR-A-004	Strutt & Parker LLP / Dairystock Limited	8	<p>It is considered that the whole district may need to contribute towards meeting Oxford’s unmet housing need, but that due to the scale of the additional housing need (at least 3,000 new homes) it is submitted that strategic allocations will need to be made in order to meet this need. The housing market within Banbury and Bicester will be saturated if a significant number of additional large scale allocations are proposed for these towns. As such, it is considered that allocations should be made in and adjoining the larger villages and, in particular, Kidlington which has the closest relationship with the city. Our client’s land is suitable for a strategic development and is available now.</p>
PR-A-004	Strutt & Parker LLP / Dairystock Limited	9	<p>The Oxford Green Belt continues to restrict the ability of new development for the city to be located in the most sustainable and logical location, i.e. closest to the city. It is clearly important to maintain the Green Belt to ensure that urban sprawl is controlled and that coalescence between settlements does not occur. However, a detailed review of the Oxford Green Belt must be undertaken to consider whether the designation is still fit for purpose given the county’s current housing needs. In particular, the potential for new housing to be located within the Green Belt – potentially on the edges of Kidlington – must be properly assessed. The ‘Area for Search’ should therefore include the Green Belt.</p>
PR-A-004	Strutt & Parker LLP / Dairystock Limited	15	<p>Site submission - Land North of Kidlington. Sites that can form part of strategic scale sustainable urban extensions should be considered. Oxford’s unmet housing need will only be fully met if sites of a strategic scale are allocated and the most logical way of achieving this is by extending the existing larger settlements that are well related to the city.</p> <p>The site extends to 37 hectares approx with a potential developable site area of around 20 hectares. Such a site area has a capacity for of up to 500 dwellings assuming a density of 25 dwellings per hectare. Potentially a country park on the site.</p> <p>It would be possible to develop the site in conjunction with the land immediately to the south, which has previously been submitted to Cherwell District Council for consideration under site reference KI104 (Land North of The Moors). According to the Council’s most recent SHLAA Update 2014, this adjoining land has been identified as a site outside of an existing settlement with future potential for development.</p> <p>It is submitted that a combination of our client’s land and SHLAA site KI104 provides a logical opportunity for a strategic scale urban extension to the north of Kidlington, which would help meet the significant unmet housing need of Oxford City. Another advantage of development to the north of Kidlington is that it would avoid the coalescence issue that potential extensions south of Kidlington and north of Oxford would create (if approved).</p> <p>Site information provided.</p>
PR-A-004	Strutt & Parker LLP / Dairystock Limited	28	<p>Site Submission - Land North of The Moors and East of Banbury Road, Kidlington. We wish to submit a site on behalf of our client. This site has been submitted as part of the current ‘Call for Sites’ consultation and is described as ‘Land north of Kidlington’ (OS Grid Ref. E: 448807 N: 215187).</p>

PR-A-004 Strutt & Parker LLP 16 and 17
/ Dairystock
Limited

The existing strategic highway network, particularly the A40, A34 and A44, are functioning at close to capacity, which adversely affects travel times and in turn the economic productivity and success of the county. While infrastructure improvements may help to alleviate these issues, it is clear that the projected housing growth both in Cherwell District and across the county will place an increased pressure on this network.

It is considered that some of these problems could be solved by locating new housing development close to the strategic transport links that already exist. Our client's site is in close proximity to Oxford, as well as the recently opened Oxford Parkway railway station. Housing development in this location would therefore have excellent connectivity with public transport into and out of the city, while also allowing residents to travel north to Bicester or south to London from the new railway station. This approach of planning new development close to existing infrastructure and services accords with the sustainable development objectives of the adopted Local Plan and the NPPF.

PR-A-004 Strutt & Parker LLP 6 and 7
/ Dairystock
Limited

We agree that the 'area of search' should be well related to Oxford City. It would be best to deliver the city's unmet housing need in a location that is well connected to the strategic transport network and in close proximity to the city boundary so that access to the services, facilities and jobs within the city can be obtained quickly and without the need for extended journeys to be undertaken.

PR-A-005 D Pratt

16 Infrastructure-On the roads question, you plonk down 10,000 houses in Bicester by 2031 plus another 3000 yet to come creating another 20,000 cars or so. But there is no thought on the routes these incomers will take to get in and out of Bicester to get elsewhere and the surrounding villages just have to accept ever increasing traffic particularly rush hour. You mention that there is more work to be done on Exit 10 on the M40 but do not say what it is. I only hope that they are going to re route the Westbound traffic coming off to bypass coming thru Ardley, Middleton Stoney (a B road) and Kirtlington et al.

The peripheral damage that housebuilding and employment places brings to the rural villages is not even considered by the planners and it should be. Right from the beginning when Govt dictates so much building to be done by DCs, the first reply should be a demand for outlying/bypass road funds from the Govt. (cont...)

PR-A-005 D Pratt

18 (cont...) Sewerage - I expect that TW supply this facility to most of Cherwell and they should be forefront of the Utilities that you should constantly be badgering for improvements. Kirtlington, like other villages nearby, suffer from an old fashioned pre war system of using underground fibre pipes that are blistering which have long since been unfit for purpose but CDC does not seem to be pro-active in getting TW to update their system in the areas where development is known to be forthcoming. The National Planning Policy Guidance states that development can be phased to allow time for this to be corrected but if it is not working properly now, it won't be working in the first phase of the buildout so that comment is only a sop to avoid facing the problem up front. We spoke with Mr Atherton at CDC's Environmental Health Department when this was part of his remit but he has since moved elsewhere so nothing has been done to get TW off its backside to fix the overflow problem this Village has had for years. When the villagers call TW they are fobbed off with a reply such as it is your fault for putting fat down the drains or similar. Calls are frequently not returned. (cont..)

PR-A-005 D Pratt

1&6

Oxford City Overspill - I see from your LP1 Partial Review that Kidlington is going to expand its employment positions which includes the expansion of Begbroke for Oxford's Scientific Park and yet on page 12 of the LP2 Issues Paper, at 3.5 you state that there is to be NO strategic housebuilding at Kidlington. This surprises me immensely because at numerous CDC - run talks/occasions they have stated that the main areas for building in Cherwell will be B, B and Kidlington. This means it is going to be Oxford and Kidlington's overspill that will dump even more houses in the south western part of Cherwell District and I think CDC must try and put a stop to this part of Oxfordshire being conurbated. If Oxford wants or has to expand it should look to its own Colleges to supply land of which they own a lot in and close around Oxford itself. (cont...)

PR-A-005 D Pratt

16 (cont...) With the new Oxford Parkway Rail station, it is obvious to those that live, work and visit Kidlington, the free parking spaces available along the main route through Kidlington are all taken up by 7.30 am by train commuters who wish to avoid parking fees at the station and then bus in or walk to the station. This is extremely difficult for those that drive into Kidlington to get to work by 9 am to find no all day free spots and are forced to use the 3 hour car parks and move their cars at three hourly intervals. Again plonking some large venture in a small town without thinking about the knock on effect - I realise this is probably OCC's doing and not yours but it goes to show the lack of forethought by district councils.

PR-A-006 Rapleys / Pandora Trading Ltd 15+28

Site submission - Land West of Southam Road, Banbury. Bearing in mind the above, my client is the sole owner of a 17.79 ha site known as 'Land West of Southam Road' on the northern edge of Banbury. Approximately 6 ha of our client's land benefits from an extant outline planning permission for "Development of up to 90 residential (Use Class 3/extra care housing), Class A uses, Class D1 use with associated access, landscaping/open space, parking and related works" (LPA Ref: 14/01767/OUT). This same area of land also forms part of a wider site allocation within the adopted Cherwell Local Plan 2011-2031 Part 1 (July 2015) under 'Policy Banbury 2: Hardwick Farm, Southam Road (East and West)' which seeks to deliver approximately 600 dwellings.

As part of this current 'Call for Sites' consultation exercise, the remaining 11.5 ha of our client's land is being promoted for up to 150 homes. A Site Location Plan is enclosed.

The site is well connected to a number of established services and facilities, including:

- A multi-functional playing field and recreational facility to the west;
- A Tesco food store approximately 1 km to the south;
- Banbury Town Centre circa 2 km to the south;
- Employment sites including Hardwick Business Park and Banbury Cross.

The site will also benefit in its proximity to 500 sqm of retail and 500 sqm of community facilities, once built, being provided as part of the outline permission development immediately to the south. It will also be within easy walking distance to the new primary school being built to the east of Southam Road under planning permission 13/00158/OUT. (cont.....)

PR-A-006 Rapleys / Pandora Trading Ltd 15+28

(cont....) In terms of site accessibility, two multi-functional points of access will be available off Dukes Meadow Drive and Southam Road to the east to accommodate both vehicles and pedestrians. The site benefits from existing public transport provision, including two existing bus stops located on Dukes Meadow Drive approximately 200 m walking distance away, and Banbury Railway Station, circa 3km to the south of the site.

In summary, my client is fully committed to pursuing development on the remainder of the site which falls under single ownership, is unfettered and immediately available for development. As such, my client's site represents an established sustainable location to assist Cherwell in their commitment to addressing the housing need from elsewhere in the Oxfordshire Housing Market Area, particularly Oxford City. Further details are provided on the accompanying form.

PR-A-006 Rapleys / Pandora Trading Ltd	4&6	<p>The proportion of Oxford City's unmet needs that have been identified for Cherwell to accommodate is 3,500 dwellings. At this stage we have no specific observations to make with regard to this potential figure. Irrespective of the figure, the vision and principles for accommodating that need should follow and reflect the sustainable and balanced strategy already established for Cherwell in its adopted Local Plan (Part 1) – i.e., concentration of development at the main settlements of Banbury and Bicester, subject to environmental considerations. It is an anathema to suggest that the provision of an adjacent district's unmet housing need should warrant a different planning strategy from that employed within its own boundaries.</p> <p>Whilst on the one hand it might appear appropriate to concentrate the unmet need close to its source, this is not always possible, practicable or environmentally sustainable. Thus we consider that the accommodation of this need should be approached on a district-wide basis in accordance with the existing strategy. This concentration of housing at the main settlements provides opportunities to live and work in close proximity and reduce the level of out commuting to Oxford. However, an increase in housing needs to be supported by an increase in employment opportunities and other infrastructure improvements, including bus and rail corridors, if sustainable and balanced communities are to be created. (cont.....)</p>
PR-A-006 Rapleys / Pandora Trading Ltd	10	<p>(cont....) We consider that in monitoring housing provision and delivery, there should be some mechanism which distinguishes between Cherwell's own needs and that of Oxford City. The type of housing to be provided can be controlled through the planning application process rather than through a separate policy category reflecting Oxford's apparent need for more 2 and 3 bed houses. However, we do not consider it necessary or appropriate to identify specific criteria to restrict the occupation of the '3,500 or so' houses to those that have a local/familial/economic link to Oxford (in the same way that local affordable housing may be qualified). Housing need is housing need whether it is Cherwell or Oxford generated.</p>
PR-A-007 G Doucas	6	<p>No, I do not think that the 'area of search' should necessarily be 'well related' to Oxford.</p>
PR-A-007 G Doucas	8	<p>Yes</p>
PR-A-007 G Doucas	9	<p>No. This would be a very bad solution that would open the door for further future encroachments on the Green Belt. I fear that the Green Belt study is the first attempt at the gradual 'nibbling' of this valuable asset and the soothing phrases in the report are hardly convincing. There is bound to be strong opposition to any such move. In the same context, I think that it would be wrong for the District Council to allow the University to encroach on the Green Belt at Begbroke. I do not know what they propose to build there (laboratory space, offices?) but I am sure they could find space a bit further away from Oxford. After all, they do bring the Bodleian books back and forth from Swindon.</p>
PR-A-007 G Doucas	16	<p>The idea of creating additional P&R sites may have some merit, but moving existing sites away from Oxford is not a good one. If some Park and Ride sites were to be moved away from Oxford while the new housing is placed very close to the city, people who need to use their cars would have to drive away from the centre before they can get on the P&R. This is unlikely to be a successful solution.</p> <p>The loss of the Water Eaton site would be a retrograde step because it has provided an excellent service to people like me who live near (but not in) Kidlington but who do not have the bus services available to Kidlington</p> <p>The congestion on the main access roads to Oxford (A34, A44, A40) is well documented. What I have not seen is any mention on the ever increasing volume of traffic going through the centre of small villages. Our part of Yarnton, which is what is left of the old village, is a 'small' village and we have seen a huge increase in the traffic on the Yarnton-Cassington Road. I am sure that other villages must have had similar, or worse experiences. We need some protection.</p>
PR-A-007 G Doucas	26	<p>One of the most attractive features of Oxfordshire in general and of S. Cherwell in particular is the rural character of the landscape, which becomes evident at a rather short distance from the city centre. This has been commented upon by numerous visitors and is an asset worth preserving in any future planning decisions.</p>

PR-A-007	G Doucas	N/A	My comments are obviously based on my experience living in Yarnton for 16.5 years and on my understanding on what is being proposed for this area. I believe, however, that they are of more general applicability.
PR-A-008	Suzi Coyne Planning / Sheehan Haulage and Plant Hire Ltd	2	<p>Paragraph 2.19 of the Local Plan Part 1 Partial Review - Issues Consultation Paper ("the Partial Review") confirms that there is a clear link between housing need and employment growth, as well as other supporting infrastructure. Furthermore the quotations from the Oxford City Core Strategy (after paragraph 2.24 of the Partial Review) clarify that in the city there is a scarcity of available land; development is restricted by policy constraints; that it will never be possible to meet all of the city's housing and employment needs; and more particularly that housing need and demand far exceeds the amount of available and suitable land within Oxford, and employment uses struggle to compete against housing developers.</p> <p>Given this position in Oxford it is considered that the proposed additional housing in Cherwell to meet Oxford's needs must also be supported by additional employment generating development, and that land needs to be allocated for this purpose in Cherwell.</p>
PR-A-008	Suzi Coyne Planning / Sheehan Haulage and Plant Hire Ltd	20	<p>Paragraph 5.79 of the Partial Review confirms that the NPPF expects local planning authorities to support existing business sectors, and paragraph 5.81 states that the adopted Cherwell Local Plan supports economic growth and seeks to provide a more locally selfsufficient and sustainable economy.</p> <p>The waste management industry is a business sector and is one that is scarcely accommodated in Oxford at all. The Oxfordshire Minerals and Waste Local Plan Part 1 - Core Strategy Submission Document records at Table 10 that Oxford has 5 waste sites managing only 19,750 tonnes per annum of waste. This capacity amounts to a miniscule 0.8% of the County's total waste management capacity, yet with the highest population of all the Districts (at 23%) and a major economic and cultural centre Oxford is the main generator of waste within the county. The supporting text to Table 10 accepts that Oxford is unlikely to be able to provide for the waste management capacity to meet its needs. The issue therefore arises as to where and how this waste management - and economic - need should be satisfied.</p>
PR-A-008	Suzi Coyne Planning / Sheehan Haulage and Plant Hire Ltd	21	<p>The issue identified at Question 20 of the waste business sector not remotely being provided for in the city affects the potential development locations to meet Oxford's unmet needs, because the nearest existing employment sites in the Cherwell Local Plan Part 1, at Kidlington and Begbroke, are specifically for high value employment needs (paragraph 5.98 of the Partial Review). Waste management facilities are generally of the heavier industrial B2 type use and would therefore not be compatible with this locaiton. The only other employment sites that have been allocated for compatible type uses are at Bicester and Banbury, but are too far away to meet Oxford's needs and would not meet the Cherwell Local Plan objective of providing "a more locally self-sufficient and sustainable economy" (paragraph 5.81 of the Partial Review) in respect of the waste management business sector.</p> <p>The potential development locations to meet Oxford's unmet needs must therefore include employment sites which provide also for heavier industrial B2 type uses, where the waste management business sector could also locate.</p>

- PR-A-009 Blenheim Estates 1
- It is considered essential that the Area of Search should be focused on locations that are wellrelated to Oxford City. Oxford is an economicdriver, meeting the City’s unmet housing needs means that it is inevitable that many people moving into the new homes will have strong links with the City, whether for employment, leisure, family or other reasons.
- Given the above, it makes sense to ensure that housing land to meet Oxford City’s unmet need is wellrelated to the City. This means that land closest to Oxford City, but outside the Green Belt, with excellent transport links, should be considered for development first.
- In Cherwell, the main towns, Bicester and Banbury, have seen rapid growth and have significant land allocations for new housing. There is no need to allocate further land around these two towns. By way of contrast, there is a need to allocated new housing land to provide for the sustainable growth of Oxford City, within appropriate locations close to and wellconnected with, the City. Preferably, new housing allocations should also be capable of accessing daytoday services and facilities – such as local shops, schools, doctors surgery, pubs and cafes – without significant travel distances. Ideally then, the Area of Search should also focus on locations on the edge of, or very close to, existing settlements with services and facilities. In this way, meeting the needs of Oxford City can also help to boost the sustainability of existing settlements, by supporting local services and businesses and investing in infrastructure.
- PR-A-009 Blenheim Estates 2
- The key goal for additional growth in Cherwell to meet Oxford City’s unmet need should be sustainable development. This means investing in and providing for necessary infrastructure and services alongside new homes. It means providing a broad range of homes – from affordable housing through to high quality, even expensive homes, and everything in between. The best places provide for variety, and don’t simply comprise estates of the same type of housing throughout. Sustainable development means investing in high quality design – creating places that are distinctive, establish a sense of place and enhance local character.
- There should be plenty of scope for a broad range of travel options. Some parts of Cherwell closest to Oxford have some of the best transport links in the country: there is an exceptional bus link running from Woodstock to Oxford ; there are two train stations (Oxford Parkway and Long Hanborough) with fast, direct links into central London ; there is a growing international airport. Meeting Oxford’s unmet need in a sustainable manner means making the most of these exceptional transport links by associating new development with them.
- As per 1) above, to be sustainable, allocations to meet Oxford’s unmet need should have good access to services and facilities. The sites should be close to, and provide for investment in, existing centres. This is in line with national planning policy, which supports the vitality and viability of town centres.
- To achieve all of the above, it is essential that the development sites are of sufficient scale to achieve all of the above. Smaller schemes will simply be incapable of providing for the major investment needed to provide new, and invest in existing, infrastructure. By way of contrast, large developments, by their very nature, can bring major benefits in the form of direct investment in necessary infrastructure, facilities, jobs and housing for today and into the future. Ideally, each housing allocation should be for around 1,000 dwellings.
- PR-A-009 Blenheim Estates 3
- Housing allocations to meet Oxford’s unmet need should focus on existing transport corridors, preferably adjacent to major sustainable transport infrastructure – including bus corridors, Park and Ride sites and good access to railway stations; as well as excellent access to the road network, given that the majority of workers in Oxfordshire drive a car.

PR-A-009	Blenheim Estates	4	Allocations should have excellent access to existing and future employment sites. Millions of square feet of employment space exists, or has planning permission, along the North Oxford corridor, between the outskirts of the city and Woodstock. This corridor includes regionally significant science parks, an airport and rapidly growing employment areas. It is not sufficiently supported by new housing, meaning that workers need to travel from afar. New housing should be located within the same corridor. This would also have the advantage of excellent public transport access to Oxford in a transport corridor which has received £millions of investment.
PR-A-009	Blenheim Estates	5	New development should ensure significant investment in open space, sport and recreation provision, and the enhancement of biodiversity. This is easiest to achieve on large development sites, providing space to plan and sufficient returns to fund major investment in social and environmental infrastructure. Allocations should take this, local character and the preservation and where possible, enhancement of heritage assets into account.
PR-A-009	Blenheim Estates	28	Site submissions - Land at junction of Langford Lane/A44, Begbroke; Land North West of Oxford Airport, nr Woodstock; Begbroke Lane, North East Field, Begbroke; Land East of Marlborough School, Woodstock
PR-A-010	Anglian Water Services Limited	18	<p>At this stage the District Council has yet to determine whether the area of search for meeting Oxford's housing needs would be limited to the Oxford Green Belt within Cherwell District or it would be district wide. Therefore it is difficult to comment further on the implications for Anglian Water's existing infrastructure at this stage.</p> <p>However it is important that the availability of water recycling infrastructure within Anglian Water's area of responsibility is considered further by the Council when determining the distribution of housing within the district. Please note that Anglian Water would wish to comment further on any housing allocation sites identified by the District Council within our area of responsibility.</p>
PR-A-011	Sport England	18	<p>As Cherwell District Council considers increased housing provision with the implications on transport economic development, natural environment, with the partial review, it does not appear to consider the impact on open space, sports and recreation facilities as per paragraph 73 of the NPPF.</p> <p>Therefore Sport England would strongly urge CDC to prepare a robust and up to date playing pitch strategy and built facilities strategy to ensure healthy sustainable communities are created.</p> <p>Without up to date robust strategies, It is difficult to see how the partial review of the local plan could be considered to be robust.</p>
PR-A-012	Gosford and Water Eaton Parish Council	1	This amount is of concern and is questioned about there being a possibility about a hidden agenda over Oxfordshire housing with good transport connects being able to accommodate London overspill.
PR-A-012	Gosford and Water Eaton Parish Council	2	Under the principles of keeping the home to work journey distances down to a minimum, could lead to much larger developed areas. Where people may still work long way from home, which creates traffic and transport problems.
PR-A-012	Gosford and Water Eaton Parish Council	3	To keep large green spaces particularly in the Green Belt Gap between the City and Kidlington. It is considered that much of Oxford's home and business needs can be met away from the City.
PR-A-012	Gosford and Water Eaton Parish Council	28	There are no sites within the Parish which the Parish Council wishes to propose for meeting Oxford's unmet housing needs.

PR-A-012	Gosford and Water Eaton Parish Council	10-15	Would prefer integrating housing and employment that is allocated into the approved Cherwell Local Plan in stages. It is noted Gosford & Water Eaton does not appear mentioned by CDC. Under an earlier village search assessment for housing, the Parish Council accepted that in very a worst case scenario and last resort a development might become inevitable on the field sandwiched between Beagles Close and the recent Kidlington burial ground/temporary allotment site.
PR-A-012	Gosford and Water Eaton Parish Council	4-5	It should be distributed around some parts of Cherwell in stages, monitor and reduce downwards if necessary.
PR-A-012	Gosford and Water Eaton Parish Council	6-9	Should be considered on a Cherwell wide basis. CDC is reminded that the Peartree area used to be part of the Green Belt, which is now being developed as the North Oxford Gateway. Therefore Oxford City has already taken a large chunk of land out of the Green Belt, which is considered could take more housing, rather than eating further into Green Belt land. It is also considered that more housing could be accommodated within Oxford.
PR-A-012	Gosford and Water Eaton Parish Council	16-17	There is concern about the accuracy of predictions produced from the OCC national/countywide traffic modelling techniques and over input data from traffic surveys undertaken for proposed development projects. For instance from comparing peak traffic counts between results produced by consultants commissioned by Chiltern Railways, TVP HQ development & Northern Gateway development produced significant variances and after development predictions.
PR-A-012	Gosford and Water Eaton Parish Council	18-19	Concern over unsuitability of education establishments, water sewerage, medical centres, the road network and public transport to accommodate such further development. It is considered that these provisions are likely to not be met along from developer funding. It is considered that CDC's Community Infrastructure Levy (CIL) used to support infrastructure should also be used for flood prevention from developments located up stream in a watercourse catchment, for protecting existing downstream properties by funding the provision and maintenance of flood defences and watercourse maintenance.
PR-A-012	Gosford and Water Eaton Parish Council	20-21	It is considered that to accommodate the required infrastructure to support the housing and business development problems and issues generated will also require support funding from the Government and County Council which is unlikely to be available due the continually cut back of public finance.
PR-A-012	Gosford and Water Eaton Parish Council	22-23	More housing and people in Cherwell will add to more air and noise pollution, road congestion and loss of open countryside and rural areas. It is hoped CDC's Cherwell Local Plan policies can address this.
PR-A-012	Gosford and Water Eaton Parish Council	24-25	<p>The Green Belt area between Kidlington and Oxford in Parish of Gosford & Water Eaton needs protecting as it is of a high quality landscape, being important for farming & wildlife habitats, where a network of footpaths serve as a recreational facility for people living in bordering urban areas.</p> <p>The Parish Council request that in plan making and consultation involvement CIL, along with New Homes Bonus contributions should be used to provide funding for flood defences schemes. This being under the concept that surface water runoff from large developments upstream of this Parish such as Banbury, Bicester, & Upper Heyford drain one way, or another into the River Cherwell, or River Ray and that the Environment Agency has confirming that their flood alleviation scheme north of Banbury will not have any effect on flooding in this Parish. Therefore there is concern about increasing flood risk in this Parish due to the impact from upstream developments taking place. It should therefore be accepted by CDC under their involvement consultation process, that it is fair and reasonable that such developments contribute towards the cost of maintaining, upgrading and providing additional flood defences. Contributions should also be used towards EA and riparian landowner to remove fallen trees and other obstructions from out of watercourses & maintain them.</p>
PR-A-012	Gosford and Water Eaton Parish Council	26-27	There are a number of listed building in the Parish of Gosford & Water Eaton which need protecting, such as St Fridewides farm, Water Eaton Manor, Gosford House and Kings Arms (Harvester).

PR-A-012	Gosford and Water Eaton Parish Council		<p>1 The introduction is clear into why this partial review is taking place and about meeting the housing needs for Oxford by the District Councils, which is under a "Duty to Co-operate". However, there has been much criticism, especially by amenity groups over the make up representatives on the Oxfordshire Growth Board, its countywide housing predictions, green belt study and working arrangements. The Parish Council has some sympathy over these criticisms which are levelled that the process seems biased towards too much development and concerns over the future of the Oxford Green Belt and villages in Oxfordshire.</p> <p>The Parish Council has answered CDC's questions to the best of its ability about issues which have a direct, or indirect affect on the Parish and local community, as follows.</p>
PR-A-012	Gosford and Water Eaton Parish Council		<p>9 Regarding issues over meeting Oxford's unmet housing needs in Cherwell. The Parish Council is concerned enough to point out from the Oxfordshire Green Belt Study, that is deceptive and gives the general public a false impression when the Land Use Consultants identify and analyse parcels of land in the green belt which are located in this Parish by referring to them as OX(no.), as if they are associated with Oxford City. Whereas these parcels of land are in the Gosford and Water Eaton and District of Cherwell. The Parish Council request Cherwell District Council to point this out to the Oxfordshire Growth Board and press them to amend this referencing accordingly, as EWE(No)</p>
PR-A-013	R Turner		<p>1 Fundamentally the question must be asked is 3,500 homes a reasonable working assumption for Cherwell. The reasoning behind this figure is based on little real time, robust evidence. In addition the production of this data should be made independently and not by parties who are connected in anyway shape or form connected to the construction industry. The drivers of suggested growth appear to be out of line with the UK's expected growth as a whole.</p>
PR-A-014	Simply Land (Oxford) Ltd	1	<p>3,500 homes is not a reasonable working assumption. If 15,000 homes is the 'working figure' for Oxford's unmet housing need then why would Oxford City be included within the distribution. At this time, we agree it prudent for the adjoining Oxfordshire Authorities to contemplate an even distribution until such time that more detailed work has been undertaken to determine their own abilities to accommodate the unmet need. However, including Oxford City within this distribution is irrational. We consider that Cherwell along with the other Oxfordshire Authorities should plan for an additional 3,750 homes (15,000 divided by 4).</p>
PR-A-014	Simply Land (Oxford) Ltd	3	<p>A key issue for consideration is the relationship of any new housing to the City itself. Other key issues include the release of Green Belt land; and locating development along existing sustainable transport corridors or corridors which could be enhanced through development funding initiatives and grants.</p>
PR-A-014	Simply Land (Oxford) Ltd	4	<p>Development that is truly sustainable, well designed and planned. Economic, environmental and social goals will need to be identified in order to satisfy the true meaning of sustainable development.</p>
PR-A-014	Simply Land (Oxford) Ltd	6	<p>Yes</p>
PR-A-014	Simply Land (Oxford) Ltd	7	<p>Transport links/corridors, access to services and facilities and the ability of new development delivering new transport infrastructure.</p>
PR-A-014	Simply Land (Oxford) Ltd	8	<p>No. Providing for Oxford City's unmet need on a districtwide approach would displace the population and led to an increase in potentially unsustainable transport journeys back into Oxford.</p>
PR-A-014	Simply Land (Oxford) Ltd	9	<p>Yes, but only to the extent that siting development within the Green Belt does not led to 'significant' and 'demonstrable' harm which undermines the very purpose of designating land as Green Belt – prevention of urban sprawl. In my opinion, the Oxfordshire Authorities should take a closer look at the submarkets within the Oxfordshire HMA and define the 'area of search' or plan area from this.</p>
PR-A-014	Simply Land (Oxford) Ltd	10	<p>Yes, it would be prudent to do so.</p>
PR-A-014	Simply Land (Oxford) Ltd	11	<p>Adopt a ringfenced approach and limit it to the area of search' or plan area.</p>

PR-A-014	Simply Land (Oxford) Ltd	15	The Council should be looking at the Green Belt land to the east of the Oxford Road all the way up to the Water Eaton Park & Ride as well as the land north of the A34 bounded by the A40 and A44 and Oxford canal. Concentrating development in both these locations could yield circa 2,600 new homes and would be consistent with the rest of the Oxford's urban for.
PR-A-014	Simply Land (Oxford) Ltd	28	Site submission - Land at Drinkwater, Oxford
PR-A-015	P Kavanagh	1	No. It is derived from the Oxfordshire SHMA which has simply been accepted by the Council and not subjected to serious independent scrutiny. The SHMA was drawn up by private consultants who largely work for the development industry and therefore have a conflict of interest. Its figures are much too high, far in excess of previous trends and clearly unrealistic. I do not accept that the SHMA figures represent either Cherwell's or Oxford's needs.
PR-A-015	P Kavanagh	2	No. The excessive housing figures are already based on unrealistic forecasts of growth in employment. To provide for yet more employment generating development is simply creating a vicious circle.
PR-A-015	P Kavanagh	9	No. Green Belt is a permanent designation. The Green Belt around Kidlington is much valued. National Policy says that housing need is not a reason to build on the Green Belt. The Government, in its manifesto, made a commitment to protect the Green Belt.
PR-A-015	P Kavanagh	16	Transport networks in this area are already overloaded. I do not believe that current proposals will solve existing problems, let alone those caused by additional growth in Cherwell and elsewhere in the County. The Highway Authority's vision and objectives, that you quote, are vague aspirations and without substance.
PR-A-015	P Kavanagh	24	Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will further damage the natural environment of Cherwell.
PR-A-016	R Prince	1	No. The figure comes from the Oxfordshire SHMA which was prepared without any public consultation and contains many questionable assumptions. It was put together by private consultants working on behalf of property developers so I do not think it is unreasonable to take the view that figures are likely to be biased in favour of the developers. The SHMA was not subjected to any independent validation although an independent planning expert has concluded that the estimated figures in the SHMA are likely to be "grossly overstated". Consequently, I cannot accept that the SHMA reflects the housing needs of either Oxford City or Cherwell.
PR-A-016	R Prince	2	No. One of the suspect assumptions on which the overstated housing needs were arrived at in the SHMA was the level by which employment would grow. Providing more jobs would simply lead to more pressure from the developers and put a strain on local services. In the Kidlington area, we already have the example of the developers of the Technology Park in Langford Lane offering to provide 450 dwellings in the Green Belt north of The Moors to "help" to satisfy the expected demand for housing from an anticipated new workforce of 1200.
PR-A-016	R Prince	9	No. The Green Belt was put in place for a very good purpose and the increasing pressure from developers makes the reasons for doing so are even more important today than when it was first designated. The Government's own guidance states that unmet housing need is not a reason for building in the Green Belt and this has been reinforced in the manifesto of the current administration where there is a commitment to protect the Green Belt.

PR-A-016	R Prince	16	<p>Generally, I am aware of the proposals made recently to try to improve the whole transport situation in the area but they lack clarity and I am not convinced that they will solve the current problems in the long term, especially if there is to be further substantial development on top of what has already been designated for Cherwell. On a more local and specific basis, road transport is a particular issue in Kidlington. I have lived here since August 1975 and in all that time, the volume of traffic in the village and surrounding roads has increased considerably, not least because there has been widespread residential development within the village, as well as increased commercial activity, without any additional access roads being built. The congestion will now be made worse by the development of the Technology Park in Langford lane as this will bring in a new workforce of up to 1200 to the area. It is obvious, therefore, that the matter will only be exacerbated if sites in and around Kidlington are given over to providing some of the extra 3500 houses for Oxford.</p>
PR-A-016	R Prince	24	<p>The extent of development required under the local plan for Cherwell can only have a detrimental effect on the natural environment. The situation will only be made much worse if Cherwell has to find another 3500 homes for Oxford.</p>
PR-A-017	Oxford Green Belt Network	2, 8+9	<p>As the Planning Policy Team will appreciate, it is difficult for us to respond to the Consultation except in broad terms since we are in the dark over what the Oxfordshire Growth Board are likely to come up with in the summer. Since our primary concern is with the Oxford Green Belt, our comments are largely confined to those parts of the Consultation which have most bearing on the Green Belt. For us the key issue in this matter of unmet need is the future of the Green Belt.</p> <p>We are pleased to note that the Consultation recognizes the purposes of the Green Belt and it is clear to us that the main issue facing the District Council is that of balancing the role of the Green Belt against the pressure that you will be under, not least from the City Council, to locate as much of the unmet housing need as close to Oxford as possible. This being so, we urge you not to confine your area of search to the Green Belt, but to allow your search to take in the whole of Cherwell District (Question 8). Ideally, of course, we would like to see the Green Belt excluded from this area of search (Question 9), although we acknowledge that you may feel obliged to look there too.</p> <p>We have a number of observations that relate to particular parts of the Green Belt and we examine these below in the context of what the Oxfordshire Green Belt Study of 2015 has to say about them. (cont....)</p>
PR-A-017	Oxford Green Belt Network	2, 8+9	<p>(cont....) Figure 4.1 of that Study looks at the performance of the land parcels against the Green Belt purpose of checking unrestricted urban sprawl and the need to protect open land from such urban sprawl. Map Issue 1a shows parcels between Oxford and Kidlington all scoring High on this purpose (OX1, OX22, K16) and Medium in the case of OX2. This area constitutes the main portion of the 'Kidlington Gap' to which you refer in paragraph 5.28 of the Consultation, and is an area under pressure, not least from the knock-on effect from the new Oxford Parkway rail station. We hope that the High scores attributed to this area in terms of potential urban sprawl will assist you in protecting this particular part of the Green Belt, where otherwise the possibility of Oxford and Kidlington joining up, both physically and administratively, is a very real possibility in the years ahead.</p> <p>Figure 4.3 of the Green Belt Study looks at the performance of the land parcels against the Green Belt purpose of preventing settlements from merging into one another. Here the parcels that score High are those which separate the villages of Kidlington, Yarnton and Begbroke (OX1, OX22, K15-18, YA1, BB1) whilst OX2 and YA2 score Medium. The future of this area, which includes the attractive canal corridor, but also the science park at Begbroke, is critical if this purpose of the Green Belt is to be upheld. We were pleased, therefore, to note in paragraph 3.24 of your Consultation that you consider prevention of coalescence of settlements to be a key function of the Oxford Green Belt. We commend, also, your observation in paragraph 3.26 that any further housing growth at Kidlington and nearby villages to accommodate unmet housing need would have to be considered against the purposes of the Green Belt, presumably having prevention of coalescence in mind. (cont....)</p>

PR-A-017 Oxford Green Belt Network 2, 8+9

(cont...) Additionally, we fully endorse your observation in paragraph 5.136 of the Natural Environment section of the Consultation that the countryside immediately adjacent to Kidlington and Yarnton comprises part of the setting of the two villages and helps to retain their separate identity, We trust that this intention to protect village identity will carry weight in whatever you propose to do next. We hope, too, that you will bear it in mind when the small-scale review of the Green Belt at Begbroke science park takes place. Otherwise the latter is likely to act as the 'cuckoo in the nest' that will lead to the total merging of Kidlington, Yarnton and Begbroke, defeating that good intention.

Figure 4.4 of the Green Belt Study looks at the performance of the land parcels against the Green Belt purpose of assisting in safeguarding the countryside from encroachment. Understandably the areas that score High are the outer parts of the Green Belt that frame Yarnton to the west (YA2, YA3) and Kidlington to the north and east (K1-13), The latter fields, to the north of The Moors, are particularly pressured from developers keen to exploit this attractive and much enjoyed countryside towards the River Cherwell and beyond. Again, what you say in paragraph 5.136 about the need to protect the countryside adjacent to Kidlington and Yarnton applies to this area. (cont...)

PR-A-017 Oxford Green Belt Network 2, 8+9

(cont...) Figure 4.5 of the Green Belt Study looks at the performance of the land parcels against the Green Belt purpose of preserving the setting and special character of an historic town, in this case Oxford. The map indicates several areas that score Medium in this respect and we note with approval what you say in the Consultation in paragraph 5.146 that the Green Belt in the south of the (Cherwell) District plays a part in preserving the setting and special character of Oxford. It does this, in part at least, by preventing excessive levels of development that would otherwise undermine the wider aims of the Green Belt in providing open space for public enjoyment close to both the City and to nearby settlements. For this reason we reject the suggestion put forward in your **Question 2** that additional housing to meet Oxford's needs might be accompanied by additional employment. Such a policy would just create a cycle of continuing growth pressure, further employment requiring more housing and so on. This is what is happening at the City's 'Northern Gateway' where the employment planned, with only a small amount of housing, will add to the unmet housing need that Districts like your own are being expected to meet.

It is evident from the findings of the Oxfordshire Green Belt Study referred to above that practically all the Green Belt land in Cherwell District rates High on at least one, and usually more than one, of the fundamental purposes of a Green Belt. This being the case, we can only agree with your comment in paragraph 5.154 of the Consultation that meeting Oxford's needs whilst constraining development in the Green Belt is a significant challenge. Without wishing to dramatise the situation, we believe that how Cherwell District Council responds to the challenge it has set itself will determine the future of the Green Belt north of Oxford.

PR-A-018 J Wainwright

1

No, I consider the figure of a further 3500 homes additional to those already projected a grossly inflated estimate of housing needs in Cherwell. I am very surprised that this figure is being taken as gospel by Cherwell D.C. when it comes from an SHMA Report produced by people with close connections to the development sector. The classic response "They would say that, wouldn't they" springs to mind. It is an exorbitant increase wildly out of keeping with previous estimates.

PR-A-018 J Wainwright

2

No. If there is already an alleged shortage of housing in Cherwell, where is the logic in encouraging more employment generating development which is obviously going to create even greater demand for housing? This would be wilfully exacerbating the problem.

PR-A-018 J Wainwright

9

No. Green Belts were a marvellous concept created to prevent the relentless expansion of towns and cities and to provide a lung for the inhabitants of those cities. For that reason they should by definition be permanent and not vulnerable to the transient needs of local councils or the interests of developers. Moreover, National Policy states that housing need is not a valid motive for building on Green Belt and the present Conservative government in its 2015 manifesto confirmed its commitment to protecting it. The Green Belt around Kidlington is particularly scenic; it is a precious asset much used for walking and a valuable habitat for wildlife. It should be protected at all costs and any attempt to encroach upon it for development for whatever reason must be resisted. Development should be on brownfield sites, of which there are many.

PR-A-018	J Wainwright	12	I would question why it is Cherwell's responsibility to solve Oxford City's housing problems and despoil its precious countryside in the process when there appears to be no shortage of brownfield sites ripe for development in Oxford.
PR-A-018	J Wainwright	16	There is already frequent congestion, sometimes severe, on the main roads through Cherwell. In Kidlington residential roads are increasingly being used as 'rat runs', with all the dangers that implies. A massive increase in housing to the levels projected would produce intolerable congestion to the area's through roads and in the vicinity of any large housing development, to which the Highways Authority's present insubstantial objectives offer little hope of a solution.
PR-A-018	J Wainwright	24	The number of houses being projected would be a serious threat to the rural environment of Cherwell. Once Kidlington and other villages start extending to take over precious countryside, the process would be inexorable. The countryside around us is an amenity much valued by local residents and is also essential for the conservation of wildlife. To take Kidlington alone, there is a great variety of fauna in the fields around: foxes, badgers, grass snakes, water voles, great crested newts and many species of bird. It would be irresponsible to put these habitats at risk. Ours is a small country and we must not deprive our descendants of the countryside that remains by concreting it over.
PR-A-019	Bloombridge	3	In terms of who will be engaged, we suggest that Cherwell will receive better information on the deliverability of sites and 'market signals' by holding a "Developers' Forum", to be attended by agents, housebuilders and commercial developers. If this forum reviews the demand side, it would also be useful to run a "Constraints & Opportunities" Workshop in parallel to help define the strategic inputs to the new spatial plan. The ideal is to identify locations with high demand/need with (relatively) low environmental impact; better still if regeneration or other community opportunities can be added in as well. This 'high level' approach will help set priorities and bring early clarity to the possible options, avoiding 'analysis paralysis'.
PR-A-019	Bloombridge	28	Site submission - Land North of The Moors, Kidlington
PR-A-020	South Oxfordshire and Vale of White Horse District Councils	General	<p>Thank you for the opportunity to respond to the Partial Review of the Cherwell Local Plan (Part 1): Oxford's Unmet Housing Need – Issues Paper consultation. We note Cherwell's positive and proactive approach to working with partner authorities in Oxfordshire to consider how Oxford's unmet housing need is addressed.</p> <p>We note that Cherwell District Council is planning to publish an 'Issues and Options Consultation' in autumn 2016 following the work of the Oxford Growth Board, once the apportionment of Oxford's unmet housing need has been identified. The Vale of White Horse and South Oxfordshire District Councils look forward to continuing to work positively with Cherwell District Council and the other Oxfordshire authorities to assist with this process.</p>
PR-A-021	J East	1	No. It is derived from the Oxfordshire SHMA which has been accepted by the Council without serious independent scrutiny. The SHMA was drawn up by private consultants who largely work for the development industry and therefore have a conflict of interest. Its figures are much too high, far in excess of previous trends and clearly unrealistic. I do not accept that the SHMA figures represent either Cherwell's or Oxford's needs.
PR-A-021	J East	2	No. The excessive housing figures are based on unrealistic forecasts of growth in employment. To provide for yet more employment generating development is simply creating a vicious circle.

General Comment: It would be helpful for the SA to be nuanced in order fully to allow for Green Belt policy, such as the 'Strategic Gaps'. The reason for this is that SA's tend to deal with qualitative criteria, which can often understate the importance of 'Strategic Gaps', including with regard to their importance to the local community and to the resilience of the Green Belt as a whole.

In a similar vein, Kidlington is plainly a settlement that could benefit from growth associated with Oxford, particularly in relation to the regeneration of its town/village centre. The initial work by Alan Baxter produced an interesting and widely consulted upon Master Plan, that needs to be brought out in the general themes of the SA. There are, in short, some obvious places in the district where growth needs to be harnessed.

PR-A-021	J East	9	Most definitely not. The Green Belt is a permanent designation and is much valued around Kidlington. National Policy says that housing need is not a reason to build on the Green Belt and, furthermore, the Government, in its manifesto, made a commitment to the electorate to protect the Green Belt.
PR-A-021	J East	16	Transport networks in this area are already overloaded. I do not believe that current proposals will solve existing problems, let alone those caused by additional growth in Cherwell and elsewhere in the County. The Highway Authority's vision and objectives, that you quote, are vague aspirations and without substance.
PR-A-021	J East	24	Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will unquestionably further damage the natural environment of Cherwell.
PR-A-022	Savills / New College	1	It appears to be acknowledged that there is a need for around 15,000 more dwellings to meet the housing need. As noted this equates to about 3,000 for each local authority on a simple split approach. The ability of each authority to absorb the need will vary but if there is suitable land at Cherwell to meet its share or an increased share such as 3,500 (or possibly more) then provided it can be provided in a sustainable way Cherwell should provide for the capacity it could deliver.
PR-A-022	Savills / New College	2	In providing a sustainable community there has to be a mix of uses. It is not appropriate merely to provide dormitory residential zones which merely lead to extensive commuting for work, recreation and normal living activities such as shopping and schools. New development should be directed to areas where there are suitable communities and amenities, including employment opportunities, where possible.
PR-A-022	Savills / New College	4	The creation of balanced new communities over the period of the plan (to 2031) that do not impose unreasonably on established settlements.
PR-A-022	Savills / New College	6	Whilst the focus is inevitably Oxford with its scale and importance as a regional centre due to the major M40 corridor through the District and other key communication links such as the rail corridors and other major settlements from London to Birmingham and Milton Keynes etc the Oxford focus should not be the sole driver in the search for sites. There is a regional issue and the adjoining SHMA areas have also identified the pressures for additional development.
PR-A-022	Savills / New College	8	A District wide area of search is appropriate however an initial sieve map approach will no doubt quickly rule out certain areas due to environmental constraints or the lack of infrastructure.
PR-A-022	Savills / New College	9	Green Belt is merely a planning imposed constraint however over many decades the Green Belt has provided a useful function in containing sprawl and ensuring protection for the environment within the designations. If there are opportunities to jump the green belt to help deliver the necessary housing and associated development these should be explored before the Green Belt is reviewed.
PR-A-022	Savills / New College	10	The partial review is for the period to 2031 and the delivery of housing should be assimilated with the delivery identified in the recently adopted plan to deliver housing on an overall basis. It is not appropriate to separately identify the need arising from the Oxford unmet need in a separate way. The overall District delivery level has to be increased to reflect the need.
PR-A-022	Savills / New College	11	The overall housing delivery target should be managed as one. If not the integration of the new housing and communities will not be satisfactory. It is not realistic to separately define housing being developed to meet the Oxford issue and separately that for the Cherwell Local Plan.

PR-A-022	Savills / New College	12	<p>My client owns land at Upper Heyford within and adjoining the existing allocation. This site has been a major focus of employment for the local community in the centre of the District since it was developed as the major strategic cold war airbase. It has extensive employment opportunities. Also it has the benefit of Lower Heyford station close by which could be developed to enhanced links to Oxford. Also with very limited highway improvements a prime link to the M40 (Junction 10) and A34 to Oxford can be created with only minimal disturbance to the community as the current road passes along the eastern edge of Ardley on the B430.</p> <p>The growth potential of this location has already been noted and this can easily be expanded without significant further impact to make best use of the infrastructure already being built for the allocated community. An additional allocation would merely be an extension of the scheme already being brought forward creating a desirable new community.</p>
PR-A-022	Savills / New College	15	<p>The environmental assessment for the adopted Local Plan identified that there was scope for further expansion to the south of the Upper Heyford allocation and this was further acknowledged by the expansion of the allocation into part of this land. Attached hereto is a plan showing coloured pink and blue which can be integrated with the Dorchester Land promotion of the current allocation and well landscaped into the new Heyford Park community whilst providing a significant development area to help meet the need.</p>
PR-A-022	Savills / New College	16	<p>Upper Heyford has excellent links to Junction 10 on the M40 which can be improved without any significant impact on the rural community. It also has Lower Heyford station close by which could be enhanced to provide good links for the scheme and surrounding villages.</p>
PR-A-022	Savills / New College	18	<p>infrastructure at Heyford Park is being provided which serves not only the new community but also the surrounding rural settlements. Expanding the scale of the development over the life of the Local Plan would further enhance the local offer.</p>
PR-A-022	Savills / New College	20	<p>Upper Heyford has been a major employment location in the District for many years. This can be utilised to create a dynamic third major settlement in the District after Banbury and Bicester.</p>
PR-A-022	Savills / New College	22	<p>As a new community Heyford Park is being developed as a sustainable development and community. If it is further expanded then this attribute will only be enhanced.</p>
PR-A-022	Savills / New College	28	<p>Site submission - Land South of Upper Heyford. See site at Upper Heyford submitted separately.</p>
PR-A-023	Oxford Brookes University	12	<p>On behalf of Oxford Brookes University, I should like to express our support for these plans. The proposals seem sensible and realistic, and would provide a partial solution to Oxford's chronic shortage of affordable housing</p> <p>Therefore I am happy to express our warm support for these plans.</p>

PR-A-024 Framptons / DB 2 and 20
Symmetry

Although the document makes reference to the national policy context (paragraphs 5.77-5.80), neither the Cherwell Context, nor the Oxford Context display any comprehension of the spatial interface between manufacturing and the logistics sector. As stated in the accompanying Baker Rose report (paragraph 2.5):

2.5 The logistics industry is crucial to the economic well being of an economy. It is also crucial to the success of individual businesses and of course, the end consumer. It is not simply the movement and distribution of goods. The Supply Chain now includes the production, storage and distribution of materials, parts, sub-assemblies and completed products, as well as returns, recovery, re-use and recovery. Logistics encompasses the complete process from raw material through production, to delivery to the end consumer; and back, as returns or for recycling, recovery or re-use.

Baker Rose makes the telling point that (paragraph 2.6):

'Whilst the average consumer may be oblivious to complexity behind the receipt of a new product, this should not be the case for policy makers'.

This linkage between logistics and manufacturing is explained in the function of Tiers. Paragraph 3.2 states:

3.2 The 'tiers' referred to are the level of closeness in contract terms a supplier is to the original equipment manufacturer (OEM). Raw material is Tier 4, a supplier of individual bits, Tier 3, a supplier of the part made from bits, Tier 2 and the supplier of various parts ready assembled as a unit, Tier 1. Tier 1 suppliers will deliver direct and usually sequenced into the production line. (cont....)

PR-A-024 Framptons / DB 2 and 20
Symmetry

(cont....) In Cherwell and Oxford the interface between manufacturing and logistics is amply demonstrated through the automotive manufacturing industry. Paragraphs 7.1-7.3 state:

7.1 In practice the automotive manufacturing industry has led on destocking its supply chain to the point of manufacture (and increasingly on premium products, its stock of finished products too). Just in time and the reliance on Tier 1 suppliers with tight delivery windows and huge penalties for failure, has put pressure on demand for 'large shed' space with very good access to the OEM's centres of production.

7.2 For the Tier 1 & 2 suppliers the two major drivers for success in the UK are now the consolidation of production to increasingly efficient and larger facilities; and the development of leading edge Research & Development capacity.

7.3 We see this as a very important future demand for Cherwell. The existing concentration of very high quality R&D can and should lead to a growth in demand for Tier 1 & 2 suppliers, both to the established and growing specialist business, but also for those serving the major OEM's – with ready access to Oxford and the West Midland based OEM's. Easy access to the M40 will therefore be key.

In considering additional housing in Cherwell to meet Oxford's needs, it is therefore essential that the Partial Review also considers additional employment generating development. Paragraph 11.5 of the Baker Rose report states:

11.5. Key motorway locations will have significant economic importance for Cherwell, the wider region and indeed the UK economy, as it is rebalanced with more manufacturing, whilst also accommodating the changes in distribution caused by multi-channel retailing. (cont....)

PR-A-024 Framptons / DB 2 and 20
Symmetry

(cont....) Cherwell District is encouraged to become proactive in rapidly understanding the market demand for large scale buildings closely related to the M40 which are needed to serve the locational requirements in the manufacturing and distribution logistics industries. If this is not to be taken forward through the Part 2 Local Plan Process (as Paragraph 4.7 of the Part 2 Issues Consultation DPD suggests), then it is imperative that the economic benefits and opportunities offered by the logistics sector are pursued through a focused review of Part 1 of the Local Plan at the earliest opportunity to proactively meet the economic needs of the District.

PR-A-025	Chiltern Railways	N/A	<p>The Chiltern Railway Company Limited ("Chiltern Railways") operates franchised passenger train services between London Marylebone, Aylesbury Vale Parkway and Birmingham Moor Street, plus associated branch lines. In Cherwell District we operate Banbury, Bicester North, Bicester Village, Islip and Oxford Parkway stations. The stations on the Bicester to Oxford line were opened in October 2015 as part of a £130m investment to upgrade the line and provide the first route between a British city and London in over 100 years. The Chiltern Railways franchise is due to expire in 2021.</p>
PR-A-025	Chiltern Railways	17	<p>General - Chiltern Railways welcomes the opportunity to respond to Cherwell District Council's consultation on Oxfordshire's unmet housing needs. In particular, we are pleased to see an emphasis on locating development in sustainable locations in transportation terms and managing patterns of growth to make the fullest possible use of public transport.</p> <p>Chiltern Railways would like to see growth in Cherwell District that is sustainable and which properly takes account of the infrastructure needs of a growing population. We support a policy of building houses within walking distance of our railway stations in Cherwell District to connect new residents to employment, education and leisure opportunities within the wider region.</p>
PR-A-025	Chiltern Railways	9	<p>Specific - Whilst we agree with the principles of the Green Belt in preventing urban sprawl and the coalescence of settlements we believe there is a case for a partial review of the Oxford Green Belt in the Kidlington area. The location is a major transport interchange with the new Oxford Parkway Station as well as the Water Eaton Park and Ride and the A34. The sympathetic location of housing here would fulfil the criteria of housing being developed adjacent to sustainable transport options.</p> <p>Therefore, Chiltern Railways supports carefully considered housing in the Oxford Green Belt around Oxford Parkway and Kidlington. Oxford Parkway station has excellent links into Buckinghamshire and central London and from December 2016 will be approximately a 7 minute journey from Oxford Station. The completion of East-West Rail will provide future connectivity to Reading, Milton Keynes, Bedford, Cambridge and Norwich making Oxford Parkway one of the best connected stations of its size in the country. The station and its facilities has been constructed with sufficient capacity to support growth in the local area.</p> <p>In areas where large new housing allocations are provided which are not served by railway stations, Chiltern Railways supports the provision of bus links, cycle paths and pedestrian access from houses to stations. Chiltern is happy to engage on this subject and ensure that sufficient space is provided at these stations to accommodate these modes of transport and provide an effective transport interchange.</p> <p>At railway stations where housing growth is planned it would be wise to use developer funding to improve amenities for passengers. This would be particularly relevant at Bicester North and Banbury stations. We would suggest that it is preferable to improve infrastructure in anticipation of growth rather than after. Chiltern Railways would be happy to work with Cherwell District Council to help specify the potential upgrades that would benefit from developer funding.</p>
PR-A-025	Chiltern Railways	N/A	<p>Conclusion- We are happy to have further discussions to help Cherwell meet its duties on growth and engage on any of the matters discussed in this letter.</p>
PR-A-026	Thames Water Utilities Ltd	18	<p>General Comments - Based on the level of information provided, we are only able to provide high level comments at this stage. As the site allocation process progresses and further certainty and clarification on draft allocations is gained we would like to work more closely with the Council to understand the impact this will have on both our water and wastewater network and treatment works.</p>

PR-A-026 Thames Water Utilities Ltd	18	<p>19 Water Supply - In general terms we have no major concerns around the ability to support an additional 3,500 properties (or equivalent) over and above those previously identified within the Local Plan Part 1 and which have been previously commented on. Our preference would be for additional growth to be focused in either Banbury, Kidlington and to a lesser extent Bicester.</p> <p>Banbury - We are currently delivering a reinforcement main to Banbury. This will ensure strategic supplies to this area will be secured for at least the next 40 years. Local reinforcements may still be required, and we will need to review the storage capacity of our Bretch Hill reservoir to ensure sufficient resilience is provided to customers in the even of an asset failure.</p> <p>Kidlington - Kidlington has adequate strategic infrastructure, and as such any proposed development in this area should only require local reinforcements.</p> <p>Bicester –Thames Waters alliance partnership Eight2o are currently carrying out a study which will determine the strategic transfer requirements for the area over the next 40 years. (cont....)</p>
PR-A-026 Thames Water Utilities Ltd	18	<p>(cont...) If growth is greater than previously predicted for Bicester, additional water supply upgrades may be required to our infrastructure than previously envisaged. This work will need to be fed into and form part of the Business Planning process. We will also need to review the capacity of our Ardley reservoirs (as at Bretch) to ensure security of supply to existing and future customers can be maintained.</p> <p>Additional housing being located around the villages will require a case by case review. Villages tend to be located at the end of networks and as such if any strategic upgrades are required to supply new development, these upgrades could take significant time to implement due to the distances involved.</p>
PR-A-026 Thames Water Utilities Ltd	18	<p>Waste Water - Banbury - Our alliance partnership Eight2o have been instructed to design a scheme to deliver major infrastructure upgrades to the south of Banbury. The scheme will be designed to prevent sewage flooding and relieve existing pressures on sewer network capacity between Bodicote and Adderbury Sewer Pumping Station</p> <p>Bicester - Thames Water recognise a requirement for sewerage infrastructure upgrades to cope with the demand from new developments which are being envisaged in Bicester. As such if further development is proposed in and around Bicester, upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is available ahead of any development.</p> <p>Former RAF in Upper Heyford - Both sewerage network and waste water treatment capacity will need to be upgraded to cater for the scale of development envisaged. A strategic wastewater infrastructure solution will be required to serve the scale of development proposed.</p>
PR-A-027 Quod / Albion Land	2	<p>These Representations, with reference to the information enclosed at Appendix 2, provide conclusive evidence that the Site through its allocation within the Local Plan Part 1 Review will:</p> <ul style="list-style-type: none"> - Provide a deliverable development option capable of meeting a specific market requirement for very large scale logistics buildings that cannot be met through existing Local Plan allocations (set out in Part 1 of the Local Plan); - Provide new employment opportunities to assist in sustaining the 3,500 additional homes proposed through Local Plan Part 1 Review to help address the unmet housing need of the Oxfordshire HMA; - Be satisfactorily (both safely and within the capacity of the highway infrastructure) accessed via the existing road network; - Be appropriately accommodated without any unacceptable impact on ecology and through the application of appropriate design and landscaping treatment could deliver potential biodiversity improvements; (cont...)

PR-A-027 Quod / Albion Land	2	<p>(cont...) - Be accommodated within the surrounding landscape without unacceptable harm through the incorporation of appropriate design measures; and</p> <p>- Be sustainable in flood risk and drainage terms and can be appropriately accommodated without harm to future users from potential sources of contamination.</p> <p>The Site represents a deliverable and sustainable development option that is well placed to address a specific and unmet market requirement and will support the additional planned residential growth across the HMA.</p>
PR-A-027 Quod / Albion Land	2	<p>a) National Policy Context-</p> <p>The presumption in favour of sustainable development is central to national planning policy, being seen as a 'golden thread' that runs through plan making (NPPF, Paragraph 14).</p> <p>For Cherwell this means positively seeking opportunities through the Local Plan process to 'meet the development needs of an area' (NPPF, Paragraph 14). Through the Local Plan (Part 1 and Part 2) 'every effort should be made objectively to identify and then meet the business and other development needs of an area, (NPPF, Paragraph 17) whilst remaining 'flexible' in order to rapidly respond to changes not anticipated in the Plan (NPPF, Paragraph 21).</p> <p>The Plan should be 'aspirational but realistic' (NPPF, Paragraph 154), and the policies that it sets must be made 'deliverable' in order to achieve sustainable development (NPPF, Paragraph 173).</p> <p>There is an emphasis in the planning system on 'supporting sustainable economic growth' which should be reflected in the Local Plan Part 1 Review and through the Local plan Part 2 'affording more weight to supporting economic growth' (NPPF, Paragraph 19). (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) The Plan should help secure economic growth to 'create jobs and prosperity' (NPPF, Paragraph 18). Cherwell should through Part 2 of the Plan 'plan proactively to meet the development needs of business and support an economy fit for the 21st century' (NPPF, Paragraph 20).</p> <p>In order to achieve sustainable development, the NPPF advises that economic, social and environmental gains should be sought jointly and simultaneously through the planning system. This means ensuring that new housing is delivered in locations that are well served by employment and community uses and infrastructure.</p> <p>Every effort should be made through the Local Plan to 'objectively identify and then meet the needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of business communities' (NPPF, paragraph 17). (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) In accordance with paragraph 160 of the NPPF, local planning authorities should have a clear understanding of business needs within the economic markets operating in and across their area and should use this evidence base to assess the existing and future supply of land available for economic development and its sufficiency and suitability to meet the identified needs. 'Reviews of land available for economic development should be undertaken at the same time as, or combined with, Strategic Housing Land Availability Assessments and should include a reappraisal of the suitability of previously allocated land' (NPPF Paragraph 161).</p> <p>In order to be deemed 'sound' Paragraph 182 of the NPPF indicates that the Plan must be (i) positively prepared i.e. through seeking meet objectively assessed development and infrastructure requirements; (ii) justified in its strategy when considered against the alternatives and taking account of the evidence available; (iii) effective in 'delivering' development and (iv) consistent with national policy and the delivery of sustainable forms of development. (cont...)</p>

PR-A-027 Quod / Albion Land 2

(cont...) b) Local Policy Context-
i) Adopted Local Plan Part 1

The Cherwell Local Plan Part 1 contains the Council's proposed strategic planning policies and allocations and was adopted in July 2015.

Policy SLE1 (Employment Development) was the subject of a number of modifications over the course of the Plan consultation and Examination process and was modified following the Local Plan Examination hearing sessions in December 2014 to include the following additional provision:

'In response to market signals for very large scale logistics buildings, which may not be suitably accommodated on the allocated sites within Part 1 of the Local Plan the Council will examine options for the release of land at Motorway junctions in the District within Part 2 of the Plan for this form of development.'

The Inspector determined however, that there was insufficient evidence available at that stage to justify the modification to the Policy and recommended it be removed.

The Part 1 Plan was adopted in July 2015 without the above modification. (cont...)

PR-A-027 Quod / Albion Land 2

(cont...) ii) Local Plan Part 1 Review

During the Examination into the Local Plan Part 1 Cherwell acknowledged that OCC is unable to meet 'in full' its own housing needs and there would be a need for adjoining authorities including the Council to commit to accommodate some of the identified unmet need through an early review of the Plan.

The Inspector appointed to carry out the Examination into the Local Plan Part 1 requested the Council commit to work jointly with the other Oxfordshire Local Authorities to address the objectively assessed need for housing across the Oxfordshire HMA and for this to be recorded within the Local Plan Part 1. As such, paragraph B.95 of the adopted Local Plan notes that the 'joint work will need to comprehensively consider how spatial options could be supported by necessary infrastructure to ensure an integrated approach to the delivery of housing, jobs and services.' (cont...)

PR-A-027 Quod / Albion Land 2

(cont...) The Oxfordshire Strategic Housing Market Assessment (SHMA) (2014) identifies a mid-point housing need for OCC of 28,000 homes over the period of 2011 – 2031. In comparison OCC's Strategic Housing Land Availability Assessment (SHLAA) (2014) identifies sufficient land to provide just 10,212 dwellings over this Plan Period. Whilst the assessment of potential supply has not been completed and there remain conflicting views on the level of need that cannot be met by the Authority, the Oxfordshire Councils have agreed a working assumption of 15,000 homes for Oxford's City's unmet need.

These representations do not comment on the appropriateness of the SHMA methodology or the scale of the identified unmet housing need.

The Oxfordshire Councils have assumed that the unmet need should be distributed between the constituent authorities whilst taking account of their spatial characteristics. In this context a partial review of the Cherwell Local Plan Part 1 is necessary. (cont...)

PR-A-027 Quod / Albion Land	2	<p>(cont...) The Council has published a consultation document (Cherwell Local Plan Part 1 Partial Review –Issues Consultation (hereon in referred to as ‘the Issues Consultation’) which represents the first stage in the Local Plan Part 1 Partial Review and requests views on the issues to be considered as part of the Review. The Council are also inviting the submission of sites with the potential to deliver housing development within the District.</p> <p>In terms of additional housing development, the Issues Consultation suggests that Cherwell will help to accommodate 3,500 of Oxford’s unmet housing need. The Issues Consultation goes onto question (‘Question 2’ of the Issues Consultation Document) whether the ‘additional housing in Cherwell to meet Oxford’s needs should be supported by additional employment generating development’.</p> <p>Whilst the Council have not requested non-residential sites be submitted through the Issues Consultation, these representations conclude that there is a need to identify new employment locations to support the proposed housing growth in Cherwell in a sustainable manner and that the land at Junction 10 of the M40 is a suitable employment development option that meets a specific and unmet market demand and is therefore ‘deliverable’.</p> <p>The Site merits allocation for employment use within the Local Plan Part 1 Review. (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) iii) Local Plan Part 2 Issues Paper</p> <p>In addition to the Issues Consultation on the Local Plan Part 1 Review, the Council are consulting on a Local Plan Part 2 Issues Paper.</p> <p>The Local Plan Part 2 will cover the entire District and the same Plan Period as Part 1 and will conform with and build upon the Spatial Strategy of Part 1.</p> <p>The Local Plan Part 2 will contain detailed planning policies to assist the implementation of strategic policies and the development management process. It will also identify smaller, non-strategic development sites for housing, employment, open space and recreation, travelling communities and other land uses.</p> <p>Consultation on the scope of the Local Plan Part 2 was undertaken in May 2015 and the responses to that consultation informed the preparation of the Issues Paper. (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) Albion Land provided representations in response to that consultation and a copy of the representations is provided at Appendix 2.</p> <p>The representations were submitted in response to the Council’s previous proposal for Part 2 of the Local Plan to ‘examine options for the release of land at motorway junctions for large scale logistics development’ which was at that time supported by the proposed Main Modifications to Policy SLE1 of the then draft Local Plan Part 1 (see above).</p> <p>Albion Land’s representations to the Local Plan Part 2 demonstrated a need for new land to accommodate specific very large scale logistic operator’s requirements in such locations and demonstrated that land within their control at Junction 10 of the M40 is a sustainable location capable of accommodating this need.</p> <p>However, the Inspector appointed to examine the Local Plan Part 1 concluded that it was inappropriate to deal with the requirement through the proposed modification at that moment in time. (cont....)</p>

PR-A-027 Quod / Albion Land	2	<p>(cont...) As such, the Local Plan Part 2 Issues Paper does not provide any policies to support very large scale logistics premises at motorway junctions albeit does indicate that further assessment on the requirement for such sites is being carried out.</p> <p>The Council have appointed GVA Grimley to assess this need and their report is to be published shortly.</p> <p>In the absence of the GVA report these representations draw on market evidence submitted to the Council as part of Albion Land's representations to the Local Plan Part 2 consultation (provided at Appendix 2) which demonstrate a strong need for new employment land within the District to meet the requirements of very large scale logistics operations.</p> <p>These representations demonstrate that this evidence is sufficient to justify the allocation of additional sites through the Local Plan Part 1 Partial Review which will in turn assist in sustaining the planned additional housing growth for the District.</p>
PR-A-027 Quod / Albion Land	2	<p>a) Policy Requirement- OCC is unable to meet 'in full' its objectively assessed housing needs.</p> <p>The Oxfordshire Strategic Housing Market Assessment (SHMA) (2014) identifies a mid-point housing need for Oxford City of 28,000 homes over the period of 2011 – 2031. In comparison OCC's Strategic Housing Land Availability Assessment (SHLAA) (2014) identifies sufficient land to provide just 10,212 dwellings over this Plan Period.</p> <p>Whilst the assessment of potential supply has not been completed and there remains conflicting views on the level of need that cannot be met by OCC, the Oxfordshire Councils have agreed a working assumption that the unmet need is in the order of 15,000 dwellings.</p> <p>The Oxfordshire Councils have assumed that the unmet need should be distributed between the constituent authorities whilst taking account of their spatial characteristics.</p> <p>In response and in accordance with the Council's commitment within their Local Plan Part 1, Cherwell have committed to a partial review of the Cherwell Local Plan Part 1. (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) In terms of additional housing development, the Issues Consultation on the Local Plan Part 1 Review suggests that Cherwell will help to accommodate 3,500 of Oxford's unmet housing need.</p> <p>In order to ensure that the additional residential growth is sustainably accommodated, there is a need to identify additional land for infrastructure, community and employment uses to support the new population.</p> <p>In this context there is a pressing need to identify new and deliverable employment locations through the Local Plan Part 1 Review and non-strategic employment sites through the Local Plan Part 2.</p> <p>These representations demonstrate that the subject Site is both sustainable and environmentally appropriate for redevelopment and given its scale and strategic significance is appropriate for allocation through the Local Plan Part 1 Review.</p> <p>Furthermore, the Site can meet a specific and strong market requirement for very large scale logistics operations and as such is a viable and deliverable development option capable of being brought forward within the Plan Period.</p>

PR-A-027 Quod / Albion Land	2	<p>(cont...) b) Market Demand- Albion Land's representations to Cherwell Local Plan Part 2 provided market commentary from JLL on the growing demand for very large scale logistics facilities nationally as well as evidence on the limited supply of land and buildings within Cherwell to meet the need.</p> <p>This evidence remains unchanged since June 2015 and is valid for the purpose of these representations.</p> <p>The market evidence is re-provided at Appendix 2 of these representations and demonstrates the pressing needs to examine options for the release of additional sites to meet the demand. The provision of new employment sites in response to this particular identified market requirement will make a positive contribution towards sustaining the proposed additional residential growth proposed through the Local Plan Part 1 Review. (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) The Site at Junction 10 of the M40 is well placed in market terms to attract very large scale logistics operators occupying a key location adjacent to Junction 10 of the M40. This gives the Site a truly strategic location with immediate access to the London and M25 markets south on the M40, Birmingham and the Midlands to the north and to the M1 via the A43. The Site's prominence and visibility from the M40 motorway sets it apart from other potential motorway sites in the area being an additional attraction to the larger retailers.</p> <p>Appendix 2 of the representations demonstrate that those employment sites allocated within the adopted Local Plan Part 1 are identified with the aim of meeting a specific operator or market requirement and have not sought to address the growing demand for large scale logistics buildings. In many instances the existing allocations are either too small or inappropriately located away from motorway junctions to meet the specific requirements of such operators.</p> <p>As outlined in Appendix 2, Cherwell is well placed to capitalise upon the national growth in demand for very large scale logistic buildings not least due to the M40 motorway and its excellent access to the wider motorway network and national markets. These motorway locations are sustainably located within easy commuting distance of the towns of Bicester and Banbury which, due to the presence of existing infrastructure and services are likely to be the focus of the majority of additional residential growth. (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) The market evidence demonstrates that Cherwell is well placed for these types of facilities and that the subject Site is appropriate in market terms to help accommodate the identified need.</p> <p>c) Proposed development- The Site shown at Appendix 1 is proposed for allocation for Class B8 very large scale logistics buildings within the Local Plan Part 1 Review.</p> <p>As indicated in Albion Land's representations to the Local Plan Part 2 consultation, the Site is capable of delivering in the order of 232,258 sqm (2.5m sq ft) of Class B8 employment floorspace.</p> <p>The Site also allows for the delivery of landscape areas within and on the edges of the Site, the biodiversity benefits of which are explained within Appendix 2.</p> <p>d) Deliverability- The Site is being promoted for allocation by Albion Land via a joint venture agreement with the landowner of part of the Site and the remainder of the Site is subject to a tenancy with a rolling break option and as such does not constrain delivery. (cont...)</p>

PR-A-027 Quod / Albion Land	2	<p>(cont...) The Site is viable and deliverable and capable of being brought forward in the early phases on the Plan Period.</p> <p>There are no known constraints that will prevent the deliverability of the Site.</p> <p>e) Environmental Appropriateness- The representations provided to the Local Plan Part 2 consultation (Appendix 2) demonstrate that the subject Site is environmentally suitable to help accommodate the identified demand for very large scale logistics buildings, being characterised by land of limited ecological value.</p> <p>The Site does not present any constraints on development in relation to flood risk, drainage and ground contamination that cannot be appropriately overcome through mitigation or appropriate design.</p> <p>There is the ability through the incorporation of set-back distances and landscaping areas to effectively and appropriately accommodate development within its landscape setting. (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) An appropriate and safe vehicular point of access from the public highway can be achieved and traffic associated with the development is capable of being accommodated within the existing highway network without significant impact upon the safe and free flow of traffic.</p> <p>There is the potential through careful consideration to design, site planning and the inclusion of boundary landscaping, to reduce potential landscape and visual impacts to an acceptable level.</p> <p>In this respect, the Site is compliant with the development management principles of the adopted Local Plan Part 1 as set out in Appendix 1.</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) These Representations demonstrate that the subject Site is suitable and deliverable for very large scale logistics buildings.</p> <p>There is a strong demand for new employment sites to help meet this specific sectoral demand which require identifying through the Local Plan process.</p> <p>The need to identify new employment sites and deliver new employment opportunities for Cherwell is all the more important in the context of the Council's Local Plan Part 1 Review and the identified need for Cherwell to accommodate in the order of 3,500 new homes across the District.</p> <p>The subject Site has the ability through its allocation within the Local Plan Part 1 Review to assist the Council in meeting the identified market demand for very large scale logistics premises and in realising the significant economic and social benefits that such development will bring. (cont...)</p>
PR-A-027 Quod / Albion Land	2	<p>(cont...) The Site occupies a sustainable location within easy access of the main population centres of Bicester and Banbury and on development will deliver a significant number of jobs for the existing and proposed local populations.</p> <p>In summary, the Site is appropriate for allocation in the Local Plan Part 1 Review given that it:</p> <ul style="list-style-type: none"> - Provides a sizeable development area which is deliverable from the start of the plan period and capable of making a meaningful contribution towards accommodating an identified need for large scale logistics buildings; - Will provide new and substantial job opportunities to help sustain the proposed increase in residential population within easy access of the existing population nodes of Bicester and Banbury; and - Can be appropriately accommodated within the existing environment without any significant adverse impact upon the highway network, existing habitats, flood risk, ground conditions and landscape character. <p>In these circumstances the Site merits allocation within the Local Plan Part 1 Review.</p>

PR-A-027	Quod / Albion Land	2	Site submission - Junction 10 of M40.
PR-A-028	V N Smith	1	To aim for a growth of almost 23,000 new houses by 2031 is very daunting task. To propose an increase of 3,500 houses is farcical. It is already apparent that the road system is inadequate for the current level of traffic. There are also concerns about the infrastructure whether in Health Services or Education. It is to the Council's credit that some roadworks are in progress and a review is intended but a major increase in highways in Cherwell and on routes to Oxford is needed now.
PR-A-028	V N Smith	2	As there are already numerous empty shops, offices and industrial units which have been unused for years there must be a case to move jobs from Oxford to Banbury to occupy the vacant buildings. The same issue doubtless applies to Oxford. Banbury is already taking steps to redevelop empty premises. What is the situation in Oxford? Before any attempt is made to force Cherwell to deal with Oxford's problems I would expect that a comprehensive review of vacant land and buildings should be undertaken in and around Oxford.
PR-A-028	V N Smith	3	Oxford's key issue is stated to be a need for more houses. The first question that should be asked is whether the target is wrong. What criteria were used to determine the figure,. Another the spare space or empty premises which exist in and around Oxford? If to build more homes in Cherwell even more green fields will have to be built on, then the 'green belt' around Oxford should be considered.
PR-A-028	V N Smith	4	Because of the existing road problems both in Cherwell and routes to Oxford any additional houses should have ready access to public transport. With that may come the need for extra parking at rail and bus stations and Park and Ride points.
PR-A-028	V N Smith	5	One suggestion to ease Oxford's problems would be to re-locate businesses to empty units elsewhere. Another to re-examine any land in Oxford not reserved for sport. The key principle to be followed must be to ensure that any new housing sites selected should be in sustainable locations. To quote the approved district plan "development in the countryside will be strictly controlled and directed towards larger more sustainable villages which offer a wide range of services and are well connected to urban areas by public transport" (para A11 page 29 refers).
PR-A-028	V N Smith	6	The area of search should be within 5 miles of Oxford or within easy reach of frequent public transport where there is plenty of parking.
PR-A-028	V N Smith	9	The Oxford green belt must be considered if green fields in Cherwell are to be built on. At least if houses are built in Oxford's green belt journey time to Oxford would be reduced.
PR-A-028	V N Smith	10	Although sites may be suggested anywhere in Cherwell priority should be given to locations within 5 miles of Oxford City boundary.
PR-A-028	V N Smith	11	As there are already severe traffic problems and doubts about infrastructure and services, such as healthcare and education, any increase in the rate of development will only worsen the situation.
PR-A-028	V N Smith	12	It is forecast that there will be continued growth in internet and out of town shopping during the next few years. Add to that the shops which are already vacant, plus offices and other premises, there will be plenty of opportunity to convert such premises to houses. Such locations could be suitable for affordable houses or flats. In addition as suggested in the planning document (page 31, para 5.15) there is a need for more sheltered housing for older people to free up homes for families. Such developments must be near public transport.
PR-A-028	V N Smith	13	If Cherwell District Council is having to build houses for Oxford a financial contribution should be made towards additional costs incurred in the process and infrastructure.
PR-A-028	V N Smith	14	Who has ruled that Oxford has unmet housing needs? Is it the same department that rejected Cherwell's plan so many times?
PR-A-028	V N Smith	15	No site should be in unsustainable location. All should be within easy reach of public transport links which should have adequate parking spaces.

PR-A-028	V N Smith	16+17		If any of Oxford's overspill is to be in Cherwell any uneconomic bus routes where building is planned must be funded by Oxford and remain open. Without adequate public transport links the severe traffic congestion will become even worse.
PR-A-028	V N Smith	18+19		Traffic congestion is already a serious issue. In the future education and the health service, especially availability of doctors in general practice will be a problem. When there is no rain for a time, Thames Water have introduced a hosepipe ban. It must therefore be established that this water company has sufficient capacity to cater for any more houses.
PR-A-028	V N Smith	20+21		Although several buildings which have been vacant for years are now being redeveloped it would help if some of the firms in Oxford could relocate to Cherwell and occupy empty offices or other vacant premises.
PR-A-028	V N Smith	22+23		Land owners in unsustainable locations will press for permission to build. Both the National guidance and the local plan are clear - "growth will be limited to sustainable villages and any development in the open countryside will be strictly controlled". Any such proposals should be rejected.
PR-A-028	V N Smith	24+25		In addition to preserving the natural environment I would expect the Planning Authority to prevent any building on flood plains near the Thames or Cherwell. I consider that to allow building is a criminal act as anyone who buys or inhabits such premises will find themselves in a position when they can neither repair, insure or sell the property. The misery so many people have suffered has been well documented in the media in recent times.
PR-A-028	V N Smith	26+27		Whilst I would expect that any building in or near historic locations should be in keeping with the surrounding environment, the possibility of retaining the outer shell and bringing such premises back into use should be considered. Before any houses are built for Oxford Council I would expect that steps will be taken to explore all possibilities to provide more homes or flats in Oxford by whatever means.
PR-A-028	V N Smith	7+8		Although a district wide search for places to build new homes should be resisted the stated need for so many new homes may make this inevitable. To achieve an increase of 22,000 houses by 2031 there must have been a very extensive search. The principle detailed in the approved local plan which are specified in the National plan should continue to be adhered to. Specifically that villages with no amenities should be excluded from any development.
PR-A-029	Astley / Gill / Jelfs / Barnes		1	Based on the information provided so far then the figure of 3500homes appears reasonable.
PR-A-029	Astley / Gill / Jelfs / Barnes		2	If the root cause is from those employed in Oxford or London, Reading or centres south of Oxford then the answer is no. If it relates to those commuting into Cherwell then again the answer is no.
PR-A-029	Astley / Gill / Jelfs / Barnes		3	Only those relating to those employed in Oxford City and wish to live there.
PR-A-029	Astley / Gill / Jelfs / Barnes		4	The key principle is to meet the needs of those who are employed in Oxford and cannot meet their affordable accommodation needs within Oxford and choose not to commute.
PR-A-029	Astley / Gill / Jelfs / Barnes		5	Similar to the vision of Cherwell but in locations sustainable close to their occupation.
PR-A-029	Astley / Gill / Jelfs / Barnes		6	Yes
PR-A-029	Astley / Gill / Jelfs / Barnes		7	How the Green Belt parcels of Land perform against the green belt criteria, environmental issues SEA, landscape value, availability of infrastructure.
PR-A-029	Astley / Gill / Jelfs / Barnes		8	We do not think that it is sustainable to contemplate making long commutes a policy.
PR-A-029	Astley / Gill / Jelfs / Barnes		9	Yes
PR-A-029	Astley / Gill / Jelfs / Barnes		10	Yes
PR-A-029	Astley / Gill / Jelfs / Barnes		11	The risk should be born by Oxford we only have a duty to co operate and the problem is theirs.

PR-A-029	Astley / Gill / Jelfs / Barnes	12	The issues set out appears reasonable and balanced. However it is inescapable that locations with good transport links and close to Oxford need to be pursued with some vigour. Consideration might be to spread the load amongst all village but some residents might have travel costs that are not sustainable.
PR-A-029	Astley / Gill / Jelfs / Barnes	13	The issue if how the residents of Cherwell react to further planning initiatives need to be born in mind because at the moment they feel let down by District Councillors.
PR-A-029	Astley / Gill / Jelfs / Barnes	14	The objectives should be the same as those for Cherwell but ensuring that travelling and its carbon footprint is kept to an absolute minimum. If further a field is considered improvements to Public Transport or greater use of the car will prevail making Oxford more inaccessible.
PR-A-029	Astley / Gill / Jelfs / Barnes	15	Clearly those location which reduce travel and keep it to a minimum.
PR-A-029	Astley / Gill / Jelfs / Barnes	16	The bus service from Banbury takes too long for commuters to Oxford and therefore the only sensible option is to improve rail services and perhaps bus services can act as feeders to stations opening more stations and using buses to call at more villages. Bus fare to Banbury from Adderbury is unrealistically high compared to the fare for Banbury to Oxford.
PR-A-029	Astley / Gill / Jelfs / Barnes	17	It is self evident that the root cause of Oxfords unmet need requires careful consideration and locations and density of dwellings suitable determined.
PR-A-029	Astley / Gill / Jelfs / Barnes	18	Schools and Health provisions need pre planning and implementation prior to development because the present crisis is a philosophy of let a problem occur then we will address it. There is a lack of confidence in planners.
PR-A-029	Astley / Gill / Jelfs / Barnes	19	Para's 5.73 to 5.73 seem balanced but we suspect that delivery of adequate infrastructure is a pipe dream that will not materialise and may limit growth.
PR-A-029	Astley / Gill / Jelfs / Barnes	20	Clearly given the difficulties of Oxford City then it may be necessary to limit its future growth.
PR-A-029	Astley / Gill / Jelfs / Barnes	21	Much in the same way as the issues above.
PR-A-029	Astley / Gill / Jelfs / Barnes	22	The issues explained in the consultation document are clearly explain and the solution in strategic terms is also simply provide highly efficient houses close to the need and that will provide sustainability.
PR-A-029	Astley / Gill / Jelfs / Barnes	23	They merely emphasise the solution.
PR-A-029	Astley / Gill / Jelfs / Barnes	24	Apart from the water meadows and environmental habitats .We are not aware of other issues.
PR-A-029	Astley / Gill / Jelfs / Barnes	25	Clearly some areas may be no go for development.
PR-A-029	Astley / Gill / Jelfs / Barnes	26	No because the document gives a clear image of the issues.
PR-A-029	Astley / Gill / Jelfs / Barnes	27	They may limit the future growth of Oxford along with the other factors and it may be necessary to recognise the limits of what can sensibly be achieved.
PR-A-029	Astley / Gill / Jelfs / Barnes	28	No comment.
PR-A-030	Oxford Civic Society	1	Oxford Civic Society welcomes this wellwritten consultation document. It is too early to say whether 3,500 or some other number is appropriate. The various sources of evidence upon which Cherwell's contribution should be determined will not be available until the studies commissioned by the Oxfordshire Growth Board have been completed later this year. It is likely that 3,500 will be at the lower end of the possible range.
PR-A-030	Oxford Civic Society	2	Oxford has a serious shortage of housing but is a huge source of employment. The need is for housing located in Cherwell but with good connectivity to Oxford. Employment generating development in Cherwell should be related to Cherwell's own housing plans. However, employment locations close to Oxford such as Begbroke, the Airport and Oxford Parkway are natural locations for additional employment.

PR-A-030	Oxford Civic Society	3	The key issues are addressed, and solutions proposed, in our publication, "Oxford Futures: Achieving smarter growth in Central Oxfordshire". See www.oxfordfutures.org.uk
PR-A-030	Oxford Civic Society	4	Key principles or goals should include delivering infrastructure (above and below ground) before and not after housing development, securing high quality yet affordable design, a good living environment, good public transport links and sustainability.
PR-A-030	Oxford Civic Society	5	Our publication, "Oxford Futures: Achieving smarter growth in Central Oxfordshire" offers a starting point for consideration of the Housing Vision. See www.oxfordfutures.org.uk
PR-A-030	Oxford Civic Society	6	Yes. Accessibility to Oxford should be a key criterion.
PR-A-030	Oxford Civic Society	7	The area of search should be determined by proximity to Oxford, good connectivity, enabling people to make convenient and safe journeys by bicycle, taking account of walking as well as public transport, environmental efficiency, infrastructure capacity and environmental impact. The more distant the locations are from Oxford, the higher will be the proportion of trips made by private car on existing inadequate roads. This will exacerbate congestion and pollution.
PR-A-030	Oxford Civic Society	8	No.
PR-A-030	Oxford Civic Society	9	Yes, following the example of the Green Belt adjustments successfully implemented in Cambridge. The focus should be on augmenting existing corridors which already impact on the Green Belt. Linear development will allow proximate access and help ensure some acoustic tranquillity for the green areas
PR-A-030	Oxford Civic Society	10	Yes, this is essential for accountability purposes.
PR-A-030	Oxford Civic Society	11	By adopting an integrated strategic approach, linked to effective delivery, to meeting both needs.
PR-A-030	Oxford Civic Society	12	More weight should be given to the potential for the growth of Kidlington on grounds of proximity and connectivity. Additional housing in Bicester should be limited by the capacity of the rail and road infrastructure linking it to Oxford. The road infrastructure in particular is already saturated. Affordable housing needs to be planned as part of a balanced mix of housing.
PR-A-030	Oxford Civic Society	13	By promoting design codes, Cherwell DC should emphasise the importance of making areas designated for growth attractive in terms of an urban design requirement, urban planning and infrastructure. An independent design review panel should be created, similar to Oxford's but with the specific addition of Urban Design and Streets Design. As proposed by the Government's current consultation on the NPPF, higher density housing should be provided in the vicinity of transport hubs.
PR-A-030	Oxford Civic Society	14	The objectives should deliver an appropriate housing mix, taking Oxford and the relevant areas of Cherwell together. This does not mean just replicating the housing mix within Oxford.
PR-A-030	Oxford Civic Society	15	See the comments in answer to previous questions about the selection criteria for locations. However, some sources of evidence for determining the locations of Cherwell's contribution will not be available until the studies commissioned by the Oxfordshire Growth Board have been completed later this year.
PR-A-030	Oxford Civic Society	16	Public transport connectivity with Oxford and proximity to Oxford will be the most important considerations. Space needs to be reserved for high quality rapid transit and given the relative proximity of such development the provision of safe, coherent segregated cycling provision should be designed in from the outset.

PR-A-030	Oxford Civic Society	17	It follows from the reply to Q16 that Kidlington should play a greater part than appears to be envisaged. Additional housing in Bicester should be limited by the capacity of the rail and road infrastructure linking it to Oxford. The road infrastructure in particular is already saturated.
PR-A-030	Oxford Civic Society	18	The whole range of social and educational infrastructure needed to support housing development should be included in the planning. Isolated housing estates built without such facilities will lead to social problems as well as adding to carborne travel.
PR-A-030	Oxford Civic Society	19	Taking account of the other factors discussed above and below, it would appear that Kidlington offers the best solution. Additional housing in Bicester should be limited by the capacity of the rail and road infrastructure linking it to Oxford. The road infrastructure in particular is already saturated.
PR-A-030	Oxford Civic Society	20+21	Economic considerations include viability, land ownership, and capturing value uplift to help fund infrastructure.
PR-A-030	Oxford Civic Society	22+23	Cities in Holland and Germany have demonstrated how to secure sustainability by considering in a unified way issues including heritage, biodiversity, environment impacts, sustainable travel provision, zero carbon and of course economic and financial viability. See our publication, "Oxford Futures: Achieving smarter growth in Central Oxfordshire", at www.oxfordfutures.o
PR-A-030	Oxford Civic Society	24+25	Care should be taken to ensure the minimum of disturbance to sensitive sites, including Special Areas of Conservation, Conservation Target Areas, Sites of Special Scientific Interest, BBOWT nature reserves and other places of nature conservation.
PR-A-030	Oxford Civic Society	26+27	We agree that protecting and improving the built and historic environments will be essential. These are identified by the Statutory List of Buildings of Special Architectural or Historic Interest and designated Conservation Areas.
PR-A-031	Oxford Preservation Trust	N/A	OPT is committed to ensuring a positive future for Oxford, preserving and enhancing the City's historic character and green setting, whilst recognising the needs of the 21st century city. OPT commented previously to highlight the need for a County-wide Green Belt study prior to any development being proposed by an Oxfordshire Local Authority in the Green Belt. The Oxfordshire Growth Board is in the process for preparing just this, an Oxford Green Belt study to be used jointly by Oxfordshire authorities who are considering a Green Belt Review. It will be an impartial resource to ensure that if it is established beyond all doubt that Green belt land is needed for development, only the poorest quality land is lost. (cont...)
PR-A-031	Oxford Preservation Trust		9 (cont...) It is therefore essential that no land is considered for release from the Green Belt until the study is available. The Council, in its consultation document is asking whether to help meet the Unmet Housing Need of Oxford, Green Belt land should be considered for a housing allocation (question 8). The Trust would urge the Council not to approach the idea of altering the Green Belt boundary until the full study is completed later in the year. It would be the Trust's view and indeed the Government's view that the Green Belt should be protected as much as is possible.

PR-A-032 L Crone

9 Should the use of Green Belt land be considered? Absolutely not! The Kidlington Green Belt is a major part of the area and widely used by locals. The idea of Green Belt is to permanently protect these precious areas and National Policy says that housing need is not a reason to build on Green Belt land. If these areas are reduced any more, further problems will occur as dogs and wildlife are condensed into an even smaller area. Local people will lose the natural areas and our children will eventually not ever just "go for a walk in the fields" which will add to the unhealthy obesity problem, thus putting more pressure on the NHS.

The Kidlington public transport is already at capacity and adding more will just bring more chaos to our roads. It's not uncommon for a journey from Kidlington to The City to take 45 minutes plus already.

Surely building the amount of houses "needed!" will just add to the flooding that is already prevalent locally.

PR-A-033 P & N Forsythe

1

No. It is derived from the Oxfordshire SHMA which has simply been accepted by the Council and not subjected to serious independent scrutiny. The SHMA was drawn up by private consultants who largely work for the development industry and therefore have a conflict of interest. Its figures are much too high, far in excess of previous trends and clearly unrealistic. I do not accept that the SHMA figures represent either Cherwell's or Oxford's needs.

PR-A-033 P & N Forsythe

2

No. The excessive housing figures are already based on unrealistic forecasts of growth in employment. To provide for yet more employment generating development is simply creating a vicious circle.

PR-A-033 P & N Forsythe

9

No. Green Belt is a permanent designation. The Green Belt around Kidlington is much valued. National Policy says that housing need is not a reason to build on the Green Belt. The Government, in its manifesto, made a commitment to protect the Green Belt.

PR-A-033 P & N Forsythe

16

Transport networks in this area are already overloaded. I do not believe that current proposals will solve existing problems, let alone those caused by additional growth in Cherwell and elsewhere in the County. The Highway Authority's vision and objectives, that you quote, are vague aspirations and without substance.

PR-A-033 P & N Forsythe

24

Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will further damage the natural environment of Cherwell.

PR-A-034 Deddington
Development
Watch

1

No, this is premature. The Oxfordshire Growth Board, on which all Oxfordshire Councils are represented, is currently considering the urban capacity of Oxford City and the allocation of forecast unmet demand to individual local authorities. Its report is not due until summer 2016.

The housing need figures produced by the Oxfordshire Local Economic Partnership are not based on a robust evidence base like the rest of the Cherwell Local Plan. The unmet housing need figures are based on the economic growth forecasts and aspirations of OxLEP rather than on objectively assessed housing need.

PR-A-034 Deddington
Development
Watch

2

No. It would be at cross-purposes with the objective of providing housing for people working in Oxford, and would risk prejudicing Cherwell's own Local Plan strategy, to seek to promote further employment generating development in the district.

An exception might be to relocate some of the higher-technology business planned for Oxford to Bicester, which is part of the Oxford-Cambridge corridor, where employment opportunities otherwise may not match housing growth.

PR-A-034 Deddington
Development
Watch

4

The vision for Cherwell already identified is to concentrate development in Banbury, Bicester, Upper Heyford and Kidlington whilst restricting development in rural areas to the larger sustainable villages, thereby protecting the rural nature of the District and the open countryside. These principles should not be compromised whilst taking decisions about meeting Oxford's unmet housing needs.

PR-A-034	Deddington Development Watch	6	<p>Yes. This will allow additional homes to be built closer to places of employment and community facilities in Oxford, and reduce traffic congestion, consistent with sustainable development.</p> <p>This may involve development in the current Green Belt. Parts of the Oxford Green Belt have lost their green nature over time (e.g. south of Kidlington around Water Eaton and south of Oxford in the Grenoble Road area). Development in these areas would be better environmentally than in more rural parts of Oxfordshire as well as much more sustainable.</p>
PR-A-034	Deddington Development Watch	7	<p>Specific criteria such as those outlined in paragraph 4.8, especially:</p> <ul style="list-style-type: none"> - distance/proximity to Oxford City; - key transport corridors; - economic links to Oxford City.
PR-A-034	Deddington Development Watch	8	<p>No. This would conflict with the national policy of reducing the need to travel and the Local Plan policy of restricting development in the rural areas.</p>
PR-A-034	Deddington Development Watch	9	<p>This is already being considered as part of the Review by the Oxfordshire Growth Board. The Review should also consider whether Green Belt land swaps would be an appropriate approach.</p> <p>Parts of the Oxford Green Belt have lost their green nature over time (e.g. south of Kidlington around Water Eaton and south of Oxford in the Grenoble Road area). Development in these areas would be better environmentally than in more rural parts of Oxfordshire as well as much more sustainable.</p>
PR-A-034	Deddington Development Watch	10	<p>To avoid prejudicing Cherwell's own five year supply, this may well be necessary.</p>
PR-A-034	Deddington Development Watch	11	<p>By being 'ring-fenced'. It is essential Cherwell's own strategy is insulated from the separate needs of Oxford and that Cherwell remains in control of its own destiny, especially its five year land supply.</p>
PR-A-034	Deddington Development Watch	12	<p>Oxford City's housing requirements (e.g. mix, tenures) are very different from the needs of Cherwell residents. It will be a challenge to replicate this range of housing in the less urban or rural environment in north Oxfordshire.</p>
PR-A-034	Deddington Development Watch	15	<p>Those closest to Oxford with high quality public transport links, where adequate infrastructure (e.g. foul drainage, water supply, mains gas, schools, community infrastructure) is available or can be provided.</p>
PR-A-034	Deddington Development Watch	16	<p>Railway travel is the most sustainable mode of public transport, whether for individuals or large numbers of people travelling short or long distances.</p>
PR-A-034	Deddington Development Watch	17	<p>The development of current or potential 'commuter hubs' (see Local Plan Part 2 Issues Paper, paragraph 4.134) with rail facilities should be encouraged where these can be expanded without negative sustainability effects.</p>
PR-A-034	Deddington Development Watch	19	<p>Adequate infrastructure (e.g. foul drainage, water supply, mains gas, schools, community infrastructure) must be available or must be provided before any development work on a site can be commenced.</p>
PR-A-034	Deddington Development Watch	20	<p>Oxford City's housing needs are based on aspirational projections of Oxford's employment growth without a robust evidence base or any public consultation.</p>
PR-A-034	Deddington Development Watch	21	<p>There is no firm evidence that this additional housing will need to be built, or, if it is, whether there would be ready purchasers or whether the new residents would actually work in Oxford.</p>

PR-A-034	Deddington Development Watch	22	This additional requirement, on top of the ambitious Cherwell Local Plan Part 1 targets, will put unprecedented strain on infrastructure, the transport system and the environment in north Oxfordshire with negative sustainability effects.
PR-A-034	Deddington Development Watch	23	There is scope for mitigation if additional development is located close to Oxford.
PR-A-034	Deddington Development Watch	24	Additional population and 'dormitory' development traffic between north Oxfordshire and Oxford will place additional pressures on the environment.
PR-A-034	Deddington Development Watch	25	There is scope for mitigation if additional development is located close to Oxford.
PR-A-034	Deddington Development Watch	26	Additional development poses further threats to the integrity of the built and historic environment and heritage assets.
PR-A-034	Deddington Development Watch	27	There is scope for mitigation if additional development is located close to Oxford.
PR-A-035	Deddington Neighbourhood Plan Steering Group	1	No, the Oxford Growth Board on which all Oxfordshire Councils are represented is currently considering inter alia the urban capacity of Oxford and the allocation of the unmet demand to individual local authorities. Their report is not due until the summer of 2016. It is therefore premature to accept the figure of 15,000 homes as the unmet demand for Oxford. The figure has not been justified to date and appears to be aspirational.
PR-A-035	Deddington Neighbourhood Plan Steering Group	2	No, it would be inappropriate to create yet more jobs in Cherwell to employ people already required for jobs anticipated to be created in Oxford. This would seem to defeat the purpose of housing people working in Oxford unless some of the "knowledge" business planned for Oxford were relocated to Bicester, where there may be a superfluity of homes compared with the employment opportunities.
PR-A-035	Deddington Neighbourhood Plan Steering Group	6	Additional housing for Oxford's anticipated employment growth should be as close to Oxford as possible, if necessary within the Green Belt, although Green Belt land swaps should be considered. This will promote sustainable transport by minimising traffic congestion and the pollution attendant on extra car journeys. Extra commuter housing scattered round the county would conflict with this aim.
PR-A-035	Deddington Neighbourhood Plan Steering Group	7	Specific criteria such as some of those outlined in paragraph 4.8: E.g. distance/proximity to Oxford City Key transport corridors Economic links to Oxford City
PR-A-035	Deddington Neighbourhood Plan Steering Group	8	No. This would conflict with the Local Plan policy of concentrating development in urban areas and national policy of reducing the need to travel.
PR-A-035	Deddington Neighbourhood Plan Steering Group	9	This is already being considered as part of the Review by the Growth Board. Each part of the Green Belt is being assessed against the original purposes of the Green Belt. Green Belt land swaps should also be considered.
PR-A-035	Deddington Neighbourhood Plan Steering Group	10	This may well be necessary to avoid prejudicing Cherwell's own five year supply.

PR-A-035	Deddington Neighbourhood Plan Steering Group	11	By being 'ring-fenced'. It is essential Cherwell's own strategy is insulated from the separate needs of Oxford.
PR-A-035	Deddington Neighbourhood Plan Steering Group	12	The housing requirements for Oxford City residents (e.g. mix, tenures) are very different from Cherwell's. It will be difficult to replicate this range of housing in the less urban or more rural environment north of Oxford City in Cherwell.
PR-A-035	Deddington Neighbourhood Plan Steering Group	15	Those closest to Oxford and having the best public transport links, on the basis that adequate infrastructure (e.g. foul drainage, water supply, mains gas, schools, community infrastructure) is available or can be provided.
PR-A-036	R Furneaux	6	Agree. Presumably, the housing that Oxford cannot provide would be wanted mainly by people who have to be in Oxford daily for work, education etc. Otherwise, they wouldn't need to live in Oxford.
PR-A-036	R Furneaux	7	The Plan Area should be one from which easy access into Oxford is possible, preferably by public transport rather than by private car.
PR-A-036	R Furneaux	8	No. Parts of the District are remote from Oxford, have poor transport links to it and have no great economic connection.
PR-A-037	Bloxham Parish Council	1	No 3,500 does not seem to be a reasonable working assumption for Cherwell as this appears to limit Oxford to 1000 additional new homes. Oxford City must take a fairer % of unmet need. A figure of 3500 might allow it to be less committed to finding more opportunity for growth in Oxford.
PR-A-037	Bloxham Parish Council	2	Yes. All the economic attractors named are close to Oxford or Bicester. What about Banbury?
PR-A-037	Bloxham Parish Council	3	Key issues to be considered should be the location of the additional houses. These should be locations: - with direct sustainable public transport links to Oxford - that avoid further congestion on rural roads - that have sufficient capacity within existing infrastructure provisions
PR-A-037	Bloxham Parish Council	4	To preserve the relationships between villages in terms of size and access to services. If the Category A villages grow disproportionately then the character of the rural area of the north of the county will be lost. To ensure real sustainability is supported.
PR-A-037	Bloxham Parish Council	5	To achieve additional growth without adversely impacting Cherwell's own growth strategy. The impact of this strategy on Category A villages will be challenging enough.
PR-A-037	Bloxham Parish Council	6	Yes the plan area should be well related to Oxford City.
PR-A-037	Bloxham Parish Council	7	Access to Oxford. Equitable distribution of growth across rural areas. Infrastructure improvement plans.
PR-A-037	Bloxham Parish Council	9	Yes.
PR-A-037	Bloxham Parish Council	10	Yes.
PR-A-037	Bloxham Parish Council	12	Key issues for rural villages are identified at paragraph 5.37. Robust measures should be required to test any potential development location against these issues.
PR-A-037	Bloxham Parish Council	15	Locations where reliance on car use will not be essential. Bus services in rural areas even those close to Banbury are not secure. Assess potential for new settlements where access by public transport to Oxford could be designed in.

PR-A-037	Bloxham Parish Council	16	Lack of public transport options direct from Bloxham to Oxford. Cuts to bus services to Banbury to use train. No plans- and little opportunity - improve traffic flow on A361.
PR-A-037	Bloxham Parish Council	17	Must be clarity on affect development location would have on access to services for existing residents.
PR-A-037	Bloxham Parish Council	18	<p>Capacity of primary schools in rural areas. New schools in Banbury will not address issue of lack of places in village schools. No development location should be pursued that would result in primary age children having to attend a school in another village.</p> <p>Water and electricity supply are under strain and no plans to increase capacity. Systems struggling to cope with current demand.</p> <p>Flooding and drainage a real issue as fields are developed reducing capability to absorb water. See A361 March 9 where new site at Salt Way has been cleared.</p> <p>No plans and no realistic possibility of improving road access to Oxford from north of the county. Access to Banbury is increasingly difficult and it is not at all clear that road improvements connected with the Salt Way developments will ease congestion on A361. Public transport to Banbury from the villages is to be cut and so no expectation of extended services to suit commuters wanting to get to Banbury station.</p>
PR-A-037	Bloxham Parish Council	19	Infrastructure issues suggest potential development locations should be in the south of the county and closer to Oxford and the knowledge spine.
PR-A-037	Bloxham Parish Council	22	All evidence gathered for BNDP shows that Bloxham residents rely heavily on car use. There is universal acknowledgement that the mini roundabout on A361 is operating above capacity. BPC have asked for an air quality survey as numbers of HGVs using A361 increase. The road is regularly at a standstill at peak times as traffic negotiates cars parked at the local shops. Diminishing numbers of children walk to school and very few cycle.
PR-A-037	Bloxham Parish Council	25	Development to meet Oxfords unmet need should not be at the expense of Cherwell's natural environment while allowing Oxford to protect areas of its green belt that may be of lesser environmental importance.
PR-A-037	Bloxham Parish Council	26	Development already planned or completed on the edges of villages around Banbury including Bloxham has already adversely impacted the distinctiveness of these villages. The weight of new development has diminished the impact of the historic core of villages like Bloxham and has affected the rural nature of all approaches to the village. Important views of Bloxham's impressive church have been affected.
PR-A-037	Bloxham Parish Council	6&8	<p>1 Allocations for growth confined to narrower geographical focus. Closer to Oxford.</p> <p>2 Access to Oxford from rural areas north of the county is difficult. Reference access to trains bus cuts and no road infrastructure improvements suggested to A362/A 4260</p> <p>3 Area of search for development sites must be confined to areas where access to Oxford is sustainable.</p>

PR-A-038	Middleton Stoney Parish Council	1	<p>No. The concept of Cherwell District (CD) providing the level of housing to meet OC need is fundamentally flawed. In obtaining approval for its own now adopted Local Plan CD has already needed to revise upwards its own housing provision to meet the requirements of the SHMA (2014) as directed by the Planning Inspectorate. To expect CD to accommodate additional housing specifically for Oxford City (OC) must be seen in the context of the very significant increase in housing already necessary to meet its own needs.</p> <p>It seems to us that the response to OC's anticipated need (28,000 to 2031) (contained within Table 2) is pitiful but, further, to date there is no evidence upon which the true extent of unmet need arising from OC can be based.</p> <p>Oxfordshire Growth Board (OGB) and Oxfordshire Councils must, within their work as outlined in Paragraphs 1.17 & 1.18, ensure that as much of the anticipated housing need for Oxford City (OC) is contained within OC boundaries utilising all brownfield areas as necessary and by the pragmatic use of greenbelt land, before allowing the spread of OC's requirements to other areas.</p> <p>Only when the work of the (OGB) has been completed can the true unmet need be established. (cont....)</p>
PR-A-038	Middleton Stoney Parish Council	1	<p>(cont....) Thus the 3500 working assumption is as yet not based on any detailed assessment and is also merely a split between 5 neighbouring authorities together with an unexplained arbitrary uplift for CD.</p> <p>Within paragraph 2.8 we note that "Oxford has a responsibility to meet its housing need as fully as it can so that neighbouring districts can be sure they are not planning to meet Oxford's housing need unnecessarily". We read from this that the general principle should be that any perceived need is met where it arises.</p> <p>The developments taking place in Cherwell District (CD) will already increase commuter traffic. The addition of a further 3500 properties specifically to meet the needs of growth in OC will add to the commuting burden and given that there are no discernible plans to improve transport infrastructure this will exacerbate an already pressured situation.</p>
PR-A-038	Middleton Stoney Parish Council	2	<p>Again this seems to be a flawed concept. The additional housing is required to support employment within OC even though there is no clear evidence that it is required. Even assuming that it is required and based upon clear evidence, is it proposed that opportunities identified within OC are simply transferred to CD? What will OC's response to this be? As indicated in our response to Q1, if employment is identified specifically for OC growth then the housing to support it should also be within OC.</p>
PR-A-038	Middleton Stoney Parish Council	3	<p>Oxford is an economically successful area and also its close proximity to London feeds greater need for housing. Type of housing must reflect the requirements of a successful economy. However, many service sector employees (e.g. healthcare education) simply cannot afford to live in close proximity to the city and commuting is both expensive and due to transport infrastructure failings, inconvenient. It is an urgent requirement that the appraisal of city boundaries is undertaken with a view to ensuring that the level and type of housing is consistent with the economic requirements of the growing city.</p>
PR-A-038	Middleton Stoney Parish Council	4	<p>Again the key principle must be to meet need as close as possible to where it arises. This means that the OC requirements should not impact on CD objectives and aims. The housing need identified for the district should compliment the CD vision. An enforced "add on" of housing for commuters to OC does not achieve this.</p>
PR-A-038	Middleton Stoney Parish Council	5	<p>As articulated in Q4 above the OC requirements should not detract from the CD vision.</p>
PR-A-038	Middleton Stoney Parish Council	6	<p>If, ultimately, a clear, evidence based, need is established for OC then the 'area of search' should relate to OC and not extended.</p>
PR-A-038	Middleton Stoney Parish Council	7	<p>Should be concentrated on unused of brownfield land (including golf courses) within OC and in conjunction with a reappraisal of greenbelt areas.</p>

PR-A-038	Middleton Stoney Parish Council	8	No.
PR-A-038	Middleton Stoney Parish Council	9	Yes. The greenbelt area should be carefully redefined. After all it is 40 years since the Oxford Green Belt was formally approved in 1975. The Grenoble Road development should be reconsidered.
PR-A-038	Middleton Stoney Parish Council	10	OC's five year housing supply should be contained within OC. It cannot be allowed to influence the five year need for CD. The clear priority for CD is to ensure that it meets its own identified housing needs.
PR-A-038	Middleton Stoney Parish Council	11	This is a technical issue but if an "area of search" within the OC is identified then it should meet the OC need only.
PR-A-038	Middleton Stoney Parish Council	12	There should be no deviation from the CD local plan. Speculative developments on the premise of meeting OC unmet need should not be permitted.
PR-A-038	Middleton Stoney Parish Council	13	No.
PR-A-038	Middleton Stoney Parish Council	14	No further comment.
PR-A-038	Middleton Stoney Parish Council	15	Not clear. Sites should be located closest to employment.
PR-A-038	Middleton Stoney Parish Council	16	Oxfordshire's transport infrastructure is already under strain due to commuting traffic. A further 3500 houses built at a distance from OC will only exacerbate already serious problems.
PR-A-038	Middleton Stoney Parish Council	17	Unless there is a reappraisal of the location of employment developments required by OC then it will cease to be an attractive place to do business.
PR-A-038	Middleton Stoney Parish Council	18	Growth increases the need for service sector support particularly health/education facilities. These services already struggle to find adequate numbers of employees. Many potential employees find it too expensive to live in OC or travel to it.
PR-A-038	Middleton Stoney Parish Council	19	Employment development locations should be sited to ensure that there is affordable access to them for those who work within them.
PR-A-038	Middleton Stoney Parish Council	20	If OC is restricted in its ability to expand its boundaries to accommodate both economic development and the housing which should support it, then eventually it will cease to be an attractive investment opportunity and economic growth will be constrained.
PR-A-038	Middleton Stoney Parish Council	21	Clearly, the city needs to expand its boundaries.
PR-A-038	Middleton Stoney Parish Council	22	Commuting to OC to service OC growth is not sustainable.
PR-A-038	Middleton Stoney Parish Council	23	Clearly, the city needs to expand its boundaries.
PR-A-038	Middleton Stoney Parish Council	24	The natural environment is important since it enhances quality of life. Development should be restricted to areas of low value environmental importance and the greenbelt appraisal must identify such areas. If there is an ultimate aim to see considerable economic growth for OC then it is not realistic to continue with the premise that all greenbelt land is sacrosanct. Further, simply to protect OC green spaces at the expense of other spaces within CD is not an answer.

PR-A-038	Middleton Stoney Parish Council	25	Realistic reappraisal of greenbelt.
PR-A-038	Middleton Stoney Parish Council	26	No, except to say that the internationally renowned sites within OC must be protected.
PR-A-038	Middleton Stoney Parish Council	27	No comment.
PR-A-038	Middleton Stoney Parish Council	28	Under no circumstances.
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	1	<p>No. To date there is no evidence upon which the true extent of unmet need arising from Oxford City can be justified. For reasons set out above the MCNPF Forum reject the basis for the estimate of need, principally the Oxfordshire Strategic Housing Market Assessment. Until such time that the actual scale of unmet need has been identified, based on an up-to-date, transparent and clearly evidence-based assessment, which has been subject to scrutiny through the Examination process, no working figure should be applied.</p> <p>The 3,500 working assumption is not based on any detailed assessment other than a simple pro-rata split between the five neighbouring authorities plus an arbitrary uplift which has no sound planning justification. It pre-dates the final assessment of the Oxfordshire Growth Board and signals to that process a scale of growth that the District Council might be willing to accept. This has been done without any consultation with local communities or proper and transparent assessment as to whether this figure is suitable in terms of actual unmet need; we also consider that Cherwell District Council should, prior to this consultation, have assessed the ability of the district to accommodate such a scale of additional growth in a sustainable manner that is consistent with the established spatial strategy set out in the recently adopted LP1.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	2	<p>This question is framed within the context of there being a justified and transparent evidence-based assessment of unmet need arising from Oxford and Cherwell District's ability to accommodate it in a sustainable manner. For reasons set out in response to Question 1 the MCNPF consider that there is no robust evidence base available at this time that justifies additional housing for Oxford City within the Cherwell District.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	3	<p>Once again the question is framed as if it is fait accompli that Cherwell will accept a 'significant' contribution in response to Oxford City's unmet need. This is in advance of the final report of the Oxfordshire Growth Board and fails to base the district's capacity to provide for growth based on a detailed assessment of what is best for Cherwell's settlements and their ability to accommodate additional development, within the context of the established requirements set out in the LP1. Requirements which in themselves require a significant uplift in housing when compared to that previously delivered.</p> <p>The key issue for Oxford City is to ensure that identified need is based on an up-to-date and evidence-based assessment and fundamentally, that a detailed and transparent assessment of capacity within Oxford City's administrative boundary is undertaken. The neighbouring authorities to Oxford City, including Cherwell, cannot and should not be the first response of Oxford City. Need arising from Oxford City should be met as far as possible within Oxford City, and this should include urban regeneration/intensification and the release of appropriate sites located within the Green Belt.</p> <p>Only when there is a full and transparent assessment of Oxford City's capacity to accommodate growth to meet its unmet needs should neighbouring authorities be expected to consider their ability to provide for additional development. Cherwell, along with West Oxfordshire, South Oxfordshire and the Vale of White Horse should not be a dumping ground for Oxford City's unmet need.</p>

PR-A-039	Mid Cherwell Neighbourhood Plan Forum	6	<p>As set out previously the MCNPF does not support the basis of this consultation, nor is it convinced at this time as to the extent of unmet need arising from Oxford City and the need for Cherwell District Council to make provision to accommodate a significant level of development in response.</p> <p>Our response to Question 6 assumes that an appropriate level of unmet needs has been identified in an open and transparent manner based on sound evidence. It is therefore a hypothetical scenario and should not be taken as an endorsement of the scale of unmet need arising from Oxford.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	7	<p>On the assumption that there is a robust and transparent evidence base to justify a scale of unmet need, which the MCNPF consider is currently lacking, the 'area of search' should be set so that need is addressed as close to Oxford City as possible. This may include areas currently located within the Green Belt. The Green Belt has remained largely unchanged since it was first designated back in the 1970s and in response to the development pressures that exist today, a comprehensive review is considered necessary in order to determine the extent to which such land continues to contribute to the purposes of Green Belt. It is only through such a detailed assessment that the capacity of land within the current Green Belt, to make a contribution to meet Oxford's unmet need can be understood.</p> <p>An area of search should also take into account the existing functional relationship of existing locations with Oxford City and the delivery of necessary infrastructure improvements to support additional development. There must be a recognition that any additional development accommodated in Cherwell will exacerbate commuting flows, not just to Oxford but also to London.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	8	<p>No. The MCNPF strongly objects to the district-wide approach. The Cherwell Local Plan Part 1 has established the housing need for the district to 2031 which, as set out previously, requires a significant and challenging uplift in housing delivery when compared with historic rates of delivery. To apply the district-wide approach effectively increases the Local Plan Part 1 requirement still further, to levels which cannot be supported. The consequence of which will be to put all settlements, at every tier in the settlement hierarchy at risk from speculative development, premised on the need to respond to Oxford City's unmet need. A district-wide approach runs counter to the principle of meeting need where it arises.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	9	<p>Yes. To proceed without a detailed and transparent assessment of the Oxford Green Belt would not be appropriate, particularly given the fact that the existing Green Belt boundary has remained unchanged since the 1970s. Where unmet need has been identified it is necessary to ensure that in the first instance, all options are considered within Oxford City's administrative boundary, this must include changes to policies on density, regeneration, and other policies that serve to restrict development. It should not be an automatic default position that neighbouring authorities, including Cherwell, will have to accommodate growth arising from Oxford City. The MCNPF is not advocating development at any cost within Oxford City, or promoting a dilution of the important function of the Green Belt, rather a detailed and meaningful review, resulting in pragmatic policy solutions so that the unmet need is minimised as far as possible.</p> <p>Furthermore, where specific locations within the existing Green Belt have been assessed and considered to no longer contribute to the purposes of the Green Belt designation, and therefore provide potential development locations, there should be a concerted effort to ensure that additional compensatory areas of land are re-classified as Green Belt. This will help to preserve the integrity of the Green Belt and maintain its vital function in terms of restricting urban sprawl.</p>

PR-A-039	Mid Cherwell Neighbourhood Plan Forum	10	<p>Yes. The first priority for Cherwell District Council must be to ensure that it meets in full its own identified housing needs. It should not be the case that unmet need arising from Oxford City makes the housing land supply requirements for the district more onerous such that the ability to demonstrate a five year housing land supply cannot be demonstrated.</p> <p>The implications of not having a five year land supply are serious and put all of the settlements across the district at risk from speculative developers. To some extent this is recognised as an appropriate incentive for Local Plans to ensure that an adequate supply of housing is maintained and we strongly urge the District Council to continue to facilitate appropriate development so that this can be achieved.</p> <p>There should be a clear separation between Cherwell’s housing requirements and those additional homes needed in response to Oxford’s unmet need. The failure to distinguish between the two elements of housing need will result in a free-for-all across the district, including those villages within the MCNPF area. This must be avoided through a clear separation of housing requirements.</p> <p>Cherwell’s five year housing land supply obligations must continue to be calculated on the housing requirements for the district as set out in the adopted Local Plan.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	11	<p>The MCNPF is not in a position to provide a detailed response to this question. As a matter of principle there must be a clear separation of the housing requirements established in the Local Plan Part 1 and any identified housing requirement to help meet the needs of Oxford City. Although we do not support the principle of accepting unmet need arising from Oxford City, the area of search approach may provide a geographically separate area within which requirements relating to Oxford’s unmet need can be applied and an appropriate and separate land supply calculation established.</p> <p>The critical concern of the MCNPF is to ensure that unmet need arising from Oxford City does not undermine Cherwell’s ability to demonstrate a sufficient supply of sites to meet its five year obligations.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	12	<p>The MCNPF supports the position set out at para 5.37 which states that the Partial Review will need to accommodate additional housing growth in a way that complements the Local Plan Part 1. We repeat our principle objection to the scale of unmet need which has yet to be scrutinised or justified through appropriate evidence, but welcome the emphasis to the established objectives set out in the adopted Local Plan.</p> <p>Reference to “all reasonable locations” at para 5.36 is vague and the MCNPF are of the view that where need is robustly identified, the response must be to address that need, as close to where that need is arising.</p> <p>Reference to Category A settlements at para 5.35 should not be read as a list of villages that, because of their classification as a Category A village, have capacity to accommodate unmet need from Oxford City. There should be recognition within the Issue document that Category A villages have made an important contribution to development and that any significant development in excess of the 750 requirement set out in LP1 Policy Villages 2, risks undermining the wider strategy of re-balancing the district by focusing development at the main urban areas.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	13	<p>The Issues consultation document makes no reference to Neighbourhood Plans and the potential for the Oxford overspill to render existing plans out-of-date and/or to undermine the ability of local communities to advance a Neighbourhood Plan for the betterment of their communities.</p>
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	14	<p>The MCNPF does not consider that it is possible to provide a detailed response to this question. The key issue for Cherwell must be to ensure that the true extent of unmet need arising from Oxford is firmly established and transparent. Cherwell District should not be a dumping ground for Oxford City’s unmet need, particularly if the City itself has not considered all reasonable options to accommodate as far as possible its own needs within its administrative area.</p>

PR-A-039	Mid Cherwell Neighbourhood Plan Forum	15	The Issues consultation document does not define what constitutes “strategic housing sites”. As a matter of principle need should be accommodated as close to where it is arising as is possible and other key considerations must take account of existing infrastructure and capacity for improvements. Critically, the established development strategy and settlement hierarchy set out in the Local Plan Part 1 should not be undermined. The Duty to Cooperate is not a Duty to agree and if the cost of accommodating unmet from Oxford is the dilution of the strategies, objectives and policies within the adopted Local Plan then it would be wholly inappropriate for Cherwell District Council to advance this process any further.
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	16	MCNPF has registered very significant concern from local communities regarding traffic volumes in these rural areas. There are already several serious congestion hot-spots, and it is inevitable that additional housing will exacerbate these and create others.
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	17	Mitigation and improvements necessary to support additional growth must be considered in the context of the communities/settlements in the locality and the potential impact that this can have in terms of making existing routes more attractive to road users and undermining the intrinsic character of our rural communities as result additional development. Although improvements may be physically possible in some cases this should not be at the expense of our established rural communities.
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	18	MCNPF is already concerned regarding the capacity of existing infrastructure, both in terms of physical infrastructure such as: drainage; electricity supply; and, mobile phone coverage which are already the source of regular complaints from our communities, but also social infrastructure including health care provision, local/community policing and cemetery provision. Any new housing will clearly have an impact on existing provision and development should only be approved where it can be demonstrated that, as a minimum, it will not exacerbate existing infrastructure provision, and in order for development to be sustainable, demonstrate real improvements to the existing infrastructure situation to the betterment of existing and new residents.
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	19	It is clear that existing infrastructure problems, in terms of quality and capacity, will be made significantly worse where it is the case that significant new homes need to be accommodated within the District. The ability of existing infrastructure to cope with additional homes should be a key consideration in determining potential locations for new homes in response to Oxford’s unmet need.
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	20-27	No response is deemed necessary in the light of comments above.
PR-A-039	Mid Cherwell Neighbourhood Plan Forum	4+5	Our response to Questions 4 and 5 should be read in conjunction with our overriding concerns expressed previously. Questions 4 and 5 are superfluous and is reliant upon an acceptance of the district accommodating a significant scale of growth to address Oxford’s unmet need.

PR-A-039 Mid Cherwell
Neighbourhood
Plan Forum

1 The starting point must be that the District has an adopted Local Plan (Part 1 - LP1) (July 2015) which sets out the need for housing and seeks to provide for 22,840 homes over the Plan period from 2011-2031. This equates to 1,140 dwellings per year over the 20 year plan period. This represents a significant increase from that originally proposed in the submitted LP1 which sought to provide housing at a rate equivalent of 670 homes per year, or 16,750 over the plan period to 2031. This significant increase was justified on the basis of the conclusions of the 2014 Oxfordshire Strategic Housing Market Assessment (SHMA).

Therefore in order to ensure soundness total housing provision proposed in the LP1 has already been increased by circa 36% from that originally proposed. The resultant annual average completion rate necessary to meet this uplift in housing amounts to a 124% increase when compared against actual completions recorded annually over the five year period preceding the start of the LP1 Plan period (i.e. 2006-2011 – average annual completions = 509dpa). Total completions over the period 2006-2015 for the district amount to 4,594 dwellings, equating to actual completion rates of 510 dwellings per annum over that 9 year period.

It is therefore clear that in order for the Cherwell District to meet its own identified need for housing it will require a very significant uplift in housing and we question whether this can be achieved given the scale of growth proposed at the district's two main towns of Banbury and Bicester. (cont....)

PR-A-039 Mid Cherwell
Neighbourhood
Plan Forum

1 (cont....) We note that the final unmet need figure arising from Oxford City is yet to be determined, but that a working assumption of 3,500 additional homes for the Cherwell District is being advanced as a working figure. If adopted within the timeframe set out in the Council's Local Development Scheme, i.e. 2018, it will require this need to be met over the remaining years of the Plan period, equating to approximately additional 269 dwellings in the district per year between 2018 and 2031.

To expect Cherwell District to accommodate this additional housing requirement must be seen in the context of the very significant increase in housing already necessary to ensure the district can meet its own housing obligations. The first priority for the District Council must be to ensure that it meets in full housing need for the district identified in the LP1.

It is the view of the MCNPF that Cherwell District Council should subject the figures of need arising from Oxford City to proper and transparent scrutiny. The National Planning Policy Framework (NPPF) states that "Local Plans should be aspirational but realistic". (NPPF, Para 154). The 2014 Oxfordshire SHMA figures are specifically aligned with forecasts of new job growth advanced by the Local Enterprise Partnership and the aspirations of individual promoters of land, whose very existence and motivation is justified on the basis of economic growth and job generation. In effect a self-fulfilling prophecy. The 'committed economic growth' scenario set out in the SHMA which has been applied to determine future housing requirements is an overly aspirational objective that does not appear to be grounded in any evidence. (cont....)

Moreover, to advance a strategy that effectively creates dormitory locations as a base for out-commuting, not just to Oxford but also to London and other sub-regional employment hotspots, will result in unsustainable patterns of development to the detriment of the district, beyond the capacity of our existing infrastructure and at the expense of the intrinsic quality of the district's landscape and rurality.

PR-A-039 Mid Cherwell
Neighbourhood
Plan Forum

1 (cont....) The implications for the Cherwell District, its established spatial strategy and the individual settlements, including those which form part of the MCNPF, will be significant. Accordingly, the MCNPF objects as a matter of principle to the premise for this consultation and the need for Cherwell District to accommodate additional growth arising from Oxford City. We recognise that the District Council has a statutory responsibility, under the Duty to Cooperate, to consider the extent to which unmet need arising from Oxford City may be accommodated within the District. However, this Duty is not a Duty to agree and in this context the working figure of 3,500 homes is regarded as without foundation and supporting evidence.

PR-A-039 Mid Cherwell Neighbourhood Plan Forum	1 Conclusion-The MCNPF is committed to working closely with the District Council as it advances the Neighbourhood Plan. The progress of the Partial Review of the Local Plan 1, although focussed on unmet need arising from Oxford, must not relegate the aspirations and objectives of communities within the district as it seeks to accommodate significant housing in addition to that established in the Local Plan Part 1.
	The comments set out above represent an accurate reflection of the views of the MCNPF and demonstrate genuine concern with both the justification for, and the potential impacts of, accommodating significant additional development arising from Oxford City.
	The primary focus for the District Council must to the spatial strategy and objectives set out in the Local Plan Part 1 and to support those communities that are committed to the Neighbourhood Planning process.
PR-A-040 T Lucas	16 Transport networks in this area are already overloaded and at peak times are barely usable. The main routes into Oxford are congested and without relief. I do not believe that current proposals will solve existing problems, let alone those caused by additional growth in Cherwell and elsewhere in the County, and am dismayed by the lack of vision or principle displayed in the planning.
PR-A-040 T Lucas	24 Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will further damage the natural environment of Cherwell. I am very concerned that the Kidlington's natural surrounds are being eroded by excessive development, and that the knock on effects of this on the flora, fauna, and animal life will be irreversible.
PR-A-041 JPPC / Oxford University Press	2 Account should be taken of the potential need for additional land for employment purposes as well as for housing. In this context, should the Council conclude that the Part 2 Plan should retain the site within the green belt, it should consider the removal of the site from the green belt in the Partial Review in order to meet the employment needs generated by the additional housing growth. In this context, the analysis of the larger parcel contained in the Oxford Green Belt Study should be taken into account: the site makes no significant contribution towards the green belt or any of its purposes.
PR-A-041 JPPC / Oxford University Press	28 Site submission - Land off Langford Lane, Kidlington
PR-A-042 J & H Maddicott	1 The figure of 3,500 homes needed to meet Oxford's housing demands is by no means a reasonable one. It derives from the Oxfordshire SHMA, which has never been properly scrutinised and which was largely drawn up by developers and their associates. The figures provided in the SHMA are based on no hard evidence and are quite unrealistically high.
PR-A-042 J & H Maddicott	2 Cherwell does not need to provide for more employment generating development. Increasing employment opportunities, in an area which currently has very low unemployment, will merely increase the need for housing.
PR-A-042 J & H Maddicott	9 The Oxford Green Belt should be regarded as an area permanently protected from development. The Green Belt around Kidlington is particularly valued, since it prevents Kidlington's merger with the city and the creation of a continuous suburban strip stretching for some seven miles north of Oxford.
PR-A-042 J & H Maddicott	17 Oxford's transport system is already near the point of breakdown, with traffic jams and delays occurring increasingly frequently. Further building can only exacerbate what is already a major problem.

PR-A-043 E & R Moore

1

In the context of the necessity for this partial review of Cherwell's Local Plan (Part 1), we would first like to restate our strong objection to the obligation forced upon the Oxfordshire district local authorities to meet Oxford's estimated unmet housing needs. It is vital that CDC should challenge both the SHMA's overinflated estimate of the county's housing requirements, and the accuracy of Oxford's own estimate of its housing need. CDC has the discretion (Issues Paper 2.6) " ... for Local Plans to examine whether that need can be fully met in the light of environmental or other considerations". We urge CDC in undertaking this Review to resist a proposed solution to Oxford's housing, pollution and traffic problems that merely shifts them outwards to adjacent localities in the Cherwell District. We would also express our very strong objection to any development on the Oxford Green Belt: the Green Belt has a very special function, in Cherwell as elsewhere, to protect the countryside and open and green spaces and to act as a buffer against the spread of urban development and coalescence between settlements. In Kidlington, where we are resident, the Green Belt surrounding the village is precious and highly cherished by the community for its health, environmental, visual, and recreational value. This is not nimbysm: the majority of Kidlington's residents live in an urban setting, probably a majority of them on estates, and Kidlington, although a sizeable settlement, is deficient in parks and open or green spaces, so that the countryside around the village provides the only locally accessible opportunity for enjoying open green space. (cont...)

Page 775

PR-A-043 E & R Moore

1

(cont...) In this context, and as Kidlington residents, we would make the following detailed comments on the Issues Paper (IP) and Sustainability Appraisal (SO):

The Issues Paper outlines development for Kidlington already set out in the Local Plan Part 1, including employment creation at Begbroke Science Park and Langford Lane (acommodated from a smallscale review of the Green Belt), an increased role for Oxford Airport, and the enhancement of Kidlington village centre. These together with additional traffic generated by proposals in the current Transport Strategy (Park & Ride at Langford Lane, rapid transit bus routes), the Northern Gateway, improvements to the A34/A40 interchanges, the planned Upper Heyford housing development, and the recently opened Oxford Parkway rail station make any consideration of major housing development on the outskirts of Kidlington unsustainable in terms of loss of green and open space, increased road and air traffic and pollution, and additional demand upon an already stressed local infrastructure, most notably health services provision. Largescale development in Kidlington is probably only possible within the Green Belt, most likely in the Kidlington gap, and we would object to this absolutely for reasons already indicated. The effects of largescale housing or employment development in or near to Kidlington can only be detrimental to the health and quality of life of Kidlington residents and to the natural environment, outcomes that are the opposite of Cherwell's 'vision' for ' ... an area where all residents enjoy a good quality of life [where] those who live and work here will be happier [and] healthier'. (cont....)

PR-A-043 E & R Moore

1 SA

(cont...) With regards to the detail of the Sustainability Appraisal, the critical and key part of the Review process, we have concerns in relation to Kidlington in particular, since it is clearly a likely target area for largescale development about the accuracy and viability of a number of the Assumptions (expressed as positive, negative or neutral ratings) that are proposed as a short cut to measuring the Review's deliberations against Cherwell's sustainability objectives. We believe that these Assumptions are in many instances simplistic and should be modified or abandoned in favour of a more detailed and balanced methodology.

SEE LEFT COLUMN

1. Provision for affordable housing. Cherwell's existing target is for 33% affordable housing; this will not be achieved while developers have the option of 'financial contribution', which makes a nonsense of this target.

2. Health/wellbeing. Sites within/adjacent to Kidlington are rated (+) because of the adequacy of existing healthcare facilities – but the existing healthcare facilities in the village are already stretched to breaking point.

5. Create/sustain vibrant communities. Airports should be included in the list of adverse factors (). The number of flights from Kidlington airport has increased over time, causing considerable noise, air, and light pollution in and around Kidlington. More recently lengthy episodes of very loud and persistent noise from ?engine testing occur on an almost daily basis, and can be heard inside our doubleglazed house in north Kidlington and as far away as the centre of Kidlington and ShiptononCherwell. The noise is unpleasant and intrusive. Further development of the airport will increase these pollutions, to the detriment of the mental and physical health of residents. (cont...)

PR-A-043 E & R Moore

1 SA

(cont...) 6. Improve accessibility to all services/facilities. Development within/near Kidlington is rated (++) because of proximity to a number of services/facilities,

SEE LEFT COLUMN

but this rating is very crude, and takes no account of the range, quality, and adequacy of the services, such as the capacity of the health and education services,

the standard of retail provision, or the number and quality of urban green spaces.

7. Conserve, enhance, create resources for biodiversity. The rating of 'may have' (-) or () is conditional upon the detailed planning application, because it is considered that potential impacts cannot be determined with certainty at this level of assessment. The conditionality attached to this critical objective is not

satisfactory and should be amended: the momentum of a full planning application favours development over biodiversity interests, and green infrastructure and

mitigation are dependent on developers' remediation plans which in actuality may or may not be of environmental value and may or may not be implemented

and maintained. There are similar concern about the conditionality attached to the creation of new areas of open space ('likely positive effect', 'larger sites may have particularly positive effects'): this is much too vague and also begs the question of how new areas of open space are to be created in largescale developments which by their very nature actually substantially reduce existing areas of open space.

8. Protect/enhance landscape character ... make accessible for the enjoyment of the countryside. Again, the conditionality of this rating ('may have') is unsatisfactory, leaving the burden of assessment to the planning application stage. (cont...)

PR-A-043 E & R Moore

1 SA

(cont...) 10. Reduce air pollution and road congestion. It is essential that these ratings based on distance from sustainable transport links are applied with reference to the actuality of public transport provision and cycling and walking opportunities at the time of the review and not on any planned future (but uncertain) public transport etc. improvements. The current Oxfordshire Transport Strategy itself needs careful scrutiny for its potential to increase congestion and traffic flow through Kidlington by merely moving the current congestion and traffic volume from the perimeter of Oxford to outlying areas. There are wider current or planned developments such as the Northern Gateway, Upper Heyford housing scheme, and proposed alterations to the A34/A40 intersections in the locality that will increase the type and volume of traffic through Kidlington, and these should be factored into any consideration of additional traffic pressures created by largescale housing development in or near Kidlington, especially as Kidlington already has an AQMA. A weakness in setting ratings according to the proximity of public transport provision etc. is that it inherently excludes commercial traffic with its heavy polluting and noise effects and, critically, it relies on voluntary use of public transport, making it misleading to assume that public transport provision will substantially reduce the increase in traffic resulting from largescale development. Finally, a serious omission in this section is consideration of the air pollution from air traffic over Kidlington (see 5. above), and this should be rectified.

12. Reduce flooding risk. We struggle to understand why largescale development in highrisk areas should be considered at all, and why ratings are applied based on the extent of the allocation of open space in a development when it is an inherent characteristic of largescale development that it itself consumes a large area of open space. There are sufficient examples in the county of permitting development on highand moderaterisk flood areas to demonstrate that it can precipitate flooding events that damage quality of life and the economy and necessitate highcost remedial works. Fields and open spaces around Kidlington frequently flood in periods of heavy rainfall, particularly near the river Cherwell to the east and the canal to the west. (cont....)

SEE LEFT COLUMN

PR-A-043 E & R Moore

1 SA

(cont...) 16. Ensure levels of high and stable employment so that everyone can benefit from economic growth of the district and Oxford and 17. Economic growth, competitiveness. These are very generalised aspirations that fail to take into account the disbenefits (mainly health and social) of economic growth, such as loss of green and open space and increased traffic and pollution and infrastructure pressures, nor is there any recognition that to some (currently unknown?) extent the types of employment and income levels generated could lead to greater inequalities in areas such as access to affordable housing and educational and health provision – not everyone would benefit. The outcome of largescale residential development adjacent to Cherwell's existing and planned key employment areas is problematic to forecast, and the positive ratings (++) and (+) need reconsideration since they do not reflect the complexity of possible outcomes. It is difficult to predict where people will choose or can afford to live in relation to their workplace. Housing developments adjacent to Kidlington intended to provide for Oxford's workforce risk instead being occupied by London commuters attracted by the new Oxord Parkway rail link or by commuters utilising the access to nearby trunk roads, and expansion of employment sites in the same locality can only increase pressure on housing, transport and infrastructure.

Similarly, the notion that the development of largescale employment sites always merits a positive (++) rating as a contribution to economic growth is simplistic since it does not take into account such factors as the type of employment and revenue generation and, critically, the economic benefits to the locality in which it is situated or the disbenefits to communities of loss of open space and increase in traffic and pollution. The Cherwell district already enjoys a below national average unemployment rate, and continued expansion of the labour force will exert unsustainable pressures on housing supply and on public services that are already and for the foreseeable future under massive strain from funding cuts. (cont...)

SEE LEFT COLUMN

PR-A-043	E & R Moore	1	9 (cont...) We would additionally ask that the Review process also gives due weight to the government's stated desire to conserve the Green Belt; the NPPF presumption against development of the Green Belt; the recommendation of the 2015 Green Belt study that local authorities should undertake careful master planning and development so that harm [to the Green Belt] is minimised (SA 3.15); the planning inspector's view that Kidlington's own housing needs can be addressed under PV3 rather than requiring a local review of the Green Belt (SI3.25); the NPPF requirement that local authorities should have regard to the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary (SI4.15); and to Cherwells' own stated objectives to protect and respect individual settlements (SI 3.2), strictly control development in open countryside (SI3.6), carefully consider in relation to the Green Belt and its purposes [proposals for] any further housing growth in Kidlington to accommodate unmet housing need from elsewhere (SI3.26), avoid sprawl and coalescence and harm to the identity of existing settlements and protect biodiversity in both designated and nondesignated sites (SI5.37) (SI5.113), protect the canal corridor (SI5.130) and its value as a tourism resource (SI5.87), and strictly control development in open countryside, and in floodrisk areas in Kidlington and along the canal (SI5.133/4).
PR-A-043	E & R Moore	SCI	Before setting out our comments on this planned Review, we would like to register a protest at the number of major consultations that are running consecutively or within a very short time frame of each other. These are major, lengthy and complex documents to read and comment on, and time pressures or health or other life events, and even limited IT skills, must preclude many people's participation in this consultative process. To encourage public participation and support the democratic process, please could you leave more time between major consultations, or give us a longer consultation period. The following comments are – we apologise probably not in the required format, but we found it impossible to respond to the battery of formal questions inserted in such lengthy documents that we can only scan onscreen, in the time available. Thank you.
PR-A-044	J Pilgrim	1	No. It is derived from the Oxfordshire SHMA which has simply been accepted by the Council and not subjected to serious independent scrutiny. The SHMA was drawn up by private consultants who largely work for the development industry and therefore have a conflict of interest. Its figures are much too high, far in excess of previous trends and difficult to justify. I do not accept that the SHMA figures represent either Cherwell's or Oxford's needs.
PR-A-044	J Pilgrim	2	No. The excessive housing figures are already based on unrealistic forecasts of growth in employment. To provide for yet more employment generating development is simply creating a vicious circle.
PR-A-044	J Pilgrim	9	No. Green Belt is a permanent designation. The Green Belt around Kidlington is much valued. National Policy says that housing need is not a reason to build on the Green Belt. The Government, in its manifesto, made a commitment to protect the Green Belt. There are better opportunities in Oxford itself to develop underused sites for residential use and to ensure unoccupied property is fully utilised.
PR-A-044	J Pilgrim	16	Transport networks in this area are already overloaded. I do not believe that current proposals will solve existing problems, let alone those caused by additional growth in Cherwell and elsewhere in the County. The Highway Authority's vision and objectives, that you quote, are vague aspirations and without substance. Improvements to transport networks should be the priority.
PR-A-044	J Pilgrim	24	Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will further damage the natural environment of Cherwell. There is a serious risk of flooding in areas close to Oxford already struggling to handle increased surface water run-off which will be exacerbated by this scale of development.
PR-A-045	Archstone Projects Ltd	1	An apportionment of 3,500 homes from the working assumption of 15,000 homes for Oxford City seems a reasonable approach at this stage. We support the Council's decision to push ahead with the review of the Local Plan based on these principles rather than waiting for the conclusions of the ongoing Oxfordshire Growth Board work.
PR-A-045	Archstone Projects Ltd	6	It would seem logical for the area/s of search for the unmet need to relate well to Oxford City. However, the tests for how well areas relate should be varied and also balance constraints. Areas in close proximity to the City will not necessarily perform better or as well as locations in other parts of the District, which may be less contained and more conducive to sustainable travel (e.g. by train or Park and Ride).

PR-A-045	Archstone Projects Ltd	7	The LTP4 Oxford Transport Strategy identifies the existing problems in the City of poor air quality and traffic congestion and the challenges for mass transit for future growth. The Strategy should be a key influence in narrowing the area/s of search to focus on sustainable transport corridors and support the County's transport strategies.
PR-A-045	Archstone Projects Ltd	10	Part 1 of the Local Plan was recently adopted before the work by the Oxfordshire Growth Board was sufficiently progressed, so CDC will effectively be identifying additional housing supply specifically for meeting Oxford's needs. However, both authorities form part of the same housing market area and the need of Oxford is already affecting the availability and affordability of housing in Cherwell District. So in reality, identifying a supply of additional sites in the District and attributing them specifically to Oxford would be artificial and very difficult to monitor in terms of the need they are addressing.
PR-A-045	Archstone Projects Ltd	11	The work by the Oxfordshire Growth Board has acknowledged the extent of the unmet housing need for Oxford City. The urgent need for new housing related to Oxford City is already affecting Cherwell and the surrounding authorities in the market area in terms of affordability and where people choose to live. By helping to meet Oxford's needs, CDC will also be helping to address associated problems in the District. Cherwell is responsible for providing sufficient supply within its administrative boundary to assist Oxford City and will be the authority controlling the development plan and planning permissions. The supply should therefore be aggregated to achieve the objectives of the NPPF to encourage sustainable development to boost housing supply, and to address the current failings in the housing market area. To do otherwise would be artificial and impractical.
PR-A-045	Archstone Projects Ltd	15	Traffic and poor air quality are key planning challenges facing Oxford City. CDC should therefore consider all areas where people (either currently or through improvements to infrastructure) can travel most sustainably to Oxford to reduce traffic and improve air quality. This should include near railway stations and also along main roads which can benefit from park and ride.
PR-A-046		1	No. It is derived from the Oxfordshire SHMA which has simply been accepted by the Council and not subjected to serious independent scrutiny. The SHMA was drawn up by private consultants who largely work for the development industry and therefore have a conflict of interest. Its figures are much too high, far in excess of previous trends and clearly unrealistic. I do not accept that the SHMA figures represent either Cherwell's or Oxford's needs. I would like to see an independent group, i.e., none connected to development in any remote way, prepare a study. Results, then, might be worth considering seriously.
PR-A-046	B Seymour	2	The excessive housing figures are already based on unrealistic forecasts of growth in employment. To provide for yet more employment generating development is simply creating a vicious circle. Employment need should be natural self-generating growth, not artificially implanted.
PR-A-046	B Seymour	9	No. Green Belt is a permanent designation. The Green Belt around Kidlington is much valued. National Policy says that housing need is not a reason to build on the Green Belt. The Government, in its manifesto, made a commitment to protect the Green Belt.
PR-A-046	B Seymour	16	Transport networks in this area are already overloaded. I do not believe that current proposals will solve existing problems, let alone those caused by additional growth in Cherwell and elsewhere in the County. The Highway Authority's vision and objectives, that you quote, are vague aspirations and without substance. There are already too many private vehicles. Each house/home has 3, sometimes more, vehicles parked in front. Paved-over front gardens have become parking lots. More chaos on the roads will accompany more housing. Cyclists (and I am one) continue to be in danger and will be even more so with frustrated, nasty, ill-tempered, ill-trained drivers taking it out on us.
PR-A-046	B Seymour	24	Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will further damage the natural environment of Cherwell. Considering the increase in private vehicles that further housing will engender air pollution can only increase.

PR-A-047	JLL / Church Commissioners for England	10	<p>The formation of a specific housing land supply to meet Oxford City's needs would need to be carefully formulated and considered to ensure that it is consistent with the evidence base underlying the SHMA.</p> <p>Such a policy is also likely to be difficult to formulate, as sites in the District are likely to contribute to both housing needs at a District level and those in the wider Strategic Housing Market Area (SHMA). We will carefully monitor any future policy proposed by the Council to ensure that the practical implications for the delivery of the District's housing land supply are properly understood.</p>
PR-A-047	JLL / Church Commissioners for England	11	<p>Whilst the District has identified strategic sites to meet its own housing needs over the plan period, it has not allocated land that could provide for Oxford City's needs or smaller housing sites (the latter being considered in Part 2).</p> <p>We welcome the Council's acknowledgement at Paragraph 5.11 that the NPPF requires, amongst other things, the Council to ensure that the Partial Review meets the full, objectively assessed needs for the SHMA, and in addition, that CDC should review the supply of housing annually.</p> <p>To assist the 5 year housing land supply, CDC should ensure that there is sufficient flexibility in planning policy for sites to move from employment (where such uses cannot be attracted), and released to deliver dwellings which will contribute to the District's five year housing land supply. This flexible approach is in line with Paragraph 22 of the NPPF, and will assist CDC in accommodating the additional housing required in the District. This flexible approach will also reduce the pressure to release greenfield land to accommodate housing growth elsewhere in the District.</p>
PR-A-047	JLL / Church Commissioners for England	15	<p>Site submission - Land East of Banbury Business Park. Please see answers to Questions 10-12 and note the role that redundant or underutilised employment land could play in contributing to the District's housing supply. Such locations should be reviewed to assess their potential as potential housing sites, particularly where the demand for employment land is limited.</p> <p>We have suggested that the Land East of Banbury Business Park should be considered as a potential housing location in our Call for Sites submission.</p>
PR-A-047	JLL / Church Commissioners for England	12-14	<p>Paragraph 5.37 states that: <i>'the Partial Review will need to accommodate additional housing growth in a way that complements the Local Plan Part 1's approach of creating and supporting inclusive communities in quality urban and rural environments; avoiding sprawl and harm to the identity of settlements'</i> .</p> <p>In order to accommodate this additional housing growth in a sustainable way, a flexible approach should be taken to enable employment land to be brought forward for residential uses where demand for the employment use cannot be secured in line with Paragraph 22 of the NPPF. This approach (to review the potential of such sites to contribute to the District's housing supply) will contribute to the aims of the Part 1 Partial Review by promoting, creating and supporting inclusive communities in quality urban and rural environments. It will also assist in reducing urban sprawl and harm to the identity of settlements, and should also ensure that housing growth is focused to areas where sufficient infrastructure is provided. We expand on this further in our response to Part 2.</p> <p>We reserve the right to make further comments as the Partial Review of Part 1 Local Plan progresses.</p>
PR-A-047	JLL / Church Commissioners for England	20+21	<p>We welcome Paragraph 5.79 which recognises that in formulating Local Plans, Local Planning Authorities (LPAs) are expected to support existing business sectors, and take into account whether businesses are expanding or contracting.</p> <p>Paragraph 5.79 also acknowledges that policies should be flexible enough to accommodate needs not anticipated in the Plan and to allow a rapid response to changes in economic circumstances. This approach is welcomed as it is in line with the Paragraph 22 of the NPPF.</p>

PR-A-047	JLL / Church Commissioners for England		11 CDC should ensure that there is sufficient flexibility in the Local Plan for sites to be released from employment uses (where such uses cannot be attracted) so that residential dwellings can be delivered which will contribute to the District's five year housing land supply. This flexible approach is in line with Paragraph 22 of the NPPF, and will assist CDC in accommodating the additional housing requirements in the District. This flexible approach will also reduce the pressure to release greenfield land to meet the housing requirements under Parts 1 and 2 of the Local Plan.
PR-A-047	JLL / Church Commissioners for England		11 There is sufficient protection of employment land in Part 1 and any greater protection in Part 2 would reduce the flexibility to bring forward employment land for alternative uses (in situations where there is limited demand for employment). Policy SLE1 already provides sufficient protection, and any further protection would not be compliant with Paragraph 22 of the NPPF.
PR-A-047	JLL / Church Commissioners for England	11&15	We have also provided a response to the Council's 'Call for Sites', to highlight the potential of the remaining of remaining land at Banbury Business Park not only for employment uses in the future, but also the potential to accommodate alternative uses, such as residential. Although the previous employment allocation of the remaining employment land should be carried forward into Local Plan as Part 2, it is critical that local planning policy remains sufficient flexible to bring forward alternative uses on the remaining land at the Business Park, if the refreshed marketing campaign for employment uses fails to secure an employment use in the future.
PR-A-048	Historic England	1	No comment.
PR-A-048	Historic England	2	We can see the advantage of supporting additional housing by additional employment-generating development (together with essential facilities and services) to avoid or reduce the need for commuting. However, we also a wider issue here that presumably Oxford's identified housing need is based partly on that needed to support economic growth. If that economic development was then to be provided outside Oxford, it would be reasonable to expect the overall housing need of Oxford to be reduced accordingly. This is a wider issue of where economic growth takes place in the county.
PR-A-048	Historic England	3	Oxford's Key Issues are as set out in the extract from the Oxford City Core Strategy in paragraph 2.24. We would also specifically mention views into and over the city, including those identified in the Oxford Viewcones Study, and how they contribute to the significance of the city and appreciation of that significance, and the need to reduce or minimise travel demand. Paragraph 3.4 – has the land within the district to the north of Oxford any historic significance – have the Historic Environment Record and Historic Landscape Characterisation been checked ? Paragraph 3.19 – Kidlington has a historic centre, recognised by Conservation Area designation. Any proposed development at Kidlington should not have an adverse effect on the character, appearance and special interest of the Conservation Area. Paragraph 3.28 – we welcome the recognition of the conservation areas within the District.
PR-A-048	Historic England	4	We would expect a key principle or goal that additional growth in the District should aim to achieve is the conservation and enhancement of the District's historic environment and the heritage assets therein. This should reflect the Vision.
PR-A-048	Historic England	5	Logically would come before goals, which should contain "without unacceptably affecting Cherwell's natural, built and historic environment".
PR-A-048	Historic England	6	Generally yes, but with the caveat that other considerations also need to be taken into account, including the potential effects on the historic environment.
PR-A-048	Historic England	7	As above, proximity to Oxford City and potential effects on the historic environment, and also transport infrastructure. If employment-generating development is provided alongside the new housing, then the area of search could be wider.
PR-A-048	Historic England	8	Possibly, if employment-generating development and other facilities and services are provided alongside the new housing.

PR-A-048	Historic England	9	Not just on the Green Belt, and if the Green Belt is considered then, as we explain earlier in this letter, the contribution of a site to the purposes of the Green Belt, particularly, given our remit, the purpose to preserve the setting and special character of historic towns, will obviously be a major issue.
PR-A-048	Historic England	13	The conservation and enhancement of the historic environment and the heritage assets therein.
PR-A-048	Historic England	14	“to not unacceptably affecting Cherwell’s natural, built and historic environment”.
PR-A-048	Historic England	15	Locations with an existing or potential adequate range of employment opportunities, facilities, services and infrastructure, and which would not unacceptably affect the District’s natural, built and historic environment.
PR-A-048	Historic England	22	The National Planning Policy Framework (NPPF) makes it clear that the conservation and enhancement of the historic environment is an integral part of sustainable development (paragraphs 7 and 9).
PR-A-048	Historic England	23	The need to conserve and enhance the significance of heritage assets and their settings should be a consideration when identifying potential development locations to meet Oxford’s unmet needs, both as a potential constraint and as a potential opportunity to secure the future of historic buildings or to better reveal their significance.
PR-A-048	Historic England	26	We welcome paragraphs 5.142 – 5.154. However, paragraph 5.143 could have noted that the NPPF also requires local plans to contain a clear strategy for enhancing the built and historic environment and to identify land where development would be inappropriate, for instance because of its environmental or historic significance.
PR-A-048	Historic England	27	The need to conserve and enhance the significance of heritage assets and their settings should be a consideration when identifying potential development locations to meet Oxford’s unmet needs, both as a potential constraint and as a potential opportunity to secure the future of historic buildings or to better reveal their significance. This consideration should include the contribution of a site to the purpose of the Green Belt to preserve the setting and special character of Oxford.
PR-A-048	Historic England	28	Although we have no sites to put forward, we would respectfully remind the Council of the need to have regard to potential impacts on the historic environment when considering potential housing sites. The National Planning Policy Framework explains that heritage assets are an irreplaceable resource that should be conserved in a manner appropriate to their significance.

Information on designated heritage assets can be found on the National Heritage List for England (<http://list.historicengland.org.uk>) and on non-designated heritage assets from the Historic Environment Record. Other potential sources of information include the Oxfordshire Historic Landscape Character Assessment, currently underway, Urban Character Assessments and Conservation Area Character Appraisals. (cont...)

PR-A-048	Historic England	28	<p>(cont...) Historic England expects the policies and proposals of local plans, including development site allocations, to be based on an adequate, up-to-date and relevant evidence base as regards the historic environment. We will look to see how the consideration of impacts on the historic environment has informed the choice of allocation sites. These should include the impacts of any sites proposed in the Oxford Green Belt on its function to preserve the setting and special character of Oxford.</p> <p>Historic England's Good Practice Advice in Planning Note 1 contains advice on the historic environment in local plans: (https://content.historicengland.org.uk/imagesbooks/publications/gpa1-historic-environment-local-plans/gpa1.pdf/) and we have published further advice on site allocations in local plans: (http://www.historicengland.org.uk/images-books/publications/historic-environmentand-site-allocations-in-local-plans/). Advice on the setting of heritage assets is given in Historic England's Good Practice Advice in Planning Note 3: The Setting of Heritage Assets (https://content.historicengland.org.uk/imagesbooks/publications/gpa3-setting-of-heritage-assets/gpa3.pdf/). (cont...)</p>
PR-A-048	Historic England	28	<p>(cont...) We would be pleased to offer comments on potential sites as regards the potential impact on the significance of designated heritage assets, in confidence if necessary, and further advice should be sought from your Conservation Officer and Archaeological advisor.</p>
PR-A-048	Historic England	10-12	No comment.
PR-A-048	Historic England	16-21	No comment.
PR-A-048	Historic England	24+25	No comment.
PR-A-048	Historic England	9	<p>We note the preparation of the Oxford Green Belt Study and its having been undertaken through the Oxfordshire Growth Board under the Duty to Cooperate. As noted above, the Duty also applies to Historic England and we are surprised that we do not appear to have been offered any opportunity to comment on the study before now.</p> <p>Therefore, whilst we are pleased to see that the study has assessed the extent to which the Green Belt has performed against the purpose to preserve the setting and special character of historic towns, we are not in a position to endorse or necessarily agree with the study's findings in this respect.</p> <p>The contribution of a site to the purposes of the Green Belt, particularly, given our remit, the purpose to preserve the setting and special character of historic towns, will obviously be a major issue to be considered in identifying possible sites to help meet Oxford's unmet housing need. In addition, the consideration of impacts on the historic environment should inform the choice of allocation sites.</p>
PR-A-048	Historic England	28	<p>We have published advice on site allocations in local plans: (http://www.historicengland.org.uk/images-books/publications/historic-environment-and-site-allocations-in-local-plans/). Advice on the setting of heritage assets is given in Historic England's Good Practice Advice in Planning Note 3: The Setting of Heritage Assets (https://content.historicengland.org.uk/images-books/publications/gpa3-setting-of-heritage-assets/gpa3.pdf/).</p>

PR-A-048 Historic England

As regards the Sustainability Appraisal, general advice on Sustainability Appraisal and the historic environment is set out in Historic England's publication "Strategic Environmental Assessment, Sustainability Appraisal and The Historic Environment": https://content.historicengland.org.uk/images-books/publications/strategic-environ-assessment-sustainability-appraisal-historic-environment/SA_SEA_final.pdf/. We also have the following detailed comments.

In paragraph 2.45, it could be noted that the NPPF requires local planning authorities to set out in their Local Plans a positive strategy for the conservation and enjoyment of the historic environment.

In paragraph 3.20, the historic environment does not just include designated heritage assets – the NPPF gives a broad definition of the "historic environment". We consider that the historic environment includes areas, buildings, features and landscapes with statutory protection, together with those parts of the historic environment which are locally valued and important and also the historic character of the landscape and townscape. (cont....)

PR-A-048 Historic England

(cont...) Does the District Council have an up-to-date and comprehensive "local list" ? If not, then this should be identified as a gap in the baseline knowledge. Reference should be made to the Oxfordshire Historic Environment Record and the Oxfordshire Historic Landscape Characterisation (currently being completed). There are currently four listed buildings on the Heritage at Risk Register.

In Table 4.1, not all the historic environment is "built", nor is it entirely composed of "areas". We suggest that the Key Sustainability Issue for the historic environment be "Conserving and enhancing designated and non-designated heritage assets and the contribution made by their settings and addressing heritage assets at risk from neglect, decay, or development pressures".

Page 784

PR-A-049 Aylesbury Vale District Council

We have no comments to make on the Oxford's Unmet Need and Development Management Policies and Sites Issues Papers.

PR-A-049 Aylesbury Vale District Council

17 We acknowledge that the Oxfordshire Strategic Housing Market Assessment document identifies that the Full Objective Assessed Need for Housing in Cherwell to be 22,800 dwellings over the 20-year period 2011-31, equivalent to an average of 1,140 dwellings per year. We acknowledge and support that Cherwell intends to accommodate the unmet need from Oxford of up to 3,500 dwellings that cannot be met by Oxford City Council but is not seeking to accommodate any unmet housing need in Aylesbury Vale.

We also acknowledge that Cherwell District Council is currently exploring the provision of a new junction on the M40, to the south of Junction 9, near to Arncott. This proposal is supported by AVDC.

We recognise the need to work co-operatively and confirm our continued support to ensure we can demonstrate this co-operation when we get to examination of the authority's plans. We hope our comments are helpful and look forward to continuing to work with you in your Local Plan production. We welcome the opportunity to be engaged in the next steps of the plan making as part of the Duty to Co-operate.

PR-A-050 Duns Tew Parish Council

6

Yes.

PR-A-050	Duns Tew Parish Council	7	As This is to support Oxford's needs the area should be close to Oxford.
PR-A-050	Duns Tew Parish Council	8	No.
PR-A-050	Duns Tew Parish Council	9	Yes.
PR-A-050	Duns Tew Parish Council	10	Yes.
PR-A-050	Duns Tew Parish Council	11	a) Development should be directed towards Kidlington as the area already has the Services and Infrastructure. b) build in the Green Belt and extend the line of the Green Belt To compensate c) Consider developing some of the Open Spaces around Oxford For Example Oxford Golf Course.
PR-A-051	Mike Gilbert Planning and VSL & Partners	1	3,500 homes is a minimum for Cherwell to accommodate to meet its share of Oxford's unmet housing needs. The number of additional homes that will need to be provided as a share of the total of requirement of 15,000 homes is likely to be between 3,500 and 4,500.
PR-A-051	Mike Gilbert Planning and VSL & Partners	2	No. The purpose of the Local Plan Partial Review is to address Oxford's major housing shortage. The adopted Local Plan already enables the growth of Langford Lane/Oxford Technology Park and Begbroke Science Park in Kidlington's hinterland to help provide for Oxford's overflow business needs. The two issues can be joined up by providing the necessary additional housing on appropriate sites in Kidlington's hinterland. There is no need, therefore, to plan for additional employment development.
PR-A-051	Mike Gilbert Planning and VSL & Partners	4	Key principles to achieve: - Given Kidlington's role as a main urban centre and its close physical and economic links with Oxford, the vitality of Kidlington and its ability to serve its hinterland need to be promoted; - Additional development needs to be concentrated in sustainable locations and the thriving rural community around the main urban centre of Kidlington needs to be supported; - Unused sites of a lesser environmental value and unconstrained by environmental designations need to be brought forward; - The identity of individual settlements needs to be protected by avoiding coalescence; and - Growth needs to be enabled in areas with excellent transport infrastructure to ensure the fullest possible use is made of public transport, walking and cycling.
PR-A-051	Mike Gilbert Planning and VSL & Partners	6	Yes. The purpose of the Local Plan Partial Review is to address Oxford's major housing shortage. It is self-evident, therefore, that the additional housing development needs to be located close to Oxford and transport routes into Oxford. This will also accord with the requirements of the NPPF and the overall strategy of the adopted Cherwell Local Plan Part 1 to deliver sustainable development.
PR-A-051	Mike Gilbert Planning and VSL & Partners	7	Proximity to both Oxford and transport routes into Oxford.
PR-A-051	Mike Gilbert Planning and VSL & Partners	8	No. As the purpose of the Local Plan Partial Review is to address Oxford's major housing shortage the required additional housing development needs to be located close to Oxford.
PR-A-051	Mike Gilbert Planning and VSL & Partners	9	Yes. The extent of the Oxford Green Belt is a clearly defined geographical area and lies close to Oxford. It is the obvious "area of search" for additional development sites needed to meet Oxford's unmet housing needs.

PR-A-051	Mike Gilbert Planning and VSL & Partners	10	Yes. That will enable developments aimed at meeting the distinct housing needs of Oxford and Cherwell District to be effectively monitored.
PR-A-051	Mike Gilbert Planning and VSL & Partners	11	The strategy for meeting Oxford's unmet housing needs must be consistent with the overall strategy of the adopted Cherwell Local Plan Part 1 and the requirements of the NPPF. Following on from Question 9, the separate monitoring of the five year housing land supply relating to Oxford's unmet housing needs could tie in with the geographical area of the Oxford Green Belt within Cherwell as current planning constraints in this area mean that it contributes little towards meeting the housing needs of Cherwell District.
PR-A-051	Mike Gilbert Planning and VSL & Partners	15	Sites should be adjacent to existing larger settlements, close to both Oxford and transport routes into Oxford, and located where people will have a real choice in how to travel - including sites that are currently protected by the Green Belt. Unused sites which are well located and which, according to the Green Belt Study, contribute least to the purposes of including land within Green Belts should be released from the Green Belt and so made available for development.
PR-A-051	Mike Gilbert Planning and VSL & Partners	28	Site submission - Land South of Solid State Logic Headquarters, Spring Hill Road, Begbroke. Yes. Please see the attached site submission form, site location plan and letter dated 10 March 2016 promoting the land on the southern edge of Begbroke. The land is unused rough grassland. It is deliverable, developable and in a sustainable location.
PR-A-051	Mike Gilbert Planning and VSL & Partners	22+23	There is the opportunity to join up the two issues of helping to provide for Oxford's overflow business needs within Kidlington's hinterland through the planned growth of Langford Lane/Oxford Technology Park and Begbroke Science Park (Policy Kidlington 1 of the adopted Local Plan) and providing for Oxford's unmet housing needs by developing appropriate sites also within Kidlington's hinterland.
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	1	The Issues Consultation Document Part 1 notes (para 2.16) that if the 15,000 homes were proportioned on a pro rata basis across the Oxfordshire Authorities (including Oxford CC) this would result in a need for Cherwell to address an unmet need of 3,000 homes. In the first instance we query how Oxford City Council can meet its own "unmet need" - if it were able to meet this need it would, by definition, not be "unmet". Cherwell go some way to acknowledge this (para 2.17) recognising that "this figure would potentially increase for the rural districts if Oxford's contribution was to be less than 3,000". They go on to acknowledge that the level of need may change if "the overall countywide level of unmet need changes or if the countywide work shows that there are significant differences between the relative sustainability of potential options . . . meaning one authority should take more or less than another."
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	1	(cont...) Our clients concur with this analysis. Furthermore, relative to the other Oxfordshire Authorities (excluding Oxford CC) Cherwell is relatively unconstrained as shown in Map 3 of the Issues Consultation document. Specifically it lacks the significant extent of Areas of Outstanding Natural Beauty (AONB) that West Oxfordshire, Vale of White Horse and South Oxfordshire respectively all have. These factors, coupled with the strong transport links and other relationships Cherwell has with Oxford, may well lead to CDC's share of the unmet need being proportionately higher than this as the extent of Oxford's unmet need may not be divided equally between the authorities. We do not therefore consider that 3,500 homes is a reasonable working assumption for Cherwell in seeking to meet Oxford's unmet need. Any one of the factors that we have identified would lead to a higher level of housing need than and, in aggregate, the need could be substantially higher.

PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	4	<p>The key principle will be establishing appropriate sustainable locations for Oxford's unmet need to be accommodated throughout the District. The NPPF is clear (para 14) that the "presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision-taking."</p> <p>Such an approach is consistent with that set out within the current Local Plan (summarised in the Issues Consultation Document – para 3.28) that whilst seeking to focus the majority of development in urban locations it also "identifies a sustainable hierarchy of villages which will inform the distribution of growth across the rural areas."</p>
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	6	<p>Our clients do not consider that it is appropriate to identify either an "Area of Search" or "Plan Area" for the partial review document. The evidence base, primarily the 2014 SHMA, identifies a single Housing Market Area within Oxfordshire and offers no support for an approach of defining an "area of search" for locations to meet the identified unmet need from Oxford.</p> <p>They are concerned that if such an "area of search" was identified and formed the basis of Cherwell's attempts to meet additional housing growth including unmet need it may well preclude sustainable locations falling outside the area of search therefore both conflicting with the NPPF and resulting in a sub optimum approach across the District. (cont...)</p>
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	6	<p>(cont...) We recognise (para 4.7) that parts of the district have more direct relationship with Oxford for different reasons but the SHMA indicates that cross district migration has produced, and will continue to produce, complex housing market sub areas. The provision of housing in a range of sustainable locations across the District will best meet the twin objectives of sustainability and addressing unmet need from Oxford.</p> <p>Whilst Bloxham benefits from reasonably good links with Oxford (enabling it to assist in meeting unmet need from the City) it can also address other housing need arising within Cherwell which in turn will free up new residential development in locations physically closer to Oxford.</p>
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	7	<p>As set out above, our clients do not consider it is appropriate to identify an 'area of search', instead consider that CDC should focus on promoting development in sustainable locations throughout the District, including Bloxham.</p>
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	8	<p>Yes, for the reasons we summarise above or clients consider this would be the most appropriate way to deal with meeting Oxford's unmet needs.</p>
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	10	<p>Our clients do not consider that CDC should pursue two separate 5 year land supplies. A single HMA has been identified within Oxfordshire, the reality is that housing need in Cherwell and the unmet needs arising from Oxford are not distinct but overlapping, and should therefore be considered as part of one housing requirement / supply.</p>
PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	15	<p>As set out above, we consider that the need should be met throughout the entire district focussing on sustainable locations for development in line with the NPPF.</p> <p>We consider that Bloxham as "one of the most sustainable villages in the District" is well placed to contribute to meeting this need. Both the 2014 SHLAA and consultation response to a recent planning application on part of our clients site confirming it's suitability for housing endorse this approach.</p>

PR-A-052	Nathaniel Lichfield & Partners / Taylor Wimpey Oxfordshire	28	<p>Site submission - Land North and South of Milton Road, Bloxham. We note that the Part 1 Partial Review seeks the submission of strategic sites of 100 dwellings or more.</p> <p>Our clients consider that land within a central area in Bloxham, part of which the 2014 SHLAA has already identified "could be suitable for residential development" is capable of meeting residential need (of between 200 and 250 dwellings).</p> <p>In addition to this level of residential development the site is also capable of accommodating a primary school in view of the constraints experienced within the current facility.</p> <p>We expand upon our analysis of this site in our response to the "Call for Sites" at Section 5.0 of this report.</p>
PR-A-053	Bilfinger GVA / London Oxford Aviation Services Ltd	2	<p>The NPPF encourages Planning Authorities to progress housing and employment growth as linked strategies, as ensuring a joined-up approach to assessing need/land supply and the planned spatial distribution of these uses is a key element in ensuring sustainable development (particularly at a strategic level).</p> <p>LPP1 sets out employment land policies to meet the local needs identified as part of the preparation of that plan, which includes the removal of part of the LOA site from the Green Belt. However, the partial review to LPP1 has stepped beyond local matters and is required to tackle county-wide strategic planning needs. While this is primarily focussed on housing, it is our view that other key uses (principally employment, alongside infrastructure) should be dealt with at the same time as part of a joined-up strategy in order to ensure the proper planning of the district and county as a whole. (cont...)</p>
PR-A-053	Bilfinger GVA / London Oxford Aviation Services Ltd	2	<p>(cont...) The dispersal of what otherwise would have been Oxford's resident population offers the opportunity to capture economic activity/output within Cherwell which might otherwise have been in Oxford. This offers an opportunity to realise potential economic benefits for the district that would have otherwise been unachievable. It is our view that optimising potential economic benefits is dependant on a joined-up approach to housing and employment matters.</p> <p>This translates into an opportunity to unlock more ambitious economic development at existing and planned employment clusters, either directly through introducing a greater scale of employment and/or complementary mixed use development (including housing), or indirectly by facilitating infrastructure delivery. This is particularly relevant when considering 'strategic' employment locations such as London Oxford Airport which have a functional economic relationship with Oxford, the other Oxfordshire Authorities, and beyond (in terms of employee in/out-commuting patterns and supply chains), and which have their own economic challenges and development needs.</p>
PR-A-053	Bilfinger GVA / London Oxford Aviation Services Ltd	4	<p>The requirement to accommodate additional housing growth in the district creates an opportunity for existing Cherwell residents and businesses in terms of harnessing the value generated by this strategic development to deliver economic benefits, new/improved infrastructure, and a more sustainable pattern of development to the district.</p>
PR-A-053	Bilfinger GVA / London Oxford Aviation Services Ltd	28	<p>Site submission - London Oxford Airport. The enclosed Position Paper sets out the case for the removal of the London Oxford Airport site from the Green Belt alongside a site specific policy which supports mixed use development, to include a retained/enhanced aviation function, employment uses, transport infrastructure, housing, and associated supporting uses.</p>
PR-A-053	Bilfinger GVA / London Oxford Aviation Services Ltd	6-9	<p>We consider the factors set out at para 4.8 to be an appropriate set of criteria against which alternative spatial options for the location of housing growth should be appraised. In addition, consideration should be given to how housing growth could complement/support existing strategic employment locations and support economic growth as a direct benefit.</p>

PR-A-054	Gladman Developments	1	<p>Gladman has already set out their concerns over the seemingly premature nature of this consultation at a time when the full evidence base is not complete and the proportion of the unmet need that Cherwell will have to deliver is unknown.</p> <p>The working assumption that Cherwell will need to deliver 3,500 additional units to meet Oxford's unmet housing need is crude (based on a simple mathematical calculation) and for example, assumes that 3,000 units can be delivered within Oxford City itself which is surprising given it is Oxford City's unmet need that is being addressed. Removing the apportionment from Oxford City and distributing it evenly across the other Oxfordshire Districts would mean that Cherwell would have to accommodate at least 3,750 units. (cont...)</p>
PR-A-054	Gladman Developments	1	<p>(cont...) The evidence base needs to be far more sophisticated in terms of assessing the most logical, appropriate and deliverable strategy that will best meet Oxford's needs in a sustainable way. A study which seeks to assess key issues such as major constraints, travel to work data, public transport corridors, road infrastructure, evidence of historic house moves out of Oxford etc. will allow the apportionment of Oxford's unmet need to be more systematic, robust and transparent. Options can then be tested through other evidence base documents such as the Sustainability Appraisal and viability testing to ensure the option chosen is the most appropriate tested against reasonable alternatives and is deliverable.</p>
PR-A-054	Gladman Developments	2	<p>The key to addressing the additional housing required is to treat it simply as an increase to the overall objectively It is considered to be unnecessary to provide additional employment within Cherwell as a result of accommodating Oxford's unmet housing needs. Any additional employment provided within Cherwell would require additional housing beyond Oxford's unmet need to support the additional workforce.</p>
PR-A-054	Gladman Developments	3	<p>There are a number of key issues that need to be considered through the process of meeting the City's unmet housing needs.</p> <p>The City is one of the most unaffordable places to live in England where first time buyers, families and new employees seeking to move to the City struggle to find suitable accommodation to rent let alone buy. This causes major issues for recruitment, attracting 'key workers', and staff retention and has other associated consequences such as congestion as people seek to get into the city from other more affordable areas to access employment.</p> <p>The City also faces significant issues with various constraints including Green Belt, maintaining the historic environment flood risk and other environmental constraints which all need to be considered when seeking to meet the unmet housing needs of the City within the neighbouring local authority areas.</p>
PR-A-054	Gladman Developments	12-15	<p>The existing Cherwell Local Plan concentrates new development upon the major towns of Bicester and Banbury with Sustainable Urban Extensions of a significant scale. It is considered that these towns do not offer a suitable location for additional sites to meet Oxford's unmet housing needs as they will not be delivered in the short term because of the existing focus of development on these areas.</p> <p>Kidlington, which is a large rural settlement is surrounded by Green Belt and was looked at for further allocations through Part 1 of the Cherwell Local Plan adopted in 2015 including a small scale Green Belt review. It is therefore also considered that Kidlington offers extremely limited scope for new sites to meet Oxford's unmet housing need. (cont...)</p>

PR-A-054 Gladman
Developments 12-15

(cont...) Gladman therefore agree with the statement made in para 5.36 of the Issues Consultation that the Council will have to consider all reasonable locations for contributing to meeting Oxford's unmet need, although we disagree that this should be limited to areas closest to Oxford. Sustainable sites located on the edge of the sustainable larger villages must be considered as suitable, sustainable and deliverable locations for meeting the unmet needs of Oxford in the short term, increasing choice to both house builders and house buyers thereby increasing the supply and delivery of housing. These sites are often free from constraints, can be delivered quickly and without major investment in new infrastructure. These sites will complement the large scale sites allocated in the adopted Local Plan and will ensure that the Council maintain a healthy and rolling five year supply of housing. They can also be delivered in a way which complements the approach of the adopted Part 1 Local Plan by creating and supporting inclusive communities in quality urban and rural environments; avoiding sprawl and harm to the identity of settlements; minimising environmental impacts; providing access to employment, services and facilities and ensuring sufficient infrastructure is provided.

It is therefore considered that the key specific housing objective that needs to be considered for meeting Oxford's unmet housing need is that it is met in full and without delay, across the plan period and within the district of Cherwell as part of the Oxfordshire HMA.

PR-A-054 Gladman
Developments 6-9

As stated above, Cherwell District forms part of the Oxfordshire HMA and paragraph 47 of the Framework states that local planning authorities should use their evidence base to ensure that their Local Plan meets the full objectively assessed needs for market and affordable housing across the housing market area.

There is therefore, no specific requirement to identify sites that relate well to Oxford City in order to deliver the additional housing required within the HMA. Proximity and/or connectivity to Oxford may be one criteria that is assessed in the overall consideration of which sites to allocate for residential purposes, but this must be weighed in the balance amongst many other economic, social and environmental factors including importantly, deliverability.

The existing Local Plan allocates a considerable level of new development to the major towns of Bicester and Banbury. These sites are large in scale and will take a considerable amount of time to deliver in full. Scope for further allocations around these two towns through this process is therefore extremely limited and questionable in terms of actual deliverability. (cont...)

PR-A-054 Gladman
Developments 6-9

(cont...) Therefore, in allocating sites to maximise housing supply the widest possible range of sites by size and market location are required, so that house builders of all types and sizes have access to suitable housing land in order to offer the widest possible range of products. The key to increasing housing supply is the number of sales outlets. Whilst some SUEs may have multiple outlets, in general increasing the number of sales outlets available means increasing the number of housing sites. So for any given time period, all else being equal, overall sales and build out rates are faster from 20 sites of 50 units than 10 sites of 100 units or 1 site of 1,000 units. The maximum delivery is achieved not just because there are more sales outlets but because the widest possible range of products and locations are available to meet the widest possible range of demand. In summary, a variety of sites in the widest possible range of locations ensure all types of house builder have access to suitable land, which in turn will assist the Council in maintaining a flexible and responsive housing land supply, ensuring increased housing delivery.

The Partial Review of the Local Plan should therefore look to allocate a range of sites of a variety of sizes in a wide range of locations principally centred around the larger sustainable villages within the district that are not constrained by Green Belt in order to provide deliverable sites and choice in the market for both house builders and house buyers. (cont...)

PR-A-054 Gladman Developments 6-9

(cont...) The extent of the unmet housing need in Oxford and the immediate urgency of addressing this need to tackle the key issues of affordability and meeting the economic aims of Oxfordshire is such that sites that are allocated must be deliverable in the short term and should be located in a variety of settlements to provide extensive choice and speed up housing delivery.

Whilst Green Belt locations should not be automatically excluded from consideration in the assessment of sites suitable for allocation, this must be weighed in the balance of all relevant factors with the knowledge that it is a constraint that is considered by the Framework to be restrictive. The policy test that applies to the removal of sites from the Green Belt is formidable and the need to justify exceptional circumstances for such a change must be considered to be an extremely high hurdle to overcome. Therefore, Green Belt releases should only be considered where alternative strategies for the delivery of the additional housing, such as sites surrounding the sustainable larger villages which are not constrained by Green Belt, have been exhausted.

PR-A-054 Gladman Developments 10+11

Gladman would object strongly to the identification of a specific housing land supply for Oxford's unmet needs with a separate five year supply calculation.

As stated previously, housing needs must be met, in full, across the housing market area and for the purposes of Cherwell the housing market area is Oxfordshire. Therefore, any separation of the five year housing land supply calculation would be contrary to the Framework and therefore unsound.

The unmet housing needs of Oxford are present now and need to be addressed in the short term to rectify the lack of housing supply, deal with affordability and increase economic prosperity. A separate five year housing land supply that relates specifically to Oxford would only serve to delay much needed housing delivery and would run counter to the need to boost significantly the supply of housing. (cont...)

PR-A-054 Gladman Developments 10+11

(cont...) It is considered that the requirement to meet Oxford's unmet housing need in Cherwell would not undermine the existing Cherwell strategy for delivering growth as the exercise should simply be seen as the need to deliver a higher OAN for the Oxfordshire HMA partly within Cherwell District.

In addition, as the Local Plan runs from 2011, as does the Oxfordshire SHMA which sets out the OAN for Oxfordshire, there is already a substantial backlog of unmet housing need from Oxford (2011-2016) which needs to be met immediately. In addition, Cherwell have never met their own housing requirement (1,142 dpa) since 2011 and is therefore an authority where the 20% buffer applies, further exacerbating the unmet need issue.

Therefore, sites should be identified through the Part 2 Development Management Policies and Sites document, which is also currently out for consultation, to meet the higher OAN number including Oxford's unmet need and Cherwell's housing requirement with a 20% buffer, within the sustainable larger villages which are not constrained by Green Belt to ensure delivery in the short term with no additional delay.

PR-A-054 Gladman Developments 22+23

Sustainability is not just about the environmental aspects. It is a balance of economic, social and environmental factors that all carry equal weight and should be considered alongside each other, through the Sustainability Appraisal when considering the most appropriate strategy for meeting Oxford's unmet housing need through the Partial Review.

PR-A-054 Gladman
Developments 24+25

Consideration of the natural environment in the formulation of the strategy for the delivery of Oxford's unmet housing needs should be in line with the guidance set out in the Framework paragraphs 109 to 125.

It is particularly pertinent to highlight that paragraph 109 states that the planning system should contribute to and enhance the natural environment by protecting and enhancing valued landscapes and paragraph 113 states that distinctions should be made between the hierarchy of international, national and locally designated sites so that protection is commensurate with their status.

Landscape designations, outside of those specifically mentioned in footnote 9 of the Framework, are therefore not to be considered as absolute constraints. They are simply environmental considerations that should be factored into the balance of sustainability when identifying the most appropriate strategy and sites for meeting Oxford's unmet housing needs.

PR-A-054 Gladman
Developments 26+27

Consideration of the built and historic environment in the formulation of the strategy for the delivery of Oxford's unmet housing needs should be in line with the guidance set out in the Framework paragraphs 126 to 141.

Historic assets are not to be considered as absolute constraints, they are simply environmental considerations that should be factored into the balance of sustainability when identifying the most appropriate strategy and sites for meeting Oxford's unmet housing needs.

PR-A-054 Gladman
Developments 4+5

It is difficult at this stage to comment upon suitable principles, goals and vision for meeting Oxford's unmet needs until the evidence base is complete and Cherwell are aware of the issues that they have to address. The principles, goals and vision will flow to some extent from the evidence base but also from the more strategic work that is being undertaken by the Growth Board. It is this strategic vision for the whole of Oxfordshire that should be reflected in the update to the vision and which will form the basis of the principles and goals as this exercise is about meeting the needs of the entire county rather than just the local authority area.

Obviously these strategic aims may have to be amended to reflect a local context relevant to Cherwell but they must be based on achieving the aims of the strategic plan as set out by the Growth Board.

The key overriding principle that needs to be reflected through the Partial Review is that the unmet needs of Oxford City are delivered in full, across the Oxfordshire HMA in a sustainable, deliverable and transparent manner to ensure that the economic prospects of the region are realised and people have access to suitable and affordable accommodation which they cannot attain within Oxford City.

We welcome that the Issues document includes sections on Transport, as well as Infrastructure and the Economy, and strongly support Cherwell District Council's apparent intention to consider the issues of Oxford's unmet housing need in a comprehensive and holistic way.

However, a number of key transport issues, and associated land-use planning issues, are missing from the consultation document and should feature in the subsequent stages of the partial review. In particular, there is no reference or cross-reference to freight and distribution related transport. While the focus on the movement of people is understood given the general focus on housing and population, this should not be at the expense of also considering the needs for transport connectivity to enable the movement and storage of goods and materials.

Related to this, the need for additional logistics or distribution development sites in Cherwell should be explicitly considered as part of the partial review. Along with planning to meet housing needs, this too forms an essential part of the local, sub-regional and national economy, and brings with it a need for development land in suitable and sustainable locations. We have also made representations to the Part 2 Local Plan Issues consultation regarding the issue of strategic logistics sites. However, our view is that this is a strategic issue and as such is appropriate within the partial review which should consider the need to allocate additional employment strategic sites suitable for logistics or distribution development. (cont...)

(cont...) Supporting and enabling the continued growth of Oxford through cross-boundary cooperation is clearly a requirement upon Cherwell District. The District already faces a number of challenges, including reducing out-commuting, and the charts on page 47 of the consultation document help to illustrate the significant scale of the commuting flows from Cherwell to Oxford. The transport section of the consultation document identifies a number of key issues, including the County Council's estimate that despite the high levels of congestion already seen in many parts of the City, there could be a 25% increase in journeys within the City of Oxford by 2031, with approximately 13,000 more commuter trips each day.

If Cherwell is to accommodate significant additional housing growth to help meet Oxford's needs, and in the context of the objective to reduce out-commuting, it is appropriate to reconsider strategic employment land requirements as part of the debate about the distribution of additional housing demand from Oxford. We consider this essential if Cherwell is to positively address the challenges posed by the high levels of out-commuting, and if the collective efforts of the two local authorities and the County Highways Authority to address congestion are to have any impact.

PR-A-055 Oxalis Planning /
Cuvette Property
Consulting Ltd 20

We welcome that the Issues consultation document includes a section on the Economy, as well as sections on Infrastructure and Transport. We feel it is essential that the review to consider the most appropriate distribution and scale of housing development to help meet Oxford's unmet needs also consider the associated economic issues.

It is clear that Cherwell District and Oxford City share a range of functional and economic cross-boundary relationships. It is also clear that Oxford is highly constrained in terms of the City's administrative boundaries, and the limited availability of potential development land is of direct relevance to employment development as well as for housing. We believe the issues identified for the partial review should include further work relating to the scope for cooperation between Cherwell and Oxford City regarding strategic employment sites alongside consideration of how and where Cherwell accommodates a proportion of Oxford's unmet housing needs.

The issue of identifying sites to accommodate large scale logistics buildings was discussed during the Local Plan Part 1 examination process, and the District Council has previously recognised that provision should be made for strategic logistics/distribution development, and that further policy guidance is required. The separate Part 2 Local Plan Issues Consultation document includes a reference to 'further economic assessment work' being planned with regard to large-scale logistics sites, but does not offer any detail as to how or when the issue will be addressed. In our view, having identified this issue previously as a pertinent and relevant strategic local planning issue, the Council should incorporate it into the scope of the partial review of the Local Plan. (cont...)

PR-A-055 Oxalis Planning /
Cuvette Property
Consulting Ltd 20

(cont...) The 2015 Local Plan Inspector's Report made several comments about the development pressures for large logistics sites, dismissing them as being 'speculative' with reference to the need for such sites as being 'as yet unproven'. We would strongly challenge a number of the Inspector's conclusions and assumptions, and remain of the view that this strategic land-use needs to be actively and explicitly planned for. It would be logical and appropriate to incorporate this issue into the partial review alongside the work needed to revisit the distribution of strategic housing development.

It is clear that there are numerous potential development sites in the District, several of which are likely to be well suited to strategic distribution and logistics development. Cuvette is involved in promoting a potential site at Junction 9 of the M40, and are actively seeking to bring this site forward. The site is particularly well placed both in the context of Cherwell District and Oxford City to meet economic development needs, and could play a key role in helping meet demands associated with the cross-boundary growth agenda. The site is located on the motorway network adjacent to the A34, approximately 10 miles from central Oxford, and around 3 miles from central Bicester, with Banbury approximately 17 miles to the north along the M40. A high-quality employment site could meet a range of strategic employment requirements, focused on B8 distribution, but potentially also incorporating B2 industrial space to meet a diverse range of economic sectors and markets. (cont...)

PR-A-055	Oxalis Planning / Cuvette Property Consulting Ltd	20	<p>(cont...) Our technical work to assess and the site is ongoing, but such a proposal would make a significant contribution to the wider economic objectives across the LEP area and Oxford housing market area, including supporting the growth of Cherwell's economy as part of the overall housing and population growth agenda. We are also exploring the opportunities to include new local highways infrastructure to address existing local challenges, and to the benefit of existing local communities nearby. We are keen to discuss these emerging proposals with the Council and to provide plans and other details in due course.</p> <p>Our ongoing work in relation to the potential of this site is a direct response to the strong locational advantages of Cherwell, something which has already seen a number of potential strategic sites emerge earlier in the plan-making process in response to market demand and requirements. The local strength and opportunities of the logistics sector are recognised in the Council's Cherwell Economic Analysis Study of 2012. The SEMLEP Strategic Economic Plan for 2015-2020 identifies Logistics as 'key sector'.</p> <p>As a long-term plan looking ahead to 2031 our view is that the approach of the adopted Local Plan has no flexibility with regard to responding to market signals and economic opportunities. We note that one of the economic challenges facing the District included in the Adopted Local is:</p> <p><i>"new employment sites are needed to meet modern business needs"</i> (cont...)</p>
PR-A-055	Oxalis Planning / Cuvette Property Consulting Ltd	20	<p>The lack of a clear strategy and policies for actively addressing the issue of strategic logistics and other large-scale employment development represents a critical weakness in the Council's response to this challenge. Although advocated by the Inspector, we do not feel it is sound to progress with a planning strategy which provides such limited guidance on this key issue. Given the potential for development early in the plan-period, we don't believe delaying until a subsequent review of the Local Plan is appropriate or sound. The partial review to accommodate additional development provides a natural and logical opportunity to broaden the debate to include associated strategic economic development and employment land issues.</p>
PR-A-056	Kidlington Development Watch	1	<p>No. It is derived from the Oxfordshire SHMA which has never been subject to independent review. Its figures for housing need are wholly unrealistic and, as you know, far in excess of previous trends and likely future outcomes. The SHMA was concocted by private consultants who spend most of their time working for the development industry and have a vested interest in producing the highest figures possible. At both the Cherwell and West Oxfordshire EiPs the principal authors of the SHMA appeared for property developers, and in the case of Cherwell, appeared on the same day for the Council. This is an outrageous conflict of interest which destroys any claim that the SHMA is an objective assessment. The Cherwell Inspector largely ignored evidence of the shortcomings of the SHMA presented to him and was disdainful and dismissive of it at the EiP.</p> <p>The SHMA figures for Oxford's needs are the most contentious in the document and are based on many dubious assumptions as was pointed out, and ignored by the District Council and the Inspector, in the Examination of the Cherwell Plan. They have not been included in any Oxford plan let alone tested at an EiP. They should not be used as the basis for reviewing Cherwell's Local Plan. (cont...)</p>
PR-A-056	Kidlington Development Watch	1	<p>(cont...) In fact the review provides an opportunity to correct the biases in the 2014 SHMA. There should therefore be a critical review of the SHMA and its underlying employment forecasts by a genuinely independent organisation which is not compromised by its links to the development industry and the LEP. This would almost certainly result in lower figures for both Cherwell's and Oxford's needs.</p> <p>In the meantime, the already excessive figure of 22,700 houses within Cherwell's adopted Local Plan, should be more than enough to meet any purported need from Oxford City without any further provision.</p>

PR-A-056	Kidlington Development Watch	2	<p>No. The employment generating development already proposed (or permitted) at Langford Lane, Kidlington, at Begbroke Science Park and just over the District boundary at the so-called Northern Gateway is already excessive. It remains to be seen whether there will be sufficient demand for the “high-tech” science-based industries sought given that there is vacant development land and premises at the Oxford Science Park to the south of the city and in the adjacent Kidlington business park.</p> <p>Your question is also totally illogical as the alleged housing needs are themselves based on exaggerated forecasts of employment growth, which again, as was argued at your EiP, are unrealistic and based on the aspirations of the LEP. To provide for yet more employment generating development will simply fuel an unsustainable vicious circle.</p> <p>Furthermore, the inclusion of any additional development is outside the scope of this consultation which is to address Oxford’s hypothetical overspill requirements.</p>
PR-A-056	Kidlington Development Watch	3	<p>The most important issue for Oxford is to achieve a balance between taking advantage of the benefits deriving from its internationally renowned university and limiting growth to levels which do not destroy the very things (such as the historic city centre) which make it an attractive location.</p> <p>The City Council has not got this balance right. It is encouraging employment generating developments, such as the Northern Gateway for which the demand is not proven and then using such developments to fuel demand for housing, making its self-confessed housing affordability problem worse.</p> <p>The City Council has not demonstrated any understanding of the implications of its aspirations as was abundantly clear at the Northern Gateway. It was unable to make any forecast of employment generation for that development. It was also unable to respond to requests to reconcile the consultant-produced high levels of employment generation assumed by the SHMA with the much lower levels used in traffic forecasting. This demonstrates the need for independent strategic planning across Oxfordshire. (cont...)</p>
PR-A-056	Kidlington Development Watch	3	<p>(cont...) The City Council and the Oxfordshire Councils generally should be seeking to find ways of diverting growth away from the city of Oxford both (1) across the County and (2) beyond to areas of the country with both need and can accommodate growth. Within the county, Oxford Brookes University could be gradually located to Bicester. This would both benefit Bicester, the University and Oxford. Beyond the county, Oxfordshire should consider economic twinning with specific locations in regions which would particularly benefit from growth. This is now more feasible than ever with the availability of high speed internet links.</p>
PR-A-056	Kidlington Development Watch	6	<p>No. Firstly we do not accept the underlying premise that there is an additional need. Secondly, we believe that growth in general should be directed away from Oxford within and beyond the County as outlined in our response to Question 3.</p>
PR-A-056	Kidlington Development Watch	9	<p>No. Planning guidance states that permanence is a key characteristic of the Green Belt. It also makes clear that housing and economic needs do not override constraints on the use of land, such as Green Belt. It states that this may mean that an authority is in fact unable to meet its ‘objectively assessed needs’. Cherwell appears to have made no attempt to take into account the effect of the Green Belt (and other constraints) on its ability to provide for ‘objectively assessed need’. (And, as we have pointed out above the figure it is using for “objectively assessed need” is no such thing and is highly exaggerated). The Review of the Local Plan provides an opportunity to put right these deficiencies.</p> <p>Green Belt is much valued by local residents, makes an important contribution to the areas natural capital, and should be improved as an asset in its own right and not built upon.</p> <p>The Government, through its manifesto, is committed to protect the Green Belt. (cont...)</p>

PR-A-056	Kidlington Development Watch	9	<p>(cont...) Paragraph B253 of the Cherwell Local Plan says "The Oxford Green Belt was designated to restrain development pressures which could damage the character of Oxford City and its heritage through increased activity, traffic and the outward sprawl of the urban area." We support this statement strongly. Planning policy should therefore seek to direct development away from the city, both within and beyond the county boundaries.</p> <p>The recent Green Belt study is therefore wrong to ignore the fact that all land parcels within the GB contribute to the over-riding purpose (in the case of Oxford and similar historic cities) of preserving the setting and character of Oxford. (The study only considers the setting, not the damage to the character of the city resulting from increased activity). Despite this, even under its (highly subjective) assessments, all Green Belt land parcels in Cherwell contribute to the purposes of the Green Belt, therefore justifying its original designation.</p>
PR-A-056	Kidlington Development Watch	16	<p>Transport networks around Oxford are already over-capacity. Oxfordshire County Council's statements quoted in your document are bland and vague aspirations. The actual schemes currently proposed will not even solve existing problems. The additional developments proposed (including the 3500 homes) will make matters much worse while the forecasts apparently being used do not inspire any confidence. For example it became clear at the Northern Gateway EIP that the high figures were being used for employment generation, and then translated into high forecasts of housing need, while very much lower figures were being used for forecasting travel demand. Again this review presents an opportunity to re-visit these inconsistent and excessive forecasts and scale back the level of proposed development.</p>
PR-A-056	Kidlington Development Watch	24	<p>Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will further damage the natural environment of Cherwell and its natural capital, of which the Green Belt is a major component. It is likely that by providing for numbers in excess of what is likely to be built, the District will soon lose its ability to demonstrate a 5 year housing land supply, thereby allowing to developers to build on the most unsuitable sites both from natural environment and general sustainability perspectives.</p>
PR-A-056	Kidlington Development Watch	1	<p>Firstly, we would like to express our serious concern about the nature of the consultation. You are running several consultations concurrently with about 30 separate documents on your website. Many of the documents are lengthy and difficult to follow and it is very difficult to distinguish between them and understand their purposes. It seems to us that this will deter members of the public from responding, although no doubt developers, landowners and their consultants wishing to promote individual sites will be only too keen to respond. This renders the idea that this is an open public consultation a largely meaningless sham.</p> <p>Since Oxford City has yet to produce a Local Plan the consultation is premature. The putative division of housing across the neighbouring counties is crude. It would be better to assess capacity based on sound planning and infrastructure considerations backed by evidence of actual need. It would be preferable to defer any assessment of additional housing requirements based on actual need.</p> <p>Ironically, the quantity of material you have provided for consultation is in sharp contrast to the total lack of consultation on the Oxfordshire SHMA and its subjective, biased and highly exaggerated estimate of Oxford's housing need. Yet it is this document and its single figure of 100,000 houses which is the reason for your consultation on the Partial Review and to which all your consultation questions are subordinate</p>

PR-A-057 Oxford City Council

1

The City Council agrees with para. 2.8, that it should seek to meet its OAN as fully as it can. This is reflected in the approach agreed by Growth Board (20 Nov 2014) which agreed the need for a robust assessment of Oxford's capacity to deliver housing for the period to 2031, with a critical friend and check and challenge process built in.

The City Council therefore commissioned independent consultancy URS (now Aecom) to work with in producing a new Oxford SHLAA, published Dec 2014, indicating a capacity to deliver 10,212 homes in period 2011-31. Following a thorough check & challenge process, including consideration of a 'challenge' report commissioned by Cherwell, South & Vale, this figure was updated to 10,368 in May 2015.

An independent Critical Friend, Fortismere Associates, concluded that the City Council's approach to assessing housing supply is compliant with government policy and guidance in the NPPF and PPG. The report did not find that there were any further sites that should have been assessed as suitable and deliverable, albeit there was scope to further test housing densities whilst still meeting other important plan objectives. In November 2015 the Oxfordshire Growth Board agreed a working assumption of 15,000 homes as the basis for planning for providing housing for Oxford outside its administrative boundary. The City Council agrees that this should be taken forward in the partial review process as a working assumption. (cont...)

PR-A-057 Oxford City Council

1

(cont....) However it is unlikely that a precise figure for Oxford's unmet need will ever be fully agreed, as there will always be different views as to the quantum of housing considered to be deliverable and achievable in Oxford. This reflects that in a constrained area such as Oxford where most housing comes from small sites and recycled land, the housing supply trajectory will fluctuate constantly. The Oxford housing target will always therefore be a floor not a ceiling. Whilst the City Council will continue to maximise its housing beyond the adopted housing target, the target must be based on a realistic assessment of housing potential within a constrained urban area with very limited land supply. Any unmet need beyond the Oxford housing target will need to be planned for in the neighbouring authority areas, reflecting the Government's and local priority to boost housing supply.

The joint County-wide process for apportionment is due to conclude by September 2016. At this point, Cherwell (and the other districts) will have an apportioned number to incorporate into its plan review. Even if, due to timetable slippage, there were no apportionment agreed by September, in Summer 2016 the jointly prepared evidence should allow a reasonable degree of precision and steer to identify strategic sites for meeting Oxford's unmet need. (cont...)

PR-A-057 Oxford City Council

1

(cont....) Therefore the City Council considers that 3,500 (para 2.17) is a minimum and should be considered only as an intermediate working assumption pending the outcome of on-going the joint work. To commit to this figure now would pre-empt the outcome of the joint work, given that the joint work is within months of concluding. In the City Council's view, the final apportionment figure is likely to be higher than 3,500.

Work undertaken by Oxford City Council with an expert consultant has identified that land to the immediate north of Oxford has capacity to sustainably deliver some 2,800 - 3,600 homes, and furthermore that this would be one of the two most sustainable locations for housing development compared with other alternatives. Together with further possibilities, for example stated landowner intentions to deliver homes at Begbroke (likely to be in the region of 1,500 - 2,000 homes), this would indicate that within a range of 4,300 - 5,600 additional homes, sustainably located to meet Oxford's needs, could be an achievable scenario. This is in the context of expectation that the joint work being separately undertaken will lead to an evidence-led apportionment to be agreed across the Oxfordshire authorities.

PR-A-057 Oxford City Council	2	<p>The City Council welcomes that there is a clear shared ambition across the Oxfordshire authorities to accelerate economic growth in the County, particularly focused on the knowledge spine Bicester-Oxford-Science Vale. The NPPF (paras. 20 & 21) explains that local authorities should plan proactively to meet the development needs of business and support an economy fit for the 21st century; and should plan positively for the location, promotion and expansion of clusters or networks of knowledge driven, creative or high technology clusters. Oxford's status as a world-class University city, and the lack of land supply within the City boundaries, mean that there continues to be demand for research and development space within or close to the City necessary to maintain Oxford's special status long term.</p> <p>However, over-provision of employment uses would create significant further pressure on the housing stock and therefore require a greater level of housing growth than currently planned for. The City Council is only therefore likely to support provision of further employment that is either ancillary to the housing already being planned for (i.e. supports the principles of sustainable mixed-use development), or responds to a specific need arising from one of Oxford's key sectors.</p>
PR-A-057 Oxford City Council	3	<p>The City Council welcomes that some of Oxford's key issues have been identified (paras 2.23 – 2.26). We would add the following key points:</p> <ul style="list-style-type: none"> - The single greatest physical issue is movement into and around the City. Around 50% of jobs in Oxford are taken by people living outside of Oxford. Despite recent and ongoing improvements to the road network, the magnitude of existing pressure on the network, combined with the future pressure arising from housing and employment growth, makes it imperative to locate growth sustainably, in a way that maximises sustainable travel modes such as walking, cycling and public transport, and reduces the need for Oxford workers to commute long distances. This principle also reflects the overall thrust of the Oxford Transport Strategy and the Local Transport Plan. - By building on high levels of cycling, walking and bus use in Oxford, delivery of strategic housing sites to meet Oxford's need presents a great opportunity to improve sustainable transport infrastructure such as investment in high-quality public transport corridors and, assuming proximity to Oxford, cycle super-highways. (cont...)
PR-A-057 Oxford City Council	3	<p>(cont...) - The City is witnessing severe difficulty in the recruitment and the retention of staff at all levels, because of a lack of housing choice and affordability. The Oxford universities and key public services, such as health and education, are severely compromised through the lack of available affordable housing for key staff. There is also a severe impact on individuals and families resulting from the lack of affordability, such as overcrowding, homelessness and poor living conditions. It is important for the new housing to provide a very wide mix of tenures and house types.</p> <ul style="list-style-type: none"> - The quality and design of new growth in and around Oxford is key. With a high benchmark having been set by Barton Park and other Oxford developments, there is an expectation that the new housing will create distinctive, exemplar high quality new neighbourhoods for Oxford that include all necessary community and social infrastructure to deliver high quality place-making. - Oxford aims to be a Low-carbon City. New development should aspire to be zero-carbon. Low carbon technologies such as district heating, ground-source heat pumps, photovoltaics, and electric charging points for vehicles should be incorporated in the new Oxford communities.
PR-A-057 Oxford City Council	4	<p>The overriding principle should be to make a significant contribution to Oxford's unmet housing need, in a manner that maximises sustainable and affordable travel. Key principles and goals should look beyond the plan period (2031) as the need from Oxford (as well as Cherwell) is likely to continue well beyond then. Suggestions for Plan objectives, which will also be tested against Sustainability Appraisal objectives, are:</p> <ul style="list-style-type: none"> - Maximise the sustainable provision of housing towards meeting the existing and future objectively assessed housing needs of Oxford (reflecting the significant and ongoing constraints to development within Oxford itself); - Provide significant affordable housing and key worker housing which respond to local circumstances; - Reduce the need to travel; - Maximise convenient access to the whole of Oxford by walking, cycling and low-cost public transport; - Create distinctive, high quality new neighbourhoods for Oxford of national exemplar quality; (cont...)

PR-A-057	Oxford City Council	4	<p>(cont...) Create mixed and balanced communities, providing for a range of household types and income levels;</p> <ul style="list-style-type: none"> - Ensure that future development relating to Oxford is physically and socially integrated with Oxford's existing communities; - Provide social and physical infrastructure to meet local community needs; - Minimise the use of non-renewable resources; - Make efficient use of land; - Ensure excellent design and masterplanning; - Minimise impact on landscape, and seek to enhance the surrounding environment; - Maintain, enhance and protect biodiversity.
PR-A-057	Oxford City Council	5	<p>A further key requirement of the Plan (albeit more process rather than a Plan objective) is for the housing to be The City Council suggests a focussed vision along the lines of the following:</p> <ul style="list-style-type: none"> - To provide new balanced communities that form part of Oxford, of exemplar design; provide for a range of household types and incomes reflecting Oxford's diverse needs; and support the City's world-class economy and universities by ensuring people have convenient, affordable and sustainable travel opportunities to their Oxford places of work and study.
PR-A-057	Oxford City Council	6	<p>It is essential to relate the area of search to Oxford, for the reasons already stated. This should reflect both physical proximity, and accessibility by sustainable transport modes.</p>
PR-A-057	Oxford City Council	7	<p>The City Council broadly supports the factors listed in para 4.8 except for the last two ('geographical area covered by the Oxford Green Belt', and 'the Cherwell settlement hierarchy').</p> <p>The area of search should not be overly prescriptive as ultimately, the closer to Oxford the housing can be provided, whilst taking into account any major physical barriers, the more likely it is to meet the unmet need of the City in a sustainable manner. It must very clearly take into account accessibility to Oxford as a whole: public transport is important, but equally access by cycling, walking, or a combination of these sustainable modes should be considered. This should be in the context of overall travel time from origin to a number of Oxford destinations (but particularly to key areas of economic activity).</p> <p>It would not be appropriate to define the area of search simply using one destination point such as the City centre. Future occupants will need good, convenient access to as much of the City as possible, particularly areas such as Headington and the Eastern Arc where much of the economic activity lies.</p>
PR-A-057	Oxford City Council	8	<p>No. Much of the wider district has little functional relationship with Oxford and would allow consideration of unsustainable options for growth, which would not meet un-met needs from Oxford. Rather they would likely exacerbate existing unsustainable commuting patterns, such as congestion on the A34 and primary routes into North Oxford.</p>
PR-A-057	Oxford City Council	9	<p>The Oxford Green Belt was created primarily for a specific purpose: to preserve the historic setting of the City. It would be somewhat arbitrary to use the Green Belt boundary as a proxy for an area of search for new housing for Oxford, as the factors relevant to sustainably locating Oxford housing growth are not equivalent to why the Green Belt boundaries were drawn where they were.</p> <p>However the application of proximity and transport link tests makes it highly likely that the most appropriate sites are primarily within the area delimited by the outer edge of the Green Belt. Therefore the City Council strongly supports that the partial review is to consider a Green Belt boundary review. There are clear exceptional circumstances to justify a strategic review of Green Belt boundaries. In the City Council's view this should be done to enable a well-planned urban extension to the north of Oxford. The loss of Green Belt in this location would be minimal – well under 1% of the total area of the Green Belt in Oxfordshire.</p>

PR-A-057 Oxford City Council	14	<p>The City Council has outlined its key objectives in the answers to earlier questions. Please refer to our response to questions 4 and 5 in particular. The key aim is to provide housing development of exemplar design which integrates well with Oxford, by ensuring convenient sustainable access to the whole of Oxford; create a mixed and balanced housing offer including significant provision of affordable housing, and ensure low-carbon technologies are incorporated.</p> <p>Other more detailed objectives should include:</p> <ul style="list-style-type: none"> - Aiming for all housing to meet Category 2 of the Building Regulations Part M (Access to and Use of Buildings), with a proportion to meet Category 3 (wheelchair accessible or adaptable dwellings); - Comply with the National Space Standards for internal space within dwellings; - Include provision for super-fast broadband; - Include provision for vehicle electric charging points for all new dwellings where parking is provided.
PR-A-057 Oxford City Council	15	<p>As outlined earlier in this response, the City Council has provided compelling evidence to suggest that an urban extension to the immediate north of Oxford would offer a highly sustainable location for housing-led development to help meet Oxford's unmet housing needs. The location is highly accessible to various locations in Oxford by public transport, walking and cycling, and is adjacent to Oxford Parkway station on the main Chiltern Railways line linking to central Oxford (from December 2017), Bicester, High Wycombe and London Marylebone. There are excellent opportunities to integrate communities in this location with existing Oxford communities, whilst also providing for all necessary local community and social infrastructure, and to create new neighbourhoods of exemplar and distinctive design. The City Council's work has shown that there is capacity for some 2,800-3,600 houses in this location. Please see the enclosed Turley Route Map suite of documents for a comprehensive evidence base supporting this option. (cont...)</p>
PR-A-057 Oxford City Council	15	<p>(cont...) The City Council would not support spatial options that locate the new housing where access to Oxford is inconvenient by sustainable means, or would encourage further car travel to destinations in Oxford for a significant part of the journey. Therefore additional sites in more remote locations such as Bicester, Banbury or Upper Heyford would not be supported.</p> <p>In common with objectives suggested earlier in this response, the following factors should be taken into account:</p> <ul style="list-style-type: none"> - Be located as close as possible to Oxford; - Capitalise on existing and future readily achievable sustainable transport links, in particular which provide for active modes i.e. walking and cycling to Oxford destinations, but also high frequency public transport links; - Ensure as far as possible that convenient access can be achieved to a range of transport destinations in Oxford, not just one area such as the City centre; - In particular, seek to ensure good transport links to economic activity hotspots (the City centre/Oxford West End, but also Headington, and as far as possible Cowley and Littlemore areas (the Eastern Arc); - A hierarchical approach to location: physical proximity (for cycling/walking), then focus along high frequency public transport corridors to multiple Oxford destinations.

PR-A-057 Oxford City Council	18	<p>The City Council welcomes that there are dovetailing objectives for providing infrastructure in both Cherwell and Oxford Local Plans. It is clear common ground that appropriate social and physical infrastructure should be provided as part of meeting the unmet need.</p> <p>Opportunities for making efficient use of existing infrastructure is essential (see our response to question 19 below). However it is equally important that new development should be of a scale to provide for its own local needs such as schools, GPs and green infrastructure. Any spread of smaller development sites as a means of addressing Oxford's unmet need would be inappropriate, as it would be difficult to deliver new schools, health facilities etc. on a scale necessary to mitigate the additional pressure on existing facilities and services.</p> <p>As well as education, health and community infrastructure, there should also be a strong policy steer on green infrastructure. The Oxford Sites and Housing Plan requires a minimum 10% public open space on strategic housing sites. Other types of on-site infrastructure must also be addressed at an early stage of plan-making, e.g. drainage, water supply and energy connections.</p>
PR-A-057 Oxford City Council	19	<p>The City Council believes that the range of employment opportunities, community facilities and services in Oxford provide the best opportunity to mitigate the gaps in infrastructure as growth comes forward. As the highest order settlement in Oxfordshire, Oxford provides the best choice of social and community infrastructure, as well as numerous leisure, retail and sports facilities. These should be considered as a strong positive factor in considering the options for growth.</p> <p>The enclosed Turley Associates report Appendices includes as Appendix 2 (page 162) a spatial assessment of social and community infrastructure in the north of Oxford area. This indicates that new development in this location would have a good range of existing local services to choose from. The Pro-forma Analysis of Options also identifies a number of existing social infrastructure provisions in both North Oxford and Kidlington would provide additional choice for new residents of strategic housing in this area.</p> <p>Turley Associates has also provided a Delivery Statement for the North of Oxford prospective area for development that concludes the development would be viable with the cost of on-site infrastructure requirements factored in.</p>
PR-A-057 Oxford City Council	20	<p>The City Council welcomes the summary of issues in paragraphs 5.100 to 5.107 relating to the Oxford economic context. It would be helpful to identify some particular additional issues in the Oxford context.</p> <p>Firstly, the lack of housing affordable to workers in Oxford is recognised as a significant drag on the economic development of the City, and also on the Oxfordshire economy more generally. There is a serious issue of recruitment and retention becoming difficult across most sectors due to the housing crisis. This is an increasing problem particularly in key public services such as hospitals and schools, for whom many employees even on moderate wages cannot afford to live in or near the City and are therefore finding jobs elsewhere. Furthermore, the two universities and associated research industries are equally reporting difficulties in recruitment to key Oxford-based research posts. (cont...)</p>
PR-A-057 Oxford City Council	20	<p>(cont...) Secondly, it should be recognised that as well as being the economic centre of the County, the Oxford economy is of national and worldwide significance, principally due to the presence of the universities, research hospitals and associated industries. This is recognised in the Strategic Economic Plan, which highlights Oxford as a key area where continued investment is required to realise the full potential of its world-class education, research and innovation that will underpin this economic growth. It would also be helpful to explicitly recognise that planned economic growth in Oxford is projected to result in some 24,000 jobs over the period 2011-2031.</p> <p>Thirdly, the diversity of employment types in Oxford should be more clearly recognised. Major employers of blue-collar workers include BMW and Unipart, and there are numerous other companies offering more manual-based types of work. These workers provide valuable services for the well-being of the City, but are also suffering the effects of the housing crisis and congestion on the transport network.</p>

PR-A-057 Oxford City Council	21	<p>Locating significant new housing close to Oxford is vitally important to support Oxford's long-term economic well-being. There is growing evidence that Oxford is beginning to slip behind other comparable cities' attractiveness for economic development, for example Cambridge.</p> <p>It is also vitally important to improve access for workers at hospitals, schools, universities to get to their workplaces conveniently and cheaply, in order to sustain the world-class clinical and research activities that help to drive the Oxfordshire economy and benefit Oxfordshire's communities, in relation to health care and educational opportunities.</p> <p>Locating new housing immediately north of Oxford would support significant proposed economic growth at Northern Gateway, Begbroke Science Park, Kidlington Business Park and Oxford Airport. This would be of benefit to both Cherwell's and Oxford's spatial strategies.</p>
PR-A-057 Oxford City Council	22	<p>The City Council welcomes that the Issues document recognises the framework and context set in relation to its ambitions and achievements towards being a low-carbon City. As well as the policy context highlighted in the paper, it should also be noted that Oxford has adopted a Low Emissions Strategy and a Carbon Management Strategy. The latter has a headline target of aiming to achieve a 5% year-on-year reduction in carbon dioxide emissions for the period 2012-2017.</p> <p>As a factual correction, note that the most recent policy on low carbon relating to residential development is included in the Sites & Housing Plan which requires 20% of energy requirement on site to be from renewables and low carbon sources. We would want this standard to apply to the Oxford related housing.</p>
PR-A-057 Oxford City Council	23	<p>As explained earlier in this response, it is crucial that the new housing to meet Oxford's unmet need is spatially closely related to the main built-up area of Oxford. The City Council's view is that a sustainable urban extension to Oxford is a far more sustainable option for meeting the need than stand-alone settlements, or development adjoining smaller settlements, as it offers the greatest opportunity for sustainable modes of travel.</p>
PR-A-057 Oxford City Council	24	<p>The City Council welcomes recognition of the importance of the Oxford Meadows SAC. It should also be noted that the Oxford Core Strategy and other Oxford Local Plan policies provide for the protection and enhancement of biodiversity and the natural environment (see Core Strategy Spatial Objectives and Policy CS12). We would encourage that these same principles are applied to the new housing being planned for.</p> <p>As a point of factual accuracy, it should be noted that the Green Belt is not a natural environment constraint but relates to the setting of historic Oxford. See comments under Q26.</p>
PR-A-057 Oxford City Council	25	<p>The City Council notes that the SAC and flood plain present significant constraints in some areas to the north of Oxford, however there is also much land outside the flood zone.</p> <p>The SAC is currently compromised by A34 traffic. Whilst a detailed Habitats Regulations Assessment will be necessary, it is likely that housing close to Oxford could help alleviate this when compared with other alternatives more likely to generate additional traffic on the A34.</p> <p>We would further note that options for growth in the more rural areas away from Oxford are likely to have a greater impact on the character of the open countryside.</p>
PR-A-057 Oxford City Council	28	<p>Site submission - Land North of Oxford</p>

PR-A-057 Oxford City Council 10+11

The City Council supports identifying a specific housing supply identified for Oxford to be provided in Cherwell. This must be limited to the geographical area of search identified as having a strong spatial relationship with Oxford.

Market indications are that there is strong pent-up demand for sites close to Oxford. Further drivers are planned jobs growth at sites immediately north of the built-up Oxford area such as Begbroke and Northern Gateway. Sites close to Oxford therefore have good prospect of being delivered within the Plan period. If such sites are the most sustainable and suitable, there is no reason why the housing should not be delivered as quickly (or quicker) than housing elsewhere in Cherwell District.

Furthermore, Cherwell's Spatial Strategy is to focus development elsewhere in the District around Bicester and Banbury in line with planned and existing employment growth in those locations; the Local Plan Part 1 was adopted on this basis. Therefore additional housing to meet the needs of Oxford will be complementary to housing being built to meet the needs and market demands elsewhere in the district.

PR-A-057 Oxford City Council 12+13

The City Council supports recognition of the housing issues in Oxford as reported in the SHMA (Box 5).

It would be helpful to more fully recognise the severity and long-standing nature of the affordable housing crisis in Oxford, and the impact this has on the local economy. See introduction to this response letter.

The issues should also include recognition that the presence of the Universities, and various 'spin-off' tutorial colleges and language schools, is also a significant driver of housing demand in the City, therefore the mix of housing will need to cater for students and key workers at the Universities and colleges.

The objective of avoiding 'sprawl' and the harm to identity of settlements (5.37) is broadly supported, within the meaning of avoiding unplanned or badly-planned development in the open countryside. However the term 'sprawl' in itself is ambiguous and should be avoided, given that well-planned extensions to settlements can be designed to cause minimal impact on, and potential enhancement to, the setting of affected settlements. (cont...)

(cont...) There should be recognition of the expectation that the new housing will create distinctive, exemplar high quality new neighbourhoods which successfully integrate with Oxford, that include all necessary community and social infrastructure. It could be highlighted that both the City Council and Cherwell share an aspiration for housing development to be of national, or even international, exemplar quality.

The Plan objectives should mitigate the impacts of new greenfield development through efficient use of land, and good design and masterplanning. This can be achieved through the adoption of design codes alongside strategic allocations, which can positively reinforce community cohesion and identity (for both existing and new communities), including where physical or visual gaps between settlements are reduced.

PR-A-057 Oxford City Council 12+13

PR-A-057 Oxford City Council 16+17

The City Council's views on principles relating to transport and movement issues are set out in our responses to earlier questions. Overall, proximity to Oxford is key to ensuring deliverability in transport terms. This is because Oxford has exceptionally high levels of sustainable transport mode share, including amongst the highest mode share for cycling in the country, and a highly developed bus network. There are high frequency bus corridors into Oxford from Cherwell, particularly the route connecting Kidlington and Oxford centre via Oxford Parkway station. The existing infrastructure and availability of public transport in the area immediately surrounding Oxford gives much better prospects for acceptability and deliverability in transport terms, compared with more remote locations where transport mitigation would be far more costly and would do less to encourage private car use for travel into Oxford and elsewhere.

The City Council broadly support the County Council's vision for transport in and to Oxford, although we have made comments on some of the detail within the OTS and LTP4. It is important to note that, at the current time, there is uncertainty over the timing of delivery of the proposed Bus Rapid Transit system and proposed new Park and Ride sites. Hence there should not be sole reliance on these coming forward. (cont...)

PR-A-057 Oxford City Council 16+17

(cont...) The City Council considers that the existing City Park & Ride sites will be needed in the long term, together with additional 'outer ring' Park and Ride sites to help address the additional trips arising from housing growth in Oxfordshire. Existing and proposed sites could link with 'Bus Rapid Transit' (BRT) services as these are developed in future. However, even if and when the Bus Rapid Transit system is completed, it is unlikely to substitute for the need for housing located close to Oxford, as some cross-city journeys will still take significant time and require changing buses. Also the time to develop BRT is likely to go beyond the 2031 Plan period, and due to funding uncertainties, some parts of it may not be realised at all. BRT also provides limited opportunity for cycling and walking as the main mode.

As well as the potential increase in trips within the City boundary, of equal concern is the continuing trend of more in-commuting trips into Oxford as a result of Green Belt 'leap-frogging' due to the lack of housing supply in and around Oxford. The figure on page 47 of the Issues paper shows how there are well over 8,000 journeys to work made each day from Cherwell to Oxford, and this has increased between 2001-2011. This contributes to congestion on the A34 in particular, which is known to be one of the most congested parts of the strategic road network in the UK. (cont...)

PR-A-057 Oxford City Council 16+17

(cont...) The enclosed Peter Brett Associates report "Transport Overview and Assessment of Site Options" (Appendix 3 of the Advocacy Statement Appendices, page 169) gives a full analysis of the pattern of travel associated with Oxford, and describes the opportunities to mitigate the impact of future growth by locating housing development close to Oxford in future. The enclosed Peter Brett Associates Report "North & South Oxford Growth Options: Transport Appraisal" (Appendix 6 of the Advocacy Statement Appendices, page 378) provides evidence that with appropriate mitigation measures, strategic housing development north of Oxford is deliverable in transport terms. Turley Associates has provided a Delivery Statement that concludes the development would be viable with the cost of transport mitigation factored in.

PR-A-057 Oxford City Council 26+27

The key issue for Oxford is the protection and enhancement of the historic setting of the City. This is particularly relevant to areas of open countryside around Oxford that form part of the green backdrop to the historic core of the City. The recognition of the importance of the 'green wedges' or 'green lungs' into Oxford are noted and welcomed.

The joint Oxford Green Belt Study prepared by Land Use Consultants on behalf of all the Oxfordshire districts is relevant in this respect. It highlights that irrespective of the performance of particular Green Belt parcels, a key consideration is whether exceptional circumstances exist that outweigh the Green Belt designation. Previously adopted development plans, such as the former South East Plan, have on review of the evidence found that exceptional circumstances do indeed exist which necessitate a review of the inner Oxford Green Belt boundaries. (cont...)

PR-A-057 Oxford City Council 26+27

The City Council would therefore urge consideration of growth options within the Green Belt which take into account the likely impacts on Green Belt purposes, but also consider the exceptional circumstances that exist which justify a review of the Green Belt boundary. The detailed commentary within the LUC Green Belt Study, as well as work done by Turley Associates on behalf of the City Council (Landscape & Visual Impact Assessment – see Turley Associates Report Appendices - Appendix 1, page 72) will assist in balancing the need for sustainably located housing for Oxford against the important aim of maintaining the overall integrity of the Green Belt.

PR-A-057 Oxford City Council

General

The City Council trusts that our comments will be helpful, and we look forward to continued positive engagement in respect of this Partial Review as well as in relation to the joint work of the Growth Board. Please note that we will be submitting a separate form under the 'Call for Sites' exercise currently being undertaken in relation to the area north of Oxford.

PR-A-058 Natural England

9&24

Natural England welcomes the opportunity to look at and ensure that our remit is being covered appropriately within these partial review documents. It would appear that with the documentation provided that the correct areas have been identified and suggested for inclusion within the main assessment going forward. Ensuring that Oxford City is able to meet its unmet housing need is a key issue for this area and will need to be worked on in cooperation with the other Oxfordshire authorities as highlighted in this document.
It should be ensured that any additional housing to be accounted for on behalf of Oxford (potentially around 3,500 dwellings) can be accommodated without impacting upon the Cotswolds Area of Outstanding Natural Beauty (AONB) in the north west of Cherwell. The review of greenbelt land around Oxford could well highlight areas nearer the city that can be used for additional housing in Cherwell's southern extent. This shouldn't however allow for an intrusion of new housing into greenbelt land where it would be using best and most versatile soils that fall into the Agricultural Land Classification bands 1-3a (inclusive). (cont...)

PR-A-058 Natural England

9 (cont...) Survey work will need to be carried out in order to assess whether any allocations put forward that might be within existing greenbelt land are in fact viable options for development in order to be in line with National Planning Policy Framework (NPPF) paragraph 112:
"Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality".

In terms of the search area for the Oxford housing needs review the area shouldn't be narrowed too far in order to allow for consideration of the entire area nearer Oxford even if large parts of it can then be discounted given their propensity to flood or present green belt status.

Within the Part 2 issues consultation the questions around HGVs and Transport mitigation and monitoring, it would be beneficial to see areas highlighted that are at risk of being adversely affected by HGV movements and also to ensure that effective mitigation is proposed and properly monitored so as to allow for effective controls on development. In terms of securing and demonstrating net biodiversity gain on site (in paragraph 4.236) this should be expanded as suggested in order to give developers a very good idea of the sorts of things they can implement in order to ensure a gain is seen with all development.

PR-A-058 Natural England

Natural England welcomes the recognition of a number of sustainability issues in the scoping report for the Local Plan review parts 1 and 2. The areas which are highlighted as being of importance and which will be covered are those which Natural England would wish to see under our remit. Given that there are areas at considerable risk of flooding in the southern part of Cherwell, between Kidlington and Bicester (as identified in Figure 3.6 of the SA for the Issues Consultation) this will need to be a factor considered early on for any sites suggested in that area.

PR-A-059	Pegasus Group / The Dorchester Group	1	<p>At present there is a lack of evidence to demonstrate whether or not 3,500 additional homes represents an appropriate scale of development that should be accommodated within the Cherwell District. It is understood that the final figure will not be known until the Oxfordshire Growth Board presents its findings in the summer of 2016.</p> <p>The starting point must be that the District has an adopted Local Plan which sets out the need for housing and seeks to provide for 22,840 homes over the Plan period from 2011- 2031. This equates to 1,140 dwellings per year over the 20 year plan period. This represents a significant increase from that originally proposed in the submitted Local Plan which sought to provide housing at a rate equivalent of 670 homes per year, or 16,750 over the plan period to 2031. This significant increase was justified on the basis of the conclusions of the 2014 SHMA. (cont...)</p>
PR-A-059	Pegasus Group / The Dorchester Group	1	<p>(cont...) Therefore in order to ensure soundness total housing provision proposed in the LP1 has already been increased by circa 36% from that originally proposed. The resultant annual average completion rate necessary to meet this uplift in housing amounts to a 124% increase when compared against actual completions recorded annually over the five year period preceding the start of the LP1 Plan period (i.e. 2006-2011 – average annual completions = 509dpa). Total completions over the period 2006-2015 for the district amount to 4,594 dwellings, equating to actual completion rates of 510 dwellings per annum over that 9 year period.</p> <p>The extent to which the Cherwell District will be expected to accommodate unmet need arising from Oxford City must be seen in the context of the very significant increase in housing already necessary to ensure the district can meet its own housing requirements. The first priority for the District Council must be to ensure that it meets in full housing need for the district identified in the LP1.</p>
PR-A-059	Pegasus Group / The Dorchester Group	2	<p>Question 2 considers whether additional employment generating development should be provided alongside any additional housing required in response to identified unmet need. The adopted LP1 housing requirements reflects the 2014 SHMA which in itself was informed by economic considerations, the result of which was to identify a housing requirement for the district that integrates strategies for housing and employment.</p> <p>The “Issues” consultation document does not provide any details as to the overall quantum of employment land that would be sought, even against the working assumption of 3,500 additional homes. Reference is made at paragraph 2.21 of the “Issues” document that the major economic drivers in Oxfordshire include its concentration of high-tech and research technologies, such sectors reflect aspirations within the adopted Cherwell Local Plan so in principle such additional employment generating uses would be supported. The former RAF Upper Heyford and its existing employment base is entirely consistent with such drivers. (cont...)</p>
PR-A-059	Pegasus Group / The Dorchester Group	2	<p>(cont...) Unmet need arising from Oxford City relates specifically to the economic projections that supported the SHMA and the forecasts for economic development at Oxford City. Where housing cannot be provided within Oxford City the concern will be there it will result in a disconnect between the economic projections for Oxford, specifically in terms of the potential to dislocate the physical relationship in terms of location of future employment generating uses and new homes over the Plan period.</p> <p>Additional employment generating uses associated with providing for additional housing must therefore ensure that they are consistent with the economic objectives, priorities established for Oxford and critically, that it does not undermine the economic base and associated strategies and objectives for Cherwell as established in the adopted Local Plan. The Former RAF Upper Heyford site represents the only strategic employment location outside of the main towns of Banbury and Bicester in Cherwell and Policy Villages 5 seeks to facilitate the delivery of an additional 1,500 jobs at this established strategic employment site. Significant employment generating development proposed through the partial review of the Local Plan must first ensure that such proposals do not dilute the value of existing employment provision and to consider opportunities to enhance existing provision within the district, where the sectors / objectives are consistent with those identified areas of growth.</p>

PR-A-059 Pegasus Group /
The Dorchester
Group 6-9

Questions 6 to 9 deal specifically with how unmet need could be accommodated, providing two options. The first being a geographically defined area within which additional development would be directed, i.e. an 'Area of Search', with the second option being that the district as a whole accommodates additional growth under the Duty to Cooperate.

A district-wide approach would not be supported. The Cherwell Local Plan Part 1 has established the housing need for the district to 2031 which, as set out previously, requires a significant and challenging uplift in housing delivery when compared with historic rates of delivery. To apply the district-wide approach effectively increases the Local Plan Part 1 requirement still further, to levels which are unlikely to be achievable within the current spatial strategy established in the adopted Local Plan. The consequence of which will be to put all settlements, at every tier in the settlement hierarchy at risk from speculative development, premised on the need to respond to Oxford City's unmet need, which will undermine the Local Plan's spatial strategy. (cont...)

PR-A-059 Pegasus Group /
The Dorchester
Group 6-9

(cont...) An 'Area of Search' approach would provide a more pragmatic and manageable solution to unmet need arising from Oxford City. It will provide certainty as to those areas of the district that will be subject to additional development pressures and can be identified so that the established spatial strategy set out in the adopted Local Plan is preserved by, for example, focusing development in locations where appropriate infrastructure is in place or can be provided to mitigate the impact of additional development. It may well be the case that multiple Areas of Search are identified, responding to appropriate development opportunities, such as where existing brownfield land could be utilised or where additional development, housing and/or employment, would support/reinforce the role of specific settlements and/or established employment centres.

The former RAF Upper Heyford Site is an established and growing new community that represents the main strategic location for housing and employment outside of the main towns. Significant levels of development are provided for within the adopted Local Plan, supported by an increase in employment through the creation of an additional 1,500 new jobs over the Plan period. The LDA Masterplanning exercise is set within the parameters of the quantitative provisions of Policy Villages 5, it does not attempt to consider the extent to which this important brownfield resource could contribute to meeting Oxford's unmet needs. Notwithstanding this, the LDA Masterplanning is considered important as it gives effect to requirements of Policy Villages 5 and ensures that the first priority of the Council, i.e. meeting its own identified housing needs, can be achieved. (cont...)

PR-A-059 Pegasus Group /
The Dorchester
Group 6-9

(cont...) As a large brownfield resource within the district, with strong physical connections to Oxford, with an established employment basis entirely consistent with the high end, highly skilled and innovative employment sectors that form a central component of Oxford City's economic strategy, the Former RAF Upper Heyford site has further potential to make an important contribution to meeting Oxford's unmet need. This is particularly relevant when considered in the wider context of the district where the uplift in housing delivery required at Banbury and Bicester to meet the districts need, is of such a scale that it casts significant doubt on the district's two main towns capacity to make a meaningful contribution to unmet need arising from Oxford. The scale of the uplift in housing required at Banbury and Bicester is illustrated below. (housing completion graphs provided in rep).

The consequence of which is to limit the potential of the district to accommodate unmet need to other strategic locations, i.e. Upper Heyford, and lower tier settlements, or sites located within the Green Belt. It should be recognised that the current Green Belt designation surrounding Oxford and within Cherwell may have an important role in terms accommodating need closest to where it arises and to ensure that there is not a disconnect in terms of the distribution of additional development and the origin of identified need. However, these will be entirely dependent upon a review of the existing Green Belt in order to identify those areas that do not make a positive contribution to the purposes of this designation. Notwithstanding the need for a review of the Green Belt, where it is the case that brownfield sites, of sufficient scale, are available, this must limit the extent to which sites within the Green Belt are required as part of a coherent strategic response to meeting Oxford's unmet need. (cont...)

PR-A-059 Pegasus Group /
The Dorchester
Group

6-9

(cont...) Given the strategic significance of the former RAF Upper Heyford Site it is considered necessary that this large brownfield resource is properly considered in terms of its capacity to accommodate additional development. As a result of strong sales, production levels are being increased such that a delivery rate of 300 per year will be achieved, which is in excess of the housing trajectory envisaged in the adopted Local Plan. The build out rate includes the ability and funding to build out properties for rent as well as sale. The consequence of which is that on this annualised build rate the quantitative provisions of Policy Villages 5 are likely to be met by 2024, with 7 years of the plan period remaining.

The Former RAF Upper Heyford site therefore represents a strategic development location that is attractive to the market and the acceleration in both sales and build-out rates, supports the continued focus of development at this location. With headroom in housing completions, it means that the site will fulfil the Local Plan Part 1 requirements well in advance of the end of the plan period. Therefore, the opportunities for additional development at this brownfield site, as part of a comprehensive strategy, in response to unmet need arising from Oxford, should be considered as a suitable, deliverable and achievable response to the District Council's Duty to Co-operate obligations. (cont...)

PR-A-059 Pegasus Group /
The Dorchester
Group

6-9

(cont...) Additional growth, supported by commensurate improvements to the infrastructure network, to ensure connectivity of the site and its surrounds to the wider area, including Oxford City, will be necessary. This will not only reinforce the sustainability credentials of this brownfield site, but will also have real and tangible knock on benefits to other villages due to improved public transport provision. Improvements which have more urgency and relevance in the context of recent cuts to local services.

Policy Villages 5, the LDA masterplanning and other site specific appraisals are all framed within a quantitative context that does not account for unmet need arising from Oxford City and Cherwell's obligations under the Duty to Cooperate. The delivery of development at this site in response to Policy Villages 5 must be the first priority but it is considered that this should not preclude the consideration of wider opportunities for development. It is recognised that development should not be at any cost and the heritage, ecological and landscape circumstances of the Upper Heyford Site must be taken into account, but these must be set in their appropriate context and reflect their true significance so that appropriate development can be identified and accommodated. The consideration of wider opportunities for development at the Former RAF Upper Heyford site, should not be constrained to the quantitative provisions of Local Plan Policy Villages 5, rather it should be considered in the context of unmet need and the Duty to Cooperate and the development potential of this site and the proven record of delivery.

The Dorchester Group is supportive of, and a member of the Mid-Cherwell Neighbourhood Plan Executive. This designated area represents the largest Neighbourhood Area in the country and although it is at a relatively early stage in its preparation, it represents the collective determination of the Parish Councils to advance a Neighbourhood Plan for the betterment of those communities, within which the Former RAF Upper Heyford site is located. (cont...)

PR-A-059 Pegasus Group /
The Dorchester
Group

6-9

(cont...) As recognised in the NPPG (Para 003. Reference ID: 41-003-20140306), the Neighbourhood Planning process provides the opportunity for communities to set out a positive vision for how they want their community to develop. A central objective of the Mid-Cherwell Neighbourhood Plan will be to identify and promote appropriate scales of development including sites and a strategy for distribution, in response to the quantitative provision set out in the adopted Local Plan. There is collective agreement within the Neighbourhood Plan Forum which endorses the development of brownfield locations in advance of the release of additional greenfield sites. The Upper Heyford site, as an expansive brownfield resource, provides opportunities to support the Neighbourhood Plan in its approach to support the release of brownfield land in order to protect greenfield sites from development. In doing so this also supports the wider objective of protecting and maintaining the intrinsic character of the rural settlements that form the Neighbourhood Plan Area. Such objectives have additional emphasis when considered in the context of Oxford's unmet needs as pressures for development will inevitably increase.

PR-A-059	Pegasus Group / The Dorchester Group	10+11	<p>The first priority for Cherwell District Council must be to ensure that it meets in full its own identified housing needs. It should not be the case that unmet need arising from Oxford City makes the housing land supply requirements for the district more onerous such that the ability to demonstrate a five year housing land supply cannot be achieved.</p> <p>The implications of not having a five year land supply are serious and put all of the settlements across the district at risk from speculative developers and undermines the emphasis on brownfield land ahead of green field sites established in the adopted Local Plan. To some extent this is recognised as an appropriate incentive for Local Plans to ensure that an adequate supply of housing is maintained and we strongly urge the District Council to continue to facilitate appropriate development so that this can be achieved.</p> <p>There should be a clear separation between Cherwell’s housing requirements and those additional homes needed in response to Oxford’s unmet need. The failure to distinguish between the two elements of housing need will result in a free-for-all across the district, including villages and green field sites adjacent to existing development locations, including the former RAF Upper Heyford. This must be avoided through a clear separation of housing requirements. Cherwell’s five year housing land supply obligations must continue to be calculated on the housing requirements for the district as set out in the adopted Local Plan.</p>
PR-A-059	Pegasus Group / The Dorchester Group	N/A(cont.)	<p>It is understood that this consultation is limited to “issues” that relate to the commitment set out in the adopted Local Plan for the District to consider the extent to which it can accommodate unmet need arising from Oxford City. This is necessary in order for the District Council to discharge its obligations under the Duty to Co-operate as set out in the Localism Act 2011.</p> <p>The Duty to Co-operate is not a Duty to Agree but the District Council, through the Oxfordshire Growth Board, has confirmed its commitment to work collectively with Oxfordshire’s Councils to consider how any unmet need might be sustainably distributed to the neighbouring districts.</p> <p>To date there is no definitive figure for Oxford’s unmet need however, through the Oxfordshire Growth Board a working assumption of 15,000 homes is currently being advanced. Paragraph 2.17 of the Issues consultation document, identifies a figure of an additional 3,500 homes to be provided within the Cherwell District as an appropriate working assumption intended to inform the debate on Cherwell’s capacity to accommodate unmet need arising from Oxford City through its obligations under the Duty to Cooperate. (cont...)</p>
PR-A-059	Pegasus Group / The Dorchester Group	N/A(cont)	<p>(cont...) Current role of the Former RAF Upper Heyford- Our comments relate specifically to the Former RAF Upper Heyford Site. This ex-military base benefits from planning permission for a new settlement, with existing consents delivering 1,134 homes. In light of the need for a significant uplift in housing resulting from the conclusions of the 2014 Oxfordshire Strategic Housing Market Assessment (SHMA), the submitted Local Plan was modified to provide for a substantial increase in the number of new homes to be provided at this site over the Plan period to 2031.</p> <p>Specifically, Policy Villages 5 confirms that an additional 1,600 homes will be provided alongside an additional 1,500 jobs over the Plan period to 2031. This significant increase recognises the strategic function of the Upper Heyford site which represents the only strategic employment/housing allocation outside of the main towns of Banbury and Bicester. (cont...)</p>

PR-A-059	Pegasus Group / The Dorchester Group	N/A(cont)	<p>(cont...) In the context of Policy Villages 5, Paragraph C.292 of the adopted Local Plan confirms that a comprehensive approach will be required to demonstrate how additional land for development can be satisfactorily integrated with the approved development. Through the Local Plan Examination in Public, a Statement of Common Ground was agreed between The Dorchester Group and the District Council (December 2014) which confirmed that:</p> <p><i>“The parties agree that to secure a high quality development (for housing and employment) there will be a need for a comprehensive review of the proposed development at the site that considers the important heritage landscape setting of the site and how additional development can be successfully integrated with existing consented development. This will provide the means to secure development incorporating high quality design that relates closely to the history of the site.”</i></p> <p>Furthermore the Statement of Common Ground also agreed that future development at Upper Heyford should first consider the release of appropriate brownfield land ahead of the release of green field sites. In this regard the agreed Statement of Common Ground stated:-</p> <p><i>“That there should be a sequential approach to development which should not otherwise be delayed in order to ensure the effective use of brownfield land within the existing airbase. The identified greenfield land outside the airbase should not be brought forward until a comprehensive scheme and delivery plan for the entire Local Plan allocation has been secured.”</i> (cont...)</p>
PR-A-059	Pegasus Group / The Dorchester Group	N/A(cont)	<p>(cont...) To achieve this comprehensive approach Cherwell District Council and The Dorchester Group have appointed a joint master planner, LDA Group, to develop a masterplan for the former airbase site in order to determine the extent to which the quantitative provisions of Policy Villages 5 (i.e. an additional 1,600 homes and 1,500 jobs) can be accommodated on this brownfield site, taking account of heritage and ecological constraints.</p> <p>It is expected that once finalised the LDA Masterplan, which should reflect the emphasis on brownfield land as agreed through the Statement of Common Ground as well as specific Local Plan Policy BSC 2, will be presented to the CDC Executive Committee with the recommendation that its findings / assessment is endorsed as a material consideration upon which additional development at the Policy Villages 5 allocation will be guided, and so addressed.</p>
PR-A-060	S Daggitt	2	<p>The economy and employment prospects in the Oxford area are already amongst the best in the country. Development which generates additional employment is much more badly needed in many other parts of the United Kingdom. By planning for more industry/commerce you:</p> <ul style="list-style-type: none"> a) Generate an even greater need for housing thus undoing any gains made by building more houses in the first place. b) Damage other areas of the UK which have more housing stock but few employment opportunities.
PR-A-060	S Daggitt	9	<p>The government has stated quite clearly that the Green Belt is to be protected from incursion. The Green Belt has been one of the great successes of national planning policy but will become meaningless if the boundaries can be moved when expedient.</p>
PR-A-060	S Daggitt	26	<p>It is important that the need for housing should not be an excuse for development within, or surrounding, Conservation Areas in Cherwell's villages and towns. Individual houses or premises may be appropriate but sites suitable for a minimum of ten houses, as called for in the site submission invitation, should not be located in, or next to, Conservation Areas.</p>

PR-A-061 Gerald Eve LLP / Merton College	1	<p>Given that the Local Plan Partial Review is in response to Oxford’s unmet housing need, new additional housing should be directed towards sites that are sustainably located and in close proximity to Oxford. The focus should be upon minimising commuting distances and journey times in and out of Oxford, by developing housing on sites that are (or have the potential to be) well connected to the City and its associated employment hubs. It is within this context that this question should be answered. Cherwell District should therefore be considering these locations and not the district as a whole in order to deliver housing growth associated with Oxford itself.</p> <p>The 3,500 home working assumption appears to be based upon the assumption that all four surrounding local authorities can contribute an equal amount of sustainably located land in close proximity to Oxford that can be made available for housing development to meet Oxford City’s shortfall of 15,000 homes. (cont...)</p>
PR-A-061 Gerald Eve LLP / Merton College	1	<p>(cont...) We have prepared the enclosed Greater Oxford Constraints Plan which is a preliminary ‘sieve map’ identifying development constraints that could affect each district’s ability to deliver such land and therefore illustrates holistically the constraints around Oxford’s Fringe. These constraints include, but are not limited to, the Oxford Green Belt, Areas of Outstanding Natural Beauty, Ancient Woodlands, Sites of Specific Scientific Interest, Areas of Landscape Value, Special Areas of Conservation, along with Scheduled Ancient Monuments and areas of historic significance. Considering the constraints to development that the enclosed Greater Oxford Constraints Plan (preliminary ‘sieve map’) identifies we consider that it is likely that a number of the adjoining local authorities may be unable to contribute sufficient appropriate land to provide 3,500 homes and on this basis the reasonable working assumption for Cherwell should be increased to at least 5,000+ homes. This is considered appropriate in order to take account of the nature and extent of constraints to development within other ‘partner’ authorities within the wider area and a preliminary estimate of their potential shortfall. In order to negate potential shortfalls in other districts we consider a reasonable working assumption for Cherwell should therefore be at least 5,000+ homes.</p> <p>The environmental development constraints present in some local authorities around Oxford make it unlikely that 15,000 homes could be provided in close proximity to Oxford at sustainable locations. We therefore consider that in order for the Oxford City Council assumed 15,000 shortfall to be met by neighbouring authorities, Cherwell would need to assist further in meeting the overall shortfall, with the application of the higher working assumption (5,000+). This is considered to form part of Cherwell District Council’s Duty to Co-operate cited within the NPPF and the NPPG. (cont...)</p>
PR-A-061 Gerald Eve LLP / Merton College	1 1+9	<p>(cont...) In order to have the ability to deliver new homes in line with a higher working assumption (minimum 5,000+ homes), Cherwell District Council should consider the release of appropriate parts of the Oxford Green Belt, considering the five purposes of Green Belt set out at Paragraph 80 of the National Planning Policy Framework [“NPPF”]. This will be critical to meeting Oxford’s Unmet Housing Need. Furthermore, we consider that Oxford’s Unmet Housing Needs are exceptional circumstances, in accordance with Paragraph 83 of the NPPF, given the significant shortfall in housing delivery relative to needs which have been identified. Paragraph 84 states that local planning authorities should take account of the need to promote sustainable patterns of development. Accordingly, the Green Belt should be reviewed in order that sustainable patterns of development can emerge and the higher working assumption can be achieved.</p> <p>In terms of development constraints, which are mapped on the enclosed Greater Oxford Constraints Plan (preliminary ‘sieve map’), we consider that the consideration of sites should be undertaken applying a ‘sieve test’ approach. This approach assists with the identification of the environmental and policy constraints around Oxford. The use of this approach would mean that each site is considered on the basis of the extent of constraints present, with those sites which are less constrained being favoured and put forward for development ahead of those that are more constrained. The sieve map is therefore intended to highlight the least constrained sites. We consider that this will be important in order to efficiently work towards meeting the higher working assumption (5,000 units+) set out. (cont...)</p>

PR-A-061	Gerald Eve LLP / Merton College	2	<p>We consider that there is justification to provide additional employment generating development alongside housing bought about by the need to meet Oxford's Unmet Housing Needs where this is appropriate. There is an intrinsic link between jobs and homes and accordingly we consider that Cherwell needs to provide additional employment generating development in sustainable locations so as to ensure balanced growth into the future.</p>
PR-A-061	Gerald Eve LLP / Merton College	3	<p>The first key issue is that the Oxford and Oxfordshire City Deal (2014)¹ acknowledges how Oxford and Oxfordshire has underperformed and not reached its full potential when compared with other comparable areas around world-class universities. One of the key reasons for this is a shortfall of housing supply which has stifled Oxford's economic potential. Economic growth needs to be supported by housing supply and this is a key issue. To make a significant contribution to Oxford's economy, its unmet housing need must be provided in sustainable locations that will help to rectify Oxford's historic underperformance and help the City to grow.</p> <p>The second key issue is that the growth of Oxford is based around the knowledge economy. The Strategic Economic Plan and City Deal documents promote a north-south 'knowledge spine', which passes through Oxford from Science Vale to the south, to Bicester to the north through the southernmost areas of Cherwell District. Land within the Green Belt in Cherwell is well situated to provide well located new homes for workers at Oxford's key employment hubs along the Knowledge Spine. In order to make a firmer commitment to Oxford's housing and economic development, and the wider Oxfordshire areas, the City Deal sets out a long-term commitment to increasing connectivity between people and jobs, and opening up a choice of housing to skilled workers, as well as enabling specific sites.</p> <p>Cherwell, whilst currently constrained by the Oxford Green Belt, has the ability and opportunity to promote housing development which is in close proximity to the City, with a number of high quality transport links. (cont...)</p>
PR-A-061	Gerald Eve LLP / Merton College	3	<p>(cont...) Proposals within the Northern Gateway are a step in not only supporting regeneration in Oxford but also making a commitment to providing new homes. However, the role of Cherwell in meeting the longer-term needs of the City of Oxford has been underestimated. Given Oxford's anticipated unmet need it is clear that Cherwell lies in an advantageous position to continue this growth of the City and contribute to its increased economic performance and strength going forward.</p> <p>Cherwell, whilst currently constrained by the Oxford Green Belt, has the ability and opportunity to promote housing development which is in close proximity to the City, with a number of high quality transport links.</p> <p>Proposals within the Northern Gateway are a first step in not only supporting regeneration in Oxford but also making a commitment to providing homes. However, the role of Cherwell in meeting the longer-term needs of the City of Oxford has been underestimated. Given the anticipated unmet need it is clear that Cherwell lies in an advantageous position to continue this growth of the City and contribute to its increased economic performance and strength going forward.</p> <p>City Deal: Oxford and Oxfordshire, 2014. Oxford and Oxfordshire City Deal (2014). London: Deputy Prime Minister's Office and Cabinet Office.</p>
PR-A-061	Gerald Eve LLP / Merton College	4	<p>Additional housing growth in the District should be aiming to achieve an enhancement to Oxfordshire's economy and improve the quality of life of existing residents in Cherwell. Additional housing growth in Cherwell should be appropriately located to achieve these goals through development in the right locations that has regard and is sensitive to the setting and context of its existing surroundings. Cherwell District Council needs to ensure that additional growth is directed to sustainable locations within proximity to the City of Oxford, associated infrastructure and sustainable transport links. We consider that this is critical in order to ensure that future residents can access jobs, services and transport links. To this end, there is a need for particular consideration of sustainable locations in the areas surrounding the City of Oxford and in reasonable proximity to the recently opened Oxford Parkway station in order to improve Oxford's economic prospects.</p>

PR-A-061	Gerald Eve LLP / Merton College	5	The vision for meeting Oxford's Unmet Housing Needs should be focused upon providing homes in sustainable locations, with an appropriate mix of housing to meet those needs. Without this the economy of Oxford City, and Oxfordshire more widely, will not realise its ultimate potential. Accordingly, the Vision should encompass sites in accessible locations with the least development constraints and the 'sieve test' approach should be adopted. Please refer to the enclosed Greater Oxford Constraints Plan (preliminary 'sieve map') which illustrates the key development constraints and therefore the areas with the least development constraints which are considered as appropriate for the focussed vision for meeting Oxford's Unmet Housing Need. Please also refer to our responses to Questions 1, 6, 7, 8 and 9.
PR-A-061	Gerald Eve LLP / Merton College	6	We consider that focussing the 'area of search' upon areas well related to the City of Oxford is of critical importance if Cherwell is to effectively meet the unmet housing need of the City. As the economic powerhouse of the county, Oxford is critical to the ongoing economic success and increased economic performance of the City and its resultant effect on the wider Oxfordshire area is achieved through providing housing in sustainable locations in the surrounds of the City. The 'area of search' should be focused upon the southern areas of the Cherwell District, which benefits from the aforementioned transport links and infrastructure, proximity to Oxford and access to the market and knowledge which is associated with the City. It is important that travel times to areas of employment are also considered as part of the 'area of search' exercise so as to ensure that housing development does not materially increase the time taken to travel to work, impacting upon creating economic efficiency and quality of life.
PR-A-061	Gerald Eve LLP / Merton College	7	The 'area of search' should be considered in light of the development constraints across not only Cherwell but also other relevant areas of the county, and where necessary, focus upon those areas of the Oxford Green Belt in proximity to the City of Oxford which do not serve to meet the five purposes of the Green Belt prescribed under Paragraph 80 of the NPPF. As set out in response to Question 7, we consider that other key factors including transport links and access to the employment market of Oxford need to influence the 'area of search' with the focus being upon proximity and accessibility to Oxford.
PR-A-061	Gerald Eve LLP / Merton College	8	We consider that a district-wide approach is not appropriate and that the 'area of search' should be focussed upon the Oxford Fringe. The 'area of search' exercise should be driven by the need to direct housing development to areas with appropriate infrastructure given the strain which can be placed upon the existing infrastructure by increased populations. We consider that the majority of development should be situated in sustainable locations to the south of the District, in proximity to the City of Oxford in order to ensure that existing predominantly rural infrastructure does not become overstretched. Sites situated in sustainable locations and in single ownership, such as our client's sites which are submitted within the Call for Sites exercise linked to this consultation, are therefore considered to be deliverable and should be considered as appropriate locations for meeting Oxford's Unmet Housing Needs.
PR-A-061	Gerald Eve LLP / Merton College	9	The Green Belt should be considered. Green Belt assessments have already identified that certain parts of the Green Belt contribute less to its functions and purpose than others. It is considered most appropriate and sustainable to ensure that Oxford's Unmet Needs are met as close to Oxford as possible. This would minimise the stress placed on transport connections further out of the City and reduce journey times and distances to employment and key transport hubs. Development should be located as close to the centre of Oxford as possible as well as those areas that support its key economic functions and activities. We consider this critical in order to ensure that transport facilities and local infrastructure do not become overstretched as this will be detrimental to the continued growth of Oxford and the wider Oxfordshire area. The Green Belt can, where appropriate, allow for the appropriate expansion of the City's housing supply to accompany its current economic success. The siting of new housing within the boundaries of the current Oxford Green Belt is critical to ensuring the City's continued growth and progression.

PR-A-061	Gerald Eve LLP / Merton College	10	Yes. Housing development which is intended to meet Oxford's unmet needs should not be part of a generalised 'pot' for Cherwell. Instead, all of the 15,000 homes required to meet Oxford's unmet housing need should be allocated to a separate Oxford Fringe requirement. The Oxford Fringe should be a geographically-defined, cross-boundary area around the current boundary of the City of Oxford. As noted previously, we consider that with the 15,000 homes shortfall split between the neighbouring authorities, there is likely to be a shortfall in neighbouring authorities owing to the extent of natural environment protection in place, whilst Cherwell has the ability to over-deliver. The enclosed Greater Oxford Constraints Plan (preliminary 'sieve map') illustrates the areas which are subject to development constraints from the natural environment. From this it is possible to draw conclusions about constraints to neighbouring authorities. We consider that given the findings illustrated on the sieve map, the Vale of White Horse is particularly constrained and would therefore encounter the most difficulty in delivering housing to meet Oxford's Unmet Needs. We consider therefore that Cherwell, given the lesser development constraints in place, has the ability to deliver and should look to do so going forward if Oxford's identified Unmet Needs are to be met. We consider that the enclosed Greater Oxford Constraints Plan (preliminary 'sieve map') further highlights the need for consideration of a specific housing supply for the geographically-defined, cross boundary Oxford Fringe area in order to ensure that Oxford can meet its needs.
PR-A-061	Gerald Eve LLP / Merton College	11	Given that the emphasis should be upon ensuring housing provided under the revised Local Plan Part 1 (specific to meeting Oxford's unmet needs) is for Oxford City the delivery of housing associated with Oxford should be considered as separate from Cherwell's own strategy and five year housing land supply. New homes directed at meeting Oxford's unmet needs within Cherwell should be viewed solely as delivering housing for Oxford. This approach will allow for the separate consideration of housing land supply to meet the needs of Oxford without adversely affecting the existing Cherwell strategy for housing.
PR-A-061	Gerald Eve LLP / Merton College	20	We would be concerned about the economic impact of providing housing which is supposed to help alleviate Oxford shortfall in locations that are not well related to Oxford or its employment hubs. We consider that housing in certain areas of the Green Belt such as well-connected sites that provide only a low contribution to the functions of the Green Belt would provide the best platform to drive economic growth through housing. With particular relevance to the sites put forward, the Begbroke Science Park is identified as an area where economic development should be encouraged. The sites put forward within the Call for Sites, and particularly our clients' Yarnton site, are considered as sustainable locations to support this economic growth.
PR-A-061	Gerald Eve LLP / Merton College	21	The potential negative impacts associated with siting housing development away from the City of Oxford mean that potential development locations to meet Oxford's unmet needs need to be concentrated towards the south of the District. This will ensure that distance travelling is reduced as far as possible and the resultant potential impact upon economic efficiency and output limited. When considering potential development locations in the south of the district, the associated travel time and distance to employment areas need also be considered to ensure that housing to meet Oxford's unmet needs does not lead to increased travel time and distance which will lead to an adverse effect on economic productivity.
PR-A-061	Gerald Eve LLP / Merton College	28	Site submissions - Land to West of A44/Rutten Lane, north of Cassington Road, surrounding Begbroke Wood; Land to South of A34, north of Linkside Avenue; Land to South of A34, adjacent to Woodstock Road; Land to West of A44, north of A40
PR-A-061	Gerald Eve LLP / Merton College	12+13	We consider that the housing issues identified are heavily focussed on the existing context. Cherwell District Council will need to consider the future housing issues which arise as a result of the issues identified. In particular, the likely increase in need for housing near its boundary with the City of Oxford need be considered in order to ensure that the final Local Plan Part 1 addresses the likely position of the District at the point of adoption as well as beyond the 15 year period to the end of the Cherwell Local Plan's scope (2016-2031), setting out an appropriate strategy to remedy the issues linked to Oxford's unmet housing need.

PR-A-061 Gerald Eve LLP / Merton College 14+15

Cherwell District Council needs to carefully consider the broad location of new housing within the southern part of the District so that it is well related to the City of Oxford, associated infrastructure and sustainable transport links. We consider that this is critical in order to ensure that future residents, who are currently a part of Oxford's unmet need, can access jobs, services and transport links. To this end, there is a need for particular consideration of the areas surrounding and in reasonable proximity to Oxford Parkway station. There are a number of areas within close proximity to the station which suit housing development and the increased sustainable transport links serve to strengthen this position.

In terms of locations that the Council should be considering, we consider that the inclusion of Merton College's sites for housing would be appropriate and would be a positive step in meeting Oxford's unmet need in proximity to the City of Oxford. Our client as the owner of a number of sites within Cherwell has therefore proposed a number of sites in their ownership for consideration for housing development as part of the Call for Sites exercise associated with this Issues Consultation.

Each of these sites are considered appropriate for development that will help to meet the identified Unmet Needs of Oxford. They are situated in sustainable locations in proximity to Oxford, with limited development constraints. (cont...)

PR-A-061 Gerald Eve LLP / Merton College 14+15

(cont...) Yarnton

Our client's landholding within Cherwell District is to the west of the village of Yarnton, largely encompassing the Begbroke Wood and bordering the A44. In accordance with the requirements of the Call for Sites procedure, we have completed the Site Submission forms and appended a plan providing further details of the site.

We consider that housing development on this site would provide a large number of dwellings, helping to provide a substantial part of the Council's target to meet Oxford's unmet need. The site's location adjacent to Yarnton village means that any housing development coming forward would be served with local transport and amenity facilities mean that the development would be sustainable. The site can accommodate a large number of homes; any forthcoming proposal would include further local transport and amenity facilities as appropriate. Furthermore, any housing development could also be of the highest design standards in order to complement Yarnton's character.

The site is considered to be highly accessible with the A44 to the East and Cassington Road to the South, and is a short journey from the interchange with the A4260, A40 and A34, as well as Oxford Parkway Station and the Northern Gateway to Oxford. Furthermore, future improvements are proposed in the vicinity, and currently subject to consultation. We consider that the proposed A40/A44 relief road which will further enhance the accessibility of the area. (cont...)

PR-A-061 Gerald Eve LLP / Merton College 14+15

(cont...) In terms of the deliverability of housing, given that this large area of land is in single ownership, it is considered that the site is not subject to any particular ownership constraints and therefore could be delivered efficiently and begin to contribute to Oxford's unmet need.

Wolvercote

Our clients' landholdings around Wolvercote are located in part in the Northern Gateway area. Please see the appended plans providing further details of the sites (the site boundaries are outlined in red and the administrative boundary with Oxford City Council in blue).

Parcel A is located to the north of the A34 and A40, whilst Parcel B is located to the south of the junction of the A34 and A44 and, in part, crosses the administrative boundary with Oxford City Council. Parcel C is located to the south of the A34 and to the east of the Oxford Parkway-London railway line. Given the drive by Oxford City Council to promote growth at the Northern Gateway, and the newly opened Oxford Parkway station in proximity to the north-east of the sites and Oxford Park & Ride/bus facilities to both the north and south of the sites, we consider these sites would be an appropriate and highly sustainable location for housing development. Furthermore, given the sites are located adjacent to arterial roads they are considered to have provision of excellent transport links. Parcel A is also located in the area of the A40/A44 relief road where future improvements are proposed, likely to further enhance the accessibility of the site in the future. (cont...)

PR-A-061 Gerald Eve LLP / Merton College 14+15

(cont...) We consider that given the location and accessibility of the Wolvercote/Northern Gateway area as a whole, the sites have the potential to deliver larger-scale residential development to meet Oxford's unmet housing needs. We consider that each site could benefit from the existing amenity facilities in the surrounding area, though in the cases of Parcels A, B and C where higher number of dwellings could be accommodated any forthcoming proposal

Cherwell District Council need to consider the transport infrastructure surrounding potential development sites considered to assist in meeting Oxford's Unmet Housing Need. Sites in proximity to Oxford City Centre and its associated road (A34, A40 and A44) and rail (Oxford Parkway Station) should be seen as highly favourable potential development locations to meet Oxford's unmet need. These locations are not constrained in terms of access to Oxford City Centre and, with the perceived increase in housing in the area, sustainable means of transport could be initiated by Cherwell through the expansion of Park and Ride schemes to ensure transport infrastructure into the City does not become overstretched.

We support the County Council's strategy of reviewing the viability of 'outer ring' Park and Ride locations in the future. The 'Science Transit' plan to upgrade public transport along the perceived 'knowledge spine' is also seen as a significant opportunity to ensure that potential development locations at the south of the District are supported by appropriate transport initiatives going forward and further support the potential development of sites to the north of Oxford. (cont...)

PR-A-061 Gerald Eve LLP / Merton College 16+17

(cont...) The sites discussed in response to Question 15 are appropriately placed to provide appropriate housing development, supported by appropriate transport infrastructure and are in areas which are significantly less congested than alternative sites in the wider area. Both current and envisaged improvements to transport, through a greater public transport offering and improvements to the A40 further support the sustainability of these sites. The A40 improvement works are seen as critically important to ensuring that those travelling East-to-West are as well supported by local infrastructure as those travelling North-to-South and will assist in ensuring there is no

PR-A-061 Gerald Eve LLP / Merton College 22+23

As set out above, we consider that southern areas of the District in proximity to Oxford are the most sustainable locations and, when considering potential development locations to meet Oxford's unmet needs, should form part of the 'area of search' and be considered as highly favourable for development.

PR-A-061	Gerald Eve LLP / Merton College	24+25	<p>As set out in our response to Question 1, and highlighted by the enclosed Greater Oxford Constraints Plan (preliminary 'sieve map'), we consider that large areas of land that would otherwise be well related to Oxford are constrained by the natural environment and subsequent planning policy protection. This includes, but is not limited to, the Oxford Green Belt, Areas of Outstanding Natural Beauty, Ancient Woodlands, Sites of Specific Scientific Interest, Areas of Landscape Value, Special Areas of Conservation, along with Scheduled Ancient Monuments and areas of historic significance.</p> <p>As a result of the extent of the Oxfordshire countryside which is currently protected, as shown in the enclosed Greater Oxford Constraints Plan (preliminary 'sieve map'), the potential development locations to meet Oxford's unmet needs are very limited. This is not only the case in Cherwell, but also the other 'partner' Districts who are to assist in meeting Oxford's unmet housing need. Development should therefore be directed to the least restricted areas around the City of Oxford. In line with our earlier comments, we therefore believe that Cherwell should review its Green Belt in areas which are not subject to further natural environment protection with a view to releasing land from the Green Belt.</p>
PR-A-062	Turnberry Planning Ltd / Exeter College	1	The question is phrased incorrectly, coming as it does, ahead of determining and consulting upon actual capacity of the various Districts. A reasonable assumption would be that 3,500 homes is a minimum target for each District until such time the evidence base and consultation processes develop.
PR-A-062	Turnberry Planning Ltd / Exeter College	2	Yes. As Oxford's unmet need in respect of Cherwell will need to be largely concentrated around North Oxford and Kidlington, it would be appropriate to take advantage of the opportunity created by the cluster of world class economic assets, particularly high value employment that supports innovation and technology.
PR-A-062	Turnberry Planning Ltd / Exeter College	3	Oxford City Council has made a compelling case that its future success depends on the release of land from the Green Belt to meet its unmet need. We support the City Council's objective and the process of reviewing the Green Belt, but beyond conventional Green Belt tests, the principles of accessibility, place-making, neighbourhood planning and economic development should guide the release of Green Belt.
PR-A-062	Turnberry Planning Ltd / Exeter College	4	<ol style="list-style-type: none"> 1. High value employment and innovation: Taking advantage of the Oxfordshire bioscience and technology cluster with the associated benefits for Cherwell in providing spaces to support the growth of high value employment; 2. Live/Work: Promoting the close proximity of housing and work spaces to foster innovation and reduce reliance on the car;
PR-A-062	Turnberry Planning Ltd / Exeter College	5	Place-making: Taking the key principles expressed in response to Q4 and using them to masterplan high quality neighbourhoods that enhance the District and off-set the loss of Green Belt.
PR-A-062	Turnberry Planning Ltd / Exeter College	6	Yes, that would be an entirely logical response as the unmet need relates to Oxford and those locations which offer convenient and sustainable access to urban Oxford should be favoured.

PR-A-062	Turnberry Planning Ltd / Exeter College	7	<p>Opportunities to create free-standing communities should be looked at carefully. The close proximity of urban centres in Oxford and Kidlington mean villages in this area will have a level of sustainability that is not available to villages in remoter parts of the District. Moreover, they can support a greater range of services and avoid competing or over-extending existing settlements. Once planned, they offer no further opportunities for expansion and deliver greater certainty to existing communities.</p> <p>We refer to recent DCLG Consultation on Proposed Changes to National Planning Policy published in December 2015 in support:</p> <p>"We propose to strengthen national planning policy to provide a more supportive approach for new settlements, within locally led plans. We consider that local planning authorities should take a proactive approach to planning for new settlements where they can meet the sustainable development objectives of national policy, including taking account of the need to provide an adequate supply of new homes. In doing so local planning authorities should work proactively with developers coming forward with proposals for new settlements in their area." (Paragraph 20)</p> <p>The close proximity of bus and train connections should also be a key factor in selecting an area of search.</p>
PR-A-062	Turnberry Planning Ltd / Exeter College	8	No, that would be illogical – see Q6.
PR-A-062	Turnberry Planning Ltd / Exeter College	9	Yes – but within that, the criteria for site selection should favour proximity to urban Oxford and public transport.
PR-A-062	Turnberry Planning Ltd / Exeter College	15	See our response to Q 6,7, 8 and 9, but we consider the area between Oxford and Kidlington as being best suited to meet the majority of the unmet need within Cherwell District.
PR-A-062	Turnberry Planning Ltd / Exeter College	28	Site submission - Frieze Farm, Woodstock Road, Oxford.
PR-A-062	Turnberry Planning Ltd / Exeter College	17, 21, 23, 25, 27	<p>We consider our responses to Q 6, 7, 8, 9 and 15 to entirely align with these issues in terms of the suitability of the area between Kidlington and Oxford, as well as the principles set out in response to Q 4.</p> <p>We would also point out that this area is of low ecological value, has few environmental constraints and benefits from the potential of engaging with the Oxford Canal, an important tourist resource. There is also no direct relationship between this locality and the historic core of Oxford.</p>
PR-A-063	Oxfordshire County Council	1	<p>The scale of Oxford's unmet housing need to be apportioned to Cherwell will be decided by the Growth Board following completion of the post SHMA work Programme, currently scheduled for September 2016; this joint work will provide high level assessment of strategic spatial options for accommodating unmet need. The Growth Board is using 15,000 as working assumption for the scale of unmet need to 2031.</p> <p>The County Council understands the need for CDC to commence work for the early review now in order to meet its commitment in the Local Plan Part 1 to complete the review within two years of the Part 1 adoption and it is helpful for this work to be based on a realistic working estimate of the apportionment figure until the Growth Board decision is known. (cont...)</p>

PR-A-063	Oxfordshire County Council	1	<p>(cont...) However, the County Council considers it would be more appropriate for this initial work to use a range for the scale of unmet need which the review may need to plan for. A single working figure of 3,500 - based on 15,000 divided by 5 with a marginal uplift of 500 - is too specific and does not allow sufficient headroom for the outcome of the joint work showing that an equal apportionment between the five councils would not produce the most sustainable solution for the Oxfordshire HMA. It will be important to incorporate the right solution for Oxfordshire into the Partial Review. Provision could be higher or lower than 3,500 homes; we suggest that a range of 2,500 - 4,500 would provide reasonable indicative lower and upper figures.</p> <p>(The true scale of Oxford's unmet need will not be determined until the review of the Oxford's Local Plan is completed).</p>
PR-A-063	Oxfordshire County Council	2	<p>Oxford's Objectively Assessed Need (OAN) of 28,000 identified in the SHMA is based on making a significant contribution to meeting affordable housing needs in the City. The OAN is not based on supporting economic growth and currently there is not an identified, overall employment land supply issue in the City which would need to be resolved within Cherwell through this review.</p> <p>However, there are some key employment sectors within Oxford important to the Oxfordshire economy eg research activities associated with the University, which are looking to expand but whose particular land requirements cannot easily be met within the City. It may be appropriate for these specific unmet Oxford employment needs to be accommodated alongside solutions for unmet housing needs within Cherwell through the allocation of mixed use sites. Consideration could also be given to co-locating expanding employment uses with options for meeting Cherwell's local employment needs, particularly if there are synergies with existing employment generating development already located within the district. (cont...)</p>
PR-A-063	Oxfordshire County Council	2	<p>(cont...) 90,000sq.m of employment space is planned on land adjoining Cherwell at Northern Gateway. From a sustainability perspective, there would be benefits in providing housing development in locations which could take advantage of existing/potential public transport links to the job opportunities at Northern Gateway.</p> <p>There may also be scope for minor ancillary employment generating uses as part of strategic mixed use, housing-led options for unmet need eg at local centres, schools etc.</p>
PR-A-063	Oxfordshire County Council	3	<ul style="list-style-type: none"> - Oxford's affordable housing needs as identified in the SHMA - Need for sites to have good accessibility by fast and frequent public transport, cycling and walking into the City centre and to other key employment locations in Oxford - the Plan should consider the relationship between housing sites and the Oxford transport Strategy. It should require new housing sites on or near a Rapid Transit route to Oxford or near to a Park and Ride site to contribute towards improvement measures for that infrastructure. In addition these housing sites should not prejudice the delivery of these measures as defined in the Oxford transport Strategy.
PR-A-063	Oxfordshire County Council	4	<p>A key principle should be to make best use of existing and planned infrastructure and to minimise the need for new infrastructure.</p> <p>Additional housing growth should be planned in such a way as to facilitate the delivery of services and infrastructure, either by being located where existing services/infrastructure would benefit from additional population, or are capable of being expanded in a cost-effective manner, or by being clustered in such a way as to make the creation of new infrastructure viable. If new primary schools are required, a concentration of at least 1,000 new homes would typically be required to make a new school viable; for secondary schools, a concentration of at least 3,000 new homes would typically be required, although this can be over a larger area. Additional housing growth should be considered in conjunction with that already in the Local Plan Part 1.</p> <p>Those sites on strong public transport corridors (both bus and rail) should be considered for low car or car free development.</p>

PR-A-063	Oxfordshire County Council	5	The Vision for meeting Oxford's unmet need should take account LTP4, including the Oxford Transport Strategy.
PR-A-063	Oxfordshire County Council	6	Yes, as the options are to meet Oxford's unmet need; anything else would not be sustainable development.
PR-A-063	Oxfordshire County Council	7	Options should relate well to Oxford by way of proximity and/or accessibility. The County Council suggests that an area of search is based on key transport corridors which have existing, planned or potential for fast and frequent public transport services to Oxford centre and key employment locations within the City.
PR-A-063	Oxfordshire County Council	8	No – some areas of Cherwell do not relate well to Oxford. Also in those locations already proposed for significant growth – Banbury, Bicester, Upper Heyford – the market is unlikely to be able to deliver significant additional housing to meet Oxford's unmet needs.
PR-A-063	Oxfordshire County Council	9	No. An area of search based on the Green Belt would not necessarily lead to options which have good accessibility to existing, planned or potential fast and frequent public transport services to Oxford centre and key employment locations within the City. The area of search should include Green Belt land within transport corridors through the Green Belt but should not be contiguous with the Green Belt boundary.
PR-A-063	Oxfordshire County Council	10	The County Council can understand why Cherwell might wish to separate the unmet need requirement from Cherwell's own housing requirement for five year land supply purposes. However, given the latent demand for housing from Oxford and the market interest in developing in and around the City, it is quite possible that sites will come forward early in the plan period and enable a good supply of deliverable and developable sites
PR-A-063	Oxfordshire County Council	11	The district could consider a ring fence approach.
PR-A-063	Oxfordshire County Council	12	There should be more explicit emphasis on access by public transport.
PR-A-063	Oxfordshire County Council	15	Locations along transport corridors which have existing, planned or potential fast and frequent public transport services to Oxford centre and key employment locations within the City and locations which would encourage cycling and walking as a mode of travel to and/or within Oxford. The selection of sites for development should take into account planning policy on safeguarding of mineral resources and infrastructure and waste management infrastructure, in particular policies M6, M8, M9 and W11 in the submitted Oxfordshire Minerals and Waste Local Plan: Part 1 – Core Strategy (Proposed Submission Document, August 2015).
PR-A-063	Oxfordshire County Council	16	There are a number of transport issues mentioned in the consultation document which need updating: - The Park & Ride study is now underway (see comments for Question 86 of OCC's Local Plan Part 2 response) - The East West rail connection with Milton Keynes is now due to open from 2019
PR-A-063	Oxfordshire County Council	17	The Partial Review will need to take account of the conclusions and recommendations of the Park & Ride Study

PR-A-063	Oxfordshire County Council	18	<p>Strategic Policy Comments-</p> <p>In planning development to meet Oxford's unmet needs, it should be emphasised that impacts on existing infrastructure must be thoroughly assessed and careful consideration given to the phasing of new infrastructure with development.</p> <p>Although it might be appropriate to develop a separate housing requirement and strategy for accommodating Oxford's unmet need, the assessment, planning, funding and delivery of supporting strategic infrastructure will require a comprehensive approach which takes account of already planned growth in Cherwell and planned and emerging growth elsewhere in Oxfordshire.</p> <p>In Oxfordshire there is already a need to address a funding gap for strategic infrastructure required to support planned growth, taking into account existing government funding schemes. In the continued climate of financial restraint for local authorities, the County Council would not wish to see options for Oxford's unmet need come forward which would significantly increase the infrastructure funding shortfall.</p>
PR-A-063	Oxfordshire County Council	18	<p>Education Comments-</p> <p>Para 5.66 states:</p> <p><i>"For Banbury, the IDP highlights a new primary school at South of Salt Way, one at Bankside, one at Southam Road, one at Drayton Lodge Farm..."</i></p> <p>OCC have never sought a new primary school at Drayton Lodge Farm. Comments to this effect were provided for the IDP update. The updated IDP that went to Cherwell's Executive on 4th January 2016 reflected these comments.</p>
PR-A-063	Oxfordshire County Council	19	<p>Consideration should be given to spatial options which:</p> <ul style="list-style-type: none"> - can take advantage of existing and planned investment in strategic infrastructure - might strengthen the business case for new or improved strategic infrastructure
PR-A-063	Oxfordshire County Council	20	<p>It should be recognised that many residents of the new housing sites are likely to work in Oxford and therefore, it is important that housing sites are located along established or proposed public transport corridors.</p> <p>Reference should be made to the Oxfordshire Creative Cultural Heritage and Tourism Investment Plan. This sets out the value of these sectors to the Oxfordshire economy and would strengthen the text around the value of tourism in Cherwell.</p>
PR-A-063	Oxfordshire County Council	22	<p>OCC consider sustainability to be a key principle. Please see our response to Question 4.</p>
PR-A-063	Oxfordshire County Council	24	<p>The cumulative ecological impact of the extra development required, not just within Cherwell but also any development along the Districts' boundaries, needs to be considered for sensitive receptors (such as local and European designated sites). This is especially important within the Zone of Influence (Zol) for the Oxford Meadows Special Area of Conservation (SAC).</p> <p>It is important to maintain the integrity of Conservation Target Areas (CTA's), as well as any other proposed Green Infrastructure linkages.</p>
PR-A-063	Oxfordshire County Council	25	<p>The issue of cumulative ecological impact could particularly affect locations put forward for housing development within the Zol for Oxford Meadows SAC. This is because even if there will be no hydrological impacts on the SAC, the air pollution generated by extra traffic in the local area could affect the SAC grassland.</p>
PR-A-063	Oxfordshire County Council	26	<p>Para 5.146: the District contains 38 scheduled ancient monuments and not 36 as set out in this document. It also contains 6 registered parks and gardens and 1,402 non-designated archaeological heritage assets.</p>

PR-A-063	Oxfordshire County Council	28	No (but see sites nominated as part of Local Plan Part 2)
PR-A-063	Oxfordshire County Council	1+19	<p>Oxfordshire County Council are committed to continuing the positive and pro-active joint working with CDC and welcome the opportunity to comment on the issues that the Local Plan Part 1 Partial Review will need to address. As with the preparation of the adopted Local Plan Part 1, the main issue for OCC is the identification, provision, funding and overall deliverability of the infrastructure and County Council services needed to support sustainable development.</p> <p>KEY ISSUES-</p> <ul style="list-style-type: none"> - It would be more appropriate for Cherwell to use a range for the scale of unmet need which the review may need to plan for. A range of 2,500 - 4,500 homes would provide reasonable indicative lower and upper figures. - Additional housing growth should be planned in such a way as to facilitate the delivery of services and infrastructure, either by being located where existing services/infrastructure would benefit from additional population, or are capable of being expanded in a cost-effective manner, or by being clustered in such a way as to make the creation of new infrastructure viable. (cont...)
PR-A-063	Oxfordshire County Council	4+7+19+10	<p>(cont...) - The Vision for meeting Oxford's unmet need should take account LTP4, including the Oxford Transport Strategy.</p> <ul style="list-style-type: none"> - The 'area of search' should relate well to Oxford by way of proximity and/or accessibility. The County Council suggests that an area of search is based on key transport corridors which have existing, planned or potential for fast and frequent public transport services to Oxford centre and key employment locations within the City. - In planning development to meet Oxford's unmet needs, it should be emphasised that impacts on existing infrastructure must be thoroughly assessed and careful consideration given to the phasing of new infrastructure with development. - Whilst it may be appropriate to develop a separate housing requirement and strategy for accommodating Oxford's unmet need, the assessment, planning, funding and delivery of supporting strategic infrastructure will require a comprehensive approach which takes account of already planned growth in Cherwell and planned and emerging growth elsewhere in Oxfordshire.
PR-A-064	David Lock Associates / Gallagher Estates	1	<p>The strategic context introduced through the Localism Act and NPPF requires cooperation and cross boundary working between neighbouring Local Authorities to meet housing and economic needs. We therefore welcome the approach taken by the Local Authorities to help meet Oxford's Housing Needs.</p> <p>We note that the Oxfordshire Growth Board are using a "working assumption" of 15,000 as the total of Oxford's unmet needs, stating (at paragraph 2.14 of the Issues Consultation Report) that the figure will be refined and the distribution amongst individual districts will be agreed following completion of the County study, expected in Summer 2016.</p> <p>Cherwell's indicative 3,500 figure is based on equal apportionment of the overall Oxfordshire Growth Board figure of 15,000 (split between the five Oxfordshire authorities) – that is 3,000 dwellings each, and an additional 500 dwellings as a contingency to reflect other factors that might affect Oxford's and/or, another district's ability to take its assumed housing growth, taking into account the relevant sustainability credentials of the Oxfordshire Districts as a whole.</p>

PR-A-064 David Lock Associates / Gallagher Estates	1	<p>(cont...) Whilst the report makes clear that the 15,000 Oxford unmet figure is to be used as a working figure for assessing the spatial options for growth, the Strategic Housing Market Assessment 2014 need for Oxford reported 28,000 dwellings required for the period 2011-31 and when considered against a supply figure of 10,212 dwellings (Strategic Housing Land Availability Assessment, 2014), this produces a shortfall of some 18,000 dwellings. That is some 3,000 dwellings over and above that currently being considered as a "working assumption" for unmet need.</p> <p>It would seem appropriate therefore that to ensure that the needs of the Oxfordshire Housing Market Area are met in full, a range of options should be tested above the assumed 3,500 additional dwellings in Cherwell District.</p> <p>Furthermore, it is important that the emerging spatial strategy for the Local Plan Partial Review is responsive and flexible enough to ensure that the capacity for Cherwell to sustainably meet Oxford's unmet needs is not fettered by the imposition of an indicative threshold that is driven by an approach that seeks equal apportionment of growth across the districts. Cherwell District Council benefits from a strong geographic and economic relationship to Oxford City, enhanced by good strategic transport connections, and relatively limited areas of green belt, in comparison with other authorities, and may be well placed to take growth above the 3,500 initially suggested.</p>
PR-A-064 David Lock Associates / Gallagher Estates	15	<p>Gallagher Estates considers there is an opportunity to direct additional growth to locations within or immediately adjoining the main towns of Banbury and Bicester, where economic growth and housing development can be planned comprehensively to promote a sustainable form of development advocated by the National Planning Policy Framework and where substantial infrastructure investment is already planned.</p> <p>A further opportunity exists for villages to accommodate further growth, with due consideration afforded to their size, service provision and relative connectivity/ accessibility to Oxford.</p>
PR-A-064 David Lock Associates / Gallagher Estates	28	<p>Site submission - Land at Wykham Park Farm, North of Wykham Lane, Banbury</p> <p>This consultation is at a preliminary stage and seeks to scope the options for Cherwell's ability to meet a proportion of Oxford's unmet need. As discussed, the extent of Oxford's unmet need is not fixed, and therefore it is important that a range of options are tested to enable a robust issues and options assessment to be carried out.</p> <p>It is critical that there is a transparent and consistent assessment process that is not unduly limited by the imposition of "areas of search" that might close off options/locations within which growth can be sustainably accommodated. Clarity should be given as to what factors would constitute "well-related" to Oxford. The imperative is to address Oxford's needs sustainably and therefore assessment of accessibility and connectivity should be considered.</p> <p>Gallagher Estates consider that a district-wide search area is appropriate; Cherwell District falls within the Oxfordshire Housing Market Area and it would seem sensible to consider options within the district from which the need is generated, this might include consideration of Oxford Green Belt as a potential option.</p>

PR-A-064 David Lock 10+11
Associates /
Gallagher Estates

Gallagher Estates do not consider that a specific housing supply for meeting Oxford's needs should be identified. Cherwell's contribution to meeting Oxford's unmet need will form part of the overall strategy to deliver growth which seeks to meet objectively assessed development (including unmet requirements from neighbouring authorities) as advocated in the NPPF.

Cherwell's specific housing need and Cherwell's proportion of Oxford unmet need are both to be met within Cherwell administrative boundary and should be combined and planned comprehensively through a single approach over the Plan period.

Whilst we note that the Partial Review will have a specific focus and will form an addendum to the Local Plan Part 1, we would suggest that the overall housing target for Cherwell should also be reviewed to ensure it is up to date and is "drawn up over an appropriate time scale, preferably a 15-year time horizon" (para 157 NPPF). (cont...)

PR-A-064 David Lock 10+11
Associates /
Gallagher Estates

(cont...) Final publication of the Partial Review is anticipated 2018, as such it is suggested that the Oxfordshire SHMA should be updated to include a housing target that extends beyond the current time horizon of 2031, to provide a basis on which to positively plan for growth over a sufficient time horizon - that being at least 15 years as advocated by the NPPF.

It is considered that a range of sites will be required to meet Cherwell's own needs and Oxford's Unmet Housing needs jointly, an approach that will provide housing delivery benefits, and will offer increased variety and choice in the market. As discussed, a full range of options will need to be considered to establish a robust spatial strategy that adequately and sustainably meet Cherwell's own housing needs and those of Oxford City (unmet).

It is important that the contribution that smaller sites can make to the early delivery of homes which address short-term housing need in combination with larger strategic/mixed use sites, receives full and proper consideration within any emerging strategy.

PR-A-064 David Lock 4+5
Associates /
Gallagher Estates

At the heart of national planning policy is the objective to achieve sustainable development (NPPF paragraphs 6-14). In order to achieve this a clear focus is required within the Local Plan review to ensure that the most sustainable locations are prioritised.

The Local Plan Review must ensure that the most sustainable locations, are identified and given greater weight, to ensure appropriate sites are supported through the site selection process.

Banbury is the larger of Cherwell's two towns and has a significant commercial, retail, employment and housing market. The growth identified at Banbury through the Local Plan Part 1 will serve to bolster the economic and social function of the town for its residents and businesses. Additional growth at Banbury will serve to support the foundations laid by the Local Plan Part 1.

Due consideration should also be given to locations that meet local needs, but also to the identification of locations that accommodate sustainable transport opportunities to Oxford.

PR-A-065 I Grace

1 Cherwell District Council has already made provision for very large housing numbers in the adopted local plan. These numbers have translated through to truly massive housing allocations.

If built these allocations will result in the provision of some 22,000 new housing units in the district. This is likely to feed through to a population increase of over 40,000 people, effectively another Banbury built in the district. This represents about a 30% increase in the district's population. And about a third of Oxford city's current population.

Clearly this figure is far in excess of the figure generated by natural increase within the district and makes allowance for a very large rate of in migration. I would therefore suggest that we (CDC) have already made generous allowances for Oxford's housing needs. (cont...)

PR-A-065 I Grace

20 (cont...) In no small part the district's very large housing requirements in the adopted local plan are the result of the plan's very generous (and probably over optimistic) commercial land allocations. Put very simply if you build commercial floor space in areas of full employment you will pull in workers. If you pull in workers you need to provide housing for them.

We could "make space" for Oxford's overspill housing by reducing our commercial allocations which would in turn reduce housing demand which would allow the "slack" in our allocations to be taken up by Oxford's perceived needs.

We could start by deleting that truly awful commercial allocation east of the motorway (junction 11). South Northants are very right about that one.

What I think that we should do our very best to avoid, but which I fear we are likely to end up with, is further large, greenfield and essentially unsustainable housing allocations "bolted on" to the existing already over expanded market towns.

The current Cherwell District Council Local Plan is an awful document. If built it will create a district which is more crowded, congested, polluted and far far less attractive to live in than it currently is. That is hardly an achievement to be proud of and I would beg you not to make that situation worse with further large greenfield housing allocations.

PR-A-066 Oxalis Planning /
Blackfield Land Ltd

16

(cont...) We consider that a number of key transport issues, and associated land-use planning issues, are missing from the consultation document and should feature in the next stages of the partial review. In particular, there is no reference or cross-reference to freight and distribution related transport (road and rail). While the focus on the movement of people is understood in the context of a focus on housing growth, this should not be at the expense of also considering the needs for transport connectivity to enable the movement and storage of goods or materials. Such movements play a key role in supporting a wide range of sectors, including high-value engineering, manufacturing and retail sectors. Therefore, the need for additional logistics or distribution development sites in Cherwell should be explicitly considered as part of the partial review. Along with planning to meet housing needs, this too forms an essential part of the local, sub-regional and national economy, and brings with it a need for development land in suitable and sustainable locations.

We have also made representations to the Part 2 Local Plan Issues consultation regarding the issue of strategic logistics sites. However, as a strategic (as opposed to 'non-strategic') issue, our view is that this would be an appropriate issue for the partial review, and that there is a need to allocate additional employment sites.

PR-A-066 Oxalis Planning /
Blackfield Land Ltd

20

We welcome that the Issues consultation document includes a section on the Economy, as well as sections on Infrastructure and Transport. We feel it is essential that the review to consider the most appropriate distribution and scale of housing development to help meet Oxford's unmet needs also consider the associated economic issues.

It is clear that Cherwell District and Oxford City share a range of functional and economic cross-boundary relationships. It is also clear that Oxford is highly constrained in terms of the City's administrative boundaries, and the limited availability of potential development land is of direct relevance to employment development as well as for housing. We believe the issues identified for the partial review should include further work relating to the scope for cooperation between Cherwell and Oxford City regarding strategic employment sites alongside consideration of how and where Cherwell accommodates a proportion of Oxford's unmet housing needs. We consider this essential if Cherwell is to positively address the challenges posed by the high levels of out-commuting and if the challenges of congestion are to be addressed. (cont...)

PR-A-066 Oxalis Planning / Blackfield Land Ltd	20	<p>(cont...) The issue of identifying sites to accommodate large scale logistics buildings was discussed during the Local Plan Part 1 examination process, and the Council has previously recognised that further policy guidance is required and that provision (allocations) should be made for strategic logistics/distribution development. The separate Part 2 Local Plan Issues Consultation document includes a reference to ‘further economic assessment work’ being planned with regard to large-scale logistics sites, but does not offer any detail as to how or when the issue will be addressed. In our view, having identified this issue previously as a pertinent and relevant strategic local planning issue, the Council should incorporate it into the scope of the partial review of the Local Plan. The 2015 Local Plan Inspector’s Report made several comments about the development pressures for large logistics sites, dismissing them as being ‘speculative’ with reference to the need for such sites as being ‘as yet unproven’. Furthermore, the Inspector’s comments were also predicated on an assumption that ‘such schemes would be road based’ (paragraph 41, Inspector’s Report, May 2015). We would strongly challenge a number of the Inspector’s conclusions and assumptions, and remain of the view that this strategic land-use needs to be actively and explicitly planned for. It would be logical and appropriate to incorporate this issue into the partial review alongside the work needed to revisit the distribution of strategic housing development. (cont....)</p>
PR-A-066 Oxalis Planning / Blackfield Land Ltd	20	<p>(cont...) It is clear that there are numerous potential development sites in the District, several of which are likely to be well suited to strategic distribution and logistics development. As specific examples, sites were being promoted by other parties during the examination in the vicinity Junction 10 of the M40, and Blackfield Land Ltd is involved in promoting a different site at Junction 10 of the M40. We are actively seeking to bring this site forward, and contrary to the Inspector’s assumption, are actively exploring the potential for a rail freight interchange. Furthermore, and also contrary to the Inspector’s comments, the site includes previously developed land adjacent to the M40, with limited ‘intrusion’ into open or virgin countryside. Our technical work to assess and the site is ongoing, but such a proposal would make a significant contribution to the economy of the District, but also support wider economic objectives across the LEP area and Oxford housing market area. We are also exploring the opportunities to include new local highways infrastructure to address existing local challenges, and to the benefit of existing local communities nearby. We are keen to discuss these emerging proposals with the Council and to provide plans and other details in due course.</p> <p>Our ongoing work in relation to the potential of this site is informed at the national level by the clear and explicit support for, and recognition of the need for, a network of rail freight interchanges across the UK to help deliver against environmental as well as economic objectives and priorities. It is also a direct response to the strong locational advantages of Cherwell, something which has already seen a number of strategic sites emerge earlier in the plan-making process in response to market demand and requirements. The local strength and opportunities of the logistics sector are recognised in the Council’s Cherwell Economic Analysis Study of 2012. The SEMLEP Strategic Economic Plan for 2015-2020 identifies Logistics as ‘key sector’.</p>
PR-A-066 Oxalis Planning / Blackfield Land Ltd	20	<p>(cont...) As a long-term plan looking ahead to 2031 our view is that the approach of the adopted Local Plan has no flexibility with regard to responding to market signals and economic opportunities. We note that one of the economic challenges facing the District included in the Adopted Local is:</p> <p>“new employment sites are needed to meet modern business needs”</p> <p>The lack of a clear strategy and policies for actively addressing the issue of strategic logistics and distribution development represents a critical weakness in the Council’s response to this challenge. Although advocated by the Inspector, we do not feel it is sound to progress with a planning strategy which provides such limited guidance on this key issue. Given the potential and the need for development of such strategic sites early in the plan-period, we don’t believe delaying until a subsequent review of the Local Plan is appropriate or sound.</p>

PR-A-066 Oxalls Planning /
Blackfield Land Ltd

16

We welcome that the Issues consultation document includes a section on the Transport, as well as sections on Infrastructure and the Economy – we strongly support Cherwell District Council’s apparent intentions to consider the issues of Oxford’s unmet housing need in a comprehensive and holistic way rather than in isolation.

The transport section of the consultation document identifies a number of key issues, including the County Council’s estimates that despite the high levels of congestion already seen in many parts of the City, there could be a 25% increase in journeys within the City of Oxford by 2031, with approximately 13,000 more commuter trips each day. While supporting and enabling the continued growth of Oxford through cross-boundary cooperation is clearly a requirement upon Cherwell District, it is also clear that reducing out-commuting from the District remains a key challenge and priority. The charts on page 47 of the consultation document help to illustrate the significant scale of the commuting flows from Cherwell to Oxford, and the strength of the existing functional and economic cross-boundary relationships. The scale and extent of these economic relationships can be expected to increase if housing growth is redistributed into Cherwell. (cont...)

1

The figure of 3,500 homes is derived from the work of the Oxfordshire Growth Board and represents a simple piece of arithmetic whereby 15,000 homes (the working assumption for Oxford City’s unmet need) is divided on a more-or-less equal basis between the 4 adjoining local authorities. In many ways this is an unsatisfactory approach to deriving a guideline figure as it fails to take account of a wide range of technical and environmental factors that will ultimately determine what the appropriate division between the local authorities ought to be.

The Oxfordshire Growth Board is currently in the process of testing a range of strategic options for the spatial distribution of the unmet housing need. According to the reports submitted to the Growth Board meeting on 2nd February 2016, the analysis of strategic options is due to be concluded in September 2016. Given the fact that Cherwell District immediately adjoins the urban area of Oxford at its northern point it has the potential to contribute towards meeting the housing needs of Oxford in a very sustainable way i.e. meeting the need close to where it arises.

It is therefore likely that the figure of 3,500 homes is an underestimate of the proportion of Oxford’s housing need that should be met in Cherwell.

2

It is a key principle of sustainable development that sites should contain a mix of uses so as to, for example, create a close relationship between homes and job opportunities and thereby reduce the length of journeys to work. In principle therefore the provision of additional homes to meet Oxford’s needs should be associated with the provision of additional land for employment. However, the appropriateness of providing jobs and homes on the same site, or in close proximity to each other, will depend upon the existing context of the site including the present availability of local job opportunities.

In the case of north Oxford there is already a significant resource of local jobs available. Furthermore the planned development at Northern Gateway will deliver thousands more new jobs in the area. Given the existing and planned availability of local jobs there is no specific requirement to provide additional employment in the north Oxford area. The specifics of the North Oxford Triangle do however provide a unique opportunity to deliver business accommodation close to the Water Eaton station. This could prove to be an attractive location for existing and new businesses given the high quality of rail services to London.

PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	3	<p>The key issue to consider in deciding on where to accommodate the unmet housing needs of Oxford is to seek to meet that need as close as possible to where it arises. This means that the most appropriate locations to consider in the first instance are those in, and on the edge of, Oxford.</p> <p>This approach does as a consequence determine that sites within the Green Belt are considered once the capacity of the urban area of Oxford has been fully utilised. This requires that 'exceptional circumstances' are established to justify a review of the Green Belt as required by the Framework at paragraph 83. The Colleges and OUP maintain that 'exceptional circumstances' do exist, including the following:</p> <ul style="list-style-type: none"> - the national and local imperative to deliver higher housing numbers and economic growth; - persisting jobs-homes imbalances in the local area; - poor housing affordability and a backlog of need; - worsening traffic congestion in and around Oxford; - staff recruitment and retention problems for local employees due to housing affordability, including meeting the needs of University and College employees for whom there is a pressing need for accommodation; - a lack of realistic alternatives to focusing growth at Oxford; and - a lack of capacity to accommodate all of Oxford's housing needs within the boundary of the city. (cont...)
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	3	<p>(cont...) With the 'exceptional circumstances' case established, the review of the Green Belt should be informed by an analysis of the extent to which land currently in the Green Belt contributes towards its five purposes as defined in the Framework at paragraph 80. This analysis has in part been undertaken in the Oxford Green Belt Study (LUC, 2015) commissioned by the Oxfordshire Growth Board. Whilst a useful reference document, the study is flawed due to the fact that it considers any expansion of the Oxford urban area to be 'urban sprawl'. This is not an accurate assessment of such sites given that new development per se cannot be considered 'sprawl' if it takes place as part of a plan-led exercise as required by the Framework.</p> <p>In addition, the Green Belt Study fails to take into account the sustainability benefits of locating new development on the edge of Oxford. For example, sites well related to Oxford would be able to take advantage of local employment opportunities and other facilities / services in the city and access them by sustainable modes of transport. The Colleges and OUP anticipate that the sustainability issues will be taken into account in the analysis of strategic options that the County Council is currently undertaking on behalf of the Oxfordshire Growth Board.</p>
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	4	<p>The additional growth in the District should be aiming to provide new homes to meet Oxford's unmet needs in location/s that:</p> <ul style="list-style-type: none"> - are well related to Oxford, where the need for the new homes arises; - have easy access to sustainable modes of transport; - are well connected to existing highway infrastructure; - provide suitable access for vehicles, cyclists and pedestrians; - connect to existing cycle and pedestrian networks; - preserve and enhance key environmental and heritage assets; - are in close proximity to existing and future sources of employment; - are close to existing leisure facilities; and - provide sufficient facilities and open space on site to meet the needs of future residents.

PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	5	<p>The focused Vision for meeting Oxford’s unmet need in Cherwell District should contain:</p> <ul style="list-style-type: none"> a) a clear commitment to meet Oxford’s unmet housing need in full in combination with the other Oxfordshire local authorities; b) a commitment to deliver the growth of the Oxford urban area in the most sustainable way; c) to achieve a review of the Green Belt that will sustain for the long term and safeguard the five purposes of the Green Belt; d) allows for the co-location of jobs and homes on an area-wide basis; and e) ensures that the day-to-day requirements of new residents in terms of facilities and services are either met on-site or in the local area.
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	6	<p>The area of search for the Partial Review document should focus on the area of Cherwell most closely related to Oxford i.e. north Oxford. This will enable housing sites to come forward at the closest point to where the need arises. The Colleges and OUP consider that in this context the land to the immediate north of Oxford – the ‘North Oxford Triangle’ – is particularly well suited and represents a highly sustainable and suitable location.</p>
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	7	<p>The factors influencing the ‘area of search’ should include:</p> <ul style="list-style-type: none"> - maintaining the five purposes of the Green Belt; - establishing new boundaries for the Green Belt that will sustain for the long term; - access to sustainable transport modes; - availability of adequate highway capacity and site access; - relationship of site to the Oxford urban area and proximity to Oxford; - proximity to sources of employment; - proximity to existing facilities and services including leisure, education, retail, health; - environmental constraints and opportunities; and - relationship with already permitted/allocated sites.
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	8	<p>The ‘area of search’ for the Partial Review should be well related to Oxford City to ensure that it provides sustainable development that serves Oxford’s housing demand. Only if all suitable and deliverable sites close to Oxford have been appraised, and allocated where appropriate, should sites further from Oxford be considered.</p>
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	9	<p>As stated above, in deriving the figure of 15,000 new homes it has been assumed that all the urban capacity in Oxford has been accounted for. After that, the most sustainable and appropriate location to meet the needs of Oxford is on the edge of the City. There is no land on the edge of the city that is not constrained by Green Belt as the designated ‘Safeguarded Sites’ at Barton and Northern Gateway are now allocated/consented for development. Sites on the edge of the city will therefore inevitably require a review of the Green Belt. On this basis, an area of search based on the Green Belt is a logical approach, albeit with a focus on the inner boundaries of the Green Belt adjoin the built-edge of the city.</p>

PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	12	<p>In accordance with national policy and specifically the ‘duty to cooperate’ (NPPF, paragraph 178), Cherwell is required to work with other authorities in the county to determine the appropriate contribution it should make towards meeting Oxford’s unmet housing need. A number of sites or broad locations, which are deliverable and developable, therefore need to be identified in order to achieve this aim. In addition, the NPPF states that the purpose of the planning system is to contribute to the achievement of sustainable development.</p> <p>In the Cherwell context, sites will need to meet the strategic objectives for housing and for building sustainable communities in Cherwell as set out in the Local Plan Part 1. The North Oxford Triangle site is suitable in this context given that the development of the site will:</p> <ul style="list-style-type: none"> - preserve a ‘gap’ between Kidlington and Oxford; - establish new Green Belt boundaries that will be robust and sustain for a long period; - be large enough such that a mix of housing types and tenures could be provided; - be close to existing services and facilities on the edge of Oxford; - have access to sustainable transport routes and transport infrastructure; and - provide essential new facilities and services on site. (cont...)
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	12	<p>(cont...) The housing market issues at Oxford identified from the Oxfordshire SHMA 2014 emphasise that the strongest housing demand pressures in Oxfordshire are in Oxford. It also sets out the particular housing trends and requirements within Oxford. A large site close to Oxford will serve the Oxford-focused sub regional housing market and provide a range of types and tenures of housing to meet Oxford’s needs.</p> <p>In terms of the geographic context, a site to the north of Oxford would be well related to existing transport infrastructure and planned infrastructure improvements, to the existing residential centres of Cutteslowe, Summertown and Wolvercote and to planned development at the Northern Gateway Site.</p> <p>It is clear that the area north of Oxford – the North Oxford Triangle - is particularly well located to contribute to meeting the unmet housing needs of Oxford.</p>
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	14	<p>Specific objectives that Cherwell Council should consider when identifying sites for meeting housing needs arising within Oxford are that they should:</p> <ul style="list-style-type: none"> - be well related to Oxford; - have easy access to sustainable modes of transport; - be well connected to existing highways and other transport infrastructure; - provide suitable access for vehicles, cyclists and pedestrians; - link with existing cycle and pedestrian routes; - offer opportunities to preserve and enhance key environmental and heritage assets; - be close to existing and future sources of employment; - provide links to existing leisure facilities; - provide sufficient facilities and open space on site to serve the needs of future residents; and - provide a mix of housing types and tenures to meet Oxford’s housing requirements.

PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	15	<p>Please refer to separate site submission form for the North Oxford Triangle.</p> <p>Given its high sustainability credentials, the North Oxford Triangle should be allocated as a strategic housing site to meet Oxford's unmet needs. The site provides an opportunity to make a significant contribution to Oxford's unmet housing needs in a highly sustainable location close to Oxford.</p> <p>The site is close to existing sustainable transport links including Oxford Parkway Station, Water Eaton P&R and Peartree P&R. There is a real opportunity to provide a new neighbourhood for Oxford that has excellent sustainable transport links both locally and with the wider highway and rail network. The site is also adjacent to Oxford Road which is a 'Premium Transit Route' into Oxford and is well placed to benefit from the committed infrastructure improvements in North Oxford set out in the Oxford Transport Strategy. There are also various connections that can be made via existing vehicle, cycle, and pedestrian routes to maximise the options for movement to and from the site.</p> <p>The site is well placed to provide access to local jobs at sites such as the Jordan Hill Business Park to the south, future provision at the Northern Gateway site and employment opportunities in Oxford and Kidlington. (cont...)</p>
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	15	<p>(cont...) There are a number of leisure and recreation facilities that can be easily accessed from the site including Cutteslowe Park, the Five Mile Drive Recreation Ground and the Banbury Road North Sports Ground. There is potential to provide links to and enhance Cutteslowe Park.</p> <p>The site is well related to Oxford and existing communities to the south of the site.</p> <p>The scale of the site means that it has the potential to provide a significant number of new homes to contribute towards meeting Oxford's unmet housing needs. In addition, the site is capable of providing for the day-to-day needs of the local community in terms of open space, primary level schooling, an element of local shopping as well as some additional employment opportunities.</p> <p>There are no significant environmental constraints that would prevent the site being utilised for the delivery of a highly sustainable new neighbourhood for Oxford.</p> <p>In conclusion the site is particularly well suited to meet Oxford's unmet housing needs. Furthermore, the owners of the site are willing for it to be delivered for development should the Council agree with this analysis and allocate it through the Partial Review process.</p>
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	19	<p>The North Oxford Triangle is well located to take advantage of and enhance green, social, community and service infrastructure. Benefits of the site include:</p> <ul style="list-style-type: none"> - proximity to recreational facilities including Cutteslowe Park, the Five Mile Drive Recreation Ground and the Banbury Road North Sports Ground; - potential to provide additional green infrastructure links into Cutteslowe Park and the wider countryside; and - opportunities to provide infrastructure on site, such as a new school and extending the local pedestrian and cycle network.
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	28	<p>Site submission - North Oxford Triangle, Kidlington. Please refer to the Site Submission Form for the North Oxford Triangle.</p>
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	10+11	<p>The Oxfordshire Growth Board is due to make recommendations on the appropriate division of Oxford's unmet housing between the other Oxfordshire districts at its meeting in September 2016. The implications for five-year housing land supply should be carefully considered once the scale of the allocation to Cherwell has been determined.</p>

PR-A-067 Savills / Christ Church, Exeter College, Merton College and Oxford University Press 13, 16-18

The Partial Review cannot address the housing requirements of Oxford in isolation. The provision of housing on the scale required will have implications for the wider area that will need to be considered alongside the allocation of sites for housing. One key area for consideration is transport and in this regard the County Council has prepared a Local Transport Plan that considers the long term strategy for achieving access to Oxford, which includes to the north of Oxford where the following measures are proposed:

- improvement to the A40 from Eynsham to Oxford;
- implementation of Premium Transit Routes and potential Rapid Transit System between Kidlington and Oxford; and
- P&R at locations remote from Oxford.

The Partial Review should consider these wider transport issues as part of bringing forward strategic sites on the edge and near to north Oxford.

In the context of transport issues, the North Oxford Triangle is particularly well located given its proximity to the Oxford Parkway Station, Water Eaton P&R and the high quality bus services that operate along Oxford Road. The site therefore represents a highly sustainable solution for meeting housing needs close to Oxford.

PR-A-067 Savills / Christ Church, Exeter College, Merton College and Oxford University Press 20+21

The key economic issue that will need to be addressed is to ensure that any identified site is deliverable. The delivery of the North Oxford Triangle is supported by the landowners (should it be allocated by the Council) and given its proximity to existing infrastructure there is not a requirement for any major investment in infrastructure improvements in order for it to be delivered. The site is therefore available and deliverable and represents a highly sustainable option.

In terms of wider economic issues the scheme will make a positive contribution to the local economy in a number of ways, including: providing employment during the construction phase, increasing spend in the local economy, easing housing affordability in Oxford, enhancing the viability of existing bus services on Oxford Road and train services at Water Eaton.

Furthermore, the location already benefits from the availability of local employment, at the Jordan Hill Business Park to the south. It would also provide an opportunity to access future employment opportunities at the Northern Gateway. It is close to Oxford, which is the main economic centre of the county, and to Kidlington where there are also a range of employment opportunities. There is also potential to provide an element of new employment at the site to benefit from proximity to the train station providing access to London.

PR-A-067 Savills / Christ Church, Exeter College, Merton College and Oxford University Press 22+23

This submission has already identified the sustainability credentials of the North Oxford Triangle, including:

- access to local jobs and services to reduce the need for travel and minimise related CO2 emissions;
- access to a choice of sustainable transport modes when travel is necessary;
- meeting the need for homes near to where that need arises;
- protection and enhancement of habitats;
- protection of existing heritage assets;
- potential to enhance the cycle and pedestrian network; and
- potential to extend the green infrastructure network.

In addition to these points already referred to, the eastern edge of the site is defined by the River Cherwell and its flood plain. This feature provides a long term boundary for development and an appropriate feature to define the edge of the redefined Green Belt. The layout and design of the scheme will factor in the presence of the flood plain so as not to increase flood risk on site or elsewhere.

Furthermore, there is a commitment to design the scheme to a high standard both through built elements and green infrastructure.

PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	24+25	As part of the analysis of the sustainability of any strategic site options, the potential impacts on habitat and species of importance should be taken into account. The North Oxford Triangle does not contain any significant landscape features or ecological habitats that would constrain development of the site. In addition, it is some distance from the designated ecological sites within the surrounding area.	
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press	26+27	As part of the analysis of the sustainability of any strategic site options, the potential impacts on heritage assets should be taken into account. The North Oxford Triangle contains no listed structures or other features of heritage value. There are two Listed structures (St Frideswides Farmhouse and Wall approximately 10m to north east of St Frideswides Farmhouse) beyond the site boundary on its eastern extent. Whilst careful design of the scheme is required to respect these Heritage Assets they will not significantly impact on the ability to deliver a comprehensive overall proposal for the site.	
PR-A-067	Savills / Christ Church, Exeter College, Merton College and Oxford University Press			The section of the report relating to 'Relationship between the Cherwell Local Plan Part 1 Review and other plans and programmes' does not refer specifically to Neighbourhood Plans. Such documents are part of the development plan and warrant attention on that basis when assessing spatial strategy options. Whilst referring to the Strategic Economic Plan, the document does not refer to the 'refresh' of this document which is currently underway and is likely to be concluded before the Partial Review has been completed.
PR-A-068	Savills / Christ Church, Exeter, Magdalen, Merton and St.John's Colleges	1	The figure of 3,500 homes is derived from the work of the Oxfordshire Growth Board and represents a simple piece of arithmetic whereby 15,000 homes (the working assumption for Oxford City's unmet need) is divided on a more-or-less equal basis between the 4 adjoining local authorities. In many ways this is an unsatisfactory approach to deriving a guideline figure as it fails to take account of a wide range of technical and environmental factors that will ultimately determine what the appropriate division of the 15,000 shortfall should be between the local authorities of Oxfordshire. (cont...)	
PR-A-068	Savills / Christ Church, Exeter, Magdalen, Merton and St.John's Colleges	1	(cont...) The Oxfordshire Growth Board is currently in the process of testing a range of strategic options for the spatial distribution of Oxford's unmet housing need. According to the reports submitted to the Growth Board meeting on 2nd February 2016, the analysis of strategic options is due to be concluded in September 2016. Given the fact that Cherwell District immediately adjoins the urban area of Oxford it has the potential to contribute towards meeting the housing needs of Oxford in a very sustainable way i.e. meeting the need close to where it arises. It is therefore likely that the figure of 3,500 homes is an underestimate of the proportion of Oxford's housing need that should be met in Cherwell. Further stages of the Partial Review should therefore await the conclusion of the Oxfordshire Growth Board analysis of strategic options.	
PR-A-068	Savills / Christ Church, Exeter, Magdalen, Merton and St.John's Colleges	3	The key consideration in deciding where to accommodate the unmet housing needs of Oxford is to seek to meet that need as close as possible to where it arises. This approach does determine that sites on the edge of the city, and therefore within the Green Belt, are to be preferred (on the assumption that the urban capacity of Oxford has been fully utilised). This requires that the necessary 'exceptional circumstances' are established to justify a review of the Green Belt as required by the Framework at paragraph 83. The University & Colleges maintain that 'exceptional circumstances' do exist, including the following: - the national and local imperative to deliver higher housing numbers and economic growth; - persisting jobs-homes imbalances in the local area; - poor housing affordability and a backlog of need; - worsening traffic congestion in and around Oxford as a result of in-commuting to the city; (cont...)	

PR-A-068	Savills / Christ Church, Exeter, Magdalen, Merton and St.John's Colleges	3	<p>(cont...) - staff recruitment and retention problems for local employees due to housing affordability, including meeting the needs of University and College employees for whom there is a pressing need for accommodation;</p> <ul style="list-style-type: none"> - a lack of realistic alternatives to focusing growth at Oxford; and - a lack of capacity to accommodate all of Oxford's housing needs within the city. <p>With the 'exceptional circumstances' case established, the review of the Green Belt should be informed by an analysis of the extent to which land currently in the Green Belt contributes towards its five purposes as defined in the Framework at paragraph 80 as well as a sustainability assessment of the identified strategic sites. The University & Colleges anticipate that the sustainability issues will be taken into account in the analysis of strategic options that the County Council is currently undertaking on behalf of the Growth Board and which will be reported to the Board in September 2016.</p>
PR-A-068	Savills / Christ Church, Exeter, Magdalen, Merton and St.John's Colleges	4	<p>The additional growth in the District should be aiming to provide new homes to meet Oxford's unmet needs in location/s that:</p> <ul style="list-style-type: none"> - are well related to Oxford, where the need for the new homes arises; - have easy access to sustainable modes of transport; - are well connected to existing highway infrastructure; - provide suitable access for vehicles, cyclists and pedestrians; - connect to existing cycle and pedestrian networks; - preserve and enhance key environmental and heritage assets; - are in close proximity to existing and future sources of employment; - are close to existing leisure facilities; and - provide sufficient facilities and open space on site to serve the needs of future residents.
PR-A-068	Savills / Christ Church, Exeter, Magdalen, Merton and St.John's Colleges	5	<p>The focused Vision for meeting Oxford's unmet need in Cherwell District should contain:</p> <ol style="list-style-type: none"> a) a clear commitment to meet Oxford's unmet housing need in full in combination with the other Oxfordshire local authorities; b) a commitment to deliver the new growth in the most sustainable way; c) to achieve a review of the Green Belt that will sustain for the long term and safeguard the five purposes of the Green Belt; d) allows for the co-location of jobs and homes on an area-wide basis; and e) ensures that the day-to-day requirements of new residents in terms of facilities and services are either met on-site or in the local area.
PR-A-069	R James	22	<p>I am not at all happy that Kidlington appears to be undergoing rapid and rather idiotic speculative developments. Multiple occupancy dwellings are now replacing many large houses around the village; a house at the corner of Springfield Road is being turned into flats.</p> <p>The proposed huge unwelcome addition of flats instead of the Cooperative car park is another sign that there is absolutely no care or long term thinking being put into how the village is going to remain just that, and have any sort of charm, and identity.</p> <p>Disrupting the communities, which have lived in the village for many years, is very poor policy for ensuring crime, social cohesion and harmony remain the stalwart features of this established village. (cont...)</p>

PR-A-069 R James

1 (cont...) From the documents I have had chance to go over, I don't think that Cherwell should be considering allowing an extra 3,500 extra houses to meet Oxford's housing issues. This figure is derived from the Oxfordshire SHMA which has simply been accepted by the Council and not subjected to serious independent scrutiny. The SHMA was drawn up by private consultants who largely work for the development industry and therefore have a conflict of interest. Its figures are much too high, far in excess of previous trends and clearly unrealistic. I do not accept that the SHMA figures represent either Cherwell's or Oxford's needs.

With regard to the issue of whether additional housing in Cherwell be allowed to meet Oxford's needs be supported by additional employment generating development, that again doesn't stand up to scrutiny. (cont...)

PR-A-069 R James

16 (cont...) The transport system in Kidlington simply cannot cope with more cars. Currently the roads are backed up for 2-3 hours per morning with incoming traffic getting through to Oxford and the A34. It is ridiculous to think the area should be expanded in terms of housing and development as the roads cannot cope with more traffic.

Further the addition of the train station is going to add to the road issues for the foreseeable future. Without building any extra homes, there is going to be more people trying to get through Kidlington in rush hours. Therefore it is imperative that clear, strategic thinking is used to consider what the local area needs. (cont...)

PR-A-069 R James

22 (cont...) Kidlington's green belt needs protecting desperately. With the new train station massive erosion has been achieved in the boundaries between Oxford and Kidlington. Gosford is under severe threat of now being urbanised, and as we have severe flood issues in the village and area, this is madness.

The reason Oxfordshire has been such a pleasant county to live in is because it has greenbelt and spaces between urban conurbations. The ill conceived developments around Barton and Peartree are going to ruin Oxford's charm; as a Kidlington resident, I know very well that part of the village's appeal is precisely that – it is a village, with greenbelt around it.

We do not want or need excess housing, particularly if it is not linked to social need and sustainable, green development initiatives.

I urge further detailed and intelligent consideration of Kidlington's future by everyone involved in this process.

PR-A-070 Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	1	<p>The 2014 Oxfordshire Strategic Housing Market Assessment (SHMA), which covers the five Oxfordshire Authorities (Cherwell District, Oxford City, the Vale of White Horse District, South Oxfordshire District and West Oxfordshire District) considers that the objectively assessed need (OAN) for Oxford City is between 1,200 and 1,600 dwellings per annum. The Issues consultation document suggests that it is appropriate to consider the mid-point of this range as the objectively assessed housing need, which equates to 28,000 dwellings across the Plan Period to 2031.</p> <p>However, Paragraph 47 of the National Planning Policy Framework (NPPF) requires local planning authorities to ‘boost significantly’ the supply of housing. In this context, it is considered that the upper limits identified within the SHMA should be considered as appropriate, rather than the mid-point. In this context, Oxford City should be providing 1,600 dwellings per annum to 2031, which equates to a housing target of 32,000 dwellings across the Plan Period.</p> <p>It has been agreed by the five Oxfordshire Authorities that the ‘working assumption’ of Oxford City’s unmet housing need is 15,000 dwellings. However, Oxford City’s Strategic Housing Market Assessment (SHLAA) only identifies a supply of 10,212 dwellings, including completions since 2011, windfalls, student accommodation, C2 units and SHLAA sites. Even against an overall target of 28,000 dwellings, this leaves a shortfall of 2,788 dwellings. Against a target of 32,000 dwellings (based on the SHMA upper limit), there would be a shortfall of 6,788 dwellings. As such, it is not considered that the Oxfordshire Authorities are planning to meet the objectively assessed housing need of the whole housing market area, in accordance with the second bullet point of Paragraph 47 of the NPPF. (cont...)</p>
PR-A-070 Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	1	<p>(cont...) Based on the ‘working assumption’ of Oxford City’s unmet housing need of 15,000 dwellings, Cherwell District are proposing to consider accommodating 3,500 dwellings of the unmet housing need as a starting point. This has derived from an assumption that each of the five Oxfordshire Authorities will accommodate an equal proportion of Oxford City’s unmet housing need (i.e. 3,000 dwellings). However, this assumes that Oxford City will be contributing 3,000 dwellings of their own unmet housing need, which is illogical. Rather, the City’s unmet housing need should be split between the remaining four Oxfordshire Authorities, which provides a starting point of 3,750 dwellings per authority, assuming an equal split. The figure rises to 4,447 if Oxford City’s full target of 28,000 dwellings is to be accounted for; and 5,447 dwellings per authority if Oxford City’s upper housing target is considered. Table provided in representation.</p>
PR-A-070 Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	1	<p>(cont...) Cherwell have proposed to increase their 3,000 starting point by 500 dwellings to 3,500 dwellings in case the county wide housing need increases, or to take account of differences between the sustainability options of each authority in meeting the unmet need. However, it is not considered that this uplift goes far enough. Indeed, whilst it is acknowledged that Cherwell is partly constrained by Green Belt to the south, the three other authorities surrounding Oxford City are also constrained by Green Belt. In addition, large areas of the Vale of White Horse, West Oxfordshire and South Oxfordshire Districts are also covered by Areas of Outstanding Natural Beauty (the Cotswolds, the Chiltern Hills and the North Wessex Downs), further constraining their ability to accommodate unmet housing need from Oxford City. Of the four authorities, Cherwell is considered to be the least constrained, and therefore capable of accommodating more of Oxford City’s unmet housing need.</p> <p>Given the above, it is considered that 3,500 dwellings is not an appropriate ‘working assumption’ for the amount of Oxford City’s unmet housing need which is likely to need to be accommodated within Cherwell District. This figure needs to be increased, as it is not considered that it is in accordance with Paragraph 47 of the NPPF, either in its aspirations to boost significantly the supply of housing, or to ensure that the full objectively assessed housing needs of the full housing market area are met. (cont...)</p>

PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	1	<p>(cont...) In addition to meeting the unmet housing need arising from Oxford City, consideration should also be afforded to how Oxfordshire, and in particular Cherwell District might be required to assist in meeting the unmet housing need arising from London. The London Plan (March 2015) outlines a requirement for 49,000 dwellings per annum to be delivered across the city. However, the Plan only makes provision for the delivery of 42,000 dwellings per annum. This leaves a significant residual shortfall. It is clear that the South East authorities will need to contribute towards meeting this shortfall, however the distribution is currently unknown.</p> <p>In March 2014, the GLA wrote to Bedford Borough Council, advising that there is likely to be a 'gap' between the demand and supply of housing in London. As a result, the letter advised that "Planning authorities in the wider South East with housing markets that are influenced by that of London are strongly advised to take account of these uncertainties when addressing National Planning Policy Framework Paragraph 47. This requires authorities to boost significantly the supply of housing by using their evidence base to ensure that their local plan meets full objectively assessed needs." (cont...)</p>
PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	1	<p>(cont...) Cherwell District is well placed to meet some of the unmet housing need arising from London, particularly given the excellent transport links to the city, including a regular direct train service from Banbury which takes approximately one hour.</p> <p>Given that Cherwell need to review their Local Plan to accommodate some of the unmet housing need of Oxford City, it is also considered a good opportunity to afford consideration as to how Cherwell District might assist in accommodating some of the unmet housing need arising from London.</p>
PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	6	<p>The land surrounding Oxford City is Green Belt. As detailed above, this Green Belt extends into all of the four surrounding Districts. The Oxfordshire Growth Board published a Green Belt Study to understand whether Oxford City's unmet need can be met within the surrounding Green Belt.</p> <p>The potential of a number of parcels of land for release from the Green Belt to accommodate Oxford City's unmet housing need were considered against the five purposes of the Green Belt. The Study does not make any recommendations regarding the suitability of individual parcels for release from the Green Belt.</p> <p>The adopted Cherwell Local Plan (July 2015) identifies Banbury and Bicester as the most sustainable settlements and the focus for new growth across the Plan Period. Whilst Kidlington is identified as an urban area within the Local Plan, it is also identified as one of 16 Category A Villages. As such, it is considered to be a less sustainable location for new development than Banbury or Bicester. (cont...)</p>
PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	6	<p>(cont...) Given that the settlements which are identified as the most sustainable within the District are located further away from Oxford City, it is not considered that the 'area of search' should be constrained geographically to the area closest to Oxford City.</p> <p>The more sustainable settlements within Cherwell District are well related to Oxford City in terms of connectivity. There are regular bus and rail services connecting Banbury with Oxford City Centre. Most train services take less than 20 minutes. Banbury is located close to Junction 11 of the M40 allowing convenient access to Oxford City's park and ride schemes.</p>

PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	8	<p>It is considered that a District wide approach to reviewing appropriate locations for accommodating Oxford City's growth would be the most appropriate approach.</p> <p>As detailed in our response to Question 6, the most sustainable settlements within the District are not necessarily the closest to Oxford City spatially. However, Banbury in particular is closely linked through the highway and public transport networks. The adopted Cherwell Local Plan identifies that the majority of new development across the Plan Period will be directed to Banbury and Bicester. Given that this is the adopted strategy for Cherwell District, it is considered that any additional development required to meet Oxford City's unmet housing need is accommodated in accordance with this.</p> <p>Paragraph 17 of the NPPF sets out 12 Core Planning Principles, including encouraging the redevelopment of brownfield land over greenfield sites. This principle is also advocated within the adopted Cherwell Local Plan. The Government have made it clear that brownfield regeneration will be a priority in delivering new homes, and in a Statement released on 10th March 2016, Communities Secretary Greg Clark urged Councils to continue to offer up brownfield sites to deliver new homes. (cont...)</p>
PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	8	<p>(cont...) It is noted that Cherwell District is one of 15 Authorities taking part in the 'brownfield register' pilot scheme, which will assist in the redevelopment of brownfield sites. The 15 Authorities have been chosen because they have the most brownfield land in England.</p> <p>Given the emphasis on brownfield sites delivering housing need, particularly within Cherwell District, and the significant availability of brownfield land within the District, it is considered that there should be a focus on utilising this brownfield land to deliver the additional housing growth required to accommodate Oxford City's unmet housing need.</p>
PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	9	<p>Whilst a District wide approach to reviewing appropriate locations for accommodating Oxford City's growth would be the most appropriate, this needs to be considered in the context of the spatial strategy for the District set out within the adopted Local Plan, as well as the principles of brownfield redevelopment established at both a national and local level.</p> <p>As detailed in our response to Question 8, a District wide to the 'area of search' is supported. However, this needs to be considered in the context of the spatial strategy for the District established within the adopted Local Plan, which seeks to direct the majority of new housing growth to the more sustainable settlements of Banbury and Bicester. Given this established strategy for growth, it is not appropriate to consider an area of search based solely on the Oxford Green Belt.</p>
PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	15	<p>It is not considered that options for meeting Oxford City's unmet housing need should rely solely strategic allocations of a significant size. By distributing the required growth across the most sustainable locations within the District, any adverse impacts of accommodating this growth on the environment and local services and infrastructure will also be more evenly distributed.</p> <p>In terms of locations for growth, as detailed above, sustainable locations within and adjacent to Banbury should be considered, given that it is identified as one of the two most sustainable settlements within the District with good public transport links to Oxford City.</p> <p>Land at Southam Road, Banbury has been submitted to the Call for Sites consultation as a suitable location for meeting some of the additional growth required. The Call for Sites submission demonstrates that the Site is sustainable, available and deliverable and as such, offers a practical solution to meeting some of Oxford City's unmet housing need.</p>
PR-A-070	Barton Willmore / Hundred Percent Hella and Orbit Homes (2020) Ltd	28	<p>Site submission - Land at Southam Road, Banbury</p>

PR-A-071 Pegasus Group / Richborough Estates	1	<p>As noted in Paragraph 2.16 of the Issues Consultation document an agreed figure of 15,000 dwellings is the level of need that cannot presently be met by Oxford City Council. Distributing these evenly between the five authorities in the Oxfordshire Housing Market Area would give a figure of 3,000.</p> <p>Paragraph 2.17 notes that this figure may potentially increase for the rural districts if Oxford's contribution were to be less than 3,000. This is considered to be highly probable given the environmental constraints within Oxford City's administrative boundary (namely the significant wealth of heritage assets and flood plain) coupled with the Green Belt surrounding the City, all of which limit the availability of both urban and rural housing land.</p> <p>The 3,500 homes for Cherwell is therefore likely to be a conservative estimate, given that much of Cherwell District lies beyond the Green Belt, has good connectivity with Oxford and beyond, and opportunities exist for allocating sites to assist in meeting Oxford's unmet housing need.</p>
PR-A-071 Pegasus Group / Richborough Estates	3	<p>Key issues for Oxford are considered to be the protection and enhancement of the built and natural environment, and in particular the retention of the historic setting and form of the City, which contributes to its special character. Allied to this is the scarcity of previously developed land within the City's administrative boundaries, which limits the capacity of the City in making a significant contribution to meeting unmet housing need.</p> <p>In addition the designation of some 27% Oxford's area as Green Belt also limits housing opportunities and thus consideration should be given to the issue of the extent to which land performs against the purposes of Green Belts, as set out in paragraph 80 of the National Planning Policy Framework (NPPF). Regard should therefore be had to the 'Oxford Green Belt Study' of October 2015. However, in helping to meet development requirements it is likely that the amount of land where exceptional circumstances can be demonstrated to justify a release from the Green Belt may be limited.</p> <p>These issues highlight the need to consider opportunities for housing growth in the administrative areas adjoining Oxford and in particular the need to consider areas beyond the Green Belt.</p>
PR-A-071 Pegasus Group / Richborough Estates	6	<p>It is noted that distance / proximity to Oxford (e.g. the southern part of Cherwell or an area close to the City) is highlighted in paragraph 4.8 of the Issues Consultation document as one of the factors that might help define an 'area of search'.</p> <p>This approach is supported, especially given that the southern part of Cherwell District has a more direct relationship with Oxford than other parts of the District. The more removed housing land is from Oxford the more likely it is that distances travelled will increase, meaning less sustainable locations and a greater contribution to climate change. (cont....)</p>
PR-A-071 Pegasus Group / Richborough Estates	6	<p>(cont...) Launton is a village lying to the east of Bicester, just on the other side of the A4421. It is a sustainable settlement located in the Southern part of Cherwell District, outside the Green Belt and only 15 miles from Oxford. The sustainability of Launton and its suitability to deliver housing has been recognised through the fact that the Cherwell Local Plan Part 1 defines it as a Category A village, which are to contribute 750 homes towards meeting Cherwell's housing requirements.</p> <p>It is therefore considered that it may be more appropriate to focus the 'area of search' on the southern part of Cherwell District, encompassing the village of Launton. Furthermore, land at Grange Farm, Launton is entirely suitable as a Local Plan Part 2 housing allocation and the benefits of this site are set out further under Question 28.</p>

PR-A-071	Pegasus Group / Richborough Estates	7	<p>As has been explained above the 'area of search' or plan area may be more appropriately focused on the southern part of Cherwell District. Consideration should be given to a range of economic, social and environmental factors in determining the 'area of search'. Examples of factors that might help define an 'area of search' are set out in paragraph 4.8 of the Issues Consultation, and these are considered appropriate.</p> <p>Particular attention is drawn to the factors of distance /proximity to Oxford, key transport corridors and the Cherwell settlement hierarchy. It is contended that Launton, as Category A village, close to the A4421 and located 15 miles from Oxford, should fall within this 'area of search'.</p>
PR-A-071	Pegasus Group / Richborough Estates	8	<p>As it is considered that the southern area of the District may be more appropriate for the 'area of search', a district-wide area may be less suitable. The area in the south of the district is better related to Oxford, whilst the northern area relates more to Banbury and would be less sustainable in meeting the housing needs of Oxford.</p>
PR-A-071	Pegasus Group / Richborough Estates	9	<p>Approximately 14% of Cherwell District lies within the Oxford Green Belt and thus ample opportunities exist for areas beyond the Green Belt to serve some of Oxford's unmet housing need. Therefore, whilst it is considered that areas within the Green Belt should be taken account of, it is also considered that the 'area of search' should not exclusively focus on the Oxford Green Belt. By definition these Green belt areas will no doubt be subject to constraint and therefore less suitable for development.</p>
PR-A-071	Pegasus Group / Richborough Estates	15	<p>The Council should be considering locations within or on the edge of sustainable settlements for the identification of strategic housing sites to meet Oxford's unmet needs. In particular the settlement hierarchy of the Cherwell Local Plan Part 1 should be utilised to inform this process, with locations at Category A Villages being considered; Launton being one such village.</p>
PR-A-071	Pegasus Group / Richborough Estates	28	<p>Site submission - Land at Grange Farm, Launton.</p>
PR-A-072	Brown & Co / Mr H.R.N Stilgoe	28	<p>Site submissions - Land at South Adderbury; Land at Berry Hill Road, Adderbury</p>
PR-A-073	A Lodwick	1	<p>No. It is based on the Oxfordshire SHMA which is a flawed document fatally compromised by the conflicts of interest of the private consultants (GL Hearn and SQW) who produced it. It has been widely criticised and you should take this into account including the evidence presented to you by a respected planning consultant (Prof Wenban-Smith).</p> <p>The SHMA figures for Oxford's needs are based on many dubious assumptions as I and others pointed out at the Cherwell EiP. They have not been included in any Oxford plan let alone tested at an EiP. They should not be used as the basis for reviewing Cherwell's Local Plan.</p> <p>This review provides an opportunity to correct the biases in the 2014 SHMA. You should undertake an independent review of the SHMA and its underlying employment forecasts by an organisation which is not compromised by its links to the development industry and the LEP.</p> <p>You should not add any further requirement to the already excessive figure of 22,700 homes. It will make it even more difficult for you to demonstrate a 5 year housing supply with the resulting damage to Cherwell's environment as speculative applications are permitted on appeal.</p>

- PR-A-073 A Lodwick 2 No. The employment generating development already proposed (or permitted) at Langford Lane, Kidlington, at Begbroke Science Park and just over the District boundary at the so-called Northern Gateway is already excessive. It is unlikely that there will be sufficient demand for the “high-tech” science-based industries sought given that there is already vacant development land and premises elsewhere around Oxford. The result will either be an over provision of land and/or the encouragement of lower-value businesses which is the opposite of what you are seeking to achieve.
- In addition, the hypothetical housing needs are themselves based on exaggerated forecasts of employment growth, which again, as was argued at your EiP, are unrealistic and based on the aspirations of the LEP. To provide for yet more employment generating development will simply fuel an unsustainable vicious circle.
- PR-A-073 A Lodwick 3 The City Council is encouraging employment generating developments, such as the Northern Gateway for which the demand is not proven and then using such developments to fuel demand for housing and house prices (which it then complains about!).
- The City Council is incapable of providing any rational analysis or forecasts of the outcomes of its expansionist policies. A separate, democratically accountable and independent, strategic planning body with the necessary expertise should be established for the County.
- Growth should be diverted away from the City. For example, Oxford Brookes University could be gradually located to Bicester. This would both benefit Bicester, the University and Oxford. Oxfordshire should consider economic twinning with specific locations in regions which would particularly benefit from growth and where land is available and housing less expensive. The availability of high speed internet links makes it more feasible than ever for businesses – particularly those in the knowledge and ‘high-tech’ sectors - to operate at geographically dispersed locations.
- PR-A-073 A Lodwick 6 No. Growth in general should be directed away from Oxford both within and beyond the County as argued under Q3.
- PR-A-073 A Lodwick 9 No.
 Planning guidance makes clear that
 - Green Belt should be permanent
 - housing and economic needs do not override constraints on the use of land, such as Green Belt. - this may mean that an authority is in fact unable to meet its ‘objectively assessed needs’.
- Cherwell appears to have made no attempt to take into account the effect of the Green Belt (and other constraints) on its ability to provide for ‘objectively assessed need’. The Review of the Local Plan provides an opportunity to put right this shortcoming.
- Furthermore, the Government has made an explicit commitment to protect the Green Belt.
- Green Belt is much valued by local residents, makes an important contribution to the area’s natural capital, and should be improved as an asset in its own right and not built upon. (cont...)
- PR-A-073 A Lodwick 9 (cont...) Paragraph B253 of the Cherwell Local Plan says "The Oxford Green Belt was designated to restrain development pressures which could damage the character of Oxford City and its heritage through increased activity, traffic and the outward sprawl of the urban area." As I said at the EiP I support this statement strongly. Planning policy should therefore seek to direct development away from the city, both within and beyond the county boundaries.
- The recent Green Belt study is therefore fundamentally flawed by ignoring the fact that all land parcels within the Green Belt contribute to the over-riding purpose (in the case of Oxford and similar historic cities) of preserving the setting and character of Oxford. The five purposes are alternatives which apply differently to individual towns and cities. They were never intended to be used for assessing individual parcels of land.

PR-A-073	A Lodwick	16	Transport networks around Oxford are already overstretched. Oxfordshire County Council's statements, particularly with regard to modal shift, are naively (or perhaps) highly over-optimistic. The schemes currently proposed will not even solve existing problems while the additional developments proposed (including the 3500 homes) will make matters much worse. The forecasts apparently being used do not inspire any confidence. For example it became clear at the Northern Gateway EiP that high figures were being used for employment generation, and then translated into high forecasts of housing need, while very much lower figures were being used for forecasting travel demand. Again this review presents an opportunity to re-visit these inconsistent and excessive forecasts and scale back the level of proposed development.
PR-A-073	A Lodwick	24	Finding sites for a further 3500 houses in addition to the excessive number already included in the Local Plan will further damage the natural environment of Cherwell and its natural capital, of which the Green Belt is a major component.
PR-A-074	JPPC / Tripartite and University of Oxford	1	It is regrettable that the work which has been undertaken by the Councils and the Oxfordshire Growth Board so far has not progressed sufficiently to enable a clearer view of Oxford's unmet housing need to be identified compared with the Strategic Housing Market Assessment (SHMA) requirements. In the absence of an agreed figure, Oxford City Council has indicated that there would be capacity in the City for some 10,212 homes (2011/12 to 2030/31). The mid-point figure for Oxford in the SHMA, indicates that there is an unmet need for a further 17,788 homes (10,212- 28,000). (cont...)
PR-A-074	JPPC / Tripartite and University of Oxford	1	(cont...) Currently, Cherwell and Vale of White Horse Districts are proposing to meet their own objectively assessed housing needs (OAN) set out in the SHMA while the position in West Oxfordshire is that the SHMA figures have not been accepted (this is currently the subject of a suspended Examination into the Local Plan where the Inspector has asked the Council to review its proposed housing provision). The South Oxfordshire position is unclear. We support the Council in seeking to make provision for the unmet housing need. However, whilst we support moving forward as soon as possible (given the extent of unmet housing need), and hence the need for some working figure, the Council should consider this in the context of the lowest level of provision which should be accommodated rather than as a ceiling figure.
PR-A-074	JPPC / Tripartite and University of Oxford	2	The NPPF makes clear that LPAs should "proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth". Paragraph 158 in the NPPF sets out that evidence and strategies for housing and employment in local plans should align with one another.
PR-A-074	JPPC / Tripartite and University of Oxford	2	The housing forecast of the SHMA takes into account the need to provide for employment growth. Consequently, (cont...) I have noted in the introduction above that there is a need to provide for additional employment space at Begbroke Science Park both in relation to the needs which would arise up to 2031(see the comments in respect of Local Plan Part 2) but also for those beyond the plan period. The provision of housing close to the Science Park for both key worker housing and to meet general housing needs would ensure an integrated development where the need to travel could be minimised and where provision is able to be explored which could include park and ride facilities which are both car and railway based. Begbroke Science Park has been successful in supporting and encouraging close links between academic research and industry and the University sees that role continuing. The draft Masterplan which has been produced shows how land could be made available in the future associated with the Science Park. This could provide both for the needs up to 2031 (as part of the limited green belt review in the Part 2 Local Plan) as well as safeguarding land outside the green belt for the longer term.

PR-A-074	JPPC / Tripartite and University of Oxford	3	<p>This question is oddly juxtaposed against comments included in the currently adopted Oxford Core Strategy. It is clear that the City is unable to accommodate all of the housing required to meet its OAN because of significant constraints as a consequence of flood areas; historic assets including listed buildings, conservation areas, and scheduled monuments and their settings; open areas which contribute significantly to the character of the City; and nature conservation assets.</p> <p>However, it is clear that in order to meet the unmet need for homes which cannot be accommodated in Oxford, there needs to be a measure of proximity to the City, which continues to be a provider of major employment in the county. (cont...)</p>
PR-A-074	JPPC / Tripartite and University of Oxford	3	<p>(cont...) It will be recalled that at the first session of the Examination of the draft Local Plan the Council instructed Montagu Evans to produce a report and this highlighted the likely market saturation which would occur with further housing developments in Banbury and Bicester. It also indicated that development would therefore need to occur more appropriately closer to Oxford. In the event, additional allocations have been made at Banbury, Bicester and Upper Heyford.</p> <p>Locations closer to Oxford are also likely to be more accessible to the City, minimising the impacts on the highway network.</p>
PR-A-074	JPPC / Tripartite and University of Oxford	4	<p>It is clear that in order to meet Oxford's unmet needs, the new homes should be well-related to the City (see comments above), the transport network and employment.</p> <p>The aims should be to create a place that is sustainable, provides for the community's needs for homes, that is long lasting and ambitious, offers a high quality of life, promotes healthy living and has access to employment opportunities, facilities and services nearby.</p> <p>It should foster research and development which would succeed in boosting the local economy both now and in the long term. (cont...)</p>
PR-A-074	JPPC / Tripartite and University of Oxford	4	<p>(cont...) The development required to meet those unmet needs should provide for affordable homes of a number of types and tenures which includes key worker housing. It should include provision for transport links into and out of Oxford which encourage other transport modes than car and explore whether provision is able to be made for a new station which could serve both the development and existing housing and employment areas.</p> <p>Lastly, new development should promote healthy living with green spaces, cycle and pedestrian networks with the aim to promote high standards of environmental sustainability.</p>
PR-A-074	JPPC / Tripartite and University of Oxford	16	<p>Good accessibility is essential for the University's continued success and position at the pinnacle of global academic achievement. Staff need to be able to commute and travel for business within and around the City easily and conveniently in a timely fashion. Many staff live outside the ring road and a large proportion within Cherwell District. This figure may increase as lack of affordable housing pushes staff out of the City and so good quality transport choices from outlying areas, especially Kidlington, Yarnton and Bicester are essential. Unfortunately transport is increasingly cited as a barrier to recruitment and retention of staff.</p> <p>Set against this context the University strongly requests that the Local Plan considers transport as a key factor in the location of new housing and employment developments, locating them as near to the City's boundary as possible and at new or existing public transport hubs to enable public transport and cycling to replace car borne trips. The alternative of dispersed housing at distance from Oxford generating car borne trips does not bear contemplation in terms of the negative impacts on congestion, carbon and air quality. (cont...)</p>

PR-A-074 JPPC / Tripartite and University of Oxford

16

(cont...) The University wishes to emphasise the potential for transport accessibility from settlements in the South of Cherwell, especially Yarnton and Kidlington, into Oxford to be transformed through development of employment and housing at the Begbroke Science Park. Firstly, this would facilitate the goals of the Local Plan to accommodate Oxford's housing needs on the periphery of the City within easy access of Oxford's employment sites by sustainable transport modes. Secondly, by improving the quality and availability of public transport options this will help resolve some of the chronic congestion caused by car-borne commuter trips. This is especially relevant for Cherwell District as the second highest source of inbound commuters into Oxford.

Specifically, as part of the Begbroke Science Park Masterplan for the University aspires to:

- Deliver a Park & Ride at Begbroke. The University supports the Highway Authority's plans to deliver additional park & ride sites within Cherwell to reduce the number of car trips into Oxford and has made representations for Begbroke Science Park to be assessed as a potential site. Given its proximity to the A44 corridor the site would intercept traffic coming from the North of Oxford and accommodate a park & ride in an appropriate setting, also serving an existing centre of employment. The improved connectivity to the Centre of Oxford would also enable business travel between the University's Science Area in Oxford and Begbroke, promoting economic growth and interaction on the knowledge spine between business and academia, enabling the commercialisation of academic research via spin-out start-up businesses based at the Science Park. The University would like to see this recognised in the Local Plan revision. (cont...)

PR-A-074 JPPC / Tripartite and University of Oxford

16

(cont...) - Facilitate the delivery of Mass Transit on the A44 through the Begbroke Science Park via the travel demand generated by the fully built-out Masterplan which envisages up to 6,000 employees and 1,500 homes on-site in 2036. Public transport provision on the A44 needs to be improved to meet the requirements in the NPPF and the Local Plan for development to be located in areas that are or can be served by quality sustainable transport choices. This concentration of demand at Begbroke Science Park would enable the provision of high speed, high frequency mass transit services by the commercial bus operators that is needed to achieve a sustainable transport system connecting South Cherwell with Oxford. Located on a bus corridor the Begbroke Science Park Masterplan has the critical mass to sustain commercial bus services without the need for public subsidies.

- Implement a new railway station at Begbroke on the existing London-Oxford-Banbury-Birmingham mainline. This will include a station park & ride and has huge potential to meet travel demand generated by the Local Plan's housing needs in a sustainable location which would also serve the large settlement of Kidlington.
- Upgrade traffic-free cycle routes into the city centre.

PR-A-074 JPPC / Tripartite and University of Oxford

17

Begbroke Science Park scores very highly in terms of transport as a potential development location to meet Oxford's unmet needs. Given its location within 6 miles of the City centre, its proximity to the major existing bus corridor into Oxford and proposals to directly connect into the existing Oxford - Banbury rail corridor via a new station it can connect its residents and workers to Oxford, Banbury and other local centres via short bus and rail journeys. Crucially, the provision of office space for up to 6,000 employees, 1,500 homes and a large park & ride means the location will possess the passenger volume to justify commercial bus and rail operators to commence frequent and rapid services via Begbroke to and from Oxford. With the withdrawal of bus subsidies by Highways Authorities and the reduction in Bus Operators Service Grant by Central Government, possessing the critical mass of demand to justify commercial investment in mass transit is an essential pre-requisite for strong and long-lasting public transport alternatives to the car. (cont...)

PR-A-074	JPPC / Tripartite and University of Oxford	17	<p>(cont...) Furthermore with the advent of quality, low cost electric bikes Begbroke Science Park lies within a 30 minute cycle ride of Central Oxford, presenting an enviable and more reliable journey-time compared to the car. An electric bike station, part of the Oxon bike automated bike sharing scheme is being delivered at the time of writing. The Canal towpath presents an underutilised resource that could be developed as improved green infrastructure to connect the location into Oxford by bike.</p> <p>Taken as a whole, the high potential for sustainable transport accessibility at Begbroke presents a sustainable location for the housing and employment development that Cherwell and Oxford require to unlock their potential for low carbon economic growth.</p>
PR-A-074	JPPC / Tripartite and University of Oxford	20	<p>Economic Issues and how these would affect the potential development locations Paragraph 5.105 of the Issues Consultation sets out the reasons provided for the changes to the green belt agreed at the Northern Gateway. The broad issues are not dissimilar as to why the land around Begbroke Science Park represents an appropriate location to meet Oxford's unmet housing needs: employment exists at the Science Park and it would be expanded to meet economic imperatives, new housing nearby would assist in affordability and include key worker housing (reducing the need for travel outside), the site is able to be brought forward by landowners who have a long standing relationship and shared goals, and the site has good accessibility and the prospect of improving transport infrastructure.</p> <p>While Begbroke Science Park is being considered in the context of the Part 2 Local Plan, it is essential to consider the longer term growth prospects and the ability of the land around it to contribute to economic growth in the District beyond the current plan period unencumbered by green belt constraints. (cont...)</p>
PR-A-074	JPPC / Tripartite and University of Oxford	20	<p>(cont...) Getting transport and access right is central to successfully delivering low carbon economic growth. Unlocking accessibility by locating development in the right place where trips can be made by sustainable modes through new or existing hubs will support and enable economic growth. Given the very large numbers of Cherwell residents commuting into Oxford for work the Local Plan should locate new development at sites which can capture commuter car trips originating in Cherwell before they reach the City at Park & Ride hubs where they can seamlessly transition to the final leg into Oxford by bus and rail.</p> <p>To deal adequately with the volume of existing and likely trips generated by the scale of development in Oxfordshire, new hubs will be required in Cherwell. Begbroke Science Park is a very strong contender to site a new transport hub. As discussed in Q16 and Q17 the University proposes to host a new Park & Ride, new railway station and route mass transit via the site through the Masterplan which envisages 6,000 jobs and 1,500 homes by 2036. The site is appropriate to meet Oxford's unmet housing needs, would assist in meeting economic goals and would be located on main transport corridors and would be able to assist in delivering transport improvements.</p>
PR-A-074	JPPC / Tripartite and University of Oxford	28	<p>Site submission - Begbroke Science Park. These representations are accompanied by a draft Masterplan for the site. The Masterplan incorporates that proposed in respect of the Part 2 Local Plan and shows how the overall development would be able to be accommodated acceptably. The Masterplan is in draft format only at this stage and further discussions with the Council and other stakeholders would be welcomed.</p>

PR-A-074 JPPC / Tripartite and University of Oxford 6-9

The area of search needs to be well-related to Oxford as the need arises from its own unmet need for new homes. Such a relationship would also seek to avoid longer distance commuting in and out of Oxford due to the significant employment provision in the City.

A number of factors are suggested in paragraph 4.8 of the Issues Consultation. Of those set out land at and around Begbroke Science Park has the advantage of being on a key transport route with opportunity to explore the provision of a station which could serve the new development and Kidlington. It is off A44 which is a premium route for public transport.

The site is occupied in part by the Begbroke Science Park which is operated by the University and which has close connections with the University's educational, academic and research work in Oxford. The expansion of the Science Park has been accepted in the Local Plan Part 1 and a limited review of the green belt is to be undertaken. The site offers the opportunity to co-locate housing and employment, which would have advantages in potentially reducing commuting by private car. (cont...)

PR-A-074 JPPC / Tripartite and University of Oxford 6-9

(cont...) The site is on the edge of Kidlington which is the largest settlement outside the towns in the district with a higher level of services and facilities. Infrastructure improvements could assist those living in the village, for example by providing access to a new station on the railway line which runs to the west of Kidlington and park and ride facilities off A44 to reduce the number of private cars travelling into Oxford and intercept them at an earlier point on the transport network.

The green belt itself is too wide an area of search and any new development would be more appropriately located close to existing settlements in the Kidlington, Begbroke and Yarnton area close to main existing transport infrastructure (and in which respect improvements can be provided). In this location, there would be least impact on the purposes of the green belt.

It is acknowledged that the NPPF indicates that green belt boundaries should only be altered in exceptional circumstances. The scale of the unmet housing need and the social and economic problems which would arise by not making provision close to Oxford provide an exceptional reason to review the green belt on a strategic basis. It has endured for many years without any significant change and we believe that there is broad support for such a review to be undertaken. A local plan review is the appropriate mechanism for such a review of the green belt. (cont...)

PR-A-074 JPPC / Tripartite and University of Oxford 6-9

(cont..) We note that reference is made to the Green Belt Study undertaken by LUC on behalf of the Oxfordshire Councils. The Study was undertaken at high level and includes broad parcels of land, some of which have different characteristics but are assessed in a composite fashion. In addition to this, Turley undertook a high level review on behalf of Oxford City Council. The studies indicate that the Begbroke area makes a limited contribution to some of the green belt purposes and it is therefore appropriate that this area be considered further alongside other constraints and opportunities to accommodate part of the needs arising from Oxford.

A more refined study of the green belt will also be required in respect of development options as it is clear that land currently in the green belt would not be so if it did not perform at least one of the purposes of the green belt.

PR-A-074 JPPC / Tripartite and University of Oxford 10+11

The partial review will form a separate planning strategy which seeks to meet Oxford's unmet housing needs and should not therefore impinge on the existing strategy included in the Local Plan. It would be able to be provided with its own proposed housing trajectory and monitored separately.

Whilst the NPPF does not make provision for ring fencing any particular area of a district, it has been used successfully in, for example, South Oxfordshire, where it has received the support of planning inspectors on appeals.

PR-A-074	JPPC / Tripartite and University of Oxford	12+13	<p>It is imperative that Oxford's unmet housing needs are met as the lack of an adequate housing supply is causing social, economic and environmental stress in the City. The University seeks to attract the best students and researchers worldwide but has difficulties in doing so because of the affordability problems associated with the lack of housing. Other employers have similarly reported recruitment problems (Oxford was recently noted as having the least affordable housing market outside London). We note the references to Kidlington, Begbroke, and Yarnton in the text (paragraphs 5.25 to 5.29 and 5.35). Whilst the text notes the green belt, it highlights the many advantages of the area to accommodate new housing due to</p> <ul style="list-style-type: none"> - the role of Kidlington as an employment and service centre, - the London-Oxford Airport - Yarnton and Begbroke as category A (more sustainable) villages - The importance of Begbroke Science Park as a centre for research, business and academic work where the Part 1 Local Plan already includes a limited green belt review <p>However, it does not recognise the transport corridors to which the area is related which include the railway, canal and A44 as well as the good public transport links.</p>
PR-A-074	JPPC / Tripartite and University of Oxford	14+15	<p>Reference to the aims and objectives is described above.</p> <p>The Council should consider the area around Begbroke Science Park as a suitable location in which to meet Oxford's unmet housing needs. A draft Masterplan has been prepared which is attached to these representations and which is formally submitted for inclusion in the Council's "call for sites".</p> <p>The draft Masterplan builds on the submission made for the limited review of the green belt and the opportunities which the development would bring are set out in the text accompanying the Masterplan.</p>
PR-A-074	JPPC / Tripartite and University of Oxford	18+19	<p>Infrastructure delivery is essential to support new development as made clear in the NPPF. The dispersal of development makes infrastructure delivery more difficult and fragmented whilst concentration in larger scale developments provides the opportunity for focussed delivery of all necessary infrastructure to serve the new development. In the case of the Tripartite land, the development would be of a scale to support all necessary infrastructure and to assist in the delivery of infrastructure which would not only be required to serve the development but which would have a wider public benefit (see Q16 and 17 above).</p>
PR-A-074	JPPC / Tripartite and University of Oxford	22+23	<p>The University considers that the key sustainability issue of air quality relates primarily to transport, which in turn is directly influenced by the location of development. Current air quality in Oxford is poor and exceeds permitted European legal standards predominantly due to emissions from motor vehicles. Some of this poor air quality can be resolved through technology and the University is supporting the transition to Ultra Low Emission Vehicles. However, the largest improvement to air quality with co-benefits for carbon reduction and active lifestyles would derive from modal shift away from the car through correctly locating new development in the right place. This can best be realised through new public transport hubs such as that proposed in the Begbroke Science Park Masterplan with the combined bus and rail Park & Ride enabling a shift from car borne trips into the City of Oxford.</p>
PR-A-074	JPPC / Tripartite and University of Oxford	24+25	<p>As paragraph 5.137 of the Issues Consultation notes, a balanced view has to be taken between environmental constraints and the need for development. In the case of Begbroke, the land is not subject to any specific designation in respect of the landscape, habitats or protected species. It is a relatively flat landscape used for farming, part of which is subject to flooding (and which the Masterplan protects). As well as being subject to flooding the soil is medium quality with underlying gravel which limits its capability for viable crop production.</p> <p>The Masterplan includes reference to biodiversity from the University's ecologists, BSG Ecology, who have been involved with the land for a long period. The ecologists conclude that a net gain in biodiversity is able to be achieved with the proposed development of the site.</p>

PR-A-074	JPPC / Tripartite and University of Oxford	26+27	<p>The farmhouse at the Science Park is listed grade II. It is within the existing science park development and has a number of former barns which have been converted and which are connected to it. The intention is to retain the farmhouse and outbuildings as they are. New development is intended to respect their setting with open landscaped areas nearby. No other aspects of the historic environment would be impacted. Appropriate archaeological investigation would be undertaken in the normal way.</p> <p>However, on the basis of current information there are no known showstoppers which would adversely impact on delivery.</p>
PR-A-075	CPRE Oxfordshire	1	<p>It is essential to consider that the Oxford unmet housing need this revision seeks to accommodate is not current need, or the prospective future need of current residents – which is largely being satisfied within the City - but need which MAY be created by as yet unspecified new companies and jobs, should the LEP forecasts of future growth come to pass.</p> <p>These are in turn hypothesised to arise largely from the commercial realisation of new ideas created at the Universities, so-called spin-offs. The Universities are however not businesses, and there is therefore no reason (as SQW acknowledges) why they must be accommodated in or even near Oxford – or for that matter, in Oxfordshire.</p> <p>In those circumstances, the crude divvying up of this possible future demand amongst the District Councils is supported by no robust evidence of any kind - as to for example where this need will arise and/or where it may be most satisfactorily accommodated. (cont...)</p>
PR-A-075	CPRE Oxfordshire	1	<p>(cont...) CPRE of course considers that the SHMA is overblown, and – despite the length of the GL Hearn report – light on evidence. For that reason it is CPRE’s position that the housing trajectory in the adopted plan already exceeds any likely level of gross demand.</p> <p>However, even taking the SHMA as a given, half of the total housing demand it portrays is a hypothetical assumption about the number of new workers coming to Oxfordshire to take as yet unknown new job opportunities.</p> <p>It is an arbitrary proportion of that unknown level of hypothetical future demand that Cherwell is now seeking to accommodate without any evidence of the extent if any to which Cherwell may be a desirable place to accommodate it.</p> <p>It is not a reasonable working assumption to do so. Given that this is hypothetical future demand, which may or may not arise, at unspecified places and times, the partial revision of the plan is at best premature.</p>
PR-A-075	CPRE Oxfordshire	2	<p>Certainly Not. The extra housing is proposed to satisfy the unmet housing need which might (see Q1) arise from Oxford job creation. Cherwell creating yet more additional employment to “support” those houses would only, if the Oxford unmet housing need is real, compound the problems. If there is a reasonable fear that the houses might be built but the Oxford “unmet need” might not then arise – in our view a very likely scenario – then that is clear evidence to postpone development until the notional Oxford need crystallises.</p> <p>Cherwell’s own jobs need has been accommodated in the current Local Plan.</p>

PR-A-075 CPRE Oxfordshire	3	<p>It is up to Oxford to define and quantify evidentially the nature of its needs and issues, which it should do in connection with its long delayed agreement to update its own Local Plan, not for surrounding Districts to identify them.</p> <p>In CPRE's view a large part of the problem we may now face is to do with Oxford's persistent use of development sites such as the Northern Gateway to ratchet up housing need through more job creation rather than satisfy it through housebuilding, and, where sites are allocated for housing, the inappropriately low densities at which they are built out, given that the greatest part of demand is said to be for low-cost development.</p> <p>Reversing these two flawed policies would allow Oxford to satisfy within its borders, and more sustainably, more of the "unmet need" hypothesised.</p>
PR-A-075 CPRE Oxfordshire	4	<p>The additional growth arises from no Vision by Cherwell, but from imposition by the Growth Board in divvying up Oxford's hypothetical future needs.</p>
PR-A-075 CPRE Oxfordshire	5	<p>It would be indefensible to attempt to post rationalise it through some Vision for Cherwell.</p> <p>A Vision for meeting Oxford's imposed hypothetical future need, which is based on hypothetical realisation of spin-off ideas that have not yet occurred, would be to firstly ensure that meeting it is contemplated only when it crystallises and secondly that it is then met in the most sustainable location, which will not necessarily be Cherwell, or indeed Oxfordshire.</p> <p>There is no reason to assume that the University's spin-offs will be best realised in or near Oxford. Consideration should be given to those areas of the country which have vacant employment land and less expensive housing and which would be very keen to benefit from some of the growth opportunities being generated here. If Oxfordshire were to pursue the idea of economic twinning with some of these areas, this could lead to a win-win solution. (cont...)</p>
PR-A-075 CPRE Oxfordshire	5	<p>(cont...) This would indicate a re-establishment of the County Towns Policy, or even realisation in the Northern Powerhouse, neither of which would affect the success or failure of the as yet unidentified schemes.</p> <p>As far as Cherwell itself is concerned we see no reason to change the current Vision and the Spatial Plan which underpins it, summarised on Page 10 of the adopted Local Plan:</p> <ul style="list-style-type: none"> - Focusing the bulk of the proposed growth in and around Bicester and Banbury - Limiting growth in our rural areas and directing it towards larger and more sustainable villages - Aiming to strictly control development in open countryside. <p>It is against that template that any accommodation of Oxford's hypothetical future unmet need should be determined.</p> <p>This would include for example protection for the whole of the Green Belt as identified in the NPPF.</p>
PR-A-075 CPRE Oxfordshire	6	<p>No. As we have shown in our answer to Question 1, the hypothetical future unmet need in question is not related to the City in the sense that it can only be met there. To the extent that there might be a direct City connection it will only be that the new jobs that might be created might arise from University "spin-offs". These could however be accommodated anywhere and there is no reason at all to suppose that this must be adjacent to or even near the City.</p> <p>To the extent that Cherwell may wish to accommodate them, the existing Spatial Strategy would be the most appropriate model.</p>

PR-A-075 CPRE Oxfordshire	7	<p>Because the new jobs guestimate on which the housing need is hypothecated have not yet been identified, much less realised, it is premature to identify an Area of Search, and since it cannot be known where they would arise if they did eventuate it would be impossible to do so. Neither of course can it be known whether houses would be occupied by the classes of people for whom they were provided.</p> <p>In the lack of any evidence to the contrary, the only basis on which hypothetical distribution could be made, should that be felt to be desirable, would be on the current Spatial Strategy. Even then this could only be provisional until there was some robust evidence of the extent, certainty and location of the future “unmet housing need”.</p> <p>With those very substantial caveats, brownfield sites should be allocated and developed first, and the highest practical density assumptions should be made, given that if anything is certain in the present housing demand figures, it is that low cost housing is needed to balance Oxfordshire’s housing stock.</p>
PR-A-075 CPRE Oxfordshire	8	<p>Yes. The current Spatial Strategy is “District Wide” but correctly identifies areas where growth will and will not be directed. It should be the template. Equally, protected areas, such as Green Belt, should be off-limits.</p>
PR-A-075 CPRE Oxfordshire	9	<p>No. The essence of the Green Belt is its permanence, and the role it plays in preserving the essentially rural character of the County by preventing Oxford sprawl is invaluable. There is no “sustainability” argument for accommodating Oxford’s unmet need within it, for two fundamental reasons:</p> <p>i. The core of sustainability is not taking away from future generations benefits they would otherwise have enjoyed. Eroding the Green Belt would be by definition unsustainable and could be considered only if there were exceptional reasons to do so.</p> <p>The NPPF does not consider that housing need – even if real – is an exceptional circumstance to override the presumption of protecting the Green Belt.</p> <p>ii. There is no sustainability argument for meeting “Oxford’s unmet need” in the Green Belt adjacent to Oxford, as the “need” is not Oxford-related despite the name, but arises from hypothetical future jobs which could be realised anywhere. Even if it were Oxford-related, it could be met outside the Green Belt and should therefore not be met within it. Even if it could not, it should be reduced to the extent it would otherwise have been necessary to use Green Belt land. (cont..)</p>
PR-A-075 CPRE Oxfordshire	9	<p>(cont...) It is worth mentioning at this point that the NPPF does not in fact place any obligation on Councils to review Green Belts at the time of a Local Plan. It states only that IF they are reviewed the Local Plan is the time to do it.</p> <p>Only IF there are exceptional reasons for considering development on a particular piece of Green Belt land should its contribution to Green Belt purposes be assessed in order to determine the balance for release/retention.</p> <p>The Green Belt study by the County is an interesting – though contentious – assessment of Green Belt parcels County wide. It finds no sites that fail to meet at least two of the five Green Belt purposes and “one is enough” to justify retention. The studies by other Districts have been “searches for sites” with no exceptional circumstance relating to them individually, and are thus inadmissible in principle. In any case even they find that all sites contribute to at least two purposes.</p>

PR-A-075 CPRE Oxfordshire	10	<p>Yes and No. Ring-fencing the hypothetical Oxford unmet need would be desirable to protect the District’s general Five Year Supply from its non-realisation. On the other hand if the houses are accommodated within the existing Spatial Strategy as we recommend, it will be hard to show that that element of the forecast has been undershot or exceeded, as it cannot be known which houses have been occupied by whom.</p> <p>In practise this could only perhaps be done by creating a special new settlement or area for ‘unmet need’, which would be to ‘ghettoise’ it. Even then the occupation of the houses could not be controlled. Indeed, even though the houses might be built in Cherwell, the new job holders might choose to live elsewhere.</p>
PR-A-075 CPRE Oxfordshire	11	<p>It is desirable but it is hard to see how it might be achieved in practise.</p> <p>The best strategy would be to delay allocating “unmet need” until its extent, nature and timing, and applicability to Cherwell can be more firmly established.</p> <p>It is understood that the new SEP may “phase” jobs growth which Districts could then phase housing development to match.</p> <p>The upcoming Oxford Plan refresh may alter the numbers and, particularly the extent to which they can and should be accommodated within the City through higher densities and dedication of land to housing rather than jobs growth.</p> <p>Cherwell could seek to influence the Growth Board on which it sits to determine more objectively the locations within which job growth might occur, and then determine any housing that might therefore be needed. (cont...)</p>
PR-A-075 CPRE Oxfordshire	11	<p>(cont...) Indeed the Councils could decide through the Growth Board to reduce the Growth trajectory to something more realistic and the housing demand to levels within the likely capacities of builders.</p>
PR-A-075 CPRE Oxfordshire	12	<p>It is strongly recommended that at the very least “unmet housing need” should be phased to the back ten years of the plan, reflecting more realistically its likely trajectory, and that the other measures to reduce or at least define the growth path should be examined.</p> <p>We generally support the approach in paragraph 5.37 on the assumption that it reflects the strategies in the current plan.</p> <p>Avoidance of use of land presently designated as Green Belt should be made specific.</p>
PR-A-075 CPRE Oxfordshire	13	<p>Housing Densities should be substantially increased to minimise land take and as the only practicable route to providing less expensive/starter housing.</p> <p>Current Policy B102 recognises the need to make efficient use of land but specifies only a minimum density of 30 per hectare which is at the bottom of the PPG3 range of 30-50 and well below, say, very desirable Victorian terraces at 70 per hectare. There is obvious scope for substantially increasing target densities.</p> <p>Failing to do so – because developers generally prefer more profitable low densities, for instance – will mean that a large proportion of new houses will go to new commuters with no connection to the District, whilst the reasonable housing needs of residents will go as unsatisfied as they are today.</p>

PR-A-075	CPRE Oxfordshire	14	<p>As stated above it is premature to begin to recognise an unquantified need at some indeterminate time in the future, and it would be foolhardy to attempt to do so.</p> <p>At such time as the need for extra housing can be robustly identified, and the need for it to be in Cherwell demonstrated, it should be:</p> <ul style="list-style-type: none"> - Allocated in accordance with current spatial strategies in the adopted Local Plan. - Phased in accordance with a demonstrable trajectory of jobs growth. - Recognised that it does not need to be situated near Oxford. - Built out at the highest practical densities to minimise land-take and provide lower cost housing. - Be concentrated on brownfield sites where practicable. - Avoid Green Belt and other designated land.
PR-A-075	CPRE Oxfordshire	15	New housing – when and if better justified – should follow the Spatial Strategy in the adopted Local Plan.
PR-A-075	CPRE Oxfordshire	16	LTP 4 would require review in the light of the increased housing numbers; following the existing Spatial Strategy should minimise the adjustments which might need to be made.
PR-A-075	CPRE Oxfordshire	22	<p>It is inherently unsustainable to build housing over and above the District’s needs and the as yet to be evidenced “unmet housing need”, as this will either lead to empty housing or to a take-up by new commuters, probably to London.</p> <p>It is noted that the NPPF declares sustainability the golden thread running through all its policies and declares that housing development is not a reason for releasing either Green Belt or AONB land. For that reason it is clearly unsustainable to do so. It is also unsustainable in the wider sense that it removes a benefit which future generations would otherwise have enjoyed.</p>
PR-A-075	CPRE Oxfordshire	23	See answer to question 22. For those reasons, the “unmet Oxford need” should not be accommodated until there is more certainty that (a) it is real and (b) has to be met in Cherwell, and in any event development in designated areas such as Green Belt and AONB must be eschewed.
PR-A-075	CPRE Oxfordshire	24	<p>The natural environment of Cherwell District is overwhelmingly rural, and little or no consideration is given to the impact on character of extra housebuilding and, especially, whether there is, as we fear, a tipping point after which industrialisation becomes self-reinforcing. The Council must give consideration to those issues for the benefit of the residents it is its duty to serve as well as for the countryside CPRE is pledged to seek to protect.</p> <p>Additionally, Cherwell is an area of water stress and flooding, both of which will be exacerbated by population increase and by the effect of development in increasing pressure on supply and run-off and in reducing the ground available to absorb precipitation.</p>
PR-A-076	Berks, Bucks and Oxon Wildlife Trust	24	<p>All potential site allocations should be subject to ecological assessment to ensure there will be no significant negative impacts on biodiversity in accordance with policy ESD10. In addition to considering the potential ecological impacts of individual site allocations, the potential for the cumulative ecological impact of the additional development, alongside planned development in Cherwell and adjacent districts will need to be assessed (including, for example, the allocation of sites to meet Oxford’s unmet need within South Oxfordshire). In particular, consideration will need to be given to potential impacts on Oxford Meadows SAC, as well as SSSIs and Local Wildlife Sites. Additionally, consideration should be given to the presence of CTAs and the ability to maintain or create an ecological network. Both direct and indirect impacts (including hydrology, air quality and recreational pressure) should be assessed.</p>
PR-A-076	Berks, Bucks and Oxon Wildlife Trust	25	The effect of the above on potential development locations is unknown until assessments take place, but the area surrounding Oxford Meadows SAC is particularly sensitive due to the potential to lead to changes in hydrology, or increases in air pollution or recreational pressure on the European site.

PR-A-077	Banbury Civic Society	1	<p>Para 2.7 to Para 2.10 do not clearly demonstrate that Oxford City has a short-fall, only that there is a chance it might not be able to meet the SHMA target. Indeed, so far as I can trace there has been no independent moderation of the remit, criteria, methodology etc. for the SHMA (other than the report must support the government's target – based on what demographics ?) and it is therefore questionable whether the target figures that are being used are in anyway realistic.</p> <p>Not-with-standing the Duty to Co-operate there should not be an assumption that the situation addressed in the consultation document will prevail and it must be Oxford City's obligation to demonstrate that it really cannot meet this target. (cont...)</p>
PR-A-077	Banbury Civic Society	1	<p>(cont...) Viewed from a map or the air, Oxford City contains considerable undeveloped areas (private sports areas and flood susceptible meadows. The sports areas could be relocated into the 'green belt' and there are measures that could be adopted to utilise flood prone areas for housing / employment. These should be aggressively investigated and independent advice obtained to support any rejection of this approach.</p> <p>Therefore it is premature to offer any opportunity for Oxford City to export its unmet needs to the disadvantage of neighbouring Authorities – except, perhaps by utilising the 'green belt' sites mentioned in the consultation document.</p>
PR-A-077	Banbury Civic Society	2	<p>Yes. If OCC's LTP4 is to have any weight at all, any 'overspill and/or SHMA related, housing MUST be accompanied by provision for sufficient 'high end' employment opportunities within 'local' travelling distance – and the public transport facilities to meet this demand must also be provided or supported.</p> <p>Actually the employment provision should be more than is required for the 'over-spill' population as already there would appear to be a short-fall of employment opportunities elsewhere in Cherwell District (e.g. Banbury) which will undermine the thrust of LTP4 by forcing residents to commute long distances to work places (e.g. Banbury to Science Vale) with all the economic and environmental disadvantages this will entail.</p>
PR-A-077	Banbury Civic Society	3	<p>Given the comments above the City should aggressively examine the potential for relocating existing non-housing and/or commercial uses out of the City area, together with the more productive use of existing open space areas. This is not to say that local parks etc. should be 'at risk,' but there are extensive areas which are not in public use, other than for agricultural or amenity purpose, and the City must critically analyse these for future housing.</p> <p>There will, after all, be a plentiful supply of 'fill' material from the HS2 project which could well be used to raise ground levels or form levees. (cont...)</p>
PR-A-077	Banbury Civic Society	3	<p>There are two areas, which Oxford City should address in concert with Cherwell DC and those are the undeveloped core of the area bounded by the A44, A4095, A4260 & Oxford Canal, which must be ripe for development, being near good or potentially improvable transport facilities, and, second, the Oxford Airport. This whole area contains a site for a potential railway station (Kidlington restored) and is also within easy reach is the community, education and other facilities of Kidlington, not to mention the recently opened improved rail route to London and the potential cross-country rail route to the east (East /West Rail Link).</p> <p>Furthermore this area is close to the existing commercial area of Langford Lane and the Begbrooke Science Park. As the airport is already a land-use not normally associated with 'green belt', its future must be weighed against the priority of meeting any demand for housing land – if indeed a need can be demonstrated – and therefore the airport site should compete against the other needs and be considered as available for alternative development. This could provide a welcomed 're-balancing' of population and employment across the Cherwell District and in any event be closer to the existing employment 'attractors' of the City and the Science Vale. (cont...)</p>

PR-A-077	Banbury Civic Society	3	<p>(cont...) Upper Heyford airfield already provides an excellent runway and some airport infrastructure, and notwithstanding the conservation and 'listed building' issues, could be re-activated to provide the fixed wing facilities to serve the South Midlands hinterland without necessarily jeopardising the status of the existing facilities that are seemingly so important. Any 're-activation' need not detract from the 'historic' interest of the site (there are numerous examples of 'listed' assets being in full use despite the 'listed' status) and in this case it could provide a very useful asset to handle the larger aircraft flying in support of local forwarding / courier enterprises and charity requirements for emergency shipments (e.g. Oxfam), not to mention a possible expanded passenger service.</p> <p>The airport site could be accessed easily from the M40, and also be served via one existing and one potential rail station.</p> <p>Cherwell DC's housing allocation for this area could be guided to locations away from the flying operations and, indeed, the 'high-end' employment that would follow the transfer would be very welcome for this relatively isolated location.</p>
PR-A-077	Banbury Civic Society	5-25	<p>The above remarks should provide sufficient impetus to guide future policies in answers to these later questions.</p> <p>No specific supply should be identified until a 'need' has been properly demonstrated and all other solutions investigated and found unachievable.</p> <p>Given the considerable additional population that Cherwell has been required to accommodate under the SHMA (see above), it will be very difficult for the existing communities to absorb even more new dwellings. If this eventuality were to come about then the whole basis of the Approved Local Plan would have to be re-thought as neither of the two major habitations in Cherwell District (Banbury and Bicester) will have the capacity to absorb even more population growth without further catastrophic impact on both their 'green fringes' and environments. (cont...)</p>
PR-A-077	Banbury Civic Society	5-25	<p>(cont...)</p> <p>There is, already a serious danger of these communities, particularly Banbury, becoming 'dormitory / commuter' towns given the 'draw' of the Science Vale project and other employment 'hot-spots' to the east. This would be a complete negation of the County Council's transport strategy and for which, at present, the infrastructure is inadequate (see the Cherwell District Local Plan and the yet to be consulted Banbury Master Plan)</p> <p>The current emphasis seems to be favouring 'executive, type housing, with the pricing structure of the 'affordable' element being such that they are not really affordable to the average employee in our towns and villages. Really good quality, but realistically priced, low cost housing (both for purchase and rent) must be prioritised along with the provision of a range of employment opportunities suitable for a wide spread of abilities and skills. This would require a 'root and branch' review of the disposition of housing and commercial activities if the towns and villages, particularly in the north of the District are to flourish and not become commuter dormitories. (cont...)</p>
PR-A-077	Banbury Civic Society	5-25	<p>(cont...) In conclusion our Civic Leaders need to ask themselves whether this is really to be, as aspired in the consultation document : –</p> <p>'an area where all residents enjoy a good quality of life.....and will be more prosperous than it is today. Those who live and work here will be happier, healthier and safer'.</p> <p>A nice thought, indeed, but..... !!</p>

PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	1	<p>Paragraph 2.11 of the Issues Consultation sets out that, 'Each Oxfordshire authority has its own perspective and independent consultants have been jointly appointed to act as a 'critical friend' to assist the process and scrutinise the position of each Council.... The final conclusions will be considered by the Growth Board in Summer 2016.'</p> <p>Paragraph 2.12 of the Issues Consultation sets out that, 'While this work has not been finalised, on 19 November 2015 the Oxfordshire Growth Board agreed a total working figure for Oxford's unmet need of 15,000 homes - that is the level of need that cannot presently be met by Oxford City Council.'</p> <p>Paragraph 2.14 then confirms that, 'It will not be until the countywide work is complete that this figure can be refined and a housing distribution to individual districts can be agreed.'</p> <p>Paragraph 2.16 then states that, '...Were this figure to be distributed evenly between Oxford, Cherwell, West Oxfordshire, South Oxfordshire and Vale of White Horse Councils, this would produce a requirement of some 3,000 homes per authority area.' (cont...)</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	1	<p>(cont...) Paragraph 2.17 follows on with, 'This figure would potentially increase for the rural districts if Oxford's contribution were to be less than 3,000. It may also change if the overall countywide level of unmet need changes or if the countywide work shows that there are significant differences between the relative sustainability of potential options for meeting Oxford's unmet housing need, meaning one authority should take more or less than another. Allowing for these possibilities might suggest a working figure for Cherwell of approximately 3,500 homes, until completion of the countywide work in Summer 2016.'</p> <p>In answer therefore to the question, it is clear that there is currently insufficient information or evidence to conclude whether 3,500 homes in Cherwell District is the correct basis for a figure to meet Oxford's unmet housing need. Based on the evidence currently available however, it is reasonable to proceed on this basis until there is further clarity which is expected in summer 2016 from the Growth Board.</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	6	<p>Paragraph 1.7 of the Oxfordshire Strategic Housing Market Assessment – Summary Key Findings on Housing Need, March 2014, sets out that, 'The SHMA has defined Oxfordshire as the relevant housing market area.... This reflects the flows of people moving home and commuting across local authority boundaries, as well as the economic influence of the City.'</p> <p>It is therefore considered that the entire Oxfordshire HMA has already been established as being 'well related to Oxford City' for the purposes of defining an area of search.</p> <p>The NPPF emphasises the need for development to be sustainable. One key component of sustainability is to ensure sustainable access to a range of facilities and services is accommodated. As above, Cherwell's existing vision and strategy emphasise the need for sustainable growth and for that reason has focused the bulk of the proposed development around Bicester and Banbury.</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	6	<p>(cont...) Bicester also benefits from strong connections to the Strategic Road Network with recent improvements to M40 Junctions 9 and 10 and with a potential additional motorway junction being considered as part of the wider Garden Town status awarded to Bicester.</p> <p>It is therefore clear that by continuing to focus the bulk of development in Bicester and Banbury, as per the vision and strategy set out in the LPP1, the aims of achieving as 'area of search... well related to Oxford' would also be successfully achieved.</p> <p>Notwithstanding the above, given that the entire Oxfordshire HMA is considered to be well related to Oxford City, the direction of development elsewhere within the administrative area of Cherwell District, including the Green Belt, would also help to meet unmet needs of Oxford City.</p>

PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	7	It follows therefore that the factors influencing the area of search should be the continuation of the vision and spatial strategy as set out in the LPP1, which would also ensure that the search area is well related to Oxford.
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	8	With this in mind, a district-wide search area would only be appropriate within the context of the vision and spatial strategy as set out in the LPP1, which is to focus the bulk of the proposed growth in and around Bicester and Banbury.
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	9	<p>As above, the Issues Consultation clearly sets out that this Partial Review is intended to be an addendum to the Local Plan Part 1. Again, as above, the vision and strategy must therefore be shared with the already adopted LPP1 i.e. to focus the bulk of the proposed growth in and around Bicester and Banbury (page 10 LPP1).</p> <p>A 'full strategic review of the boundaries of the Oxford Green Belt' cannot form an 'Addendum' to the previously adopted LPP1. This is on the basis that an 'addendum' implies that the vision and strategy will broadly be in conformity with the adopted plan that the addendum would sit alongside (as confirmed by para 1.5 above of the SA to the LPP1 Addendum). A full strategic review of the Green Belt could result in an entirely new vision and strategy.</p> <p>Whilst there is no objection to undertaking a full strategic review of the Green Belt, given that this is clearly something that could result in an entirely new vision not compatible with the existing strategy and vision currently in the adopted LPP1, any strategic review of the Green Belt boundaries should not be a part of an 'addendum' to an existing strategy and document as currently suggested is an option.</p> <p>Therefore, to ensure the approach is sound, the Oxford Green Belt cannot be considered as part of the search area for this LPP1 Addendum.</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	10	<p>Once further detail on the exact nature of Oxford's need has been identified, a clearer answer to this question can be provided.</p> <p>In the meantime, however, it is clear that a flexible approach to meeting Oxford's housing need should be applied. It would not be appropriate to consider that the strategic allocations identified within LPP1 are purely to meet Cherwell's need and any additional strategic allocations would contribute towards Oxford's unmet housing need.</p> <p>This would be a simplistic and unrealistic approach to a complex matter. It is possible that build rates could exceed those identified within the Housing Trajectory of the LPP1, to deliver housing ahead of the anticipated time line. There should be scope for that additional development to be considered as meeting Oxford's unmet housing need. (cont...)</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	10	<p>(cont...) Given the addendum is based on the existing strategy and vision for Cherwell, any extensions to existing strategic allocations are likely to be delivered towards the middle to end of the existing plan period. It should not automatically be assumed that these extensions will contribute towards Oxford's unmet housing need. It is possible that existing allocations could contribute towards Oxford's unmet housing need and the additional sites that are identified could in fact contribute towards 'back-filling' of Cherwell's need.</p> <p>Until there is additional information to be fully clear on the exact detail of Oxford's unmet need however, this level of detail is not possible to consider, but in developing options Cherwell District should be flexible at this stage as to how to appropriately progress this matter.</p>

PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	11	<p>The wider housing market area needs to produce a strategy which sets out a comprehensive approach to the management of housing land supply which allows for flexibility for districts to make contributions when they have the ability to do so.</p> <p>The range of a choice in sizes and types of sites will enable Cherwell to bring sites forward earlier in the plan period should this be necessary to address potential housing land supply issues. The availability of deliverable sites will be key to this approach. This should include smaller non-strategic sites and extensions to strategic allocations. It is considered that new stand-alone strategic allocations, whilst able to make a valuable contribution to the long term housing supply tend to be associated with longer lead in periods, which smaller sites or extensions to existing sites are not usually subject to. The potential to expand upon existing strategic allocations should not be overlooked, where the potential to utilise new infrastructure can be maximised.</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	15	<p>See above answers to questions 6, 7, 8 and 9 above.</p> <p>One consideration is whether the Bicester housing market can absorb further growth given the concentration of housing provision in one location. Based on the transformation of change in the scale, character and function of Bicester, which will effectively create a new market, it is considered that this new housing market in Bicester can successfully absorb higher build rates than previously anticipated within the housing trajectory and the resulting further growth.</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	16	<p>For additional development to meet the requirements of the NPPF and Cherwell's sustainable development policies set out in the Local Plan, it is essential that any additional housing is located such that it allows sustainable access to a range of key facilities and services.</p> <p>As above, Cherwell, and in particular Bicester, is well located in relation to the city of Oxford, with excellent new rail connections delivered as part of East-West rail and further connections via new Park and Ride services which opened in 2015 and via existing bus services. These strong foundations will be supplemented by the comprehensive sustainable transport package that will be delivered as part of the LTP4 and as part of the development of strategic developments across Bicester.</p> <p>Bicester also benefits from strong connections to the Strategic Road Network with recent improvements to M40 Junctions 9 and 10 and with a potential additional motorway junction being considered as part of the wider Garden Town status awarded to Bicester.</p> <p>More locally within Bicester, the LTP4 identifies a package of transport improvements which represent a significant enhancement to the capacity of the existing road infrastructure within the town. This package of highway improvements includes the delivery of peripheral route enhancements around the eastern side of the town, including the provision of a new South East Perimeter Road. These improvements are designed to cater for significant increases in development across the town, enabling through-traffic movements to be diverted away from the town centre.</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	16	<p>(cont...) With this additional infrastructure in place and with the introduction of the proposed Sustainable Transport Strategy, the traffic analysis undertaken to date demonstrates that there would be spare capacity within the town's road network to accommodate further housing growth. There is potential scope for further mitigation measures to be implemented to address residual impacts and this would be influenced by the location of any further growth.</p> <p>There is therefore potential for Oxford's unmet housing needs to be accommodated within Bicester, with areas to the east of the town ideally placed to offer the opportunity to exploit the proposed step change in infrastructure provision. There is scope for the planned sustainable transport strategy to be expanded to enable additional growth to be delivered within Bicester.</p>

PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	17	These matters reinforce the fact that the vision and spatial strategy of the adopted Local Plan Part 1 are the most appropriate framework in which to deliver this additional growth as part of the LPP1 Addendum.
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	19	<p>These matters demonstrate that the most appropriate location for additional growth is within Bicester and Banbury. These are the locations where attention has previously been focused in accordance with the vision and spatial strategy of the LPP1 and most is known about the transport and other infrastructure needs of these two locations.</p> <p>It is also clear exactly what (if any) additional mitigation is required in order to accommodate further growth within these locations, without compromising the existing strategy. Given the scale of growth, continuing to focus development in these locations, will also ensure Cherwell has a clear vision, rather than creating a different vision for the delivery of this additional housing, which would not only conflict with the aims of the LPP1, to which this Partial Review forms an addendum, but also confuse matters, by not having a clear vision or strategy. To successfully deliver this level of growth, a clear vision is vital.</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	4+5	<p>The additional growth should continue to reinforce the spatial strategy for Cherwell District, which as set out in paragraph vi of the adopted Local Plan Part 1, can be summarised as follows,</p> <ul style="list-style-type: none"> - 'Focusing the bulk of the proposed growth in and around Bicester and Banbury, - Limiting growth in our rural areas and directing it towards larger and more sustainable villages. - Aiming to strictly control development in open countryside.' <p>It is clear from the Consultation Issue Paper that this Partial Review of the Local Plan to accommodate Oxford's unmet housing need is intended to be an Addendum to the already adopted Local Plan Part 1. It can only be considered an Addendum if the vision and spatial strategy as set out in the adopted Local Plan Part 1 are continued as part of the Addendum.</p> <p>Paragraph 4.3 of the LPP1 Issues Consultation sets out that, 'The Vision in the Local Plan Part 1 must therefore form the starting point for this Partial Review, but there will also need to be consideration of issues and evidence that relate to Oxford's housing need. This will include matters included in the Oxfordshire Strategic Housing Market Assessment (SHMA) and the vision and objectives for Oxford City set out in its Core Strategy. A new focused Vision will need to be prepared which underpins the Partial Review's spatial strategy and which does not adversely affect the recently adopted Cherwell strategy.' (cont....)</p>
PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	4+5	<p>5 (cont...) The emphasis that the vision and spatial strategy of the LPP1 should be followed for the LPP1 Addendum is more strongly stated in the Partial Review of the Cherwell Local Plan (Part 1): Oxford's Unmet Housing Need - Sustainability Appraisal Scoping Report (SA for the LPP1 Addendum).</p> <p>The wording at paragraph 1.5 of the SA for the LPP1 Addendum sets out that, 'The Local Plan Part 1 partial review is a Development Plan Document that will effectively be an addendum to the Local Plan Part 1 – it will sit alongside it and form part of the statutory Development Plan for the District. The Partial Review has a specific focus and it is not a wholesale review of Local Plan Part 1. The vision, aims and objectives, spatial strategy and the policies of the Local Plan Part 1 will guide development to meet Cherwell's needs to 2031.' (cont...)</p>

PR-A-078	Boyer Planning / Redrow Homes & Wates Developments	4+5	<p>5 (cont...) On the basis that the LPP1 Addendum has the same plan period as the LPP1 and it is not a whole sale review of the document, in order for it to be considered sound, it must have the same vision and strategy as the already adopted LPP1.</p> <p>Furthermore, the current strategy results in Bicester experiencing substantial change. To alter this direction would result in there not being a clear vision or direction for CDC's Local Plan. Indeed any new vision could also conflict with the aims and direction of the current vision. Indeed para 3.1 of the LPP1 Issues Consultation highlights this point by setting out that, 'Our adopted strategy is aimed at meeting Cherwell's needs, not Oxford's, but it is important that any new growth does not undermine or hinder the delivery of growth already planned.'</p>
PR-A-079	Fringford Parish Council	7+1	<p>The Economist has reported that in a recent 12 month period, Oxford completed 65 dwellings. It seems very unfair that they should then expect residents of Cherwell to help make up some of the shortfall especially those to the North side of Bicester which is only going to increase the traffic issue.</p> <p>Given that Cherwell's spatial strategy contained in Local Plan Part 1 indicates that growth in the rural areas will be limited and "focus on meeting local community and business needs", it is assumed that none of Oxford city's unmet housing need would be proposed to be met in villages such as Fringford.</p> <p>Fringford and the villages North of Bicester would not be a feasible or sustainable location to meet Oxford City's unmet need due to the great employment travel distance and the poor road infrastructure through the rapidly expanding area in and around Bicester.</p>
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	1	<p>There is a significant likelihood that Oxford City Council will not be able to allocate sufficient land to provide the extra 3,000 dwellings currently required towards meeting the 15,000 homes for Oxford's unmet needs. Much of the City is tightly constrained by biodiversity & flooding constraints and/or is Green Belt land important for maintaining the setting and special character of Oxford. The largest area of undeveloped land that is not in the flood plain or Green Belt is Southfield Golf Course in Headington, but this adjoins the Lye Valley SSSI, which contains highly sensitive and nationally rare wetland fen habitats. There may therefore be additional housing which Cherwell District Council will need to accommodate.</p>
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	2	<p>In order to promote sustainable work patterns and reduce long distance commuting it is essential for employment to be provided close to where people live. In providing housing to meet Oxford's unmet need it is therefore essential that provision is also made for employment for these new residents. This accords with the advice in the National Planning Policy Framework that 'plans and decisions should ensure developments that generate significant movement are located where the need to travel will be minimized and the use of sustainable transport modes can be maximized,' (para 34) and that 'for larger scale residential developments in particular, planning policies should promote a mix of uses in order to provide opportunities to undertake day-to-day activities including working on site.' (para 38) Allocating land in Cherwell District for at least 3,500 dwellings is large scale residential development which needs to be complemented by allocating sufficient land for employment for these new residents.</p> <p>In this respect there are particular opportunities at Kidlington both for residential development, including on the J A Pye (Oxford) Ltd land at Webbs Way and for further employment provision, such as at Langford Locks, which adjoins the key employment area at Langford Lane, as identified on the accompanying site submission forms. In locational terms, Kidlington is essentially a suburb of Oxford, so locating housing and employment there to meet Oxford's unmet need makes a lot of sense.</p>
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	3	<p>The key Oxford issues are that due to environmental constraints, as quoted in paragraph 2.24 of the Issues Consultation Paper 'it will never be possible to meet all the city's housing and employment needs. Housing need and demand far exceeds the amount of available and suitable land within Oxford, and employment uses struggle to compete against housing developers.' For these reasons allocating land for housing development in sustainable locations such as Kidlington has the potential to make a significant contribution to meeting Oxford's unmet housing need.</p>

PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	4	Additional growth in Cherwell District will help the Council to achieve its strategic objectives as set out in the Cherwell Local Plan part 1 such as: SO 1 To facilitate economic growth and employment and a more diverse local economy with an emphasis on attracting and developing higher technology industries. SO 3 To help disadvantaged areas, support an increase in skills and innovation, improve the built environment and make Cherwell more attractive to business by supporting regeneration. SO 6 To accommodate new development so that it maintains or enhances the local identity of Cherwell's settlements and the functions they perform. While clearly the review will need to focus on ensuring that Oxford's unmet housing need is met, this is not considered to be inconsistent with meeting the existing Cherwell Local Plan objectives.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	5	The vision should focus on accommodating the development in sustainable locations that will promote the prosperity of the Oxford region as a whole and meet Oxford's housing needs as identified in the Oxfordshire Strategic Housing Market Assessment (2014).
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	8	As the northern part of the district around Banbury is around 30 miles from Oxford it is considered that locations closer to Oxford should be chosen for meeting Oxford's unmet need.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	9	<p>It is considered to be important that a Green Belt review is undertaken as the Local Plan Inspector considered that there needed to be: "...a formal commitment from the Councils, to undertake a joint review of the boundaries of the Oxford Green Belt, once the specific level of help required by the city of Oxford to meet its needs that cannot reasonably be met within its present confines, is fully and accurately defined." Given these comments should no review of the Green Belt be undertaken the proposals to meet Oxford's unmet need would not meet the soundness test of being justified as it would not be possible to show that 'the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence.' (NPPF, para 182)</p> <p>Both of the site submissions that J A Pye (Oxford) Ltd have made at Kidlington are located in the Green Belt and are therefore covered by the Land Use Consultants (LUC) Oxfordshire Green Belt Study 2015, albeit that this was a strategic study that did not look at the particular merits of individual sites. In this respect the site at Langford Locks falls within land parcel K18. The LUC study indicates in Table 4.1 that this parcel makes no contribution towards the purposes of including land in the Green Belt apart from a low contribution towards purpose 3 of safeguarding the countryside from encroachment and a high contribution towards purpose 2 of preventing neighbouring towns from merging into one another. This is owing to this parcel of land being located between Begbroke and Kidlington. However, the J A Pye (Oxford) Ltd land at Langford Locks at Kidlington is already adjoined by the existing Station Field Industrial Park to the north, with an existing access point already provided for its future extension, and is separated from the rest of land parcel K18 by the Oxford Canal to the west. It does not therefore make a significant contribution towards achieving this objective and its removal from the Green Belt would therefore have a negligible impact on the achievement of Green Belt purposes. (cont...)</p>
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	9	(cont...) The other area of land covered by a J A Pye (Oxford) Ltd site submission at Kidlington is located at Webbs Way. This site falls within land parcel K13. This is assessed as making no contribution towards Green Belt purposes apart from a low contribution towards preserving the setting and special character of historic towns and a high contribution towards safeguarding the countryside from encroachment. However, the inner field at Webb's Way is already adjoined by residential development on three sides, namely Webbs Way, Mill St and Spindlers and there is a thick hedge on the fourth side and so it could be developed with very little impact on the character of the open countryside. J A Pye (Oxford) Ltd have made a second submission for Webbs Way which includes a further field to the east, which is currently partially screened from the Cherwell Valley on its eastern side by trees and shrubs to the north and south and an incontinuous tree/shrub line on the eastern boundary. With strengthening of the planting on this boundary development could take place on this larger site without significant encroachment into the countryside. It is therefore considered that as part of the Green Belt review the J a Pye (Oxford) Ltd sites at Langford Locks and Webbs Way should be removed from the Green Belt in order to meet Oxford's unmet need.

PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	10	Given that the partial Local Plan review to meet Oxford's unmet housing need will result in the identification of specific sites to meet this need it is important that a specific housing supply is identified for meeting Oxford's needs with its own five year supply of deliverable sites.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	11	Given the high level of housing need in both Oxford and Cherwell Districts, which is also likely to grow over time, it is unlikely that the existing Cherwell strategy and its housing requirements will be adversely affected by ensuring that there is also a five year housing land supply for Oxford's unmet need.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	12	As noted in paragraph 5.22 centre to centre, Kidlington and Oxford are approximately 8 km (5 miles) apart, but the built up edges are only 1.5 km apart, with the new Oxford Parkway Railway Station located in the gap between the two settlements. Although having a separate identity Kidlington is therefore in locational terms essentially a suburb of Oxford and a highly sustainable location for further housing and employment development. Reference is made in paragraph 5.27 to the land between Kidlington, Begbroke and Yarnton being often referred to in planning terms as 'the Kidlington gap.' However, development on the north east side of Kidlington would not affect these coalescence issues, and would also not affect the gap between Oxford and Kidlington.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	13	Nothing to add at this stage.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	14	To provide a mix of housing that accords with the findings of the Oxford Strategic Housing Market Assessment 2014.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	15	Kidlington as it is an ideal location for residential development to meet Oxford's unmet needs as it is located very close to Oxford with frequent bus services to the city, while the Oxford Parkway railway station is located between Kidlington and Oxford. It also has excellent access to employment including Langford Lane; Langford Locks and Begbroke Science Park, which are due to expand in accordance with the Cherwell Local Plan 2011 – 2031 policies. Kidlington is also located close to the Oxford Northern Gateway where 55,000 square metres of employment use is proposed.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	16	Not additional to the points already raised in response to earlier questions.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	17	Locations in the Southern half of the District that are well connected by public transport such as at Kidlington are the most sustainable locations for further development in transport terms.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	18	Not additional to the points already raised in response to earlier questions.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	19	Locations with significant services & facilities, such as Kidlington are the most sustainable locations for more development.
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	28	Site submissions - Land at Webbs Way, Kidlington (X 2) and Langford Locks, Kidlington. Yes. Call for site forms are attached for the following sites: i) Webbs Way, Kidlington (TWO SITES): residential – two forms relate to this site with one form relating to a larger site than the other; ii) Langford Locks, Kidlington: Employment;
PR-A-080	West Waddy ADP / J.A.Pye (Oxford) Ltd	20+21	The Oxford and Oxfordshire City Deal identifies a knowledge spine stretching from Science Vale, through Oxford to Bicester. Concentrating development within this knowledge spine such as at Kidlington will help secure the economic growth aspirations of the City Deal as well as contributing towards meeting the employment needs of the residents of the additional housing provided to meet Oxford's unmet need.

PR-A-080	West Waddy ADP / 22+23 J.A.Pye (Oxford) Ltd		Locating the growth in larger settlements such as Kidlington will ensure that residents have access to a good range of facilities without the need to travel.
PR-A-080	West Waddy ADP / 26+27 J.A.Pye (Oxford) Ltd		Development in locations with Conservations Areas or close to other historic assets is considered to be acceptable in order to meet Oxford's unmet needs, as these areas have historically developed over time, provided the new development respects its historic setting and will conserve and enhance the heritage asset.
PR-A-080	West Waddy ADP / 6+7 J.A.Pye (Oxford) Ltd		Yes it is considered to be essential that the area of search should be well related to Oxford City, otherwise the housing provision would not be likely to meet Oxford's unmet housing need, as this relates to people who have a need to live in the vicinity of Oxford. It is agreed that key factors that should help define the area of search include those listed in paragraph 4.8 including distance/proximity to Oxford; key transport corridors with transport linkages to Oxford; economic links to Oxford; and the catchment orders of higher order services at Oxford.
PR-A-081	Kirtlington Parish Council	1+12	<p>1. Whereas housing delivery numbers are analysed annually, there has been no further review of the original SHMA; this is a significant issue since economic growth has not followed the pattern anticipated. As the SHMA defines the calculation of housing numbers, we applaud the reviews currently being undertaken by the Oxfordshire Growth Board, especially with regard to capacity within Oxford, and consider that before Cherwell District's acceptance of any of Oxford's unmet housing needs, the outcome of these reviews is awaited and acted upon.</p> <p>2. In this part of Cherwell District, commuters to London, Birmingham and places in between compete for the housing stock, often with higher London salaries. For Cherwell District to accept even more housing than it is already committed to will not necessarily help Oxford's unmet housing needs, or only for a proportion of the extra houses. (cont...)</p>
PR-A-081	Kirtlington Parish Council	18+26+9	<p>(cont...)</p> <p>3. Cherwell District's infrastructure in terms of roads, public transport, sewerage, electricity grid, etc. as well as in terms of its traditional rural villages and rural, agricultural landscape, is already stressed by the amount of development required.</p> <p>4. Oxford's Green Belt is in great need of re-evaluation. Currently, far more environmental harm is being created (and will get worse) with the traffic problems of commuting into Oxford than any benefits of keeping this outdated 'Green Belt', some of which is not now fulfilling the 5 purposes for its designation. It would be more beneficial environmentally for more of Oxford's unmet housing needs to be built adjacent to Oxford, even in land that has been Green Belt. Instead truly rural green belts could be defined around the rural settlements to maintain the District's agriculture, rural villages and heritage.</p>
PR-A-082	Glaisher / Earnshaw	1	Given the government has said it will consider new proposals to abolish Oxfordshire County Council and hand its duties to new "unitary councils, the realignment may see other areas and councils investment into this have a significant input. Should this whole reassessment take place after such decision? Surely this question should be left for now. Would it not be best left till the proper assessment is determined? If developers are working to the higher number, it would be harder to claw back to the lower figure. if you ask me now, No! These are Oxford's needs, not Cherwell's needs. Oxford should therefore carry by far the biggest proportion of the housing burden. If Oxford needs more houses then the majority should be built on Oxford's green spaces, not those of Bicester. Oxford should be building 5000 to 8000 of the new homes required to reduce the burden on other areas. Building homes in Cherwell for people in Oxford will increase the amount of people commuting into Oxford where the roads are already at capacity.
PR-A-082	Glaisher / Earnshaw	2	<p>No! It makes no sense to supply new housing in Cherwell to meet Oxford's needs, if the additional employment is created in Cherwell to serve those homes. That would result in both housing and employment having nothing to do with Oxford where the need is, as Oxford already has more jobs than people to fill them.</p> <p>Using tainted figures for the Local Plan in July 2015, increased the number of houses needed, and then the need for more employment. A rigorous method of assessing the need should be used to reassess the baseline figure (need not greed) before agreeing to any additional figures</p>

PR-A-082	Glaisher / Earnshaw	3 1 & 6	Oxford already has more jobs than people. Housing must therefore be provided in Oxford to prevent more commuting traffic on the road. Relaxing the green belt restrictions around Oxford is therefore vital to enable development of areas such as Water Eaton which will be served by the new Oxford Parkway mainline station.
PR-A-082	Glaisher / Earnshaw	4	To protect quality of life, prosperity, happiness and health of existing residents of Cherwell/Bicester instead of ruining their lives by surrounding their homes with giant distribution warehouses and industry to support potential future residents. Bicester could be the happiest town in Brittan like the recent survey which list south oxford. Which by the way is taking a smaller proportions of new housing and employment. A normal sustainable growth in line with national averages should be look at, the whole picture and joining up the growth so the infrastructure is in place first. Get the work done for assessing the best plans before agreeing the planning applications. Take the time now the growth in over next 15years not all to be delivered by 2020
PR-A-082	Glaisher / Earnshaw	5	Unbiased figures obtained in an weekend by a arbitrary figure plucked out of their heads to meet a deadline. Get some proper figures not speculation for greed's sake. Is Oxford relevant when Cherwell is set to become part of Northamptonshire's coverage? Our vision should be toa protect Cherwell and not take on Oxford's problems totally screwing our region just before it's handed over (dumped) to Northamptonshire. Cherwell should be cooperating with Northamptonshire and Buckinghamshire's local governments under the Localism Act 2011, not just Oxford.
PR-A-082	Glaisher / Earnshaw	6	The area of search to provide housing for Oxford city should be restricted to Oxford City and its green belt. Reevaluate what is set aside to produce a better mix of open spaces and urban edges
PR-A-082	Glaisher / Earnshaw	7	Evaluation of what has already been assigned and reevaluate them based on the whole development site current and proposed The factors to influence the area of search should be housing in Oxford to stop/reduce commuting and thereby protecting rural areas in Cherwell.
PR-A-082	Glaisher / Earnshaw	8	No. The factors to influence the area of search should be housing in Oxford to stop/reduce commuting and thereby protecting rural areas in Cherwell. Look at the district as a whole redefine what areas are best for housing and commuting and set aside employment areas that don't detract from the uniqueness of the separate parishes and towns and villages. Don't co locate low skilled warehouse employment hubs in housing developments the idea that people will walk to work they can't afford to live in the locations better yet to not add to the congestion of towns and villages a more strategic location to consider these eyesore. So we can't build up Oxford we will push everything else where and just get housing and high tech stuff in Oxford
PR-A-082	Glaisher / Earnshaw	9	Yes – this is Oxford City's need, not Cherwell's but in keeping with the original principals, utilising other areas within Oxford (less greed more need). More housing for less industry
PR-A-082	Glaisher / Earnshaw	10	Yes, if that housing supply is identified in Oxford, not Cherwell Other areas will lose their individual significance, and just be a spill over to accommodate oxfords needs for housing. Without better infrastructure, we will all be at a stand still on the roads just to get to where we are going
PR-A-082	Glaisher / Earnshaw	11	By saying no, or only agreeing to developments in parts of Oxford's green belt eg Water Eaton to serve Oxford Parkway. Get better information and give the appropriate time and resources to debate figures from industry who only have only their own interests at heart (need not greed)

PR-A-082	Glaisher / Earnshaw	12	Oxford has more jobs than people because housing costs are so high in Oxford. The only way to address this without screwing up the whole county is to build more houses in Oxford not Cherwell (apart from the Oxford green belt that is part of Cherwell). If housing is the issue, focus on housing accept the fact the surrounding areas are going to be commuter settlements and stop loading the area with low paid warehouses and employment supposed opportunities. Get the right blend of jobs and employment companies to get interested. An over all development plan is needed to stop this piecemeal approach to development mixing the communities in with such overbearing buildings. if the towns and villages wanted to be stuck in traffic and overpopulated they would have moved to Oxford proper. Keep the district clean from this development onslaught to get the cheapest fastest and biggest amount of development approved fast before the real effects on the infrastructure can be realised
PR-A-082	Glaisher / Earnshaw	13	Yes – stop messing up the homes and lives of existing residents in Bicester These changes need to be presented to resident, the main stakeholders, objectively and with in the spirit of truth. Not engaging in the consultation means the important considerations are not taken into account which leads to objections later in the process and time wasted. Get developers to realise that Cherwell will expect the best levels to be achieved on parts, in the design, and in the considerations etc.. This will insure if projection are not correct, the results will be considerably better then if they just meet the standards
PR-A-082	Glaisher / Earnshaw	14	Oxford’s housing needs must be met in Oxford – see questions 12 and 13.
PR-A-082	Glaisher / Earnshaw	15	Or Get the funding from them to create the infrastructure like roads and hospitals and public transport. Before any Oxford’s green belt, Water Eaton, Kidlington and Upper Heyford.
PR-A-082	Glaisher / Earnshaw	16	Housing should be in Oxford to meet oxford’s employment needs without commuting, not in Cherwell which would increase commuting journeys. The time invested into graven hill would be lost, but the first bricks are not down. reassign this brown site with links to mainline from being converted, when a big need for industry that would have rail and road links so reduced commuting though residential areas be perfect as it has been for the past decades. is it because a separate company is overseeing this, and they would not be able to make as much money or receive as many accolades. A41 and A34 are at extreme capacity, get the roads and public transport better before the houses and employment sites should be top priority and not add to the mess
PR-A-082	Glaisher / Earnshaw	17	Bicester’s roads are already totally inadequate for current needs and the proposed new roads will not help. The new SE perimeter road route proposals are all unacceptable (destruction of wetlands and/or archaeological heritage and/or isolation of Wendlebury). The A41 Aylesbury Road/Ploughley is already at full capacity with many long traffic jams during rush hour and will just get worse with new developments. The new proposed spine road through the Wretchwick Green development is totally unacceptable as it will have heavy traffic inc HGVs routed through the centre of housing developments. Improvements/new roads from North and East Bicester to M40 junction 10 required.
PR-A-082	Glaisher / Earnshaw	18	Bicester is failing to provide appropriate required infrastructure. The sewage treatment works is already failing to meet demands of current population. New Ambrosden water main does not have the capacity to supply the Bicester Plan 12 site through which it passes. Town centre redevelopment and Bicester Village do not provide for the needs of local residents (apart from Sainsbury).
PR-A-082	Glaisher / Earnshaw	19	Bicester does not have the necessary infrastructure needed to meet the needs of current residents. It definitely does not have the infrastructure to meet the needs of the current local plan and certainly does not have the infrastructure required to take on Oxford’s housing needs.

PR-A-082	Glaisher / Earnshaw	20	Bicester needs high tech/high skill employment commensurate with the Oxfordshire Knowledge Spine. It does not need massive B8 distribution warehousing which cannot supply the salaries required to buy property in Bicester and which fails to meet the NPPF objective of a low carbon future.
PR-A-082	Glaisher / Earnshaw	21	Cherwell should be aiming to support Bicester's (and the Cherwell region's) residents, not future Oxford's.
PR-A-082	Glaisher / Earnshaw	22	Developing B8 distribution warehouses around Bicester completely fails to meet the objectives of increasing biodiversity and reducing flooding. In fact it will do the opposite. Developers involved in Akeman Park (aka Symmetry Park) in Bicester Plan 12 site are not even attempting to achieve a high BREEM rating. This warehousing with it's associated lorry parking almost completely paves over the whole site which will lead to flooding of Launton, Ambrosden and other sites on the River Ray. The fields on this site are clay based and have a very high water retaining capacity with low run off speeds. Any proposed drainage scheme (SUDS compliant or otherwise) will not be capable of maintaining current run off rates. There will be massive habitat loss for many protected species.
PR-A-082	Glaisher / Earnshaw	23	Cherwell should be aiming to support Bicester's (and the Cherwell region's) residents, not future Oxford's.
PR-A-082	Glaisher / Earnshaw	24	Building on the Ray Meadows Conservation Target Area. Many protective species currently on this site will be lost due to habitat destruction. A couple of ponds and a few trees will not mitigate this loss.
PR-A-082	Glaisher / Earnshaw	25	Cherwell should be aiming to support Bicester's (and the Cherwell region's) residents, not future Oxford's.
PR-A-082	Glaisher / Earnshaw	26	The ridge and furrow landscape surrounding the Wretchwick Deserted Medieval Village (scheduled monument) should not be built over by the Wretchwick Green development. In the West Midlands alone, over 90% of ridge and furrow landscapes have been lost to ploughing or developments. No figures are available for Cherwell or even nationally, but it is thought that the national situation is worse with more than 90% loss. Potentially the southern edge of Bicester 12 plan site could house numerous archaeologically important features due to the proximity of the Akeman Street Roman Road and nearby Roman town of Alchester. Geophysics surveys already performed will not show these due to the waterlogged nature of the soils
PR-A-082	Glaisher / Earnshaw	27	What possible justification can there be to build over the historic landscape of Bicester instead of the green belt of Oxford. This is utterly ridiculous
PR-A-083	Bonnar Allan Limited	1	While the authorities within Oxfordshire are currently working to define the respective quantities of housing that each must contribute to meet the City's needs, we consider that the differing situations and contexts within each of the Districts means that an equal apportionment is most unlikely to be justified. The Vale of White Horse (VoWH) and West Oxfordshire Districts are the most constrained in terms of landscape designations (AONBs) and also have inferior transport connections to Oxford when compared to South Oxfordshire and Cherwell.
PR-A-083	Bonnar Allan Limited	2	<p>South Oxfordshire and VoWH have historically focused a large amount of growth around Didcot and Marton/Crayke. We consider that locations for additional housing should wherever possible and appropriate, be supported by employment generating development in order to create the potential for people to live and work in close proximity and thereby avoid the need to travel. Such development can include a wide variety of uses including schools, shops, community facilities as well as office and industrial space.</p> <p>At Wendlebury we are proposing to provide primary and secondary schools as well as a nursery; shops; health; and community facilities, all of which will provide employment opportunities. The location to the east of the village is very well located relative to wider office and industrial employment opportunities at Bicester and the fundamental enhancements to the railway line between Bicester Town and London Marylebone as well as that soon to be delivered between Bicester and Oxford mean that travel to other centres of employment will be facilitated via more sustainable means.</p>

PR-A-083	Bonnar Allan Limited	4	Additional growth should seek to provide homes in an attractive, high quality environment which does not have an adverse impact on Areas of Outstanding Natural Beauty or other areas protected for their inherent qualities or constraints (such as floodplain and/or Green Belt),and which provides the ability for residents and visitors to travel to Oxford (where the need is focused) and beyond in as environmentally friendly a way as possible. The opportunity to provide improvements to infrastructure to benefit existing residents and visitors should also become an objective of planned growth.
PR-A-083	Bonnar Allan Limited	6	Any area of search for meeting Oxford's unmet need should include location(s) that can deliver on the principles above, and which are as close to Oxford as possible without compromising the Green Belt around the City. Critically these locations must be directly accessible to rail services into Oxford from either existing or potential new stations where those are practicable. In practice the areas of search should thus be drawn around Bicester in the north east and around the Heyfords to the north of Oxford.
PR-A-083	Bonnar Allan Limited	15	<p>The Council should positively consider our proposed site at Wendlebury as a strategic location capable of delivering a substantial proportion of the suggested housing need that Cherwell DC should provide for (up to 3,000 of the 6,000 homes).</p> <p>Wendlebury is our proposal for a sustainable new community of up to 3,000 new homes that will serve the needs of the City of Oxford.</p> <p>This will create a community that will utilise the existing rail infrastructure to allow commuting both into Oxford and east to Bicester and beyond. (cont...)</p>
PR-A-083	Bonnar Allan Limited	15	<p>(cont...) Our vision for Wendlebury is for it to be an 'energy positive' development; that is to say, one which makes a net contribution to the national grid rather than drawing energy from it. We will achieve this through a combination of careful design and layout making the most effective use of the site's topography and microclimate as well as employing the most efficient fabric for buildings.</p> <p>The urban extension provides the opportunity to deliver a range of essential facilities for Wendlebury which currently does not exist. It will include a range of retail and community facilities laid out in a traditional arrangement with a focus on high quality public realm.</p> <p>The new extension will also deliver new primary and secondary schools which the current village is without. These will be located centrally to provide for accessible walking routes for the village.</p>
