PR-B-1339	Dr Christopher	Wedge		16			Object strongly to development in the Oxford GB around Kidlington. GB has unspoilt countryside, footpaths and green spaces, enjoyed by local residents and myself for running and walking. It protects historic Oxford from the effects of over development. GB is a permanent designation and that Government guidance states that unmet housing need is not a reason for building in the GB. The Government's Manifesto promise and Cherwell's existing policy to protect the GB must be upheld. Proposal based on incorrect assumptions about job growth in Oxford. There are alternatives, better use of previously developed land in Oxford and using some proposed employment sites in the city for housing instead. It is not reasonable to develop within the GB.
PR-B-1340	Sophia	Argyris		16			Object strongly to development in the Oxford GB around Kidlington. GB has unspoilt countryside, footpaths and green spaces, enjoyed by local residents. It protects historic Oxford from the effects of over development. GB is a permanent designation and that Government guidance states that unmet housing need is not a reason for building in the GB. The Government's Manifesto promise and Cherwell's existing policy to protect the GB must be upheld. Building in the area would make Oxford another over built up city like areas similar in London, losing its unique character and ruins it for many residents in the area. Proposal based on incorrect assumptions about job growth in Oxford. There are alternatives, better use of previously developed land in Oxford and using some proposed employment sites in the city for housing instead. It is not reasonable to develop within the GB. Living in this area during and after the development would become unpleasant, terrible traffic, overcrowding a general lack of public services etc. The infrastructure would not be able to cope. Would consider leaving the area.
PR-B-1341	Olga Lascano	Choperena		16			Object strongly to development in the Oxford GB around Kidlington. GB has unspoilt countryside, footpaths and green spaces, enjoyed by local residents. It protects historic Oxford from the effects of over development. GB is a permanent designation and Government guidance states that unmet housing need is not a reason for building in the GB. The Government's Manifesto promise and Cherwell's existing policy to protect the GB must be upheld. Proposal based on incorrect assumptions about job growth in Oxford. There are alternatives, better use of previously developed land in Oxford and using some proposed employment sites in the city for housing instead. It is not reasonable to develop within the GB.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	16			Agree that in these very specific circumstances that these options are reasonable. However, they must be subject to justification through a thorough assessment of the sites against the 5 functions of the Green Belt required by the NPPF.
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	16			Areas E, F, and H are already identified in the Cherwell Local Plan as area of growth. Areas C and G represent transport nodes rather than sustainable locations for development. Areas A and B are closest to Oxford and therefore merit assessment. But large parts are within the Green Belt. Allocation on a limited range of sites could lead to over reliance on locations within these options and would not provide flexibility or choice in the range of sites to provide Oxford's unmet housing need.
PR-B-1306	Frank	Vreede		17	A ,E	PR14	Cannot envisage how areas A or E could record any positive effects in any of the 11 objectives considered. Examples of this are detailed in the rep for site PR14.
PR-B-0890	Chris	Dicks		17	A, B	PR20, PR34	This rep refers to the full LUC initial sustainability report and has criticism of sections of it. There is a need to recognise the value of the countryside, GB and agricultural land. The importance of the canal for tourism and the need to preserve low light levels between Kidlington, Begbroke and Yarnton. The increase in pollution and congestion have not been assessed correctly.
PR-B-1165	Caroline	Johnson		17	A, B		The selection of Areas A and B is based on providing new balanced communities that are well connected to Oxford. There is no evidence that you will be able to deliver well balanced communities, you have no power to ensure the balance of housing provided. Area B has a regular bus service to the City Centre but there is no comment on increasing the service at peak times and there is no service to Headington or Cowley employment centres.
PR-B-1232	Mark	Schmull	Nathaniel Litchfield and Partners on behalf of The Church Commissioners	17	B		Welcome the key findings of the areas of search which have identified Area B as performing best against the SA criteria. Area B should be the starting point as an area of search for suitable locations to meet development needs.
PR-B-0890	Chris	Dicks		17	C, E		Criticism of the score for SA16 given the good railway connections.
PR-B-0931	Jane	Olds	Fringford Parish Council	17	E		Option E Bicester should be excluded on the grounds of inadequate transport links/sustainability challenges.
PR-B-0984	Jane	Burrett		17	G,C		Do not think that housing in Area C in the quadrants of J9 on M40 or Area G is sustainable for health reasons for existing residents and any future ones.
PR-B-0933	Peter	Bateman	Framptons on behalf of the Donger Family	17	I		Area I is a very broad area covering the majority of the District. This causes the conclusions of the SA to be unduly broad and strategic. Should more focused areas be assessed it is considered that a more robust conclusion and scoring system would result
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	17		PR39	Detailed comments are made in response to this question. It includes a revised sustainability appraisal summary of Site PR39
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	17		PR41	Yes. Pleased to see that Site 41 was considered under Area of Search Option A but can find no explanation as to why Site 41 was ruled out and other land favoured within the areas of search.
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	17		PR49	PR49 is a good suggestion for development.
PR-B-0637	Prof Martin LG	Oldfield		17		PR51	The sustainability Proposal for PR51 puts too much emphasis on the number of houses and not enough on the damage to the environment. The GB must be saved.
PR-B-0019	Edward	Dowler	Middle Aston Parish Meeting	17			No
PR-B-0033	Henry	Munday		17			Believe houses are already affordable.
PR-B-0055	Cynthia	Hall		17			Complete scepticism.
PR-B-0058	Anthony	Hall		17			The "sustainability" assessment is ludicrously mistitled, since many of the criteria are about its opposite, economic growth. So the apparently green scores for many areas on many criteria are utterly misleading, simply allowing you to appear to justify choosing unsustainable areas by appearing to balance the red scores with spurious green ones.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0119	C A	McCall		17			Not had time to examine all of the material to make comment.
PR-B-0156	Val	Colby	Berrys on behalf of Cancer Research UK	17			As above. The area of search should continue to include Category A villages in area of search I.
PR-B-0171	Peter	Worth		17			There is a lot of detail that cannot not fully be digested. In essence it's about providing homes for working people in a community with good infrastructure of schools, doctors, recreational space.
PR-B-0209	Patrick and Julia	Jennings		17			Disagree with the criteria used in the assessment - 'access to services' and 'creating employment opportunities'. It is not clear why houses built in one area will create job opportunities. Further the strategy is meant to be addressing the problem of insufficient housing for existing people in Oxford, not creating jobs to encourage migration to the Oxford area. Regarding services, would expect that any development would include new services to support the extra housing, not add further strain on the existing services.
PR-B-0447	Laura, John, Benito	Wainwright		17			The protection of the GB is the most important issue as laid down in the NPPF and committed to by the present government in its 2015 manifesto. There are no exceptional circumstances here to justify using the GB and losing well used countryside and protected wildlife habitats. The Interim Transport Assessment is deficient in foreseeing the transport problems which would result from major development around Kidlington without adequate infrastructure in place.
PR-B-0643	L	Allen		17			Very vague in its comments and not based on accurate knowledge of the area. Traffic chaos and overwhelmed health and school services are of concern.
PR-B-0653	Peter	Webber		17			There is a real risk of creating a "metroland" which would not assist with the SA's laudable objective.
PR-B-0655	Christina Mary	Shirley		17			It is environmentally unacceptable that we are destroying all we have inherited. We are a village. Tourism will decline.
PR-B-0656	Mary G	Shirley		17			Too much traffic will cause gridlock, the same as Bicester.
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	17			In relation to the specific objectives set out in para 7.40 of the Consultation Objectives 7, 8, and 9 would be redundant in the event of the proposed developments around Begbroke going ahead.
PR-B-0705	Nick	Small	Stagecoach	17			Agrees with the range of Strategic Objectives. A little concerned that transport and accessibility related criteria might have been applied a little more generously for some options with the result that some options emerge more positively than in practice is likely to be justifiable. Strongly agree that Areas A and B are the most sustainable locations.
PR-B-0710	Selwyn	Phillips		17			By building Kidlington into a town it will push up house prices that the essential workers will not be able to afford.
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	17			Note that Yarnton is within Area A having been identified as the most sustainable broad location for identifying sites. Whilst acknowledging the need for an Infrastructure Delivery Plan, are concerned that no such proposals are in place in advance of the site selection process.
PR-B-0743	John	Tremlett		17			No
PR-B-0746	Adrian	White and 79 others	Petition with 80 signatories	17			GB land should only be released as a last resort and then only in phases and after proper testing of the economic assumptions as mentioned in their response to Question 1.
PR-B-0770	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	17			The SA represents a broad brush assessment and it is important for it to be supplemented by detailed site assessments. Some of the SA assessments are also suspect. E.g. Sites 20, 32 and 91. A justification for this statement is given in the rep.
PR-B-0786	Jane	Olds	Caversfield Parish Council	17			No
PR-B-0799	Ian	Sheppard		17			No consideration taken on the sustainability and effect for the areas of search
PR-B-0808	Chris	Robbins		17			No further comments
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	17			No

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0821	Alan and Suzanne	Mclvor		17			The strategy should be addressing the lack of housing not creating jobs to encourage migration to this area.
PR-B-0826	Alan	Dobson		17			No
PR-B-0829	Fergus	Campbell	Oxfordshire Clinical Commissioning Group	17			Note that the more remote or rural areas pose additional challenges due to distance from existing surgeries, and lack of sustainable options for new local surgeries. Have provided a detailed response in a separate statement as part of their representation.
PR-B-0830	Nigel	Buttler		17			There are concerns regarding the future of the Horton Hospital, with many of its services being transferred to the Oxford hospitals. Access to open spaces is becoming limited due to extent of housing development in rural areas.
PR-B-0832	Richard	Hills		17			No
PR-B-0837	David	Jackson	Savills on behalf of Christ Church, Exeter College, Merton College and OUP	17			The findings of the ISA for Area A are considered acceptable and appropriate to inform the Council's decision that strategic development sites within Area of Search A should proceed to site assessment.
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	17			Yes - support
PR-B-0842	Alex	Wilson	Barton Willmore on behalf of A2 Dominion Group Ltd	17			Detailed comments relating to the findings for Area of Search E are made, particularly those in Tables 7.1 and 7.2.
PR-B-0847	Richard	Cutler	Bloombridge LLP	17			The focus on Oxford is noted. But the role of Kidlington appears to be a missed opportunity, not least in relation to social inclusion. In accommodating Oxford's unmet need there should be a suite of benefits for Kidlington, including regeneration.
PR-B-0856	David	Smith		17			None
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	17			Detailed comments are made on the SA particularly objective 2 (health and wellbeing), objective 10 (air quality and congestion), objective 5 (creating and sustaining vibrant communities), and objective 8 (landscape)
PR-B-0868	Jennifer	McFadden		17			No comment.
PR-B-0877	David	Flavin	Oxfordshire County Council	17			Supports objective 6 and 10 of the SA. It considers that Objective 2 is not at all clear. The impact of development on health and wellbeing is not clearly recognised.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	17			The criteria chosen in figure 10n does not adequately reflect the lack of public transport options for key workers who have to work unsocial hours.
PR-B-0895	Dr Alison and Dr Simon	Street		17			Have no comments.
PR-B-0897	Rob	Lawrence		17			There has been insufficient time allowed by CDC for people to review the Sustainability Appraisal as well as the extensive main options paper.
PR-B-0907	Alison	Forfar		17			This appraisal has clearly failed as it has identified locations already categorised by you as unsustainable as potential options.
PR-B-0910	Ken	Pelton		17			The study should consider the harmful physical and mental health effects of spending time during the week in either stationary or slow moving traffic. The study should look at the benefits of cycling.
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	17			Concerned about the impact on Kidlington if areas A and B were developed. It will sacrifice the 'Green Belts' of Kidlington area and risk it becoming an Oxford suburb; destroying key recreational and nature conservation area of the River Cherwell.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	17			The SA does not make any reference to air pollution caused by the additional car journeys which will be generated from providing these extra homes. Oxford, because it is a major transport hub and being in a bowl surrounded by hills, already has a major problem with particulates and nitrogen oxide emissions. The pollution in the area close to the A34 should be closely monitored before any sort of housing development should be considered. Development further away from the harmful effects of air borne pollution around the A34 and the Oxford bypass would be beneficial, rather than adding to the problem.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	17			Development at Shipton Quarry is capable of meeting all the 15 objectives. Rep makes comments relating to Objectives 1, 3, 6, 10, 16 and 17.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0937	Philip	Rawle	Greenlight Developments	17			Lengthy response provided concentrating on the consideration of the objectives in the SA. Of the opinion that the initial selection of site options for testing should be extended to include Option E, particularly given the fact that this Option does not require the release of land from the GB.
PR-B-0944	David	Stone		17			The search areas have been selected due to a dubious relationship to Oxford, not because this is a better or more sustainable option. Economic projections are questionable and the resulting destruction to natural habitat is not justified and there are no acceptable exceptions. Local needs have to be understood and respected. Communities need good means of access with reduction in vehicle use while having good services, medical and education provision. Existing roads and facilities in North Oxford are overstretched and cannot cope. Development proposals do nothing to make the situation sustainable.
PR-B-0948	Tim	del Nevo		17			What has been said is very technical and detailed wording and have little or no effect.
PR-B-0956	Mark	Recchia	Banbury Town Council	17			Agrees with the SA assessments and suggests that any attempt to provide housing in and around Banbury to meet Oxford's needs would seriously compromise any attempts to meet these objectives.
PR-B-0957	Martin	Small	Historic England South East Historic Environment Planning Group	17			Note that the Initial Sustainability Appraisal Report concludes that all of the Areas of Search would have significant negative effects in relation to SA Objective 9: "To protect, enhance and make accessible for enjoyment, the historic environment." This is most unfortunate and must beg the question whether further development in any of the Areas would be truly sustainable. They discuss in more detail Table 5.1 and the purpose of GB in their representation.
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	17			Supports selection of sites that are south west, south and south east of Kidlington, as close as possible to Oxford.
PR-B-1015	Daniel	Hatcher	Rosconn Group	17			An assessment of a further Option relating to locations around existing train stations outside Banbury, Bicester and Kidlington should be undertaken.
PR-B-1016	Ben	Simpson	WYG on behalf of Bonnar Allan Ltd	17			Concerned that the SA does not adequately assess or compare the proposed areas of search and sites with respect to items of infrastructure that they are able and committed to deliver. This is a fundamental omission from the SA and in the case of New Alchester, means no account is taken of the location of the site across the railway line from Bicester to Oxford and our stated intention to deliver a new railway station there. The rep includes a comparative matrix that compares New Alchester against the other sites within the Areas of Search. This indicates a high score in comparison with other candidate sites.
PR-B-1024	Andrew	Hornsby-Smith		17			Has undertaken a detailed SA assessment of the sites in Areas A and B in response to question 11. Has provided a detailed response to this question.
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	17			The shortlisted areas of search (A and B) are agreed.
PR-B-1035	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford and Blenheim Palace	17			Accept overall findings of the SA, however consider that the Initial SA is in part simplistic and subjective in its assessment of the Areas of Search. Detailed comments have been made.
PR-B-1036	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford	17			The Initial SA is too simplistic and highly subjective in its assessment. Although the majority of the objectives utilised in the assessment are generally appropriate, consider that the outcomes, in terms of findings for the Areas of Search, have not been appropriately assessed. Have provided detailed comments on the Sustainability Appraisal.
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	17			A detailed and comprehensive response. The broad approach is supported. In terms of the identification of specific areas of search and to ensure that all potential areas are subject to SA, it is recommended that search area E should be extended to the SE to assess the area up to the bridleway to the east of the site, broadly running along Blackthorn Hill.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1039	Igor Niladri	Dyson		17			No. Cherwell is being pressurised into this. The unmet housing need comes from a wish to grow population and to drive the economic growth. Regardless of the damage to the environment, heritage and social benefits. Sustainable is not an appropriate word describing development on any existing GB. Consideration should be given to previously developed land, be affordable and house the current population first.
PR-B-1069	JP	Lyes		17			The purpose of GB and the role it plays in keeping an attractive separation between Oxford and Kidlington is lacking in the evaluation of sites. There also seems to be little assessment on the total impact of 4,400 homes on Kidlington specifically. Rather the report is full of references to Cherwell as a whole.
PR-B-1095	Val	Russell	Bodicote Parish Council	17			There are a lot of issues brought up by the SA Report, which point to policies that the Local Plan Part 2 would supposedly address. Given that this document is still in preparation, with policies yet to come forward, this is strange. As it stands, they have no idea how many homes could be allocated throughout Cherwell. Detailed comments on the SA Report have been made.
PR-B-1096	Greg	Blaquiere	Terence O'Rourke Ltd on behalf of the Vanbrugh Unit Trust and Pye Homes	17			Whilst the SA demonstrates that the area subject to these representations is justified against the alternatives, contend that the SA underscores the positive benefits of the sites and lack of constraints. The ranking of these sites should be at least equal to, if not better than, Option B Area. The rep continues by giving a detailed critique of the SA in its analysis of the promoted sites.
PR-B-1110	Iain	Johnson		17			No
PR-B-1132	Linda	Ward	Kidlington Development Watch	17			The Initial SA fails to address existing Green Belt policy and therefore ignores a key issue in its comparisons between search areas. Note that it is recognised that development in Area A would have adverse impacts on air quality.
PR-B-1133	Philip	Towler		17			The Green Belt should not be included in Areas of Search. The reasons for the creation of the Green Belt are as valid now as when created.
PR-B-1146	DJ	French	Deddington Development Watch	17			Have no specific comments on the RAG assessment of the 9 Areas of Search in Appendix 4 to the Initial Sustainability Appraisal, October 2016, Part 3. Regarding SA Objective 10 of the SA Framework "to reduce air pollution (including greenhouse gas emissions) and road congestion", large scale development will most likely have significant negative effects which can only be mitigated by not building new houses. As regards paragraphs 7.39 and 7.40, Objective 10 is as relevant to Cherwell as it is to Oxford.
PR-B-1154	Jim	Spencer		17			No comment
PR-B-1157	Nicola and Giles	Lewis		17			This seems very superficial.
PR-B-1160	Christopher	Hardman	Wolvercote Neighbourhood Forum	17			The objectives in 7.40 relate not only to Cherwell, but to everyone. Of the objectives in 7.34, concern is the consequences of Objective 17 if there is uncontrolled and unsustainable growth.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	17			Yes, Areas A and B are currently remote from many services, development would constitute de facto erosion of the Green belt and many of the plots identified carry the risk presently of flooding, thereby disallowing a complete, full, large-scale development. Development would not be cohesive and run the risk of creating a conglomeration of separate mini-estates whilst contributing to a higher flood risk.
PR-B-1163	Catherine	Arakelian		17			No. The exercise does not feel transparent. The "Initial Sustainability Appraisal" has predetermined which sites will go forward to the next phase, regardless of objections. If it was a site near to Oxford, that appears to have been the deciding factor. The planning officers have so little resource and are being urged on by the July deadline to complete the Local Plan Review, seem obliged to seek evidence that fits the desired outcome of the Growth Board and the Local Enterprise Partnership.
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	17			No comments

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1188	Carol	Matheson		17			Not impressed by the Sustainability Appraisal which is based on unverified assumptions. It hasn't considered the needs of local villages and their residents. Kidlington has been chosen as suitable because of its services, but these serve the current population and could not accommodate another 4,400 to 8,000 people. A large development would increase light, noise and air pollution and change the character of the village. Flooding is an issue and agricultural and recreational land will be lost.
PR-B-1224	Theresa	Goss	Adderbury Parish Council	17			Supports SA objectives and findings both those specific to Oxford and more general ones relating to CDC.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	17			It is noted in Appendix 1a of the ITA that in Search Area D (Arncott) the area performs relatively well in terms of commuter travel mode split compared to Areas A and B, and that Area D is the only area in which congestion is not an issue within the areas of search. Appendix 1a advises that there is no bus provision to Area D. This is not the case.
PR-B-1229	Henry	Brougham		17			No comments.
PR-B-1230	T M M	Green		17			The proposal to build all these new houses is not sustainable without very serious attention to the local infrastructure. This must be improved before there is any attempt to build houses between Oxford and Kidlington.
PR-B-1233	Simon	Gamage	RPS Planning and Development on behalf of Mr R Bratt	17			Agrees with the conclusions with regards to the effect of Area of Search H on the delivery of the stated Sustainability Objectives with respect to Cherwell District. Do not agree with the effects of Area H on the delivery of the stated Sustainability Objectives with respect to Oxford. As set out in response to Q5 disagree with the conclusions with regards to the effect of Area H on the delivery of Sustainability Objective SO16, with respect to Oxford.
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	17			The SA is very broad brush particularly when assessing Area of Search I. It is very difficult to compare this large area to the other options which are more defined and location specific. Due to the size of Area I there may be large variances in how individual villages may score in the sustainability criteria.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	17			It is noted that Area of Search A scores very well in relation to other Areas of Search that are more remote from Oxford.
PR-B-1240	Suzanne	Willson-Higgins		17			The SA is a high level study, based on a number of assumptions and subjective judgements, and therefore can only have limited value in assessing suitability of locations for development. Discusses the assessment of area A against the different objectives in the SA, which has both positives and negatives and highlights that the existing services and facilities would not be able to accommodate new development.
PR-B-1243	Kazimiera	Kantor		17			Cannot comment given the short timescale given to research this matter.
PR-B-1255	Kezia	Sheppard		17			No.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	17			The SA has failed to have regard to the Green Belt Policy, and so ignores a key issue in its comparisons between Areas of Search. It unreasonably 'levels the playing field' as a result. Are concerned about AQMA levels in Kidlington and that this is likely to be further affected by additional growth. Many of the other findings are inconclusive until further detailed assessment has been undertaken. Understand that a revised SA is in the pipeline, but consider that the current version does not provide a strong direction of travel for the strategy. Too much is uncertain, and also consider that, in the absence of adequate information at this time, the 'traffic light ratings' given are unduly optimistic and overstate anticipated benefits.
PR-B-1272	S G	Wakeling		17			Am not able to comment at such short notice.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	17			Support the broad approach and make no further comments at this stage in terms of the role of the LPP1 Addendum (partial review). It is considered to be capable of being compatible with the existing spatial strategy of the already adopted LPP1.
PR-B-1287	Tenley	Soanes		17			GB is critical for sustainability, all need spaces, that is why it was created. So far no extraordinary need has been identified that would jeopardise it.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1294	Giles	Hughes	West Oxfordshire District Council	17			Support the inclusion of the criteria that test the relative sustainability of the areas of search in terms of meeting Oxford's needs and in terms of the impact on Cherwell. However, it is not clear that the impacts on West Oxfordshire have been considered even though areas adjoin or are very close to West Oxfordshire.
PR-B-1298	James	Jocelyn		17			The Sustainability Appraisal is compromised by its erroneous assumption that the 4,400 additional homes proposed are all relevant to employment growth in Oxford. As noted above, the Interim Sustainability Appraisal ignores the specificity of Oxford's housing need and pays too little heed to the wider context of commuter transport development between Oxford and London and Birmingham. See comments to Question 1.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	17			Detailed comments have been made relating to Objectives 5, 7 and 8.
PR-B-1342	Laura	Precious	Quod on behalf of Albion Land	17			The initial SA did not include any testing of impact on Green Belt purposes and the SA similarly does not consider such impacts. The SA process is flawed in this respect as it fails to consider all relevant planning considerations holistically, as required by the NPPF. Against CDC's SA metrics, the Site scores better than all but one site in Areas A and B in terms of its impacts on Cherwell and better than or equal to many of the sites in Areas A and B in terms of its impact on Oxford; Have provided a detailed statement in response to this question in the representation.
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	17			Have no specific comments to make as the results are not unexpected. Site specific testing will be producing more conclusive results.
PR-B-1346	Neil	Tiley	Pegasus on behalf of the Dorchester Group	17			The SA undertakes a single assessment of each Area of Search which does not recognise the individual impacts of the development of smaller parcels within each Area of Search. The SA has then been used to discount any strategic sites in all areas but A and B. The SA of Chippenham Site Allocations Plan has been found to be lacking for precisely this reason where the Inspector confirmed that there are fundamental concerns with the adequacy of the site selection process, which was to do with the approach, firstly, broad strategic areas and secondly specific locations within those areas to allocate for development. This resulted in some locations not being evaluated in the same detail as others before being rejected. Therefore, it is necessary to consider all reasonable alternatives across a range of scales in order to prevent future legal challenges to the Partial Review. Have provided a detailed explanation in the representation.
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	17			It is unclear how the rankings have been assessed or how they were determined. It is also noted that Objective 8 considers AONB but not Green belt designations. This means that Green belt is excluded from the SA Objectives assessment.
PR-B-0837	David	Jackson	Savills on behalf of Christ Church, Exeter College, Merton College and OUP	18	A		The selection of strategic development sites within Area A for further assessment is supported. Consistent with this finding the North Oxford Triangle should be allocated as a strategic development site to contribute to meeting Oxford's unmet housing needs.
PR-B-0944	David	Stone		18	A		No, the sites selected are intended to appease Oxford, they are not the most suitable sites, given unrealistic expectations for affordable housing and chronic transport issues. I do not believe sites in area A are suitable, they are unsustainable and unsound. Sites north of the district can offer more convincing alternatives than indicated and the balance needs readjustment.
PR-B-0948	Tim	del Nevo		18	A		Object to any development within the GB. If you develop area A, Kidlington will become part of Oxford. GB and the green lung needs to be maintained between these two. Developing on the land close to Cutteslowe Park will have a significant and detrimental effect on this wonderful open space.
PR-B-1230	T M M	Green		18	A, B	PR38, PR50	Sites which are not GB should be selected before sites in areas A and B which are largely GB. Treating PR38 and PR50 as preferred and sustainable sites due to their proximity to the station is unsound. There will be nothing to stop people who work in London buying houses close to the station.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1035	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford and Blenheim Palace	18	A, B		Housing options in areas A should be thoroughly explored and taken forward or discounted before those in Areas of Search B are considered.
PR-B-1094	Andrew F	Hickman	Middleton Stoney Parish Council	18	A, B		Agrees with the selection of Areas A and B
PR-B-1111	Pat	Clissold		18	A, B		Options A and B. Kidlington is becoming a dormer town for Oxford City and a suburb of Oxford. It has no separate identity now.
PR-B-1165	Caroline	Johnson		18	A, B		Do not agree, object to development on GB, other sites are available so there are no exceptional circumstances to justify using it. The metrics and measurements in Figure 10 show that these areas may give access to Oxford Centre by car. They do not test access to the major employment centres of Headington and Cowley. They show proximity to planned but not necessarily funded transport investments with no details of the improvements. All of the sites are shown as red for road safety incidents – is it reasonable for this issue to be ignored and additional transport movements to be added in these areas?
PR-B-1188	Carol	Matheson		18	A, B		Cherwell has concluded that areas A and B around Kidlington would be best for this large scale development, based on the flawed argument put forward by the Oxford Growth Board. It was assumed that the GB could deliver all these houses. Do not agree with this assumption or with the merging of Oxford to Kidlington and Gosford. Object to destroying agricultural land; the landscape; the character of the rural villages; removing current recreational areas; and possibly harming the canal. The Environment has not been considered. It seems little weight has been given to how building on 'water catchment land' increases flooding and how congestion in Kidlington can be addressed.
PR-B-0710	Selwyn	Phillips		18	B		Given Kidlington's proximity to Oxford it is an easy target along with Begbroke and Yarnton. Area B seems to offer more.
PR-B-0890	Chris	Dicks		18	C, E		No, areas C and E around Bicester should not have been dropped at this stage of the process.
PR-B-0825	Simon	Joyce	Strutt and Parker on behalf of Mrs A Darbishire	18	E		No. Sites in Area E should have been considered by the SA as the exceptional circumstances to release GB in Areas A and B do not exist.
PR-B-0937	Philip	Rawle	Greenlight Developments	18	E		No. GB land should only be considered for development when all other opportunities for delivering sustainable growth have been exhausted. The initial selection of sites should be extended to include Option E.
PR-B-1306	Frank	Vreede		18	E		Given that all the Options performed equally poorly against the objectives that were considered where the effects only relate to Cherwell, only the Options that recorded positive effects on Oxford would be selected. Effectively, these were the options closest to Oxford, quite simply. In other words, including all the Areas was pointless, as indicated in answer to question 16. Option E should be considered too.
PR-B-1124	Chris	Thornton	Ardley with Fewcott Parish Council	18	G		Do not agree with Option G
PR-B-0200	John and Elizabeth	Gittings		18		PR123	PR123 is not reasonable as it would kill the golf course, which has barely enough space as it is.
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	18		PR125	Object to extending Kidlington from Water Eaton Lane south west to the A34 and consider that it may close the 'green gap'.
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	18		PR14	Object to the development of the site for the same reasons as PR9 and PR17
PR-B-0447	Laura, John, Benito	Wainwright		18		PR14, PR27	Don't agree with the sites around Kidlington and in particular sites PR14 and PR27. The lovely countryside from behind The Moors to the river Cherwell is much valued and enjoyed by residents and it would be a crime against the environment to damage it. There is also a flood risk on these sites.
PR-B-1126	Jamie	Lewis	Hunter Page Planning on behalf of M and G Real Estate	18		PR153	The inclusion of Site PR153 is strongly supported by M and G Real Estate being located adjoining the Deddington satellite of Hempton. As set out in response to Q12 and Q13 above, there are further opportunities at Deddington which should be considered.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0907	Alison	Forfar		18		PR157	Why has site PR157 been included if this site has been categorised as unsustainable in two previous local plans. Nothing has changed to the village. Development would constitute village extension which has been previously refused. Your proposal would suggest that 200 homes could be added to a village that currently has 55 homes with no local infrastructure or transport links would be in any way sustainable. It would not. Village locations are not suitable for the of the large scale 100+. The essential character of the village and its area will be destroy.
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	18		PR20	Object to the development of this site as it would compromise the separate identities of the two settlements.
PR-B-0957	Martin	Small	Historic England South East Historic Environment Planning Group	18		Pr22, PR32, PR50, PR181	Sites PR22, PR32, PR50 and PR181, should be eliminated from further consideration at this stage due to their potential impact on designated heritage assets (and, in the case of Site PR181, because of the high contribution it makes to Green Belt Purpose 4) (in addition to another site in Area of Search B, Site 21, which we consider should also be eliminated from further consideration because of the high contribution it makes to Green Belt Purpose 4).
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	18		PR27	Object to the development of the site for the same reasons as PR9 and PR17
PR-B-1281	G M J	Taylor		18		PR27, PR14, PR32	Am absolutely against building on these sites. The whole area between The Moors and the River Cherwell must be protected. This area is greatly valued by all the residents of Kidlington. One of the few beauties of Kidlington is once you walk down to St Mary's Church into the conversation area, your out into the open Oxfordshire countryside. Where deer roam and in the summer the water meadows are full of swallows. The area is not overlooked by houses and the peace and quiet of the area needs protecting.
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	18		PR32	Object to the development of the site for the same reasons as PR9 and PR17
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	18		PR38	If the North Oxford site is to be developed only the southern half of these sites should be developed to maintain the 'green gap' to Kidlington. Failing that the A34 and the rail line should be considered as natural barriers to maintain the gap.
PR-B-0821	Alan and Suzanne	Mclvor		18		PR38, PR50	No. Areas A and B "preferred sites" largely GB. Sites that are not GB should be selected initially. Treating PR38 and PR50 as preferred and "sustainable" sites due to their location near the station is unsound. There will be nothing to stop people who work in London becoming commuters and buying houses close to the station.
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	18		PR50	If the North Oxford site is to be developed only the southern half of these sites should be developed to maintain the 'green gap' to Kidlington. Failing that the A34 and the rail line should be considered as natural barriers to maintain the gap.
PR-B-0019	Edward	Dowler	Middle Aston Parish Meeting	18			Yes
PR-B-0033	Henry	Munday		18			7.44 infrastructure and services already stretched, don't believe Kidlington should provide Oxford's houses, land prices will rise.
PR-B-0039	Susan	Cooper		18			Proximity to Oxford to minimise travel distance is important, as is a Park and Ride and good bus service, so areas A and B are reasonable. This could be further strengthened by extending bus lanes. Houses in the GB should be "green" in the carbon-footprint sense. Loss of GB could be compensated by creating a park there.
PR-B-0055	Cynthia	Hall		18			No.
PR-B-0057	Matthew	Taylor	Aitchison Rafferty	18			No. Client owns an 8.7ha site of which 1ha has approval for 20 dwellings. Part of the remaining 7.7ha is in the current SHLAA (ref: WG019) for an additional 50 houses. The site is also included in the draft Weston on the green Neighbourhood Plan. This site would provide continuity of the village as opposed to sites PR82 and PR83 which lie to the B430.
PR-B-0058	Anthony	Hall		18			No, because they are all destroying green belt. Also the trick of showing each site separately so that it appears to be an insignificant encroachment won't wash: put all the sites together and you create almost complete infill between Kidlington and Oxford, destroying the environment of both.
PR-B-0060	Sue	Mackrell	Bicester Town Council	18			Agrees with the initial selection of site options for testing.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0119	C A	McCall		18			Sites A and B, have not had time to look at these documents.
PR-B-0156	Val	Colby	Berrys on behalf of Cancer Research UK	18			As above for Question 17.
PR-B-0171	Peter	Worth		18			No do not agree with the sites. Yarnton could do more and provide support to the District and County by providing some of the housing.
PR-B-0186	Paul	Walker	Oxford Bus Company	18			Pleased to note that the areas of search have been assessed utilising the commuter travel within each area noting proximity to current sustainable transport facilities that serve Oxford, access to jobs by public transport and proximity to proposed improvements as set out on table 6.2 of the interim Transport Assessment.
PR-B-0209	Patrick and Julia	Jennings		18			No. Areas A and B are green belt sites, so it should be sites elsewhere that are initially selected
PR-B-0637	Prof Martin LG	Oldfield		18			Disagree. Exceptional circumstances do not exist justifying the destruction of GB. Area A and B should be excluded.
PR-B-0643	L	Allen		18			No, the GB must not be touched. Smaller sites must be considered and it is likely this will yield more brownfield sites. If there are empty houses within Oxford, as reported by the press, they need to be used. There needs to be acknowledgment of the daily traffic chaos that surrounds Oxford. Some sites e.g. site 20 is listed as residential yet it is mostly industrial?
PR-B-0653	Peter	Webber		18			These sites should certainly be listed but be mindful of providing London overspill.
PR-B-0655	Christina Mary	Shirley		18			No, there will be no wildlife, no individuality just one large overcrowded housing estate.
PR-B-0656	Mary G	Shirley		18			No, what will happen to wildlife
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	18			No for the reasons given in responses to Q2 and Q16 above.
PR-B-0705	Nick	Small	Stagecoach	18			Agree that only sites within Areas A and B warrant more detailed testing.
PR-B-0711	Anthony	Matthews	Shipton-on-Cherwell and Thrupp Parish Council	18			See response to Q11
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	18			Note that Yarnton is within Area A having been identified as the most sustainable broad location for identifying sites. Whilst acknowledging the need for an Infrastructure Delivery Plan, are concerned that no such proposals are in place in advance of the site selection process.
PR-B-0743	John	Tremlett		18			No opinion
PR-B-0745	Dr Ian	Scargill	Oxford Green Belt Network	18			Object to all sites in Options A and B for testing as it involves development in the GB because GB which was designated to restrain development pressures which could damage the character of Oxford City and its heritage..." as stated in Policy ESD14 of the adopted Cherwell Local Plan. Support the five purposes of the GB, and in particular protect the setting band character of the historic city of Oxford. The reference to the character of the City, as referred to in Cherwell's local plan is often overlooked but it is a crucial arm of the GB policy. The overall levels of growth are unnecessarily high and alternatives to development in the GB are available; therefore consider that exceptional circumstances do not exist to justify development in the GB and that Options A and B are not reasonable.
PR-B-0770	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	18			Strongly agree that areas within Option A and Option B are the most sustainable locations for development and therefore support the initial selection of these site options for testing.
PR-B-0786	Jane	Olds	Caversfield Parish Council	18			Yes
PR-B-0793	Philip	Morley	North Oxford Golf Club	18			Suggest that the consideration of rapid transport links, plus the likelihood of dramatic reductions in vehicles on the road and the growing healthcare need should be included in the selection process for options for testing.
PR-B-0796	David	Tighe		18			No
PR-B-0799	Ian	Sheppard		18			No.Do not seem to meet Cherwell's district needs, only to actively pacify City Council.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0808	Chris	Robbins		18			No further comments
PR-B-0809	Karen	Selway		18			No. Development should be dispersed throughout CDC, not putting all 4,400 properties around Kidlington and neighbouring villages.
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	18			Yes
PR-B-0826	Alan	Dobson		18			No
PR-B-0830	Nigel	Buttler		18			Areas for testing should be confined to those areas close to Oxford.
PR-B-0832	Richard	Hills		18			Yes
PR-B-0838	David	Jackson	Savills on behalf of University of Oxford, Christ Church, Exeter, Magdalen, Merton and St John's Colleges	18			The selection of strategic development sites within Area A for further assessment is supported and after that Area B. This approach reflects the 'proximity principle' and is also supported in general by the findings of the ITA and ISA. It also accords with the intention 'to provide new balanced communities that are well connected to Oxford.'
PR-B-0839	Mark	Rose	Define on behalf of William Davies Ltd	18			The assessment only includes sites within the 2 preferred areas of search. It does not reflect the need to facilitate the delivery of a portfolio of sites to ensure a 5 year housing land supply, and that the identified need is met within the plan period. It ignores the potential contribution of sustainable sites elsewhere that reflect the Adopted Local Plan strategy.
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	18			Yes - support
PR-B-0841	Darren	Bell	David Lock Associates on behalf of Hallam Land Management Ltd	18			Do not agree with the approach that has led to only Options A and B being assessed. The sustainability of all reasonable alternatives is not being met. Serious concerns about an emerging strategy that would be reliant on a small number of strategic sites. More appropriate to have a strategy that is realistic and balanced to allow market choice on different size sites in different locations as recommended by the NPPF.
PR-B-0842	Alex	Wilson	Barton Willmore on behalf of A2 Dominion Group Ltd	18			A2D objects to CDC only taking forward Areas A and B. Areas of Search should have strong connections with Oxford City however this does not necessarily mean the areas geographically closest to Oxford should be chosen. Option E provides an opportunity to provide unmet need in a location with strong socio-economic connections to Oxford and having Garden City status.
PR-B-0847	Richard	Cutler	Bloombridge LLP	18			Yes. Pleased that PR14 (The Moors) is included in the 38 possible sites. Detailed comments in support of this site already made in answer to earlier questions again rehearsed here.
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	18			Do not agree that narrowing down the Areas of Search, without taking account of the existence of GB, the key principles of preventing towns and villages merging, and protecting open countryside, is the right one. In some places, positive effects have been overstated and negative effects understated. The decision to focus on these Areas is derived from a flawed argument presented by the Oxford Growth Board.
PR-B-0866	Matt	Todd		18			No. Nothing in the GB should be considered. Favourable inclination to areas A and B which are in the GB. Imperative that GB is preserved. These are not exceptional circumstance when many options available.
PR-B-0877	David	Flavin	Oxfordshire County Council	18			Agrees with the initial site selection.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	18			Unable to respond - due to lack of time
PR-B-0882	Julia	Trowles		18			No. Not those within the GB.
PR-B-0883	Peter	Trowles		18			No. Not those within the GB.
PR-B-0895	Dr Alison and Dr Simon	Street		18			Support options for testing in site A. Kidlington could support some further development to the north, emphasising the amenities provided by the canal. Development to the west of the canal should not be supported exclusively by Yarnton Road hump backed bridge. Do not support development on the GB between Kidlington and Oxford. Also do not support any development on section B.
PR-B-0896	Lucy and Richard	Miles		18			No.
PR-B-0897	Rob	Lawrence		18			No.
PR-B-0910	Ken	Pelton		18			Object to development in the GB.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	18			Strongly objects to development in the Oxford GB. They have set out the purpose and function of the GB around Oxford and that they support this designation. They have provided a detailed statement in their representation. Note that the lack of any substantial selection process makes it impossible to review and comment meaningfully on all the potential sites, and meanwhile a large number of communities are being affected by planning blight. For example, at 50 houses per hectare, the 4,400 houses could occupy about 86 hectares of land, but Area of Search Option A alone covers 1,109 hectares! Whilst accepting that the Council has a duty to consider all sites submitted as part of the process, the fact that no basic screening has been undertaken rather leaves the impression of attempting to overwhelm the public with superfluous information.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	18			The proximity of sites within Cherwell to Oxford is important in assessing the suitability. Only land to the south of Cherwell is sufficiently close to Oxford to meet the Duty to Cooperate requirement. The most suitable sites are Option A and Option B.
PR-B-0931	Jane	Olds	Fringford Parish Council	18			Yes
PR-B-0935	David	Lock	David Lock Associates on behalf of Gallagher Estates	18			Strongly disagree with the approach undertaken that solely assesses the 38 sites within Areas A and B. CDC have a duty to make sure that the proposals are the most appropriate given the 'reasonable alternatives' and to demonstrate how the tests of soundness have been met. The Options Paper alludes to a preferred strategy which seeks to concentrate growth solely across a small number of strategic sites all closely geographically related. This rigid strategy could have severe implications for delivery of homes. It is considered that a range of sites will be required.
PR-B-0956	Mark	Recchia	Banbury Town Council	18			Following the criteria detailed in the Initial Sustainability Appraisal and more broadly within the partial review document as a whole, Banbury Town Council agrees with the initial selection of site options for testing.
PR-B-0957	Martin	Small	Historic England South East Historic Environment Planning Group	18			The 38 sites in Areas of Search A and B include 19 sites that include or are within the setting of designated heritage assets (see our response to Question 11). Development of these sites therefore has the potential to be harmful to these assets and, logically, would therefore prefer that these sites were eliminated from consideration. Have discussed in more detail some of the sites in their representation.
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	18			Supports selection of sites that are south west, south and south east of Kidlington, as close as possible to Oxford.
PR-B-1015	Daniel	Hatcher	Rosconn Group	18			Do not agree that a reasonable assessment of all available alternative options has been undertaken. The decision to assess areas A and B have not been informed by a robust and credible evidence base; therefore do not agree to the initial site selection. Further discuss paragraph 7.29. Consider that other areas have been unreasonably discounted, which would not harm the GB and can be sustainable sites for development.
PR-B-1016	Ben	Simpson	WYG on behalf of Bonnar Allan Ltd	18			No, Areas of Search A and B are not the only or optimal locations to meet Oxford's unmet needs. Sites in Areas E (including New Alchester) and F should also be tested given their locations around direct rail links with Oxford and the Science Vale.
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	18			No as there is no credible reasoning why Site 41 was not taken forward.
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	18			The progression of those sites within the selected areas of sites for testing is supported. A justification for this view is given in the rep.
PR-B-1036	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford	18			Sites in Search Area A should be thoroughly explored first as the most appropriate location for new homes to meet Oxford's unmet needs. Do not consider that Areas of Search B are the most appropriate location to accommodate Oxford's unmet housing need given its lack of immediate proximity to the City of Oxford, transport links and associated infrastructure.
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	18			See response to Q13, Q15 and Q17 above.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1039	Igor Niladri	Dyson		18			No. Cherwell is being pressurised into this. The unmet housing need comes from a wish to grow population and to drive the economic growth. Regardless of the damage to the environment, heritage and social benefits. Sustainable is not an appropriate word describing development on any existing GB. Consideration should be given to previously developed land like at the former air base at RAF Upper Heyford, be affordable and house the current population first.
PR-B-1069	JP	Lyes		18			Could not find this on website.
PR-B-1095	Val	Russell	Bodicote Parish Council	18			Objects. Areas of search should be in or close to Oxford, to meet Oxford's unmet housing needs.
PR-B-1099	Alan	Storah	Oxford City Council	18			Agrees with the initial selection of site options for testing as they serve to endorse its answers already given to previous questions.
PR-B-1108	Tom	Hockaday		18			It is not clear to me what these are.
PR-B-1110	Iain	Johnson		18			Disagree. Good transport into Oxford from the area between Kidlington and Oxford is negated by serious traffic congestion. The train station may allow some people to commute into Oxford, on overcrowded trains due to lack of Chiltern railway capacity, as reported in the news. However the houses will provide easy access to London. While desirable for commuters, it will not help Oxford workers.
PR-B-1132	Linda	Ward	Kidlington Development Watch	18			Strongly disagree with the initial testing of site options. These sites are almost all in the Oxford Green Belt the fundamental purpose of which is to protect the historic city of Oxford from the effects of over-development as is acknowledged in the approved Cherwell Plan. The City Council's apparent strategy of directing more and more growth towards and within Oxford is a damaging one to the City itself as well as to the areas surrounding it. The sites selected for testing (those in Areas A and B) have been chosen in order to support this strategy and will be equally damaging.
PR-B-1142	Alan	Lodwick		18			No. Do not agree with the initial selection of site options. They are almost all in the GB. Alternative strategies to development on these sites exist as explained in answers to Questions 9 and 16.
PR-B-1146	DJ	French	Deddington Development Watch	18			The selection of the 38 sites within Options A and B is consistent with the findings of the Interim Transport Assessment and the Initial Sustainability Appraisal.
PR-B-1154	Jim	Spencer		18			No comment
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	18			Strongly objects to the Areas of Search and development in the Green Belt. Do not consider that there are exceptional circumstances' for making alterations to the Green Belt boundaries.
PR-B-1157	Nicola and Giles	Lewis		18			Object strongly to any site within GB. CDC's adopted local plan 2015 which supported GB should be upheld. Alternatives development sites exist so there are no exceptional circumstances to overturn GB policy. Developers should be encouraged to activate available planning permissions rather than wait for more profitable GB sites. Refusal to cooperate with Oxford City's apparent unmet housing demand might encourage them to do so.
PR-B-1160	Christopher	Hardman	Wolvercote Neighbourhood Forum	18			The selection of all the sites within A and B is not appropriate. In 7.46 it states the importance of 'convenient affordable and sustainable travel opportunities'. The sustainability assessment is based on proximity to transport routes. Insufficient weighting is given to the current and future nature of these routes and the consequences of increasing the traffic. The problem is arising from the positive assessments of these site due to their location close to key transport infrastructure, no matter what the infrastructure is capable of delivering. Have provided a detailed comment in the representation.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	18			No. Proximity to interchanges, whilst arguably suitable for distribution or industry, is by nature of its very proximity unfit for reasons of noise and pollution, for housing

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1163	Catherine	Arakelian		18			No. The exercise does not feel transparent. The "Initial Sustainability Appraisal" has predetermined which sites will go forward to the next phase, regardless of objections. If it was a site near to Oxford, that appears to have been the deciding factor. The planning officers have so little resource and are being urged on by the July deadline to complete the Local Plan Review, they seem obliged to seek for evidence that fits the desired outcome of the Growth Board and the Local Enterprise Partnership.
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	18			No comments
PR-B-1192	Robert	Selway		18			No. 4,400 should be dispersed throughout the district not concentrated around Kidlington and neighbouring villages.
PR-B-1224	Theresa	Goss	Adderbury Parish Council	18			Agrees with the initial selection of site options for testing.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	18			No. The comments made on the ISA and the ITA ought to be considered by the Council and all the Areas of Search, including Area D ought to proceed to site assessment.
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	18			The selection of site options appears broad, suggesting a reasonable scope of search.
PR-B-1227	Richard	Silvester		18			No, see above comments.
PR-B-1229	Henry	Brougham		18			Agree.
PR-B-1232	Mark	Schmull	Nathaniel Litchfield and Partners on behalf of The Church Commissioners	18			Consider that these exercises have been carried out prematurely, and should be repeated once all sites put forward as part of this current consultation have been considered as a whole. Additional sites/proposals (including strategic infrastructure proposals) may result in different findings for these assessments.
PR-B-1233	Simon	Gamage	RPS Planning and Development on behalf of Mr R Bratt	18			Considers the selection of only sites within Areas A and B to be narrowly focused, and suggest that sites outside those areas could also provide potentially suitable locations for development that would contribute to meeting Oxford's unmet need. Encourage the Council to consider at this stage where their next most appropriate preference for additional housing would be if further land other than in Areas A and B is required.
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	18			In accordance with the recently adopted Part 1 Plan, sites should be considered in Area of Search I including, for example in Cropredy, which is a Cat 1 village, i.e. a larger and more sustainable village to which growth is directed to in the Part 1 Plan.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	18			Yes. The general conclusions of the Initial Sustainability Appraisal and the ITA are supported.
PR-B-1240	Suzanne	Willson-Higgins		18			Notes that the SA and the ITA conclude that the sites in areas A and B perform best, without taking into account the existence of the Green Belt, the key principles to prevent towns and villages merging, and protecting open countryside, is the right one. Concerned about the way the scoring has been carried out in the assessment, and the decision to focus on these areas is from a flawed argument presented by the Growth Board. The Oxfordshire Growth Board determined apportionment for Cherwell based on the assumption that Green Belt sites could deliver development.
PR-B-1243	Kazimiera	Kantor		18			No. It seems that an easy option has been selected which would have serious consequences. I am also unclear how these areas would not become a big dormitory for London particularly as the building of the houses would be probably be completed prior to the "jobs" being created.
PR-B-1251	Susan	Silvester		18			No, see above comments.
PR-B-1255	Kezia	Sheppard		18			Absolutely not.
PR-B-1256	Nicola	Mallows	Gresswell Environmental Trust	18			It is inappropriate to test for sites within the GB – since under the recommendations of the NPPF they should in principle remain open. Since the SHMA figures are based on wild economic conjecture, since and no exceptional circumstances exist, there is no need to assess these areas for development. The land is GB and therefore unsuitable for development.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1263	Katie	Silvester		18			No.Do not consider exceptional circumstance exist enough to develop on GB. The level of predicted growth is high and there are alternatives within the city that need to be explored, rather than using GB. The effect to Cutteslowe Park as an important consideration.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	18			Understands that many fundamental issues have yet to be considered. Flood risk is a particular concern around Kidlington, and that assessment may well eliminate the potential for large areas within Search Area A. Strongly recommend that the selection is reduced as early as possible once these factors are brought to bear. The overall capacity is not proven at this stage. Other options outside Areas A and B should not be discarded at this stage.
PR-B-1272	S G	Wakeling		18			Only if responses to questions 1 to 4 about are taken into account.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	18			The Partial Review is an Addendum to the already adopted LPP1 if it is entirely consistent with the vision and spatial strategy of LPP1 and does not in any way depart from the fundamental principles it defines for the location of growth in Cherwell. However, a review of the capacity of existing Strategic Sites should also form part of the supply to address the unmet housing need.
PR-B-1294	Giles	Hughes	West Oxfordshire District Council	18			No objection to the approach adopted. A relatively large number of sites have been selected for testing in detail, and a significant number of these have major weaknesses as evidenced by the initial appraisal and transport assessment.
PR-B-1298	James	Jocelyn		18			No. Please refer to answer to Question 11.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	18			See above, re A44 Corridor
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	18			The approach is considered to be logical, pragmatic and sensible and agree with the initial findings. However Green Belt should not be released unless completely justified and tested against the requirements of the NPPF.
PR-B-1346	Neil	Tiley	Pegasus on behalf of the Dorchester Group	18			An early review of the Local Plan should be undertaken to meet the up-to-date housing needs across both Cherwell and any remaining unmet needs of Oxford City. This will necessitate an alternative initial selection of site options in the longer-term.
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	18			The Initial site selection of areas A and B is not a robust approach. Indeed, the E A of Plans and Programmes Regulations 2004 Part 3, 12 (2) states that "The report shall identify, describe and evaluate the likely significant effects on the environment of - (b) reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme". Other Areas of Search are also reasonable alternatives and should have been assessed. The rep provides a detailed argument.
PR-B-1298	James	Jocelyn		19	A, B		See answer to Question 15. A lengthy study is not needed to conclude that Areas A and B are most convenient for transport. And for the purposes of the Partial Review, it seems that 'convenience' and 'sustainability' have become closely related concepts. Like the Sustainability Appraisal, the Transport Assessment smells of a document written to justify a preconceived set of conclusions.
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	19		PR20	The ITP provides a useful snapshot of the transport sustainability of Strategic Development Sites. However, the University has some specific concerns in relation to the methodology and scores allocated to Site PR20, Begbroke Science Park. Detailed comments are provided relating to Criteria 1 and 4, and the methodology. However it concurs with the conclusions that the site is a suitable place for development in terms of accessibility and connectivity to Oxford and wishes to reiterate the strong transport case for development at site 20.
PR-B-0985	Peter	Collins	Islip Parish Council	19		PR30	The scoring should be higher in acknowledgement of the benefit of its proximity to Islip Station.
PR-B-1030	Jonathan	Harbottle	Land and Partners Ltd	19		PR46	Development in rural areas gives the opportunity to provide significant benefits to smaller communities. Sites in villages benefit from a pre-existing network of infrastructure which could benefit from improvement as a consequence of development. Infrastructure is not necessarily a constraint. Site PR46 is in a sustainable location well related to the village. Growth in this village will help to sustain its existing services and facilities.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	19		PR48	Yes. Specific detailed comments are made on the metrics used in the ITA carried out on the potential strategic development sites within Areas A and B. These proposed changes to site 48 would mean that it would move up the table of potential development sites in Fig 10 .
PR-B-1036	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford	19		PR51	Have provided specific comments on the ITP assessment and key findings in relation to site PR51. Have provided a Site Transport Appraisal undertaken by Vectos which provides additional information in respect of the site. The thrust of the findings are: The scoring of Site PR51 in the ITP is negatively affected by the placing of the centroid point in the centre of site PR51 in its entirety which is not accurate given only the eastern portion of the site is proposed for housing. When the centroid point is placed in the centre of the area which is proposed to come forward for housing, concentrated to the east of Site PR51 at its border with Yarnton, the scoring in accordance with the ITP's criteria improves considerably. Propose correcting the centroid point the RAG's change (see rep) and suggest that scorings should also be weighted, with some given greater importance than others. Questions in relation to congestion and accidents should be given lower weightings as congestion and accidents tend to increase in areas more suitable for sustainable development (i.e. closer to urban areas). These changes should be reflected within the Sustainability Appraisal and RAG's for Site PR51.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	19		PR74	The further consideration given to the site options within Areas A and B are welcomed. However, the rep includes detailed comments and criticisms of the assumptions and metrics used particularly in how it relates to Site PR74.
PR-B-0019	Edward	Dowler	Middle Aston Parish Meeting	19			No
PR-B-0033	Henry	Munday		19			Roads are congested, it's good however to see the A40 Banbury Road roundabout has traffic lights.
PR-B-0055	Cynthia	Hall		19			Houses should be built in response to actual, not guessed use.
PR-B-0057	Matthew	Taylor	Aitchison Rafferty	19			Co-ordinating between the City and County Council will encourage housing development, as the Cherwell-Oxford border provides the opportunity to release transport funding.
PR-B-0060	Sue	Mackrell	Bicester Town Council	19			Concerned that robust solutions will not be in place to cope with additional traffic.
PR-B-0119	C A	McCall		19			Not had a chance to read documents.
PR-B-0171	Peter	Worth		19			It is already good, more housing would require more buses and take some cars off the roads.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0186	Paul	Walker	Oxford Bus Company	19			<p>Consider that providing attractive public transport is extremely difficult. Have built a much improved network of frequent and regular bus service linking all the main centres of population. Discuss in more detail in their representation on managing peak and off-peak demand, opportunity cost, Oxfordshire County Council funding. Recommend that only by taking advantage of the main existing transport corridors can development be provided at the outset with relevant and credible use of private car as opposed to creating entirely new bus service, which may not be commercially sustainable. Public transport probably isn't given the prominence it deserves with developer requirements not being detailed or prescriptive enough at source and how they align with LEP objectives. This is something that needs to be considered, and are supportive of the view that development proposals should be accompanied by detailed statements on how the development aligns with the LEP strategic infrastructure document with supplementary planning guidance in specific areas to ensure that the delivery is right and joined up.</p> <p>Possible parts of a solution include:</p> <ul style="list-style-type: none"> * Strategic route planning – end-to-end, not just within developments; * Identify and protect routes joining places; * Be ready to exploit funding and development opportunities; * Good practice for all modes of transport: walking, cycling, bus, train, car and lorry; * Adopt Standards that deliver facilities that people will choose to use; * Don't accept developments that fall short or destroy opportunity; * Set transport mode targets for developers to give them a stake in the outcomes; * Link them to CIL/S106 payments; * Link them to penalty payments or requirements; * Link them to future development opportunities. <p>It is critical that any new infrastructure introduced to facilitate housing and economic growth is mindful of the public transport network and any new infrastructure should be designed to enhance rather than impede this. Engagement with the bus operators is encouraged. They are more that will in to help shape developments, infrastructure requirements to facilitate commercial bus operation in the medium</p>
PR-B-0209	Patrick and Julia	Jennings		19			The access to Public transport criteria appears to be guided by current bus routes. Any significant changes in the population should be accompanied by changes to the Oxford bus routes to serve new homes.
PR-B-0447	Laura, John, Benito	Wainwright		19			The Interim Transport Assessment was inadequate if it did not recognise the present congestion in Kidlington and how this would be hugely aggravated by any development. This includes roads leading north out of Oxford, the A4260 and leafy pleasant roads like The Moors. The quality of life for residents along with the environment would also greatly suffer.
PR-B-0637	Prof Martin LG	Oldfield		19			No
PR-B-0643	L	Allen		19			The existing transport systems do not support current loadings let alone potential increases and little attention has been given to the daily traffic chaos around Oxford. Lack of local knowledge has resulted in wrong assumptions with regards to bus routes. At Begbroke and Yarnton there is no longer a bus service to Kidlington or Oxford Parkway, and no consideration of the A44 splitting Begbroke in two with no pedestrian crossing.
PR-B-0653	Peter	Webber		19			These sites should certainly be listed but be mindful of providing London overspill.
PR-B-0655	Christina Mary	Shirley		19			The bus has already gone, see no use of promises.
PR-B-0656	Mary G	Shirley		19			There will be too much traffic and doubt the proposals as buses have already been taken off the route.
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	19			Client's experience of the transport issues on the roads running through and around Begbroke, Yarnton and Kidlington is very poor. There are no buses linking Begbroke to Kidlington, Oxford Parkway or Water Eaton P&R.
PR-B-0705	Nick	Small	Stagecoach	19			Detailed response with a commentary on the different criteria used in the ITA.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0710	Selwyn	Phillips		19			Kidlington is in the process of losing its village centre. Doubling the size without consideration to the main shopping area is not wise.
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	19			Note that Yarnton is within Area A having been identified as the most sustainable broad location for identifying sites. Whilst acknowledging the need for an Infrastructure Delivery Plan, are concerned that no such proposals are in place in advance of the site selection process.
PR-B-0743	John	Tremlett		19			No
PR-B-0770	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	19			According to Fig 10 those sites that are the most sustainable in transport terms are those located in the green gap between Oxford and Kidlington/Yarnton. However, these sites raise other issues and would lead to the coalescence of Oxford and Kidlington if subject to large scale development. It is therefore considered that other sites around Kidlington, such as sites 32 and 91 should also be allocated for development to ensure that development around Kidlington maintains its distinct identity as a separate settlement.
PR-B-0786	Jane	Olds	Caversfield Parish Council	19			No
PR-B-0793	Philip	Morley	North Oxford Golf Club	19			Criteria for the interim transport assessment should be revisited in light of the comments to other questions on transport.
PR-B-0799	Ian	Sheppard		19			Do not seem to meet Cherwell's district needs, only to actively pacify City Council.
PR-B-0808	Chris	Robbins		19			The assessments may reflect the identified transport criteria, but this should not be allowed to override the need to prevent coalescence of communities.
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	19			No
PR-B-0826	Alan	Dobson		19			There is already massive congestion in this area. The pressure on the A40 and A34 as major routes without alternatives will only increase: adding to this pressure with local Green Belt development is folly
PR-B-0829	Fergus	Campbell	Oxfordshire Clinical Commissioning Group	19			Have provided a detailed statement in response to this question in their representation.
PR-B-0832	Richard	Hills		19			No
PR-B-0837	David	Jackson	Savills on behalf of Christ Church, Exeter College, Merton College and OUP	19			The findings of the ITA for the North Oxford Triangle site are supported.
PR-B-0847	Richard	Cutler	Bloombridge LLP	19			Agree that Area A offer the best 'green' scores
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	19			In relation to the sites within the Parish we note that many perform poorly in terms of criteria relating to congestion, road safety incidents and proximity to AQMAs. These are major areas of concern. As stated in response to Q15 very concerned as to whether sufficient transport infrastructure can be put in place to cope with such large scale development. In addition any additional infrastructure will also have impacts on the GB and on the environment and local communities.
PR-B-0866	Matt	Todd		19			No. Nothing in the GB should be considered. Favourable inclination to areas A and B which are in the GB. Imperative that GB is preserved. These are not exceptional circumstance when many options available.
PR-B-0877	David	Flavin	Oxfordshire County Council	19			Has provided specific comments on the sites - Oxfordshire County Council RAG assessment is attached in Appendix 1 of the representation.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	19			Unable to respond due to lack of time
PR-B-0887	Paul	Buckley		19			Yes. It is unreasonable, it neglects factors of extreme importance to the local community. The impact on the GB and the necessity to ensure infrastructure provision matches the need.
PR-B-0890	Chris	Dicks		19			An independent review should be commissioned to establish the impact of road improvements, following the unacceptable disruption from the Cutteslowe and Wolvercote works.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0895	Dr Alison and Dr Simon	Street		19			Welcome the plan to continuously review the transport assessment.
PR-B-0897	Rob	Lawrence		19			It is not fit for purpose from the perspective of Cherwell residents. Radical changes are needed by Oxford with public transport to and within the city. Road access to Banbury railway station car park is convoluted and need streamlining to prevent traffic congestion at peak times. Banbury to Oxford is overcrowded at peak times. Park and Ride requires a direct metro link to Oxford and not rely on buses. Quicker to get to Marylebone from South Newington than to Oxford with less hassle.
PR-B-0907	Alison	Forfar		19			Fails to consider how many people from the proposed sites will reach transport hubs. Increased traffic and housing has made the roads unsafe for cyclists. The state of these roads needs to be addressed by the council to improve road safety and to prevent fatalities. Public transport needs to be in place form every development site, so as to reduce residents using their own cars. Where are the plans for public transport, footpaths and cycle routes. This is crucial to reduce the pressure on the roads, the plans as they are only increase the pressure on local roads.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	19			There is not sufficient information in the ITA on the journey types from the people living in the proposed homes. The assumption is flawed and not all journeys would be to the centre of Oxford but would be likely to be to the Hospitals and Cowley Business Parks, which are a long way away from the sites. The fact that some of the sites are near a No2 bus route does not begin to address the question of how someone working on the South and East of Oxford (where most employment is located) can get to work by public transport. The buses are already overcrowded and a simple journey of 2.5 miles can often take half an hour. There is no room for any more buses in St Giles and no means are suggested to alleviate the problem.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	19			The Metrics used should be weighted in order to prioritise the assessment criteria. Some metrics do not appear to be very significant, but still offer Green ratings, resulting in sites appearing more suitable than others, without solid reasons. The assessment focuses primarily on existing infrastructure rather than the opportunities for sustainable transport enhancements. Detailed comments are made on the individual metrics.
PR-B-0931	Jane	Olds	Fringford Parish Council	19			Agrees
PR-B-0937	Philip	Rawle	Greenlight Developments	19			No specific comments on the findings of the strategic development sites selected. Earlier comments relating to Bicester and GB reiterated.
PR-B-0944	David	Stone		19			This rep has criticism of the repetition of the questions. Acknowledgement is needed of the realities of traffic congestion and pollution and how this would be exacerbated.
PR-B-0957	Martin	Small	Historic England South East Historic Environment Planning Group	19			No
PR-B-0973	Jonathan	Harbottle	Land and Partners Ltd	19			Detailed response provided. Development in rural areas gives the opportunity to provide significant benefits to rural communities. Development in Deddington can deliver much needed sports facilities alongside new homes.
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	19			Supports selection of sites that are south west, south and south east of Kidlington, as close as possible to Oxford.
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	19			No
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	19			See response to Q15 above. Do not consider that the ITA should have been limited to only those sites within Areas A and B.
PR-B-1039	Igor Niladri	Dyson		19			Using low or zero emission transport is good. Sustainable transport always respects the integrity of the existing natural environment and heritage with the inclusion of GB. Encourage communication technology to minimise commuting and enable dispersed employment.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1069	JP	Lyes		19			Could not locate on website.
PR-B-1095	Val	Russell	Bodicote Parish Council	19			Concerned that The Banbury Masterplan has not yet been implemented. With Brexit and Local Plan Part 2 still in preparation, the housing numbers are yet to be realised. New development and any required infrastructure will impact on many of the search areas identified in the Options Paper. The provision of adequate infrastructure must play an important part when deciding on sites for new housing.
PR-B-1096	Greg	Blaquiere	Terence O'Rourke Ltd on behalf of the Vanbrugh Unit Trust and Pye Homes	19			The ITA is wholly flawed and cannot be considered a robust evidence base against which to take forward significant decisions on future growth scenarios. The metrics adopted have been inconsistently applied, do not make reasonable assumptions about future conditions, and fail to identify likely opportunities or constraints. The report is particularly biased towards development immediately adjacent to the Oxford built up area.
PR-B-1099	Alan	Storah	Oxford City Council	19			Endorses the benefits of good transport connections associated with close proximity to Oxford in the Initial Transport Assessment of the 38 sites.
PR-B-1110	Iain	Johnson		19			CDC has consistently marked sites closest to Oxford as positive. While understanding the reasoning and reluctance to negatively impact the residents of Cherwell district towns, results impact the existing residents of North Oxford, who are not your constituents. Namely by removing our GB, area of conservation, increasing pollution and increasing traffic congestion.
PR-B-1154	Jim	Spencer		19			No comment
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	19			The spatial development options in areas A (Kidlington) and B (Land north and east of Kidlington) are considered to represent the locations where CDC could most sustainably accommodate Oxford's unmet housing need. Do not agree as there is widespread road congestion with the villages of Kidlington, Begbroke and Yarnton particularly affected. Residents of Begbroke have no controlled pedestrian crossing and access/egress to A44 is at times very difficult. There are no buses linking their villages to Kidlington and its many services, Oxford Parkway station or Water Eaton Park and Ride.
PR-B-1157	Nicola and Giles	Lewis		19			No comment
PR-B-1160	Christopher	Hardman	Wolvercote Neighbourhood Forum	19			The ITA methodology is flawed. It takes 'no account of the capacity implications associated with transport infrastructure – simply whether it was present or not in relation to each area of search' (6.10, page 69). However, as in Figure 10, consider that the 'At-a-glance summary of site findings' (Transport Assessment page 75, fig.6-2), gives a misleading view of the benefits or otherwise of the areas of search. Have provided a detailed comment in the representation.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	19			Yes, The Parish Council is concerned with the statement "The District Councils in Oxfordshire have accepted Oxford City meet its own housing needs..." this is incorrect, as South Oxfordshire has rejected this claim. If the Interim Transport Assessment Summary of Oct 2016 is not aware of South Oxfordshire's decision of the previous month, what confidence can the public have in the accuracy of this assessment?
PR-B-1163	Catherine	Arakelian		19			No. The exercise does not feel transparent. The "Initial Sustainability Appraisal" has predetermined which sites will go forward to the next phase, regardless of objections. If it was a site near to Oxford, that appears to have been the deciding factor. The planning officers have so little resource and are being urged on by the July deadline to complete the Local Plan Review, they seem obliged to seek for evidence that fits the desired outcome of the Growth Board and the Local Enterprise Partnership.
PR-B-1165	Caroline	Johnson		19			The major impact is going to be on Oxford City not on Cherwell DC. This effect will be highly significant. Is this effect being examined?
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	19			No comments
PR-B-1188	Carol	Matheson		19			Do not believe that there is sufficient transport and infrastructure in place to support all these extra houses and people. Gosford and Water Eaton perform badly in relation to congestion, road safety incidents and air quality management too.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1224	Theresa	Goss	Adderbury Parish Council	19			No comments at this stage.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	19			No
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	19			Detailed comments are made. It includes a preliminary Access Options Study.
PR-B-1229	Henry	Brougham		19			No comments.
PR-B-1230	T M M	Green		19			The document produced for consultation is much too elaborate and difficult to understand for the layman.
PR-B-1232	Mark	Schmull	Nathaniel Litchfield and Partners on behalf of The Church Commissioners	19			Consider that these exercises have been carried out prematurely, and should be repeated once all sites put forward as part of this current consultation have been considered as a whole. Additional sites/proposals (including strategic infrastructure proposals) may result in different findings for these assessments.
PR-B-1233	Simon	Garage	RPS Planning and Development on behalf of Mr R Bratt	19			No comments to make.
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	19			No comments at this stage.
PR-B-1240	Suzanne	Willson-Higgins		19			In relation to sites within Gosford and Water Eaton, many of these sites perform poorly in terms of criteria relating to congestion, road safety incidents and proximity to AQMA's. Is very concerned as to whether sufficient transport infrastructure can be put in place to cope with such large scale development. In addition any additional infrastructure will also have impacts on the Green Belt and on the environment and local communities.
PR-B-1243	Kazimiera	Kantor		19			Not able to make a comment in the time available.
PR-B-1255	Kezia	Sheppard		19			No.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	19			Agrees with the assessment and findings of the ITP report and that without significant improvements, new development of the scale envisaged cannot be accommodated in Areas A and B in particular. Press reports indicate that Oxfordshire is likely to be awarded less than 10% of the Transport Infrastructure bid submitted by LEP. There is no certainty that the Rapid Transport system will be deliverable. This is a deal breaker for new housing and increased strain on already overloaded routes, worsening conditions for existing residents and failing to sustainably meet the needs of newcomers. The capacity of the existing infrastructure is minimal or exceeded in and around Kidlington. Developers can only be asked to address the needs of their own scheme before the delivery of Affordable Housing becomes unviable. The funding gap has to have realistic prospects of resolution before any land is allocated for development in the future. Larger sites require developer agreements. Are concerned about the lack of time for a site by site assessment; therefore they have adopted an approach of considering group of sites and these comments are provided with this representation.
PR-B-1272	S G	Wakeling		19			No comment at this stage.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	19			Do not consider that the ITA of the Strategic Development Sites should have been limited to only those sites within the Areas of Search A and B.
PR-B-1294	Giles	Hughes	West Oxfordshire District Council	19			Transport is an important aspect that will need to be given significant weight in the final decision as to which sites to promote.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	19			Nothing further to the above.
PR-B-1342	Laura	Precious	Quod on behalf of Albion Land	19			Have assessed the sites using CDC's own methodology for ITA and consider that the site south east of Bicester ranks better than or equal to many of the sites in Areas A and B. Consider that, their site is more sustainable in terms of its connectivity with Oxford and its potential transport impacts than many of the sites in Areas A and B. Have provided a detailed statement in response to this question in the representation and that sites in Areas A and B would be inappropriate by definition and would cause harm.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	19			Sites appear to be well connected to Oxford.
PR-B-1344	Jonathan	Harbottle	Land and Partners Ltd	19			Option I has been assessed as having only a single Key Strategic Opportunity - Oxfordshire HMA. Development in rural areas gives the opportunity to provide significant benefits to rural communities. Their sites can deliver much needed sports facilities highlighted in LP2-A-023 - Jan 2016, LP2-A-013 - rep by Deddington Parish Council and LP2-A-031 - Deddington Neighbourhood Plan. Do not agree that the infrastructure is necessarily a constraint, where development in rural areas offers the opportunity to improve this infrastructure for both new and existing residents. Their sites would provide housing and additional playing fields, being in a sustainable location accessible to the rest of the village whilst offering a sufficient area to provide a comprehensively designed solution.
PR-B-1345	Nick	Alston	Bilfinger GVA on behalf of Oxford Aviation Services Ltd	19			Disagree with the findings of the ITA Report. Have provided a detailed assessment in (enclosure 2) which is included in the representation. The TA should be re-run having regard to site specific details set out in their earlier representation of 11 March 2016. A table with specific comments and recommended RAG scores are included within the representation.
PR-B-1346	Neil	Tiley	Pegasus on behalf of the Dorchester Group	19			The options have not been robustly selected and so it is unnecessary to comment on the ITP.
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	19			The ITP assessed a total of 38 sites in areas A and B. It considers site suitability in terms of transport and air quality concerns.
PR-B-0637	Prof Martin LG	Oldfield		20	A, B		Areas A and B should not have been included as they destroy the GB.
PR-B-0944	David	Stone		20	A, B		This rep has criticism of the repetition of the questions. It is not sustainable to destroy GB and sites within search areas A and B will not benefit from their own sense of community and independence or space for recreation. Will not have access to pollution and congestion free transport systems. I strongly oppose development of the sites identified in response to question seven. Separate more sustainable solutions need to be looked at in other areas of Cherwell District. Strongly oppose development of the sites identified in response to question seven. Separate more sustainable solutions need to be looked at in other areas of Cherwell District.
PR-B-1298	James	Jocelyn		20	A, B		A lengthy study is not needed to conclude that Areas A and B are most attractive to developers and, most convenient for transport into Oxford for work. The SHMA suggests that the vast majority of the new homes will be surplus to local requirements; having failed to consider this, find the SA's finding invalid. Like the Transport Assessment, the Sustainability Appraisal smells of a document written to justify a preconceived set of conclusions.
PR-B-0890	Chris	Dicks		20	A,B	PR20, PR34	This rep refers to the full LUC initial sustainability report and has criticism of sections of it. There is a need to recognise the value of the countryside, GB and agricultural land. The importance of the canal for tourism and the need to preserve low light levels between Kidlington, Begbroke and Yarnton. The increase in pollution and congestion have not been assessed correctly.
PR-B-0890	Chris	Dicks		20	C, E		Criticism of the score for SA16 given the good railway connections.
PR-B-0933	Peter	Bateman	Framptons on behalf of the Donger Family	20	I		Area I is a very broad area covering the majority of the District. This causes the conclusions of the SA to be unduly broad and strategic. Should more focused areas be assessed it is considered that a more robust conclusion and scoring system would result
PR-B-1035	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford and Blenheim Palace	20		PR124, PR41, PR177	The sites they are promoting PR124, PR41 and PR177 perform consistently well in terms of SA objectives relating to Oxford, including 4 significant positive effects and one significant negative effect (SA Objective 10). They set out their considerations on the negative effect in detail.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1228	Juliet	West	ICOMOS-UK	20		PR22, PR25, PR118	A number of detailed comments are made specifically in relation to the setting of the Blenheim Palace WHS. Although in West Oxfordshire its south southern edge is adjacent to the boundary of Cherwell DC. Sites PR118, PR22 and PR25 are all potentially within the setting of the WHS.
PR-B-0985	Peter	Collins	Islip Parish Council	20		PR30	Detailed comments are made in the representation in respect of site PR30
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	20		PR48	Yes. Specific detailed comments are made on the assumptions and objectives of the ISA in particular how it relates to site PR48. The suggested changes would mean that site PR48 would become one of the higher scoring sites in Table 9.2. An important issue not addressed in the ISA is the need to avoid coalescence between settlements and loss of village identity. This issue needs greater emphasis.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	20		PR74	Have some concerns that the scope of the appraisal has been too narrow in some cases and has taken too cautious an approach to scoring the site as a result of paying insufficient attention to the specific characteristics of the site. A detailed critique is provided.
PR-B-0019	Edward	Dowler	Middle Aston Parish Meeting	20			No
PR-B-0033	Henry	Munday		20			Don't include Kidlington
PR-B-0055	Cynthia	Hall		20			No building on the GB.
PR-B-0057	Matthew	Taylor	Aitchison Rafferty	20			The initial SA findings could have given further consideration to increasing the unit allocations in existing SHLAA sites, rather than a presumption of only new sites being required to meet the unmet housing need. A combined approach of reviewing and adjusting unit numbers for existing SHLAA sites, along with identifying new sites, may prove a more efficient and effective approach.
PR-B-0058	Anthony	Hall		20			The "sustainability" assessment is ludicrously mistitled, since many of the criteria are about its opposite, economic growth. So the apparently green scores for many areas on many criteria are utterly misleading, simply allowing you to appear to justify choosing unsustainable areas by appearing to balance the red scores with spurious green ones.
PR-B-0119	C A	McCall		20			Not had a chance to read documents.
PR-B-0153	Paul	Goulding QC		20			Agree with the initial sustainability appraisal that sites within Area I are unsuitable for housing development given their remote, rural character, poor transport links and generally inadequate infrastructure. This particularly applies to Noke.
PR-B-0171	Peter	Worth		20			Not impressed, it reads wrong. Sites that are close to Oxford have been killed off for the wrong reasons.
PR-B-0209	Patrick and Julia	Jennings		20			Do not agree that certain sites will create any more job opportunities than other sites (ref. table 9.2 of Cherwell Local plan part 1 Partial Review SA report) . This appears to be used to sway the argument in favour of certain sites. The science and justification behind these grading's does not stand up to scrutiny. Also 'Access to services and facilities' is only really applicable if the council is aiming to place more strain on existing facilities rather than provide new ones. More importantly Table 9.3 outlining SA Objectives SA7 and SA8 ('Conserving and enhancing Biodiversity' and 'Protecting and Enhancing the Landscape') for site 38 are graded '++'. It is absolutely nonsensical that there is a positive impact. It would destroy the landscape of Site 38 and impinge on areas where many unusual fauna breed and live. This should be graded '- -' at least. This plainly wrong data completely invalidates any conclusions from this report.
PR-B-0447	Laura, John, Benito	Wainwright		20			Cannot comment as do not know how to access the Initial Sustainability Appraisal Tables 9.1 and 9.2.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0643	L	Allen		20			The existing transport systems do not support current loadings let alone potential increases and little attention has been given to the daily traffic chaos around Oxford. Lack of local knowledge has resulted in wrong assumptions with regards to bus routes .At Begbroke and Yarnton there is no longer a bus service to Kidlington or Oxford Parkway, and no consideration of the A44 splitting Begbroke in two with no pedestrian crossing. Constant expansion in any form is not sustainable and development in other centres within Oxfordshire and surrounding counties must be considered.
PR-B-0653	Peter	Webber		20			These sites should certainly be listed but be mindful of providing London overspill.
PR-B-0655	Christina Mary	Shirley		20			The sites are too close to Oxford flood plain.
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	20			No. See general comments on consultation.
PR-B-0705	Nick	Small	Stagecoach	20			Main comments on specific sites made in response to Q11.
PR-B-0710	Selwyn	Phillips		20			Kidlington sits in a flood plain, is it wise to cover this with concrete. It would appear that the numbers agreed by councillors shows that they do not have any commitment to their communities.
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	20			Note that Yarnton is within Area A having been identified as the most sustainable broad location for identifying sites. Whilst acknowledging the need for an Infrastructure Delivery Plan, are concerned that no such proposals are in place in advance of the site selection process.
PR-B-0743	John	Tremlett		20			No
PR-B-0786	Jane	Olds	Caversfield Parish Council	20			No
PR-B-0799	Ian	Sheppard		20			Do not seem to meet Cherwell's district needs, only to actively pacify City Council.
PR-B-0808	Chris	Robbins		20			No further comments
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	20			No
PR-B-0832	Richard	Hills		20			No
PR-B-0837	David	Jackson	Savills on behalf of Christ Church, Exeter College, Merton College and OUP	20			The findings of the ISA form an acceptable starting point for the assessment of these sites. The findings demonstrate that the North Oxford Triangle site scores positively against a range of SA objectives and demonstrates the sustainable nature of the site.
PR-B-0842	Alex	Wilson	Barton Willmore on behalf of A2 Dominion Group Ltd	20			CDC should consider Option E at the site assessment stage also. Consider there is capacity/opportunity to accommodate further growth to meet unmet need at Bicester.
PR-B-0847	Richard	Cutler	Bloombridge LLP	20			A number of detailed comments are made on the SA. They relate to Page 38, Page 39, Para 5.5, Table 9.1, Table 9.2, Table 9.3 and Appendix 6. Generally, welcome the overall conclusions drawn but request that a finer grained SA is undertaken in relation to the 38 sites. Feel that The Moors is a site that is capable of performing well in terms of overall sustainability, whilst also meeting Oxford's unmet housing needs.
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	20			Already explained in response to Q17 some of the concerns in relation to the SA assessment scoring process. This would also apply to the appraisal of specific sites. In response to Q11 highlighted specific environmental impacts which need to be taken in to account. These comments are equally relevant to the SA.
PR-B-0862	Peter	Nicholson		20			The Initial SA are well formulated and appropriate for testing the positive and negative effects of proposed development. However disagrees that the site have been tested in an objective and accurate way against all of them. A very detailed response discussing the assessments against sites in provided in the representation.
PR-B-0877	David	Flavin	Oxfordshire County Council	20			Recommend that the scope of Objective 2 is widened to include a broader definition of health and wellbeing or that health and wellbeing benefits of the three objectives with particular spatial relevance to Oxford are recognised and overtly stated.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	20			Unable to respond due to lack of time
PR-B-0887	Paul	Buckley		20			Yes. Sites in Areas A and B have been considered unreasonably favourably because impact on the GB has been ignored.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0895	Dr Alison and Dr Simon	Street		20			No specific comments.
PR-B-0897	Rob	Lawrence		20			There has been insufficient time allowed by CDC for people to review the Sustainability Appraisal as well as the extensive main options paper.
PR-B-0907	Alison	Forfar		20			Fails to consider how many people from the proposed sites will reach transport hubs. Increased traffic and housing has made the roads unsafe for cyclists. The state of these roads needs to be addressed by the council to improve road safety and to prevent fatalities. Public transport needs to be in place from every development site, so as to reduce residents using their own cars. Where are the plans for public transport, footpaths and cycle routes. This is crucial to reduce the pressure on the roads, the plans as they are only increase the pressure on local roads.
PR-B-0910	Ken	Pelton		20			The sites appear to be guesswork and supported by notions of non-existent transport infrastructure.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	20			No significant data is referenced to support the initial findings which would therefore appear to be merely guesswork at this stage.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	20			The SA's initial findings for sites 19 and 29 are based on the existing situation, where it is obvious that major bus routes would not currently serve an area of mineral extraction. The Quarry could be included within the routes without significant alterations to the timetables.
PR-B-0931	Jane	Olds	Fringford Parish Council	20			Agrees
PR-B-0937	Philip	Rawle	Greenlight Developments	20			No specific comments on the findings of the strategic development sites selected. Earlier comments relating to Bicester and GB reiterated.
PR-B-0948	Tim	del Nevo		20			Criticism to a document that is 175 pages long which contains very technical and detailed wording.
PR-B-0956	Mark	Recchia	Banbury Town Council	20			The Town Council considers the SA initial findings of the sites as appropriate, however it points out that as new development adjacent to deprived neighbourhood has positive benefits. None of these sites are adjacent deprived neighbourhoods, therefore it seems off that these site have not been discounted for that reason.
PR-B-0957	Martin	Small	Historic England South East Historic Environment Planning Group	20			Do not have any specific comments on the Initial SA, but state that their assessment of the 38 sites against our records of designated heritage assets indicates 19 that contain or are within the setting of designated heritage assets, not 20 as indicated in paragraph 9.48 of the Sustainability Appraisal Report (site 92 being where the difference of opinion occurs). Their concern is that the significance of heritage assets has not been discussed in the assessment. This is discussed in detail in their representation.
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	20			Supports selection of sites that are south west, south and south east of Kidlington, as close as possible to Oxford.
PR-B-1016	Ben	Simpson	WYG on behalf of Bonnar Allan Ltd	20			Concerned that the SA does not adequately assess or compare the proposed areas of search and sites with respect to items of infrastructure that they are able and committed to deliver. This is a fundamental omission from the SA and in the case of New Alchester, means no account is taken of the location of the site across the railway line from Bicester to Oxford and our stated intention to deliver a new railway station there. The rep includes a comparative matrix that compares New Alchester against the other sites within the Areas of Search. This indicates a high score in comparison with other candidate sites.
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	20			No
PR-B-1024	Andrew	Hornsby-Smith		20			Supports the SA findings, and considers that the selection of criteria for the detailed assessment of sites within Areas A and B to be partial and lacking any inclusion of the impact on the host community within Cherwell.Has provided a detailed response to this question.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	20			The initial findings are noted. Welcome suitable refinements prior to the plan progressing. One uncertain impact raised in relation to site PR20 is landscape impact. This seems not to take account of the previously submitted Masterplan which demonstrates scope for comprehensive landscaping across the site.
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	20			See response to Q13 and Q17 above.
PR-B-1039	Igor Niladri	Dyson		20			No. Cherwell is being pressurised into this. The unmet housing need comes from a wish to grow population and to drive the economic growth. Regardless of the damage to the environment, heritage and social benefits. Sustainable is not an appropriate word describing development on any existing GB. Consideration should be given to previously developed land, be affordable and house the current population first.
PR-B-1069	JP	Lyes		20			Could not locate on website.
PR-B-1095	Val	Russell	Bodicote Parish Council	20			There are a lot of issues brought up by the SA Report, which point to policies that the Local Plan Part 2 would supposedly address. Given that this document is still in preparation, with policies yet to come forward, this is strange. As it stands, have no idea how many homes could be allocated throughout Cherwell.
PR-B-1096	Greg	Blaquiere	Terence O'Rourke Ltd on behalf of the Vanbrugh Unit Trust and Pye Homes	20			Whilst the SA demonstrates that the area subject to these representations is justified against the alternatives, contend that the SA underscores the positive benefits of the sites and lack of constraints. The ranking of these sites should be at least equal to, if not better than, Option B Area. The rep continues by giving a detailed critique of the SA in its analysis of the promoted sites.
PR-B-1110	Iain	Johnson		20			Pleased that you state more work and investigation is required to make sure GB and areas of conservation are not affected adversely (7.53 to 7.56) . Traffic is a major concern as know how congested the area around Oxford parkway going into Oxford already is. (7.59)
PR-B-1154	Jim	Spencer		20			No comment
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	20			The whole SA appraisal is weighted towards their areas (A and B). Why would Oxford wish unmet housing need elsewhere in the Cherwell District but on its doorstep?
PR-B-1162	Roger	Bellamy	Hornton Parish Council	20			The Initial Sustainability Assessment is work in progress and these are their early considerations of options, therefore incomplete, and as such can hardly be commented upon until it is concluded?
PR-B-1163	Catherine	Arakelian		20			No. The exercise does not feel transparent. The "Initial Sustainability Appraisal" has predetermined which sites will go forward to the next phase, regardless of objections. If it was a site near to Oxford, that appears to have been the deciding factor. The planning officers have so little resource and are being urged on by the July deadline to complete the Local Plan Review, they seem obliged to seek for evidence that fits the desired outcome of the Growth Board and the Local Enterprise Partnership.
PR-B-1165	Caroline	Johnson		20			Oppose the findings. There is not an exceptional reason to build on GB land especially in the way proposed which will effectively remove it and cause neighbouring communities to coalesce.
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	20			No comments
PR-B-1188	Carol	Matheson		20			Whilst the sites in Gosford and Water Eaton score positively in meeting Oxford's needs, they score negatively in many aspects too. These lie in the impact on the environment, the use of GB land, air quality and congestion.
PR-B-1224	Theresa	Goss	Adderbury Parish Council	20			No comments at this stage.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	20			No
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	20			It is considered that the scoring in the SA does not accurately reflect the site. A revised SA is included in this rep.
PR-B-1229	Henry	Brougham		20			No comments.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1232	Mark	Schmull	Nathaniel Litchfield and Partners on behalf of The Church Commissioners	20			Consider that these exercises have been carried out prematurely, and should be repeated once all sites put forward as part of this current consultation have been considered as a whole. Additional sites/proposals (including strategic infrastructure proposals) may result in different findings for these assessments.
PR-B-1233	Simon	Gamage	RPS Planning and Development on behalf of Mr R Bratt	20			Would welcome further investigation of potentially developable sites outside Areas A and B.
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	20			No comments at this stage.
PR-B-1240	Suzanne	Willson-Higgins		20			Concerned about some of the SA scoring for sites in Area A. The SA results show that many of the sites in Gosford and Water Eaton have positive scores in relation to meeting Oxford's needs, as they have negative impacts when considering the environment, the use of green field land, and potential effects on air quality/congestion. Specific environmental impacts as discussed in response to question 11 should also be taken into account.
PR-B-1243	Kazimiera	Kantor		20			Insufficient time for research.
PR-B-1255	Kezia	Sheppard		20			No.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	20			The findings are very generic, overstate likely benefits, and do not exercise sufficient caution in advance of detailed assessment.
PR-B-1272	S G	Wakeling		20			No comment at this stage.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	20			The Partial Review can only be considered as an Addendum to the LPP1; therefore the sites and SA needs to be entirely consistent with the vision and spatial strategy of LPP1 and should not in any way depart from the fundamental principles it defines for the location of growth in Cherwell.
PR-B-1294	Giles	Hughes	West Oxfordshire District Council	20			The impacts on West Oxfordshire have been considered even though some sites adjoin or a very close to West Oxfordshire. Do not agree with the mixed assessment given to site PR22 against the sustainability appraisal heritage objective. Although the fact that there is a scheduled ancient monument on site is referenced there is no acknowledgement that it is next to a World Heritage site within West Oxfordshire. The significance of these heritage assets is very high and this should be addressed in the appraisal and reflected in the subsequent scoring. There is no evidence in the appraisal to back up the conclusion that there may be instances where a site allocation on site PR22 could enhance heritage assets. The impact of urbanisation on the currently rural setting of the Blenheim Palace World Heritage site and on the setting of the buried Roman Villa would be significant and negative. The assessment of site PR22 on this aspect does not appear consistent with the assessment of site PR92.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	20			Nothing further to the above.
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	20			Refer to Q18.
PR-B-1345	Nick	Alston	Bilfinger GVA on behalf of Oxford Aviation Services Ltd	20			Disagree with the findings of the SA Report. Request that the assessment is re-run having regard to site specific details set out in the earlier representation of 11 March 2016. Have provided a detailed assessment in (enclosure 2) which is included in the representation. A table with specific comments and recommended RAG scores are included within the representation.
PR-B-1346	Neil	Tiley	Pegasus on behalf of the Dorchester Group	20			The options have not been robustly selected and so it is unnecessary to comment on the SA.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	20			The SA assessed the 38 sites in areas A and B. With regards to SA Objective 8 all sites except PR195 have significant negative effects. The rest of the sites all score significant negative effects due to their location in the open countryside. This is due to the fact that Areas of Search A and B are predominantly Green Belt with the village of Kidlington inset. The exclusion of Areas of Search E and H meant that much of the land around existing settlements was excluded from the site analysis.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	21		PR10, PR97	The evidence does not adequately address the issues of flooding (PR10 and PR97), surface water from A41 is channelled across the site, is the culvert and discharges into Wendlebury brook. Any development on this site would not work. The site is largely in Flood Zone 3. The Environment Agency have been looking at major flood relief plans for Oxford. It will be critical to check if the proposed development on this site will have implications for this scheme.
PR-B-0985	Peter	Collins	Islip Parish Council	21		PR30	The Parish Council is working closely with the owners of the site to bring this site forward for 50 houses and 50 bed care home, which would provide limited growth and enhance its services and facilities. A detailed comments is provided in the representation.
PR-B-1110	Iain	Johnson		21		PR38	How will you incorporate the views and evidence presented to you by North Oxford areas bordering PR38? We are not your constituents but as this development will materially affect us you MUST take any evidence we provide to you into account.
PR-B-0019	Edward	Dowler	Middle Aston Parish Meeting	21			No
PR-B-0033	Henry	Munday		21			7.56 Building houses for Oxford City cannot be exceptional circumstances.
PR-B-0055	Cynthia	Hall		21			Improve public transport, and identify and exploit brownfield sites. Consider the Oxford-Cambridge corridor that the new railway will open up. Do not bring new industry into Oxford.
PR-B-0057	Matthew	Taylor	Aitchison Rafferty	21			See response to question 3.
PR-B-0058	Anthony	Hall		21			You quote the NPPF statement on green belt, while your proposals fly in its face. So presumably by "require close scrutiny" you mean "We need to find what words the government wants us to use so it can collude with us while pretending that green belt is 'sacrosanct' ". You have produced no arguments to justify destroying green belt – because there are none. There is nothing "exceptional" about lazy and greedy developers wanting to build where it suits them, rather than where would actually be beneficial
PR-B-0119	C A	McCall		21			Not had a chance to read documents.
PR-B-0171	Peter	Worth		21			Run an additional process for sites which meet the criteria but have not been volunteered for development. It will flush out some new capacity.
PR-B-0186	Paul	Walker	Oxford Bus Company	21			Supports the Green Belt Review if it meant developments could be more sustainably located closer to the urban fringe.
PR-B-0447	Laura, John, Benito	Wainwright		21			The NPPF states that GB should be permanently protected from development, it is required to conserve and enhance the natural environment and minimise impacts on biodiversity. Respect should be given to the character of local areas and their social and cultural well-being. The NPPF also stipulates re-use of previously developed land. A revised transport assessment is necessary to take into account likely accumulative effects of increased demand.
PR-B-0637	Prof Martin LG	Oldfield		21			It is too narrowly based on Oxford's stated, over exaggerated, housing need. The evidence base should include the wishes of the local residents of Kidlington, Yarnton and Begbroke and those who live in Oxford and benefit from the GB.
PR-B-0643	L	Allen		21			The full cost of each development must be evaluated. This must include capital cost, maintenance, third party infrastructure costs, environmental effects and quality of life. The cost of this evaluation should be born by Oxford City. What incomes are likely to be generated by each development and where will this go? Who will have access to these new homes?

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0653	Peter	Webber		21			Don't believe Oxford has fully demonstrated why GB sites outside the city are being considered when GB sites within the city i.e. Port Meadow were rejected.
PR-B-0655	Christina Mary	Shirley		21			There needs to be consideration for future generations and the affects on overstretched emergency services.
PR-B-0656	Mary G	Shirley		21			You need to consider everyone's objections as the majority of people in the village are against this amount of houses.
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	21			The Council should look at studies concerning the potential effects on Brexit and whether such effects are likely to effect the projected growth in jobs in Oxfordshire. Although the Oxfordshire Knowledge Spine is world renowned, if economic factors conspire against it then the number of jobs will be lower than predicted. This is further reason to not to accommodate new housing until there is a review of Oxford's needs in five or six years.
PR-B-0705	Nick	Small	Stagecoach	21			Have some real concerns about the robustness of many of the methodological assumptions in the High Level Transport Assessment of Spatial Options. Detailed comments on recent and propose schemes are made; and the transport model used.
PR-B-0710	Selwyn	Phillips		21			How about some evidence from the government and local MP's in writing supporting the increase.
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	21			Note that Yarnton is within Area A having been identified as the most sustainable broad location for identifying sites. Whilst acknowledging the need for an Infrastructure Delivery Plan, are concerned that no such proposals are in place in advance of the site selection process.
PR-B-0743	John	Tremlett		21			No opinion
PR-B-0745	Dr Ian	Scargill	Oxford Green Belt Network	21			Ox SHMA is based on highly exaggerated estimates of economic growth and this results in massive over-estimates of housing and land requirements. Criticisms of SHMA and those of other organisations have never been seriously addressed.Suggest commissioning a further study from an independent organisation before irrevocably destroying large areas of the GB and other countryside within Cherwell.
PR-B-0770	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	21			Site specific reports are needed in order to enable a meaningful assessment of sites to be made. As noted above the SA sometimes identifies potential significant negative effects where a better acquaintance with the site would demonstrate that none would occur.
PR-B-0786	Jane	Olds	Caversfield Parish Council	21			No
PR-B-0797	Clive	Booth	Oxford Civic Society Planning Group	21			Despite the volume of material, there appears to be inadequate consideration of the environmental suitability of sites for housing, e.g. in relation to noise, vibration and air quality. The Green Belt assessments appear not to consider the extent of existing degradation by development, e.g. of solar farms, car parks and electricity sub-stations. The Green Belt assessment criteria ('purposes') have not been applied to sites outside the Green Belt, though some, at least of the criteria are just as valid for such sites.
PR-B-0799	Ian	Sheppard		21			No evidence base, only a speculation on Oxford needs.
PR-B-0808	Chris	Robbins		21			No further comments
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	21			No
PR-B-0826	Alan	Dobson		21			No, but think again about the damage to Cutteslowe Park
PR-B-0832	Richard	Hills		21			No
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	21			The evidence base needs to include measures to ensure the identified issue of avoiding ' <i>coalescence between settlements and the loss of village identity</i> ' is achieved.
PR-B-0841	Darren	Bell	David Lock Associates on behalf of Hallam Land Management Ltd	21			It is necessary to update and review Cat A villages to establish which settlements are the most sustainable to meet Oxford's housing needs through their connectivity and access. Criteria are suggested.
PR-B-0842	Alex	Wilson	Barton Willmore on behalf of A2 Dominion Group Ltd	21			Consider it premature to decide on areas of search and potential strategic development sites until the HELAA and other studies have been completed.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0847	Richard	Cutler	Bloombridge LLP	21			The full GB review is essential, in particular looking at the strategic issues and long term integrity of the GB, and how associated development can roll back the GB to ensure permanence in the long term.
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	21			The PC believes that housing need should be based on up to date economic forecasting. EG Brexit has already seen a downturn in EU research funding and a decline in the level of recruitment by the University.
PR-B-0866	Matt	Todd		21			Oxfordshire SHMA based on highly exaggerated estimates of economic growth. Resulting in massive over-estimates of housing need and land requirements. A further study must be commissioned from an independent organisation before irrevocably destroying large areas of the GB within Cherwell.
PR-B-0877	David	Flavin	Oxfordshire County Council	21			Suggest that wider strategies in Connecting Oxfordshire should be taken into account. E.g. Active and Healthy Travel, Bus/ Rapid Transit and Rail Strategies to understand the full transport policy approach in Oxfordshire. It is also recommended that the evidence in the Oxfordshire's Joint Strategic Needs assessment or the Director of Public Health's Annual Reports should be considered.
PR-B-0882	Julia	Trowles		21			No confidence in the conclusions with the SHMA 2014 in relation to Oxford's unmet housing needs. No sufficient weight given, in the current review, to the amenity, pollution and environmental impacts of developments in the Areas of Search, before selecting those areas which should proceed to site assessment.
PR-B-0883	Peter	Trowles		21			No confidence in the conclusions with the SHMA 2014 in relation to Oxford's unmet housing needs. No sufficient weight given, in the current review, to the amenity, pollution and environmental impacts of developments in the Areas of Search, before selecting those areas which should proceed to site assessment.
PR-B-0890	Chris	Dicks		21			The SA should not have pre-judged the sites for options testing without completion of the further evidence listed in Table 18.
PR-B-0895	Dr Alison and Dr Simon	Street		21			Have no comments.
PR-B-0897	Rob	Lawrence		21			There has been insufficient time allowed by CDC for people to review the Sustainability Appraisal as well as the extensive main options paper.
PR-B-0905	Theresa	Goss	Bloxham Parish Council	21			Consider Health provision both General Practice and General Hospital services
PR-B-0907	Alison	Forfar		21			Review previous plans and planning decisions, important evidence about sustainability of locations seems to have been ignored. Look at the numbers and density based on location.
PR-B-0910	Ken	Pelton		21			The evidence base is inadequate and should be updated to take account of Prof Wenban-Smith's studies.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	21			The Oxfordshire SHMA is based on a flawed analysis which has not been tested or validated (see our answers to Questions 1 and 6). Our objections have been set out in our representations to the Cherwell Part 1 Examination in Public and supplemented by the report from Prof Alan Wenban-Smith ¹ and his further note on local needs which takes account of DCLG 2012-based household projections. You should address these criticisms together with those of other organisations by revising the housing need assessment downwards.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	21			Detailed and technical comments are made on the ITP and traffic and transportation more generally.
PR-B-0926	Dr Eric	Sidebottom		21			Evidence base is clearly controversial, which is illustrated well by the response from the Oxford GB Network. New employment would be better based outside the city. Like in the new 'science parks, new housing would be more appropriately based alongside these sites.
PR-B-0931	Jane	Olds	Fringford Parish Council	21			No

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0933	Peter	Bateman	Framptons on behalf of the Donger Family	21			The following concerns have been expressed through this representation: deviation from Part 1 Plan strategy; age of Housing Assessment (2013/2014); need for up to date Oxford Urban Capacity Study; need for employment to run in parallel to housing; scope of SA in relation to Area I; lack of county wide IDP; need for GB review.
PR-B-0935	David	Lock	David Lock Associates on behalf of Gallagher Estates	21			The responses to Q15 and Q18 report Gallagher Estates concerns with the assessment approach to date. There is a need to review the assessment due to the obvious and marked differences in the relative sustainability performance of sites grouped within each area of search, notably H and I.
PR-B-0937	Philip	Rawle	Greenlight Developments	21			The essential GB Study work is missing from the evidence base. On this basis there is a fundamental flaw in the Options Consultation document as it is proposing to release land from the GB yet the requisite GB study work does not accompany such an approach. The selection of Options A and B must therefore be considered premature and unjustified based on the current evidence base.
PR-B-0944	David	Stone		21			Consideration need to be given to GB and the reason it exists and to the serious consequences for community cohesion, wellbeing and traffic congestion for areas A and B. The proposals do not address the need for affordable housing. There is a need to explore and develop options to expand other areas of Cherwell through improved connectivity and capitalise the potential of the Oxford Cambridge Express Way.
PR-B-0948	Tim	del Nevo		21			Criticism to a document that is 175 pages long which contains very technical and detailed wording.
PR-B-0956	Mark	Recchia	Banbury Town Council	21			Agrees with the evidence base, and suggests that the recent economic growth projections in the wake of recent political developments in the UK should be included.
PR-B-0957	Martin	Small	Historic England South East Historic Environment Planning Group	21			Would have liked to see more historic environment evidence identified – the Oxfordshire Historic Landscape Character Assessment and up-to-date Conservation Area Character Appraisals for example.
PR-B-0962	Dr Judith A	Webb		21			As an experienced wildlife recorder I know for a fact that most sites of value to wildlife are lacking in sufficient evidence as full biodiversity surveys are almost never available. Surveys need to be not only for protected species, but the whole range of wildlife, especially records are lacking for invertebrates of importance. There needs to be very good calculations for cumulative ecological impact and in the case of Oxford Meadows SAC this needs coordination and cooperation of three districts. The consultation does not show any of the sites with wildlife designation in any of the maps for potential housing. You have not given the public who might care about wildlife enough information to make decisions.
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	21			Supports selection of sites that are south west, south and south east of Kidlington, as close as possible to Oxford.
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	21			Presently the evidence base is not sound. It fails to consider fully all the reasonable alternatives. Predetermining options for growth without first considering all reasonable alternatives is dangerous. Failing to get the evidence base correct at this stage will result in a protracted examination and further pressures due to the lack of housing delivery.
PR-B-1024	Andrew	Hornsby-Smith		21			Objects to the GB assessment which sets out on sites that abut Kidlington, that: 'This parcel [of land] lies adjacent to Kidlington which is not considered to be a large built up area. Therefore, the parcel is not considered to contribute to checking the unrestricted sprawl of built-up areas.' Feels strongly that Kidlington is a large built up area and impact on unrestricted sprawl should be assessed in terms of the GB.
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	21			As noted above it appears little regard has been paid to the submitted draft masterplan. This should be considered as a submitted document.
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	21			See response to Q7. With regard to the transport evidence base, it is noted that it is based upon a series of traffic models which are in the process of being updated. It is considered essential that the Plan is based upon the most up-to-date evidence available to ensure the soundness of the Plan.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1038	Mrs Margaret	Sidebottom		21			Evidence base is clearly controversial, which is illustrated well by the response from the Oxford GB Network. New employment would be better based outside the city. Like in the new science parks, new housing would be more appropriately based alongside these sites.
PR-B-1039	Igor Niladri	Dyson		21			Yes. GB plays a crucial role in maintaining and encouraging physical, spiritual and mental health.
PR-B-1069	JP	Lyes		21			There are several areas where the specifics of Kidlington have been ignored as the data is not available. As Kidlington would be providing 30% of Oxford's unmet housing needs the data should be obtained. This rep raises questions on the cost of the consultation and which authority is paying it?
PR-B-1094	Andrew F	Hickman	Middleton Stoney Parish Council	21			A major omission is that the OGB - Green Belt Study PR13a-b specifically did not set out to advise on the suitability or potential of land for development.
PR-B-1095	Val	Russell	Bodicote Parish Council	21			Concerned that current Banbury Masterplan has not yet been implemented. There are uncertainties with Brexit and Local Plan Part 2 potential allocations. So, housing numbers are yet to be realised. Implications of infrastructure requirements and impact on area are major concerns.
PR-B-1096	Greg	Blaquiere	Terence O'Rourke Ltd on behalf of the Vanbrugh Unit Trust and Pye Homes	21			This response is essentially the same as those to Q19 and Q20. They are detailed and comprehensive responses.
PR-B-1132	Linda	Ward	Kidlington Development Watch	21			Evidence submitted previously criticising the Oxfordshire SHMA and the economic forecasts underpinning it. CDC should therefore, in collaboration with the other Oxfordshire authorities, revise downwards these unrealistic forecasts.
PR-B-1133	Philip	Towler		21			The consultation period was poorly advertised and the timing, over the Christmas period does not give confidence in CDC. Local residents' views should be sought as stated on page 3 of the summary booklet 'The partial review must be supported by robust evidence, through community and stakeholder engagement'
PR-B-1142	Alan	Lodwick		21			Oxfordshire SHMA is a deeply flawed document based on assumptions of highly exaggerated economic growth. The economic forecasts underlying the SHMA should be revised downwards to reflect realistic expectations of future growth and the consequent housing need adjusted downward accordingly.
PR-B-1146	DJ	French	Deddington Development Watch	21			There is a lack of evidence about environmental and social impacts and how these may be mitigated.
PR-B-1154	Jim	Spencer		21			The consultation appears extensive and inclusive.
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	21			Oxford City are providing the businesses and getting business rates which are probably greater per hectare than putting up domestic houses. It will be down to Cherwell to pay for the planning, consultation and for the infrastructure of this whole project.
PR-B-1157	Nicola and Giles	Lewis		21			The evidence is based on flawed analysis. The number of additional homes is based on jobs not yet created in Oxfordshire. This exaggerated number was predicted before the UK voted to leave the EU so the uncertainty of the economic implications of this make the numbers even more questionable. To release GB on this evidence would be hasty and irresponsible, given the permanence of the destruction of countryside. Moreover, the majority of the top ten employers in Oxfordshire are heavily dependent on Government funding which is already under pressure, so there is no guarantee that these organisations will be able to support the growth predicted.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	21			Incomplete, patchy and predicated upon a series of assumptions as noted in the introductory part of this response
PR-B-1163	Catherine	Arakelian		21			The lack of democratic process (no-one voted to increase Kidlington's size by 40%), the poverty of information to the public, and then the speed at which the whole review process is progressing, together with a compromised evidence base, fitted to the outcomes desired. Disguising itself as a plea on behalf of people who can't afford to live and work in Oxford, Oxford's so-called unmet housing need is a fiction to permit profiteering from the relaxation in planning laws.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1165	Caroline	Johnson		21			The exercise is predicated on exaggerated estimates of employment growth and over estimates of unmet housing need. Basing a decision that will irrevocably remove open country and change the character of Oxford, Kidlington and Cherwell on one set of data produced by the interested party would not be meeting your duty.
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	21			No comments
PR-B-1181	Heidi	Lancaster		21			The evidence base is flawed as it's based on a desire for growth that will be unsustainable. Oxford has a limited area and if it cannot meet its own housing needs then further growth is clearly unsustainable. Growth should be directed towards community projects and improvements to the surrounding environment which would create a better quality of life for residents. The consultation was poorly promoted and needs extending as many residents are completely unaware of it.
PR-B-1188	Carol	Matheson		21			Housing should be based on up to date information. Already the university has fewer applicants, fewer academics (slowdown in funding caused by Brexit) and central staff are being made redundant.
PR-B-1223	Judith	Johnson	Environment Agency	21			The Environment Agency recommends that sufficient evidence for the local plan needs to be in place to show that any environmental constraints have been considered and that any mitigation necessary has been undertaken or is capable of being undertaken. They are happy to note that it is proposed to undertake a water cycle study, a Strategic Flood Risk Assessment (level 1) and a flood risk sequential test. Subject to the findings of the SFRA level 1 and the output of the flood risk sequential test, if it is proposed to allocate any sites for development in any areas at risk of flooding then may also need to undertake a level 2 SFRA.
PR-B-1224	Theresa	Goss	Adderbury Parish Council	21			No comments at this stage.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	21			The absence from the evidence base of a number of documents is not helpful. In particular the 'Landscape Sensitivity and Capacity Assessment', the 'Transport Assessment', the HELAA and the 'Strategic Development Sites - Place Shaping Principles and Capacity Assessment'.
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	21			A Green Belt review is required, or provision made that Oxford's unmet need constitutes very special circumstances for development in the Green Belt.
PR-B-1227	Richard	Silvester		21			The Oxfordshire SHMA is based on exaggerated estimates of economic growth that lead to overestimated housing need. Criticism of the SHMA from various organisations have never been seriously addressed. Before destroying GB a further study should be commissioned by an independent organisation.
PR-B-1229	Henry	Brougham		21			No comments.
PR-B-1233	Simon	Gamage	RPS Planning and Development on behalf of Mr R Bratt	21			No comments to make.
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	21			Would have expected the further evidence set out in Table 19 to have informed part of the Options consultation.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	21			In general terms have no comments on the evidence base. However, it is clear from the Initial Sustainability Report that there are a number of topics where more detailed site specific work would be of benefit.
PR-B-1240	Suzanne	Willson-Higgins		21			Housing need should be based on up to date economic forecasting. For example, that Brexit has already seen a down turn in EU research funding and a decline in the level of recruitment by the University. The University has called for voluntary redundancies from centrally employed staff. Employment is not set to grow any further at this time. On this basis, an independent review of the economic forecasting should be undertaken which takes these factors into account, as they could affect future housing needs.
PR-B-1243	Kazimiera	Kantor		21			Insufficient time to comment.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1251	Susan	Silvester		21			The Oxfordshire SHMA is based on exaggerated estimates of economic growth that lead to overestimated housing need. Criticism of the SHMA from various organisations have never been seriously addressed. Before destroying GB a further study should be commissioned by an independent organisation.
PR-B-1255	Kezia	Sheppard		21			No.
PR-B-1256	Nicola	Mallows	Gresswell Environmental Trust	21			The Oxfordshire SHMA should be reassessed. It proposes land availability and housing levels that are entirely ridiculous: were any to be built would seriously undermine the Oxford Green Belt, and would ruin for ever the quiet backwater of low lying flood plain of the river Cherwell, the Ray, and the villages that adjoin Cherwell district into South Oxfordshire, such as Woodeaton, Noke, Beckley, Stanton St John, and Forest Hill.
PR-B-1263	Katie	Silvester		21			The Oxfordshire SHMA is based on exaggerated estimates of economic growth and this results in massive over estimates of housing need and land requirements. Criticisms of the SHMA from various organisations have never been seriously addressed. You should commission a further study from an independent organisation before irrevocably destroying large areas of the Green Belt and other countryside within Cherwell.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	21			Suggest that an impact assessment of major new growth close to Kidlington and its potential impact on viability of the Village. Concerned that the circumstances have altered since the economic forecasting was undertaken that underwrites the 2014 SHMA. Brexit has already resulted in a reduction in EU funding, and thus a decline in recruitment by the University. An independent review of economic forecasting should be undertaken to calibrate and check up to date housing need.
PR-B-1272	S G	Wakeling		21			No comment at this stage.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	21			Have no comments at this stage, but reserve the right to comment on this topic in the future.
PR-B-1298	James	Jocelyn		21			The evidence base is disappointing. The work done by consultants on the SHMA plays fast and loose with the requirements of the NPPF, it does not make 'reasonable adjustments' to numbers provided by specified basic data sets (for example the DCLG local household projections) but abandons them in favour of significantly less robust calculations. Concerned with the council's and OGB's misrepresentation and misapplication of the outcomes of the SHMA, also the integrity of the Oxford GB study. Further evidence on the relationship of new housing construction to the availability of affordable housing should be sought and considered.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	21			Nothing further to the above.
PR-B-1346	Neil	Tiley	Pegasus on behalf of the Dorchester Group	21			The Partial Review responds to the identified OAN and plans to meet the identified unmet needs of Oxford City. However, it is necessary to review the SHMA in order to take account of the meaningful changes within the 2014 projections which have been published since the Local Plan Part 1 was adopted. This will need to be addressed (alongside the other issues identified) through the necessary comprehensive early review of the Local Plan. Have provided comments regarding Policy Villages 5 and affordable housing requirement of 30% for strategic sites on viability grounds, which should apply to the strategic sites allocated in this review.
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	21			Other documents such as The Oxford GB Study, Oxford SHMA should be taken into account. The evidence base does not support Council's decision to only assess sites in Areas A and B.
PR-B-0019	Edward	Dowler	Middle Aston Parish Meeting	22			Yes
PR-B-0033	Henry	Munday		22			Too short a time, flats would be better than houses.
PR-B-0041	David	Pratt		22			2021 is justifiable if Oxfordshire County Council puts in the infrastructure required.
PR-B-0055	Cynthia	Hall		22			No, houses should be built in response to actual not projected need.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0057	Matthew	Taylor	Aitchison Rafferty	22			The market will best respond to the deliverability of sites. The infrastructure requirements are a long term goal. By setting a minimum threshold for sites risks increasing the pressure on the early implementation of infrastructure and development timescales which result from their construction. The deliverability of sites should include small to medium sized developments. LEPs and the HCA should help unlock infrastructure investment required for larger sites.
PR-B-0119	C A	McCall		22			In five years time Oxford City's housing may have been found elsewhere, it is all rushed and chaotic.
PR-B-0153	Paul	Goulding QC		22			There is a material risk that this is over-ambitious. It is essential that all necessary services and infrastructure are in place before housing development proceeds.
PR-B-0169	Colin	Carrit		22			Yes. It is an appropriate start date. Sooner if possible.
PR-B-0171	Peter	Worth		22			Keep it as a rolling 5 year plan, it will probably show the lack of impetus with the numbers going to the right.
PR-B-0447	Laura, John, Benito	Wainwright		22			No 2021 is totally unrealistic as a start date, as this is too short a time for the necessary infrastructure to be in place.
PR-B-0637	Prof Martin LG	Oldfield		22			No, because Oxford's stated housing needs are unrealistic and it's unnecessary to go beyond the 2014 Cherwell plan.
PR-B-0643	L	Allen		22			Given that Oxford City has yet to prove its needs and infrastructure changes are unlikely to be in place, 2021 is not achievable.
PR-B-0653	Peter	Webber		22			Not unless City has been able to demonstrate its housing needs.
PR-B-0655	Christina Mary	Shirley		22			Why is there a start date before the consultation period is complete, this suggests it's a pointless exercise.
PR-B-0656	Mary G	Shirley		22			It sounds as if it has already been decided by Oxford City Council.
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	22			Should be a period of waiting and seeing prior to ploughing ahead and building a greater number of homes than may be required.
PR-B-0705	Nick	Small	Stagecoach	22			Strongly agrees.
PR-B-0710	Selwyn	Phillips		22			Fine, but do we need to keep hearing about "Oxford's housing need" it is Oxfordshire's.
PR-B-0711	Anthony	Matthews	Shipton-on-Cherwell and Thrupp Parish Council	22			2021 seems reasonable but any delay to this would clearly have an adverse effect on the delivery of the 4,400 target for Oxford housing by 2031. Can 2021 be improved upon?
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	22			Are aware of the requirement to maintain a five year housing land supply. However, do not consider it is reasonable to expect Cherwell to accommodate such a significant proportion of Oxford's unmet housing needs in addition to the 22.840 new homes already allocated under the adopted local plan.
PR-B-0743	John	Tremlett		22			Yes, I suppose
PR-B-0769	Debbie	Jones	Bidwells on behalf of City of Oxford Charity	22			It is anticipated that the Partial Review of the Local Plan will be adopted in April 2018. Bearing in mind the extent of Oxford City's housing shortfall, the start date for delivery should be the date of adoption of the Local Plan Review. (April 2018)
PR-B-0770	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	22			The sooner the housing can be supplied the better so that Oxford's unmet needs can be addressed. A sooner date should therefore be used.
PR-B-0786	Jane	Olds	Caversfield Parish Council	22			Adequate
PR-B-0797	Clive	Booth	Oxford Civic Society Planning Group	22			The 2021 start date for 5 yr. housing land supply is justified and appropriate start date for being required to meet Oxford's housing needs and to deliver a five year supply.
PR-B-0799	Ian	Sheppard		22			No. Do not feel that Oxford's needs are required outside the city limits, given that future business will go away from Oxford apart from research within the university areas which have enough room.
PR-B-0808	Chris	Robbins		22			2021 appears to be a reasonable start date.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	22			No. Whilst the Oxfordshire Growth Board Statement of Cooperation assumes the start date for the provision of houses will be after 2021, it does not preclude delivery before 2021. The Council need to acknowledge and plan to deliver Oxford's unmet need as soon as possible to ensure the needs are met by 2031. There should be a range of sites, rather than a single allocation to provide the greatest possible chance of delivery in advance of the cessation of the SHMA period in 2031.
PR-B-0825	Simon	Joyce	Strutt and Parker on behalf of Mrs A Darbshire	22			Yes. In line with the NPPF relating to deliverability of sites our client's site is available now for residential development, offers a suitable location for new housing and is achievable and could be developed from 2021 onwards
PR-B-0826	Alan	Dobson		22			This question seems to assume the development will go ahead in full regardless.
PR-B-0832	Richard	Hills		22			This is fine. Consideration of housing supply year by year, identifying supply each year, calculating and publishing a running deficit as we fall further behind. Oxford requires approximately 1,500 homes per year. Oxford is currently building 0-500 homes per year. Running figures should be published regularly, and part of a continuous discussion about identifying new sites and reforming the planning system.
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	22			Yes
PR-B-0841	Darren	Bell	David Lock Associates on behalf of Hallam Land Management Ltd	22			The start year of 2021 is not justified and is inconsistent with Government policy. The 4,400 dwellings should be added to the requirement at the earliest opportunity and certainly no later than the adoption of the Partial Review.
PR-B-0842	Alex	Wilson	Barton Willmore on behalf of A2 Dominion Group Ltd	22			The Council needs to augment its housing land supply to identify and allocate additional deliverable land for housing in the short term. Development should not be precluded from coming forward before 2021. This should be reflected in the Partial Review.
PR-B-0847	Richard	Cutler	Bloombridge LLP	22			No. The 5 year supply is relevant on the adoption of the Partial Review and, given that Oxford's unmet housing need is a current, pressing need the Partial Review needs to set a strategy that makes in-roads in to this need straight away.
PR-B-0856	David	Smith		22			Yes
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	22			The Parish considers that the case for meeting Oxford's housing needs on the scale envisaged has not been proved. We therefore have no specific comment in response to this question at this time. However, note that once housing has started the practicalities of identifying whether or not new housing is contributing towards Oxford's unmet need or to Cherwell's existing need are likely to be very difficult.
PR-B-0868	Jennifer	McFadden		22			Seems very soon for such a major undertaking. Although this greatly affects North Oxford Residents it appears many were unaware of these proposals as the Oxford City Council didn't seem to disseminate the information widely.
PR-B-0869	Peter	Hainsworth		22			No. Transport need's much more serious consideration. So do questions of whether growth is necessary or desirable. Criticism with the documentation and consultation process.
PR-B-0877	David	Flavin	Oxfordshire County Council	22			Agrees with the start date
PR-B-0878	Jane	Olds	Wendlebury Parish Council	22			2021 is not justified start date, and suggests that Cherwell needs to meet its own needs first. A more appropriate start date would be 2031.
PR-B-0887	Paul	Buckley		22			Yes
PR-B-0895	Dr Alison and Dr Simon	Street		22			This would seem appropriate.
PR-B-0897	Rob	Lawrence		22			No.
PR-B-0905	Theresa	Goss	Bloxham Parish Council	22			The year 2021 seems reasonable, by this date National Govt. may have resolved a definitive method to calculate the five-year housing land supply.
PR-B-0907	Alison	Forfar		22			The start and supply period needs to be based on actual economic growth of Oxford not inflated projections. Growth needs to be monitored with robust testing for the need which is not to be influenced by the desire to attract funding to drove growth.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0910	Ken	Pelton		22			Disagree with the existence of Oxford's housing need and therefore the need for any start date. 2021 might be a suitable date to look at the position again, having done nothing on the meantime.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	22			There is clearly a need for developers to be required to activate planning permissions and get on with developments. In a recent Dispatches program on Channel 4, it became apparent that this is a real problem with building land being hoarded. The Minister for Communities and Local Government Sajid Javid stated that he would bring forward urgent measures to oblige developers to start and complete projects. Until those measures are known we cannot comment on this question.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	22			The aim should be to meet unmet need as soon as possible. Whilst it is likely that allocation of land, through to grant of planning permission could take up to 5 years. This should not be allowed to prevent development earlier if this can be achieved.
PR-B-0931	Jane	Olds	Fringford Parish Council	22			Yes
PR-B-0935	David	Lock	David Lock Associates on behalf of Gallagher Estates	22			This approach is not supported by the NPPF and is inconsistent with Government guidance. The 4,400 dwellings should be included as part of the adopted CDC requirement at the earliest opportunity, the demand for housing being current and significant. This also reinforces the need for a range of sites that can help deliver supply in the short term.
PR-B-0937	Philip	Rawle	Greenlight Developments	22			This is a lengthy and detailed response. Concludes by stating that the Council should be factoring Cherwell's apportionment in to its 5-year supply position now, as per the approach of Inspector Emerson (the examining inspector of the West Oxon Local Plan).
PR-B-0944	David	Stone		22			It is not appropriate and would cause problems, especially as work is likely to have started on the Northern Gateway and other development sites accessing the A40 and A34. It needs careful evaluation. Do not agree with Oxford's housing needs destroying the Green Belt, More consideration and respect needs to given to the natural environment and means of retaining the identity and separation of present established communities. Brexit needs consideration.
PR-B-0948	Tim	del Nevo		22			The need for wholesale development has been hugely exaggerated. Is Oxford to be sacrificed for greed and profit.
PR-B-0949	Peter	Monk	Banbury Civic Society	22			This as a reasonable date, subject to the resolution of the issues raised by our comments.
PR-B-0956	Mark	Recchia	Banbury Town Council	22			This is appropriate given the decision to create separate 5 year land supplies for Cherwell itself and meeting Oxford's unmet need.
PR-B-0984	Jane	Burrett		22			No because of the factors such as The express way between Oxford and Cambridge. The outcome of the feasibility study for an additional junction between 8 and 9 on the M40. Changes to employment like at Cowley before the Brexit vote and housing need from the social economic changes in the region which will arise from Brexit., this will take time to become clear. Unclear to educational institutions because of Brexit as immigration decision are yet to be made.
PR-B-1003	Simon	Turner	Launton Parish Council	22			On the borderline of being achievable
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	22			To answer this question one must know if CDC will first deliver the infrastructure near Oxford. That the timetable might be a bit short of there should be delays for appeals, etc. What is important is that should CDC proportion of Oxford's unmet needs (the 4,400) for some reason fail any timescale created for the 5-year housing supply of that proportion, then it should be made clear that the areas to be looked at remain consistent with all the previous points they have made.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1015	Daniel	Hatcher	Rosconn Group	22			On the basis that the PR is expected to be adopted in 2018, which will include allocated sites to meet Oxford City's unmet needs, 2021 is unnecessarily late in that some (smaller) sites may well be able to come forward in advance of then. As it is necessary for the unmet need, alongside Cherwell's own housing needs, to be met by 2031 every effort should be made to bring forward sites as soon as possible to ensure there is a realistic opportunity for the HMA's housing needs to be met in full during the Plan period.
PR-B-1016	Ben	Simpson	WYG on behalf of Bonnar Allan Ltd	22			It would be possible to start delivering against their housing needs before 2021 providing the Plan process proceeds swiftly and applications are dealt with concurrently. New Alchester is available and could deliver homes within the first five year period. The land is under the control of Bonnar Allan; there are no infrastructure constraints; it would help deliver the perimeter road from a new junction with the A41 which is in Bonnar Allan's control to the edge of Graven Hill; and it can deliver most, if not all of the 6000 homes within the adopted plan period to 2031.
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	22			Yes, certainly not unreasonable.
PR-B-1024	Andrew	Hornsby-Smith		22			Supports 4,400 homes for Cherwell provisionally based on the assumption that actual land at Pear Tree can be released for housing.
PR-B-1027	Jonathan	Porter	Archstone Projects Ltd	22			Given the urgent need for new housing to assist Oxford City, the arbitrary date of 2021 should be considered a backstop, with the aim of commencing delivery at the soonest opportunity.
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	22			Understand 2021 has been indicated as a pragmatic start date for the delivery of new homes. This should not preclude an earlier commencement should a development be in a position to offer it; in view of the significant housing need this would clearly be beneficial.
PR-B-1033	Matthew	Symons	Hollins Strategic Land	22			It has demonstrated that 2021 is not an appropriate start date for being required to meet Oxford's housing needs to deliver a 5-year supply. Have provided more detailed information in their submitted representation
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	22			No comment at this stage. Do however, reserve the right to comment on this topic in future rounds of consultation.
PR-B-1069	JP	Lyes		22			The speed at which the work is being done presently is already showing signs of weakness in the specifics that relate to Kidlington. Quite clearly with everything being so hastily put together there is more scope for error and omission. All the electorate can do is assume the officials are not being driven at too fast a pace by their political masters to do their jobs to the standards required.
PR-B-1094	Andrew F	Hickman	Middleton Stoney Parish Council	22			Not qualified to assess whether 2021 is a reasonable start date. It is essential that a five year land supply is maintained in order to inhibit speculative development.
PR-B-1095	Val	Russell	Bodicote Parish Council	22			Oxford's unmet need will result in putting Cherwell's 5 year land supply being put at risk, if the number of houses allocated to our part of the district become undeliverable. AMR - Does Cherwell put itself at risk of speculative development, housing intended for Oxford, if the 'number of dwellings with 'planning permission but not built', falls short of any targets set in delivery plans. Are not in a position to comment on 2021 as an appropriate start date.
PR-B-1096	Greg	Blaquiere	Terence O'Rourke Ltd on behalf of the Vanbrugh Unit Trust and Pye Homes	22			National planning policy provides no support to holding back sustainable development whilst the local plan process is concluded. It is unreasonable to put a date restriction on the delivery. The need for homes is immediate.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1099	Alan	Storah	Oxford City Council	22			There is neither any need nor any reason to wait until 2021. When the additional figure that will contribute to Oxford's housing need has been agreed, (with the adoption of the Partial Review of the Local Plan), that should become the start date to meet Oxford's housing needs and to deliver a five-year supply. That distinction between the commencement date of the 5 year housing land supply for the district and that specifically to meet Oxford's needs may well result in the optimum approach being to keep the two distinct and separate. This would also be expected to contribute, as soon as reasonably possible, to meeting the pressing need for more housing for Oxford.
PR-B-1108	Tom	Hockaday		22			This depends on the approach of other Districts, notably Oxford itself. The Districts, including Oxford, need to work constructively together.
PR-B-1126	Jamie	Lewis	Hunter Page Planning on behalf of M and G Real Estate	22			Suggest that the overall housing target for Cherwell should also be reviewed to ensure it is up to date and is 'drawn up over an appropriate time scale, preferably a 15 year time horizon' (para 157 NPPF). Final publication of the Partial Review is anticipated 2018, as such it is suggested that the Oxfordshire SHMA should be updated to include a housing target that extends beyond the current time horizon of 2031, to provide a basis on which to positively plan for growth over a sufficient time horizon, that being at least 15 years as advocated by the NPPF.
PR-B-1140	Catherine	Richenburg		22			No, it is too soon. Insufficient time for consultation with the Northern Gateway.
PR-B-1146	DJ	French	Deddington Development Watch	22			Objects. The "very high delivery requirement" (per paragraph 8.15) in respect of Cherwell's own targets under Local Plan Part 1 imposed by the 2014 SHMA, which we believe to be unrealistic, suggests that a 2021 start date is unduly optimistic. Accordingly, feel that 'ring-fencing' a specific supply for Oxford is required to avoid harm to the Cherwell strategy. This is likely to be facilitated if strategic sites in Options A and B close to the north of Oxford are selected. If there is a 'total requirement', even more of the local supply of housing land risks being used to meet the requirements of Oxford. There is also likely to be an imbalance over the plan period between Oxford's housing needs and Cherwell's housing needs which will be difficult to manage without 'ring-fencing'.
PR-B-1154	Jim	Spencer		22			A start cannot be made soon enough.
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	22			Do not agree. Why should they consider 2021 as a justified start date?
PR-B-1157	Nicola and Giles	Lewis		22			That seems a reasonable date by which developers should be required to activate planning permission already available on brownfield sites and release building land being hoarded.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	22			No. Not enough examination of Oxford's prior efforts has been shown to establish that a) there is a need, and b) Oxford has seriously investigated all ways and means of meeting their target.
PR-B-1163	Catherine	Arakelian		22			No. It compromises CDC own five year supply, and any other need that to be taken into consideration for its own rate-payers. You can only concrete over the countryside once.
PR-B-1165	Caroline	Johnson		22			It should be no earlier given that there is no evidence that Oxford can deliver the employment growth that is being estimated. Your analysis assumes that the only possibility is that Oxford has a need earlier than expected, what approach will be taken if the employment growth does not materialise at the rate suggested?
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	22			No. The consultation paper indicates that the Partial Review will be adopted in April 2018, therefore this would be a more realistic and appropriate start date. The start date should be when the reviewed plan is adopted.
PR-B-1188	Carol	Matheson		22			Cannot comment on this because of the flawed information that has been presented. Oxford has not proved that it needs all this housing and needs to review its findings with up to date figures. It needs to take into account GB and local village communities.
PR-B-1224	Theresa	Goss	Adderbury Parish Council	22			No comments at this stage.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	22			No. Oxford's unmet housing needs, as part of the Oxfordshire HMA, are present now and the delivery of housing should not be delayed by specifying a commencement date at 2021, including for the calculation of a five year supply. Detailed references are made to the NPPF.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	22			The unmet housing need apportionment of 14,850 is derived from figures in the 2014 SHMA of 15,105 over the period 2011-2031. It is therefore sensible to make provision for homes to come forward as soon as is practicable rather than assigning 2021 as a commencement year for the provision of homes to meet Oxford's need.
PR-B-1229	Henry	Brougham		22			Yes, in order to identify, design and programme the infrastructure requirements for the housing, prior to development commencing.
PR-B-1230	T M M	Green		22			Building should only commence when the necessary infrastructure is in place, roads, railway, buses, schools and other amenities capable of sustaining the new housing.
PR-B-1233	Simon	Gamage	RPS Planning and Development on behalf of Mr R Bratt	22			No comments to make.
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	22			No comments at this stage.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	22			2021 is a justified an appropriate start date. But it should be kept under review as the Local Plan progresses, and should be sufficiently flexible to take account of changing market conditions over time.
PR-B-1240	Suzanne	Willson-Higgins		22			The Parish considers that the case for meeting Oxford's housing needs on the scale envisaged has not been proved. Notes that once housing has started, the practicalities of identifying whether or not new housing is contributing towards Oxford's unmet need or to Cherwell's existing need are likely to be very difficult.
PR-B-1243	Kazimiera	Kantor		22			Insufficient time to comment.
PR-B-1255	Kezia	Sheppard		22			Don't know.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	22			2021 is an appropriate start date.
PR-B-1272	S G	Wakeling		22			Don't know about an appropriate start date but justification only to be considered within the constraints of the responses to questions 1 to 5 and question 7 above.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	22			Have no comments at this stage, but reserve the right to comment on this topic in the future.
PR-B-1287	Tenley	Soanes		22			Will you be back for more in five years? Oxford City need to stop being greedy and look at their own resources. Why do we need to keep growing all the time? A reduction in students numbers and use their accommodation for housing stock. Create jobs in areas where there are none and people are struggling like in the North and West Country.
PR-B-1294	Giles	Hughes	West Oxfordshire District Council	22			Agrees, this is the common start date assumed in the OGB apportionment, and reflects the wording of the agreed memorandum of cooperation.
PR-B-1295	Natasha	Blackmore	Sheldon Bosley Knight on behalf of the Wright Family	22			The NPPF requires LPA's to maintain a 5 yr. housing land supply. Many sites will encounter delays in delivery, particularly for the larger strategic allocations, where barriers to delivery can result in long delays to works being commenced on site and dwellings becoming occupied. In the absence of a 5 yr. housing land supply. LA's can become exposed to speculative planning applications on appropriate sites. It is therefore, important that the planning and delivery of houses to address the unmet housing need should commence as soon as practicable.
PR-B-1297	Simon	Handy	Strutt and Parker LLP on behalf of Dairystock Ltd	22			Site PR27 is available now and could certainly be developed from 2021 onwards, particularly in conjunction with site PR14.
PR-B-1298	James	Jocelyn		22			If the question is amended to read '...to help meet Oxford's affordable housing needs...' then Yes. Otherwise, No.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	22			No. Development that is sustainable should go ahead without delay. This is a national policy requirement. The deliverability of sites should be an important consideration in the site assessment process.
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	22			2021 is justified and an appropriate start date.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1346	Neil	Tiley	Pegasus on behalf of the Dorchester Group	22			By the time PR is adopted in 2018 there will be a 7 year shortfall, with no homes having been delivered to meet the annual requirement for 220 homes in Cherwell to meet the needs of Oxford City because the identified OAN for Oxfordshire relates to the period 2011 to 2031. The shortfall amounts to 1,540 homes. The PR should be required to respond as soon as possible rather than implementing a further 3 year delay in the need to deliver housing. The housing strategy should also incorporate a 20% buffer in recognition of the shortfall. The proposed started date of 2021 will delay delivery further constraining the housing market for residents in Oxford, who will need to remain in their current potentially crowded and unsuitable accommodation, etc. which would be contrary to the objectives of national policy.
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	22			Delaying the five year housing supply date to 2021 would mean imposing an artificial constraint on the housing market. There may be a high volume of applications/permissions in the intervening years from now until 2021, meaning that the delivery would be skewed to the first 5 years of the time period from 2021. Grange Farm Launton is available for development now.
PR-B-0033	Henry	Munday		23			Will CDC cooperate with developers with planning, building regulations, section 106 and is there any flexibility in the plan as it proceeds?
PR-B-0055	Cynthia	Hall		23			Believe this will be outside of council control. GB will be given to developers and social housing will be a low priority.
PR-B-0057	Matthew	Taylor	Aitchison Rafferty	23			No. Small to medium sized sites should be encouraged to avoid house builders developing more favourable sites before building out allocations.
PR-B-0060	Sue	Mackrell	Bicester Town Council	23			Agree with phasing of land release to assist 5 year land supply.
PR-B-0119	C A	McCall		23			The appropriate housing must be planned carefully, if land release is to work. Stop properties which are three stories high with one parking space.
PR-B-0171	Peter	Worth		23			Once planning is approved put a tax on the land owners to promote delivery of the housing
PR-B-0209	Patrick and Julia	Jennings		23			Yes land releases should be phased to ensure that there is not over development if requirements should change. This also ensures the developers will be forced to deliver on early phases or risk being dropped from further bid lists.
PR-B-0637	Prof Martin LG	Oldfield		23			No. Developer competition benefits developers but not necessarily the people who live in Cherwell. Sensitive planning by CDC is needed which takes into account the wishes of local residents. The developers have been given an open goal for months to suggest areas for development, while the "consultation" to local residents has consisted of little publicity followed by a draconian deadline for comments
PR-B-0643	L	Allen		23			No, there are already approved development sites not yet started. Developers wishing to make a profit will not build unless they can see a return. So unless councils are prepared to offer financial assistance house are unlikely to be built on time.
PR-B-0653	Peter	Webber		23			Phasing in is essential so that needs can be reviewed and necessary adjustments made, and to ensure that relevant infrastructure is in place.
PR-B-0655	Christina Mary	Shirley		23			Building should be limited and our identity preserved. Maybe some of the council grounds could be used for housing.
PR-B-0656	Mary G	Shirley		23			If the universities are considering selling ground outside of Oxford they should also consider building on the land within the city.
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	23			Agree with the Council on this point.
PR-B-0705	Nick	Small	Stagecoach	23			Strongly disagrees that any evidence exists nationally to suggest that attempting to manipulate developer activity through phasing releases will promote competition. A detailed argument and justification is set out in the rep.
PR-B-0710	Selwyn	Phillips		23			Existing buildings and land banks should be used first. There needs to be a number of skilled local workers to deal with the high level of building.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0711	Anthony	Matthews	Shipton-on-Cherwell and Thrupp Parish Council	23			It seems to us that if the Oxford housing need is to be specifically designed for and sited close to the City then it cannot be spread over a widely dispersed number of sites. How, therefore, can it form part of fulfilling the Cherwell need - should it not be subject to a separate land acquisition, infrastructure provision, housing development strategy and programme if the 2031 target is to be achieved?
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	23			Are aware of the requirement to maintain a five year housing land supply. However, do not consider it is reasonable to expect Cherwell to accommodate such a significant proportion of Oxford's unmet housing needs in addition to the 22.840 new homes already allocated under the adopted local plan.
PR-B-0743	John	Tremlett		23			Yes
PR-B-0770	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	23			The developers will automatically phase development on strategic sites and so there is no need for the LPA to get involved in this particular issue.
PR-B-0786	Jane	Olds	Caversfield Parish Council	23			Yes
PR-B-0797	Clive	Booth	Oxford Civic Society Planning Group	23			An innovative approach which places the Cherwell DC in the role of overall spatial growth 'Master Planner'. As local planning authority it could be argued that this role is already assumed. Suggest however that the role of the DC in determining where infrastructure for development will be located should be emphasised, asserting the DC's strong negotiating position with developers. This negotiation will include further capturing land value increases associated with the infrastructure provision. The process should not be led by the developers. The assertive role will include building on the work done by the District and County to indicate improvements to road and rail links which enhance the value of the strategic sites. It will also include continued work on other infrastructure components and evaluating the potential financial and economic impacts of different patterns of density and growth rates in terms of both private investment and Council tax revenue as well as congestion or travel time over the next 30 years (at 5-year intervals). Asserting this role should make it clear that the development of the strategic sites is to benefit the DC as well as the developers – the certainty that development of these sites will be associated with adequate infrastructure provision and adequate financial and economic returns should help to ensure maintenance of the land supply.
PR-B-0799	Ian	Sheppard		23			No. Do not feel that Oxford's needs are required outside the city limits, given that future business will go away from Oxford apart from research within the university areas which have enough room. Do not seem to meet Cherwell's district needs, only to actively pacify City Council.
PR-B-0808	Chris	Robbins		23			Phasing of land release appears reasonable.
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	23			Whilst phasing may have a role to play in maintaining a 5 year housing supply, it is equally important that there is a wide range of allocated sites, in terms of both size and location to promote developer competition.
PR-B-0821	Alan and Suzanne	Mclvor		23			Yes. Land release should be phased as requirements may change. This would also help to deliver integrated affordable housing.
PR-B-0826	Alan	Dobson		23			Have little confidence that developer competition will produce significant amounts of affordable housing.
PR-B-0832	Richard	Hills		23			No – land must be released immediately. Need the homes now, not staggered over 5 years. Phased release of land does not encourage competition. Allocating different plots to different construction companies within the same development is enough to drive competition.
PR-B-0837	David	Jackson	Savills on behalf of Christ Church, Exeter College, Merton College and OUP	23			There is little evidence to support the phasing/delay of the identified strategic development sites. The scale of Oxford's outstanding housing requirement, including the unmet element of need, is so great that relevant policies should be focussed on the earliest possible delivery of available sites.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	23			Yes
PR-B-0841	Darren	Bell	David Lock Associates on behalf of Hallam Land Management Ltd	23			CDC should identify a good range of housing sites in varied locations and capable of being delivered in the first 5 years and beyond the first 5 years. It would also be inappropriate to establish separate sources of supply and 5 year requirements within the same district and housing market area.
PR-B-0842	Alex	Wilson	Barton Willmore on behalf of A2 Dominion Group Ltd	23			Each strategic site should be dealt with on a site by site basis at the planning application stage. The Local Plan should not stipulate the phasing of strategic allocations.
PR-B-0847	Richard	Cutler	Bloombridge LLP	23			Disagree, although the extent to which we disagree depends on the size of each strategic site. Alternative is a 'blended strategy' with a blend of small, short term, lower impact sites combining with one or two major strategic sites. There is also a case for considering 'safeguarded land' as part of the strategic review of the GB, and this could provide for the future requirements of the University.
PR-B-0856	David	Smith		23			No comment
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	23			As the Parish considers that the case for providing to meet Oxford's housing needs on the scale envisaged is unproven at this time we have no comment in response to this question.
PR-B-0871	Patricia	Redpath		23			A sensible review of the SHMA is required to look at current circumstances and the projected figures. Claimed unmet need is not to accommodate Oxford currently, rather seeking to provide for economic growth in Oxford's hub. Lack of available land and destruction of the area if approved, this needs to be re-evaluated for its need. Alternatives need to be found. Areas have been considered and rejected before which has been a lengthy and expensive exercise. This is being overturned with little change to the circumstances.
PR-B-0877	David	Flavin	Oxfordshire County Council	23			Recommend that wherever possible health and wellbeing facilitating infrastructure is included in the earliest phases of any development.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	23			Unable to respond due to lack of time
PR-B-0890	Chris	Dicks		23			The ability of developers to land-bank sites must be prevented.
PR-B-0895	Dr Alison and Dr Simon	Street		23			Would expect the Council to insist on a balance of competitive interests.
PR-B-0897	Rob	Lawrence		23			No. Phasing of land would lead to poor quality and design of the houses built at different times with inconsistent approaches to planning and appearance. There would be a long period of disruption for residents. Better to release the land in a way that promotes developer competition whilst ensuring that design standards are maximised.
PR-B-0905	Theresa	Goss	Bloxham Parish Council	23			Welcomes Developer Contributions. National Policy on preventing land banking and promoting financial penalties for delaying development commencement is welcomed. Granting permissions needs to include shorter start dates for implementation and build-out rates timetables.
PR-B-0907	Alison	Forfar		23			Once brownfield sites in Oxford have been released and a robust assessment of the housing need has been undertaken with the revision of the numbers only then it would make sense to release land. However the approach used in Bicester at a lower density has not produced an attractive area. There needs to be greater control and thought with the developers to keep the areas attractive and to enhance the beauty of the areas.
PR-B-0910	Ken	Pelton		23			Again the question presupposes a need which I don't accept. The GB should be protected and nothing should be done to meet Oxford's supposed needs.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	23			There appears to be little competition between builders due to the restricted output of new homes built. The Dispatches program reported that sites appear to be subject to a policy of keeping construction low and prices high and that new homes are effectively rationed to enhance builders' profits.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	23			No, phasing of land supply does not promote developer competition, this is achieved within the open market. Phasing is an artificial restriction on the rate of development, which if it is to meet an unmet need, should proceed at the pace the market is able to deliver housing.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0929	Rosie	Lodwick		23			The projections of unmet need are very likely to be false. If that is the case because the methodology is flawed, or if the local or national economic context was incorrectly forecast, it would seem to her to be prudent to allocate a much more modest amount of land for housing at this time, and allocate more land at a future date should it become necessary.
PR-B-0931	Jane	Olds	Fringford Parish Council	23			Planning permissions should have a three year expiry date
PR-B-0935	David	Lock	David Lock Associates on behalf of Gallagher Estates	23			There is no reference in Government policy nor guidance that the phased release of strategic sites is a mechanism through which a 5 year housing land supply can be maintained. It is critical that the supply provides a range that offers choice and competition in the market. It would appear that the weight placed on the need to phase developments is to encourage competition across sites. However, if a strategy that sought a mix of sites across the District were pursued, choice and competition would be embedded in that strategy.
PR-B-0937	Philip	Rawle	Greenlight Developments	23			If Cherwell chooses to phase land release then it should be made clear that any future phasing is indicative only and not intended to prevent development coming forward earlier than indicated. There should be no policy that seeks to impose an arbitrary cap on development, even if the housing requirement figure is reached. In addition a range of large and smaller sites should be proposed to ensure a 5 year housing supply is achieved.
PR-B-0944	David	Stone		23			The Plan should make clear that land i.e. sites mentioned in Question 7 are enshrined as GB, have enduring permanence and are not for sale. Otherwise this defeats the whole reason, protection and purpose of GB. More sites could be brought forward in other areas of Cherwell.
PR-B-0949	Peter	Monk	Banbury Civic Society	23			Have reservations regarding the apparent involvement of developers - unless acting as 'contractors' via another mechanism. This could be a jointly owned, not for profit development company (similar to the 'self-build' project at Bicester) that would assemble the land and promote the construction to meet the identified requirements, but with particular emphasis on the provision of low cost social housing. Are sceptical that developers would deliver on this requirement to time and budget.
PR-B-0973	Jonathan	Harbottle	Land and Partners Ltd	23			An alternative strategy would be to allocate a range of sites across existing settlements, in line with Option I, which would have shorter lead in times. A broad range of allocations in sustainable rural settlements would deliver housing to maintain the 5 year land supply and reduce the need for artificially controlling the release of land.
PR-B-0984	Jane	Burrett		23			No. Developers work together to circumvent the best intentions of councils. Profit is the only motive, developers can not be controlled by councils. The plan to have an 'unmet housing need for Oxford's five year target is separate from those already planned by CDC. Why have CDC agreed to place these houses in this district. Green field sites which might be released at the direct benefit of Oxford City will lead to urban sprawl. Oxford City need to make better use of existing housing, look at brownfield sites and empty commercial properties.
PR-B-1003	Simon	Turner	Launton Parish Council	23			Unclear how this will promote developer competition or maintain the five year land supply.
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	23			Not able to answer this question
PR-B-1015	Daniel	Hatcher	Rosconn Group	23			Do not agree, consider that there is a pressing need to bring forward sites as soon as possible if the full housing need is to be met within the Plan period. Introducing phasing would only introduce delay in housing delivery.
PR-B-1016	Ben	Simpson	WYG on behalf of Bonnar Allan Ltd	23			Yes, phasing could positively assist delivery. Phased allocation at New Alchester would provide a different market for new homes to those already consented and under construction around Bicester. Phasing would also allow larger sites to begin delivery in accordance with the level of development required to meet Oxford's needs before going on in the future plan period to deliver more for Cherwell District.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	23			No. The market will dictate delivery so there is absolutely no reason why the Authority should interfere.
PR-B-1027	Jonathan	Porter	Archstone Projects Ltd	23			The idea of phasing would assume a consistent housing market throughout the plan period. There is an acute problem with affordability in Oxford City and the District. Seeking to restrict the delivery of new homes against market demand would be counterproductive.
PR-B-1030	Jonathan	Harbottle	Land and Partners Ltd	23			An alternative strategy would be to allocate a range of sites across existing settlements, which would have shorter lead in times. Infrastructure improvements would be more localised and could be delivered more quickly. A broad range of allocations in sustainable rural settlements would deliver housing to maintain the 5 year land supply and reduce the need for artificially controlling the release of land. Additional criteria-based policy to allow for sustainable development in rural areas would introduce greater flexibility and allow smaller sites to come forward. Suggested policy wording is proposed.
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	23			It will be recalled that at the Examination of the draft Cherwell Local Plan the Council's evidence highlighted the likely market saturation which would occur with further housing developments in Banbury and Bicester. It also indicated that development would therefore need to occur more appropriately closer to Oxford. Provision of homes closer to Oxford will provide greater security of delivery to support the necessary housing land supply.
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	23			Concern expressed that phasing policies could run counter to the objective set out in para 8.19. The matter therefore needs further and more detailed consideration.
PR-B-1069	JP	Lyes		23			It might but have no confidence in property developers or the notion of competition in that sector. What is suggested is that developers be required to show innovation in the provision of affordable housing in order to qualify for participation in the more profitable projects.
PR-B-1094	Andrew F	Hickman	Middleton Stoney Parish Council	23			Not qualified to assess whether 2021 is a reasonable start date. It is essential that a five year land supply is maintained in order to inhibit speculative development.
PR-B-1095	Val	Russell	Bodicote Parish Council	23			Are not in a position to answer this question
PR-B-1096	Greg	Blaquiere	Terence O'Rourke Ltd on behalf of the Vanbrugh Unit Trust and Pye Homes	23			The approach to phase sites is not considered reasonable. It is not necessary to address land supply in this way - any overprovision from the start of the plan period will continue to count towards the five year land supply. Early delivery should be encouraged and will positively assist the Council in maintaining a rolling 5-year housing land supply. It is also unclear how holding back sites would encourage competition between developers, there is no evidence for this and the strategy is unjustified and ineffective in this respect and therefore unsound.
PR-B-1110	Iain	Johnson		23			Am not sure a 5 year strategic plan of land release is appropriate. In the current uncertain economic climate there needs to be flexibility. Suggest land release should only be done when there is certainty of requirement for housing in that area. Pragmatic planning based on local conditions will make sure the "5 year plan" is not followed when it is no longer appropriate.
PR-B-1111	Pat	Clissold		23			Yes, a phased approach provides an opportunity to assess the situation according to economic growth. An example is near to Malaga in Spain where there are rows of empty houses. We do not want this in Cherwell, there is too little green space left now.
PR-B-1145	Richard	Bennett		23			If undertaken it must fully integrate transport and strategic infrastructure improvements.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1146	DJ	French	Deddington Development Watch	23			Deddington Development Watch consider that it is essential to release land in phases. It is a well established fact that large developers and house builders sit on land with planning permission. The failure to develop these sites, for whatever reasons are given, results in the 5-year housing land supply being questioned at best and undermined in reality. This results in more planning permissions being granted for land which would not have been brought forward at that time or simply as an opportunistic proposal on sites which in normal conditions would not get planning permission. This is well evidenced by housing sites permitted on appeal or reluctantly granted by LPAs knowing that without a 5-year supply appeals will be successful. Have provided further comments on the need to enter into legal agreements on housing and infrastructure delivery in detail in the representation.
PR-B-1154	Jim	Spencer		23			It is essential that the phasing of land release is done fairly so as not to favour one developer over another, having said that some sites will always be more attractive for development both for the developers and the authorities involved.
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	23			Understand that many sites in Cherwell have development permissions but no starts.
PR-B-1157	Nicola and Giles	Lewis		23			Refusing to release any GB land will encourage competition between builders who will be encouraged to start and complete projects rather than adhering to a policy of keeping construction low and prices high.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	23			No. Not enough examination to show that developers actively compete for whatever reason except land purchase.
PR-B-1163	Catherine	Arakelian		23			No comment
PR-B-1165	Caroline	Johnson		23			If this proceeds then land should only be released in tranches with time limited planning permissions to ensure that development proceeds and that the predicted housing need occurs.
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	23			No. Phasing the release of land is unlikely to promote developer competition. It is likely to impede delivery if the release of land is not quick enough to react to completions of previous phases. This may hinder rather than encourage the effective delivery of new homes. Phasing of sites is a prerequisite of delivering viable and properly planned and sustainable schemes. It does not promote developer competition and will not assist the maintenance of a five year housing supply.
PR-B-1188	Carol	Matheson		23			Cannot comment on this because of the flawed information that has been presented. Oxford has not proved that it needs all this housing and needs to review its findings with up to date figures. It needs to take into account GB and local village communities.
PR-B-1224	Theresa	Goss	Adderbury Parish Council	23			No comments at this stage.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	23			No. The Partial Review would better assist deliverability of the appropriate housing requirement, and the maintenance of a Framework - compliant 5 year housing supply, which ought not to be a calculation specific to Oxford's unmet housing needs, by considering all reasonable locations in contributing to meet Oxford's unmet housing needs, allocating a range of sites of varying sizes in a wider range of locations across the HMA within sustainable villages, including Arncott.
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	23			It is noted that delivery rates are to be prepared as part of the Local Plan Part 2, however, it is agreed that the phasing of a development is an appropriate means of ensuring the correct provision of uses to provide the required services for any new settlement.
PR-B-1229	Henry	Brougham		23			It is likely that the majority of development sites are already owned or optioned by volume house builders wishing to maximise profits. Additional measures, such as CPO of parts of these sites for release to small developers, housing associations and self-builders will be needed to achieve development at the rate required.
PR-B-1230	T M M	Green		23			Yes. Land release should be phased as requirements change. This would also help to deliver integrated affordable housing.
PR-B-1233	Simon	Gamage	RPS Planning and Development on behalf of Mr R Bratt	23			Generally agree with this principle however would welcome provision to allow earlier release of sites in the event that planned strategic sites do not come forward as expected.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	23			No comments at this stage.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	23			Agrees that phasing of land release within individual sites will promote developer competition and assist the maintenance of a five year housing supply. PR74 is available and can make an early contribution to meeting Oxford's unmet housing need as a stand-alone site in its own right. It could also be included as part of a wider site.
PR-B-1240	Suzanne	Willson-Higgins		23			The case for providing to meet Oxford's housing needs on the scale envisaged is unproven.
PR-B-1243	Kazimiera	Kantor		23			Insufficient time to comment.
PR-B-1252	Philip	Boxall		23			Agree with phasing of land release.
PR-B-1255	Kezia	Sheppard		23			No because Oxford University controls and owns most of the land in Oxford. How can developer competition be a thing when it's owned by one source?
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	23			Suggest that realistic expectations of delivery should be carefully assessed. As far as possible delivery of Affordable Housing should be prioritised. Agreements and Conditions enforcing early delivery should be considered if the purpose of the strategy is to be met.
PR-B-1272	S G	Wakeling		23			Please see responses to questions 1 to 3.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	23			Specific phasing policies could run counter to this approach and restrict appropriate development. Reserve the right to comment further on this issue when the need for, nature and purpose of the phasing policies are more clearly defined
PR-B-1294	Giles	Hughes	West Oxfordshire District Council	23			No objection to CDC considering the phasing of land release if this helps deliver houses to help meet Oxford's unmet need and maintain a 5 year housing land supply.
PR-B-1295	Natasha	Blackmore	Sheldon Bosley Knight on behalf of the Wright Family	23			For sites with less than 200 units, phasing is not appropriate as they can be delivered in a single phase by a single developer.
PR-B-1298	James	Jocelyn		23			No comment.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	23			No, there is no evidence to support the contention that this would promote developer competition such that any relevant benefits would arise. Attempting to phase the meeting of need would result in unnecessary restrictions and could prevent appropriate investment in associated infrastructure. The approach set out is unduly restrictive, fails to provide for sustainable development and would be likely to result in the repeated building of soulless housing estates, rather than sustainable communities.
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	23			No do not agree. The best way to ensure a 5 year supply is to have a range of sites both in size and location. This must be better than limited development sites coming forward in a phased manner. A further requirement for exemplar design (whatever that means) will also slow down the delivery of houses.
PR-B-1344	Jonathan	Harbottle	Land and Partners Ltd	23			An alternative to this strategy would be to allocate a range of sites across existing settlements, in line with Option I, which would have stronger lead-in times. Infrastructure improvements would be localised and could be delivered quickly. A broad range of allocations in sustainable rural settlements would deliver housing to maintain the 5 year land supply and reduce the need for artificially controlling release of land. Suggest that criteria based policy would introduce greater flexibility and allow smaller sites to come forward. Development to meet identified needs in rural settlements would respond positively to the findings of the Taylor Report. "Development proposals which are located adjoining the built-up area of villages and which meet the criteria of sustainable development will be supported where they help to meet identified housing need. Neighbourhood Plans may seek to allocate further sites to support the vitality of the villages and these will be supported."

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1346	Neil	Tiley	Pegasus on behalf of the Dorchester Group	23			The phasing of land releases can constrain housing delivery and cause further delays to site delivery whilst willing developers are prevented from bringing forward deliverable sites to accord with arbitrary phasing policy. This is contrary to the significant boost to housing supply required by the NPPF. Do not consider that developer contribution is a factor in the delivery of sites. The developer would deliver as soon as possible. The issues that slow down delivery are planning process and market demand, as developers will only build where they are able to sell and ensure a return. These are largely beyond the control of the Local Plan. Suggest allocating a range of different sites in different locations which will appeal to a range of different developers, thereby ensuring that as many developers are working in the District as possible. This also accords with para 47 and 50 of the NPPF. Another way of supporting delivery is to identify reserve sites, such that if any of the allocated sites are delayed then sustainable alternatives can be brought forward quickly.
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	23			It is understood that Cherwell District Council has taken into consideration the size of strategic sites and likely build-out rates in forming the view that the phasing of land release within individual strategic development sites will assist in maintaining a five year housing land supply. In Cherwell developer interest is high. As developer competition already exists there is not a basis on which to justify a phased release of strategic sites. Indeed, it would constrain housing supply and as there is already a shortfall against targets, this may mean a further undersupply. This would be contrary to Council's intention of encouraging housing delivery and ensuring that supply is maintained.
PR-B-1108	Tom	Hockaday		24	H		Development needs to be near Oxford, area H is subject to excessive development already.
PR-B-1035	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford and Blenheim Palace	24		PR124, PR41, PR177	Sites PR124, PR41 and PR177. The Oxford Transport Strategy has identified a link through this site. This link is considered as an essential infrastructure if housing is to be developed along the A40/A44 transport corridors. This link road would relieve congestion around Wolvercote roundabout. This would free up the roadway for cars moving into and out of Oxford thereby reducing commuting times. They have provided a sketch showing the preliminary link road path showing how the link road could be located through sites 124, 41, and 177. They consider that without a link between Duke's Cut (A40) and Loop Farm Roundabout (A44) key transport issues are not entirely solved but are moved closer to Oxford.
PR-B-0019	Edward	Dowler	Middle Aston Parish Meeting	24			No
PR-B-0033	Henry	Munday		24			8.20 How will the housing be allocated with regards to local residents and those from Oxford? There will be unsustainable pressure on the roads.
PR-B-0055	Cynthia	Hall		24			Building along the proposed Oxford-Cambridge railway line would be beneficial, as this is where people will want to live.
PR-B-0058	Anthony	Hall		24			Yes, you should conform with the NPPF rather than circumvent it.
PR-B-0060	Sue	Mackrell	Bicester Town Council	24			The assessment and proposals made seem to cover all bases, however traffic generation remains a central issue.
PR-B-0119	C A	McCall		24			Infrastructure.
PR-B-0171	Peter	Worth		24			Run an additional process for sites which meet the criteria but have not been volunteered for development. It will flush out some new capacity.
PR-B-0637	Prof Martin LG	Oldfield		24			Yes. Take more notice of local opinion and allow more time for consideration. Also, ask residents whether they wish to retain the GB.
PR-B-0643	L	Allen		24			The question is asked 'How do you work out what is delivered against the Cherwell or combined Cherwell and Oxford plan?' For example if the need does not materialise as BMW shuts Cowley?
PR-B-0653	Peter	Webber		24			Phasing in is essential so that needs can be reviewed and necessary adjustments made, and to ensure that relevant infrastructure is in place. Consideration should be given to avoiding the creation of a London corridor, and the effects of Park and Ride sites
PR-B-0655	Christina Mary	Shirley		24			Propose you listen to the vast majority who strongly oppose the plans.
PR-B-0656	Mary G	Shirley		24			Not too many houses, green space is needed for people and wildlife.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	24			Please see response to Q21 above.
PR-B-0710	Selwyn	Phillips		24			Yes. Provide regular presentations to the local communities. Employ a communications person to present the plan. Make use of the Cherwell newsletter and provide regular updates.
PR-B-0711	Anthony	Matthews	Shipton-on-Cherwell and Thrupp Parish Council	24			The housing requirement is of an order of complexity and difficulty beyond any experienced in recent time - in our view there would seem to be a need for strong leadership, overall detailed planning and development control and adequate resources and skills, provided perhaps, by creating a specialist design and development team tasked with the overall integration, design and delivery of the development site(s) selected including all related infrastructure to support any development programme is designed and put in place prior to occupation of the housing.
PR-B-0723	RA	Humphreys	Humphreys and Co Solicitors LLP on behalf of Oxford Programs Limited	24			Are aware of the requirement to maintain a five year housing land supply. However, do not consider it is reasonable to expect Cherwell to accommodate such a significant proportion of Oxford's unmet housing needs in addition to the 22.840 new homes already allocated under the adopted local plan.
PR-B-0743	John	Tremlett		24			No
PR-B-0769	Debbie	Jones	Bidwells on behalf of City of Oxford Charity	24			Where it can be demonstrated that the purposes of the GB are no longer functional, GB boundaries should be reviewed and land released in sustainable locations to allow for the most sustainable development to come forward.
PR-B-0770	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	24			No comments
PR-B-0786	Jane	Olds	Caversfield Parish Council	24			This project should be a 'one off' agreement with Oxford and it should not be expected to be expanded in the future. The developers will need to be held to account to ensure that they do actually supply the housing promised.
PR-B-0788	Tom	McCulloch	Community First Oxfordshire	24			Community funding will only be sought through CIL funding. Believe that this will likely significantly reduce the amount available for the crucial process of place making on new development. Strongly argue that CDC support should continue to be additionally sought through S106 agreements and CDC should be explicit in outlining its vision and roadmap for the criteria of thriving, engaged and self-servicing new communities. They base their arguments on the outcomes of the 2016 Community Spaces and Development study which CFO was commissioned to undertake by CDC, The study offered new models of indoor space provision on new developments and made best practice recommendations - derived from extensive primary and secondary research - for place making on major new housing developments. Have provided a detailed note on place making principles, need for community facilities, provision of adequate physical infrastructure on new developments, like water, sewerage and transport connections. Creating healthy and thriving new communities should be at the heart of its place making activity and negotiations with developers. The Local Authority should set up Site Development Forums (SDF's) for strategic development locations, involving key stakeholders. All this is discussed in detail in their representation.
PR-B-0797	Clive	Booth	Oxford Civic Society Planning Group	24			Monitoring the negotiation process will help to identify improvements to the financial and economic analyses (i.e. through assessing the validity of assumptions and risks identified at the outset). This will enable focused changes to policy, for example enhanced land value estimation, changes in green belt boundaries and investment in local rail, with the aim of facilitating further infrastructure and housing investment.
PR-B-0799	Ian	Sheppard		24			All comments made.
PR-B-0808	Chris	Robbins		24			No further proposals
PR-B-0820	Liam	Ryder	Gladman Developments Ltd	24			No

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0829	Fergus	Campbell	Oxfordshire Clinical Commissioning Group	24			Have provided a detailed statement in response to this question in their representation.
PR-B-0832	Richard	Hills		24			No
PR-B-0837	David	Jackson	Savills on behalf of Christ Church, Exeter College, Merton College and OUP	24			Specific measures should be introduced to monitor delivery and to allow for adaption of the Plan in the event that sites are not delivered/deliverable in the timescale that the Local Plan anticipates.
PR-B-0840	Mike	Gilbert	Mike Gilbert Planning Ltd	24			No
PR-B-0841	Darren	Bell	David Lock Associates on behalf of Hallam Land Management Ltd	24			Full consideration of deliverable sites in Cat A villages and inclusion of a proportion of the overall Oxford housing numbers in defined Cat A villages, as part of a balanced development strategy, to meet the additional housing requirements of Oxford City.
PR-B-0842	Alex	Wilson	Barton Willmore on behalf of A2 Dominion Group Ltd	24			The monitoring approach should be set out in the Plan. Consideration should be given to: Augmentation of housing land supply in the short and long term; monitoring of member authorities delivery rates; reporting process to Oxford City Council.
PR-B-0847	Richard	Cutler	Bloombridge LLP	24			A key missing component is the regeneration of Kidlington. The Alan Baxter work in 2013 took important steps forward. Rather than abandoning this work, it should be extended to re-engage with the true potential of Kidlington. Proper, proactive engagement is required in order to marry the costs and benefits of accommodating the proposed 4,400 homes.
PR-B-0856	David	Smith		24			Insufficient knowledge
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	24			No comment
PR-B-0868	Jennifer	McFadden		24			Will the housing really be affordable? London commuters will drive prices up.
PR-B-0877	David	Flavin	Oxfordshire County Council	24			Whilst good data is available on public transport ridership limited data is available on the numbers of people travelling actively. It is strongly recommended that developers are asked to consider how they will facilitate the evaluation of whether their developments have encouraged people to walk, scoot (push scooters) and/or cycle.
PR-B-0887	Paul	Buckley		24			Yes. CDC along with other District Councils need to review the target figures for housing, on the belief that future planning decisions in Oxford will constrain building for employment growth, along with the compatible level of housing and commuting that can sustainably be achieved. Not simply agreeing to the wishes of potential employers.
PR-B-0890	Chris	Dicks		24			Air quality plan, light pollution and transport impact, including any construction works of the roads and developments themselves
PR-B-0895	Dr Alison and Dr Simon	Street		24			No comments.
PR-B-0905	Theresa	Goss	Bloxham Parish Council	24			Reiterates the point on build-out rates timetables agreed with planning permissions (Question 23), possibly through a legal s106 agreement (as Oxford City does not have a 5 year land supply)
PR-B-0910	Ken	Pelton		24			Would like you to improve the transport infrastructure so that the needs of the existing housing are met, whether sustainably or not, before you do anything else.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire	24			An Oxfordshire Structure Plan is now urgently required, that could take a more holistic view of employment and housing requirements across District and City boundaries, including looking at appropriate transport and infrastructure issues. This could be carried out by the Oxfordshire Growth Board and should be subject to Examination in Public by an Inspector. This should be completed before any decision is taken on the allocation of Oxford's housing to Cherwell.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	24			Development to cater for Oxford's unmet need should be capable of providing mixed and balanced sustainable communities.
PR-B-0931	Jane	Olds	Fringford Parish Council	24			There should be an agreed time based delivery structure for the monitoring reports

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0937	Philip	Rawle	Greenlight Developments	24			Are cautious over the deliverability of large strategic sites (particularly where significant infrastructure is required). These sites have not historically delivered at the rates expected. Local Plan inspectors have fallen back on the corrective mechanism built in to the Framework if the large sites do not perform at the rates expected. This should be incorporated in to the Partial Review.
PR-B-0944	David	Stone		24			Infrastructure and road improvements need to be made prior to building on sites and impact and capacity of adjoining roads assessed. Developers need to pay for medical, school and community facilities before completion. GB needs to be respected and wildlife corridors protected. Urban sprawl should be avoided by developing other areas of Cherwell. Development should not be accepted that causes road disruption to present traffic flows. Ensure bus routes are adequate.
PR-B-0949	Peter	Monk	Banbury Civic Society	24			This is crucial, both in the evaluation and realisation phases.
PR-B-0956	Mark	Recchia	Banbury Town Council	24			Suggest that design specifications are attached to planning conditions to ensure properties in new developments are in keeping with the areas where they eventually are sited.
PR-B-1006	Ruth	Powles	Kirtlington Parish Council	24			It is as a priority that the criteria for the designation of a green belt is reviewed in regard to many areas of the Oxford Green belt so that Oxford's unmet housing needs should be built in these areas which are far less 'countryside' than rural areas further north in Cherwell District, and CDC should continue to work to protect the rural areas in our district. To support environmental policies these new sites, if possible, should be linked to Oxford City with off-road cycle tracks, good public transport, etc.
PR-B-1015	Daniel	Hatcher	Rosconn Group	24			Consideration should be given to the identification of 'Reserve Sites' to supplement the supply to meet Oxford's unmet needs, as recommended by the LPEG recommendations. Such sites should ideally be smaller, discreet sites that can be delivered quickly with short notice.
PR-B-1016	Ben	Simpson	WYG on behalf of Bonnar Allan Ltd	24			In summary, consider that allocation of land at New Alchester is the optimal solution. It represents an opportunity to provide a comprehensively planned new community that will have excellent connections to Oxford and the Science Vale, as well as making a positive contribution towards the future growth of Bicester Garden Town and Cherwell's own development needs.
PR-B-1017	Oliver	Burton-Taylor	Simply Land (Oxford) Ltd	24			Yes, please consider the potential for Site 41 to provide a highly sustainable urban expansion of Oxford without the same degree of harm caused as the presently preferred growth options, in particular south east Kidlington.
PR-B-1024	Andrew	Hornsby-Smith		24			Suggests that the affordable homes target be raised from 35% to 50% and that densities are site specific.
PR-B-1036	Robert	Davies	Gerald Eve LLP	24			To achieve truly sustainable development in close proximity to Oxford in order to meet its unmet housing needs, the Council should consider Area of Search A as the main area of search for housing given that the area is best placed to serve the needs of Oxford. Notwithstanding this, it is vitally important that different market places and varying sizes of development allocations are created within Area of Search A in order to maximise the housing trajectory and to find the most suitable, deliverable, sustainable and logical sites for growth.
PR-B-1037	Alice	Suttie	Boyer Planning on behalf of Redrow Homes and Wates Developments	24			No comment
PR-B-1069	JP	Lyes		24			Any project of this scale should conduct and publish an annual performance review. Also feel there must be a public presentation of the plans once they have been decided upon but before it takes place.
PR-B-1095	Val	Russell	Bodicote Parish Council	24			Are not in a position to answer this question

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1099	Alan	Storah	Oxford City Council	24			One probable means of seeking to ensure this is to make the distinction between the housing intended to meet the needs of the district and that of the city when monitoring. That would enable the two distinct and separate strands of housing requirement to be monitored with a view to managing each one if and when required to try to ensure the delivery of sustainable development.
PR-B-1110	Iain	Johnson		24			This is essential. Developers will only want to maximise profits. Smaller developments in Oxford have resulted in developers not delivering any affordable houses or local infrastructure improvements. Plans need to be monitored to take into account any changes in the local economy and demographics. Any developments on the edge of Oxford need to be mindful of what the university is doing and there needs to be regular feedback to affected residents. The council needs to be prepared to change with regards to the 5 year strategic plan.
PR-B-1111	Pat	Clissold		24			Better intra city transport. Preservation of the historic character of Oxford. No dilution of its historic footprint. Key attributes are its culture and buildings. Please do not treat the city as a "honey pot" for development because you will destroy it.
PR-B-1140	Catherine	Richenburg		24			Yes, restrict buy-to-let in the developments.
PR-B-1142	Alan	Lodwick		24			There is a lack of strategic coordination of planning in Oxfordshire. Employment generating developments are encouraged in different districts without any reference to each other or to their overall consequences. What strategic planning exists is being imposed on the local Councils without consultation by unelected bodies such as the LEP and its unrealistic Strategic Economic Plan while the consultants undertaking analysis are not independent and their work is not subject to independent verification. There is a need for an overarching and fully democratically accountable body to take responsibility for strategic planning and truly independent and thorough analysis of future needs. This might best be done by the restoration of strategic planning powers to the County Council or by a new Unitary Oxfordshire Authority. Only through properly resourced and co-ordinated strategic planning can a sound plan be established and delivered and sustainable development achieved.
PR-B-1145	Richard	Bennett		24			If undertaken it must fully integrate transport and strategic infrastructure improvements.
PR-B-1146	DJ	French	Deddington Development Watch	24			Question whether any deficiencies been identified in the monitoring arrangements already put in place for Local Plan Part 1 ?
PR-B-1154	Jim	Spencer		24			No comment
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	24			Oxford should review its reasons for demanding this housing and review how it could provide more themselves.
PR-B-1157	Nicola and Giles	Lewis		24			Having studied evidence from the CPRE agree with their view that Oxfordshire should take a more holistic view of employment and housing requirements across the region. The aim should be to increase employment opportunities further away from the city in surroundings towns - so that fewer people need to commute. Carterton, for example, would benefit from business investment that would generate wealth in the town and attract more people to live and work there. Given the distance from any train stations it would not attract commuters and house prices would reflect that. Enabling and encouraging people to work where they live will reduce traffic problems and spread wealth to less prosperous areas outside the GB. This policy would lead to more sustainable and balanced communities.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	24			A simplification of the plan(it is currently far too complicated for the general public to assess). It appears inflexible, incomplete and built upon flawed premises. It would not deliver sustainable development, for several reasons, in its current form.
PR-B-1163	Catherine	Arakelian		24			No comment
PR-B-1165	Caroline	Johnson		24			Transport links and upgrades should be met before development begins. All other infrastructure should be installed before or during the build and if this condition cannot be met the development should not proceed.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1167	Jodi	Stokes	Persimmon Homes Midlands	24			Delivery should be monitored annually to ensure that output is in line with the trajectory. Measures should be put in place to allow for the release of additional land for development if targets fail to be met for 3 years in a row. It would be prudent to include a large buffer and reserve sites in the plan so as to avoid the slow process of land release through a review of the plan.
PR-B-1188	Carol	Matheson		24			Include everyone, not only Oxford. Councils need to work together
PR-B-1224	Theresa	Goss	Adderbury Parish Council	24			No comments at this stage.
PR-B-1225	Paul	Butt	Paul Butt Planning on behalf of Shyde Investments Ltd	24			No comment
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	24			A detailed response provided. A holistic approach is required to the provision of any new settlements, with a clear vision to address the future needs of the District and Oxford, in line with the Cambridge Futures approach.
PR-B-1229	Henry	Brougham		24			No.
PR-B-1230	T M M	Green		24			Building should only commence when the necessary infrastructure is in place, roads, railway, buses, schools and other amenities capable of sustaining the new housing.
PR-B-1233	Simon	Gamage	RPS Planning and Development on behalf of Mr R Bratt	24			No further comments to make at this time.
PR-B-1235	Ed	Barrett	Catesby Property Group on behalf of Catesby Estates Ltd	24			No comments at this stage.
PR-B-1236	Richard	Boother	RPS Planning and Development on behalf of Mr R Davies	24			Does not have any comments on the monitoring of the delivery of the final plan.
PR-B-1243	Kazimiera	Kantor		24			Insufficient time to comment.
PR-B-1255	Kezia	Sheppard		24			Not build there, GB's are needed for environmentally positive sustainability.
PR-B-1271	Rebecca	Hodgson		24			Please look at Poundbury in Dorset for examples of decent high density housing.
PR-B-1272	S G	Wakeling		24			The Government should put a national housing policy in place.
PR-B-1284	Simon	Barry	Boyer Planning on behalf of Bloor Homes	24			Have no comments at this stage, but reserve the right to comment on this topic in the future.
PR-B-1296	Graciela Inglesias	Rogers		24			Yes. There are credible and effective alternatives to housing development in the GB. Use proposed employment sites. Invest in lower polluting forms of public transport such as trams. Invest on the expansion and improvement of broadband networks. These ideas were undertaken by Strasbourg in 1990's with great success.
PR-B-1298	James	Jocelyn		24			Should give greater respect to the role of public consultation in the overall process. Thus far, efforts by Cherwell and other councils in this regard have been woefully inadequate. The interests of certain parties, some with vested interests in the outcomes of this process, have been greatly prioritised over the interests of 'people and communities'. This sets the scene for greater dispute in future and increases the potential for delay in delivery of a positively prepared, sustainable plan.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust	24			Yes. Allocate land along the A44 to meet Oxford's unmet need. Two sites at Begbroke, together with a larger site adjacent to Woodstock would comprise the most sustainable, deliverable and effective solution.
PR-B-1303	Steve	Gerrish		24			Consider retaining as many existing hedgerows as possible to provide wildlife corridors and local interest. Oxford's unmet housing need is partly created by a profoundly unsustainable policy objective. Reference is made to activities of the OGB. Growth is exponential and therefore unsustainable and should not be promoted for the sake of it. Regard at least a proportion of this housing need to be driven by unnecessary economic growth.
PR-B-1343	Shaun	Richards	Cerda Planning Ltd on behalf of Cala Homes Ltd	24			The Council should give consideration to the production of a reserve site approach.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates	24			Monitoring of housing delivery is an essential part of ensuring the deliverability of the final plan. Some sites may not come forward as quickly as anticipated due to constraints and this will be evidenced by the monitoring process, meaning that the Council can better manage the housing supply. In the event that some of the sites may not come forward as quickly as anticipated the Council may be advised to consider some form of contingency, such as the release of safeguarded land.
PR-B-1095	Val	Russell	Bodicote Parish Council	25			There are a lot of issues brought up by the SA Report, which point to policies that the Local Plan Part 2 would supposedly address. Given that this document is still in preparation, with policies yet to come forward, this is strange. As it stands, they have no idea how many homes could be allocated throughout Cherwell.
PR-B-0922	Sarah	Smith	Rapleys LLP on behalf of Pandora Trading Ltd	1-8			The vision and principles for accommodating Oxford's unmet need should 1) follow the vision and strategic objectives identified for accommodating Cherwell's own growth needs and 2) follow and reflect the strategy established in the adopted Local Plan. I.e. concentration of development at Banbury and Bicester. Support the broad thrust of the four strategic objectives as they do not appear to undermine the overall vision and strategic objectives already identified in Cherwell itself. Cherwell needs to ensure that its own infrastructure can support all the growth identified. Who funds this and how it is apportioned between the two authorities is a key question.
PR-B-0922	Sarah	Smith	Rapleys LLP on behalf of Pandora Trading Ltd	9-10			Support these areas of search. The site size threshold of 2ha and 100 dwellings is supported in principle. We consider it short-sighted at this stage to restrict the areas of search to areas A and B. These areas are, in locational terms the most sustainable as they immediately abut the City. However, they also have some key fixed environmental disadvantages. They are virtually all within the GB. Given these constraints the ability of these two areas to accommodate the whole 4,400 dwellings is likely to be severely compromised.
PR-B-0793	Philip	Morley	North Oxford Golf Club			General	Compliment CDC on the consultation as a very transparent public process, which they welcome. It is both wide-ranging and of great depth.
PR-B-0797	Clive	Booth	Oxford Civic Society Planning Group			General	Commend CDC's efforts in presenting a thorough and detailed analysis of the options and its commitment to cooperation with other local authorities. Detailed comments are include in their representation.
PR-B-0957	Martin	Small	Historic England South East Historic Environment Planning Group			General	Have provided some general comments in their representation particularly in relation to sites in the GB, sites 21 and 181 should be taken out from further assessment.
PR-B-0747	George A	Doucas		1, 2			No. The figure is too high based on assumptions. The country is entering a long period of transition and re-adjustment. Oxford City needs to use its available space now, so as to meet their current needs. If the projected newcomers do come, let's think again on how to encourage moving to other parts of the county with higher levels of unemployment.
PR-B-1122	Paul and Anne	Webb		11,14		PR32	Site PR32 is within GB and the proposed works involve substantial engineering works that affect the openness, contrary to NPPF para 90. It is also in the Kidlington Church Street conservation area and would affect the setting of listed buildings. According to Oxfordshire County Council the area may contain later medieval features and there is a badgers' sett which has legal protection. Do not believe exceptional circumstances can be demonstrated to use this land and there is an attempt by the landowners to have it removed form GB and is linked to planning application 13/00990/F.
PR-B-1180	RA	Humphreys	Humphreys and Co Solicitors on behalf of Oxford Programs Ltd	15 - 21		PR75	Site PR75 is highly inappropriately located in transport and sustainability terms. Whilst acknowledging the need for an IDP, again concerned to note that no such proposals are in place in advance of the site selection process.
PR-B-0765	Layla	Vidal-Martin	NLP Nathaniel Lichfield and Partners on behalf of Taylor Wimpey	15, 16, 17, 18, 19, 20, 21			Have fundamental concerns about: the principle of Areas of search (Q16); the inadequacy of the methodological approach and conclusions within the Interim Transport Assessment and Initial Sustainability Appraisal (Qs 15, 17, and 21); and the resultant narrow focus (of Areas A and B only) for the selection for options for testing (Qs 18 and 20). It would not be sound for the Local Plan Review to draw such fundamental conclusions from such a general, and indeed flawed, analysis.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1358	Ian	Lough-Scott	Upper Heyford Village Group	15, 16, 17, 18, 19, 20, 21			The main objective should be sustainable development. Location of development where it can reduce the need to travel by car, and encourage walking, cycling and the use of public transport for access to the workplace. Also minimise the use of green field and make efficient use of energy and resources.
PR-B-0841	Darren	Bell	David Lock Associates on behalf of Hallam Land Management Ltd	15, 17			The ISA and SA key findings illustrate the flaws in the way the Areas of Search have been defined. Some Cat A villages would perform strongly but they have been dismissed because they have been grouped together in Option I. As an example, Ambrosden is assessed in some detail. This reinforces the need for CDC to undertake further and updated evidence to ensure Cat A villages are properly considered as an option and assessed.
PR-B-0856	David	Smith		15,16			No comment
PR-B-0881	James Kenneth	Jutton		15,19			Traffic gridlock at Peartree, Frieze Way and Sainsbury's roundabouts occurs far too frequently now. What would it be like in 2031 if such a huge number of houses were built north of Peartree?
PR-B-0839	Mark	Rose	Define on behalf of William Davies Ltd	15/17			It is accepted that it is unreasonable to direct all the required development to the rural area as suggested by Option I. However, the incorporation of the identified sustainable service villages masks their potential to accommodate sustainable development in both the ITA and ISA. The final conclusions relating to the selection of the 2 preferred Areas of Search on the basis of the SA findings are unconvincing. There is actually little differential in the SA's analysis between those options and other wider options across the District. It appears as though predetermined policy decisions have influenced the final conclusion.
PR-B-0856	David	Smith		18, 19, 20,21			No comment
PR-B-1180	RA	Humphreys	Humphreys and Co Solicitors on behalf of Oxford Programs Ltd	22 - 24			For the reasons given above do not consider it reasonable to expect Cherwell to accommodate such a significant proportion of Oxford's unmet housing needs in addition to the 22,840 new homes already allocated in the adopted Local plan.
PR-B-1358	Ian	Lough-Scott	Upper Heyford Village Group	22, 23, 24,			Would like to see an occasional architectural competition to bring out new ideas on housing. Shocked at the design of new estates at Banbury, Bicester and U Heyford.
PR-B-0922	Sarah	Smith	Rapleys LLP on behalf of Pandora Trading Ltd	22-24			Do not consider it necessary or appropriate to introduce phasing policies for individual strategic development sites. Cherwell already has a shortfall in delivery of its own requirement. We fail to see how delaying the development of these will help this position and furthermore, how phasing policies can be retrospectively introduced in to an adopted plan. Now a greater need to consider some mechanism when monitoring housing provision and delivery, which distinguishes between Cherwell's own needs and that of Oxford City. Whilst in principle we disagree with the suggested delayed start date for delivery of Oxford's needs it may be that the market and planning process itself dictates commencement of this housing.
PR-B-1180	RA	Humphreys	Humphreys and Co Solicitors on behalf of Oxford Programs Ltd	4, 5, 6, 7			Have grave doubts that such a vision is achievable. In particular the existing infrastructure is already under severe pressure. These facilities are limited in Yarnton and are not capable of accommodating additional housing development on the scale proposed. There is nothing to suggest that realistic and deliverable plans are in place to provide the necessary infrastructure improvements.
PR-B-0747	George A	Doucas		5,6,7			No. The figure is too high based on assumptions. The country is entering a long period of transition and re-adjustment. Oxford City needs to use its available space now, so as to meet their current needs. If the projected newcomers do come, let's think again on how to encourage moving to other parts of the county with higher levels of unemployment.
PR-B-0041	David	Pratt		6,7,8			Support strategic objective SO17/18/19 as long as it doesn't encourage commuting more than 5 miles out of Oxford.
PR-B-1109	Keith	Johnston		9, 11		PR126	This parcel of land is within the Oxford GB and includes an important water course that feeds into Yarnton village. Development on this scale will affect surface water drainage into the water course and exacerbate flooding issues. Plans on the scale proposed contradict CDC policies ESD13, ESC14 and Policy Villages 1.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1109	Keith	Johnston		9, 11		PR20, PR51, PR75, PR92, PR126	This is GB land designed to restrict urban sprawl, prevent the merging of settlements, safeguard the countryside and preserve the character of historic settlements. Am not convinced that Oxford City had demonstrated the exceptional need to use GB, and that our GB is less important than Oxford's open spaces.
PR-B-1109	Keith	Johnston		9, 11		PR51	This is GB land providing open accessible space to the residents of Yarnton and Begbroke. There is historical importance to Frogwell Down Lane.
PR-B-1109	Keith	Johnston		9, 11		PR75	This is GB and the land is adjacent to some of the most historic elements of Yarnton village. Parts of the area have been subjected to flooding and the A44 is restricted by volume, design and pinch points at Begbroke and Yarnton.
PR-B-1109	Keith	Johnston		9, 11		PR92	This is GB land. Strong arguments to support this area as the only suitable site for recycling/production of building materials was upheld by CDC against the wishes of local objection. How can this site suddenly be more important for an unmet housing need of another local authority?
PR-B-1109	Keith	Johnston		9, 11			Any business development based on economic growth are unsubstantiated and therefore flawed. Residents of new housing developments will be free to work where they choose and with rail links to London will probably create a dormitory facility.
PR-B-0881	James Kenneth	Jutton		9,16			Lived in Kidlington and Yarnton over the last 35 years, object strongly to development in the Oxford GB around Kidlington has unspoilt countryside, footpaths and green spaces, enjoyed by local residents. It protects historic Oxford from the effects of over development. GB is a permanent designation and that Government guidance states that unmet housing need is not a reason for building in the GB. The Government's Manifesto promise and Cherwell's existing policy to protect the Green Belt must be upheld. There are alternatives, better use of previously developed land in Oxford and using some proposed employment sites in the city for housing instead. It is not reasonable to develop within the GB. Check the five GB purposes.
PR-B-0779	David C	Hinde	Hinde Law Ltd	General	A		The sites near Yarnton are most unsuitable for development as it will not be possible to develop the necessary transport infrastructure to make them viable. I particularly object to search area A.
PR-B-1051	Michael and Kate	Hopcraft		General	A		Living within the area considered as option A have concerns with the partial review. Acknowledge there's a need for housing, but concerned how these are secured for those who need them
PR-B-1253	Jon and Michelle	Mason		General	A		Objections are to the development of option A. Also strongly object to develop on GB. GB is there to prevent urban sprawl along with avoiding the loss of countryside and scenery. To avoid the merging of towns and villages, to prevent the loss of their individual character and identity which makes Oxfordshire unique. Why have a policy if it can be disregarded. Traffic would increase significantly into the city from Kidlington and Yarnton area. Despite recent improvements to several roundabouts the traffic is still a black spot for the flow of traffic. Increasing houses in Kidlington and Yarnton will only add to the situation and there's not enough space to improve the capacity of these roads.
PR-B-1161	Janet	Warren		General	A, B	PR14, PR194, PR195, PR118, PR49, PR178, PR27, PR39, PR168, PR177, PR41	Do accept that some additional, affordable housing is necessary to assist Oxford and Kidlington and that some should be sited in Kidlington. They should be of a size that demands provision of infrastructure such as schools alongside development. Would expect to see 50% of the houses affordable and of a high environmental specification. If areas A and B are to be used, Kidlington must be allowed to retain its identity and the proximity to flood plains considered. Have ranked the identified areas around Kidlington in order of desirability for development thus: 14 (most) 194, 195, 118, 49, 178, 27, 39, 168, 177, 41(least).
PR-B-0041	David	Pratt		General	A, B		Sites A and B are good and should be pursued. GB that has already been encroached around Oxford should be utilised as they no longer meet all GB criteria.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0687	A	Johnston		General	A, B		Object to various elements of the Partial Review of Cherwell Local Plan 2011-2013. The selection of options A and B both involve destruction of precious GB land which is just as important as the open space within Oxford city. GB is a local amenity important to residents of Kidlington and nearby villages. The number of homes proposed is disproportionate to existing number of properties in Yarnton and Begbroke and will change the character of the communities. GB is supposed to protect against over-urbanisation and the coalescence of individual communities. If CDC permits development it is in breach of its own policy. Within the review CDC appears to contradict policy Villages 1 which categorised Yarnton and Begbroke as Category A villages in which only minor development is allowed. The dominant proportion of housing should be in the east and south where most employment is.
PR-B-1122	Paul and Anne	Webb		General	A, B		Object strongly to meeting Oxford's unmet housing needs as most of the Kidlington sites in the document are in GB. This goes against the NPPF which states that 'very special circumstances' are required to build in GB. The road infrastructure in Kidlington could not cope with an additional 4,400 houses and the schools and GP surgeries are at capacity. Oxford City's housing targets are based on speculation and discredited analysis.
PR-B-1265	Kathleen	Hayes		General	A, B		The current preferred option in Cherwell to concentrate the whole 4,400 in areas A and B is inequitable. It would be better to spread development across the district and to the north of the new Park and Ride at Kidlington Airport. The scale of the proposal would destroy Yarnton and Begbroke and is unacceptable. Building at Yarnton, Begbroke and Kidlington will create a large urban sprawl not the balanced communities stated in the Draft Vision.
PR-B-1289	Berwyn	Jones		General	A, B		Am raising concerns and objections to the development around Kidlington, Yarnton and Begbroke, areas A and B. Main concern is the destruction of the countryside and the effect this will have on residents and wildlife. GB around Oxford supports a diverse range of plants and animals which will be lost. The countryside is important for the resident's mental health, well-being and is used for many recreational activities, losing this wouldn't be good for the residents. Also concerned with the impact on the local infrastructure and services, which I believe are already very stretched. Am not against development, but feel that it would be better on a smaller scale and dispersed across the district. Strongly disagree with the proposed minimum size threshold of 100 homes. Areas A and B should be limited to one or two small scale developments like 30 houses, anything more would have a severe impact on the area. Concerned with potential flooding in the areas of Kidlington, Yarnton and Begbroke. A river, brook and canal flow through the proposed sites. Begbroke is mentioned in the Domesday Book, its historical value and identity will be lost and merged with Kidlington and Yarnton. Need to protect Frogwelldown Lane which was used by King Charles on his escape from Oxford in 1644.
PR-B-0722	A	Mayes-Baker		General	A,B		Objection to various elements. Options A and B involve destruction of the GB. Oxford City has areas of open space. Destruction of GB is a loss of the local countryside amenity, which is important to Kidlington residents and nearby villages.
PR-B-0909	Mark	Lowen		General	C		Sites around Junction 9 of the M40 with good access would be ideal for an entirely new settlement with its own schools.
PR-B-0909	Mark	Lowen		General	F		A settlement around former RAF Upper Heyford would have good access into Oxford and without causing great disruption to the local community. A self sufficient settlement with schools, medical facilities, shops and Park and Ride should be considered.
PR-B-0015	Moira	Speakman		General		Kidlington	The site between the Moors and the river at Kidlington is used extensively for recreation and has far-reaching views. Doubling the size of the village will turn it into a town and displease everyone. Additional parking will be required for the centre of Kidlington, additional traffic will cause gridlock and lower the quality of life for residents. Development around the edges of Kidlington would be better although there are some concerns regards flooding. Bicester is being planned to be a healthy town: I would like the same for Kidlington.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0706	Edmund	Smith	Carter Jonas LLP	General		Land at Hampton Poyle	Promoting 49.62ha site at Hampton Poyle for approximately 1000 houses. It has good access links, close to settlement of Hampton Poyle and is open and broadly flat. The flood zoning of this land is disputed and it is expected that this could be proven if required.
PR-B-1232	Mark	Schmull	Nathaniel Litchfield and Partners on behalf of The Church Commissioners	General		New sites	CCE are majority landowners of the land that surrounds Islip. Earlier representations sought to promote three sites at Islip, which have the potential to deliver c.350 dwellings. These have been identified in the Options Paper. In response to the NIC call for evidence CCE presented 3 options for the creation of a sustainable new neighbourhood which would complement and support the existing village of Islip. CCE now wish to promote these as part of the current options consultation. Particular focus is on Option A comprising up to 1,700 homes and associated infrastructure. Detailed submissions are made in support of these options, including the document submitted to the NIC.
PR-B-0158	Jon	Waite	Kemp and Kemp on behalf of Mewslade (Eastern) Ltd	General		PR105 and other	Promoting two sites, Land adjoining Rau Court Caversfield (PR105) and Land south of Springfield Road, Caversfield as suitable housing allocations. Does not support the approach of only allocating sites capable of accommodating 100 dwellings or more. Medium to large sites are quicker to bring forward. Concern expressed over a number of inaccuracies in CDC's SA which assesses the sites. This rep addresses these inaccuracies and provides further information about the sites.
PR-B-1234	Hywel	Morse	Sworders on behalf of the Beecroft Family	General		PR11	Wish to clarify the site boundary to be considered in relation to site PR11 - Weston on the Green. The boundary of PR11 may have been taken from a previously promoted scheme. This scheme is no longer progressing with the boundary or landowners identified and our clients (Beecroft and Godwin) are progressing with a different promoter than that shown in Table 8, and a different area of land. The land is available, deliverable and can be considered as part of your consultation, as a separate site from PR11. A site plan is provided.
PR-B-0715	Wendy	Manning		General		PR125	Site PR25 is objected for development. It has flooded every year during Winter and Spring. Increased household water usage leads to less land for surface water to drain, serious issues for households around the area. Few places to enjoy the countryside enjoyed by many. Its a natural habitat for wildlife which needs protecting. GB land gradually being taken over for development.
PR-B-0804	Barrie and Linda	Teasdale		General		PR125	To satisfy the demand from Oxford site in the north of Banbury and Bicester should be discounted. Kidlington and the local area are like locations for development, however local services are already struggling to cope. Site PR125 at the north end of Water Eaton Lane is farmland that floods every year, this will only get worse if houses are built on PR125. Septic tanks suffer in the flooding this is a health hazard to the residents.
PR-B-0975	Andrew	Lintott		General		PR125	Objection to build a large number of houses in Gosford Parish on the West side of the A34. Site PR125 is subject to flooding. The last few years water has covered the whole area between the Cherwell and Water Eaton Lane. The natural landscape of the lane is important to block further flooding, the water table is already high and would be raised by the weight of new structures. Current houses are able to get house insurance on normal terms. The present footpath which is a circular walk around Kidlington and is an old wright of way will be smothered. Development without services is likely to unbalance and be disagreeable for Gosford. Increased air and noise pollution will become wearing.
PR-B-1170	Matthew	Brock		General		PR125	Object to the plans for additional housing north of the A34 and south of Bicester Road at site PR125. The drainage in this area is very poor and land waterlogged in winter. Houses built close to the A34 will experience severe noise and pollution. The road network is already at capacity and would require major improvements. The proximity to Oxford Parkway would mean these houses being bought by London commuters and therefore not alleviate the local housing concerns.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1170	Matthew	Brock		General		PR125	Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Particularly object to building on GB north of the A34 and south of Bicester Road. The land has poor drainage and is waterlogged in winter. GB prevents urban sprawl. There will be serious noise and pollution issues.
PR-B-0981	Joyce	Ruiz		General		PR125, PR178	Kidlington has serious flooding issues in several areas. This is due to the high water table in the area that contains the Cherwell Estate, areas also on the Orchard Estate suffer major flooding. This comes from surface water and the River Cherwell. The Environment Agency map shows that this area is in the risk area for flooding. The rep. has provided a lengthily account to flooding in 1998 on the Cherwell Estate. Strongly objects to the development in sites PR125 and PR178 these would contribute to flooding in the area. Residents of Kidlington are alarmed that not a single person has been involved in the proposals and what the consequences are to the people already living there.
PR-B-1078	Samantha	Perera		General		PR125, PR178	Object to the proposed housing development around Water Eaton Lane in Gosford at sites PR125 and PR178. It will be detrimental to the health and well being of residents and Gosford will lose its identity. The GB is precious and used by the community for walking and exercise. It is our only buffer from the A34 pollution. Already experience flooding each year, reducing the GB it will make it worse. The road infrastructure will not cope and pollution will increase.
PR-B-0687	A	Johnston		General		PR126	Development on site PR126 at this scale, will affect surface water drainage and is likely to increase flooding. This site includes an important water course that flows into Yarnton village.
PR-B-0779	David C	Hinde	Hinde Law Ltd	General		PR126	Site PR126 lies wholly within GB. Local Plan Policy ESD 14 seeks to safeguard the countryside from development. Policy ESD 14 seeks to prevent urban sprawl and to safeguard the countryside from encroachment. Policy Villages 1 has Yarnton as a category A village. Only minor development, infilling and conversion allowed or alongside. Access to and from the A44 is restrictive and near impossible at this location. There is an important water course that flows into Yarnton, over paving will exacerbate flooding which already occurs in the south part of the village.
PR-B-1089	Dave	Bevis		General		PR126, PR34, PR92, PR49, PR127, PR51, PR20	Object strongly to plans to build on large areas in and around Kidlington which will swallow up villages and lose their characters. Both doctors and schools are at capacity and traffic and policing at their limit. Some of the sites are natural drainage areas and so it would be foolish to build on them.
PR-B-1010	Richard	Pye		General		PR14, PR20, PR23, PR24, PR27, PR32, PR34, PR48, PR49, PR51, PR74, PR75, PR91, PR92, PR125, PR126, PR178	These sites form part of the rich and diverse countryside surrounding the three villages and in the absence of a public park provide recreational facilities. PR20 is surrounded by countryside with well used footpaths and agricultural land and mass development would be inappropriate.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0663	KD	Liversage		General		PR14, PR27	Have concerns with sites PR14 and PR27 The Moors, which is GB and the current government's manifesto stated it would take measures to protect it. Moorside Place off the Moors, is a purpose built care facility for the elderly and disabled, it is a peaceful and tranquil place that befits the people who live there. CDC are partners in this enterprise and should be aware that any development would cause upheaval and discomfort to retired, disabled, and vulnerable people. There is a wildlife corridor within Moorside Place and the fields beyond attract many species of birds and mammals. As many residents are house bound this is a wonderful stimulant and source of interest. Any increase in traffic along The Moors would be problematic.
PR-B-0664	Maxine	House		General		PR14, PR27	Have concerns with sites PR14 and PR27 The Moors, which is GB and the current government's manifesto stated it would take measures to protect it. Moorside Place off the Moors, is a purpose built care facility for the elderly and disabled, it is a peaceful and tranquil place that befits the people who live there. CDC are partners in this enterprise and should be aware that any development would cause upheaval and discomfort to retired, disabled, and vulnerable people. There is a wildlife corridor within Moorside Place and the fields beyond attract many species of birds and mammals. As many residents are house bound this is a wonderful stimulant and source of interest. Any increase in traffic along The Moors would be problematic.
PR-B-0665	M	Thorne		General		PR14, PR27	Have concerns with sites PR14 and PR27 The Moors, which is GB and the current government's manifesto stated it would take measures to protect it. Moorside Place off the Moors, is a purpose built care facility for the elderly and disabled, it is a peaceful and tranquil place that befits the people who live there. CDC are partners in this enterprise and should be aware that any development would cause upheaval and discomfort to retired, disabled, and vulnerable people. There is a wildlife corridor within Moorside Place and the fields beyond attract many species of birds and mammals. As many residents are house bound this is a wonderful stimulant and source of interest. Any increase in traffic along The Moors would be problematic.
PR-B-0666	Ann	Chandler		General		PR14, PR27	Have concerns with sites PR14 and PR27 The Moors, which is GB and the current government's manifesto stated it would take measures to protect it. Moorside Place off the Moors, is a purpose built care facility for the elderly and disabled, it is a peaceful and tranquil place that befits the people who live there. CDC are partners in this enterprise and should be aware that any development would cause upheaval and discomfort to retired, disabled, and vulnerable people. There is a wildlife corridor within Moorside Place and the fields beyond attract many species of birds and mammals. As many residents are house bound this is a wonderful stimulant and source of interest. Any increase in traffic along The Moors would be problematic.
PR-B-0667	Mrs P	Webb		General		PR14, PR27	Have concerns with sites PR14 and PR27 The Moors, which is GB and the current government's manifesto stated it would take measures to protect it. Moorside Place off the Moors, is a purpose built care facility for the elderly and disabled, it is a peaceful and tranquil place that befits the people who live there. CDC are partners in this enterprise and should be aware that any development would cause upheaval and discomfort to retired, disabled, and vulnerable people. There is a wildlife corridor within Moorside Place and the fields beyond attract many species of birds and mammals. As many residents are house bound this is a wonderful stimulant and source of interest. Any increase in traffic along The Moors would be problematic.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0668	BJ and W	Bower		General		PR14, PR27	Have concerns with sites PR14 and PR27 The Moors, which is GB and the current government's manifesto stated it would take measures to protect it. Moorside Place off the Moors, is a purpose built care facility for the elderly and disabled, it is a peaceful and tranquil place that befits the people who live there. CDC are partners in this enterprise and should be aware that any development would cause upheaval and discomfort to retired, disabled, and vulnerable people. There is a wildlife corridor within Moorside Place and the fields beyond attract many species of birds and mammals. As many residents are house bound this is a wonderful stimulant and source of interest. Any increase in traffic along The Moors would be problematic.
PR-B-0672	Grace MM	Kurn		General		PR14, PR27	Have concerns with sites PR14 and PR27 The Moors, which is GB and the current government's manifesto stated it would take measures to protect it. Moorside Place off the Moors, is a purpose built care facility for the elderly and disabled, it is a peaceful and tranquil place that befits the people who live there. CDC are partners in this enterprise and should be aware that any development would cause upheaval and discomfort to retired, disabled, and vulnerable people. There is a wildlife corridor within Moorside Place and the fields beyond attract many species of birds and mammals. As many residents are house bound this is a wonderful stimulant and source of interest. Any increase in traffic along The Moors would be problematic.
PR-B-0950	Mr S and Mrs T	Lloyd and Atley		General		PR14, PR27	Sites PR14 and PR27, concerned that development north of The Moors would have a detrimental impact on biodiversity. For example increased disturbance and recreational pressure on sites such as St Mary's Field Local Wildlife Site. Many Kidlington residents and others enjoy this area with its valuable green space for walking in the countryside and tranquillity without the need to use a car to access the countryside.
PR-B-0976	Nigel and Tracy	Payne		General		PR14, PR27	Recently sent in an objection for development on GB around Kidlington, sadden that GB counts for so little, so much for government promises. Sites PR14 and PR27 north of Kidlington adjacent to The Moors, should not be built upon. Easy access to the countryside with the footpath that crosses it that are well away from busy roads. The area supports the Skylarks which are on the RSPB red list, how does this fit in with CDC Corporate Biodiversity Action Plan, once built over the Skylarks will be gone forever. North of Kidlington traffic to and from Oxford would have to travel through or around the village, more congestion and added fumes to the busy roads. This is GB which needs to be protected.
PR-B-1200	Katie	Holt		General		PR14, PR27	Object to proposals to build north of Kidlington specifically in relation to PR14 and PR27, these sites are within the GB and should be protected. Part of the site is in a Special Area of Conservation. The proximity of the sites to Kidlington provides amenity land that is so important. Appreciate the need for affordable housing in Cherwell. However it's essential to provide a balance between housing and nature and not create an urban sprawl that would dramatically affect the whole of the Cherwell valley.
PR-B-1246	Christine	Kennell		General		PR14, PR27	Strongly object to development at sites PR14 and PR27 where the footpaths and walks provide peace and tranquillity to the residents who use them. The fields are home to wildlife and the high water table leads to flooding. There are little facilities and an increase in traffic will have a detrimental effect on local health.
PR-B-0909	Mark	Lowen		General		PR14, PR27, PR32	Access to sites PR14, PR27 and PR32 is limited and would not be able to cope with the volume of traffic created. New developments at these locations would be entirely out of character to what is known as Old Kidlington.
PR-B-1130	Mr and Mrs	Bray		General		PR14, PR27, PR32	Object to the proposed plans for new homes in Kidlington which would change from a village into a town. Currently have one secondary school which is oversubscribed and the doctors run at capacity. Particularly concerned about sites PR14, PR27 and PR32 which are GB with lovely walks, enjoyed by many and has flooded before.
PR-B-1210	Tina	Merry		General		PR14, PR27, PR32	Object to proposed sites PR14, PR27 and PR32 as GB would be destroyed impacting nature and wildlife. Countryside walks with well used footpaths would be lost.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1336	Patricia	Stokes		General		PR14, PR27, PR32	Another objection of GB is to preserve the setting and special character of historic towns. CDC produced a leaflet, " Kidlington Historic Village Trail" highlighting the historic and remarkable properties and the wonderful walk around them which maximises the beauty and surroundings of these architectural gems in the GB setting. How can two of the sites be close to the historical St Mary's Church. It has been highly visible for centuries from the surrounding GB. The St Mary Fields Reserve attracts a huge diversity of wildlife because of the green space, these are referred to as sites PR14, PR27 and PR32.
PR-B-0692	Rachel	Watmough		General		PR148	This rep provides a detailed and lengthy objection to PR148, Land at Blackthorn Road, Launton. The primary reasons are that it has previously been rejected by CDC, does not meet the minimum requirement for a strategic development site and would include development on Flood Zone 3 and the Ray Conservation Target area. Photo provided to illustrate the point
PR-B-0698	Bob	Watmough		General		PR148	This rep provides a detailed and lengthy objection to PR148, Land at Blackthorn Road, Launton. The primary reasons are that it has previously been rejected by CDC, does not meet the minimum requirement for a strategic development site and would include development on Flood Zone 3 and the Ray Conservation Target area. Photo provided to illustrate the point
PR-B-1019	Jon	Waite	Kemp and Kemp on behalf of Manor Oak Homes	General		PR148	Promoting Land at Blackthorn Road, Launton as a suitable site for housing. Due to the site's close proximity to Oxford and excellent transport links it is considered that it can help meet Oxford's unmet housing need. However, concern expressed over a number of inaccuracies in the SA.
PR-B-1201	Nigel	Timms		General		PR148	Object to the proposed development in Launton at site PR148 which would be detrimental to the character of the village and is inherently flawed. Most off the site has already been rejected by CDC as it doesn't meet the minimum requirements for a strategic development site and is in Flood Zone 3 of the Ray Conservation Target Area. The remaining portion is only 0.61 hectares which is too small to be considered for development. With substantial building works at Bicester underway it is unlikely that a small amount in Launton will be of real benefit to housing need.
PR-B-1020	Jon	Waite	Kemp and Kemp on behalf of Manor Oak Homes	General		PR149	Manor Oak Homes is promoting Land at Murcott Road, Arncott as a suitable housing allocation. Due to the site's close proximity to Oxford and excellent transport links it is considered that it can help meet Oxford's unmet housing need. However, concern expressed over a number of inaccuracies in the SA.
PR-B-0700	Diana	Clark		General		PR15	Object to the proposal to build 4,400 homes in North Oxford destroying the countryside and its wildlife in favour of urban sprawl. PR51 is an area of outstanding natural beauty with a wide variety of wildlife and rich history. The GB and its pathways are used by many and separates the villages keeping their identities and allowing for a balanced and healthy lifestyle. More traffic will increase congestion, journey times, pollution and danger to road users. The government and councils should protect these areas as there are no exceptional circumstances. There are a number of empty houses within Oxford and brownfield sites should be considered first. Jobs growth is an exaggerated assumption and any new houses will be bought by people from London.
PR-B-0927	Dr Hilary	Bridge		General		PR158	Object strongly to development on site PR157. The rep. spoke with a member of CDC regarding the proposal for this site. Being the landowner for some of the land in the proposed site they have not provided consent and require the land in the map to be removed. The rep. has provided a photo outlining their land in blue. Development of this size and density in Noke would be entirely out of keeping with the surrounding area.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0790	RF	Kendal		General		PR161	Site PR61 for 61 houses in Middle Aston. The field to the rear of Moonstone captures the essence of the Cherwell Valley incorporating a ridge, footpath and fields. There is a break between Middle Aston and North Aston, the space provides habitats for wildlife and this would be lost if developed. It is also the only local break as Middle Aston south joins Steeple Aston, which then almost meets Lower Heyford's. Rep refers to planning applications made in 2001 and 2005. CDC documentation "site location and description" quote 1.1 "on 3 sides Moonstone is open countryside noted as being of high landscape value".
PR-B-0207	Susan	Robertson		General		PR164	Site PR164, land east of Sands Lane is unsuitable as South Newington is classified as a category B, which limits development and is contrary to planning controls contained in the 2014 Conservation area appraisal. Bus service is limited and there is no footpath along the A361 to Milcombe, a car is therefore essential. Local schools are already oversubscribed and could not support this development. Sands Lane is maintained by residents and could not support the level of traffic during and after development. The proposed access point is at the junction of three well used footpaths so presents a safety risk. This development will impact the wildlife such as the Great crested Newt and the open rural aspect which is characteristic of South Newington.
PR-B-1014	Norma	Hunter		General		PR164	Having read the proposal suggested in the Partial Review concerning site PR164 and the comments made by South Newington Parish Council with reference to the above proposal am in complete agreement with SNPC that the proposal is totally unsuitable on the grounds given by the Council. Object to the proposal.
PR-B-1023	John	Hunter		General		PR164	In respect of the proposal of Fisher German to build 57 houses in the area agree with the South Newington Parish Council view of the unsuitability of the project. Wish to have my name added to the list of objectors of the project.
PR-B-0930	Philip	Marsh	Knights on behalf of Philip King Homes and Oxford City Charity	General		PR178	The purpose of these representation is to reaffirm the availability and deliverability of land to the east of Kidlington for development. The site comprises PR178 and an adjoining parcel of land to the north (east of Bicester Road and west of Water Eaton Lane) A site location plan is provided. A detailed justification for the development of this site is included in the rep.
PR-B-1028	Amanda and Michael	Roberts and Graham		General		PR181	Site PR181 is not viable as the access is only the narrow and congested Mill Lane and closing of the level crossing also limits access. No gas or sewage here. The roads can get congested with no help from refuse lorries, skips and parked cars in the road. This is a vital area of open space that borders the Conservation Area on three sides - the fourth side being the railway line which isn't in the Conservation Area as the defined boundary loops around the border of this field, permitting new development on the scale proposed in this field would effectively put inappropriate, modern development in the middle of two areas that are within the defined Conservation Area - i.e., the centre of the village and Islip Mill. The Conservation Area was extended in 2008 to include Islip Mill.
PR-B-0661	Mr and Mrs	Messenger		General		PR186	Object to the proposed development at PR186 as it would extend the boundaries of Bodicote village which already has developments at Cotefield Farm and 1100 houses at Langford Park. All three proposed access/exit points lead onto congested roads that do not have the capacity for growth and are not suitable for widening. Flooding which happens at the lower end of the site will increase and cause concern to residents adjacent to Sor Brook. Bodicote should not be made to take up Oxford's housing quota, it is their responsibility.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0694	John and Joyce	Washburn		General		PR186, PR199	Object to the proposed building in Bodicote at sites PR186 and PR199 which were not included in CDC's agreed plan. It is ironic that Oxford doesn't want to build on the city's GB but villages are being asked to put forward greenfield sites. The developments would put a strain on amenities such as the school and exacerbate exiting traffic problems. At site PR199 access would be via a narrow lane already overused and at site PR186 traffic would have to pass through the centre of the village. The Wards Crescent site is low lying and prone to flooding. The parish of Bodicote has already contributed to housing needs with 1,000 homes at Langford Park, a further 170 homes at Cotefield Farm and plan for another development to the north of the village.
PR-B-0924	Jan	Molyneux	Molyneux Planning for SBPC on behalf of Earthline Ltd and U-Stay Ltd	General		PR19, PR29	This representation relates to land at and adjacent to Shipton Quarry and its potential for the provision of approx. 1,000 homes, a primary school and commercial centre, employment area, local rail station, recreational facilities, ecological protection area, cycle ways and links with nearby villages and countryside.
PR-B-0180	Dr Ben	Allen		General		PR20	The canal side, footpath between Begbroke and Kidlington and fields adjoining Rowel Brook need to be preserved, they are a natural environment enjoyed by many.
PR-B-0645	Stephanie	White		General		PR20	If development were to go ahead am keen to defend site PR20 where footpaths are well used by many and provide a positive effect on peoples' wellbeing.
PR-B-0779	David C	Hinde	Hinde Law Ltd	General		PR20	Site PR20 lies wholly within GB. Local Plan Policy ESD 14 seeks to prevent coalescence of settlements, a strong case for Yarnton, Begbroke and Kidlington. GB Policy ESD 14 seeks to safeguard the countryside from encroachment. Policy ESD 13 seeks to secure the enhancement of the character and appearance of the landscape, particularly in urban fringe locations. Policy Villages 1 has Yarnton, Begbroke and Kidlington as a category A village. Only minor development, infilling and conversion allowed or alongside. Exceptional circumstance can not be shown on this site.
PR-B-1032	David	Burson	JPPC on behalf of the Tripartite and the University of Oxford	General		PR20	The Tripartite (comprising the University of Oxford, Merton College and local landowner) are the landowners of land which includes Begbroke Science Park and adjacent land. A location plan is provided. This land is put forward as a suitable site to meet at least part of the unmet need in association with protecting land which is likely to be required in the longer term to enable the further expansion of Begbroke Science Park. A formal draft masterplan submitted to the Council also indicates how the development could assist in meeting transport objectives.
PR-B-1178	Bryony	Thomas		General		PR20	Have concerns that building on all the available soakaways will increase the risk of flooding. At site PR20 there is regular flooding.
PR-B-1010	Richard	Pye		General		PR20, PR23, PR24, PR34, PR48, PR49, PR51, PR74, PR75, PR91, PR92, PR126	These sites are part of the settlement gap between Kidlington, Yarnton and Begbroke and construction in any of these would have a substantial impact on the prevention of urban sprawl. Sandy Lane, the only road that links Kidlington and Yarnton is narrow with a single file bridge so development would create traffic and safety issues.
PR-B-1185	Claire	Blake		General		PR20, PR23, PR24, PR34, PR51, PR74	Have concerns and objections to the plans for new housing around Begbroke, Yarnton and Kidlington. It will destroy the GB that is a crucial recreation space and area for wildlife. At site PR74 in particular there are many animals including bats and barn owls both of which are protected species. The footpaths at sites PR20 and PR51 are valued by many for their scenery and local walks. The GB was designed to safeguard the countryside from encroachment as well as preventing communities from merging. The recommendations for housing at PR20, PR23, PR24, PR34, and PR74 are in clear contradiction to this. Pressure will increase on already overloaded roads, schools and doctors surgeries.
PR-B-1210	Tina	Merry		General		PR20, PR23, PR24, PR51	Strongly object to proposed sites PR20, PR23, PR24, PR51 and all other sites that merge Kidlington to Begbroke and Yarnton. All three villages will lose their identity.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1076	Jana	Gnappova		General		PR20, PR24	Begbroke is a small village with a unique character and history going back to the 17th century. It has open countryside and wildlife. The development would not bring anything good to the local people. It will join us to Oxford and provide a place for London commuters. CDC has to protect the GB and not destroy the village.
PR-B-1129	Michael and Jo	Collett		General		PR20, PR24	Object to building 4,400 homes in GB specifically sites PR20 and PR24. Begbroke with its strong history has fantastic character and community spirit which would be lost as PR20 would merge Begbroke, Yarnton and Kidlington into an urban sprawl. The GB is what makes villages so special, they have wonderful wildlife and walks and bring quality to life. PR20 floods every year due to Rowel Brook.
PR-B-1221	Martin	Perisi		General		PR20, PR24	Object to the proposal to build 4,400 new houses, in particular at sites PR20 and PR24. Was attracted to Begbroke as it's surrounded by open countryside of GB and wildlife. It is quiet and private with trees, fields and wildlife behind my house. The proposed development will destroy my life and am shocked, upset and dismayed that CDC agreed to this proposal. The village would blend with Oxford and turn into a noisy, over-crowded dirty place as many towns are.
PR-B-1221	Martin	Perisi		General		PR20, PR24	Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Strongly object to this proposal at PR20 and PR24 on GB at Begbroke.
PR-B-1028	Amanda and Michael	Roberts and Graham		General		PR21	Site PR21 would be inappropriate to the village and significantly extend its current boundaries. Mill Lane is too narrow and not designed for any volume of traffic. This is mentioned in the conservation area document as being of vital importance to the external views of the village. The land is also low lying and prone to flooding Traffic flows would no doubt increase in the village which already is a rat run.
PR-B-1238	Chris & Kathryn	Rogers & Bryan		General		PR21, PR55, PR181	Strongly object to sites PR21, PR55 and PR181 put forward for development in Islip. The sites impact the character of the village by imposing development within the GB which is over bearing, out of scale and out of character in terms of appearance. In particular site PR55 impacts the properties along Kidlington Road and Bletchingdon Road with loss of privacy and open aspect. There would be an impact on traffic and safety of road users.
PR-B-0180	Dr Ben	Allen		General		PR23, PR24, PR74	Recognises the need for further housing development in the area, but as a resident of Begbroke have some concerns. It is important to maintain a separation between the village and Langford Lane industrial area.
PR-B-0645	Stephanie	White		General		PR24	If development were to go ahead am keen to defend site PR24 as large scale building in this area would significantly increase traffic through Begbroke, to the disruption of local residents.
PR-B-1022	Jon	Waite	Kemp and Kemp on behalf of W Lucy and Co.	General		PR24	W Lucy and Co is promoting Land South of Sandy Lane, Begbroke. Due to the site's close proximity to Oxford and excellent transport links our client considers it to offer a perfect opportunity to help meet Oxford's unmet housing need. However, concerned expresses over a number of inaccuracies in the Council's assessment of the site.
PR-B-1029	Jane	Verdon		General		PR24	How will the infrastructure of Begbroke cope with more houses? There are existing problems with lack of good school places. The roads are deplorable. Also question of the Immigration Detention Centre. The village is split by A44 with no crossing point. Loss of village identity a concern. Problems of flooding. Additional housing must be of the right type and in the right areas. Without losing too much Green Belt and putting in enough infrastructure so the villages can cope. Listening to local people is a must.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1051	Michael and Kate	Hopcraft		General		PR24	Backgarden is 4m in length which backs directly on to this field. Development would significantly devalue property and change the outlook. This would have a significant negative impact on well being unless there was the opportunity to extend the current garden in order to mediate for this. If development is inevitable it is essential that the infrastructure and services are in place to support this and the countryside is maintained. There needs to be sensitivity to the local communities and their future needs.
PR-B-1093	Christine	Arthur		General		PR24	Site PR24 is in a rural open setting with historical views and a wealth of wildlife. The fields and hedgerows provide an important habitat and corridor for the wildlife and prevent soil erosion. The area with its ancient footpaths is well used and enjoyed by many. Frogwell lane and the Shakespeare Way allows locals and visitors to keep fit and healthy as encouraged by the local government. The fields around Begbroke including PR24 are liable to flooding due to the proximity of Rowel Brook.
PR-B-1214	Richard	Arthur		General		PR24	Strongly object to the proposed development of 4,400 houses around Begbroke and Yarnton. The destruction of GB contradicts CDC's own policy plans agreed in 2015 and goes against the wishes of 76% of Oxfordshire residents who want to protect the GB. It prevents urban sprawl and maintains village identities. Local roads and the A44 are already congested and schools and doctors are at capacity. The perceived housing needs for Oxford are questionable and it's doubtful they would provide housing for local key workers. The village would become an expensive dormitory town for London commuters. Site PR24 offers views of the historical setting of Begbroke. It provides a habitat and corridor for the wealth of wildlife and prevents soil erosion. The ancient footpaths such as Frogwelldown Lane and the Shakespeare Way are well used and enjoyed by many for health and leisure. Consideration needs to be given to the flooding that occurs in the fields around Begbroke including PR24 due to the proximity of Rowel Brook. CDC should oppose the plans and the loss of GB.
PR-B-0709	Dr E J	Williamson		General		PR27, PR14	Some of the sites proposed are particularly unsuitable. Those in the northern part of Kidlington, particularly 27 and 14 are liable to flood. They would mean people having to travel through the village to get to Oxford. This is totally unacceptable due to traffic congestion. Kidlington is a large village blessed by GB, providing pleasant countryside, nature reserves, footpaths and walks. To destroy this would remove these benefits of village life forever. The Northern Gateway area, in Oxford's domain, is scheduled for industrial development -not houses. This will surely aggravate the housing situation. The North Oxford Golf Course is under consideration, but why not Southfield Golf Course in Oxford? Wish to strongly object to the proposals as they stand and urge the District Council to reconsider its position.
PR-B-0629	Ann	Crane		General		PR27, PR14, PR23	Wish to object to the proposal to build 4,400 houses around Kidlington as it's not sustainable and within GB. The present infrastructure is already overstretched and could not cope with further demands on its schools, health services and roads. There would have to be new schools and health centres built. Sites PR27, PR14 and PR23 are dangerously close to the flood plain so should be considered unsuitable. The GB is an amenity for the health and well-being of residents and a natural habitat. CDC's policy to protect it should be upheld.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1060	Nicola A	Forsythe		General		PR27, PR32, PR14	Object to the proposed plan to build 4,400 homes north of Oxford, in particular around Kidlington at sites PR14, PR27 and PR32, it is not sustainable. Traffic problems will become worse and schools and medical practices will be unable to cope with the additional numbers. The open countryside we enjoy will be lost and quality of life will suffer as air, noise and light pollution increase. There will be implications for flooding and drainage. Particularly object to development on GB which is designed to protect villages from urban sprawl and is well used and enjoyed by many. It protects the historic City of Oxford from overdevelopment, and the government's manifesto promise and CDC's policy to protect it should be upheld. There are alternatives to building on the GB including making better use of previously developed land in Oxford.
PR-B-1208	Hilary	Hastings		General		PR3, PR13, PR20, PR26, PR35,	Whilst understand the need for housing in the Cherwell area, strongly object to blanket development around Kidlington, Yarnton and Begbroke. This would be an excessive overdevelopment of the GB creating one urban mass, removing the character and open countryside. The GB was set up to protect the green space which improves the mental and physical well-being of the local community. Consideration needs to be given to the impact on the Conservation Target areas that provide a habitat and corridor for wildlife. The local infrastructure is already struggling to cope as are GP's and hospitals. The development would create a dormitory town for London commuters.
PR-B-0157	Jon	Waite	Kemp and Kemp on behalf of Newcore Capital Management LLP	General		PR30	Newcore is promoting this site as a suitable housing allocation with associated services and facilities. The site's close proximity to Oxford, brownfield land designation and excellent transport links offer a good opportunity to meet Oxford's unmet housing need. Concern expressed over inaccuracies in CDC's assessment of the site. This rep corrects those inaccuracies and provides further information about the site including contamination, current massing and landscape information.
PR-B-1028	Amanda and Michael	Roberts and Graham		General		PR30	Site PR30 Although still within GB, this is a brownfield site, which is most suitable for some development. Lacking in infrastructure, services and with significant traffic problem in Islip this all needs to be considered when determining the scale of any permitted development.
PR-B-1238	Chris & Kathryn	Rogers & Bryan		General		PR30	Site PR30 within the village is brownfield land and would be more suitable. However we object to the whole site being developed.
PR-B-0284	Marilyn	Marshall		General		PR32	Site PR32 around St Mary's church is an area where a lot of time and effort has been made to manage wildlife and provide outdoor space for Kidlington residents. Has there been any consultation with the RSPB or Berks, Bucks and Oxfordshire Wildlife Trust?
PR-B-0807	Justin	Scroggie		General		PR32	St Mary's church which stands at the bottom of Church Street adjacent to site PR32 is a grade 1 listed building dating back to 1220. 3 years time there will be celebrations for its 800th anniversary. By this time this will be engulfed by new buildings destroying the surrounding habitat, nature, peace and quite which has been there for eight centuries.
PR-B-1202	Gaynor	Thorpe		General		PR33, PR150, PR190	The proposals are all within the boundary of Caversfield Parish Council which has been designated as a Category C and a separate entity to Bicester. There is not the infrastructure to maintain this level of housing as there is no bus service and only country roads. Water pressure is low and there are no schools or shops. There is also a shortage of doctors in Bicester. Plans to develop site PR33 were refused some time ago by the planning inspectors and these reasons have not changed.
PR-B-0779	David C	Hinde	Hinde Law Ltd	General		PR34	Site PR34 lies wholly within GB. Local Plan Policy ESD 14 seeks to safeguard the countryside from encroachment. This site is isolated, served by a class c road, adjacent to a railway line and it would affect the setting of the Oxford Canal Conversation Area.
PR-B-0805	Tamara	Frishberg		General		PR38	The figure of 4,400 houses in the Kidlington and Oxford corridor is far too great. The roads are already overburdened, further damage to air quality, and deprive residents of access to green areas. The infrastructure are already stretched to capacity. The houses, particularly those in PR38 are more likely to attract additional residents to Oxford rather than address the housing needs of those already living and working in the city.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1010	Richard	Pye		General		PR38, PR39, PR41, PR50, PR122, PR123, PR124, PR125, PR167, PR168, PR177, PR178	These sites protect against the urban sprawl of Oxford City and so development would contravene the purpose of GB, they also contain rich and diverse wildlife habitats.
PR-B-0680	Dr John	Maddicott		General		PR38, PR49, PR91, PR122, PR195	Realise some land must be found for development and consider these sites, though within GB are the least unsuitable. Most of these sites have no recreational or historic value and could be built on without great loss to the community.
PR-B-0681	Dr Hilary	Maddicott		General		PR38, PR49, PR91, PR122, PR195	If sites are needed in the area CDC should consider these sites. They have no historic or environmental value and could be built on without detriment to the community.
PR-B-0794	Prof Michael	Collins		General		PR38, PR50	This rep provides details reference to sites RP38 and PR50. Cutteslowe Park has a city boundary and farmland beyond, to build to the full extent of these sites would destroy the north of the park and the open vista on the east. This is part of Oxford's heritage and the City should fight to retain it.
PR-B-0794	Prof Michael	Collins		General		PR38, PR50	The rep has provided three key aspects that the consultation document has overlooked. The two arterial routes defined by the A34 and the A40. The effect of new houses being built on sites PR38 and PR50 without the new A40. Proximity of the New Oxford Parkway station is a positive value to building in site RP38 and PR50. Suggestions to problems referring to The two arterial routes defined by the A34 and the A40.
PR-B-0805	Tamara	Frishberg		General		PR38, PR50	Consultation papers, proposed tram and other public transport system is a fantasy. Cutteslowe roundabout, no provision made for significant number of cyclists along the Banbury Road from Kidlington to Oxford. The City and the County Council need to be more committed to solving existing traffic problems and provide adequate public transport. Without improved public transport the planned Northern Gateway will exacerbate traffic problems near the site PR38 and PR50.
PR-B-0909	Mark	Lowen		General		PR38, PR50, PR123, PR167, PR178	Sites PR38, PR50, PR123, PR167 and PR178 are close to the new railway station and will attract London commuters and increase congestion. Southfield Golf Course is better placed than North Oxford Golf Course to provide houses as it's within walking distances of employment sites such as BMW and Oxford hospitals. These sites seem to have been discounted before becoming public, based on an announcement by a councillor at Gosford and Water Eaton PC annual meeting.
PR-B-1226	Andrew	Garraway	Turnberry on behalf of Exeter College - Frieze Farm	General		PR39	This representation sets out a clear justification for a new innovation village in this location, and demonstrates how the vision for site PR39 adheres to the Council's vision to meet Oxford's unmet housing need and adheres to Oxford's pattern of development.
PR-B-1030	Jonathan	Harbottle	Land and Partners Ltd	General		PR46	This representation is made in respect of Land at Sibford Ferris. The owners of the site are willing to make the site available for housing development. Sibford Ferris is a highly sustainable location to support housing growth.
PR-B-0818	Robin	Grimston		General		PR46, PR66	Sibford Ferris resident. Two sites PR46 and PR66 have been identified to accommodate at least 100 houses inappropriate resulting in dwarfing the village. The village boundary abuts the Cotswold AONB which is to be cherished and not squandered. The immediate road network is poor and some are classed as unclassified. Both sites being offered by same landowner and site PR46 submission from Fisher German misrepresents the local amenities. There is no supermarket or schools for this site. The existing facilities in Sibford Ferris do they have capacity? Aside from the road network other aspects of the infrastructure need to be considered, the sewage system and water supply. Sibford is a particularly rural, unspoilt part of Cherwell district and any development, of whatever scale needs to be carefully thought through. 100 houses would completely ruin the area.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1021	Jon	Waite	Kemp and Kemp on behalf of Manor Oak Homes	General		PR49	Manor Oak Homes is promoting Land at Stratfield Farm, Kidlington as a suitable housing allocation. Due to the site's close proximity to Oxford and excellent transport links it is considered that it can help meet Oxford's unmet housing need. However, concern expressed over a number of inaccuracies in the SA.
PR-B-1222	Alexis	Livadeas		General		PR49	Objection to the proposed housing development around Kidlington, in particular near Garden City at site PR49. This is one of the few remaining areas of open ground and it would be a step closer to joining Kidlington with Oxford. Building here would be detrimental to the nature reserve at Stratford Brake, currently enjoyed by many people. Traffic congestion at the A4260 roundabout is appalling and restricts travel, any extra traffic would make the situation worse. Development at any of the sites in Kidlington would have an impact on the south-bound traffic feeding into the Sainsbury's and Pear Tree roundabout.
PR-B-0224	Rev Peter	Hewis		General		PR51	Please register my objection to proposed development at PR51, Spring Hill, Yarnton. As the name suggests several springs run down Cassington Road and Rutten Lane and building would add to current flooding problems. There have been occasions when buses and cars have been unable to get through the flood water. The roads are narrow and the nearest bus stop is Rutten Lane. The land is in GB, well used by ramblers and one of the few remaining undeveloped hill sites in the area. Home to deer, sparrowhawks and the endangered barn owls that nest at College Mead. Frogwell Lane is a historic route, in 1644 King Charles I led his troops up this lane to Bladon then on to Hanborough heath. Before housing is considered Oxford City must ensure students are housed in appropriate accommodation thus releasing houses for families and number of houses empty or rarely used quantified.
PR-B-0266	J M	Titchmarsh		General		PR51	There is a history of flooding in parts of Yarnton after heavy rain, due to water running off Springhill. I therefore propose area PR51 should be removed for this reason.
PR-B-0637	Prof Martin LG	Oldfield		General		PR51	Particularly concerned by the inclusion of Site PR51, which encompasses Spring Hill, it is in the GB and is adjacent to our village of Begbroke. Spring Hill is an area of exceptional natural beauty, with ancient paths (Frogwelldown Lane, Dalton Lane and the Shakespeare Way), and is enjoyed by many. There are ancient and valuable oak trees near the top of the ridge and furrow fields, and run off from Spring Hill is a source of local flooding. Begbroke is an ancient village with a conservation area and being narrow and twisty is unsuitable for any increase in traffic. The development would cause it to lose its character and identity.
PR-B-0645	Stephanie	White		General		PR51	If development were to go ahead am keen to defend site PR51 which is of huge historical significance and the footpaths offer stunning views.
PR-B-0658	Susan	Oldfield		General		PR51	At site PR51, Spring Hill Road is a narrow, twisting lane through a conservation area that is prone to flooding. The 'Shakespeare Way' is used by many as is the ancient footpath which contains beautiful views and trees. Building in PR51 would destroy hundreds of years of rural history and beauty.
PR-B-0675	Elaine	Titchmarsh		General		PR51	Yarnton suffers from flooding in certain rainy conditions from water running off land within PR51
PR-B-0702	Nigel	Clark		General		PR51	GB designed to stop urban sprawl and its purpose is to provide its residents with space, to enjoy nature, recreational use and for wellbeing. If merged the village loses its identity and village activity is affected and destroyed. Yarnton and Begbroke are of historical interest, as the route King Charles 1 took at Spring Hill Site RP51. A wealth of trees and wildlife surround the footpaths and fields in the area. Moved into the village to enjoy a well balanced lifestyle, not to be swallowed up into a city environment. GB needs to be preserved allowing us to continue to enjoy and use the surrounding countryside.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0779	David C	Hinde	Hinde Law Ltd	General		PR51	Site PR51 lies wholly within GB. Local Plan Policy ESD 14 seeks to prevent coalescence of settlements, a strong case for Yarnton and Begbroke. GB Policy ESD 14 seeks to safeguard the countryside from encroachment. Policy ESD 13 seeks to secure the enhancement of the character and appearance of the landscape, particularly in urban fringe locations. Policy Villages 1 has Yarnton and Begbroke as a category A village. Only minor development, infilling and conversion allowed or alongside. Surface water running off the elevated site frequently causes flooding in Yarnton and along Cassington Road and Rutten Lane, this will become much greater.
PR-B-0980	John and Pamela	Appleton		General		PR51	Site PR51 includes Spring Hill in the past has caused flooding in parts of Yarnton, suggesting that this area is not suitable for development.
PR-B-1004	Stephen N	Skinner		General		PR51	Objection is based on GB. This rep. has referred to points in the NPPF regarding GB purpose. Oxford City's intentions become clear when you review the extent of research and planning for areas A and B, which is detailed in CDC Summary Leaflet of November 2016. It is also in-line with the City's stated strategic direction of growth as detailed in the document 'Investing in Oxford's Future – Deciding Strategic Growth Options'; but this intent, is wholly counter to the first four statements made on GB in the NPPF. We stand to lose walks and countryside views. The loss of irreplaceable historical connections, Shakespeare's Way and Frogwelldown Lane famous from Charles 1 in 1644 when fleeing Oxford to escape Oliver Cromwell's troops. Site PR51 captures all of this and it is not acceptable to build here. GB's intention is a permanent fixture and the alleged housing crisis can not be allowed to sway this.
PR-B-1004	Stephen N	Skinner		General		PR51	Objection is based on flooding this is a regular event around Begbroke and Yarnton. Have been affected by this three times with a significant amount of damage caused. It only takes one heavy downpour for the roads to flood and to create extreme damp conditions on the pathways between Yarnton and Begbroke. This is also evident on the higher levels of Spring Hill. To build extensive numbers of houses and access roads will not only exacerbate the problem, it will hugely increase the cost of potential development. The areas referred to here are of course also encapsulated within PR51.
PR-B-1083	Susan	Knox		General		PR51	Am particularly concerned about Site PR51 which is agricultural land needed for food production.
PR-B-1191	Simon	Eaton		General		PR51	Development on site PR51 has considerable flood risk. During heavy rain water runs off the field and causes flooding in the village and Cassington Lane.
PR-B-1253	Jon and Michelle	Mason		General		PR51	Site PR51 is a specific concern. The site is on a hill and development here would be considered an eye sore effecting views from many view points. Many residents gardens back onto this site too.. Rutten Lane is already busy and is used as a cut through from the A44 to the Cassington Road. Traffic here would increase along this quiet residential road. The site is adjacent to the primary school, old people's home, play park and playing fields. With the increased traffic along Rutten Lane, pedestrians and the vulnerable will be at risk. Chose to live in Yarnton due to the access to the open countryside, allowing us to utilise the walks for leisure and fitness activities, this would be lost if development goes ahead. Yarnton is a small, historic, characterful, Bronze Age village. This character and identity would undoubtedly be spoilt by a large, modern housing development.
PR-B-1265	Kathleen	Hayes		General		PR51	Site PR51 is important for the health and wellbeing of local residents. It contains historic pathways and unique views of the local landscape. Spring Hill within PR51 has natural springs which cause flooding when there is heavy rain, any development would increase this risk.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1091	Mark	Bailey		General		PR51, PR48, PR20, PR24, PR74, PR118, PR126, PR34	Object to the proposed planning around Kidlington, Yarnton and Begbroke which will have a major effect on the small village communities of Begbroke and Yarnton. It disregards the GB and breaches the reasons it has been put in place such as restricting urban sprawl and preserving historical settings. The road infrastructure can't cope with current demands before adding a further 5000 cars and schools and doctors surgeries are at capacity. Spring Hill is an area of outstanding beauty and provides a full 360 degree view of the country, admired by many people from far and wide. At Spring Hill Road the fields are flooded on a regular basis and the road is submerged. This is the same at Begbroke. This rep has provided photos to illustrate the flooding.
PR-B-1205	Karen	Jackson		General		PR51, PR75	Sites PR51 and PR75 are havens for walkers and wildlife, used by city dwellers and residents alike. Exceptional circumstances to use GB, which provides the historical setting for villages, is not apparent. PR51 has extensive flooding after heavy rain which Yarnton village feels the impact of. Extensive building would exacerbate this problem.
PR-B-0678	Mrs H G	Kibby		General		PR51, PR75, PR20, PR34, PR126, PR94, PR92, PR24, PR195, PR194, PR27, PR14, PR178, PR125	These sites are of particular concern as Yarnton, Begbroke and Kidlington would become one sprawl and lose their identities. Open countryside would be lost with walks and wildlife. There are otters and water voles in the canal and River Cherwell. There would be an impact on flooding, drainage and local roads.
PR-B-1028	Amanda and Michael	Roberts and Graham		General		PR55	Site PR55 is inappropriate to the village and would significantly extend its current boundaries. This is mentioned in the conservation area document as being of vital importance to the external views of the village.
PR-B-1180	RA	Humphreys	Humphreys and Co Solicitors on behalf of Oxford Programs Ltd	General		PR75	Very concerned to preserve the historic setting of the Grade II* listed Yarnton Manor and its Grade II listed historic gardens which border site PR75. The development of the site would infill the existing open area between Yarnton Manor and Yarnton itself. The Manor House and gardens would effectively be subsumed within the built-up area of the village. this would cause substantial harm to these heritage assets. Development would also severely prejudice the effective operation of the educational campus, which itself plays a significant role in supporting the educational and research functions of the City. There are also flooding issues in the locality.
PR-B-1191	Simon	Eaton		General		PR75	Site PR75 in Yarnton has a public footpath and building on this field will deny villagers the amenity and pleasure of walking. The field also abuts onto a listed building so development would spoil the setting.
PR-B-1331	Fred	Jones		General		PR75	Have considerable concerns with the overall proposal in particular with the number of dwellings and the integrity of the supposed shortfall. As a Yarnton resident have serious concerns with site PR75 off Church Lane and all the potential sites. It is most inappropriate and poorly thought out. Church Lane is not suitable for access to Cassington Road, it is only one vehicle wide, with no passing places or a footpath, this would be fraught with danger. The junction to access the Cassington Road is already congested as it is used as a rat run between the A40 and A44. Developments on site PR75 could generate 200-300 extra vehicle movements a day, in addition to the granted planning permission at the rear of Charlett's Tyres. Cassington Road and the linking Rutten Lane bear the majority of daily traffic in the village, both roads can barely cope with the existing volume of traffic. To increase this volume would seriously compromise the safety of drivers and pedestrians alike and should be discouraged at every opportunity. Strongly oppose the proposal at site PR75.
PR-B-0645	Stephanie	White		General		PR91	If development were to go ahead am keen to defend site PR91 which is a haven for wildlife and routinely floods.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0779	David C	Hinde	Hinde Law Ltd	General		PR91	Site PR91 lies wholly within GB part of which is considered brownfield. Local Plan Policy ESD 14 seeks to encourage the recycling of derelict and other urban land. Access to the A44 from this site totally inadequate, highly dangerous, and the danger can only be exacerbated if further development were to be allowed.
PR-B-1285	Jeffrey	Wright		General		PR91	This consultation is about Oxford's unmet housing need. Why has site PR91, as an example, been included and promoted for employment? This is a site of special scientific interest and the limits of expansion along the Oxford canal had previously been agreed.
PR-B-0909	Mark	Lowen		General		PR91, PR194, PR195	Sites PR91, PR194 and PR195 would be better used for commercial development to reduce traffic travelling into Oxford.
PR-B-0159	Jon	Waite	Kemp and Kemp on behalf of Sheehan Group of Companies	General		PR92	Client is promoting Knightsbridge Farm as a suitable housing allocation with associated services and facilities. Due to the site's proximity to Oxford and excellent transport links it is considered to offer a perfect opportunity to help meet Oxford's unmet housing need. Client is however, concerned about a number of inaccuracies in CDC's assessment of the site. This rep addresses these inaccuracies and provides CDC with further information about the site.
PR-B-0973	Jonathan	Harbottle	Land and Partners Ltd	General		PR94, PR95	Land and Partners (LandP) is in contact with the owners of this site who are willing to bring forward the land for residential development.
PR-B-1285	Jeffrey	Wright		General		PR-A-074	Information has been made very difficult to find some of which has major implications for villages such as Begbroke. An example of this is The Begbroke Master Plan PR-A-074 JPPC Oxford University The Tripartite. People are amazed when informed of the detail such as a Park and Ride and railway station.
PR-B-0758	Stephen	Anderson		General		Previous LP2-A_174 [sec], PR164	This rep. provides a detailed and lengthy objection to site PR164/Rep ID LP2-A_174 [sec], land east of Sands Lane. Quoting Cherwell Local Plan for South Newington. Quoting South Newington Conservation Area. Quoting Site Submissions Form and Manual for Streets. Concerns over the lack of public transport as car transport is essential to living in the village. Will the sewage pumping station be able to cope with the increased population. A361 is a busy road, can it cope with increased traffic. Schools already close to capacity, where would they be educated? The site would extend the village beyond its existing built up limit, Historic settlements are not to be lost.
PR-B-0779	David C	Hinde	Hinde Law Ltd	General		RP75	Site PR75 lies wholly within GB. Local Plan Policy ESD 14 seeks to prevent urban sprawl and to safeguard the countryside from encroachment. Policy Villages 1 has Yarnton as a category A village. Only minor development, infilling and conversion allowed or alongside. Access to the site by a single track Church, which leads onto the traffic calmed Cassington Road.
PR-B-1358	Ian	Lough-Scott	Upper Heyford Village Group	General		Upper Heyford	Wish to place on record the observations that were presented at a public enquiry held in 2002. These concerns still apply. The rep reproduces these observations which refer to the highway constraints and problems in the U Heyford area and surrounding parishes.
PR-B-0037	Clifford	Jones		General			The consultation has been poorly publicised, and technical language used in the documents inaccessible to the general public. GB should have been clearly marked on location plans.
PR-B-0043	Simon	Dacombe	Thames Valley Police	General			No specific comments. Highlights that additional policing infrastructure requirements may be required to mitigate the impact of this growth.
PR-B-0044	Janet	Moore		General			Kidlington is already too big and increased traffic will cause standstill. We want to retain the countryside.
PR-B-0075	Philip V F	Kavanagh		General			Strongly object to 4,400 homes in Oxford GB that could bring 8,000 cars to already congested roads. The medical facilities at Kidlington can't cope at present with the demand. You want more houses to obtain more council tax to waste on frivolous schemes. Incorrect assumptions have been made about the growth in jobs in Oxford. The proposed sites for employment and previously developed land in Oxford should be considered instead.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0076	Melanie	Green		General			Recognise the need for housing and that some of that will need to be around Kidlington, however object to the plan of 10,400 houses. It means the majority of surrounding rural land, used by walkers and families will disappear. Pressure will increase on services and roads, and central parking will be limited by the proposed development of the Coop. should follow the model of some Scandinavian countries where business and retail developments have residential accommodation on top of them.
PR-B-0077	Mrs	Patten		General			Object to the proposed housing in Begbroke and surrounding area. The character and form of each village will be destroyed and it will increase pressure on the infrastructure. Roads are already congested, schools oversubscribed and health services at capacity. It will cause irretrievable damage to the countryside and loss of habitat to wildlife. Ancient footpaths like Frogwelldown lane and bridleways for walkers, riders and cyclists will be lost. Encroachment on the GB defies CDC's own policy and plan agreed in 2015, where 76% of residents wanted to protect GB.
PR-B-0119	C A	McCall		General			Comments relate to Kidlington.
PR-B-0134	V N	Smith		General			As a resident and tax payer of Cherwell object to meeting any other Council's housing needs unless they agree to meet the full cost of the work and certain other conditions are accepted which must form an integral part of any approved plan.
PR-B-0134	V N	Smith		General			There is already a commitment in the adopted local plan to build 22,800 new homes by 2031. If another 4,000 were to be added to the total the probable population increase is well over 60,000 people, a massive increase which will cause obvious problems.
PR-B-0134	V N	Smith		General			Healthcare - The clear attempt to downgrade the Horton Hospital should be reversed immediately. There can be no excuse for sending local residents to any Oxford Hospital for minor procedures. Travelling is a serious issue and so is parking. The roads are already congested and journey times are increasing all the time. No doubt the planners have improvements in mind but action is needed now. The A34 to Oxford needs at least one more lane.
PR-B-0134	V N	Smith		General			Education - In some places there is already a problem with school places. Sending pupils by bus can be expensive and some parents choose to drive further increasing traffic congestion and pollution. Parking is an issue almost everywhere. Employment - If Cherwell has to assist Oxford then Oxford should encourage firms to re-locate to Cherwell and occupy some of the vacant premises thus reducing commuting.
PR-B-0134	V N	Smith		General			Climate change - Serious traffic congestion and more and more commuter journeys increases pollution which is supposed to be a national priority. Conclusion - Unless action starts to deal with the points raised and any other concerns noticed by planning staff the proposal to deal with Oxford's housing needs cannot be approved.
PR-B-0147	Carl G L	Smith		General			Whilst acknowledging that Oxford City and government are pressing for housing outside the city boundaries, it had been envisaged in Oxford City and Cherwell that this would be marginally rounding off around the city and some parts of Kidlington and nearby villages. The level of development proposed would overwhelm the Kidlington area which already has over-stretched services and infrastructure. The congested road network will reach gridlock when the A40 to A4160 proposed link road is built. Already the A34 which links the ports in Southampton to the industrial midlands sees daily accidents. I hope CDC will resolve to protect the GB which prevents urban creep, contains high quality countryside with footpaths and has biodiversity proven by Chiltern Railways to come close to Port Meadow. Many of the sites are edging into flood plains and the land owners appear to be only interested in maximising profits by selling to developers. Oxfordshire's strategic economic plan forecast is flawed and need revising taking into account Brexit. If however this level of housing is required, increases should be considered in Banbury, Bicester and Upper Heyford

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0148	Mrs J E	Stedman		General			Object strongly to erecting 4,400 houses around Begbroke and Yarnton. GB will be lost, and pressure will increase on the infrastructure, schools and the health services. It is ill thought out.
PR-B-0149	Linda and Derek	Foster		General			As long standing residents of 80+ years object to new houses in and around Begbroke. New housing making it's way up Springhill road has already increased traffic on the single track road used by walkers, dogs and horses. Concerned for our footpaths, and the disruption of works traffic. Have lost our PO, 2 shops and the garage and Spring Hill supports much wildlife including a barn owl.
PR-B-0150	Patrick and Julia	Marcks		General			Object to the conduct and timing of the Consultation process which has been poorly publicised. Cherwell have done little to raise public awareness of the possible loss of Green Belt and details of the consultation were difficult to find on your website.
PR-B-0163	Wendy and John	Castle		General			Horrified at the proposed building of 4,400 houses north of Oxford. The development is unsustainable, the infrastructure would be overwhelmed and we doubt that any improvements could or would be made to cope. The traffic problems would increase and schools, GP's and dental services swamped. Wholly oppose GB being eroded as it contravenes its five purposes stated by CDC. Definition between Kidlington and Oxford would be lost and spoiling what remains of the area around Oxford will make it a less attractive place to visit and live. It is much needed green lung giving respite from urban sprawl and allowing space for exercise and spiritual comfort.
PR-B-0166	Mark	Webb		General			Object to building more houses around Kidlington. The infrastructure at both Begbroke and Kidlington will not be able to cope, and the schools and medical centres are already at capacity.
PR-B-0168	Paula	Staples		General			Concerns regarding the proposed housing at South Newington. There is no rail link to Oxford and a sparse bus service, no school, shops or medical services. Any development will therefore put additional pressure on the local narrow roads which are already degraded. The main road A361 through the village is already dangerous with current volumes of traffic and the proposed site will have poor access to this. Existing drainage is already overstrained and will not support a further 57 houses. The site will spoil a conservation area which has valuable footpaths, crayfish, newts, bats and buzzards.
PR-B-0170	Andrea	Johnson		General			Protests most strongly to the proposed development in the Kidlington and Yarnton area. Traffic infrastructure can barely cope at present and this would get worse. School class sizes are already too large for effective learning and health provision is under pressure. These plans go against CDC's 2015 plan and residents wishes to protect the GB, which provide wildlife habitat and a space for people to thrive.
PR-B-0172	A	Platt		General			Object to the proposed housing in Cherwell especially at Quarry End, Begbroke. There is a bronze age barrow in the said field, which along with Fernhill Road sometimes floods. I live in a bungalow and don't want two storey houses overlooking me and my neighbours.
PR-B-0173	Janet	Persson		General			A number of possible sites are close to the Peartree and Kidlington roundabouts which are heavily congested bringing traffic from the A40, A44 and A4260. It would be better to locate new developments away from these bottlenecks. The 100 houses, limits site location as villages could accept smaller numbers while still maintain a good quality of life. There should be no development east of Kidlington to the river which should be preserved for people and wildlife. The airport would be better to remain a source of employment and Langford Lane is cut off from the town by the industrial estate. The chart shows a centre of employment in Headington, so the east of Headington would be better, has Buckingham CC been consulted?
PR-B-0175	Mr D and Mrs S	Rudd		General			Feels that the consultation has been poorly publicised and that possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0176	Robert	McGurrin	Woodstock Action Group	General			Objects to the release of Green Belt land near Kidlington. They question the basis of SHMA calculations and assumptions of high economic growth and immigration. The existing infrastructure and services such as health, education, recreation/leisure, natural environment, etc., are all under strain and stretched. They will be impacted by such this proposal. They call for the deletion of modifications PR22 and PR25 from the Local Plan.
PR-B-0177	Nick	McEwen		General			Grave concerns over the proposed building at Begbroke. The plans will not only ruin the character off the countryside and village but increase pressure on the fragile infrastructure including roads and schools. Brownfield sites should be explored before GB.
PR-B-0178	Craig and Melanie	Carter		General			Horrified at the possibility of housing decimating the GB, having lived in Begbroke for 30 years. This combined with the prospect of increased traffic congestion and pressure on our local health services is daunting.
PR-B-0179	Mr and Mrs	Pickard		General			Object to the proposed housing in Begbroke and surrounding area. The character and form of each village will be destroyed and it will increase pressure on the infrastructure. Roads are already congested, schools oversubscribed and health services at capacity. It will cause irretrievable damage to the countryside and loss of habitat to wildlife. Ancient footpaths like Frogwelldown lane and bridleways for walkers, riders and cyclists will be lost. Encroachment on the GB defies CDC's own policy and plan agreed in 2015, where 76% of residents wanted to protect GB.
PR-B-0181	Diane and Darryl	Bates-Brownsword		General			Feel that the consultation has been poorly publicised and that possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-0184	Roger	Prince		General			The publicity given to the process was not handled very well and the public should have been made aware of this review to the Local Plan and the renewed and increased threat to the Green Belt. The Cherwell website is not easy to navigate or read and there was no quick link to the consultation details. The timing of the consultation period in Kidlington, over the Christmas period couldn't have been at a worse time to engage the residents in the process.
PR-B-0194	Philip	Hine		General			Strongly object to the proposed 4,400 homes as so much is on GB land. With regards to Kidlington, the GB which is designed to check unrestricted sprawl and safeguard the countryside, will disappear along with Kidlington as it becomes a suburb of Oxford. Oxford City is proposing to build business parks on their available land rather than address their housing needs.
PR-B-0196	Christopher	Jarvis		General			Although recognise the need for housing, object to the proposed scale in Kidlington. Roads are already congested, pollution will increase and pressure on facilities and services would be immense. The green space around the village is special to many residents and wildlife. I conduct surveys along the river Cherwell for the British Trust for Ornithology and have recorded a decline in species, a scheme like this would wipe even more out. With Oxford Parkway making London an hour away it is unlikely that the development will help the local housing situation.
PR-B-0197	Dr Margaret	Barrett		General			Greatly concerned about plans to build in Oxford's GB. Have lived in north Oxford for over 60 years, and part of that joy is access to the countryside. The increased pressure on facilities bought about by more residents and access to the Wolvercote and Cutteslowe roundabout is a worry.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0198	Trevor	Cusi		General			Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Rat running and commuter traffic locally will only get worse.
PR-B-0199	Anne	Davies	Piddington Parish Council	General			Traffic congestion - The Parish Council would ask that any significant development around Bicester also make provision for adequate infrastructure as they would not like to see any worsening of the current traffic congestion in the area. Health - It is also concerned that proposals to increase the size of Banbury and Bicester will put even more pressure on local health services, and would like an assurance that the needs of Horton General Hospital to respond to the needs of this increased population is being appropriately discussed and planned.
PR-B-0201	Dr Catherine	Grebenik		General			Feel that the consultation has been poorly publicised and that possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-0202	Ian	Gordon		General			Oppose the proposed destruction of GB around Begbroke and Yarnton. The continuing expansion of homes will result in urban sprawl and destroy rural communities which make this area so attractive. We shouldn't have to make this sacrifice for Oxford City's housing needs, where landowners and builders make sizeable profits whilst only providing minimal affordable houses.
PR-B-0206	Andrew	McCallum		General			The figures for housing growth are based on spurious figures for jobs growth in Oxford and new houses may be used by London commuters. Much of the proposed new employment could be directed to other parts of the country where there is high unemployment and brownfield sites are available. New housing within Oxford could be built to higher densities, such as good quality flats, thus reducing the need to encroach beyond the existing boundaries. Improvements to transport infrastructure in particular the railway will enable workers to commute from further afield reducing the need for housing. Do not build on GB.
PR-B-0207	Susan	Robertson		General			It is questionable whether it is a sustainable option for Cherwell to help meet Oxford's housing need by building 4400 homes in Cherwell, which already has many developments in the pipeline. Councils need to look at the level of affordable housing by increasing the percentage that developers include in sites and taking into account local salaries. A full transport assessment needs to be undertaken to understand the impact of building 4400 houses, for example the car park built at Banbury railway station has increased congestion in the area. There would be an additional burden on schools, doctors and hospitals and the potential downgrading of the Horton Hospital will increase traffic going to Oxford for treatment. If additional houses are built pressure is needed to retain the Horton and they must be affordable.
PR-B-0208	David	Wintersgill		General			Oppose the plans for building in the GB which goes against the agreed plan for 2015. Should not have to provide houses for Oxford, the colleges have land within the city without using GB around Begbroke, Kidlington and Yarnton. Chose to live in the countryside and can see no benefit to villagers. The present infrastructure is gridlocked morning and night and the new bus routes 500 and 7 which give access to Oxford Parkway and the hospitals go through Kidlington but overlook Begbroke and Yarnton.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0209	Patrick and Julia	Jennings		General			The case for the total housing requirement has not been substantiated, and houses would be better placed near key area of employment - Cowley and Headington. The selection criteria disregards the national policy for protecting GB, and the assessment tests for sites, does not capture the impact on the environment and the landscape.
PR-B-0210	Catherine	Henderson		General			Object to the proposed 4,400 homes on GB at Begbroke, Kidlington and Yarnton. Begbroke already has traffic problems at rush hour with delays at the A44 and A40. My children use the S3 bus and have to cross the dual carriageway without a pedestrian crossing, so any increase in traffic will endanger those using public transport. If we lose all our open spaces we will become an Oxford urban sprawl, and change a historic town and world heritage site. Businesses in Kidlington and Woodstock would suffer as roads become too congested to use. Schools and medical services are already at capacity and any population increase would put a strain on services. This area have seen much development in recent years and we are significantly devastating the natural habitats of many plants and animals
PR-B-0213	Linda	Browning		General			The consultation was poorly publicised, as a property owner in Yarnton would expect some communication and the possible loss of GB should have been highlighted. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-0222	Malcolm	Axtell		General			Am grateful to Kidlington Development Watch for alerting me to these proposals as there was little raising of public awareness from CDC with regards to loss of GB. It was difficult to find the consultation details on the website and they were long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-0223	P M	Vandermin		General			Objects to the proposed building of 4,400 new houses north of Oxford, these figures are unrealistically high and should be challenged by CDC. It is unsustainable, traffic problems would become worse and schools and health services would be overstretched. Walks and views would be lost, and natural habitats of local importance destroyed. Object strongly to development on GB which is well used and enjoyed by many. It protects the historic City of Oxford from over-development, and the government's promise and CDC's policy to protect it should be upheld.
PR-B-0231	Mr and Mrs	Nutbrown		General			Object to the proposed 4,400 new houses around Yarnton, Kidlington and Begbroke which will destroy the character of each village. The roads are already congested and schools and health services at capacity.
PR-B-0232	Mrs Marjorie	Kilby		General			Strongly object to the building of 4,000 houses in the fields around Kidlington and eroding the countryside. GP surgeries are already under pressure and traffic a problem. Kidlington would lose its identity as a separate community and be a much less pleasant place to live.
PR-B-0235	Bruce	Tremayne		General			With regards to the proposed location plans for areas A and B, Kidlington and the surrounding area. With the exception of sites PR22 and PR25, all 33 sites are in GB. CDC's 2015 plan, policy ESD14 aims to protect Oxford GB and prevent urban sprawl. GB is one of the most intelligent, farsighted and successful land management policies any nation has devised and must be maintained. It shelters wildlife, transpires oxygen, sequesters carbon and pollutants, grows food, provides space for walking and adds tranquillity to the landscape.
PR-B-0236	R	Hearn		General			Object to the proposed housing in Yarnton and the surrounding area. I recognise the need for affordable housing but Yarnton has incorporated 170 new houses in the last ten years. It has very few green spaces left and the school is having to be enlarged. The increase in traffic would be on roads that are in need of repair. The GB should be respected, this is a rural area.
PR-B-0237	J A	Burt		General			Strongly object to the building of 4,400 houses on GB to meet Oxford's needs, it is not sustainable. Traffic problems will increase, and schools and health services will be stretched. GB with walks and views will be lost, and natural habitats destroyed. Quality of life will suffer, with air, noise and light pollution increasing. GB is a permanent designation and the government's promise and CDC's policy to protect it should be upheld.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0239	Mrs P R	Buls		General			Object to new housing in Yarnton which has already had houses added to the outskirts. It will spoil this ancient village. We have seen the impact of construction traffic on Cassington Road when Wolvercote works were underway with damage to properties.
PR-B-0240	Mrs Carole	Walton		General			Why does CDC need to build this amount of homes when SODC have not agreed a quota. It would be better to spread the number of houses across some other villages so as not to destroy GB. Choosing Christmas as a consultation period has perhaps reduced the number of people who would of objected.
PR-B-0241	Richard	Walton		General			Why does CDC need to build this amount of homes when SODC have not agreed a quota. It would be better to spread the number of houses across some other villages so as not to destroy GB. Choosing Christmas as a consultation period has perhaps reduced the number of people who would of objected.
PR-B-0259	Andrew and Andrea	West		General			Wish to express concern over proposed plans within the parish of Begbroke. CDC adopted a plan in 2015 which was sensitive to GB so why under pressure from Oxford City has this changed? CDC should resist and plans rejected. Nearly 80% of county residents want GB retained and it goes against government advice. Development would remove GB, damage natural habitats and allow urban sprawl between Oxford and Woodstock. Levels of traffic on the A44, A34 and local roads would increase, as would pressure on the already struggling services. Schools are currently oversubscribed and health services struggling . Begbroke is a tiny village with 783 residents and plans would quadruple it's size. It would change beyond recognition, losing its character, identity and ancient, historical settings. The local scenery, walks and countryside we moved here for would go forever.
PR-B-0260	Chris	Pack		General			The consultation has been very poorly publicised, if were not for local groups in Kidlington raising awareness, many people would have been unaware. It was difficult to follow the consultation details on the website and hard to understand. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-0264	Prof Adrian and Mrs Pat	Sutton and White		General			Many of the options do little to meet the strategic aims, indeed they add to the exiting problems. The volume of traffic approaching Oxford form the north is heavy with delays. £9 million and 18 months of disruption refurbishing Cutteslowe and Wolvercote roundabouts have had little successful. Therefore increasing the population between Oxford and Kidlington will cause an unacceptable increase in traffic, and pollution. Although Oxford Parkway is a success, houses there will attract London commuters and affordable houses for people working in Oxford will not be met. Whilst we understand the need for more housing GB must be a last resort and paragraphs 79 and 81 of the NPPF adhered to. The design of any development must consider the impact on quality of life for both new and existing residents.
PR-B-0265	Susan	Ganter		General			Object to the proposed building of 4,400 new houses north of Oxford, these figures are unrealistically high and should be challenged by CDC. It is unsustainable, traffic problems would become worse and schools and health services would be overstretched. Walks and views would be lost, and natural habitats of local importance destroyed. Object strongly to development on GB which is well used and enjoyed by many. It protects the historic City of Oxford from over-development, and the government's promise and CDC's policy to protect it should be upheld.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0266	J M	Titchmarsh		General			The plan to build 4,400 houses in GB surrounding Kidlington, Yarnton and Begbroke opposes the purpose of GB. It is there to safeguard the countryside, historic towns and village and check urban sprawl. The need for more houses is not sufficient reason for destroying it. There is already traffic problems accessing Oxford from the north on the A34, A40 and A44, any building would add to this congestion, and Oxford City refuses to introduce congestion charges. The Rapid Transit Lines plan will not have the capacity to cope and doesn't pass through the areas around Kidlington. Any development is unlikely to solve the housing shortage as Oxford Parkway caters for London commuters and has increased house prices in the area. CDC should protect our interests as South Oxfordshire have done and press for Oxford City to export jobs into the county if it can't find homes within the city.
PR-B-0267	Carole	Pack		General			The consultation procedure was poorly publicised and where it not for local people raising awareness it would have been unknown. Kidlington despite being the area most affected was last to have the exhibition which was badly organised. The time to respond was very short and over the Christmas period when people were on holiday.
PR-B-0284	Marilyn	Marshall		General			Am concerned at the potential of 4,400 new homes in Kidlington and that this could be to justify the new station at Water Eaton and house London commuters. Kidlington has a need for affordable houses and so a large percentage of any new housing needs to be for our young people and families. Do not believe there is enough demand to justify the need to develop on GB. These places are wildlife habitats and for the enjoyment and health of residents. Kidlington is a special place for a large number of people and is being disregarded by developers.
PR-B-0285	Michael	De Selincourt		General			As there is not enough employment development planned in Kidlington, can only assume that the village is being used to some extent to house London commuters using Oxford Parkway. It would make sense to build at least some houses nearer employment areas in Cowley and Headington. The roads around Kidlington are already congested and this will only increase if Kidlington nearly doubles in size. There are many empty and derelict houses and wasted spaces within Oxford before we build on GB. Our countryside is important for the health and wellbeing of many, and crucial for our wildlife and children.
PR-B-0286	A	Mayes-Baker		General			Both options A and B involve the destruction of GB, an amenity that is important to residents of Kidlington and surrounding villages. GB is amongst other things supposed to protect over-urbanisation and the coalescence of individual communities. If CDC permits this development it is in breach of its own policies to protect it. The number of proposed house is disproportionate to existing numbers in Kidlington and would change the character of the present community and its surrounding villages. New houses should be positioned to the east and south of Oxford where employment is, and not the north where the infrastructure is saturated.
PR-B-0289	David	Wells		General			Object to the building of 4,400 houses at Begbroke, Yarnton and Kidlington as the villages will lose their identity and destroy the GB. The road infrastructure is not in place to cope with existing traffic and major improvements are needed. The ring road around Oxford at Cutteslowe park needs completing, widening of the A34 between M40 and M4, widening of A40 with slip roads taking traffic onto A34 before Wolvercote roundabout. Finally widening of dual carriage between Yarnton and Peartree roundabout. I believe any development should be north of the A34 until areas are used inside around Oxford Parkway station.
PR-B-0445	V	Truby		General			Object to the plans to build at Kidlington, Yarnton and Begbroke as additional traffic will increase pollution and congestion, particularly on the A44. School places are already limited and it is not clear from the plans where the site entrances will be, which is a concern.
PR-B-0446	M	Truby		General			Object to the plans to build at Kidlington, Yarnton and Begbroke as additional traffic will increase pollution and congestion, particularly on the A44. School places are already limited and it is not clear from the plans where the site entrances will be, which is a concern.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0447	Laura, John, Benito	Wainwright		General			Strong objection to build on precious GB surrounding Kidlington. GB is there to prevent expansion of towns and cities, providing valuable amenity for those in the cities. GB should be permanently protected from development as in section 9 of the National Planning Policy Framework. Oxford's Labour council may want GB to be developed if outside their own boundaries but Conservative Cherwell need to remember the Conservations government's 2015 election pledge to protect GB. Brownfield sites in Oxford City and Cherwell district have these been considered rather than destroy Kidlington's GB. Ref to para.3.7 of Cherwell D.C.'s Kidlington Framework Master Plan SPD, March 2016).
PR-B-0447	Laura, John, Benito	Wainwright		General			The countryside that extends from behind The Moors towards the River Cherwell is not only GB but also described in the Inspector's Report of 1991 as "an area of High Landscape Value". The area is enormous value to Kidlington's residents, with walking and exceptional views. The Oxfordshire Wildlife and Landscape Study declared these meadows and woodland to be national priority habitats for nature conservation. Protected habitats for badgers, the great crested newt and much more wildlife that would become in decline if their habitat were destroyed.
PR-B-0447	Laura, John, Benito	Wainwright		General			District Council is basing its housing needs and projections on the SHMA report. How can this be "objectively addressed needs", as the Council claims when the SHMA was produced by a team led by property consultants, with obvious close connections to the development sector. The figures are far in excess for the district and are widely regarded as grossly inflated.
PR-B-0447	Laura, John, Benito	Wainwright		General			Oxford's unmet housing need would be taken more seriously if Oxford City were not prioritising building business parks and employment led sites, such as 8,000 jobs at the Northern Gateway. Unemployment is not an issue in this area, so is there a need for the developments and putting pressure to Kidlington's GB to only satisfy Oxford's perceived housing needs. Kidlington's village character would be destroyed and a 70% increase to the population. The green gap between Kidlington and Oxford would be lost and become a suburb. Kidlington would merge with Yarnton and Begbroke in one urban sprawl.
PR-B-0447	Laura, John, Benito	Wainwright		General			Increase to population would give rise to infrastructure problems in Kidlington. Health service and schools are already stretched. Aggravated traffic problems do not bear thinking about, the traffic congestion is already an issue on the main roads through Cherwell. Kidlington's residential roads are used as "rat runs", with the increase in housing this would produce intolerable congestion on the roads and in the vicinity of any large housing development. A case for The Moors described in the Kidlington Framework Master Plan, "an attractive leafy street" (42.2, 4d) This would be destroyed by the large volume of traffic. Benmead Road would become a thoroughfare to connect The Moors to Banbury Road.
PR-B-0447	Laura, John, Benito	Wainwright		General			Appendix B of the Kidlington Framework Master Plan. Such sites land north to The Moors, Stratfield and Gosford Farm, have been mentioned as potential for housing development. This is out of the question, even if exceptional circumstances due to GB protection. It would be devastating to the residents of Kidlington if the countryside, wildlife, views and footpaths were destroyed. The lose of its village character and the threat to the rural environment. What value has GB if it can be ignored. The reasons that lay behind the establishment of GB in the 1947 Town and Country Planning Act, far from having been superseded by other factors in the intervening 60 years, are more valid than ever, given the relentless expansion of our towns and the urbanization of our countryside since then. Once rural land is built upon it is lost forever, we do not have that much of it, so it is our duty to preserve what we have for our descendants. CDC has always defended the inviolability of Kidlington's GB and it has a duty to Kidlington's residents to continue to do so if their environment is not to be irredeemably ruined.
PR-B-0478	B	Seymour		General			This rep contained a map provided by Kidlington Development Watch which has an area of objection marked.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0627	Charles	Isles		General			Object as 4,400 homes is not an appropriate requirement and unrealistically high. Local infrastructure and services are already stretched, in particular schools and the health services. GB which is enjoyed by many for its walks and views will be sacrificed. It's habitats are of great local importance and it protects the historic city of Oxford from overdevelopment. The government's promise and Cherwell's policy to protect GB should be upheld.
PR-B-0628	Anna	Isles		General			Object as 4,400 homes is not an appropriate requirement and unrealistically high. Local infrastructure and services are already stretched, in particular schools and the health services. GB which is enjoyed by many for its walks and views will be sacrificed. It's habitats are of great local importance and it protects the historic city of Oxford from overdevelopment. The government's promise and Cherwell's policy to protect GB should be upheld.
PR-B-0634	Graham	Hillsdon		General			Object as 4,400 homes is not an appropriate requirement and unrealistically high. Local infrastructure and services are already stretched, in particular schools and the health services. GB which is enjoyed by many for its walks and views will be sacrificed. It's habitats are of great local importance and it protects the historic city of Oxford from overdevelopment. The government's promise and Cherwell's policy to protect GB should be upheld.
PR-B-0635	Julie	Hillsdon		General			Object as 4,400 homes is not an appropriate requirement and unrealistically high. Local infrastructure and services are already stretched, in particular schools and the health services. GB which is enjoyed by many for its walks and views will be sacrificed. It's habitats are of great local importance and it protects the historic city of Oxford from overdevelopment. The government's promise and Cherwell's policy to protect GB should be upheld.
PR-B-0637	Prof Martin LG	Oldfield		General			Object strongly to the proposals and the inadequate publicity and consultation period. The local infrastructure is already at breaking point with congested roads and schools and GP's oversubscribed. Oxford city has approved many Science Parks without planning to house workers, and so should now explore brownfield sites within the city. Much of the proposed housing would be used by London commuters using Oxford Parkway. The GB is open beautiful countryside, enjoyed by many and CDC is committed to defend it. It should not be destroyed.
PR-B-0638	HA	Downie		General			Wish to protest strongly to the proposal to build on GB north of Oxford. Begbroke, Kidlington and Yarnton would merge together and lose their separate identities and GB is intended to stop this urban sprawl. A lot of the land is agricultural and certainly around Begbroke used to grow crops. Traffic conditions are already bad and local services under pressure. Am particularly concerned about flooding as some residents in Begbroke have flooding problems.
PR-B-0639	Diane	Downie		General			Wish to protest strongly to the proposal to build on GB north of Oxford. Begbroke, Kidlington and Yarnton would merge together and lose their separate identities and GB is intended to stop this urban sprawl. A lot of the land is agricultural and certainly around Begbroke used to grow crops. Traffic conditions are already bad and local services under pressure. Particularly concerned about flooding as some residents in Begbroke have flooding problems.
PR-B-0640	Walter E	Game		General			Whilst agreeing there is a necessity for some housing, feel 4,400 on GB land around Kidlington is unrealistic and unsustainable. This number would impact greatly on the infrastructure and change the character of the area. Alarmed that some of the areas of search are within the "green lungs" so vital to the health and well-being of residents and any future ones. The GB is a precious amenity where nature flourishes and has always been part of your policy in the Cherwell Local Plan, and successive governments to protect it.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0645	Stephanie	White		General			Do not object on principle to development as realise new houses are needed. However strongly object to the scale of the proposal that would increase Oxford sprawl and swallow the villages of Yarnton, Begbroke and Kidlington, along with their identities. Current circumstances are not exceptional to justify building on GB as stated in Government policy. Councils should use their local plan drawing on NPPF protection to safeguard the green lungs. Footpaths, some of which have historical significance are used by a huge number of people and offer beautiful views. The area is a haven for wildlife and the risk of flooding will increase. The roads are already congested around Oxford and extensive roadwork's to the north have done little to improve the situation. Many bus routes have been discontinued, cycle lanes are in poor condition and the planned garden village at Eynsham will increase traffic and pollution. There is a lack of affordable houses within the proposals and it is likely that London commuters will buy the houses given the proximity of Oxford Parkway. It would be better to increase designated key worker houses within Oxford city.
PR-B-0646	Ruth M	Sargent		General			Strongly object to the proposed building of 4,400 houses on GB around Yarnton, Begbroke and Kidlington in additional to those in the Cherwell 2015 plan. There would be unacceptable destruction of GB with its walks, scenery and wildlife habitats. The ancient villages of Begbroke and Yarnton both mentioned in the Domesday Book, would lose their identities as they become one urban sprawl with Kidlington. Pressure will increase on local infrastructure including schools and GP surgeries, and there will be a greater risk of flooding. There will be little provision of affordable houses as we become a dormitory town for London commuters. Do not feel there was a proper consultation as residents were not informed of the plans by CDC.
PR-B-0647	Prof IL	Sargent		General			Strongly object to the proposed building of 4,400 houses on GB around Yarnton, Begbroke and Kidlington in additional to those in the Cherwell 2015 plan. There would be unacceptable destruction of GB with its walks, scenery and wildlife habitats. The ancient villages of Begbroke and Yarnton both mentioned in the Domesday Book, would lose their identities as they become one urban sprawl with Kidlington. Pressure will increase on local infrastructure including schools and GP surgeries, and there will be a greater risk of flooding. There will be little provision of affordable houses as we become a dormitory town for London commuters. Do not feel there was a proper consultation as residents were not informed of the plans by CDC.
PR-B-0648	Patricia	Perisi		General			Have lived in Kidlington for nearly 80 years. Object strongly to the proposed development of 4400 new houses in the Green Belt. Green Belt should be protected forever. The development will destroy the countryside, wildlife, dog walking routes and will bring chaos to the area. Traffic is horrendous. Surgery is always full. Will never agree that Kidlington will join Oxford and lose it's unique character.
PR-B-0651	JL	Hall		General			Concerned over the proposed plans to build in Kidlington. It seems to be a far larger number than the infrastructure, schools, doctors and roads can cope with. My property borders one of the GB areas where there are two ponds, and the pond at Croxford Gardens when surveyed was found to contain great crested newts. An area such as this should be protected in line with the law.
PR-B-0655	Christina Mary	Shirley		General			Don't want urban sprawl and all it entails
PR-B-0656	Mary G	Shirley		General			Villages should be kept as villages and not merged. We do not need more flooded areas, or more cars.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0658	Susan	Oldfield		General			CDC already has a plan and pressure from Oxford City to alter this will destroy GB, a loss for Oxford and locals, desired by neither. CDC needs to resist pressure as South Oxfordshire has done. Object strongly to building around Kidlington, Yarnton and Begbroke destroying their identities and the green space and GB around them. GB exists to protect villages from urban sprawl and provide space to breathe. Much of the land is agricultural and at Begbroke produces sustainable energy. The proposed figures are questionable and any housing is likely to be bought by London commuters anyway. Infrastructure is already struggling with congested roads and schools and health services at capacity. Flooding would increase.
PR-B-0659	P K	Cove		General			Object to the plans to build houses on the GB around Begbroke and Yarnton. Oxford has over 4000 unoccupied properties and 2000 homes are already being built around us, therefore there is no justification to build on GB. This land is used by many for walks, history and enjoyment. The roads are already congested and health services stretched, CDC needs to attend to the needs of the existing communities first. Any development would create a dormitory town for London commuters using Oxford Parkway.
PR-B-0660	Denise	Mckillop		General			Object to the new proposed development around Yarnton, Begbroke and Kidlington and building on GB which goes against CDC's 2015 policy. Informed that there are 4,400 empty properties in Oxford so there are no exceptional circumstances. Any building is unlikely to benefit the local community as new residents would probably be London commuters. The spirit and identity of Yarnton village and its history would be lost as it would become one urban sprawl joining Oxford and Woodstock. There are existing congestion and parking problems at Rutten Lane primary school with conflict between residents and drivers, the infrastructure cannot cope with any further increase in population. Medical services are also stretched.
PR-B-0663	K D	Liversage		General			Dismayed at the plans by CDC to promote the development of land around Kidlington, much of which is on GB. It would destroy the identity of the village as it would merge with Yarnton, Begbroke and Oxford and have adverse effects on services.
PR-B-0664	Maxine	House		General			Dismayed at the plans by CDC to promote the development of land around Kidlington, much of which is on GB. It would destroy the identity of the village as it would merge with Yarnton, Begbroke and Oxford and have adverse effects on services.
PR-B-0665	M	Thorne		General			Dismayed at the plans by CDC to promote the development of land around Kidlington, much of which is on GB. It would destroy the identity of the village as it would merge with Yarnton, Begbroke and Oxford and have adverse effects on services.
PR-B-0666	Ann	Chandler		General			Dismayed at the plans by CDC to promote the development of land around Kidlington, much of which is on GB. It would destroy the identity of the village as it would merge with Yarnton, Begbroke and Oxford and have adverse effects on services.
PR-B-0667	Mrs P	Webb		General			Dismayed at the plans by CDC to promote the development of land around Kidlington, much of which is on GB. It would destroy the identity of the village as it would merge with Yarnton, Begbroke and Oxford and have adverse effects on services.
PR-B-0668	BJ and W	Bower		General			Dismayed at the plans by CDC to promote the development of land around Kidlington, much of which is on GB. It would destroy the identity of the village as it would merge with Yarnton, Begbroke and Oxford and have adverse effects on services.
PR-B-0669	John and Marion	Dennis		General			Strongly object to the proposal to build so many new houses at Kidlington. Some of these new and disproportionately large developments appear to back close to the retirement properties in The Moors. This would mean a loss of habitat for wild deer and give a hemmed in appearance for the residents of Moorside Place.
PR-B-0672	Grace MM	Kurn		General			Dismayed at the plans by CDC to promote the development of land around Kidlington, much of which is on GB. It would destroy the identity of the village as it would merge with Yarnton, Begbroke and Oxford and have adverse effects on services.
PR-B-0674	Rita E	Ahern		General			Object to the plans to destroy the GB between Yarnton and Oxford, moved to Yarnton to enjoy the peace and beauty of the countryside. More time must be given to consider other options and consult on this, before losing this environmentally valuable area.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0675	Elaine	Titchmarsh		General			Object to the building of houses around Kidlington, Yarnton and Begbroke to meet Oxford's needs. Don't believe there are exceptional circumstances to release GB on this scale, and thought CDC supported its protection. The disturbing and non-reversible loss of fields, plants and animals will deprive people of walks and nature. Parkland, golf courses and open land within the city should be considered for development and housing should take priority over building places of work. Chose to live in the village of Yarnton rather than an urban environment and the proposals will merge Yarnton, Begbroke and Kidlington into an urban sprawl losing their identities and character. More housing will put pressure on local infrastructure, health services and schools, local roads are already busy. Any development near Oxford Parkway is likely to attract London Commuters rather than Oxford city workers.
PR-B-0676	John F	Morris		General			The decision to hold the public exhibition in Kidlington was poorly timed and not easy to follow. There are so many sites and justification for the numbers was unclear.
PR-B-0677	Lesley E	Sims		General			Object to the way Kidlington is being treated by Oxford in their bid to expand enterprise without incurring costs, sharing benefits and with disregard for the GB. Building houses on GB close to Oxford Parkway brings in London commuters so will not provide affordable housing for Oxfordshire. It will only make money for landowners and developers. Investment in Park and Ride has reduced rural bus services, they should be sited further out to reduce congestion and serve the people who can't afford to live within the city. Oxford should consider using grants to relocate large employers to places like Bicester rather than turn villages into dormitories which is not acceptable. There is a need for affordable housing to the east of the city to serve the hospital, building on the GB in the Kidlington gap is on the wrong side of the city. Object to development around beautiful Spring Hill and on the valued walks between Mill End and Thrupp.
PR-B-0677	Lesley E	Sims		General			There was no consultation prior to the frantic scramble over Christmas for a closing date of 9th January. This does not promote trust in an open debate. CDC had its plan and Oxford City Council now appears to be putting pressure to help deliver while rejecting plans within its own boundaries.
PR-B-0678	Mrs H G	Kibby		General			The proposal to develop in GB is based on incorrect assumptions about job growth in Oxford. Previously developed land and proposed employment sites within Oxford, along with brownfield sites like the cement works at Shipton should be considered. It is not reasonable to use GB that is there to protect villages and towns from sprawl. Traffic is already a problem on the A44, A34 and A4260 and congestion, noise and pollution which affects health, will increase. Is there a plan for extra infrastructure as schools and GP surgeries are only just coping. What type of housing is being proposed as there is a need for affordable and smaller housing. Would the many footpaths, used by many and with a right of way, be protected.
PR-B-0682	Felicity	Peacock		General			The consultation has been poorly publicised and CDC should have raised awareness to the possible loss of GB. The consultation details were difficult to find on the website, were long and difficult to read, and holding the public exhibition over the Christmas period was unreasonable.
PR-B-0683	Robert	Perry		General			Object to 4,400 new houses being built around Kidlington, Yarnton and Begbroke as they are in addition to those already planned by CDC to meet its own needs. It will destroy the GB around the villages which in 2015 CDC promised to uphold. Brownfield sites in Oxford need to be considered before GB. Flooding has already occurred in the three villages due to building on the flood plain. If development goes ahead will CDC and developers be prepared to compensate new and existing homeowners in the event of flooding. Full consideration needs to be given to the amount of infrastructure required i.e. schools and health services which would not cope. The development is unlikely to solve housing needs as they would be bought by London commuters. This will inevitably cause more traffic problems on the A34, and A40. Kidlington, Yarnton and Begbroke will lose their identities, ancient points of interest and history as well as walks and scenery.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0684	Rosemary A	Phelps		General			Strongly object to building 4,400 houses in Kidlington, Yarnton and Begbroke. It would be unforgivable to destroy GB which is necessary to prevent urban sprawl and protect wildlife already in decline. It would remove forever a space to have exercise, fresh air, peace and pleasure. Each village has an identity and history which would be lost. Traffic is already heavy and schools and doctors surgeries at capacity. In wet weather water pours down Spring Hill resulting in flooding near the roundabout which would get worse.
PR-B-0685	Peter G	Phelps		General			Completely opposed to the infringement of the GB around Kidlington, Yarnton and Begbroke and Oxford City's pressure. It seems that local politics and vested interests are the predominant factors. What has happened to the government's plan to expand and develop the North of England?
PR-B-0686	Chris H	Adams		General			Object to the proposals to build 4,400 houses on various sites around Kidlington. Am concerned that there is no mention of the harm to the purposes of GB and that it is a permanent designation. There is no assessment of the impact on Kidlington only Cherwell and Oxford. Traffic congestion and air pollution would increase.
PR-B-0688	Barbara	Perry		General			Object to 4,400 new houses being built around Kidlington, Yarnton and Begbroke as they are in addition to those already planned by CDC to meet its own needs. It will destroy the GB around the villages which in 2015 CDC promised to uphold. Brownfield sites in Oxford need to be considered before GB. Flooding has already occurred in the three villages due to building on the flood plain. If development goes ahead will CDC and developers be prepared to compensate new and existing homeowners in the event of flooding. Full consideration needs to be given to the amount of infrastructure required i.e. schools and health services which would not cope. The development is unlikely to solve housing needs as they would be bought by London commuters. This will inevitably cause more traffic problems on the A34, and A40. Kidlington, Yarnton and Begbroke will lose their identities, ancient points of interest and history as well as walks, and scenery.
PR-B-0689	Bernard E	Braley		General			It is morally wrong and contrary to government policy to build on GB in Kidlington. The development will be unsustainable unless great care is taken in the planning of roads, schools, health services, water and power. The development which presently threatens the character of Kidlington should not take place.
PR-B-0695	Mark	Bale		General			It is widely recognised that the south of England, particularly the Thames Valley is extremely crowded and the traffic heavy. Therefore object to the massive scale of the proposed development.
PR-B-0699	Andrew	Clark		General			Object to the any further development in North Oxford particularly around Yarnton. The infrastructure isn't sufficient to cope with an increase in traffic, even with recent renovations to Cutteslowe and Wolvercote roundabouts. Much of the predicted job growth is in the south more traffic travelling north to south will increase pollution and decrease safety. GB is meant to be protected, it allows wildlife to thrive and move, and stops urban sprawl so villages don't lose their identity. The government should look at brownfield sites as they are doing elsewhere in the country.
PR-B-0701	Ray and Janet	Phipps		General			Already lost large portion of parish to Longford Park and 2 further approved developments at Blossom Fields. Bodicote already had its quota of housing, therefore should not be expected to satisfy Oxford's unmet housing needs. Existing developments need time to establish, and the communities cohesion is important and is threatened by continual new developments.
PR-B-0702	Nigel	Clark		General			Objection to the proposed 4,400 new houses in North Oxford in particular to the existing GB land around Yarnton. Oxford housing targets are based on speculation and discredited analysis. City Council need to look at existing areas and vacant properties within the City.
PR-B-0702	Nigel	Clark		General			More houses would increased the number of cars onto the already congested roads around North Oxford. It takes me up to an hour to get to Oxford when using my car. Cycling is dangerous on these roads, have been knocked off bicycle, which ended up with a trip to A and E. More traffic increases danger on our roads and adds to air pollution.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0702	Nigel	Clark		General			This area and other areas in North Oxford should be protected, as this is not exceptional circumstances to assume that housing is needed. Empty houses in Oxfordshire need to be used first. Job growth in Oxfordshire, if this is the case, the jobs need to go to people in the area so that they do not move away, other wise the houses will be brought by commuters. Removal of GB is wholly not acceptable and provides no benefits. It's CDC policy and duty to protect the GB.
PR-B-0704	J	Kershaw	Wright Hassall Solicitors LLP on behalf of Mr J Kershaw	General			Criticism of the consultation period. It was not advertised well enough at the start. Kidlington exhibition did not take place until 19 December which was very late in the day and left insufficient time to respond with sufficient detail.
PR-B-0707	Susan	Blackshaw		General			Objection to the proposal for large scale of housing. Concerned for Begbroke, Yarnton and the Kidlington area. Would all agree that affordable housing is need, the numbers being considered would blast this area so greatly, that it will be turned into a metropolis [sic]. Contest statements about job and economy growth. Oppose the plan, as it adds extra pressure on already overstretched local infrastructure, schools and health services. Congestion sprawl, which could end up servicing London's housing needs. Gross affectation of the rural countryside and the loss of GB.
PR-B-0708	Robin Stafford	Allen		General			Long time resident of Weston on the Green, views on the development sites around Weston, Wendlebury and Heathfield. Housing needs to be affordable and located where employment is a priority. Oxford is an historic city, which attracts tourists and brings in revenue. The development in green areas will detract from the city. Good planning to preserve villages identity like Weston which is close to the city as detailed in the Neighbourhood Plan which was submitted to CDC.
PR-B-0708	Robin Stafford	Allen		General			In particular large developments on the edge of villages will destroy their individual character. There is a requirement for appropriate infrastructure; transport, medical facilities, schools, Weston on the Green has none of these. Traffic in and around Oxford is an issue, as the roads into Oxford are already overcrowded. Weston on the Green is used as a "rat run" due to daily traffic issues on the A34 and M40. Development will increase the traffic on the B430 and between Weston and Bletchingdon.
PR-B-0709	Dr E J	Williamson		General			It seems that most of the 4,400 homes that Cherwell has been asked to provide are proposed to be built on the GB between Oxford and Kidlington. The GB was set up to prevent the urban sprawl of Oxford City and protect the smaller out - lying communities from being absorbed in to the city. The GB is protected by law and can only be released in 'exceptional circumstances'. Do not regard this as an exceptional circumstance.
PR-B-0709	Dr E J	Williamson		General			Kidlington has been chosen as being near to Oxford. However, since the new Oxford Parkway station opened house prices in North Oxford and Kidlington have soared. Oxford wants 'affordable housing'. With easy access to London new houses will be sought by London commuters as well as people who work in Oxford. 4,400 houses would nearly double the size of Kidlington. This will put an enormous strain on schools, health services, and transport.
PR-B-0722	A	Mayes-Baker		General			The number of new homes proposed is disproportionate with the existing number in Kidlington. Such development would change the character and community. The impact on surrounding and smaller village communities presents rape of the GB. GB supposed to be protected against over-urbanisation and coalescence. If permitted CDC are in breach of their own policies. Adverse effects to surface water and flooding. If required to support employment growth in Oxford City, who has control to keep it local. Do not build on the North of the city were infrastructure is already saturated.
PR-B-0725	Andrew	Cove		General			Object strongly to build houses around Begbroke and Yarnton. The land is GB used and enjoyed by locals who live and have moved to this area to enjoy the environment and discover the ancient history. This will be lost forever and become part of the urban sprawl and a suburb to Oxford, it is not acceptable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0728	Verity	Westgate		General			Criticism regarding publicity and that Cherwell should have done more. Difficult to find the consultation details and the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-0731	Ioana	Davies		General			Criticism on the timing and poor publicity especially Kidlington's before the Christmas period. The Cherwell Link magazine provided a cursory mention of the proposals. Criticism on how the local plan was written and if you do not have the internet it's hard to access the information, preventing all of the community being involved.
PR-B-0732	Tony	Lowe		General			Studied potential sites in and around Deddington, only estimate this number to be 1,500+. Who will purchase these and where will they come from, certainly not young local families? How will the primary school and health centre cope with the increased population? Strain on the infrastructure, roads, parking etc. Tip of the iceberg, other areas alongside Hempton Road being potential.
PR-B-0734	David A	Homer		General			Residents for 34 years in Begbroke, chose to live here for its peace and quiet. The GB needs to be retained as villages need their own identity to prevent urban sprawl and to protect the rural way of life. Roads leading into Oxford would become congested effecting the local communities like Begbroke and Yarnton. Adding 4,400 houses increase cars on the road, this is not allowed to happen. Developers will promise new schools and doctors surgeries. Do not allow Oxford City dictate to CDC where to build.
PR-B-0736	Kieran	Ward		General			Criticism on the timing and poorly publicised consultations, especially Kidlington's before Christmas. The Cherwell Link magazine hid the information and didn't provide the scale of the proposal's. Appalling that CDC think it can push through the consultation in such a rapid timescale.
PR-B-0737	Paul	Clarke		General			In general do not agree with the disproportionate proposal outside of Oxford. The "Oxford Context" doesn't provide an explanation to why the City has a small contribution and placing a burden on rural areas of Oxfordshire. Has Oxford considered flats and identified sites as part of their development, an example of which is Abbey Road. Oxford City needs to press for smaller, affordable housing and take on a greater proportion of the required development
PR-B-0738	Martin	Smail		General			Highly concerned Cherwell being asked to consider more housing, after already catering for 22,840 on the Local Plan. Banbury's existing infrastructure unable to cope, Oxfords unmet need should be considered elsewhere.
PR-B-0739	G	Gelder		General			Criticism regarding publicity and that Cherwell should of done more. Difficult to find the consultation details and the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-0741	Jane	Jackson		General			Objections to large number of houses considered in Begbroke, Yarnton and Kidlington. Congestion already on the roads. The villages would change, losing their historic character and identity by becoming a suburb of Oxford. Great loss and damage to the countryside. Added pressure on schools and the health service. Area can not cope, please do not build near Begbroke.
PR-B-0742	Keith and Hilary	Prince		General			Criticism on the presentation of the proposals. A very lengthy document that was hard to interpret within the consultation timeframe which was over the Christmas period was totally unreasonable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0744	Geoff	Herbert		General			Additional housing will mean more cars using the roads without any modifications to existing roads. Concerns regarding cheap housing and landlords buying these. Problems currently in Oxford are: Overcrowding, parking issues due to the lack of control on houses of multiple occupation. Poor levels of maintenance to the houses which lead to whole areas looking run down. Will there be any limits on allowing H.M.O's in any of the new housing? Will any of the new housing be dedicated for older residents, or social housing? Will schools and health services be able to cope with the increased capacity. Business need to locate northwards where already large number of houses built that are unoccupied.
PR-B-0747	George A	Doucas		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. All the roads around Oxford are already congested. Infrastructure development must come before any building.
PR-B-0748	Marcus	Bunning		General			Objections to the proposal, concerns with extra traffic on the already existing roads. Lack of infrastructure. Schools not having enough space and becoming overstretched. A shortage of doctors and appointments. Urban sprawl.
PR-B-0750	Niels	van Kuijk		General			Criticism regarding publicity and that Cherwell should of done more. Difficult to find the consultation details and the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-0752	Keeley	Middleditch		General			Criticism regarding publicity and that CDC should have done more. Difficult to find the consultation details and the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-0753	Laura	Claridge		General			Long time resident of Yarnton and strongly object to the building of 4,400 homes in the Yarnton, Begbroke and Kidlington area. Already dire traffic in Oxfordshire namely around Peartree and Kidlington roundabout. Long waiting times for a appointments with doctors. Schools can not cope as it is as seen with the Cresswell Close and Hayday Close developments. These issues need to be resolved before any consideration into building 4,400 houses. Keep Yarnton and Begbroke the small and peaceful villages as they have always been.
PR-B-0754	Philippa Jane	Nelson		General			Consultation papers difficult to find and the documentation is very long and difficult. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-0757	Martin	Palmer		General			Criticism regarding the poorly advertised proposals along with the timeline of lodging the objections not being ideal as over the Christmas period.
PR-B-0760	Dr K N	Robinson		General			Criticism regarding the documents and the consultation held in Cutteslowe Park in December. Support a carefully planned and diffused housing development across Cherwell, however do not support the partial review.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0760	Dr K N	Robinson		General			Unmet housing figure is based on far too many assumptions regarding strong economic growth due to decision to leave the EU, the figure needs to be reduced. Suggestions that increased housing will be due to increased employment, not the approach to be taken. Affordable housing needs to be clarified due to the prevailing housing market in Oxford. New homes occupied by London commuters. No restriction to the dwellings per site, as higher development may be desired in other areas. Unacceptable to build on GB, brownfield sites within Oxford City require utilisation first. Concerns to flooding risk. Kidlington will come under strain, roads at capacity, rail link does not serve employment areas. Explanation to these areas needed.
PR-B-0761	Nick	Trendell		General			The whole area will become yet another "estate" and have not moved to the area to suffer this. Schools etc. will not be able to cope.
PR-B-0763	Giles and Rachel	Woodforde		General			A total ban on further housing in Kidlington is reasonable. Smaller infill sites could be designed with not having a significant impact on the GB. The necessary additions to transport and support services which needn't be prohibitively expensive. Proportionate development of this sort could be positive for local shops. However attempts by Oxford City to build over the GB separating Oxford and Kidlington should be resisted. Do not want to become a suburb like Headington, like to be separate.
PR-B-0763	Giles and Rachel	Woodforde		General			Refers to current proposals and the earlier Kidlington development plan prepared by Alan Baxter Associates. A site north of The Moors is listed in the current proposal but not ruled out in the Alan Baxter document. In general CDC seriously failing with its obligations to Kidlington's council taxpayers, over this matter as to not questioning Oxford's demands over this matter.
PR-B-0766		Hutchinson		General			Kidlington does not have the infrastructure to cope with extra houses, people and cars. Still waiting for shops and a new school that was promised with the building of Groveland's. Struggle even now with doctors, schools etc. 4,400 new houses means the same amount of extra cars on the roads. Has anyone from the council tried to get to work, school or the hospital on the A34 in the rush hour, or when there are road works or an accident?
PR-B-0767	Sian	Robbins	Kilner Planning	General			Objection to build up to 4,400 new dwellings on the GB and land in and around Kidlington. GB north of Oxford a valuable function over the last 50 years. GB put in place to prevent urban sprawl and the coalescence of settlements. These objectives continue to be valid, there is no justification to set them aside. The area is well used and valued by residents in Oxford and surrounding villages. It would be deeply damaging to merge Kidlington and Oxford into one large urban sprawl and to lose the attractive local landscape and valuable wildlife and local habitats.
PR-B-0767	Sian	Robbins	Kilner Planning	General			Infrastructure and services in and around Oxford already under great strain and beyond capacity. Along with schools, healthcare, hospitals and roads. No capacity for this development and the proposed developments are unacceptable.
PR-B-0768	Jane	Leech		General			Objections to development of GB affecting Kidlington, Yarnton, Begbroke, Bladon and Woodstock. Creation of huge urbanisation of these villages, which would merge into one and lose their village identities which have existed for hundreds of years. GB is there to prevent this scenario. GB should be preserved and not eroded, to protect the beautiful and historic City of Oxford. Developments will destroy the countryside forever.
PR-B-0768	Jane	Leech		General			Concerns with severely congested roads into Oxford and the proposed link road from the A40 to A34 may help with the A40 congestion but moves the problem to Yarnton and Kidlington. Increased number of cars on the roads is madness. Concerns over the air quality in Oxford during the summer months, this should not be exacerbated, people's health will be adversely affected.
PR-B-0768	Jane	Leech		General			Local services will be stretched beyond their original capacity. GP surgeries would not be able to cope with the extra residents. They are already overstretched, and how the John Radcliffe, and the Churchill will cope is questionable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0771	Mr G R and Mrs J E	Thompson		General			Objection to building 4,400 houses in Kidlington, Begbroke and Yarnton areas. Criticism regarding the notice given for the meeting in Kidlington. Concerns to increased doctor waiting times and that Kidlington only has one dentist. Manic roads around Kidlington at school times and already a badly maintained infrastructure. Schools not being able to cope with extra children. Survey in the past shows, if all the house that are not lived in were repaired then there's no need for new houses to be built. Why should Oxford be able to say that Kidlington have to have the over spill here. We don't want to be a town as this will mean more expense for the local government to spend on the unnecessary expense of having this when it could be spent on better infrastructure.
PR-B-0772	Roger	Howes		General			Objection to the proposal. Kidlington is a village, consideration needs to be taken with proposals to keep it in line as a village and not a town. The figure needs to be remodelled as it was calculated when in the EU. The decision to build these houses was made some time ago without the consent of Kidlington's residents. Building on the Co-op car park is crazy if the proposals go through.
PR-B-0772	Roger	Howes		General			No requirement for industry in Oxford and Kidlington. Building on Peartree Park and Ride is not required, this would attract people to come looking for housing. If built upon it would push the Park and Ride further with the City boundary moving. Always was sceptical about the reasons for calling Kidlington railway station "Oxford Parkway" and Kidlington Airport "Oxford, London Airport" now know why, boundary changes.
PR-B-0772	Roger	Howes		General			The A40 is already at full capacity, with unfortunate fatal and large accidents. Traffic congestion and queues are normal. Many people leave the A34 southbound into Kidlington. Issues with the rush hour traffic into Oxford even with the new Banbury Road roundabout. Difficult to get to the JR2 now, will be worse with new housing at Barton. Increased pollution with the amount of standing traffic. Parking is a premium in Kidlington
PR-B-0772	Roger	Howes		General			Extra strain on hospitals, doctors, schools etc. No places in Kidlington for more dental patients. Kidlington residents have the right to quality of life, this needs to be considered with the proposed monumental change to our lives.
PR-B-0772	Roger	Howes		General			Already built 1,000's of houses on the GB which is there to prevent urban sprawl, GB land is used for relaxing walks as no parks. Houses are required for the young but not on this scale. The charm and beauty of these towns is being destroyed creating traffic congestion and over population. The meeting at Exeter Hall showed the residents of Kidlington's concerns. Building this amount of "not needed" housing is something that is irreversible and will have long lasting effects on our village its people and that of the surrounding villages.
PR-B-0773	Annabelle	Cummings		General			Objections to building 4,400 houses around Begbroke. GB land needs to be preserved, it's vital for the environment, bio-diversity and the well-being of people. Begbroke is a small village, if the building goes ahead it will become a small town and lose its unique character. Parts of this village are very old and have historic significance. Flooding is a concern with Rowel Brook and Springhill Road building in these areas will make the situation worse. Roads are already busy and building these houses will overload these roads. Schools and doctor surgeries are already overstretched.
PR-B-0775	Yasmin	Ramzan		General			Objection to building of 4,400 houses in Kidlington. We have lived here for 14 years and have seen how much the village has already changed and grown in that time. Building these houses at Kidlington we will have further issues and the character of the village will be lost forever. Traffic will only get worse, sacrificing our countryside and walks will have a detrimental effect on the nature and wildlife in the area.
PR-B-0776	Anthony	East		General			Criticism on how the consultation has been published. Difficult to find the consultation details on line. The consultation papers are long and difficult. Council does have discretion on the timing of a public consultation. Choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0777	Mark	Longworth	Ambrosden Parish Council	General			The development capacity of St David's Barracks and the MOD staff housing at Ambrosden, totalling 270 houses, should be taken into consideration in producing local plan review as this land and existing houses will become available for development within the timescale of the local plan up to 2031.
PR-B-0778	Alan	Brown		General			Criticism regarding publicity and that Cherwell should have done more. Difficult to find the consultation details on the website difficult to navigate. Council has discretion on the timing, and choosing to hold the consultation and over the Christmas period is not reasonable along with the length of time given to respond.
PR-B-0780	Paula	Hastings		General			Views regarding the development on GB around Begbroke, Yarnton, Kidlington and Woodstock. Countryside already given up, the Government is pushing for the use of GB land. GB policy for controlling urban growth also preventing urban sprawl and keeping land permanently open. This proposal is clearly going against this. Health and wellbeing of the population its important to keeping green open spaces available. Increasing urbanisation on green belts there will be more pressure on Oxford City to protect its conservation areas. Local wildlife and their habitats will be lost, they are being pushed into smaller areas. No consideration to field boundaries and hedgerows which are essential for the protected species like the door mice.
PR-B-0780	Paula	Hastings		General			Development will merge Begbroke, Yarnton and Kidlington into one MASSIVE development, causing MAJOR strain on the local services, schools and healthcare. Local roads will basically be at standstill during rush hours and public transport will struggle to cope. Local GPs are already struggling to cope with the demand around here which will cause more problems. Concerns regarding parking which is also a problem when going to the local shops etc. 4,400 new homes with a minimum of one car at each will cause the surrounding areas to be affected also. Villages will lose their character and identity becoming one big complex which is a great shame.
PR-B-0781	Lindsay	Gregory		General			Overriding your own local plan with reference to GB, who benefits from building on GB. Added pressure to schools and health services who are struggling now. Roads currently can not cope, they will become gridlock from 06:30. What about the clean air carbon footprint policy. Lose our character and become one urban sprawl with the joining of Oxford to Woodstock. Cherwell has to throw out these plans.
PR-B-0782	Andrew and Emma	Mundy		General			CDC has agreed to protect the GB, this policy completely defies your promise. Roads around Kidlington, Yarnton and Begbroke overused already at peak times , increasing houses would make the situation intolerable. Love my rural setting, building these houses would lose our village identities forever. Schools, doctors and dentists already overstretched adding to this would be chaotic.
PR-B-0784	Rosie	Cotterill	Turley on behalf of Bovis Homes	General			Overall it is considered that at a strategic level the unmet need of Oxford City (22,000 homes) is not being fully met, and even the level identified to be provided (15,000) will not be met as the apportionment has not been agreed by all parties within the HMA. The level of housing to be provided in Cherwell is therefore not considered to be sufficient and additional housing should be provided. Alternatively a mechanism should be put in place within the Plan to allow for it to be reviewed should additional housing needs in the HMA be identified.
PR-B-0784	Rosie	Cotterill	Turley on behalf of Bovis Homes	General			With regard to the growth location 'options' it would appear that the Council have already selected their preferred options based predominantly on two interim evidence base documents. The Council should not preclude the findings of their own future evidence base and assessment work in determining the best locations for growth. The Council should first look to allocate non-GB sites over GB sites and should not overlook the requirement for 'exceptional circumstances' to be demonstrated in order for GB boundaries to be revised

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0784	Rosie	Cotterill	Turley on behalf of Bovis Homes	General			A holistic approach to identifying suitable growth locations should be taken, considering both the sustainability and suitability of the proposed locations to accommodate growth in accordance with the Council's own spatial strategy, as well as impacts on GB and harm associated with locating large scale growth within it.
PR-B-0784	Rosie	Cotterill	Turley on behalf of Bovis Homes	General			The Council should reconsider the opportunities to locate additional growth in Banbury. A location which is proven to be sustainable through the Council's own spatial strategy and a location which is well connected to Oxford via public transport.
PR-B-0784	Rosie	Cotterill	Turley on behalf of Bovis Homes	General			The Council should ensure that they incorporate any housing requirement numbers for Oxford in to their overall requirements and should not 'ring fence' Oxford's numbers for the purpose of calculating 5 year housing land supply. The Council should also ensure that the monitoring of housing land supply commences at the point of adoption of the Plan. The LPPR will not be found 'sound' if the Council are unable to demonstrate a 5 year supply of housing land at the point of adoption.
PR-B-0792	Christine	Lea		General			4,400 houses north of Oxford is totally unsustainable. City needs this due to future employment growth, how do we know that this will happen? North of the city is already congested, proposed Northern Gateway will seriously exacerbate this. Extra traffic would create more air pollution, journey times would increase with the building of these new homes. Additional demands on the infrastructure. GB sacrificed and countryside lost resulting in habitats being destroyed. Appropriate site with good transport links is the area south of Oxford Parkway station.
PR-B-0795	David and Sonia	Simmons		General			Criticism regarding confusion of the dates for the submission, it is too short a time for a response to this mater.
PR-B-0795	David and Sonia	Simmons		General			GB designed to stop urban sprawl, development would spoil the essence of the villages and surrounding countryside. Population increases the land will be lost, how do we feed the extra population. Extra demand on schools and health care. Extinction of wildlife and increased air pollution. Flooding is overlooked and building on ancient flood plans causes problems further a field, like Botley. Traffic and transport would increase , which is already overloaded. Money to be made should be by local authority. City need to look inside their town and not other areas.
PR-B-0799	Ian	Sheppard		General			Very poor consultation and notice to the local areas effected
PR-B-0801	Janet	Stott		General			Concerns at the poor level of consultation with Cutteslowe residents prior to the plans being developed. Object to the form of this consultation, extremely unfriendly to canvassing the views of the average homeowner, favouring developers. Sad to see the character of the area change irreversibly.
PR-B-0803	Andy	Carey		General			Support housing. Oxford City and its environs is the least affordable region of the UK based on cost of housing divided by local incomes. So more housing is needed, and it would be great if height restrictions could be liberalised too.
PR-B-0804	Barrie and Linda	Teasdale		General			Criticism of the failure to engage with the residents of Water Eaton Lane, there was no public advertising in the local press or leaflet drops. Extremely concerned about the manner of the process. This was exacerbated at a recent public meeting attended by both CDC councillors and executive from the planning department. It was made clear that the agreement by CDC to accept 4,400 dwellings in Cherwell was not likely to be changed, and that comments could only be made over the suggested locations of these dwellings.
PR-B-0804	Barrie and Linda	Teasdale		General			The dwellings are to meet Oxford's housing need of which only 550 have been agreed. The closure of Peartree Park and Ride would free land that could be used for housing as the impact on GB is minimal. The proposed sites are on GB land between Cutteslowe, Oxford Parkway Park and Ride site development would join Oxford with Gosford, Water Eaton, and Kidlington to form one larger conurbation.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0804	Barrie and Linda	Teasdale		General			The requirement is to accommodate workers in Oxford. Oxford has tried to develop land adjacent to Grenoble Road but has been refused by SODC. This is a sensible site as close to hospitals and science park but its GB land. If housing is provided in Kidlington this will exacerbate road and public transport problems.
PR-B-0805	Tamara	Frishberg		General			Little public notification of the consultation. The period of response was inconvenient. The consultation documents were very overwhelming
PR-B-0810	Jane E	Curran		General			Disapprove most vehemently of the 4,400 dwellings being built between Cutteslowe Park and Kidlington. There is no actual need for such development. The developments would be brought by people moving out of London but still travelling to work there. GB land to stop urban sprawl and provides a lung for towns. Damage to the environment will be enormous and irreversible.
PR-B-0810	Jane E	Curran		General			Cutteslowe Park will be utterly spoilt, it is a great amenity for people living in the already crowded areas of Summertown, Sunnymead and Cuttleslowe, to exercise and enjoy nature in quiet.
PR-B-0810	Jane E	Curran		General			Traffic congestion would increase. Already Bicester, Kidlington and Witney roads towards the Cutteslowe and Wolvercote roundabouts are already blocked at peak hours, this would only exacerbate the problem. Oxford Parkway has added to the difficulties. May I also remind you of the Northern Gateway plan, and the increases in housing being suggested for Eynsham and Woodstock. Increase to air and noise pollution which are already high in the area.
PR-B-0811	Laurence	Carey		General			Object strongly to the proposal of building 57 houses on land east of South Lane. Development would have a disastrous effect on the landscape. Proposed access is on a narrow road. The land borders onto the South Newington Conservation Area. The land will affect the setting of a listed building "The Deans" (formerly known as the "Dun Cow") in Moor Lane. No shop, no school or medical facilities. School and medical facilities in nearby villages are already overstretched. Negative impact on the quality and character of a much valued rural village.
PR-B-0812	Tim	Stott		General			Attended consultation in Cutteslowe Park, spoke to a very helpful council officer who explained the proposed plans. Do have concerns about these proposals.
PR-B-0812	Tim	Stott		General			Concerns at the poor level of consultation with Cutteslowe residents prior to the plans being developed. Object to the form of this consultation, extremely unfriendly to canvassing the views of the average homeowner, favouring developers. Sad to see the character of the area change irreversibly.
PR-B-0814	Andrew	Evans		General			Points raised highlighting why the addition of large quantity of houses to Sibford Ferris would not be appropriate. Within the parish there are no state schools. There is a post office and general store which is incredibly small, no room to expand and cope with increase of footfall. There is no supermarket or doctors surgery, this is shared with other parishes.
PR-B-0814	Andrew	Evans		General			The roads through the villages are congested, with several pinch points caused by increased on-street parking. Homes on the land west of the Hook Norton road would put the village between the 100+ new homes and Banbury where the nearest rail station is located and also the nearest major motorway junction. Believes the road through the village would be unable to cope with the expected volume of traffic during peak hours.
PR-B-0814	Andrew	Evans		General			Limited number of pedestrian pavements, impossible to walk to the post office without walking on the road. Current traffic conditions already make this a risky endeavour, a significant increase in traffic through the village would simply make it unsafe. Buses to Oxford are not sufficient for commuting to work for normal working hours.
PR-B-0815	Daniel	Whitley		General			Support for some proposed building around the Yarnton, Begbroke and Kidlington area. Local area in dire need of extra housing.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0815	Daniel	Whitley		General			Local area is in dire need of extra housing, building extra houses near to Oxford is a key strategy. Oxford is facing increasing problems with recruiting teachers, medical staff and many other vital careers. Building additional housing stock near the demand points would both minimise infrastructure costs and maximise capacity of the existing infrastructure. This is the key reason why I support building in the Yarnton/Begbroke/Kidlington area as opposed to proposed sites further north within Cherwell's territory.
PR-B-0815	Daniel	Whitley		General			Additional development increases the perception of urban sprawl. No housing constructed on land south of Yarnton and Kidlington. Concerns regarding flooding. Planning Policy Team to consider raising any potential percentage of Affordable Housing within any new development within Cherwell. Supply of Affordable Housing is vital to Oxfordshire's growing economy and to keep the vital public services running as smoothly and efficiently as we are currently used to.
PR-B-0816	Lynne	Whitley		General			Write in support of Yarnton PC response which has been submitted to CDC. The response references the respective planning policies in force which are there specifically to prevent the sort of encroachment and abuse of the GB which this government has said it will protect:
PR-B-0816	Lynne	Whitley		General			This rep has quoted polices ESD 14 and ESD13. Exceptional circumstances to allow development in the GB cannot be demonstrated. Infrastructure will also be inadequate as roads are already clogged at peak times. Reconsider where you put these houses along with the number.
PR-B-0821	Alan and Suzanne	Mclvor		General			Criticism of the failure to engage with the residents of Wolvercote Ward reference to the exhibition held in Cutteslowe Park. Consultation not easy to respond to. A mass of documents online that are full of jargon.
PR-B-0822	Nikki	Lewis		General			This rep provides a detailed objection to development in the GB. The arguments made are based around the purposes of the GB as set out in the NPPF.
PR-B-0822	Nikki	Lewis		General			Yarnton has 5,000 years of history including a historic manor house, church and a history society devoted to learning more about the area. Begbroke is mentioned in the Domesday Book, and its historic centre, with its Norman church is a conservation area and is overlooked by an Iron Age fort. Erosion of the GB, Oxford will become like any other sprawling industrial city with none of the character and ancient, historical settings.
PR-B-0822	Nikki	Lewis		General			The Framework encourages the recycling of derelict and other urban land. There are plenty of brownfield sites available not our GB. 4,400 vacant homes in Oxfordshire, including 55 in Oxford itself. Oxfordshire is the South East's most rural county so let's help it to stay that way.
PR-B-0822	Nikki	Lewis		General			If the plans go ahead then more pressure on local infrastructure. Local roads regularly jammed, schools oversubscribed and health services that are struggling. Getting a doctors appointment in either Woodstock or Yarnton can take weeks.
PR-B-0822	Nikki	Lewis		General			These housing targets are built on aspirations, not 'unmet needs'. The houses will be brought by people who work in London, not Oxford, people who are exploiting Oxford Parkway station. Overcrowding of trains to Marylebone every morning. Reality we will become one big, expensive dormitory town for London commuters using the new Oxford Parkway station.
PR-B-0822	Nikki	Lewis		General			Cherwell District Council planning department has always been rigorous with planning applications that might damage the GB and rightly so. Have always respected that rigour and felt that our countryside is safe in your hands. A feature of the GB policy after all is its permanence. Your own local plan published in 2015 was sensitive to the Green Belt, so know it's important to you too, because it's important to the residents you serve. Please do not let us down now at this crucial time.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0824	Judith	Skipp		General			As a resident of Begbroke wish to object the partial review to meet Oxford City's unmet housing need. Know there is a need in Oxfordshire for affordable housing and in Oxford City's case social housing. However concerns regarding the areas submitted in the current consultation documents. Areas of Kidlington, Yarnton and Begbroke would lose their individual identities, merging into each other. Walking to Spring Hill enjoying the 360 degree views across Oxford, Cassington, Bladon and beyond. The areas shown on the consultation map encroach into this historic and beautiful space, which also includes part of the long distance walk The Shakespeare Way.
PR-B-0824	Judith	Skipp		General			Building in such large numbers in the area would put enormous pressures on the local health practices of all three villages, which are already under intense pressures. Not to mention the primary schools and the 2 secondary schools into which these feed. Disappointment for some villagers who have siblings can no longer gain places at Woodstock Primary School, which had been guaranteed a place in the 40+ years that I have lived here. Public transport has been provided, those no longer able to gain entry have to be taken independently putting strain on the parents lives.
PR-B-0824	Judith	Skipp		General			Traffic is another major problem when trying to access Oxford. Excellent Park and Ride facilities at Peartree and Water Eaton, not unusual to sit for considerable time in queues to use these facilities. What infrastructure will be put into place prior to any additional house building?
PR-B-0824	Judith	Skipp		General			Not addressed the destruction of GB in the area. Understand both the Government and CDC have both recently given a commitment to preserving this. Also understand that exceptional circumstances have to be displayed to allow house building on such designated land. Are there no other areas outside of the GB. Has it been definitely proven that this need for additional housing in such vast numbers really exists.
PR-B-0824	Judith	Skipp		General			Opening of the Oxford Parkway Station results in people from London seeking to live in a more rural setting and commute to work. In summary please look carefully at the proposals and seriously consider the concerns of the many local residents.
PR-B-0827	Paul	Staniforth		General			Travel into Oxford on the A44 via Peartree roundabout is already a nightmare during rush hours. There is periodically a death of someone trying to cross the busy A44 at Begbroke.
PR-B-0834	Eleanor	Williamson		General			Vehemently oppose the plan to site 4,400 new homes around Kidlington – on GB land on behalf of Oxford City. Kidlington would nearly double in size. Its village identity, character and amenity would be irretrievably destroyed.
PR-B-0834	Eleanor	Williamson		General			Criticism about the conduct of this consultation. GB minimally publicised, Cherwell should have done more. Kidlington's exhibition was held very late in the same week as Christmas. Kidlington Councillors were not included of the allocation of houses within the GB.
PR-B-0835	EJ	Williamson		General			Plan to provide additional housing up to 15,000 by Oxford City. Most of the 4,400 homes that Cherwell have been asked to provide are to be built on GB between Oxford and Kidlington. GB there to prevent urban sprawl of Oxford City, protecting smaller out-lying communities from being absorbed like Cutteslowe, Headington, Marston, Cowley, Islip, Wolvercote, etc. GB protected by law, only being released in exceptional circumstances. I do not regard this as an exceptional circumstance. Oxford wants affordable housing, this is not likely to happen. 4,400 homes would double the size of Kidlington. Enormous strain would be put on schools, health service and transport, increasing the serious traffic congestion in the Banbury Road. The new Cutteslowe roundabout designed to improve the situation would once again be swamped. Kidlington is a large village with GB, to destroy this would remove these benefits of village life for ever. Oxford agreed to provide only 500 new homes compared with Killington's 4,400 and the other District Councils' allocations. Yet the Northern Gateway area, in Oxford's domain is scheduled for industrial development.. This will surely aggravate the housing situation rather than help it.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0836	Alan	Graham		General			Page 18 steers to three specific sites for the 4,400 dwellings. Inappropriate as the document gives a clear indication of travel prior to consultation of a submission document before a number of studies relevant to that stage have been completed. Published documents by Oxford City give similar indication to preferred locations for housing in a number of locations close to the City that is inappropriate when it does not form part of a Local Plan document preparation.
PR-B-0836	Alan	Graham		General			Scant regard to the necessity to address GB issues as required in the NPPF, the consultation gives the indication that development in the GB appears a certainty. Two of the sites quoted on page 18 (2.37) between Kidlington and Oxford are in the GB, development would destroy GB and not avoid coalescence.
PR-B-0836	Alan	Graham		General			Oxford and Cherwell have failed over a number of years to achieve the local housing target figures. With the proposed figures is this deliverable as past failures provide little confidence and this should not be allocated.
PR-B-0836	Alan	Graham		General			The 2014 SHMA needs updating to reflect changing circumstances. It should be commissioned by the local authorities and not by the Oxfordshire LEP which is using employment figures that are inappropriate that would have ensured the brief for preparation of the previous SHMA was slanted.
PR-B-0836	Alan	Graham		General			Oxford's housing market is unique in the county and the factors associated with this imply that that extra demand for housing is within Oxford rather than the surrounding District Councils. Further assessments are required to look at land within Oxford. If the need is outside Oxford it needs to be areas with employment.
PR-B-0836	Alan	Graham		General			Extra development in the Kidlington area would need to be addressed over and above existing S106 payments and CIL contributions to make up for the existing infrastructure deficit. Improvements required to transport as the existing road network is over congested, including improving substantially the time taken to get from Kidlington to central Oxford by public transport. Investment to the retail potential in Kidlington rather than seeing the movement into Oxford.
PR-B-0836	Alan	Graham		General			Oxford City's policy for affordable housing is 50% and Cherwell's for Kidlington is 35%, how are policies reconciled, when the objective is to meet Oxford's housing needs with Cherwell? An update of the SHLA is required along with a re-appraisal of the economic forecasts for job creation. Government emphasis on developing technology between Oxford and Cambridge, with the improvement to transport links . Upper Heyford also requires additional development providing broader sustainability.
PR-B-0839	Mark	Rose	Define on behalf of William Davies Ltd	General			A district wide approach that reflects the adopted local plan strategy and complemented by the release of sites in the GB should be taken. As part of this strategy Bloxham, and in particular land to the east of S Newington Road should be considered as appropriate site specific options.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0843	Chris	Skinner		General			If the level of house building identified is required within CDC, which am not convinced, I have some comments on the suggestions on how that may be achieved. Developments in Cherwell must be inclusive of infrastructure and improved transport links. Believe Heyford would be a bad location, most would be obliged to drive for work, leisure, shopping etc. Any development should be self-supporting as possible but linked to existing transport and access routes. If improved cycle and walking routes into Oxford, to the stations between Kidlington, Yarnton and Begbroke. Then develop the area between these villages to unify them. Believe it is better to encroach on GB around the A34 than spreading further Kidlington to the North and North East. Development on this side of Kidlington would increase load on the heavily congested route through the village unless access were made directly towards the Islip/Bicester road/A34 which would essentially isolate any new development. Some point better to close GB through Cutteslowe and Gosford, accept that Kidlington integrates into the City, not ideal but better than GB around the Banbury Road around Oxford Parkway at the expense of a continuing creep North and North East as any development there would further load the creaking transport links. No easy options but - fill in the gaps - do not spread.
PR-B-0846	James C	Bridon		General			Proposal to build 4,400 additional homes to the north of Oxford must be refused and then opposed to the last ditch. The draft version with its focus on Area A, its proximity to the city is unrealistic without unimaginable investment in transport links. Destruction of GB, merging of villages into urban sprawl.
PR-B-0846	James C	Bridon		General			Acceptance of the 4,400 target is justifiable only if Oxford City's housing demand and land supply figures are proven and land usage truly maximised. City should first commit to large-scale medium-rise apartments in the eastern half of the city, with target of tens of thousands. CDC should only strive to meet City's needs if capacity of the other adjacent Districts is fully and fairly assessed. Do not agree with excluding small sites from consideration. Small (<100) infill options vital to assist max protection of GB.
PR-B-0850	Wendy	Smith		General			Strongly object to the proposed development of GB land surrounding the villages of Begbroke, Yarnton and Kidlington. Infrastructure already overstretched. A44 at peak times unable to cope despite recent improvements. More housing increases resident numbers, higher volume of traffic, pollution and environmental damage. Schools would suffer.
PR-B-0850	Wendy	Smith		General			Kidlington, Yarnton and Begbroke blessed with much wildlife which would suffer as a result.
PR-B-0850	Wendy	Smith		General			This rep refers to detailed reference made to the CDC Environmental Strategy and Local Agenda 21. Ref to the Government Site protecting GB paragraphs 79, 80 and 89. The proposed development undoubtedly goes against every promise made in both the Council and every GB aim set out by the Government statements. It would appear that the enormity of the proposed development would be in complete contradiction to every point made.
PR-B-0850	Wendy	Smith		General			All three villages would ultimately loose their unique individuality. Oxford City should consider its own vacant office buildings and houses before sacrificing GB areas and village lifestyles.
PR-B-0853	Lorna	Bennett		General			Objection to the proposed 4,400 new houses proposed for the north of Oxford and namely in the vicinity of Yarnton and Begbroke. Pride ourselves on being villages and each has their own identities and facilities.
PR-B-0853	Lorna	Bennett		General			The infrastructure is very much inadequate at the best of times and can not cope with the current traffic. Funding for repairing seems non-existent. Adding another 4,400 houses will add to the amount of vehicles on these already congested roads.
PR-B-0853	Lorna	Bennett		General			Doctors surgeries present in Yarnton and Woodstock, it can take up to 2-3 weeks to get a non-urgent appointment. Patient lists would increase with the additional houses. Has a new doctors surgery been considered with the proposals.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0853	Lorna	Bennett		General			Schools in Yarnton and Woodstock would pose a problem. Difficulty in recruitment of good teachers now. The schools would have to be extended to cater for the extra pupils. The traffic with its current pupils is horrendous and parking is a joke. Do not have the facilities of any police, community police or traffic warden, this puts both children and adults in danger of an accident. If the intake of pupils were to increase dramatically this would again accentuate the problem.
PR-B-0853	Lorna	Bennett		General			Recreational areas, there are many public footpaths which have historical value and interest. The fields between each village and surrounding areas are vital for wellbeing and security. I was sure that as recently as 2015 CDC indeed signed up to protect our "green belt" which these fields and pathways make up.
PR-B-0853	Lorna	Bennett		General			Flooding is a concern as Yarnton and Begbroke already flood. The more these areas are built upon increase the chances of flooding here and other areas suffering too.
PR-B-0853	Lorna	Bennett		General			Would there not be a more suitable site for the amount of houses to be built. This is effectively a new town, more beneficial for its location to be close to the M40, as some infrastructure is in place. The new train station already a lot of people from London are buying properties in this area and commuting back to London.
PR-B-0856	David	Smith		General			Surprised that you do not have an on-line pro-forma response. General observations are that the meeting at Kidlington repeatedly referred to as Oxford City's unmet housing need. Local affordable housing is a national problem, failure of local authorities to re-invest. Oxford city has its own unique problems related to its historical development and geography. The Universities are part of the problem and should be contributing to resolve the solution. Stop further commercial development in the city and on its borders, this exacerbates the housing shortage. A re-appraisal of the Northern Gateway proposals to reduce the area for commercial development and increase the amount of housing to enable the City to make a greater contribution to its own projected need. Cherwell Plan only looked at. The Oxfordshire Growth Board has a very important role to play with the wider view of developments across the district council borders.
PR-B-0858	John and Barbara	Redfern and Burton		General			Objection to build 4,400 new houses north of Oxford. The number is not an appropriate requirement, it is too high and Cherwell should challenge this. It's unsustainable, traffic problems increase and schools and health services become further stretched. Present problems with John Radcliffe and Horton Hospital make matters worse. It's already difficult to recruit GP's and nurses etc. Beds being closed when there will be a need doesn't make sense.
PR-B-0858	John and Barbara	Redfern and Burton		General			Object strongly to areas of search that involve the GB and areas that flood. Open countryside in the GB to be sacrificed, walks and views lost. GB is appreciated and enjoyed by local residents. It protects the historic city of Oxford from over development. GB is a permanent designation. Government's promise and Cherwell's policy to protect GB should be upheld. Areas of search considered on GB are not reasonable. All the local sites losing agricultural land, locally grown food becomes unavailable.
PR-B-0860	David W	Stewart		General			Objection to build 4,400 houses north of Oxford due to wholly inadequate provision of additional infrastructure for schools, healthcare, roads and transport links. Currently the roads in and out of central Oxford during rush hour via the Cutteslowe and Peartree roundabouts are extremely busy with traffic jams. New houses will be brought by London commuters using Oxford Parkway.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	General			The majority of the Parish is within the GB which comprises the gap between Kidlington/Gosford and Oxford. The Parish area includes a large number of the sites put forward in this consultation and would be dramatically affected by these developments and others in the surrounding area. Extremely concerned by the huge volume of complex new reports issued for consultation over the Christmas period. The forward work programme suggests that there will be minimal time for fair and genuine review of all relevant issues, and the Council and local residents are very concerned that this momentous decision is being rushed to the detriment of sound decision making.
PR-B-0861	Tim	Perkins	TMP Planning Ltd on behalf of Gosford and Water Eaton PC	General			The timing of this set of Options is particularly confusing given the very recent adoption of the Kidlington Masterplan SPD. It emphasises the permanency of the GB, the strengthening of Kidlington's character of a 'village set in landscape" the need to protect and enhance Kidlington's landscape and biodiversity assets. The 2015 Green Belt Study assesses the contribution local GB land makes to meeting the NPPF criteria. Plans 4.1-4.5 in that document confirm that all GB land lying between Kidlington/Gosford and Oxford is important in fulfilling these criteria.
PR-B-0863	David and Dawn	White		General			Objection to build 4,400 houses north of Oxford . Increased traffic problems causing gridlock around Kidlington, Yarnton and Begbroke. Schools and health services would not be able to cope. Green fields and GB would be sacrificed. Walks and views lost. GB is a permanent designation and promises to protect it needs to be upheld. Area from St Mary's Church to the A4260 subject to flooding, putting the properties along The Moors and Church Street at risk. Traffic along The Moors is already heavy and fast moving to avoid the main Banbury Road through Kidlington.
PR-B-0864	Clive and Annie	Bristow		General			Has Oxford City utilised empty property and brownfield sites within the ring road? Has CDC fully considered the massive impact on road infrastructure and considered the degradation of the flood plain. If the answer to these is no, then to build in one area would be utter madness, creating traffic congestion and gridlock. If there is a need and all options have been exhausted, spread development around the ring road and still maintain the green lungs of Oxford. Strongly urge you to reconsider.
PR-B-0865	J and D	Burford		General			Object strongly to the imposition of yet more housing in the GB around Oxford contrary to the agreed Cherwell Local Plan. Criticism of the consultation . Oxford City unable to commit to housing target placed upon it as it see's soft targets in Begbroke, Yarnton and Kidlington. This has been based on assumed growth rates, needs to be challenged and ignore Brexit realities. Brownfield sites are not unattractive to developers build on these so as to prevent urban sprawl, preventing villages becoming sprawling suburbs of Oxford. Many parts of Yarnton are unsightly and unkempt as a result of loosing planning requirements and oversight. Spend on the current infrastructure before any development is required.
PR-B-0866	Matt	Todd		General			Criticism to the way the consultation has been managed. Little publicity, short period of time to complete the documents over the Christmas period.
PR-B-0868	Jennifer	McFadden		General			Criticism to the way the consultation has been managed over the Christmas period. Poor publicity. Oxford City didn't draw it to local residents attention. Living in North Oxford I do not read the Cherwell website. System favours developers who are well prepared to complete documents. Summary documentation is good but the 157 page document is very lengthy and hard to understand.
PR-B-0869	Peter	Hainsworth		General			Criticism with the documentation and the content for the consultation.
PR-B-0872	Pat and Nigel	Waters		General			Criticism to the late awareness of the review to attend Begbroke Village Hall public meeting. Poor publicity, resulting in insufficient time to consider the implications and the timing of consultation over the Christmas period.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0872	Pat and Nigel	Waters		General			Obvious from the plan that proposed developments will subsume historic Begbroke. Life will change here for ever. Surrounding countryside, scenery, local walks, wildlife. Begbroke is privileged to over thirty birds species, like the Skylarks which are on the conversation red-list, their habitats will be lost or diminished forever.
PR-B-0872	Pat and Nigel	Waters		General			GB is a permanent designation and Government guidance states that unmet housing need is not a reason to building on the GB only in exceptional circumstances. The Government's manifesto promise and CDC's existing policy to protect the Green Belt must be upheld. If allowed then this would end the GB status anywhere as this would have set a precedent.
PR-B-0872	Pat and Nigel	Waters		General			Why can't the land allocated to Northern Gateway be used entirely for houses? Surely this would go a long way to help Oxford City's apparent unmet housing. 4,000+ homes surrounding Begbroke and infilling from here to Kidlington, Yarnton and towards Woodstock is unrealistic. Extra homes at Woodstock, Long Hanborough and the garden village at Eynsham. Witney continually expanding. Commercial and industrial units planned for Begbroke Science Park along with a Park and Ride close to Begbroke. Traffic diverted from A40 to the A44 to ease congestion on the A40.
PR-B-0872	Pat and Nigel	Waters		General			How many extra vehicles will use the A44? At peak times this will cause bottle-necks, there are already problems during the working week. Increases to noise, air and light pollution, which could adversely affect people's health. The A34 is also unable to cope with the amount of traffic which has a knock on effect to the A44. The roads are in a bad state of repair now which takes time to resolve. Closure of GP surgeries waiting times to see a GP are 2 - 3 weeks. Closure of A and E units a reduction in beds. Social care is more or less zero, care homes are closing and schools are overstretched. Unless and until existing problems with infrastructure are fully addressed, surely NO consideration should be given to any of the development put forward for this area. Thames Water publication to the awareness of the use of water, concerns about the water usage.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	General			Consultation time frame: Eight weeks is an inadequate time to respond to a detailed and comprehensive document expecting comments on 24 issues.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	General			Duty to Co-operate: Acknowledges Duty to co-operate on cross boundary issues, however concerned that the duty rests with an unelected "Quango," the Oxfordshire Growth Board. It considers that although there is an agreement amongst the leaders of the Councils on Oxfordshire Memorandum Co-operation, the matter of providing additional housing is a matter for each individual district through its own local plan process. The Parish would like to know why Cherwell District has decided to go ahead with proposals to meet Oxford's unmet demand when there is no legal requirement for it?
PR-B-0878	Jane	Olds	Wendlebury Parish Council	General			Challenging the assumptions: The parish questions the assumptions of the 2014 SHMA and its assessment of to conclude that the County is in reality one strategic housing market area. This is further evidenced by the DCLG 2014 household projections that have a different starting point. The Parish is strongly concerned if the identified suitable sites meet Cherwell or Oxford 'housing need' as it will be determined by the potential occupier. The market will determine housing needs, not artificial number based proposals that are causing considerable concern to this rural community. The Parish questions, 'What would be the impact on the County as one strategic market if Cherwell failed to meet its own Local Plan requirements? We have already noted that South Oxfordshire has not supported the proposals. Paragraph B95 of the local plan makes it clear that Cherwell's needs must take precedent.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0878	Jane	Olds	Wendlebury Parish Council	General			New Evidence: The Parish considers that given the recent announcements on Garden Village at Eynsham, Govt. consultation paper Jan 2017, New rail link between Bicester and Bedford, A34 Expressway (Oxford to Cambridge) all these would provide new opportunities for both housing and economic growth to help reduce some of the pressures on Oxford. The Parish hopes that the scarce resources at Cherwell should concentrate on the employment potential this opportunity provides rather than chasing housing numbers. It also hopes that this will lead to rethink and the current set of proposals being deferred or dropped.
PR-B-0878	Jane	Olds	Wendlebury Parish Council	General			Specific comments on Partial Review: Wendlebury is a Category C village and developments should be for infill or conversions only
PR-B-0878	Jane	Olds	Wendlebury Parish Council	General			The Parish Council attached a separate letter to Cherwell as there were a number of questions that the parish meeting on 5 Jan 2017 which the Parish was unable to address through the consultation questions. This letter was sent to the Chief Executive, Councillors and Victoria Prentis MP. The key issues are: 1. Why is Cherwell rushing ahead with these proposals when other District Councils are not currently considering their allocation? 2. Has this divergence from Local Plan Part 1 been driven, not by sound planning policy, but from the need to maximise the income from the new homes bonus currently £9,000? 3. As these proposals are being generated by Oxford, what level of financial support is expected from Oxford for infrastructure and associated works? Or will the cost fall on the Cherwell Council tax payer? 4. Does the Oxford Growth Board have legal power to spend Council Tax payers' money commissioning reports and paying members' fees to attend meetings? 5. Has the effect of "Brexit" been taken into consideration in forecasting employment outcomes? 6. Has the transport assessment taken into account the loss of transport subsidies? The Parish Council would be grateful if this letter, and the Council's reply could be part of the Parish Council's response to the Partial Review.
PR-B-0885	Margaret C	Williamson		General			CDC needs to reconsider their approach. All suggested sites around Kidlington show a disregard for GB and a lack of respect for those who worked so hard to put it in place. Development between Kidlington and the City boundary leads to urban sprawl leading to the loss of Kidlington's individual identity, this gap provides valuable space for recreational use. Houses between Cutteslowe and the Marylebone line would not be affordable, therefore attracting London commuters. Other areas within Cherwell are to be considered, the effect of additional traffic needs to be addressed through Kidlington.
PR-B-0893	Louis	Borucki		General			Objection to the proposed development of 4,400 additional homes when Oxford's allocation of 550 is unacceptably low, considering the need arises from their own growth plan. This rep provides a list of suggested sites closer to the city and therefore more suitable than Kidlington. Development on the scale proposed will change the nature of the village and remove large areas of meadow, mature trees, well used footpaths and wildlife habitats. The pond at The Moors is home to a Great Crested Newt, a protected species. Kidlington should not have to sacrifice its green spaces when Oxford has an abundance of such sites. Road congestion and parking are already a problem and services at Oxford Parkway are becoming stretched. Local services and amenities are just about coping with the current population. Any development would require infrastructure improvements first. Land prices, and the developers need to maximise their returns means houses are unlikely to be affordable. The Governments manifesto promise to protect the GB should be upheld.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0894	Wendy	Price		General			The proposed area is entirely within the GB. GB was designated to restrain development pressures, which could damage the character of Oxford City. Planned expansion of the City GB is needed. With Kidlington's and Bicester's expansion I do not accept that there are exceptional circumstances to warrant the development in Islip. It is not sustainable, bus services have been withdrawn and there are limited train services at Islip. All journeys would have to be made by car adding to the existing traffic problems and air pollution adding to the high number of cars that already use the narrow roads, which Oxfordshire County Council are aware of.
PR-B-0897	Rob	Lawrence		General			There has been insufficient time allowed and guidance given by CDC for people to review the Sustainability Appraisal as well as the extensive main options paper.
PR-B-0898	Trevor and Helen	Langrish		General			Appalled at the proposals to build 4,400 homes on GB is vandalism, on land between Kidlington, Yarnton and North Oxford. Residents of North Oxford are also not happy due to the added traffic this brings to the area. Little consideration has been given to this especially during rush hour. As a commuter by bicycle into the centre of Oxford I regular see the roads around Kidlington at gridlock, making it dangerous for all road users, development would make it worse. The A34 and A40 are both over their capacity and would become worse.
PR-B-0898	Trevor and Helen	Langrish		General			Building around Kidlington, Yarnton and Begbroke would alter the size of the village and alter the character. Concerns to flooding for existing and new houses. Current GB is used by many for activities and adds to individuals well-being and health. More houses would mean more people requiring health care, places in schools and a need for extra bus routes. The current infrastructure is already over stretched. The cost of housing in Kidlington is high, concerns that the new houses will not sell due to people not being able to afford to live here. Justification for these is questionable.
PR-B-0898	Trevor and Helen	Langrish		General			The meeting that I attended , it was mentioned by someone that Banbury and Bicester have already accepted their share as part of CDC's plan to help Oxford and that they might not be impressed if Kidlington do not accept their share. I have seen these new developments. However unlike Kidlington, Yarnton and Begbroke, they do not have a city the size of Oxford on their doorstep seeking, if not openly then by the back door whenever it can, to absorb Kidlington (and Yarnton and possibly Begbroke) within its boundaries, to which we are very much opposed. Accept the need to build some new houses in Kidlington but the plans are excessive and need reconsideration. The consultation was poor and the plans were not well advertised.
PR-B-0899	Julia	Cameron		General			As a resident of Kidlington want to defend it from changes which would be difficult to sustain. Already the low spec houses in the area and Bicester has shown that more is needed to bricks and mortar to build communities. Large estates are 15-20 years look shabby. Significant profit for developers need to think about the long term regarding schools, churches, surgeries and the countryside for walks.
PR-B-0899	Julia	Cameron		General			No. Extra 4,400 houses north of the city is not sustainable. Traffic problems increase. Schools and health services become more stretched. GB sacrificed, walks, views and habitats lost. Quality of life will suffer, air, noise and light pollution will increase. 4,400 is based on dubious calculations . They rely on assumptions of very high growth in jobs around Oxford requiring many people to move into the county.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0899	Julia	Cameron		General			It is unwise and short-sighted to development in the Oxford GB. The GB around Kidlington has unspoilt countryside, footpaths and green spaces, enjoyed by local residents. It protects historic Oxford from the effects of over development. GB is a permanent designation and that Government guidance states that unmet housing need is not a reason for building in the GB. The Government's Manifesto promise and Cherwell's existing policy to protect the GB must be upheld if we are to be responsible to what we hand onto those who follow. Consideration to relocation to the new science park to the north west where real investment would greatly benefit depressed areas. To place it there and assume it can be supported with a huge wave of house-building seems a little short-sighted.
PR-B-0900	Rachel	Woods		General			Writing in response to building 4,400 homes on the GB around the rural villages of Begbroke, Yarnton and Kidlington. Recognise that there is a need for housing but have objections and concerns to the CDC proposal. Moved to Yarnton for the rural and community life and invested into our home. Cherwell's local plan to preserve the GB was supported by 76% of Oxfordshire residents. There is already considerable pressure on local infrastructure within these villages. The A40 and A34 are often blocked and at standstill during the rush hour, additional houses will only add to this. Schools are over subscribed, as a teacher and resident my concerns are about more pressure on existing provision which will affect the quality of the services and the access to them. Health services in the three villages are already overwhelmed. Three weeks on average to see a GP or nurse. Residents quality of life will be compromised with the urbanisation of the rural villages.
PR-B-0900	Rachel	Woods		General			This area of Oxfordshire is known for its microclimate and interaction with pollution in the atmosphere causing respiratory problems. Increasing air and noise pollution will potentially affect residents health and wellbeing putting more stress on healthcare. The areas around Oxford are green lungs for the city. Providing access to the countryside for walks and views, providing respite from urban dwellings. Wildlife ecosystems, farmland etc. will become affected which affect the larger ecosystems which increase the imbalance in the natural environment. What consideration has been taken to preserve this balanced ecosystem. We would become an expensive dormitory town for London commuters, houses prices are then out of the reach of Oxfordshire based workers. Many people who work in services have to live in Bicester or Swindon. Bicester's encroaching developments have had an effect on infrastructure, making it a difficult and stressful place to live due to the rapid developments, without the infrastructure in place. Object to the proposals and trust you will consider our objections and take our concerns seriously.
PR-B-0901	Caroline	Steel		General			Object to the plans to build 4,000 houses in the GB around the villages of Begbroke, Yarnton and Kidlington. I enjoy the rural aspect of Yarnton especially the footpaths in neighbouring fields which could be lost or reduced. Last year Cherwell adopted a local plan to preserve GB, 76% of Oxfordshire resident support this plan. Residents of Yarnton and Begbroke's quality of life will be severely compromised. Increased pressure on local infrastructure like roads, schools and health services. Farming and wildlife habitats will be reduced.
PR-B-0902	Vanessa	Pinder		General			Criticism on the difficulty in finding the consultation details and the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0903	Josephine	Allen	Upper Heyford Parish Council	General			Upper Heyford Parish includes Heyford Park Local people accept that there is need for some housing, but want to see the right type of housing in the right place, with the supporting infrastructure. The Parish is seriously concerned at the sheer amount of housing that is being put forward for the District and the huge effect upon the transport network (rural roads) which is already over-capacity, use by HGV's and 'rat running'. Concerned about the lack of leisure space and a cemetery at Heyford Park. The Parish Council reiterates all the points raised in Oct 2014 consultation. The Parish supports the need for additional housing at Heyford Park, but no more than 1,600 with appropriate infrastructure in place concurrently with the housing development. Traffic worries are a major concern for residents. Greenfield land should be preserved as far as possible and the rural character of Upper Heyford protected.
PR-B-0904	Jill	Grain		General			Criticism regarding publicity and that Cherwell should of done more. Difficult to find the consultation details and the paperwork is long and challenging. The timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-0911	Andrew	Smith	Hampton Gay and Poyle Parish Meeting	General			Concerned that the levy is set at a high level for private housing which may discourage such development. The levy should be critically reviewed to achieve a balance to deliver required level of infrastructure. It is also concerned that it is not included in the areas of search around Kidlington, excluded from Levy funds. The concern is that a massive development around Kidlington would further increase rat run through the Parish. The Parish should be able to access funds for mitigation measures as a result of this planned development. Parish has significant concerns on the scale of development and trust that the plan would be amended to reflect a more modest, sustainable scale of development in the Kidlington area.
PR-B-0915	Michelle and Anthony	Tallack		General			Islip residents objections to encroachment on GB. Limited public transport. Unsuitable access roads that already have substantial traffic problems.
PR-B-0916	Helen	Newman		General			Wish to register opposition to the destruction to the GB around Yarnton, Begbroke and Kidlington. GB designed to protect the countryside from urban sprawl. If approved Yarnton and Begbroke would disappear as separate entities. Green spaces and footpaths would be lost forever. It's important to preserve GB for future generations as development on this scale would damage to the environment and cause issues in the future. Is the size really necessary, would it provide affordable housing for local's or is it an opportunity for developers to provide a dormitory town for London. Development adjacent to Woodstock was recently rejected due to the infrastructure in the area not being able to support a development of that size, this is a quarter of what is now being proposed around Begbroke and Yarnton.
PR-B-0916	Helen	Newman		General			The roads would not be able to cope with the proposed developments. The A44 is used already as an alternative route into Oxford to avoid congestion on the A40, this is likely to get worse once the new garden village at Eynsham is built. A44 is the only route out of the village of Begbroke, which at peak times is difficult to get out onto. Peartree roundabout is frequently jammed at congested during rush hour and their are long queues into Kidlington. A34 has accidents and incidents which adds to traffic chaos to other roads. The rep. has concerns regarding flooding and has provided a list of the areas that now are subject to this and which would have issues if the developments were approved.
PR-B-0917	Omattage G Kumar	Perera		General			The impact of the proposed development would take away the footpaths from Water Eaton Lane through the GB fields which are used for walking and leisure. The green fields are important to the health which would be impacted and lost, there would be an increase of pollution from the A34. Flooding is a concern with Water Eaton Land and Bicester Road, additional housing will only increase the risk in the area. Increased traffic congestion on the Bicester Road affecting schools and residents. Strongly feel that the houses will attract London commuters and not those who work in Oxford or within the Cherwell district.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0920	Audrey	Fairgrieve		General			Kidlington already suffers from congestion most mornings . The doctors cannot cope with the number of people wanting appointments and car parking is often a nightmare! These extra houses will make things worse and the cost of houses is bad enough around here.
PR-B-0921	Paul	Weston		General			Strong objection to any options in Banbury having to meet Oxford's housing needs. The distance from central Oxford to Banbury is 21 miles, equivalent for providing houses from Banbury to Towcester, this is not sensible when there are options in the intended target. Public transport is not tenable. Trains from Banbury to Oxford are good but the links to Banbury station are poor so you would choose to travel by car on the already congested roads. The south of Banbury has already seen a large number of developments to meet Banbury's needs, 3,500 houses between the canal and the Broughton Road.
PR-B-0926	Dr Eric	Sidebottom		General			Criticism of the way the consultation has been conducted along with the documentation that seems to favour developers and professionals. The Christmas period is not reasonable. Separate consultation to Northern Gateway these both have a huge impact on one another. Main areas of employment are in the centre, this is where the affordable housing is needed. Built on GB will exacerbate traffic. Development close to Oxford Parkway will only attract London commuters. Employment is better situated outside Oxford City.
PR-B-0941	Valerie	Wells		General			Wish to object to the proposal to build 4,400 new houses to the North of Oxford, Begbroke, Yarnton and Kidlington. Each village would lose its separate historic identities and merge into one urban sprawl, joining Woodstock to Oxford. The protected GB is in the plan, which CDC have undertaken to protect. Our future generations will not be able to afford to live in this area, there is not enough affordable housing in the plan. London commuters will be attracted to the area. Affecting the availability and affordability of houses for our children, teachers, nurses etc. The road infrastructure is not in place to be able to cope with the extra cars. Schools have limited numbers and can not cope. Doctors surgeries and hospitals will also suffer with the growing population. There is nothing in the plans to address this.
PR-B-0941	Valerie	Wells		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Roads and infrastructure are not in place. There is not enough affordable housing. There would be the destruction of the GB and three villages would lose their identity.
PR-B-0942	Freda	Horne		General			Strongly against the proposal to build 40,000 [sic] houses in Kidlington. The schools and doctors surgery's are over crowded. The Gb will be taken and the roads will be blocked 24 seven. It is questionable who can afford a mortgage or rent.
PR-B-0943	Christopher	Perry		General			Am aware of the planning to build extensive housing in the area around Begbroke, Kidlington and Woodstock. Am horrified at the extent of the planned development. Understand that more housing is needed but not to this extent. This will destroy the quality of life for current and new residents. No consideration has been given to the impacts on transport, schooling and the environment. Please reduce the number of houses.
PR-B-0944	David	Stone		General			Dismayed at the timing and handling of the consultation and the limited manner the details were made available. It does little to inspire confidence in the Planning process and that CDC is seriously interested, or will indeed listen or alter it's plans in the light of local residents' considered views.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0945	Helen	Manias		General			Have serious concerns about the development and oppose in the strongest possible terms to the proposed site which is farmland north of The Moors in Kidlington. The fields are part of the GB and should be protected. There are many footpaths here that are used by the public who benefit from both physical and mental health by escaping from the urban areas into the open fields which is an asset for the residents of Kidlington. There would be a great loss to natural habitats and wildlife in the area and the local history would be lost to. To consider building near a river and flood plain is a poor choice. The river is prone to flooding which could flood the new homes and be expensive to fix, it is not just viable to consider building here. The Moors is an extremely narrow road and would cause access problems for construction vehicles and the extra cars on the road would cause significant problems in the area.
PR-B-0946	Sarah	Karatzios		General			Criticism regarding how CDC dealt with the acknowledgement of the comment cards. The main issue relating to the lack of affordable housing lies with the universities, they need to manage the number of students that they can actually cater for. The houses they use are only occupied during term times, if campuses were built just outside Oxford this would free up houses for those of need it. A shuttle bus could bring the students into Oxford. A small part of GB would be lost but not to the extent as shown in their plans. The villages surrounding Oxford should not be affected and become part of Oxford, GB is precious. Flooding would be a concern as houses would be built upon a flood plain, the excess water would run off into the canal which would then flood. Yarnton Road would not be able to cope with the increase in traffic.
PR-B-0946	Sarah	Karatzios		General			Recent developments on the Kidlington side of Bicester, residents from this area would use the A34 heading to and from areas of Oxford increasing the amount of traffic during the rush hours. It can take up to an hour to get into Oxford. All of this is before Bicester is fully developed which will make matters even worse. To consider building anywhere around Kidlington is not sensible. The recent improvements to the two roundabouts hasn't improved traffic flow, it is the sheer volume of traffic which is the issue. CDC do not know what the traffic is like during the rush hours from Kidlington to Woodstock and beyond. Building on GB will only add to this.
PR-B-0947	Norman	Davies		General			Objection to the growth plans for Kidlington. Why put 4,400 homes in one area, spread them into a wider area of Cherwell, having less impact on the struggling infrastructure. We accept growth but not on this scale. GB needs to be kept as agreed in the Kidlington master plan along with the golf course, Oxford City could build on their own at Southfield. Schools, doctors and drains can not cope with the current size of Kidlington. Increased homes would require a larger high street, with extra parking not a reduction with the loss of Co-op site. Land behind The Moors is a narrow lane unable to cope with large and heavy traffic. Access should come out of the main Banbury Road with a bridge over the railway and canal. We do not want to be part of Oxford City, we enjoy Kidlington and CDC should maintain the gap.
PR-B-0950	Mr S and Mrs T	Lloyd and Atley		General			The total number suggested to meet Oxford's unmet need would be an unsustainable level of growth for the social and environmental impacts. Importance for economic growth, needs to be recognition that at some point Oxford and Oxfordshire will become less attractive to business if quality of the landscape, environment and infrastructure deteriorate. In the long term making this area a less desirable place to locate.
PR-B-0950	Mr S and Mrs T	Lloyd and Atley		General			Sad to see coalescence of Oxford with Kidlington, or the loss of the community feeling that Kidlington has. Feel strongly that GB around Kidlington meets the NPPF criteria. GB between these two places provides valid recreational space, a visual gap which protects their individual identities, preventing urban sprawl. The north of Kidlington retains its village character and sense of community, very sad to lose this and become a suburb of Oxford.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0950	Mr S and Mrs T	Lloyd and Atley		General			Concerned with the increased residential pressure that will be put upon wildlife sites, habitats and species. The countryside around Kidlington is valuable for wildlife and recreation. Having good access to the countryside is recognised for physical and mental wellbeing. Development would therefore reduce the accessibility for all residents. Are full ecological impacts on all sites being assessed including indirect impacts on conservation sites. Potential impacts to Oxford Meadows SAC.
PR-B-0950	Mr S and Mrs T	Lloyd and Atley		General			Developers to provide infrastructure and service for the new residents, concerns that such provisions could be delivered in time, which results in insufficient services and facilities for all residents. Roads into Northern Oxford already busy in rush hour, further development in Kidlington would add to this pressure. This impacts car drivers and public transport users as the journeys a=become slower. With Rapid Transit Routes extra congestion would still slow these, causing a bottleneck for residents in other parts of Cherwell trying to access Oxford by bus or car.
PR-B-0951	Dennis	Price		General			The methodology used to obtain the extra housing needs is irregular, taking maximum figures for job growth and housing without due diligence. The dubious figures allow for destruction to Oxford's GB. Any development to GB should be minimal and only in exceptional circumstances, which is the governments policy. Oxford is a unique historic city. The expansion of Kidlington and Islip defies suggestions to maintain GB . GB for these villages acts as a vital green lung for walking, cycling and everyone's wellbeing, if these are destroyed what's been put in place to substitute these? The housing needs to be in the correct place. Oxford need to look within their city boundaries for redeployment of existing sites. There is plenty of scope for Bicester with its excellent transport connections with Oxford. Oxfordshire has an overwhelmed infrastructure with many fatal and serious accidents on these roads. Concerns for health with the increased air pollution as Islip has very narrow streets. Islip has no public transport, its bus service has been withdrawn, there are long waiting times at the railway station. Development should not be accepted in Islip. Has the effect of Brexit been taken into account for these requirements? Once the damage has been done it's impossible to repair.
PR-B-0962	Dr Judith A	Webb		General			Do not agree with the revised Strategic Economic Plan for Oxfordshire. OXLEP needs to review the scale of development proposed for Oxfordshire. The growth targets are inflated and unrealistic. More account should be taken of potential environmental impacts. Growth on the scale suggested will result in great damage to the wildlife of Oxfordshire. Main interest is in the need to ensure the conservation of key environmental sites within Cherwell. The best way to protect sensitive wildlife sites is to keep any development away. and preserve wildlife corridors. Hydrological connectivity needs consideration and the rainwater catchment of Weston Fen SSSI should be calculated before considering development. This rep is a wildlife recorder in the county that submits records to TVERC, a Flora Guardian to rare plant species, and a member of the Floodplain Meadow Study Group within the ANHSO.
PR-B-0963	Mr and Mrs	Shepherd		General			There is a need for additional housing but to increase this to almost 4,500 houses in and around Kidlington in just not acceptable. The scheme needs to be revisited, possibly increasing to no more than 2,000 houses in small areas. However this figure would still require a serious look at the current facilities and amenities in Kidlington, such as schools, healthcare and leisure facilities etc. We are not against development but please reconsider these proposals. Please take into account the needs of the current residents of Kidlington, the existing traffic congestion, the need for open space and the added pressure that would be put upon the existing infrastructure.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0967	Eileen	Bloomer		General			Find it unbelievable that Oxford City can not find and utilise suitable sites around its own perimeter, for example Greater Leys. How much land does the University have that is not utilised this needs to be questioned as they add to the lack of houses in Oxford. They need to build to accommodate the students. Students having to rent rooms in family homes which reduces the number of properties available for local people to buy or rent.
PR-B-0967	Eileen	Bloomer		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details and the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-0968	Susan D	Stock		General			Objection to the proposal to build 4,400 new houses north of Oxford. The figure is preposterous. This would lead to more traffic problems. Schools and health services would become further stretched. Will the younger generation starting out on the property ladder be able to afford these houses? The waiting times for an appointment to see your GP will increase, it's already taking up to three weeks to a month. The countryside would be sacrificed which is enjoyed by many for walking and the social impact to residents. Wildlife habitats would be lost and destroyed, where will the deer go to that are regular seen in the area. GB is enjoyed by many and it needs to be protected, building on GB is unreasonable and the figures need to be challenged by Cherwell.
PR-B-0970	Ken	Martin	Noke Parish Meeting	General			State that, 'during a village meeting with MP John Howell, were surprised to learn that Oxford City did not have an up to date 'Local Plan' in place, validated by the Planning Inspector. Fail to see why Cherwell has taken on demands of Oxford City at face value whilst it is clear that they have not considered all the options and consulted their own constituents. This is further evidence that Oxford's housing needs have not been fully considered and any proposed numbers are speculative; therefore believe that the work on Partial Review is premature and should be postponed until Oxford have their own plan in place.
PR-B-0974	Belinda	Skinner		General			It seems more logical to develop towns rather than villages, as the village feel of Kidlington would be drastically changed by development. For example Bicester and Banbury. Oppose any development of north eastern Kidlington to the right of Banbury Road. This is a picturesque area used by many residents for walking and running. Building here would increase the traffic on the Banbury Road during rush hour. Support development near the train station as less cars would be on the roads. Also support development near A44 creating less traffic through Kidlington on the Banbury Road.
PR-B-0977	John	Amor		General			Opposed to the building of so many houses on GB around Yarnton, Begbroke and Kidlington. Already the local roads are overcrowded and hospitals are struggling to cope with current demand. GP's are overwhelmed, the schools are full to capacity and the facilities for the young are very limited. Hospitable beds are full of the elderly with nowhere for them to live when they are discharged.
PR-B-0978	JM	Parker		General			Expresses strong concerns with the proposal of building 4,400 houses on GB around Begbroke, Yarnton and Kidlington. Reasons being the loss of GB, walks, rural pathways, scenery and wildlife. Loss of village character and historical settings. A44 is busy already and difficult to cross this will only become worse.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0979	Peter	Finbow		General			Strongly object to the options to develop around Begbroke, Kidlington and Yarnton. 4,400 houses to allegedly help Oxford's unmet housing needs. GB vital asset in keeping Oxford separate from our villages, preventing urban sprawl and maintaining their individual identities. GB used for many recreational activities for promoting physical and mental wellbeing. The area would have increased traffic resulting in congestion, air and noise pollution. No evidence that these houses are needed, Oxford need to rethink its needs. Housing on brown land or building upwards. Would they be occupied by Oxford's residents. Infrastructure in the area is already overstretched, the Chiltern link to London is already crammed. CDC need to be robust and defend our green spaces which once lost are gone forever.
PR-B-0980	John and Pamela	Appleton		General			Object to the proposed developments for Yarnton, Begbroke and Kidlington. The land is designated as GB, why develop when brown sites are available. Oxford need to consider using the large number of empty or unused properties in the city. Oxford and Woodstock would become one large urban sprawl, with insufficient infrastructure like schools and GP surgeries to name a few. Traffic already at a high density in the area particularly at Yarnton along the Cassington Road and Rutten Lane where the schools is situated, this would exacerbate the problem.
PR-B-0981	Joyce	Ruiz		General			Objections to this proposal. There is nothing substantial in the future projections on housing needs and employment to warrant this number of dwellings in and around Kidlington. A casual approach to encroaching on GB to provide for housing to which I strongly object to. GB has provided a long standing protection locally that needs to be upheld.
PR-B-0981	Joyce	Ruiz		General			Objection to the increased traffic flow through and beyond Kidlington. A4165 is already a car park at park at peak times, which adds to increasing air pollution to the area. Good transport links at Water Eaton is causing more vehicles to come into the area. People drive to Parkway Station and P and R to use these facilities, more housing will seriously impact a road that currently cope.
PR-B-0982	Rosa	Cadd		General			As along time resident of Yarnton totally oppose the idea of planning for houses. We are villages not towns and can not turn into small towns. It would be nice if the houses were for locals to keep them in the area, not people from other areas of the country who do not adapt to country life. Leave our village alone.
PR-B-0986	Paul	Robinson		General			Consider it totally inappropriate to build 4,400 houses in Kidlington, Begbroke and Yarnton. The village of Yarnton has over 5,000 years of living history and Begbroke also has its own village character that would be lost for ever if joined to Kidlington. All aware that there's a need for more housing in the county. It is the job of the council to find the appropriate places and to listen to residents. The current proposals have been poorly thought through, only looking at the fields close to Oxford to develop on. Infrastructure shortfalls have been ignored and promises will be forgotten or delayed which causes issues for new residents to travel to Oxford. Oxfordshire already has infrastructure problems, however it's a beautiful place to live with lots of greenery so lets keep it that way.
PR-B-0987	Mr and Mrs	Boyle		General			Are extremely concerned with the proposals to the over development of the area between Kidlington and Cutteslowe roundabout. This goes totally against the efforts to keep spaces around Oxford pleasant and pollution free. The new Parkway Station is already very busy, traffic on the A44 and A40 would become worse and consideration into the roads needs to be taken.
PR-B-0989	Peter	Jeffreys		General			From the public meeting attended on the 4th January the rep. has provided eight specific points that require answering. The rep. however does have concerns regarding Kidlington having another 4,400 houses. There would be extra vehicles on the roads during the rush hour increasing travelling times to places of work. Will the current roads be able to cope. Also concerns with recreation for the young, with safe areas to play, to be able to walk the dog.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0990	Brenda	Purves		General			Objections to the proposed plans to drastically build in Kidlington. There would be a detrimental affect on the demographic of the community. Kidlington is a large village and our community is important and it works. With the large number of houses has there been any thought to schools and doctors, these are already over stretched. There would be a huge increase to traffic in the village and areas to travel to work places, this is being driven by developers for a profit.
PR-B-0992	Martin and Pamela	Palmer		General			Further comments to submission form after attending the meeting at Exeter Hall. The decision seems to of been made that 4,400 homes will be coming to Kidlington, why has this not be included in the consultation and who made this decision. Oxford City continue to create office and business space without consultation with Cherwell and the development for a P & R at Begbroke is alarming, what are Cherwell doing about this. No objections to working together but Oxford need to address their own problems. Can they not build on Southfield Golf club, if they are desperate for land. Not convinced that the number of houses will actually be required.
PR-B-0992	Martin and Pamela	Palmer		General			Cherwell confirmed that GB around Kidlington was incredibly important, Cherwell need to make sure that this is upheld. I have concerns with building in the area off Webb's Way, this is a useful floodplain. The residents of North Oxford are as concerned with the proposals for Kidlington and Oxford. GB land is sacrosanct which is important to the environment, but we are different areas which must retain their own identity for the quality of life of those living in them. Kidlington is already gridlocked so this puts added pressure on the area with public transport and car users.
PR-B-0993	Angela	Kelly		General			Alarmed at the number of houses proposed in the Kidlington area. Already the roads at peak times can not cope with the volume of traffic, it can take over an hour to get to Headington and Cowley. Even using the P and R hundreds of extra people will be on the roads. Infill is huge where I live. Bungalows have been replaced with flats and houses, how can the old drains and sewers cope with the extra housing. Schools and GP's are already overcrowded has consideration been taken to where these extra people will go. Will there be builders and are the houses affordable, these could be snapped up by But to Let landlords and the properties would not be looked after properly.
PR-B-0994	Jamie	Smith		General			Objection to the proposal to build 4,4000 homes around Kidlington and the surrounding GB areas. Kidlington is poorly serviced for the amount of houses it currently has. It can take weeks to get a doctors appointment. Poor amenities for its size compared to Eynsham and Woodstock. Building on GB will cause more localised flooding to which Kidlington is prone. Bottlenecks with increased traffic in and around Oxford at the bridge crossing the A34. Even on a good day getting out of the Kidlington area is difficult due to congestion. The new train station is great but the planning into how it was accessed has not improved the traffic situation, never mind the new road layouts at Wolvercote and Summertown. Road traffic survey was done during the summer holidays when there is less traffic. Need to look at the issues already facing the residents, then perhaps the community would support this.
PR-B-0995	Adam	Brightmore		General			As a young first time buyer want to express my opinion for the younger generation. Criticism that the documents are busy and confusing. Regarding transport and the infrastructure its quicker for me to get to Northampton than to Cumnor Hill in Oxford from Kidlington. People like cars too much and therefore the rapid transit idea is useless, the residents of Oxford will stick with their cars. The A34 needs easing, so take advantage of the adjusted road near to the M40 for building. Why build close to Oxford and Kidlington what about land north of Sturdy's Castle, this would be a new village or town without encroaching onto villages. Build a few in Kidlington but not in a way that GB is lost and that we are joined to Oxford. Build near transport links. House prices in Cherwell are high due to its desirability, this will be lost or have a negative impact if built without infrastructure.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0996	Lucy	Smith		General			Whilst welcoming some very good ideas for the improvement for Kidlington are majorly concerned with issues outlined in our responses to the questions that we have answered. The proposal mentions strengthening the identity of the village, but it seems as if we are all merging into one and just becoming a suburb of Oxford.
PR-B-0998	Lisa	Coulling		General			Having seen new housing developments over the years in Kidlington I understand the need for new homes, but 4,400 is far too many for our village. This would be a 76% increase to the size of the village, the existing amenities and leisure facilities are already small for our community. Will more schools and doctors surgeries be built to cope with the extra demand. Children and teenagers have very little to do here, its great that they can meet at the new village shop the best thing that has happened to our village but more would be needed for them. No evidence that there are exceptional circumstances to build on GB. Strongly oppose Oxfords housing needs being placed on Kidlington and surrounding villages, please reconsider.
PR-B-0999	Steve	McCurdy		General			Objection to building 4,400 homes in the Kidlington, Yarnton and Begbroke areas. Traffic is already saturated and the problems will get worse, causing grid-lock and a rise in air pollution. The local schools and services can accommodate the present population, with an influx of new residents this will not be the case. Strongly object to GB areas being used for development. These areas should be kept to do what they are designed to.
PR-B-1000	Kim and Ann	Martin		General			Strongly object to use of land around Kidlington as this is GB , how is this considered to be very special circumstances. The rep. has objections and questions related to the development. This rep. has referred to points in the 2012 NPPF regarding GB purpose, opportunities and benefits. Is there a requirement for extra affordable housing and housing association houses. Stratfield Break is in a prime location but the houses would not be affordable. Croxford Gardens brought troubles, is there resources for extra police, fire, ambulance, social services, schools and medical centres. Concerned with Stratfield Break it has areas of conservation due to the Great Crested Newt will the council protect this area. Strongly object that Kidlington would lose its village status and identity and we would be controlled by Oxford City.
PR-B-1001	Margaret	Draisey		General			Taking time to consider the plans for the houses around Kidlington, some houses should be built but not the number suggested, as this would double the size of the village and this is not sustainable without new surgeries or schools. There would be a need for better retail outlets in Kidlington to. The Co-op site should be considered for retail spaces underneath the flats. The houses need to be affordable and only for Oxford's unmet housing need, not for London commuters or buy to let. Location is very important, towards Oxford is a no as people want separation from Oxford. Build on Stratfield Farm, behind The Moors but not near the flood plain. Some at Begbroke and Yarnton sider but only a few so that Kidlington remains separate.
PR-B-1002	Chris and Sue	Beach		General			Comments are regarding the Land west of Hook Norton Road Sibford Ferris which has been offered by the landowner with Fisher German as the agent. 50 to 150 is an unworkable number. 50 would change the nature and character of the village. Cropredy and Finmere have turned down developments on this basis already so there is precedent. The main road is already congested, parked cars get damaged. The sewage treatment works are already at capacity. Comments on the submission form - "other supporting information" are misleading. There is only one fee paying school, is this appropriate for affordable housing or any new residents to the village. One small shop is the supermarket, post office and general store and not three separate shops. It has limited post office facilities and a small selection of goods. Limited bus services to Banbury and none direct to Oxford, the nearest train station is Banbury. South side of the field has a badger set which would be destroyed.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1004	Stephen N	Skinner		General			Object in the strongest terms to meet Oxford's unmet housing needs which are based on incorrect assumptions. This would be a gross and pernicious invasion of GB. The existing infrastructure is not fit for its purpose and would be overloaded. The creation of urban sprawl is not addressing the real need for affordable housing in Oxford City or other districts. No serious objections to the previously agreed Cherwell Local Plan Part 1. It is the proposed addendum to the Local Plan that must be critically reviewed.
PR-B-1004	Stephen N	Skinner		General			Objection is based on Oxford's unmet housing need which is driven by the SHMA. Concerned with how and by whom the employment growth has been established. International migrating must be challenged due to Brexit. If the demand is for social housing this needs to be close to places of work. Affordable housing for keyworkers who have no desire to commute through growing bottlenecks. Oxford City needs to give priority to brownfield sites and derelict areas on the east before GB is eradicated forever, rather than offload to other districts. Both the SHMA and the unmet housing needs to be reviewed. the opposition in City Council have concluded that the unmet housing need does not accord with the facts.
PR-B-1004	Stephen N	Skinner		General			Objection is based on infrastructure overload being roads, schools or GP surgeries. Currently the A40, A44 and A34 are grossly overused. The traffic during peak times crawls at Peartree and Wolvercote roundabouts, which are a known areas of congestion. Extra cars will only add to the problems and adding a bus lane is expected to help. The demands on schools and GP surgeries is immense. To get a routine visit from Woodstock is a three week wait which is not unusual. Little wonder A and E Departments are so regularly deluged.
PR-B-1007	Keith	Watson		General			Strong objection to the proposed new housing to be built in Kidlington.
PR-B-1008	Patricia	Watson		General			Strong objection to the proposed new build of housing in Kidlington.
PR-B-1009	Gillian	Forrest		General			Concerned with the scale of the development. The number of houses proposed for North Kidlington are grossly exaggerated. Many new houses are already occupied by London commuters. As a resident of Bladon the proposal next to Woodstock along Upper Campsfield Road is ill placed, this site was rejected only a few months ago for development. The separation between Blandon and Woodstock would erode along with GB and changing the nature of the area. There would be a built up corridor from Wolvercote to Woodstock along the A44. The proposed development in Woodstock by WODC would create massive traffic problems along the A44 and A4096. The required infrastructure like schools, GP surgeries, parking etc. would have a detrimental impact on the rural nature of this area.
PR-B-1010	Richard	Pye		General			Do not agree with the figure of 4,400 houses. This figure was derived from the 2014 'SMHA' and having reviewed this document, it is clear that the methodology used to generate the housing figures for Oxfordshire are highly debateable. The SHMA detailed a number of scenarios that projected the future housing needs of Oxfordshire, yet the final conclusion draws upon only the most optimistic scenario with little evidence to justify this approach. I also have issues with how the methodology to calculate the future housing for Oxfordshire across the districts were used as it is clear these were not applied consistently. This rep goes on to outline in some detail why the methodology is flawed. This includes topics such as economic growth and house prices. In conclusion, the calculations that were used to derive the figure of 4,400 house for the Cherwell District to support the unmet housing need of Oxford are inaccurate and should urgently be re-evaluated.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1010	Richard	Pye		General			Location and relationship to Oxford - With regard to the location of the unmet housing need of Oxford, believe that there is no requirement for these to be located in the Kidlington, Yarnton and Begbroke area of the Cherwell District. It is clear from the options consultation and supporting reports that the majority of jobs and expected growth are located to the east and south of the city. Reference is made to the Interim Transport Assessment and the committed economic growth scenario. The road network around Kidlington is already congested and this would be exacerbated by 4,400 homes. Although Kidlington, Begbroke and Yarnton are well served by public transport, this service relies on the congested roads. Both the bus service and Oxford Parkway offer access to the city centre and not areas of employment. Locating new housing in the Kidlington area is likely to attract London commuters using Oxford Parkway and therefore not the people they are intended for.
PR-B-1010	Richard	Pye		General			Use of the Oxford GB - Object to the possible destruction of GB in Kidlington, Begbroke and Yarnton area. This would contravene Policy ESD14 in CDC's Local Plan and the NPPF. The importance of the GB to the area is evident in the Kidlington Master Plan approved in December 2016. The SHLAA estimated a potential housing land supply for only 320 houses in Kidlington yet there is now an additional 4,400 houses which could only be delivered by destruction of the GB.
PR-B-1010	Richard	Pye		General			Transport and Infrastructure Limitations - Yarnton and Begbroke are close to a major road network which means roads in and around the villages are regularly, heavily congested. Bus services and Oxford Parkway do not provide direct access to areas of employment in the south and east of the city. Greater infrastructure to cope with existing demand is urgently required and additional housing would exacerbate the situation to breaking point. Reference is made to the ITA . Actual detail or timing of transport initiatives is lacking. If new jobs are to be created to the east and south of the city then development should be encouraged here to reduce the burden on the transport system. With regards to journey times in the ITA, I believe a soft target was selected and should be reviewed.
PR-B-1010	Richard	Pye		General			The handling of the consultation has been disgraceful. It was poorly advertised and the timeframe for responding was insufficient and did not take into account the time of year. There was confusion over the deadline that shames the democratic nature of the council. Finally, and also at the Kidlington Parish meeting on 4 January, the representative from CDC publicly stated that the figure of 4,400 was final. Yet this is the first question contained in the Options Consultation document. This contradictory statement calls into question whether Cherwell is truly representing all residents within the district.
PR-B-1010	Richard	Pye		General			In conclusion,vehemently object to the proposals for the various reasons outlined in this letter. Recognise that there will be need for some additional housing in Oxford but believe alternative solutions are open to Oxford City that would prevent the destruction of GB land, the merger of three historically important villages into an urban sprawl, and prevent adding further pressure on already overloaded transport systems, schools and local amenities. Look forward to hearing from CDC on the next steps required to stop these proposals from progressing any further.
PR-B-1012	Calum	Miller		General			The consultation has highlighted that Oxfordshire County Council under the Park and Ride strategy issued in 27th May 2016, has proposed an expansion of the Oxford Park and Ride which is linked to the partial review. There is no proposal to create a slip road from the A34 to access the Park and Ride. There will be considerable congestion, urge you as part of this proposal to engage with Oxfordshire County Council to ensure this is changed. If not considered feasible due to cost, then consider installing a safe cycle route from Islip to North Oxford, allowing cyclist to avoid the additional traffic generated by the Park and Ride.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1018	Jon	Waite	Kemp and Kemp on behalf of Woodstock Town Council	General			There are no specific comments on each question. However, response includes a report which sets out the strong objection to the level of housing proposed in the Plan in the Woodstock area. It questions the need; growth board estimates for housing and employment; SA assessment of the sites. It is also critical of not taking into account already approved 670 homes by West Oxfordshire DC; 2014 planning applications for 1,200 dwellings and their reasons for refusal; importance of World Heritage site and the impact of development on it. Almost doubling the size village, lack of infrastructure facilities, education, health, transport, in particular lack of sustainable transport measures such as buses and cycling.
PR-B-1026	Brian	Simonds		General			As a Begbroke resident object to the plans to build 4,400 houses North of Oxford. Where has Oxford City's figure come from. They can not expand on their GB but propose to build on ours instead. According to the national press Government Ministers are being urged to impose a ban on GB development until we have left the EU. Immigration would account for 37% for the demand for housing, if there is a reduction then the figure could be reduced to 1,600. According to an article in the Oxford Mail in November 4,400 homes are vacant in Oxfordshire. Begbroke, Fern Hill Road, A44 and Spring Hill all suffer with flooding this would be worse if built on the surrounding fields. The approved Eynsham village could have more than 2,000 homes has this been taken into account. This settlement would have a science and business park, so do this reduce the need for Oxford City. Local facilities, amenities, roads and transport are already at full capacity, these can not cope. Uphold the Government's policy and Cherwell's to protect the GB.
PR-B-1028	Amanda and Michael	Roberts and Graham		General			Relating to Islip village. All proposed sites are GB. GB was established to prevent urban sprawl, inappropriate development and destruction of the countryside. Very careful consideration needs to be taken after all other possibilities have been exhausted. Islip has a defined conversation area which is to protect the historical features and buildings. CDC conversation area and appraisals document has Islip described as "special qualities which need to be preserved and enhanced." Section 18 of Management Plan states "The most serious threat to the character and appearance of Islip is the erosion of its rural character and open space." It also states that green space and surrounding fields are vital to the area.
PR-B-1028	Amanda and Michael	Roberts and Graham		General			Islip is a very small village, lacking in infrastructure, services and a significant traffic problem. The village is being used as a rat run to escape the congestion on the ring road or a short cut to the A40 and M40. The village and bridge were not designed to deal with this. The bridge is perilous to use but necessary for those on the south and in the main part of the village and adding more houses will increase the volume of traffic. Quote from CDC conversation area and appraisals document, "Despite road improvements to the north of Oxford, the centre of the village is still subject to an unfortunately high volume of through traffic. Further developments within or outside the conservation area would put pressure on the already congested roads. This detracts greatly from the tranquillity that this rural settlement would otherwise enjoy." The residents have to rely on cars, bus services have been reduced and the trains are very limited. The village shop is a community shop which has limited provisions.
PR-B-1029	Jane	Verdon		General			As a long term resident of Begbroke have grave concerns over the proposed plans to build 4,400 new homes around the village, incorporating Yarnton and Kidlington. Fully understand the need for more housing. If Green belt land is to be developed there must be a way to ensure it is for affordable housing, for local people. Under no circumstances should there be 4-5 bedroom houses for people moving out of London.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1031	JF and MA	Goodwin		General			Concerns regarding the new housing around Begbroke and Yarnton. Living on Spring Hill Road this floods twice a year as the water runs off the fields like a river to where we live, by State Logic and the A44 roundabout. Building here would make matters worse. How will the A44 cope it take ages to cross the road to the bus stop now, this will get worse with the addition of more cars. Doctors are already busy how will they cope with extra patients. The wildlife and views from Spring Hill are exceptional and should not be lost.
PR-B-1040	Robert	Dyson		General			The Cherwell Local Plan 2011 – 2031 (Part 1) Partial Review, has details that are relevant only if the overall plan seemed sensible, and that tweaks were invited. Only know about this consultation because of the Kidlington Development Watch.
PR-B-1041	Debbie	Payne		General			Objection to the building of 4,400 homes on the GB around Begbroke, Yarnton and Kidlington. Living in Enstone the A44 is the regular route taken for Oxford. There is already a serious traffic problem at rush hour like at Peartree which backs up to Yarnton. No alternative routes because Banbury Road through Kidlington and the A40 from Eynsham are the same. Only option is to travel cross country to avoid Yarnton and Woodstock.
PR-B-1041	Debbie	Payne		General			GB threat to Begbroke is significant. Kidlington is nearly a suburb of Oxford, the green spaces need to be maintained between Kidlington, Yarnton and Begbroke to prevent the urban sprawl of Oxford. The population would double with its scale and significantly alter the entire demographic of an historic area. My own business is feeling the effect after two roundabouts were enlarged this has not been an improvement, traffic is still an issue.
PR-B-1041	Debbie	Payne		General			Schools and medical centres are already at their capacity and the added influx in population will put an enormous strain on them. What proposals have been put in place to accommodate these children. Parking at the John Radcliffe is already an issue and there are long appointment times. Natural habitats are being destroyed pushing animals onto the A44. This area of Oxfordshire has already been developed enough, what with the new solar farm at the bottom of the A44, the Begbroke Science Park, the Airport and Motor Park all arriving in the last few years. There is no need for this many dwellings in this area.
PR-B-1042	Peter	Robbins		General			Objection to build houses on GB in and around Kidlington. GB designations were put in place for a reason, to precisely protect development that is being proposed now. The reasons for protecting GB are still valid, to merge Kidlington and Oxford into one large urban sprawl is not attractive. Roads, schools and supermarkets in and around Kidlington and Oxford currently can not cope. Access and parking at the John Radcliffe is already an issue and adds to stress that is not needed. This major piece of infrastructure is trying to cope with a far greater population than it was designed for, how will it cope with the influx of population to the area, it must not be subjected to this.
PR-B-1043	Ruth	Matthews		General			Objection to the building of 4,400 homes on the GB around Begbroke, Yarnton and Kidlington. Living in Enstone the A44 is the regular route taken for Oxford. There is already a serious traffic problem at rush hour like at Peartree which backs up to Yarnton. No alternative routes because Banbury Road through Kidlington and the A40 from Eynsham are the same. Only option is to travel cross country to avoid Yarnton and Woodstock.
PR-B-1043	Ruth	Matthews		General			GB threat to Begbroke is significant. Kidlington is nearly a suburb of Oxford, the green spaces need to be maintained between Kidlington, Yarnton and Begbroke to prevent the urban sprawl of Oxford. The population would double with its scale and significantly alter the entire demographic of an historic area. Own business is feeling the effect after two roundabouts were enlarged this has not been an improvement, traffic is still an issue.
PR-B-1043	Ruth	Matthews		General			Schools and medical centres are already at their capacity and the added influx in population will put an enormous strain on them. What proposal have been put in place to accommodate these children. Parking at the John Radcliffe is already an issue and there are long appointment times. Natural habitats are being destroyed pushing animals onto the A44. This area of Oxfordshire has already been developed enough, what with the new solar farm at the bottom of the A44, the Begbroke Science Park, the Airport and Motor Park all arriving in the last few years. There is no need for this many dwellings in this area.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1045	Nicole	Evans		General			Strongly object to the consultation and the proposal for the large development(s) in and around Kidlington. The village can not sustain an influx of new residents and cars that it will inevitably bring. The current infrastructure can not support this growth. The GP surgery already struggles with appointments. This will add more stress to public services, including already over subscribed schools which are at capacity.
PR-B-1048	Wasim	Mohammad		General			Strongly oppose the application to build 4,400 new homes around the Kidlington area. The current infrastructure can not cope, the A34 is blocked every working day. It would take years to build this number of houses, resulting in misery for local residents and communities. Investment and people would be driven away from the local businesses and towns.
PR-B-1049	Maria	Page		General			Object wholeheartedly against the Cherwell Local Plan 2011-2031 where it shows intent to build its "whole" apportioned 4,400 new homes in the village of Kidlington. Have lived in the city of Oxford all my life and the past 17 years in Kidlington and have enjoyed the "atmosphere" of a village surrounded by open countryside protected by the green belt.
PR-B-1050	James	Wright		General			Wish to object to the provision of 4,400 houses to meet Oxford's unmet housing needs. We enjoy access to the open countryside. House and village borders GB and wish for this to be preserved in accordance with the five principals that the GB serves. To check unrestricted sprawl of large built-up areas. Prevent towns merging. Assist in safeguarding the countryside from encroachment. Preserve the setting and special character of historic towns. Assist in urban regeneration, by encouraging the recycling of derelict and other urban land. The roads are too busy and schools already over stretched with lack of places in Kidlington. Oxford's figure of 550 is inadequate. Oxford need to explore other options, like the speedway stadium at Crowley. Oxford has 300 empty properties, 59 of which have been empty for a number of years. Oxfordshire has 4,400 empty homes why build more. The homes will attract London commuters or from elsewhere, not meeting the local needs.
PR-B-1052	Andrew	Mundy		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. CDC have agreed to protect GB to renege this decision in unjust. Property is adjacent to a large field that regularly floods for up to half a mile. This land is unacceptable for development.
PR-B-1053	David	Hemingway		General			Criticism regarding publicity and that Cherwell should of done more to raise the public awareness of the possible loss of GB. Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-1054	Bharat and Jankee	Badiani		General			Strongly object to the housing proposals in Kidlington.
PR-B-1056	Simon	Parker		General			Criticism on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable. The website is confusing and it is difficult to find the relevant information on how to respond. Poor publicity. Cherwell should have done more to raise the public awareness, rather than keep it from the public.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1056	Simon	Parker		General			As a long time resident of Yarnton am absolutely appalled at the proposed development, which would join our village to others with the use of GB. It would take away paths and bridleways that have been used greatly over the years . Some have already been lost due to Yarnton Manor, have had to submit evidence forms to get these restored. Will these houses be affordable or suitable for the locals with children, who have had to move away due to house prices in the area. Seems that Oxford City would be the ones to benefit. Problems have already occurred with additional housing, drainage, excess water and blocked drains. The current infrastructure, road and transport needs to be sorted and improved. Rush hour traffic is an issue moving at a snails pace in and out of the city. On the A44 there's only one bus, while Kidlington has many that are not full. Divert some of these to the A44, so that Yarnton residents can access the shops, Oxford Parkway or Water Eaton P and R. Please carefully consider the terrible and detrimental effect this will have on the villagers who chose to live here.
PR-B-1057	Julie	Walters		General			Criticism regarding the complicated process to object to the plans. Very difficult to find information as the plans on the website and the documents are very lengthy. This could put a lot of people off objecting.
PR-B-1058	Kim	Bennell		General			Criticism regarding the complicated process to object to the plans. Very difficult to find information as the plans on the website and the documents are very lengthy. This could put a lot of people off objecting.
PR-B-1059	Allan	Anderson		General			Object to the proposal for 4,400 new houses to the north of Oxford. It will unacceptably destroy the GB which CDC had committed to protect and which most Oxfordshire residents wish to retain. It will create urban sprawl with Oxford effectively joining with Woodstock and villages losing their ancient historical settings and identities. Adjoining countryside, scenery and rural pathways will be lost along with trees, hedgerows, ponds and the associated wildlife. There was a negative impact on Bats and Badgers with the creation of Begbroke science park. Local education and health services are already overstretched and roads congested. With the recent introduction of the rail link to Marylebone the new houses are likely to attract London commuters and so unlikely to meet local housing needs.
PR-B-1061	Eileen	Anderson		General			Object to the proposal of 4,400 new houses to the north of Oxford. It will unacceptably destroy the GB which CDC had committed to protect and which most Oxfordshire residents wish to retain. It will create urban sprawl with Oxford effectively joining with Woodstock and villages losing their ancient historical settings and identities. Adjoining countryside, scenery and rural pathways will be lost along with trees, hedgerows, ponds and the associated wildlife. There was a negative impact on Bats and Badgers with the creation of Begbroke science park. Local education and health services are already overstretched and roads congested. With the recent introduction of the rail link to Marylebone the new houses are likely to attract London commuters and so unlikely to meet local housing needs.
PR-B-1062	Danielle	Greenspan		General			Strongly object to the development of GB around Kidlington, Begbroke and Yarnton which is purposefully allocated to minimise urban sprawl and allow the preservation and integration of natural environments and habitats. Am aware of badger setts, bat colonies, Red Kites and lesser Spotted Woodpeckers, species of conservation concern. If the development of land is to make it financially productive then environmental technologies such as a wind or solar farm should be considered. The current infrastructure is barely sufficient despite recent improvements in North Oxford, and before the addition of 4,400 new houses.
PR-B-1063	Jeptha John Hammond James	Rowan-Hull		General			Strongly object to the housing proposal for Yarnton and Begbroke which will damage the beautiful English landscape. It will destroy our forefathers ridge and furrow landscape which has lasted for generations. It will also destroy an environment which is inhabited by a number of animals

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1066	AR	Currell		General			Object to the proposed development around Kidlington which has had little publicity considering it will potentially have a big impact on our everyday living. Traffic will increase along with pollution, and health services and schools stretched further. GB with its walks will be lost and quality of life will suffer as air, light and noise pollution increases. A large village will become a town and question where the employment is coming from. CDC's existing policy along with the government's to protect the GB must be upheld.
PR-B-1067	A	Ioannides		General			Object to the proposed plans for commercial and residential development on the GB between Yarnton and Begbroke. It would destroy the very little countryside left between these two villages already under stress due to lack of flood defences, health services and policing and the increasing pollution and traffic issues.
PR-B-1069	JP	Lyes		General			Strongly object to a consultation process that takes place after the key decisions have been made. The project is of profound importance to Kidlington and to be presented with a fait accompli in such a peremptory manner is insulting and indicative of unprofessional haste. The meeting appeared to be more about political ambition than resolving the pressing issue of affordable housing. No explanation has been offered as to why CDC is willing to solve Oxford City's unmet housing needs with a hefty cost to Cherwell ratepayers. The consultation is the least user friendly of any project I've seen and has all the hallmarks of ticking a box.
PR-B-1070	Darren	Rea		General			Object to the plans to develop on GB around Kidlington, Yarnton and Begbroke and the five purposes that the GB serves should not be taken lightly by the council or disregarded. CDC have previously guaranteed to protect the GB. The preservation of the setting and special character of historic importance is being ignored. Spring Hill in Yarnton is of particular importance regarding King Charles removal from Oxford by Cromwell. There are pockets of GB that flood regularly and if at any point it affects us will hold CDC accountable. The road system is already stretched and adding 5800 more cars is unsustainable. Gaining entry to a nearby school is very difficult and there appears to be no forward planning with regards to school provision. There are many empty properties within Oxford, as many as 4,400 reported by the Oxford Mail, which should be used. Oxford City has forced the development needs onto CDC who should refuse its demands as SODC has done.
PR-B-1071	Rachel	Rea		General			Object to the proposals to develop on land around Kidlington, Yarnton and Begbroke. The GB is one of the main reasons for choosing to live in the area and have concerns regarding flooding as a result of over-development. It cannot be feasible to create 4,400 new homes without infrastructure to support it. The roads are already congested and the introduction of another train station or tramline will impact on residential parking. There needs to be plans to accommodate all the additional children generated by these houses as schools are already at capacity.
PR-B-1072	Peter	Gaskell		General			Object to the proposed 4,400 homes around Kidlington, it is not sustainable and will increase pressure on local amenities and threaten the environment. Although new housing is needed in the UK thought needs to be given to the size and location. The local roads are already overcrowded and schools and health services insufficient to meet increased demand. GB designation is a permanent protection and government guidance states that unmet housing is not a reason to use GB. The government's manifesto promise and CDC's policy to protect GB must be upheld.
PR-B-1074	Donna	Resek		General			Object to plans to build 4,400 new houses in the Yarnton, Begbroke and Kidlington area. It would destroy walks, nature and wildlife. The roads are already congested and local flooding is a problem. The doctors are currently overstretched and the school in Yarnton oversubscribed.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1075	Judith	Kleinman		General			How can Oxford City have less land available for development than Cherwell Council? Cherwell have spent years on their Local Plan and now have to accommodate 4,000 more houses. Bicester and the surrounding villages have already provided large amounts of farm and GB land. Oxford seem to prefer that other councils deal with the issue rather than use their own GB or brownfield sites. Bicester and Caversfield already suffer with the growing population and rapid expansion. Schools are over subscribed, there is a shortage of Doctors and medical facilities just to name a few.
PR-B-1077	Alyson	Bateman		General			Object strongly to the proposed building on GB surrounding Begbroke, Yarnton and Kidlington. The road infrastructure would be overloaded as even now the A44 cannot cope when there are events at Blenheim Palace. There are fragile bat colonies around Begbroke Lane and a wide range of flora and fauna, typical of older land, Begbroke is mentioned in the Domesday book. CDC stated that 'Through our commitment to the Environmental Strategy and Local agenda 21 we aim to minimise the impact our activities have on the environment'. These aims cannot be achieved by adding 4,400 homes to a village of 345 houses. Begbroke Lane bridleway is used by many allowing access to the countryside. The three villages concerned do not want to become a suburb of Oxford but wish to maintain their own identities.
PR-B-1080	Mr and Mrs	Horne		General			The consultation has been poorly publicised and possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-1081	Lynn	Pilgrim		General			The consultation has been poorly publicised and the possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable. CDC appears to be more concerned with following the process of consultation than considering the views of local residents and acting on what people are telling them.
PR-B-1083	Susan	Knox		General			Am opposed to plans to build 4,400 homes on GB around Begbroke, Yarnton and Kidlington. The government and CDC have both promised to maintain GB and the purpose it serves of checking urban sprawl, towns merging and preserving countryside and historic sites. Understand the need for more houses but are told there are 4,400 empty house within Oxford. These could be renovated and brownfield sites examined before encroaching on GB. Any development should follow the CDC plan, if South Oxfordshire can challenge the allocation so should CDC. This amount of houses would change the character of the village with its open spaces, birdsong, historical places and pathways. Local infrastructure is under extreme pressure with roads congested and doctors at capacity. Oxford Parkway is good but could create a big expensive dormitory town for London.
PR-B-1086	Clare	Boddington		General			Strongly object to the building of 4,400 homes in GB to the north of Oxford, it will swamp Kidlington which will become an urban sprawl annexed to Oxford. The roads will not be able to cope with the increased traffic as they are already at capacity as are the schools and other services. There needs to be infrastructure plans in place. There appears to be no exceptional circumstances to justify developing on GB and the government and CDC's policy promises to protect it. The consultation process was inadequate as it was not well publicised and held over the Christmas period. At a meeting in January in Kidlington we were told the figure of 4,400 is final and likely to go ahead regardless of objections received.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1086	Clare	Boddington		General			Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Do not destroy the GB which is of great importance and the government promised to protect.
PR-B-1087	Colin	Homans		General			Object to the building of 4,400 houses in the area of North Oxford and the villages of Kidlington, Yarnton and Begbroke. There has been no explanation for the numbers required or an indication that all brownfield sites have been fully examined. What housing numbers have been allocated to greenfield sites within the city and other districts? Consideration needs to be given to the impact of the UK leaving the EU and how affordable housing will be achieved. Why have Plans for the Northern Gateway and scientific and industrial parks been granted if housing is required? The GB is an amenity for all, designed to prevent urban sprawl and preserve communities, it should only be built on in exceptional circumstances. The roads are very busy and Oxford Parkway has added to this. Any increase in traffic will increase levels of air pollution. What has happened to the plans for the new station for Kidlington at Flatford Place? Extra land will need allocating for the additional services and facilities that will be required for such a development. A plan as significant as this should not have been presented to local people in the month leading up to Christmas allowing little time for consideration and comment.
PR-B-1088	Bryan	Rugg		General			The consultation has been poorly publicised and that possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-1090	Richard and Karen	Walecki		General			Object to the development of 4,400 homes being proposed for Kidlington, Yarnton and Begbroke. These are areas of natural beauty and historical countryside enjoyed by many for recreation. The scheme goes against the GB policy that CDC agreed to in 2015. The local roads would not be able to cope with an increase in traffic and the bus services have been reduced. The local school and doctors surgeries are already at capacity and there is a flood risk in Begbroke. The proposed houses will create a dormitory town for London commuters as house prices are not balanced against wages.
PR-B-1091	Mark	Bailey		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. The main roads A34, A40 and A44 are already heavily congested and could not cope with additional traffic. The valuable countryside used for recreation should not be lost.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1093	Christine	Arthur		General			Serious concerns regarding the proposed development around Begbroke and Yarnton in GB. The perceived housing needs are questionable and it's doubtful that developers would deliver houses for those who need it most, in particular key workers. Encroachment on GB contradicts CDC's own policy agreed in 2015 and the wishes of 76% of residents. Access to the sites would increase traffic considerably though the village and the A44 is already congested at peak times. The impact on local infrastructure would be negative, doctors and schools are already at capacity. Begbroke would lose its identity and become part of one sprawling expensive dormitory town for London commuters.
PR-B-1093	Christine	Arthur		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. There will be increased traffic on an already congested A44, threat to wildlife and loss of recreational facilities. The fields are unsuitable for development due to the flood risk.
PR-B-1098	Michael	Bott		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website and the paperwork is long and challenging. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable. This rep. has sent a letter to his local MP Nicola Blackwood after attending the Kidlington Development Watch meeting at Exeter Hall. Object to the use of GB. The representatives from CDC were unable to address why they have accepted to look at Oxford City's shortfall. Criticism with the original survey and developers.
PR-B-1102	James and Kate	Hamilton		General			There appears to be a lack of empathy for Kidlington from CDC. While other districts had time to reflect on the proposals, the exhibition at Kidlington was poorly timed at Christmas.
PR-B-1103	Margaret	Homans		General			Object to the plans to build on the GB around Kidlington which should only be built on in exceptional circumstances.
PR-B-1105	Norman and Janet	Bates		General			Object to the timing and conduct of the consultation which was poorly publicised. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-1106	Dr Anne	Johnson		General			Two heritage related objections to the proposal to build at the top of Noke Hill. The first on archaeological grounds as the whole area is an important historic landscape. It includes a Romano-Celtic temple complex and the site of Islip Roman villa and later prehistoric settlement. Both have been afforded protection by Historic England and until now the GB. My second objection is on literary and landscape grounds. Much has been written on the celebrated view from Noke Hill which probably inspired William Shakespeare and Lewis Carroll. Shakespeare may well have travelled through this area as the shortest route to London. It is also said that Carroll took inspiration from Noke Hill in his writing of Alice In Wonderland.
PR-B-1107	Susi	Peace		General			The impact of 100 houses in a small village such as Islip would be devastating. Small developments should be encouraged which have less impact, in particular the burden of additional traffic crossing the bridge.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1111	Pat	Clissold		General			Would like to make comments on CDC's local plan that identifies potential development sites in and around Weston on the Green, Wendlebury and Heathfield to assist Oxford's unmet housing need. The need for affordable housing is a concern for all however only where employment is a priority. Excessive development of GB will detract from the attractiveness of Oxford which currently attracts millions of tourists. Good planning should preserve the identity, beauty and peace of villages such as Weston on the Green, accommodating modest developments that don't require infrastructure changes or destroy their character. Traffic in and around Oxford is already a problem and the proposed developments will increase congestion and potential for accidents.
PR-B-1117	Georgina	Tibbs	Barton Wilmore on behalf of Bellway Homes Ltd and Archstone Projects Ltd	General			Bellway Homes Ltd and Archstone Projects Ltd submitted a full planning application (ref:16/02370/F) for 85 homes on land at Church Leys Farm, Blackthorn Road, Ambrosden in November 2016. We remain of the view that Ambrosden, and this site is a sustainable location to accommodate new housing to meeting the needs of the District, and the wider needs of the County.
PR-B-1118	Susan	Doucas		General			Have concerns over the local plans and invasion of GB. A lot of the houses would be sold to people from outside due to the railway link to London. The protection of agricultural land is essential to grow food. It provides clean air and is an asset to the city and surrounding villages. In the case of Spring Hill it is important historically and acts as a 'soak' during heavy rain. The roads cannot take any more traffic, Cassington Road is narrow and main roads are gridlocked in the mornings. Oxford should use every available space first including land for future commercial development.
PR-B-1120	Dr Ben	Knighton		General			Support Yarnton PC's response to the consultation which makes clear some of the environmental consequences, particularly for flooding and destruction of the GB. Development would create an Oxford suburb and along with the Northern Gateway would create gridlock on the already congested roads. Take particular exception to the Sustainability Appraisal 8.22f. The plan would leave the three villages with little open space and there are not sufficient medical facilities. Schools provision also needs to be taken into consideration. If there is going to be a large development there needs to be a huge investment in infrastructure, funded by the profitable housing developers and Oxford City, not the taxpayers of CDC. Development is much more needed in other parts of England and Wales.
PR-B-1120	Dr Ben	Knighton		General			If Oxford's housing needs have to be met then transport needs to be addressed. There must be a light railway system connecting North and South Oxford and two by-passes.
PR-B-1125	Bruce	Cummings		General			Object to the building of 4,400 houses in and around Begbroke. The CDC consultation process has been woefully inadequate, the papers were lengthy and difficult to read and the loss of GB around Yarnton, Begbroke and Kidlington should have been highlighted. Holding the public exhibition in Kidlington over the Christmas period was unreasonable. GB land was designed to prevent erosion of the countryside and a space between villages and in 2015 CDC committed to preserve this. These villages are rich in history, culture and are part of the fabric of the county of Oxford. The proposals will create urban sprawl from Oxford to Woodstock, and do not want to live in a dormitory town for London or extension of Oxford. Land at the rear of Fernhill Road is prone to flooding. There would be an impact on residential roads that are quiet and narrow and could not cope with any significant increase. Oxford City should review its forecast following Brexit and review their contribution by looking at brownfield sites within their boundaries.
PR-B-1127	David	Betts		General			Understand that the % of affordable housing required in Kidlington is 35% but in Oxford is 50%. Assume if sites are allocated in Cherwell for Oxford then the 50% figure will be adopted. Any development should be infrastructure led.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1128	Tim	Edgington		General			Object to the building of 4,400 houses around the GB area of Kidlington. Am not against new housing but the numbers need to reflect the present size of the village to prevent it from becoming a suburb of Oxford. The road network is already busy and will not be able to cope with any increase, neither will the school and doctors. GB should not be built on according to the NPPF unless there are exceptional circumstances.
PR-B-1129	Michael and Jo	Collett		General			Infrastructure in this area could not cope as the A34 and A44 are regularly gridlocked even with the new traffic system at Wolvercote roundabout. Schools are already under pressure and doctors at capacity. Feel strongly that use should be made of previously developed land in Oxford and some of the proposed employment sites. There is plenty of space at Osney, perhaps the old Blue Circle Cement works could be developed to make a new Garden Village. CDC should uphold its existing policy to protect GB and not succumb to pressure form Oxford City.
PR-B-1131	Gillian	Hopcroft		General			Object strongly to Kidlington meeting Oxford's unmet housing and believe CDC should have contested the amount allocated. Not enough consultation or flexibility has been used to consider the impact on Kidlington with regards to infrastructure and additional pressure on already congested roads. The GB must be protected as well as 'the gap' which has been well documented in the recently agreed adopted master plan. It was never the vision for Oxford to sprawl into Kidlington. It is disturbing that North Oxford Golf Club is a site being considered when Oxford City haven't considered Southfield Golf Course within the city. It is a recreational facility used by many and would not be easy to replace. Oxford City needs to look at providing more housing before employment for example the Northern Gateway. Pear tree Park and Ride would be a perfect site for housing if it is relocated as planned.
PR-B-1134	Neil	McKendrick		General			The consultation has been poorly publicised and the possible loss of GB should have been highlighted. Given the importance of the partial review there should have been a summary leaflet to all residents potentially affected. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-1135	Terence and Patricia	Moss		General			Object strongly to the proposed building of 4,400 houses on GB around Kidlington. This goes against the government's manifesto and exceptional circumstances have not been demonstrated to use GB.
PR-B-1137	Jill	Drake		General			Strongly object to the proposals to help Oxford meet its housing needs. Traffic is already congested and there will be increased pressure on the schools and health service. The loss of GB with natural habitats and recreational space would be irrevocable to current residents and future generations. The land was deemed to be GB and protected for a reason. Realise there is a housing crisis and some development is inevitable. The government has announced a £1.2 bn fund aimed at building starter homes on brownfield sites so this could be a vital way forward. Residents are likely to accept a small increase in council tax if this was to develop brownfield sites and protect the GB. If the GB and village identities are to be sacrificed it must be for affordable houses for local people and key workers and not London commuters. This is a situation being played out across the country, it must be possible to find a model which maintains a reasonable balance.
PR-B-1138	Rhian	Pye		General			Strongly object to the proposals to help Oxford meet its housing needs. Traffic is already congested and there will be increased pressure on the schools and health service. The loss of GB with natural habitats and recreational space would be irrevocable to current residents and future generations. The land was deemed to be GB and protected for a reason. Realise there is a housing crisis and some development is inevitable. The government has announced a £1.2 bn fund aimed at building starter homes on brownfield sites so this could be a vital way forward. Residents are likely to accept a small increase in council tax if this was to develop brownfield sites and protect the GB.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1139	Ken	Martin		General			Object to the plans to build 4,400 homes around Kidlington, Begbroke and Yarnton. The figure is based on flawed and biased analysis that was influenced by property developers. CDC should challenge the figure as SODC have done or demand an independent review. Oxford City should look within its own boundaries and use available land for housing rather than business. Appreciate some houses are needed and the number proposed in Cherwell Local Plan 2015 was reasonable. The GB is rich in wildlife, highly valued by residents and prevents urban sprawl. It is clear this proposal will contravene the government's manifesto promise, CDC's 2015 policy and there is no exceptional circumstance to justify it. The local and main roads are already congested and have to support the local bus service. Local schools and health services are under pressure and will not be able to cope with the expansion.
PR-B-1141	Christopher	Villiers		General			Object to the proposals which encroach on GB for the needs of Oxford. The consultation and publicity within Oxford was inadequate. The housing shortage in Oxford is of their own making as land that is available is allocated to employment exacerbating the problem. If the GB has prevented Oxford city from expanding then why does the same not apply to Cherwell. In CDC's Local Plan adopted in 2015 GB was designated to restrain development pressures and exceptional circumstances to override this have not been demonstrated. If development were to go ahead around Kidlington it would not solve the housing problem as they will attract London commuters.
PR-B-1142	Alan	Lodwick		General			While it is appreciated the time and resource constraints the Council may be under, these are not acceptable reasons to produce an unsatisfactory and damaging plan. The Council appears to be obsessed with process rather than substance and to be sacrificing the Green Belt in the interests of getting a plan submitted quickly. Holding the consultation over the Christmas period with little publicity was unacceptable. There is a lack of strategic coordination of planning in Oxfordshire. Employment generating developments are encouraged in different districts without any reference to each other or to their overall consequences. What strategic planning exists is being imposed on the local Councils without consultation by unelected bodies such as the LEP and its unrealistic Strategic Economic Plan while the consultants undertaking analysis are not independent and their work is not subject to independent verification. There is a need for an overarching and fully democratically accountable body to take responsibility for strategic planning and truly independent and thorough analysis of future needs. This might best be done by the restoration of strategic planning powers to the County Council or by a new Unitary Oxfordshire Authority. Only through properly resourced and co-ordinated strategic planning can a sound plan be established and delivered and sustainable development achieved.
PR-B-1143	Dr Pamela	Roberts		General			CDC's policies ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment and ESD13 Local Landscape Protection and Enhancement should both be protecting such places from development. Building on many of the sites will contravene these policies.
PR-B-1147	Joan	Tossell		General			This decision is too important to be rushed, the priority is to get it right.
PR-B-1148	Terry	Tossell		General			This decision is too important to be rushed, the priority is to get it right.
PR-B-1149	Charles	King		General			Object to building 4,400 homes in and around Kidlington. Main roads into Oxford and through Kidlington are already congested with no space to increase capacity, and services and amenities overloaded. GB provides the green space that makes life pleasant for all ages. If GB is to be compromised, to provide housing for Oxford, it would be better to build a new Garden Town close to the existing main roads with the necessary infrastructure. Land on each side of the M40 between junctions 8a and 9 would have good access.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1150	Rob	Ellis		General			Object strongly to the proposals and the number of issues not addressed by the document. The unmet housing needs are based on assumption and unfounded assessments on jobs that currently don't exist. There is no definition of exceptional circumstances with regards to GB or justification of how the current situation could be classified as exceptional. There will be an impact on wildlife, traffic noise, congestion and pollution. Local facilities and services are not mentioned and need addressing, and the sites are prone to flooding. The characters of historic Yarnton, Begbroke and Kidlington will change as the merge together. Increasing Yarnton to the north will mean residents crossing the A44 to access services and amenities. There are many brownfield sites which should be considered i.e. upper Heyford. Transport infrastructure is already overloaded in and around Oxford so there should be no development until a rapid green transport system is in place.
PR-B-1153	Roger	Carter		General			Object to the building of 4,400 new homes around Kidlington. GB is intended to prevent urban sprawl, stop towns merging together and preserve the setting and special character of historic towns and villages. An application to build a football stadium on GB by Water Eaton Park was rejected two years ago. This number of houses would almost double the size of Kidlington which is prone to flooding. The roads couldn't cope with the increase in traffic and doctors and schools are at capacity. Journey times would become unrealistic and houses would attract London commuters.
PR-B-1155	Jeffrey	Wright	Begbroke Parish Council	General			The Consultation has been poorly publicised. Cherwell should have done more - especially via a Cherwell Link article and all other means to raise public awareness of possible loss of Green Belt with this revised local plan. State that, it was very difficult to find consultation details on the council website. The information has to be carefully sought in order to challenge findings - not easy for any people. The hand-out information at the Consultation was very limited in scope. Strongly feel that the Council failed to hold consultation meetings in parishes such as Begbroke, which could be very affected by these plans.
PR-B-1159	Tamsin	Leckie		General			Am concerned at how badly publicised the consultation has been in Gosford and Water Eaton. Unlike Kidlington had no separate, dedicated planning meeting and were given little opportunity to voice our concerns at the Kidlington meeting. There might be fewer residents in our parish but our rights and concerns are just as relevant and our area stands to be much more radically changed.
PR-B-1161	Janet	Warren		General			Do not believe that Cherwell should be expected to provide 4,400 houses for Oxford. It is unacceptable that Oxford is planning for more jobs when it's unable to provide housing to go with it, and this in itself causes house prices to rise. The number should be reduced for current need and not projected need. It would make sense to create jobs elsewhere in the country where employment opportunities are scarce and there is unoccupied housing. The impact of Brexit needs considering as it may affect university research funding and therefore jobs. GB should be retained in line with current legislation. Do not support SO18 as the starting point for transport. As carbon-based transport becomes less sustainable the development of jobs and homes together to reduce transport will make more sense and become more attractive, for employers and businesses alike.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1162	Roger	Bellamy	Hornton Parish Council	General			Conclusion: The Parish Council opposes the plan. Assumptions are individually flawed and cumulatively undermine the presumption of both the need and desirability for continued heavy development in the county. Question whether the current level of housing targets are customer and not developer led. Moving more and more medical facilities from Banbury to Oxford and building additional housing which will travel to Oxford doesn't make sense. If Oxford is not capable of meeting its housing need then investment in the Horton Hospital should be included in the infrastructure requirements to create necessary first class medical facility for increased population numbers. A guarantee should be written into the plan that the Oxford University Trust increase spending on this site rather the current plan of a reduction in the Horton's facilities and capacity. Cherwell should not accept additional housing development.
PR-B-1164	Ian	Drury		General			Object to the proposal that CDC should assist Oxford with 4,400 homes. Am not totally opposed to giving help but am opposed to the extent particularly when Oxford's contribution is 550 homes. Not convinced that sufficient scrutiny has been given to identifying areas within Oxford's boundaries. The proposal would be catastrophic for Kidlington and Begbroke, increasing the population by 9,000 with no infrastructure proposals. Services are already stretched including schools and traffic problems would be increased. Also concerned that at some point CDC may have additional housing needs.
PR-B-1168	Gwyn	Bevan		General			Object to the plans to build an extra 4,400 houses on GB north of Oxford. It is unacceptable to build on this scale, not only will it destroy the countryside as a buffer against the city but also the infrastructure and services are currently overstretched. The road system is on the edge of chaos and schools, doctors and hospitals are at capacity. This development would not ease the housing pressure as Oxford Parkway has made North Oxford an attractive place for London commuters.
PR-B-1169	Simon	Clark		General			Strongly object to the planning proposal to build 4,400 new homes in Begbroke, Yarnton and Kidlington. Appreciate the pressure from the government to meet housing targets but this needs to be instigated in a manner that is supported by existing residents. An area needs to be found that will allow for the new infrastructure of roads, schools and health services that will be needed. Brownfields sites should be considered as they meet this requirement. The open countryside with its wealth of GB land provides walks and makes this area attractive.
PR-B-1171	Mark	Rowan-Hull		General			Object strongly to any plans to develop on land surrounding the village of Begbroke, especially the western side. It would have a disastrous impact on the beautiful ancient countryside with its rare and historic ridge and furrow landscape and species such as rare butterflies as identified by BBONT 2012. It would ruin the identity of the community and increase congestion and pressure on transport around the local area. The GB has been strongly protected by the council and government thus far.
PR-B-1171	Mark	Rowan-Hull		General			This second rep provides a more lengthy and detailed objection to development around Begbroke with regards to ecological concerns and a BBONT survey. Begbroke has ancient fields and trees which house a great variety of flora and fauna and its easy access from Oxford means it is regularly used and enjoyed by many. To build on this ancient ridge and furrow landscape around Western Begbroke would be disastrous both aesthetically and ecologically. I understand the dire need for housing and sympathetic to the need for affordable housing but believe there are far more suitable and less fragile areas that could accommodate houses..

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1172	Atul K	Patel		General			Strongly object to the planning proposal to build 4,400 new homes around Kidlington which would be swallowed up by Oxford city. Suggest spreading the load more widely rather than concentrating in such a small area. Yarnton school is oversubscribed and the surgery under resourced with long waiting times, more homes would make this worse. The A34 and A44 are congested and journey times getting longer, more housing will exacerbate the problem. Traffic jams in housing areas increases pollution which has health implications. Land around the A44/A34 junction is consistently flooded and building could have an impact on communities further downstream.
PR-B-1174	Ellis	Davies		General			CDC failed to give enough prior notice or publicity to the consultation. There was no exhibition in Begbroke and Yarnton despite the villages being potentially most affected. The documents are lengthy and complex so need considerable time to read. The consultation period should therefore have been longer and not presented before Christmas. The Cherwell Link failed to give any communication to the real issues including loss of GB. The Cherwell website is complicated and poor in giving details of the consultation process. The Cherwell representative at the Kidlington office was not well versed about the consultation.
PR-B-1174	Ellis	Davies		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. There hasn't been any convincing evidence for GB to be used for housing. Property developers and agents appear to have more say than the general public. Oxford should develop sites by increasing heights of buildings.
PR-B-1175	Clare	Cooper		General			Consideration needs to be given to schools, doctors, traffic and recreation facilities if Kidlington is doubled in size.
PR-B-1176	Laura	Pritchard		General			The consultation has been poorly publicised and that possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable. Consideration needs to be given to providing school places and improving the infrastructure including shops.
PR-B-1178	Bryony	Thomas		General			Am concerned over the planned additional housing in the Kidlington area which will almost double the number of houses. The infrastructure cannot withstand any additional traffic as despite work on the roundabouts at Cutteslowe and the Woodstock Road there is still congestion. There has been an increasing number of fatal accidents. Development would be better within the city where office blocks and industrial sites are planned or to the South with access to Cowley. Banbury could also be considered as a centre for employment. The proposed areas include GB which is a permanent designation and government guidance states that unmet housing is not a reason for building on it. The government's promise and CDC's existing policy to protect the Green Belt should be upheld. The many footpaths are well used for leisure and health.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1179	Andrew	Clark		General			Object to the proposal to build 4,000 houses in North Oxford particularly around Yarnton. The infrastructure around North Oxford even with recent renovations to Cutteslowe and Wolvercote roundabouts is not sufficient to cope with the increase from such a big development. Most of the predicted growth is around the Science Vale to the South and roads will not cope with this. Pollution will increase and road safety decrease. GB is meant to be protected it allows wildlife to thrive and move, stops urban sprawl and retains the identity of communities. Brownfield sites need to be considered, as is being done elsewhere.
PR-B-1183	Annie	Kotak		General			Am opposed to the plans to build 4,400 houses on the GB around Begbroke, Yarnton and Kidlington. A plan is needed to recycle, reuse and renew existing buildings to create new, environmentally efficient homes to meet demand. GB should not be destroyed, it prevents urban sprawl and is a natural habitat for wildlife. It provides walks and scenery for our well being and retains the character and identities of Yarnton, Begbroke and Kidlington villages. Development would put us in danger of flooding and increase pollution which will have an impact on health, wildlife and the environment. There is insufficient infrastructure in place with roads already congested and medical facilities overloaded.
PR-B-1184	Noresh	Kotak		General			Am opposed to the plans to build 4,400 houses on the GB around Begbroke, Yarnton and Kidlington. A plan is needed to recycle, reuse and renew existing buildings to create new, environmentally efficient homes to meet demand. GB should not be destroyed, it prevents urban sprawl and is a natural habitat for wildlife. It provides walks and scenery for our well being and retains the character and identities of Yarnton, Begbroke and Kidlington villages. Development would put us in danger of flooding and increase pollution which will have an impact on health, wildlife and the environment. There is insufficient infrastructure in place with roads already congested and medical facilities overloaded.
PR-B-1186	Christina	Miskin		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Object to the destruction of open countryside and damage to the environment, flora and fauna. The scale of the proposals will lead to the complete loss of all village identities.
PR-B-1187	Nigel	Homent		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1189	Bella	Kotak		General			Am opposed to the plans to build 4,400 houses on the GB around Begbroke, Yarnton and Kidlington. A plan is needed to recycle, reuse and renew existing buildings to create new, environmentally efficient homes to meet demand. GB should not be destroyed, it prevents urban sprawl and is a natural habitat for wildlife. It provides walks and scenery for our well being and retains the character and identities of Yarnton, Begbroke and Kidlington villages. Development would put us in danger of flooding and increase pollution which will have an impact on health, wildlife and the environment. There is insufficient infrastructure in place with roads already congested and medical facilities overloaded.
PR-B-1190	Fiona	Thomas		General			Objection to the proposed building of 4,400 houses around Kidlington, Yarnton and Begbroke. Speculative job creation, in an area which does not have an unemployment problem and will increase demand for housing does not justify building on GB. Infrastructure of roads, hospitals and schools will be stretched and there is criticism of the planning abilities to deliver a solution to this, based on the proposals. GB is a permanent designation and unmet housing needs is not a reason to destroy it, the government's manifesto promise and CDC's policy to protect it should be upheld. Oxford City should not be building business parks and shopping centres if they need houses. Concerns regarding existing road congestion and health issues linked to pollution. The green space with its flora and fauna, ancient meadows and beautiful walks needs protecting.
PR-B-1191	Simon	Eaton		General			Oxford has failed to manage its transport, economic development and housing stock. It has failed to redevelop its housing resources by working with the university and landowners and this should not be shouldered by the GB around Oxford. Building additional houses on the GB will increase the numbers commuting resulting in longer delays which impacts on costs for local and non-local business. Oxford needs to build more medium rise accommodation within the city for students and other residents. There needs to be consideration given to creating economical growth and jobs outside Oxford and a plan for education and transport.
PR-B-1193	Lucy	McCurdy		General			Object to the proposed building around Kidlington, particularly to the loss of GB. Additional houses would increase traffic and pollution and overstretch schools and doctors. GB, which is a place of beauty, is used and enjoyed by many and a habitat for wildlife. It also provides a safe place for horse riding. The development is based on the possibility that housing will be required and not an immediate need.
PR-B-1194	John	Woodward		General			The planning consultation appears to contradict the local plan which stated that Begbroke and Yarnton should remain separated from Kidlington and Oxford. Understand the need for more houses but can't understand why GB around our villages should be destroyed. The Shipton-on-Cherwell cement works and quarry north of Kidlington should be considered. It is a brownfield site that is next to the main railway line which would reduce the impact on road traffic. The traffic on the A44 is busy and crossing to the bus stop almost impossible. Car speeds make the road dangerous as does the roundabout no longer fit for purpose.
PR-B-1196	Elaine	Fullard MBE		General			Council urged to reconsider destroying the GB and instead focus on denser housing on brownfield sites. The thick hedges that are a habitat for smaller birds are non-existent with new houses.
PR-B-1197	George	Purves		General			Objection to the proposed plans to use the GB which would not benefit Kidlington as it has very few green spaces.
PR-B-1197	George	Purves		General			Kidlington should not make up the short fall for Oxford's housing plans and be turned into a suburb. Colleges should be forced to build student accommodation within their grounds thus releasing rented properties in the city. Colleges also own vast amount of lands in and around the city. Oxford's need is questionable given the statistics and houses would not be generally affordable but provide developers with huge profits. The new development at Barton may mean there is no housing need

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1197	George	Purves		General			Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Kidlington should not take Oxford's overspill when there is vacant land and properties within its boundaries at Botley, Cowley and Headington.
PR-B-1199	Nick	King		General			Whilst appreciating the need for new housing there are numerous possibilities for brownfield development that won't cause such catastrophic and irreparable damage to the environment. Plans to build on land between Cutteslowe Park and the A34 will spoil the views, the GB, and impact on recreational facilities. There is insufficient infrastructure to support the homes proposed in particular roads.
PR-B-1204	Ruth	Smith		General			Objection to 4,400 homes being built in the GB around Kidlington and the surrounding area. Kidlington at present is poorly serviced with regards to infrastructure and facilities and if these were addressed the local community may be more receptive to proposals. The new road layouts at Wolvercote and Summertown have added to the congestion in Kidlington and the access to the new train station has not improved the traffic situation. Building on GB land will cause localised flooding as Kidlington is prone to flood.
PR-B-1205	Karen	Jackson		General			Strong objection to the proposal to build 4,400 houses in Yarnton and Begbroke over and above the already agreed building plans. The identity of the villages and GB would be lost to urban sprawl which CDC had promised to protect in 2015. The infrastructure cannot cope at present with roads heavily congested and a proposed bus lane unlikely to alleviate problems. Additional traffic will increase pollution affecting the wildlife and villagers health. House prices in Kidlington have increased since the completion of Oxford Parkway so the development is likely to create a dormitory town for London and unlikely to solve Oxford's housing needs.
PR-B-1206	Carol	Broadbent		General			Object to the proposal to build on GB around Yarnton which would be unsustainable without more infrastructure. Doctors are at capacity and parking around the primary school is limited and dangerous at present. The village provides access to the countryside to get the exercise the government is encouraging to stay fit and healthy. It does not want to become part of Oxford and provide homes to London commuters. Appreciate there is a need for development which would be better as a new village with its own infrastructure.
PR-B-1207	Douglas and Louise	Lloyd		General			The consultation has been poorly publicised and the possible loss of GB should have been highlighted. It was difficult to find the consultation details on the website and they were long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable.
PR-B-1208	Hilary	Hastings		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Whilst understand the need for development it would create an urban sprawl and take away GB which protects the character of villages. Local infrastructure is already struggling, as are schools, health services and wildlife.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1209	Rupert	Page		General			Strongly disagree to building 4,000 houses in and around Kidlington which are not required. Traffic problems will increase, and schools and health services will be stretched. GB with walks and views will be lost, and natural habitats destroyed. Quality of life will suffer, with air, noise and light pollution increasing.
PR-B-1209	Rupert	Page		General			Strongly object to further development of Kidlington and the surrounding GB. The infrastructure is not available as schools, doctors and roads are already at capacity. The land is used for many leisure activities.
PR-B-1210	Tina	Merry		General			Object to the proposals to build 4,400 homes around Kidlington with little consultation and what appears to be little chance to review the plan. It is not viable for Kidlington to sustain this development as roads are congested, shops inadequate and schools and doctors full. The village of Kidlington surrounded by spectacular countryside will be turned into an overpopulated, under resourced concrete jungle with traffic congestion, air, noise and light pollution.
PR-B-1210	Tina	Merry		General			Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-1211	Natasha	Smith		General			Strongly object to the proposed development of GB around Begbroke, Yarnton and Kidlington where infrastructure is already overloaded. The A44 is unable to cope with traffic volumes despite recent improvements and more housing would bring more pollution and environmental damage. Pressure would increase on GP's and schools and the service they offer would inevitably suffer. There would be an impact on the wildlife that can be seen in the surrounding fields. The proposed development goes against every promise made by CDC and the government regarding GB. All three villages would ultimately lose their individuality. This rep provides details taken from the government site that states the aims of GB, paragraphs 79 to 92. Attention is drawn to paragraph 89 that states the exceptions to building on GB.
PR-B-1212	Penelope	Henderson		General			Object to building 4,400 new homes in Kidlington and taking away the green space that makes the village an attractive place to live. The green space provides the fresh air and exercise that keeps people healthy and is home to many species of wildlife. The land is also prone to flooding when the river level is high and has reached gardens at The Moors.
PR-B-1215	Malini	Perera		General			Am distressed to learn CDC is considering a large housing scheme close to Gosford. This small GB area is valuable for leisure and exercise. Any increase in the population will add to the traffic congestion and noise pollution. Water Eaton Lane and the adjacent field is water logged during heavy rain and would get worse with any development. The newly built railway station attracts people from outside so most local people will not be able to afford the new houses.
PR-B-1218	Maureen	Rosenberg		General			As a Lakeside resident have concerns about this project in particular the access to it from Linkside Avenue/Lakeside. Access from this area would increase noise pollution to an area that is already suffering from increased noise from the new train line. These quiet roads will no longer be safe areas of play and it will have a detrimental affect on the environment which needs protecting.
PR-B-1219	SP	Weston		General			Concerns regarding the proposed building under review for Kidlington and the surrounding area. The greenfield site at The Moors is well used by many for recreation and to enjoy the abundance of wildlife. Concerns for the school class sizes generated by the increase in numbers.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1220	Heddwen	Hewis		General			Strongly oppose the development proposals at Spring Hill, Yarnton, which has the potential to cause serious flooding in the village. As the name suggests it is a source of numerous springs, and after heavy rain water rushes down the hill often flooding the road and some of the properties below. It is also an area of nature beauty with historic pathways and in the GB. Local roads are already congested, schools oversubscribed and the health service struggling.
PR-B-1237	Deborah	Wright		General			Wish to object to the provision of 4400 houses to meet Oxford's unmet housing needs. The Green Belt should be preserved, access to countryside should be enjoyed and do not wish to be joined to other settlements or to Oxford. Infrastructure is already overloaded, roads are too busy. Oxford could do far more to provide housing by exploring other options such as building on the old greyhound stadium. There are 4400 empty homes why build more? Oxford's own provision is inadequate, homes will be for commuters, consultation period was deliberately at a time of year when some people are away. Information has been difficult to find.
PR-B-1246	Christine	Kennell		General			Object to proposals to build 4,400 new houses north of Oxford based on assumptions of growth. Oxford City should make better use of existing areas within the city boundaries, particularly in the area of Cowley and Blackbird Leys where there are large employers. The site of Southfield golf course should be considered for houses and land around Pear Tree Park and Ride. Strongly object to development within the GB around Kidlington, which is pleasant and unspoilt, with footpaths and walks by the canal and river used and enjoyed by many. Developing north of Oxford will increase traffic problems and air, light and noise pollution. Public services will be overstretched resulting in increased crime rates.
PR-B-1247	Mark	Turner		General			Object to the number of houses being proposed for Kidlington village and the surrounding area. The infrastructure is not sufficient enough to meet the traffic needs and lacks the shops and amenities to cope with such a large housing development.
PR-B-1248	Christine	Clark		General			As residents of Yarnton are bewildered why Oxford City are being allowed to consider destroying our village. Yarnton and Begbroke have been here for centuries and our GB, history and way of life are precious. Our walks and historical settings are there to share with anyone who wants to enjoy the open spaces and beautiful scenery to get away from towns. There are many empty houses in and around Oxfordshire which should be refurbished as the infrastructure is already in place and would be quicker and cheaper. Most of any new houses are likely to be sold to people in London due to the proximity of Oxford Parkway creating an unwanted dormitory town. People should have choices how they live.
PR-B-1249	Andy	Cove		General			Strongly object to plans to build a significant number of houses around Begbroke and Yarnton. This land is GB, used by local people to enjoy the village environment and take advantage of the countryside for walks, discover the ancient history and local community activities. It is not acceptable to create one large urban sprawl joining Oxford to Woodstock. The roads are busy and the hospitals and surgeries are overwhelmed and cannot accommodate any more people.
PR-B-1254	Philip	Redpath		General			The figure of 4,400 is an addition to those recently adopted by the Cherwell Local Plan. The figures are based on an assumed requirement and are disproportionate to the actual needs of the area. The country is already over populated and cannot sustain the housing numbers that are set by the government. The areas favour developers, however increase pollution, a loss of landscape which causes concern for all local communities.
PR-B-1255	Kezia	Sheppard		General			Criticism that it was difficult to understand the documentation, it was lengthy, confusing and full of jargon. This makes it very difficult to respond to what is an important issue. Will favour the developers in deterring people from expressing their views.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1260	Elizabeth	Sheppard		General			You have made it extremely difficult for the public to respond to this consultation. The paperwork is long, confusing and the language is challenging. Due to this have not had the time or ability to respond to all of the questions. Am sure that many will be deterred from providing their views. Such an unfair advantage for the developers and other interested parties who will have the knowledge and resources to deal with this sort of obfuscation.
PR-B-1264	Drs	Slater and Harrison		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. The timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable. Many concerned residents of Kidlington and the local area remain unaware of the plans. It was not reasonable to give such a short notice period for people to respond, considering that CDC have time to produce this. It is difficult to find the consultation details on the website and the paperwork is long and challenging.
PR-B-1265	Kathleen	Hayes		General			There has been no communication in Yarnton with regards to the proposals and residents have therefore been denied the opportunity to take part in the consultation. The time to respond was short and the documents difficult to access and understand. Am surprised that households in Yarnton and Begbroke were not informed of such a major development that will change the character of the villages and put pressure on local infrastructure, amenities and services. Acknowledge the need for affordable housing in Oxford and the need for county assistance where possible, but not the allocation. Priority should be given to approved Local Plan for Cherwell's needs before the additional 4,400 for Oxford's needs.
PR-B-1265	Kathleen	Hayes		General			Destruction of the GB would be detrimental to the residents of both the city and district and CDC had undertaken to protect it. Development should only take place if it is beneficial to all parties and when there is no other option. The GB retains Begbroke and Yarnton's character and identity and provides walks and leisure for all to enjoy. The GB is largely farmed providing food and employment, both of which would be lost
PR-B-1265	Kathleen	Hayes		General			There is already considerable pressure on local services in the area which would be made worse by the proposals. Medical services are stretched in Yarnton and all other amenities are in Kidlington which are only accessible by car since the bus service was withdrawn. Any new development around the A44 would increase traffic problems and noise and air pollution. There is no bus service to Oxford Parkway or Water Eaton Park and Ride facility. If there were any benefits to implementing the current proposals they would be far outweighed by the devastation of the local area and reduced quality of life for all residents.
PR-B-1266	Linda	Ward		General			As a general point, the consideration of an extra 4,400 houses around the villages closest to Oxford's GB represents a major change of Cherwell strategic planning policy as set out in the current Local Plan. This was to focus growth in the towns, protect GB and spare villages from being swamped. Do not think it is reasonable to treat this as a partial review. This, in normal sane times would require a full review to consider sustainability / feasibility impacts across the District.
PR-B-1266	Linda	Ward		General			Object to the timing and conduct of the consultation process. Criticism regarding the procedure for consultation to destroy GB. Also criticism over the publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website and the paperwork is long and challenging. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable. The district and City Council need to co-ordinate a full public consultation on the retention of GB since this impacts us all.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1267	Ian	Hudspeth		General			The key issue is that the demand is for Oxford City, therefore the houses should be located near there along with commercial developments to provide jobs. Acknowledge there is a demand for affordable housing especially for the young. The A44 and A4260 corridor has excellent public transport routes into Oxford and London, along with good connections to the A34, M40 and M4. The area is a good choice for development but need to protect individual communities and avoid coalescence of villages.
PR-B-1267	Ian	Hudspeth		General			GB has served us well, but now acts as a constraint which needs to be revised. Do not advocate building on all of the GB, but need to consider the land and see if it is serving its community. Should develop on green corridors which reach out to the countryside, so that we can develop excellent sustainable transport links such as quality cycle and footpaths. If GB land is released areas currently adjacent should be considered for inclusion into a revised GB and corridor, like Woodstock. Development near Woodstock can only be done if the entire required infrastructure is taken into account and is worked with WODC. GB land that isn't fit for purpose is land between the Science Park and the railway line. It is poor quality farmland with little value and would be good for development with no coalescence between Begbroke and Yarnton. Oxford Parkway station has land to the south east on GB which would be good for development of houses or world class sporting and recreational activities. The ice rink and stadium would allow for housing in these areas reducing the demand outside Oxford. To the north of Kidlington would encourage residents to use cars which adds to congestion. Potential in the area is great. A master plan needs to identify the infrastructure along with indications to the phasing of any development. Released GB must be replaced and communities' identities respected.
PR-B-1268	Garry	Lancaster		General			The consultation materials on the CDC website were lacking in brevity and quite difficult to follow. Was unable to find a map of Kidlington with all proposed sites marked. Please improve this aspect for any future consultations.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	General			The Parish Council is extremely concerned by the huge volume of complex new reports issued for consultation. It is also concerned about the tight timescales for the review. It is unreasonable to launch these proposals on the local community so late in the 2 year process. A detailed statement on the Green Belt, Oxfordshire Growth Board, and Kidlington Masterplan SPD is provided in paragraphs 1.01 to 1.18 of the representation.
PR-B-1269	Deirdre	Wells	Red Kite Development Consultancy on behalf of Kidlington Parish Council	General			Conclusions: The expectation that Cherwell has a capacity to provide 4,400 new homes to meet Oxford's needs is not well explained and that this should be urgently provided. The current position is that the principle of accommodating growth in Cherwell, and the scale, remains unconfirmed, and is subject to assessment as to whether it is compatible with other material considerations. The importance of the Green Belt around Oxford is highlighted and that its function is to prevent coalescence with other settlements and to protect the countryside from encroachment. These objectives remain of major importance today and for the future. Concerned about the impact on air quality due to significant new housing in the absence of any realistic funding and delivery of new strategic infrastructure and improvements which cannot/will not be delivered by developers, the substantial growth indicated is not sustainable and should be rejected. Are concerned about the likely adverse impact on the viability of the character, cohesion and individuality of the village, the village centre and planned enhancement of the village (Kidlington Masterplan SPD). Are not convinced by the scores allocated to various factors in the SA. Many of the factors do not show a significant difference between the various search areas. More detailed work is required before any valid conclusions can be demonstrated.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1270	P and H	Stoddart		General			Regarding paragraphs C.247 and C.248 set out in the local plan can areas of search F to I be deleted from this review? What is going to be the impact of the 2,200 dwellings at Eynsham. Will this just impact West Oxfordshire's commitment of 2,750 or will it impact Cherwell's 4,400 commitment? Eynsham is in close proximity to West Oxfordshire's border with Cherwell as well as with Oxford itself and therefore satisfies the principle of housing being as close as possible to where the need arises –see the second bullet point in paragraph 3.31. Housing is being built close to where the requirement is needed. Have CDC given consideration to North Oxford's Golf Club. , which covers 80 acres, thus providing 1,600 dwellings of the 4,400 commitment from Cherwell. This land has good access to the road and public transport. It is close to Oxford Parkway and Water Eaton P and R for easy access to Oxford.
PR-B-1275	Dagmar	Carr		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-1276	John	Carr		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-1277	Roger and Eileen	Henman		General			Object in the strongest terms to the Council's proposals for residential and other developments between Begbroke, Kidlington and Yarnton. The Oxford GB was created specifically to protect Oxford's setting, to prevent coalescence of villages such as Begbroke, Kidlington and Yarnton and to prevent urban sprawl. The proposal's are completely unacceptable and should be rejected. The short notice for residents to attend the consultation at Kidlington was an attempt to limit the number of objections. This is not acceptable.
PR-B-1278	Helena	Boyce		General			The consultation has been poorly publicised by CDC, they should have done more to inform people of the intentions to revise the local plan. It is potentially putting enormous pressure on the infrastructure of the community, such as traffic, schools and GP's. Along with the destruction of a substantial amount of GB in the area.
PR-B-1279	Neil	Bennett		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.
PR-B-1279	Neil	Bennett		General			After attending Begbroke Village Hall was shocked to discover the extent of the proposed developments. Firmly reject these plans and urge your commitment to preserving GB, which CDC made in 2015. The plans will destroy our village and GB along with some historic walks such as Frogwelldown Lane, which has been documented being used by the King of England during the English Civil War. Infrastructure currently can not cope. The roads are full of potholes and repairs to these are long overdue. Living in Yarnton some of the proposals to build are only half a mile away from my house. Concern is with flooding due to amount of development, where will the water that drains into the ditches go? Schools, NHS and amenities are already over stretched along with the cuts. If struggling now to recruit where do we expect teachers and doctors to come from with the increase in house prices. Where are the new residents expected to work, and how will they travel to the area, by car which will add to the already congested roads.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1282	John	McArthur		General			Residents of Sibford Ferris and directly affected by the two proposed sites. Not in favour of Cherwell Councils Part 1 for these two sites being considered for development of 100+ houses. Also not in favour of Part 2 for these sites as potential for affordable housing of 10-99 homes. Sibford Ferris is an independent village which over 50 years has increased its house numbers from 50 to 100, and have had our fair share of development. It is critical that there is good public transport with new developments. There is only one single bus service in the morning and evening which is very restricting. The rep. has provided a list of recent, current or new developments in and around Banbury that are built or waiting to be built, many still waiting for buyers. It's questionable as to why we need to keep on developing, have these sites been taken into consideration?
PR-B-1282	John	McArthur		General			These are the issues that would like to highlight regarding Sibford Ferris. With the average house prices in Sibford Ferris at £431,000 affordable housing would only be affordable for cash buyers or those on a large incomes as Oxfordshire is expensive and still out of the range of many. The geographical factor seems to have been overlooked or ignored for affordability. When affordable housing has been built the S106 agreement can be lifted after three months if not sold, this could prevent locals being able to buy these properties. The road is very narrow at Little London and on the Main Street the current issues would increase with more traffic. No parking outside the shop. The sewage works will not cope. There is a listed building near to the sites and what would the impact be on the long standing badger set?
PR-B-1282	John	McArthur		General			There is criticism regarding the list of facilities and infrastructure the landowner for these two sites has produced. Sibford Ferris has no Doctor's surgery, primary school, church, public house and no village hall. Broadband is average and there are limited bus services. There is a private fee paying school and the small convenience store also houses the post office.
PR-B-1285	Jeffrey	Wright		General			Object to the provision of 4,400 houses to meet Oxford's unmet housing needs. House and village is within a GB and wish to preserve this in accordance with the five GB purposes. Check the unrestricted sprawl of large built up areas. Prevent the merging of towns. Assist in safeguarding the countryside from encroachment. Assist urban regeneration with the encroachment of recycling derelict and other urban land. Preserve the setting and special character of historic towns. Infrastructure is already overloaded and roads are too busy. We enjoy the open countryside and do not wish to be joined to other settlements. Oxford could do far more, their own provision is not enough. Have they considered building on the old speedway stadium. Oxford has 300 empty properties, 59 have been empty for a number of years. Oxfordshire has 4,400 empty homes why build more. These homes will be destined for London commuters and not meet the local needs.
PR-B-1285	Jeffrey	Wright		General			Criticism at the timing of the consultation over the Christmas period when many people are away and are focused on other issues. Many of the proposals are complex but most know that they want GB to be preserved.
PR-B-1288	Maurice	White		General			Would like to register objection to the proposals on the basis that the potential addition of over 4,000 dwellings is overwhelmingly large and will largely occupy GB. The character of the area would be impacted. Particular concerns with the roads as these already suffer during the rush hours to and from Oxford despite recent improvements. There is a threat to the recreational amenities for the locals and also the wildlife and their habitats. Local services are under stress and new provision for these lags behind adding to that stress. Long waiting times at GP's, schools are already overcrowded.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1288	Maurice	White		General			The value of GB has been clearly underwritten in the NPPF. NPPG states that unmet housing on GB would only be considered under very special circumstances. Locally there is a need for low cost, affordable housing to allow locals and key workers to remain in the area. Private developers would not provide this and evidence of current local building is to cater for well off commuters and private landlords who will buy the cheaper housing. Limiting the number of houses may be considered acceptable and limiting the increase in local employment that has people moving against the peak flow. Not however at the expense of any valuable recreation amenity. The North Oxford Golf Course has land considered for development to which I'm concerned as football, cricket and rugby spaces already under threat, so this needs protecting. Residents require access to open green spaces near to the canal and the River Cherwell as these act as a recreational parkland. Fundamentally, in favour of the original structure plan for Oxfordshire that allowed for the development of towns such as Banbury and Bicester rather than Oxford in order to ease development problems. The proposed plans are a developers dream, properties will be expensive, aimed at commuters and have no impact on house prices. Itsi questionable why Oxford has gone for jobs on it's Northern Gateway site if housing was such a problem.
PR-B-1289	Berwyn	Jones		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Main concern is the destruction of GB. Understanding is GB can only be built on in exceptional circumstances. A recent report claims there are 4,400 homes unoccupied homes across Oxfordshire.You cannot justify the destruction of GB.
PR-B-1289	Berwyn	Jones		General			A number of bus services have been lost over the years and the cycling infrastructure in and around Begbroke, Yarnton and Kidlington needs regenerating. Traffic in and out of Oxford during rush hour is extremely heavy and any new developments will only add this problem. The local health service is already overstretched, it can take up to three weeks for an appointment, this is not good and will only get worse with an increase in the population in the area.
PR-B-1290	John	Perris		General			The Sibford Ferris sites are unsuitable in terms of infrastructure, the rural road network, its rural character, and the impact on the surrounding countryside. The Oxfordshire County Council transport policy aims to reduce pressure on the road network by encouraging housing close to jobs. Sibford Ferris has no train, no taxi and poor bus service the timetable of which would not allow commute to Oxford via Banbury. The road connection to Sibford Ferris is one B road and unclassified roads making it unsuitable for commuting. There is no school or doctors and the sewage system is already overloaded. The sites are close to the Cotswold ANOB and adjoin village conservation areas.
PR-B-1291	Kumudu	Perera		General			Agree to only 600 new houses being built in the Kidlington area. As long as you have the provision to build extra schools or extend Gosford Hill. A lot of the surrounding area could benefit from an upgrade of the street lights to LED lighting as many are old.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1292	Christine	Bower		General			Objection to build 4,400 house on the GB north of Oxford, residents of Kidlington chose to live here to be away from the hustle and bustle of a major city. GB offers residents fresh air less noise and light pollution and enjoyment of the open countryside. To build on GB between Oxford, Kidlington, Begbroke and Yarnton would change the area to one massive urban sprawl. The countryside and nature needs to be protected, not destroyed, keep the open space rather than encourage living in a concrete jungle. The local infrastructure will not be able to cope with the additional houses. Kidlington's high street needs improvement to the shops, not a reduction in the size of a supermarket to make way for flats. Traffic, schools and health services would be far greater stretched. Flooding is an issue in the area, to build on flood plains would lead to disaster. Proposal based on incorrect assumptions about job growth in Oxford. There are alternatives to building on GB which would protect historic Oxford. Make better use of previously developed land and using some proposed employment sites in the city for housing instead. There must be an alternative and between Oxford City and CDC hope that you are able to find one.
PR-B-1293	Diane	Perry		General			Strong objection to housing proposal. The roads are already busy and journey times long. Traffic is a hazard in Bladon. There is a lack of facilities to accommodate more people or housing.
PR-B-1296	Graciela Inglesias	Rogers		General			Criticism with holding the consultation over the Christmas period. Having attended the exhibition on Exeter Hall, left more confused and demoralised. Criticism regarding the documentation that was present at the exhibition. A very resilient and patient planning officer did his best to convey the details about the proposals.
PR-B-1299	Clive	Sherriff		General			Am in total opposition to the proposal by Oxford City to build 4,400 houses on the scarce, long designated GB in the Kidlington, Begbroke and Yarnton area, an area already developed beyond its infrastructure, resources and transport capabilities. Oxford City have undeveloped land within the ring road, but have experienced previous opposition. Oxford City have seriously mismanaged their needs over the last 50 years. The university students use a lot of housing which hasn't been provided by the universities who have considerable amounts of land that could be used for accommodation, like Christchurch Meadow and University Park. Look at these options before imposing on the residents of Cherwell. The GB is beneficial to recreation and many varieties of wildlife such as otter, fox and deer. It is the only natural wildlife corridor to the wildlife reserve at Stratfield Brake. To build here would destroy the valuable ecosystem. Does it still remain the case the CDC will commit to preserve and protect GB areas. Will CDC oppose Oxford City's outrageous demands?
PR-B-1306	Frank	Vreede		General			This entire proposal reads like the antithesis of Nelson Mandela's "Long Walk to Freedom". It proposes a policy of economic apartheid under a cloak of equality, where the masses in neighbouring counties sacrifice their identities to protect and enhance the lives of the privileged few.
PR-B-1307	Victoria	Campbell		General			The consultation process has been inadequate and unfit for purpose. Criticism regarding publicity and that Cherwell should have done more to raise the public awareness as many local residents were not aware that this was happening. Difficult to find the consultation details on the website and the paperwork is long and challenging. The timing of the consultation over the Christmas period is not reasonable. Confusion regarding the deadline for responses.
PR-B-1309	Kate	Miklaszewska-Gorczyca		General			Objection to the timing and conduct of the consultation process. Poorly advertised and only knowledge was being informed by local residents. Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website and the paperwork is long and challenging. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1310	Tara	Prayag		General			Concerns about the timing and consultation process. Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington and Gosford over the Christmas period is not reasonable and at worst deliberately blocking. Criticism that City Council have had the plans since July 2015 why has it taken so long to consult with the residents, with such a short public consultation process.
PR-B-1311	Keith E	Stratford		General			Criticism to the way that CDC have handled this consultation and the time given to respond. Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website, the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable and verging on the devious.
PR-B-1312	Carl	Parker		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB, so that residents and those directly affected can voice their opinions and concerns. Difficult to find the consultation details on the website. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-1313	Helen	Broxap		General			object to the proposal to build 4,400 house in the Kidlington and Cherwell area. overall very disappointed and angry that the council would reassign protected GB for housing for inadequate reasons.
PR-B-1313	Helen	Broxap		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website and the paperwork is long and challenging. Choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable. Was away from the area during this time and therefore was not able to attend the consultation at Exeter Hall. Kidlington has a great community spirit, which would change with the extra houses. Did not chose to live in a larger town, the results of this would be hugely detrimental and has been badly thought through.
PR-B-1314	Nicole and Eugene	Brooks and Griffin		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website and the paperwork is long and challenging. The Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-1317	Rachel	Walton		General			To hold such an important consultation over the Christmas period will essentially prevent some interested parties submitting a response and the whole process has had a glaring lack of publicity. Saw no mention of the consultation in the Cherwell Link which is a surprise as this consultation is central to the way housing in the Cherwell District moves forward. The consultation document was also not well designed for the layman which makes submitting a response in the short time available very difficult.
PR-B-1318	Laura	Walton		General			Criticism with the timing of the consultation over the Christmas period, was it to deter people from raising any objections. Poor publicity by the council regarding the developments and the website lacks information. Found about the developments through a campaign group page on Facebook.
PR-B-1319	Mr and Mrs	Unwin		General			The consultation has been poorly publicised and the consultation period too short. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition over the Christmas period was unreasonable.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1320	Vassilis	Athanassoglou		General			Criticism regarding publicity and that Cherwell should of done more via the Cherwell Link and all other means to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website and the paperwork is long and challenging. PR-B-1321	Catherine R	Mundell		General			Wish to question and strongly object to the consultation and communication process. Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website and via the internet search. The paperwork is long and challenging, without the help of local groups it wasn't clear as to what was being proposed. Council has discretion on the timing and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable. This would have excluded many in being able to participate and comment on these plans.
PR-B-1322	Judy	East		General			Criticism regarding publicity and that Cherwell should have done more via the Cherwell Link and all other means to raise the public awareness of the possible loss of GB.
PR-B-1323	Karen	Suter		General			Objection to the timing and conduct of the consultation process. Poorly advertised and only knowledge was on receipt of a leaflet from Kidlington Development Watch. Choosing to hold the consultation meetings over the Christmas period is not reasonable and impacted the levels of attendance.
PR-B-1324	Katie L	Stratford		General			Criticism to the way that CDC have handled this consultation and the time given to respond. Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details on the website , the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable and verging on the devious.
PR-B-1326	Jan and Chris	Lacey and Plant		General			Object strongly to the timing and conduct of the consultation process. Criticism regarding publicity and the difficulty in finding information on the website. Gained information from local action groups and Street life. The paperwork is long and challenging. Cherwell should have done more to raise the public awareness of the possible loss of GB. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-1327	John	Pilgrim		General			The consultation has been poorly publicised and the possible loss of GB should have been highlighted. It is difficult to find the consultation details on the website and they are long and difficult to read. Holding the public exhibition in Kidlington over the Christmas period was unreasonable and there was insufficient time allowed for comments.
PR-B-1329	Jaimie	Pattison		General			Strong objection to the plans to develop on farmland and GB around the boundaries of Kidlington, Begbroke and Yarnton. With the significant increase to housing and population this will put an enormous strain on an area that is already densely populated. Noise, air and light pollution from existing roads will increase and impact the residents health and wellbeing. Research has identified that road noise aggravates Dementia and Alzheimer's. It can take up to three weeks to get an appointment at the doctors due to a lack of funding and a staff. The schools are already overstretched with large classes, increasing the population will only make matters worse for these.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1329	Jaimie	Pattison		General			A benefit enjoyed by all the residents is the easy access to the countryside, which will be reduced if built upon. The impact to wildlife and their natural habitats will be considerable. Has any consideration be given to the badger sets or deer that live in these sites. How will trees, streams and hedgerows be protected on the ancient track ways and paths. Concerns that litter will increase in the area. Some of the sites are areas prone to flooding to build here will increase this, with the loss of land, tree's and hedgerows which absorb water. The three villages are a close community. The history and heritage in these areas is traceable and valued, there identities and benefits will be wiped out, they must be protected from intensive development. The Government's Manifesto promise and Cherwell's existing policy to protect GB must be upheld. It is not reasonable to build on GB and farmland when there are alternatives that need investigation.
PR-B-1329	Jaimie	Pattison		General			Objection to the manner in which this consultation has been conducted. Through the work of local residents this is how it has been brought to the attention of many affected by the plans. The timing of this over the Christmas period and general lack of contact from the council indicates a genuine lack of respect for the wishes of the residents of these villages. Have been unable to find anywhere on your website to lodge my objection and it has been extremely difficult to get reliable information
PR-B-1330	N M	O'Mahoney		General			Find it unbelievable that Oxford City can not find and utilise suitable sites around its own perimeter, for example Greater Leys. How much land does the University have that is not utilised. This needs to be questioned as they add to the lack of houses in Oxford. They need to build to accommodate the students. Students having to rent rooms in family homes which reduces the number of properties available for local people to buy or rent.
PR-B-1330	N M	O'Mahoney		General			Criticism regarding publicity and that Cherwell should have done more to raise the public awareness of the possible loss of GB. Difficult to find the consultation details and the paperwork is long and challenging. Council has discretion on the timing, and choosing to hold the consultation and public exhibition in Kidlington over the Christmas period is not reasonable.
PR-B-1332	Edward	Bradley		General			Concerned as house is very close to farmland between Oxford and the Sainsbury roundabout and has the North Oxford Golf Club on the other side of Banbury Road. This would result in a significant increase to traffic flows if building was to be approved on either possible site. Development of housing appears to be on the same scale as the Northern Gateway. There has been virtually no publicity unlike that scheme. Any proposed sites would have a major impact on Kidlington and the surrounding areas. Decisions based on limited consultation must be viewed with caution. During the Northern Gateway public meetings, development in South Oxford would be more sensible, as this is were employment is.
PR-B-1333	Zoe	Christodoulou		General			Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Oxford City have approved business expansion at the Science Park and Northern Gateway. Both of which could be used for housing first. More business lead to more housing, if Oxford City want more business they must only allow it if they find areas in Oxford for housing. It is not the responsibility of CDC.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1334	Jenny	Betts		General			Objection to the unsatisfactory way in which the consultation has taken place. The south of Cherwell are the areas most affected, we were last to receive the public exhibition. No publicity in any villages or the Cherwell Link. Only through the Kidlington Development Watch was this brought to the residents attention. It was not helpful to have this over the Christmas period and its feels rushed. CDC have been less fair with the community around Kidlington and there seems to be little concern about ensuring that they have been adequately consulted. It's so important as this relates to the loss of GB.
PR-B-1335	Natalie	Usher		General			This rep. has provided detailed criticism regarding the quality, structure of the documents and the process. The consultation timeframe is too short and fell over the Christmas period. With the amount of documentation that goes with the consultation and the impact on local life more time is required, with more meetings and exhibitions. The whole process was poorly advertised by the council.
PR-B-1335	Natalie	Usher		General			Strongly object to building on GB due to the detrimental impact on the local area, loss of green space and natural habitats. If there is a compelling case made to build, it makes sense to prioritise the sites between the A34 which is a natural boundary and Cutteslowe/ North Oxford as they are close to the city. The gap between Kidlington and Oxford is important, but roads here are not accessible. The transport paper rates these sites as most sustainable and so having fewer adverse effects. Public transport is good in this area and are close to Oxford so cycling is more accessible, if the infrastructure was improved. Housing in this area could be linked and incorporated with Oxford and the Northern Gateway. If GB development was proven, sites should be prioritised as they are more sustainable than those outside the A34, impact on the local area is less adverse.
PR-B-1336	Patricia	Stokes		General			It seems iniquitous that Cherwell has to provide 4,400 homes to meet Oxford City's assessed future requirements. Where and what type of jobs will there be. For key workers such as nurses and teachers where are these workplaces anticipated. It seems that additional pressure for these extra houses to ensure that they are close to Oxford rather than throughout the Cherwell area. No regard has been given to the residents of Kidlington, which already has 6,000 homes, to increase this by 73% is unsustainable with the existing resources of schools, health services, shops, roads and other facilities. Alternatives can be found as a former office building was converted to homes. Find smaller zones. Look at disused and redundant buildings which are close to residential areas, they are already in areas of where people want to live. There would be less impact and remove the need for daily mass commuting from outside Oxford.
PR-B-1336	Patricia	Stokes		General			Traffic will increase during the rush hour, with six mile traffic jams northwards from Oxford City centre. The quality of life would be impacted for Kidlington residents with increased air, noise and light pollution. There will be impacts to wildlife and their natural habitats which enhance the countryside setting. Walks, views, open spaces and areas of unpolluted air have been protected through the designated GB. Strongly object to development in the GB. Thought GB is a permanent designation and that Government guidance states that unmet housing need is not a reason for grabbing GB for development. The Government's Manifesto promise and Cherwell's existing policy to protect the GB must be upheld. Its important to avoid urban sprawl and ribbon development from Oxford to Kidlington, to prevent merging of a village to a city.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1336	Patricia	Stokes		General			Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Protecting GB for our future generations. Use brownfield or re-develop unused offices and warehouses. The scale and scope is too much for Kidlington to absorb.
PR-B-1337	Marcus	Lloyd		General			Criticism regarding publicity and the lack of communication. It was only brought to attention through posts on street life social network. Criticism regarding the timing which was over the Christmas period, was this intentionally done to prevent residents from having the opportunity to respond in time.
PR-B-1341	Olga Lascano	Choperena		General			Criticism regarding publicity and the lack of communication. It was only brought to attention through posts on street life social network. Criticism regarding the timing which was over the Christmas period, was this intentionally done to prevent residents from having the opportunity to respond in time.
PR-B-1348	Prof Ephrat	Tseëlon		General			Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-1350	Dr Autumn	Rowan-Hull		General			Strongly oppose and register objections to the new developments around Begbroke (west) and Yarnton. This would destroy the countryside's flora and fauna. The area is home to rare butterflies and has a unique grasses due to the natural wet spring (Spring Hill Road). The area would lose its natural outstanding beauty and development would create unacceptable congestion in the area.
PR-B-1356	Mrs Dee	Bailey		General			Totally against this new plan, especially since S Oxfordshire has refused their extra houses. Assumed that CDC will have to take more because of this. Options C or E would amount to Bicester expanding down to Weston on the Green and incorporating Launton, Chesterton and Wendlebury in to one built up area, all with virtually no facilities. Rep goes on to heavily criticise existing and proposed developments at Bicester and the changes to rail services in the Town. Housing for Oxford should be as near to the City as possible - not anywhere near Bicester. We need facilities in Bicester, not more housing.
PR-B-1357	Dianne	Jones		General			Object to the proposed development around Begbroke because of the impact it will have on the A44, flooding and the wildlife. Rowel Brook regularly floods and more development will make this worse. Also a huge impact on the A44 which has existing highway safety problems. Loss of green belt will have a huge impact on the wildlife. Green Belt should not be built on. People will not be able to walk the footpaths like they do now.
PR-B-1359	Kate	Berney		General			Object to the proposal to build 4,400 new houses to the north of Oxford because it would lead to: unacceptable destruction of the GB, impossible pressure on local infrastructure, roads, schools and health services, loss of village character, identities and ancient historical settings, loss of countryside, local walks, scenery, fresh air. Do not believe that local villages and GB should be expected to meet the enormous unmet housing need of Oxford City.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1360	Alexandra	Berney-Stewart		General			Object to the proposal to build 4,400 new homes to the north of Oxford. Do not agree the estimated number of houses required by Oxford and from what source it is from. Do not believe that GB should be sacrificed. Option I and Bicester Garden Town would be better locations than north Oxford. Road connections between Kidlington and Oxford are not adequate. Is CDC's contributed from existing numbers of residents and does it include data in trends in the Cherwell area?
PR-B-1361	Margaret and Alan	Crick and Trump		General			Object to the plan for a huge number of houses to be built in areas A and B around Kidlington and Cutteslowe. Houses will not be affordable, would be on green belt, would affect Cutteslowe Park. The scale is completely disproportionate and would have an enormous impact on the area. Traffic congestion would be worse. CDC consultation has been minimal, especially for Oxford City residents. The email in the summary leaflet does not work.
PR-B-1362	Mary	Whitby		General			Specifically in relation to development in and around Weston on the Green, Wendlebury and Heathfield; 1) affordable housing needs to be located where employment and the need for employment is a priority; 2) Excessive development of green areas around Oxford will detract irremediably and irrevocably from the attractiveness of the city; 3) good planning should preserve the identity, beauty and peace of villages close to the city 4) large developments on the edge of villages will destroy their character; 5) large developments require appropriate infrastructure; 6) traffic around Oxford is a particular problem.
PR-B-1363	Nick	Southern		General			Building yet more houses around Kidlington suggests reckless disregard for GB, vital agricultural land and the pressure on floodplains. CDC should resist pressure from Central Government and the private sector.
PR-B-1364	Elaine	Boswell	North Newington Parish Council	General			What evidence has been seen to show that Oxford is unable to meet its housing needs? Should be asking Oxford to revisit it's own ability to deliver required number of new dwellings. The housing, if needed, should be within areas of search A and B and coming out to Heyford and Bicester. There is already good transport and road infrastructure in to Oxford from these areas.
PR-B-1365	John	Wass		General			Whilst not necessarily objecting to small developments the development of 100 houses is wholly inappropriate for the village of Sibford Ferris. It would completely dwarf the village. The infrastructure is inadequate. There is no state school, pub or GP in the village, only a small shop.
PR-B-1162	Roger	Bellamy	Hornton Parish Council	General			The Parish Council has provided detailed comments in its representation on the assumptions in the Cherwell Plan; they are: 1) National Net Migration; 2) Equal Levels of Population Growth; 3) Realistic Housing Targets; 4) Oxford cannot meet its allocated targets; 5) Oxford can be quickly and easily provided with adequate transport; and 6) The other councils can take higher building targets (6a) Declining facilities (6b) Sustainability. The Parish Council suggests that Oxford (and the four District Councils) provides its own allotted total of new housing, subject to five yearly reviews.
PR-B-0730	Katherine	Jones	Savills on behalf of Thames Water plc	General - Waste Water Network			Currently undertaking a Growth Study in the Bicester area. To ensure that the study is accurate we require as much detail on sites as possible. Have concerns at Launton. The current pumping station is at capacity therefore we will need to undertake further assessments. Banbury, Kidlington and Lower Heyford - need further information on location, scale and phasing to assess the capability of the network. Have Sewage Pumping Station and network capacity constraints at M40 Junction 9. Concerns about the network and pumping station at Adderbury.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0730	Katherine	Jones	Savills on behalf of Thames Water plc	General - Waste Water Treatment			Banbury has the most capacity to accommodate the most amount of growth. Bicester - There is already a lot of growth here, as such we would discourage any further growth in this area. Kidlington - Is in the Oxford STW catchment. The further growth of Kidlington would have a lesser impact given the size of the receiving STW. Development around Junctions 9 and 10 of M40 would cause concerns as they would drain to small STW's with less capacity and would require upgrades. Growth in Upper Heyford would cause concern as would likely drain to a small STW which would require upgrades.
PR-B-0730	Katherine	Jones	Savills on behalf of Thames Water plc	General - Water Supply			Our Water Supply team has been unable to make an assessment of the water supply issues in the proposed areas. Once further information is received on specific locations and sizes of sites the Asset Planners will be able to provide the required information.
PR-B-0639	Diane	Downie		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. The local GB should be retained and protected.
PR-B-0725	Andrew	Cove		General			Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Extra housing on GB is a disgrace. More cars, ever increasing traffic delays and disruption. Increased hospital and doctor waiting times.
PR-B-0194	Philip	Hine		PR32			Some of the proposed sites in Kidlington are heading toward the flood plain and area of SSI. Oxford City gives a high level of protection to such areas. In addition PR32 is similar to previous applications in 2011 and 2013 which had strong objections due to badger setts. The planning inspectorate refused planning even under appeal in 2012.
PR-B-0237	J A	Burt		PR74, PR20, PR24,			Sites PR74, PR20 and PR24 are of specific concern. PR74 is a haven for wildlife with many species of birds and animals and access to this site is potentially dangerous. There is a much used, enjoyed and accessible byway between sites PR20 and PR24. East Begbroke is a small peaceful safe village and the prospect of losing this small community is terrifying for some residents. It is wrong that Oxford can retain its own green spaces but destroy ours. This rep provides a list of Cherwell's policies that would be contravened.
PR-B-1242	G	Thompson			A	PR126	Objection to this site as it is in the Green Belt. Policy ESD14 seeks to safeguard the countryside from development and prevent urban sprawl. Yarnton is a Cat A Village. Thus only minor development, infilling or conversion is allowed. Access to and from the A44 is restrictive and almost impossible at this location. This site includes an important watercourse. Development would exacerbate existing flooding problems in the village.
PR-B-1242	G	Thompson			A	PR20	Site PR20 lies within the GB and exceptional circumstances for development cannot be demonstrated in this area. Local plan policy ESD 14 has a strong role in preventing the coalescence of Yarnton, Begbroke and Kidlington and ESD 13 in securing the appearance of the urban fringes. Policy Villages 1 categorises Yarnton and Begbroke as Category A villages which restricts development.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1242	G	Thompson			A	PR34	Site PR34 lies completely within the GB and is protected by Local plan policy ESD 14. It is poorly served by a narrow class C road and adjacent to a well used railway line. Any development would affect the setting of the Oxford Canal Conservation area.
PR-B-1242	G	Thompson			A	PR51	Site PR51 lies within the GB . Local plan policy ESD 14 has a strong role in preventing the coalescence of Yarnton, Begbroke and Kidlington and ESD 13 in securing the appearance of the urban fringes. Policy Villages 1 categorises Yarnton and Begbroke as Category A villages which restricts development. Surface water run-off from this elevated site frequently causes significant flooding in Yarnton, a problem that will be made worse by any development.
PR-B-1242	G	Thompson			A	PR75	Site PR75 lies within the GB. Local plan policy ESD14 seeks to prevent urban sprawl and safeguard the countryside form encroachment. Policy Villages 1 categorises Yarnton as category A village which restricts development. Access to this site would be poorly serviced by a single track lane.
PR-B-1242	G	Thompson			A	PR92	This site lies wholly within the Green Belt, although part of it is considered brownfield. Policy ESD14 seeks to encourage the recycling of derelict and other urban land. However, access to the A44 from this site is totally inadequate, highly dangerous and can only be exacerbated if further development was allowed.
PR-B-0738	Martin	Smail			H, A	PR43, PR58, PR13, PR146	Search option H and A sites PR43, PR58 PR13 and PR146 have been identified as unsuitable for these reasons. Increased traffic congestion at Broughton Road adds to congestion of many other streets. Direct and indirect impact on Crouch Hill, Banbury's most valued historic and natural landmarks. The area should be considered a designated Landscape Protection Area. West side of town away from employment and main transport hubs. Negative impact on schools, shops, water supply, sewers etc.
PR-B-0021	Kenneth	Porter	Cropredy Parish Council		I		Road system in and around Cropredy is under strain. This is a rural village with no immediate relationship with Oxford. Any major development would inevitable impact to the detriment of the surrounding countryside.
PR-B-1144	Martin	Lipson	Mid-Cherwell Neighbourhood Plan Forum		I, F	General	Supports the findings and recommendation of the Partial Review. Although express doubts about the 4,400 consider that the methodology and general approach is sound and clearly presented. The areas of search have been thoroughly carried out with supporting evidence. MCNP area is essentially rural and in area of search I, with the exception of Heyford Park, a strategic site in area F. Both these areas scores show negative effects when analysed for the sustainability of potential development in such rural location, on this basis these areas of search should be eliminated from the process for Oxford's unmet needs. Suggest that search areas I and F should be removed from any future consideration for sites associated with Oxford's housing need, to retain its rural values in the District as set out in paragraphs C240 to C250 on the Cherwell Local Plan.
PR-B-0798	Sue	Holmes	Oxford Brookes University			General	Have provided a detailed representation to this consultation on housing, transport, public transport infrastructure, Cycle network, and private transport. Housing and transport are their main issues. With regards to housing it is accommodation for students and affordability. Would support any policies that provide housing for their students. With regards to transport it is wider and their main concern is that adequate transport infrastructure and public transport is provided with the proposed growth.
PR-B-0875	Gavin and Sarah	Smith				General	Oxford City has developed a plan where it is using its own space to develop more employment but does not have the space to house the workers for the employment it is creating. This means that people have to travel in to the City for work. This is unsustainable, their plans for employment should be matched to the amount of space they have to house those workers.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0875	Gavin and Sarah	Smith				General	Assuming there is a need for the housing to support expanding business in Oxford then it should be located in areas that meet with the current planning policy guidelines. In order to justify building homes close to employment this should be backed up with evidence including both the distance current workers travel and also where the people living in that area travel to work.
PR-B-0875	Gavin and Sarah	Smith				General	Cherwell has been very good at protecting the green belt. This protection needs to be maintained to protect the individuality of villages like Yarnton, Begbroke and Kidlington. Failure to maintain a gap between the villages would allow a large settlement to develop to the north of Oxford. Towns would be a better and more sustainable locations for additional development.
PR-B-0875	Gavin and Sarah	Smith				General	The rep explains in some detail why there should be no development in the green belt in the vicinity of Yarnton. However, does state that if there is to be development in the Green Belt around Yarnton the best location would be to the south and south west of the village, making the church more of the centre of the village. It would also provide opportunities for transport improvements. Concludes by stating that Oxford should not be allowed to expand to the north to join up with Oxford Parkway as this would erode the gap between Kidlington and Oxford. Kidlington should not expand south of Stratfield Brake as it would also erode the gap between Kidlington and Oxford, particularly as Oxford could extend up to the A34. There should not be any development east of the A44 at Yarnton due to the A44 splitting the village.
PR-B-0876	David	Heathfield	Chiltern Railways			General	<p>The Chiltern Railway Company operates a franchised passenger train service between London Marylebone and Oxford Parkway. Welcome the opportunity to respond to this consultation and are pleased to see an emphasis on locating development in sustainable locations in transportation terms and managing patterns of growth to make the fullest possible use of public transport. Support the policy of building houses within walking distance of their railway station in Cherwell. Support the findings of the ITP that land around Kidlington holds the best opportunity for sustainable transport options for new residents. Support carefully considered around Oxford Parkway and Kidlington. With the existing connection to London and the completion of East West Rail will provide future connectivity to Reading, Milton Keynes, Bedford, Cambridge and Norwich making Oxford Parkway one of the best connected stations of its size in the country. The station and its capacity can be constructed with sufficient capacity to support growth in the local area.</p> <p>CIL - they believe that proper expansion of the facilities at stations adjacent to housing developments is vital to ensure that the railway is able to meet the needs of future customers. Investing in passenger facilities at railway stations will contribute to ensuring that the residents of new developments are not solely dependent on private vehicles. Would encourage the CIL process to be transparent and accessible to transport operators. Are keen to understand how they can interact with the process and ensure that the Council is aware of the opportunities for development at their stations.</p>
PR-B-0877	David	Flavin	Oxfordshire County Council			General	<p>Have provided a detailed response on Drainage, Education, Transport, and Public Health with a very detailed comments on each area including specific comments on each site with rag rating for each response on Transport DC, Transport Strategy, Public Transport, Archaeology, Minerals and Waste, and Education.</p> <p>The key issues are that additional growth should be planned in such a way as to facilitate the delivery of services and infrastructure, either by being located where existing services/infrastructure would benefit from additional population, or are capable of being expanded in a cost effective manner, or by being clustered in such a way as to make the creation of new infrastructure viable. Preferred areas of search should relate well to Oxford with new developments along the transport corridors.</p>

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0936	Tim	del Nevo	Friends of Cutteslowe and Sunnymead Park			General	Are very concerned with the development of the site, in particular the sites around Cutteslowe Park. The statement that Cutteslowe Park "seems underutilised" is unsubstantiated and is in fact completely untrue and inaccurate. Cutteslowe Park is a "Destination Park" meaning that people travel many miles to visit it. It has a wide range of facilities and is a very well used facility. Have provided details of facilities and uses in their representation. Have summarised the comments from the exhibition at Cutteslowe Park in detail in their representation, in particular their strong objections regarding the loss of the Green Belt. Strongly recommend that Cherwell does NOT accept Oxford's attempt to offload its so called unmet housing 'need' on Cherwell onto Green Belt land. Instead recommends that Oxford City is forced to cater for its own unmet housing need and build houses as opposed to businesses on itsexisting brownfield sites, within its own boundaries!
PR-B-1035	Robert	Davies	Gerald Eve LLP on behalf of Merton College, Oxford and Blenheim Palace			General	Promoting Land at Pear Tree on behalf of Merton College and Blenheim Palace
PR-B-1115	Vicky	Aston	Sport England			General	Sport England is currently working with Cherwell and its consultants to prepare a Playing Pitch Strategy. Before progressing to the next stage of the Local Plan, the Council should complete its playing pitch strategy and undertake an assessment covering indoor sport and any relevant outdoor sports. Without this important part of the evidence Sport England requires Cherwell to protect any existing sports facilities (indoor and outdoor). Sport England object to the loss of any existing sites that are identified for housing sites within this options paper if they have a sporting use, in accordance with paragraph 74 of the NPPF. It is also considered important that this work is undertaken to inform any new sporting provision that is required to meet the needs of the additional population. They believe that it is possible for the planning system to shape existing and proposed physical environments to promote physical activity. If the achievements of healthy lifestyles in an inclusive aspiration, they recommend their 'Active Design' design guidance . There is a model (local plan) policy within Sport England's document that could be used by Local Authorities. They have provided a link to their design guide.
PR-B-1132	Linda	Ward	Kidlington Development Watch			General	Kidlington Development Watch have provided a response to the consultation on behalf of the community, whose strength of feeling has been expressed in their support of KDW's objections to the proposed developments around Kidlington and surrounding villages. They have provided a detailed statement as part of their representation.
PR-B-1156	Robert	de Newtown	ENGAGE Oxford			General	ENGAGE Oxford have provided a brief response to the consultation. Strongly endorse the responses provided by CPRE and support their representation.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-1195	Laurence	Clark				General	<p>Objects to the 4,400 homes in North Oxford and particularly around Yarnton. His reasons are: 1. The infrastructure around North Oxford even when this includes recent renovations to Cutteslowe and Wolvercote roundabouts isn't sufficient to cope with the huge increase in traffic from such a big development. 2. Most of the predicted job growth is around the Science Vale on the South side of Oxford and the roads will not cope with more traffic from North travelling South. It can already take up to 60 mins in peak traffic just to reach Oxford. This would also increase pollution and decrease safety etc. 3. Greenbelt land is meant to be protected and is a link to the Cotswolds and allows wildlife to thrive and move. It also stops urban sprawl which means villages become towns and lose their identity and community, and crime can increase. 4. The government should be looking at Brownfield sites as they are doing elsewhere in the country. In addition, is opposed to development in the Green Belt, as it will cause one congested urban sprawl in an already heavily congested area. It will cause the loss of a beautiful village and its character. There will be a provision for people to have a work life balance. To use the GB areas as intended there are many unused buildings in Oxford City some 4000 which are uninhabited. Surely, these must be renovated before any proposal to use the Green Belt. Is concerned that this will inevitably lead to unacceptable destruction of the GB, which CDC has undertaken to protect. Most Oxfordshire residents have said they wish to retain it. Even more pressure on local infrastructure: local roads, schools and health services are already overstretched. Creation of one congested, urban sprawl, joining Oxford to Woodstock. This is unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Loss of their village' characters, identities and ancient historical settings.</p> <p>Loss, for ever, of their adjoining countryside, the local walks, scenery and rural pathways.</p>
PR-B-1342	Laura	Precious	Quod on behalf of Albion Land			General	<p>CDC has not considered the suitability of sites within Area E and have failed to explore development options located outside the GB and in these circumstances cannot show that there are no alternative sites that would deliver sustainable development. Area E Bicester and surroundings is the third most sustainable location for growth to meet Oxford's needs only after areas A and B, both of which are located in the GB. They are promoting the Site on behalf of the landowners, who are actively seeking to promote the site for development over the plan period via an allocation for residential development in the Partial Review. The Site is therefore available for development now, and is "deliverable" within the meaning set out in the NPPF (Footnote 11). By virtue of its location outside of the GB, it would not abuse any harm to the purposes of the OGB. They have provided a detailed statement in their representation.</p>
PR-B-1352	Liz	Boden	Pegasus on behalf of Richborough Estates			General	<p>Pegasus Group are representing Richborough Estates regarding Land at Grange Farm, Station Road, Launton, Bicester. Have provided an addendum to the Vision Document, which was submitted in response to our Call for Sites in March 2016.</p>
PR-B-0762	Elizabeth	Moore				General	<p>Makes a strong protest about the consultation process itself. Considers the consultation process as complex, lengthy, not easy to access on the website, etc. Has provided a detailed list of concerns. Has also provided a summary statement the adverse effects on the quality of life in the representation</p>
PR-B-0788	Tom	McCulloch	Community First Oxfordshire			General	<p>Concerns over the overall numbers of homes proposed in the Cherwell area up to 2031. Feel that more consideration should be paid to housing density and thereby to the provision of more homes within Oxford City boundaries. Consider that all districts should take a share of Oxford's need. The area around Kidlington would appear to be the most logical location for Cherwell contribution. Have provided more detailed comments on Infrastructure, the building of communities and not just houses in the representation.</p>

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0870	Stewart	Patience	Anglian Water Services Ltd			General	Anglian Water Services Limited is the sewerage undertaker for the parishes of Ardley, Cottisford, Finmere, Fringford, Fritwell, Godington, Hardwick with Tusmore, Hethe, Mixbury, Newton Purcell with Shelswell, Somerton, Stoke Lyne and Stratton Audley within Cherwell District. All sites will require a local connection to the existing sewerage network which may include network upgrades. Have provided a spreadsheet identifying where improvements are needed. These are in Ardley and Finmere. The highlighting of these potential upgrades should not be seen as an objection to the allocation of these sites as we can work with the District Council to ensure development is brought online at the correct time. Upgrades are to be expected as sewers are not designed to have capacity for all future growth. Consider that appropriate management of flood risk and the consideration if climate change is critical for long term resilience. Suggest that all development should seek to reduce flood risk and incorporate (SuDS) and expect that developers should adhere to the surface water management hierarchy outlined in Part H of Building Regulations with the disposal to a surface water sewer seen as a last resort. Have provided an site assessment of the site PR114 with their representation.
PR-B-0923	Keerpa	Patel	South Oxfordshire District Council			General	Acknowledges the approach in meeting Oxford's unmet need in the latter part of the plan period and potentially having a stepped trajectory would be useful in terms of delivering Oxford's unmet need. Any over delivery in the earlier part of the plan period could have counted towards Oxford's unmet need. Further clarity is needed in that respect. Support the 4,400 homes apportionment, and note that in paras 8.9 to 8.11 of the options paper that the idea of 'ring-fencing' Oxford's unmet need is undecided at present and that this approach will be clarified in the Proposed Submission document due later in 2017. State that more clarity is required on 'ring-fencing'. Regarding SA, are not clear what exactly has been tested, in terms of the 4,400 homes apportionment. Note the three scenarios which have been tested in terms of the 4,400 homes apportionment and significantly less and significantly more than this. However, would like more clarity on what is 'significant' as it is not clear at present? The testing of the higher and lower numbers also does not appear to relate to any spatial strategy so the implication of this are also unclear.
PR-B-0928	Stephanie	White				General	Deeply concerned about the proposed development around Begbroke, Yarnton and Kidlington. The scale and scope of this development would have a huge and negative impact on the quality of life of the residents of these three villages. Particularly concerned about the destruction of countryside: loss of footpaths and wildlife, development within the Green Belt, increased pressure on local services, particularly roads, risk of flooding, lack of affordable housing in detail in her representation. Does not object in principle to development and realises that new development has to be built somewhere. However, objects in the strongest terms to the scale of this proposed development around Begbroke, Yarnton and Kidlington, which will destroy precious countryside. Refers to an article in Oxford Mail about 4,400 homes vacant in Oxfordshire, which should be utilised rather than building in the Green Belt.
PR-B-0952	Cllr Carmen	Griffiths				General	Endorses the views expressed by Kidlington PC. In addition, nothing should be built before infrastructure is in place. S106 monies would be insufficient and not available until after the houses are built, further the Growth Board does not offer any guarantees, which would not be acceptable as our Schools, health centres, and roads are at full capacity, and more houses will add pressure to our already stretched resources. Does not consider it acceptable to build new schools for houses in Water Eaton when West Kidlington School is in a poor state and desperately in need of cash injection for the existing residents. Discusses the issues of land and opportunity within Oxford City and the Green Belt in more detail in his submission. Refers to Kidlington Masterplan stating that sites such as north of the Moors, Stratfield Farm and Gosford Farm should be out of the question for development and the GB should be retained for the purposes that it was formed in 1947.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0958	Richard	Meadows	Easington Sports Football Club			General	Proposing their grounds at Addison Road as a potential site for housing. Are actively looking for a larger and more suitable site and are considering some options. Would use proceeds from the sale of this site towards a new site in Banbury. Are working very closely with the Council on the Playing Pitch Strategy and sports provisions. Have provided a detailed statement in their representation.
PR-B-0960	M	O'Mahoney				General	The consultation details published on the website were very difficult to access. They were long and difficult to understand. Consultation held over Christmas was not reasonable.
PR-B-1121	Rebecca	Micklem	Natural England			General	Natural England is a non-departmental public body. Its statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development. Natural England expects sufficient evidence to be provided, through the SA and HRA, to justify the site selection process and to ensure sites of least environmental value are selected, e.g. land allocations should avoid designated sites and landscapes and should consider the direct and indirect effects of development on land within the setting of designated landscapes. Areas A and B are the closest to the Oxford Meadows Special Area of Conservation; therefore the Local Plan should be screened under Regulation 102 of the Conservation of Habitats and Species Regulations 2010 at an early stage so that outcomes of the assessments can inform key decision making on strategic options and development sites. It may be necessary to outline avoidance and/or mitigation measures at the plan level, including a clear direction for project level HRA work to ensure no adverse effect on the integrity of internationally designated sites. It may also be necessary for plans to provide policies for strategic or cross boundary approaches, particularly in areas where designated sites cover more than one Local Planning Authority boundary. They have provided detailed comments on Landscape, Priority habitats, ecological networks and priorities and/or legally protected species populations; Soils; Air Pollution; and comments on each area of search in their representation
PR-B-1121	Rebecca	Micklem	Natural England			General	Have provided detailed comments on Landscape, priority habitats, ecological networks and priorities and/or legally protected species populations, soils and air pollution. Detailed site specific comments have also been made for each area of search.
PR-B-1160	Christopher	Hardman				General	Have made a detailed response setting out their concerns. These are mainly on the importance of the Green Belt which seems to have been almost entirely disregarded, contrary to both National policy and strong local feeling. There is an over reliance on assumed future developments in transport infrastructure that are by no means guaranteed to happen. Routes from and around the selected sites for development (e.g. 38 and 50) are already congested and unsuitable for further traffic. Developments in areas close to major routes are unsuitable for housing, with young children and the elderly particularly at risk. A major development at PR19, Shipton-on-Cherwell Quarry, should be considered. This would be an opportunity for a self-contained community to be created, rather than merely increasing population density in existing areas. Have provided detailed comments on the Consultation, Housing Allocation, Other Issues to be Considered, Transport, Areas of Search and Identified Sites. Have also listed the Effects Of Site Options On Oxford, and Evidence Base in their representations.
PR-B-1240	Suzanne	Willson-Higgins				General	Concerned by the huge volume of complex new reports issued for consultation and her family did not have sufficient time to respond. Has provided a long statement in response to this consultation in the representation, which discusses the importance of the GB and the Kidlington/ Gosford / Oxford gap.
PR-B-1353	P	White				General	Fully supports the 4,400 new homes in Cherwell area to meet Oxford's unmet need. It is high time that this was done as desperately need more homes to cater for the young and new talented people moving into the area. When can you start! However, CDC needs to ensure that there are good cycle routes to and from all areas. The roads within the Oxford ring road are somewhat to be desired.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0769	Debbie	Jones	Bidwells on behalf of City of Oxford Charity			Land adjacent to Bicester Road, Gosford, Kidlington	Wish to promote its site located off Bicester Road, Gosford, Kidlington. It owns the whole 4.44ha site and it is available with no constraints that could preclude development. It could deliver around 140 dwellings. A detailed justification for the allocation is provided and the Charity advises that it will be undertaking further technical studies to support the allocation.
PR-B-0964	Vickesh	Rathod	Carter Jones LLP on behalf of Mr Henry Teare			Land at Middleton Stoney	3.75ha site at Middleton Stoney proposed. A site plan is provided. Access can be achieved off Bicester Road. Residential development of this site would make a significant contribution to meeting both CDC's and Oxford City's unmet housing need. The site is well defined and well related to the built up area of Middleton Stoney. The site is also well connected to Bicester and Oxford via the public transport network.
PR-B-0158	Jon	Waite	Kemp and Kemp on behalf of Mewslade (Eastern) Ltd			Land south of Springfield Road, Caversfield	This site is a sustainable location for residential development. It forms vacant, informal private space. The site forms a natural and logical addition to Caversfield and will integrate well with the existing settlement pattern and density. An indicative layout is provided. Access can be taken from Springfield Road. Heritage, landscape, environment and ecology issues are also briefly addressed in the representation.
PR-B-0784	Rosie	Cotterill	Turley on behalf of Bovis Homes			PR 54	Bovis Homes Limited has an interest in land east of Warwick Road, Banbury. A site plan is provided.
PR-B-0158	Jon	Waite	Kemp and Kemp on behalf of Mewslade (Eastern) Ltd			PR105	This is an appropriate location for a housing allocation. The site sits naturally within the built up settlement limits of Caversfield and can be successfully integrated with the existing pattern and scale of surrounding development. An indicative layout plan is provided. Access would be via Rau Court. Heritage, landscape, environment and ecology issues are also briefly addressed in the representation.
PR-B-0791	Elizabeth	Platts				PR123	Objection and concern to site PR123. Concerned with access to the site. Long walk to the buses on Banbury and Woodstock roads from the site, traffic would increase through the residential areas increasing the risk to cyclist's. Air and noise pollution would increase. Another development on GB, GB are important for health and well being for the community.
PR-B-0622	Ian	James				PR125	Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. House purchased due to its semi-rural location. If the development goes ahead on site PR125, the house will be in the middle of an estate.
PR-B-1034	Anita	Spencer	Sibford Ferris Parish Council			PR125	Concerned that the site submission is incorrect and provides the following information: <ul style="list-style-type: none"> * There are badger setts along the southern hedge boundary; * Sibford Ferris has a private fee paying school; * It has one shop and a post office counter; * There is a short, isolated, section of pedestrian footway on the northern side of Woodway Road; * There are four buses each way in a week between Stratford-on-Avon and Banbury, not to Oxford and the last bus leaves Banbury at 5.22pm; Sibford Ferris on its own would not have the amenities to be a Category A village.
PR-B-0173	Janet	Persson				PR125, PR178	These sites are a possibility for housing but the noise of the A34 would be restrictive as reported by residents in Hampton Poyle.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0606	P	Merrill				PR125, PR178	Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Sites PR125 and PR178 are both subject to flooding. They have standing water a number of months during the year. If the sites are built on the risk of flooding to residents will greatly be increased. These sites are also a AONB enjoyed by many residents due to the abundance of wildlife that can be seen.
PR-B-0163	Wendy and John	Castle				PR14, PR27	It is unclear where vehicular access to sites 14 and 27 will be, but access to The Moors is already congested and lack of allocated spaces has resulted in on road parking which restricts emergency vehicle access. The sites are in the Thames Valley Floodplain and are home to a wide variety of wildlife. The GB is essential for recreational purposes and the government and medical profession are encouraging people to take exercise to stay healthy.
PR-B-0529	Karen	Brading				PR14, PR27	Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Strongly object to sites PR27 and PR14. These are areas of outstanding beauty and importance to wildlife and enjoyed by many. Building on these sites would destroy that and will have an effect on flooding, due to the proximity to the Cherwell.
PR-B-0785	David	Orman				PR14, PR27	The rep has provided views why site PR14 and PR27 should not be built upon. Concerns regarding GB being sacrificed, there are other areas that could be used. Its not acceptable to destroy the villages identity. GB shouldn't be used according to the Conservative Manifesto, this needs to be upheld. Traffic will increase, along with air, light and noise pollution the quality of life will suffer.
PR-B-0918	Casey	Orman				PR14, PR27	Object strongly to site PR14 and PR27 as it's GB which surrounds Kidlington. It would destroy the abundant wildlife, natural habitats and the open countryside which is used and enjoyed by residents of Kidlington and the surrounding villages. The area is prone to flooding, the impact on residents in the area of The Moors and Mill Street would be disastrous as the countryside is concreted over. The excess water would flow into the river and gardens that back onto GB and in the surrounding area. Quality of life will deteriorate due to increased traffic, noise, air and light pollution.
PR-B-0010	Tina	Davies				PR148	This rep provides a detailed and lengthy objection to PR148, Land at Blackthorn Road, Launton. The primary reasons are that it has previously been rejected by CDC, does not meet the minimum requirement for a strategic development site and would include development of flood zone 3 and the River Ray Conservation Target area. Photo provided to illustrate the point.
PR-B-0013	Bernadette	Evans				PR148	Has farmed near Launton since 1963, has extensive knowledge of this parcel of land and knows it floods every year. The flat area of land on this side of Launton has ancient ridge and furrow and established hedgerows which should be preserved.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0034	Mark	Ashe				PR148	This rep provides a detailed and lengthy objection to PR148, Land at Blackthorn Road, Launton. The primary reasons are that it has previously been rejected by CDC, does not meet the minimum requirement for a strategic development site and would include development of flood zone 3 and the Ray conservation Target area. Photo provided to illustrate the point. Congestion and safety of the roads is also a concern.
PR-B-0182	Jon	Spinage				PR148	This rep provides a detailed and lengthy objection to PR148, Land at Blackthorn Road, Launton. The primary reasons are that it has previously been rejected by CDC, does not meet the minimum requirement for a strategic development site and would include development of flood zone 3 and the Ray conservation Target area. Photo provided to illustrate the point. Additional concern with regards to the size of the site in comparison to the village which would change the nature of the community. Noted that large amount of houses being built less than 2 miles away in Bicester.
PR-B-0183	Cathy	Spinage				PR148	This rep provides a detailed and lengthy objection to PR148, Land at Blackthorn Road, Launton. The primary reasons are that it has previously been rejected by CDC, does not meet the minimum requirement for a strategic development site and would include development of flood zone 3 and the Ray conservation Target area. Photo provided to illustrate the point. Additional concern that a development this size would jeopardise the village community and increase pressure on local services such a schools. The very real risk of flooding and inadequate drainage system must not be overlooked.
PR-B-0845	David	Stalder				PR148	Object to the inclusion Site PR148 Land at Blackthorn Road. Unsuitable as consists of green field land. The site also falls within Flood Zone 3 and the Ray Conversation Target Area, any development would be out of character with the village of Launton. Disproportionate level of growth unsupported by local service and facilities. Launton village already has a high level of traffic more development would exacerbate the current situation. CDC has already rejected, which is too small to be considered as a strategic development site. Flooding is also a risk at this site. The development of this site would fail to deliver sustainable development and therefore be contrary to the golden thread of national policy.
PR-B-0854	Jan	Stalder				PR148	Object to the inclusion of Site PR 148 in Launton. Site is not suitable as it has green field land that stretches outside the limits for building in the area which consists of open countryside. I believe that the site is on a flood zone too. But more importantly than this any more development in Launton would detract from the village feel. We already have a huge problem with traffic using the village as a rat run in the mornings and evenings. There is a fatality waiting to happen
PR-B-1019	Jon	Waite	Kemp and Kemp on behalf of Manor Oak Homes			PR148	Details are provided in support of this site. They cover urban form, access/transport links, heritage and ecology, landscape, flooding. Confirm that the site is available immediately. An indicative layout is provided.
PR-B-1020	Jon	Waite	Kemp and Kemp on behalf of Manor Oak Homes			PR149	Details are provided in support of this site. They cover urban form, access/transport links, heritage and ecology, landscape, flooding. Confirm that the site is available immediately. An indicative layout is provided.
PR-B-0059	Celia	Walton				PR157	At site PR157 the proposed siting of the access road in to new houses is dangerous. Driving uphill into the sun also gives little visibility. The village of Noke lacks facilities, no shops, no bus and no mains gas. Fast broadband is only available through Gigaclear and the mobile signal is erratic.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0167	Francis	Josephs				PR157	Object to the housing proposals at Upper Noke. The CDC's need "to ensure people have convenient, affordable and sustainable travel opportunities to the city" could not happen at PR157 due to traffic congestion. 100 homes would be highly detrimental to Noke, tripling the population. GB is sacrosanct and CDC's table 16 admits there are some key strategic constraints for building there. Noke hill is one of the last remaining unspoilt hills in the area, enjoyed by many and a bird migration route. Otmoor RSPB reserve is 1 km away and PR157 is close to breeding sites for bitterns, marsh harriers, buzzards and ravens. I accept the need for more housing but it needs to be in an area with existing public transport links and infrastructure, such as Bicester and Kidlington.
PR-B-0165	Stuart	Dunlop				PR164	The access issues seem to be very substantially misunderstood in the proposal. The Barford Road, the ingress/egress point of Sands Lane is narrow, with limited visibility at the junction and will not support the amount of traffic in the proposal. The junction with A361 is hazardous due to very limited visibility of traffic coming at speed from the direction of Chipping Norton. Increased traffic at this junction is likely to be very hazardous. A 50% increase in the size of a small village with Conservation status is completely out of proportion and would destroy the character of a long-established and stable settlement. Infrastructure in the village is inadequate for the proposal and access to infrastructure in neighbouring locations is effectively impossible by public transport. The number of new homes in Bloxham (the only realistic location for necessary services) renders any further pressure on services by a development in South Newington an impossible burden. The assertion that 'We do not consider that any infrastructure would be necessary for this development' is untenable.
PR-B-0737	Paul	Clarke				PR164	The rep has raises concerns as to why Site PR164 Land East of Sands Lane South Newington is unacceptable for development. Building within the village boundaries. Protection of important open spaces and views, referring to The 2014 South Newington Conservation Area appraisal. Traffic impact on Sands Lane. Physical impact on Sands Lane. Access to Sands Lane. Public transport and the facilities.
PR-B-1181	Heidi	Lancaster				PR178, PR39, PR122, PR38	Building on sites PR178, PR39, PR122 and PR38 to the south of Kidlington will mean there is no distinction between Oxford and Kidlington. They will lose their individual character which will impact on tourism.
PR-B-0938	H John	East				PR183	Confirm that Gladman Developments no longer have an interest in this site. Would be willing to offer the whole site of 5.8has for development and would give a site for a new village school within the development if required.
PR-B-0701	Ray and Janet	Phipps				PR186	Site PR186 objections to this site due to flooding. Site is not the most accessible. Increased traffic through the village and Water Lane is not a proper road, it is a lane and bridleway. It could be a precursor to more development in the area. Major traffic issues already in the area, especially for our village. LTP4 and Master plan where will funding for infrastructure come from?
PR-B-0035	Victoria	Sayell				PR186, PR199	Objects strongly to the proposed sites that are already congested with traffic. The infrastructure cannot cope, air pollution would become worse and quality of life reduced. Services are already under threat i.e. the Horton Hospital.
PR-B-0701	Ray and Janet	Phipps				PR199	Site PR199 objection to this site due to traffic being the major problem. Wykham Lane is a narrow and winding, which is already in poor condition. Subject to near misses, therefore its not appropriate to build here and use this lane to enter and exit the site.
PR-B-0921	Paul	Weston				PR199	Object strongly to site PR199 with the impact that this would have on Bloxham and Wykham. It is totally inequitable in the terms of distribution of housing around Banbury, even it if was for Banbury. The land on this site has been sold therefore is there a need as many properties are going to be developed just up to the North up to Salt Way. This is a step closer to bring together Bloxham and Banbury, despite the policy to prevent coalescence. Wykham has been in longer existence than Banbury, site PR199 would completely obliterate it.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0173	Janet	Persson				PR20	Part of this area could be suitable for housing, between Begbroke science park and A44, south of Begbroke, with access from the science park road. The land by Rowel Brook is subject to flooding and would mean Begbroke and Yarnton would lose their separate identities.
PR-B-0079	David and Susan	Cantwell				PR20, PR24, PR74, PR23, PR28, PR51	Whilst understanding the need for housing have concern over these sites. The small, quiet, safe community of Begbroke will be lost. The countryside brings health benefits to its users, Begbroke school is oversubscribed and doctors are at capacity. Roads are already congested and commute times into Oxford increasing. Question how the roads will be and what provision will be made for cyclists as not all areas have safe cycling lanes.
PR-B-0846	James C	Bridon				PR21	Statutory criteria for GB protection MUST be adhered to. Around Begbroke Science Park further development should be blocked because of its fatal effect on maintaining separate identity of Begbroke relative to Kidlington.
PR-B-0846	James C	Bridon				PR23	Statutory criteria for GB protection MUST be adhered to development would be disproportionately damaging, destroying the rural separation of Begbroke from Woodstock
PR-B-0080	Lee	Hewlett				PR24	Have grave concerns that fields surrounding Begbroke are subject to proposed development plans. These include GB that both Oxfordshire County Council and CDC had vowed to protect. The impact on the environment, nature and substandard roads around Begbroke is incomprehensible. Whilst understand the need for development sites, don't like the way PR24 has been selected and strongly believe this is as a direct retaliation to the failed bid to build a substantial amount of new houses in Woodstock, which was rejected. These plans will erode the village heritage, privacy and community. They are poorly constructed and in breach of all community values. The timeframe is short for such a huge decision, with far-reaching ramifications.
PR-B-1022	Jon	Waite	Kemp and Kemp on behalf of W Lucy and Co.			PR24	The rep provides a detailed assessment and justification for strategic growth west of Kidlington. In addition there is support for the Begbroke Science Park site (PR20). It is submitted that site PR24 is a logical addition to the land the Tripartite is promoting.
PR-B-0285	Michael	De Selincourt				PR27	Many allotment holders were moved to site 27 when the site on the other side of the railway tracks was allocated for the building of the new care facility in 2015.
PR-B-0922	Sarah	Smith	Rapleys LLP on behalf of Pandora Trading Ltd			PR28	Client is the sole owner of a 17.79ha site on the northern edge of Banbury. Approx. 6ha of the land benefits from an extant outline planning permission. The same area of land also forms part of Policy Banbury 2 : Hardwick Farm. It is suggested that the remaining 11.5ha of our clients land is a suitable location for further growth (potentially approx. 150 dwellings) A site location plan is provided. The rep goes on to provide a detailed justification for the development of this site.
PR-B-1033	Matthew	Symons	Hollins Strategic Land			PR3	Are promoting site PR3 - Land adjoining Graven Hill. Have provided a detailed analysis and the benefits of the access to transport and all facilities and services due to its location. A detailed report has been submitted as part of the representation.
PR-B-0157	Jon	Waite	Kemp and Kemp on behalf of Newcore Capital Management LLP			PR30	A detailed Land Quality Assessment together with a Detailed Landscape and Visual Appraisal have been submitted in support of this site. The LVA states that there are no overriding landscape constraints to development of part of the site. In addition the site is not currently 'open' due to the existing built development. As such this site does not currently serve its GB purpose making development acceptable.
PR-B-0157	Jon	Waite	Kemp and Kemp on behalf of Newcore Capital Management LLP			PR30	If this site were to be developed, Newcore would commit to providing traffic calming measures and a new footbridge over the River Ray. This is over and above the standard affordable housing/Section 106 requirements.
PR-B-0016	Anne	Hine				PR32	I object to the development of land behind Webb Way, Kidlington as the land acts as a flood plain for the river Cherwell. Any building could result in the river bursting its banks and flooding the Webb Way area.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0285	Michael	De Selincourt				PR32, PR125, PR178	Sites to the east of the village, in particular site PR32, PR125 and PR178 become waterlogged in the winter and any building would result in flooding. Some of the sites are also important wildlife habitats where enormous effort has been made to keep them as natural as possible
PR-B-0173	Janet	Persson				PR34, PR91	Both of these site are unsuitable for development because they are difficult to access. PR91 is very wet and would be better used for a recreation area with improved access to the canal.
PR-B-0765	Layla	Vidal-Martin	NLP Nathaniel Lichfield and Partners on behalf of Taylor Wimpey			PR35	Additional information has been provided which include plans showing site features and constraints, opportunities and an illustrative masterplan. A comprehensive Sustainability Analysis prepared by Calibro has also been provided.
PR-B-0533	Sara	Buck				PR38, PR50	Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Sites PR38 and PR50 are green spaces used by local people. Cutteslowe Park, where will sport and fund raising events be held. Kidlington will lose its identity and become part of the commuter belt. Need to help the current residents.
PR-B-0173	Janet	Persson				PR49	Stratfield Farm would be good for a maximum of 300 houses, provided there is access from the south end of Garden City and not Kidlington roundabout.
PR-B-0173	Janet	Persson				PR49	Stratfield Farm would be good for a maximum of 300 houses, provided there is access from the south end of Garden City and not Kidlington roundabout.
PR-B-1021	Jon	Waite	Kemp and Kemp on behalf of Manor Oak Homes			PR49	Details are provided in support of this site. They cover urban form, access/transport links, heritage and ecology, landscape, flooding. Confirm that the site is available immediately. An indicative layout is provided.
PR-B-0587	P	Bennett				PR50, PR38, PR91, PR122, PR118, PR92, PR23, PR124, PR167, PR168, PR34	Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. The council are making stupid, provocative statements designed to deliberately annoy the residents as areas are obviously impractical. Why can not CDC be sensible about this, objection to sites PR50, PR38, PR91, PR122, PR118, PR92, PR23, PR124, PR167, PR168 and PR34.
PR-B-0472	Harry	Carrier				PR51	Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Site PR51 not economical to build on Spring Hill. Collecting run off water during heavy downpours will be prohibitive to the whole proposal. One site leading onto a main road, otherwise the disruption and costs will be horrendous.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0822	Nikki	Lewis				PR51	Spring Hill site PR51 is a precious local amenity. Popular in both Begbroke and Yarnton for its access to nature, with its view across to Oxford, Whytham Forest and the ridgeway beyond Wantage. Ancient pathways from Begbroke to Cassington; along Shakespeare's Way; and up Frogwelldown Lane from Yarnton meadows, along which Charles 1 fled from Oxford to Bladon in 1642. Is it really worth sacrificing this, with its hundreds of years of history, to short term economic gain?
PR-B-0846	James C	Bridon				PR51	Statutory criteria for GB protection MUST be adhered to. Spring Hill, vital open space comparable to Wytham and Boars Hill, with fine views in the Oxford area. Development would urbanise Yarnton, Begbroke and Kidlington area.
PR-B-1354	James	Macnamara	Lower Heyford Parish Council			PR52	Strong objection to Site PR52. Reasons for objecting are: development size; impact on settlements of Lower Heyford, Caulcott and Upper Heyford; Impact on Conservation Areas of Rousham, Oxford Canal, and RAF Upper Heyford; Lack of road capacity on all roads in the area; lack of railway capacity; unsustainable location; too far from Oxford and unlikely to meet Oxford's needs; concern about cumulative impact; developer's inability to deliver, and conflict with Mid-Cherwell Neighbourhood Plan.
PR-B-0004	Cathy	Fleet	Lower Heyford Parish Council			PR52 and PR53	Strong objection due to development size; impact on settlements of Lower Heyford, Caulcott and Upper Heyford; Impact on Conservation Areas of Rousham, Oxford Canal, and RAF Upper Heyford; Lack of road capacity on all roads in the area; lack of railway capacity; unsustainable location; too far from Oxford and unlikely to meet Oxford's needs; concern about cumulative impact; developer's inability to deliver, and conflict with Mid-Cherwell Neighbourhood Plan.
PR-B-1034	Anita	Spencer	Sibford Ferris Parish Council			PR66	Concerned that the site submission is incorrect and provides the following information regarding Brown and Co Land at Folly Farm - Regarding good range of facilities * Sibford Ferris has a private School and no church; * Limited public transport links; * Regarding 'Pasture', corrections is 'arable'; * Planning History 'none'. Ref 03/00716/F - Refused access on the grounds of detrimental impact on the visual amenities and rural character of the area; * 'Housing to the West' - correction - ignores house in the centre of the site and on its eastern boundary; * 'Site of amenity value' - 'N/A' - correction - the site contains both a well used public footpath and bridleway; * 'Conservation Area - N/A' - comment - the site is directly adjacent to the conservation area; * 'Listed Building' - 'N/A' - correction - adjacent to a Grade II listed cottage; * 'Safe access available' - comment - pre-application advise for a proposal for housing behind the listed cottage - refusal.
PR-B-0488	Martin James	Hastings				PR74, PR92, PR34, PR126	Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Understand GB was only supposed to be built on in exceptional circumstances. Do not believe this gross expansion plan to merge three villages into a massive dormitory town where the houses will be snapped up by Oxford/London commuters meet the criteria as exceptional. Am not opposed to small tasteful developments sites such as PR74, PR92, PR34 and PR126. Believe that we need affordable local housing for local people.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0159	Jon	Waite	Kemp and Kemp on behalf of Sheehan Group of Companies			PR92	The site is well related to Yarnton. There is an existing access to the site from A44. Site is not within a conservation area nor does it contain any listed buildings. There are no environmental or landscape policy designations constraining the site. The site can be developed in isolation or could be considered as a wider strategic allocation at Yarnton. The site is of sufficient size to make a meaningful contribution to Oxford's unmet housing need as well as providing the necessary local facilities and infrastructure.
PR-B-0009	Colin and Gillian	Watts				PR92, PR95	This rep provides a detailed and lengthy objection to development around the Sibford villages beyond that envisioned in the local community plan. The conservation areas are of concern along with the road structures limited capacity. Photos provided to illustrate the point.
PR-B-0829	Fergus	Campbell	Oxfordshire Clinical Commissioning Group			SA	Have provided a detailed statement in response to this question in their representation.
PR-B-0913	Helen	Marshall	CPRE Oxfordshire			SA	Agree with Para 3.98 of the Initial SA Report part 2, which states, "Oxford is a world-renowned historic city, with over 1,500 listed buildings and 16 conservation areas, which cover 17.3% of the total area of the city. The built-up area extends to the administrative boundary around much of the eastern side of the city, and the river corridors of the Thames to the west and Cherwell to the east have created extensive green wedges running north south through the city. This gives Oxford a distinctive physical form. "Although these assets have limited development within Oxford city, they are a large part of what makes the City a major tourist destination." In scoping for any development, in particular those covered by Options A and B, these issues must be paramount if the City centre and the large number of those working in services there are to thrive. If Oxford is to retain its attractiveness to visitors, road access cannot be allowed to be adversely affected by developments outside, with the look and feel of the City and its access to open countryside preserved.
PR-B-1294	Giles	Hughes	West Oxfordshire District Council			SA	It is not clear that the impacts on West Oxfordshire have been considered even though some sites adjoin or a very close to West Oxfordshire. Do not agree with the mixed assessment given to site PR22 against the sustainability appraisal heritage objective. Although the fact that there is a scheduled ancient monument on site is Item No. , Page 8 of 8 referenced there is no acknowledgement that it is next to a World Heritage site within West Oxfordshire. The significance of these heritage assets is very high and this should be addressed in the appraisal and reflected in the subsequent scoring. There is no evidence in the appraisal to back up the conclusion that that there may be instances where a site allocation on site PR22 could enhance heritage assets. The impact of urbanisation on the currently rural setting of the Blenheim Palace World Heritage site and on the setting of the buried Roman Villa would be significant and negative. The assessment of site PR22 on this aspect does not appear consistent with the assessment of site PR92.
PR-B-0003	Robert	Armstrong					This rep provides a detailed and lengthy objection to PR148, Land at Blackthorn Road, Launton. The primary reasons are that it has previously been rejected by CDC, does not meet the minimum requirement for a strategic development site and would include development on Flood Zone 3 and the River Ray Conservation Target area.
PR-B-0005	Peter	Jay					These changes proposed by WODC and CDC will obliterate acre upon acre of pristine greenfield sites with the wrong houses ,in the wrong places for the wrong people at the wrong prices. This kind of developer-driven cynical opportunism, exploiting temporary loopholes in the broken-down NPPF system, catering for weekenders bankers and mansion-seeking Mayfair retirees, does less than nothing for the homeless or even the 'barely coping'. The districts must rebel full-frontally against the intolerable abuse of the broken NPPF.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0006	Ian	East					Many of the sites identified encroach on GB and will saturate villages. Option B proposal for Islip would more than double its size, destroying an ancient villages identity and community. It is acceptable for a village to absorb an extra 10-15% houses but not 100-150%. Once the GB is denied, protection loses credibility. Distributing development widely will lighten the additional burden on roads and offer real choice over living environments. Talks on 'rapid transport' must include rail links and safe cycle ways as roads are heavily congested and car journeys slow. The need for affordable houses has to be addressed. I suggest that a roof tax, similar to that proposed by builders in Milton Keynes, be levied to pay for the construction of that network (to come out of profit, not purchase price, of which there is plenty, given the disconnection between price and cost).
PR-B-0007	James	Philpott					The last government manifesto confirmed that GB would not be considered for housing. I object to Kidlington being used to provide Oxford City housing for commuters into the city and London. Kidlington is already oversized, has insufficient shops and its infrastructure is stretched.
PR-B-0008	Bilham	Woods					The proposed development at Kidlington should be confined to the area west of Kidlington and bounded on the east by the canal, on the south by Sandy lane, on the west by the A44 and the north by Langford Lane. This is not open country but already developed on the north by and Industrial estate and Campsfield detention centre, on the west by Begbroke village and the Science park to the south. Transport links are good with a main line railway to the east and a trunk road to the west. It would be sensible to provide housing near to the Science Park and the industrial estate to reduce commuting times.
PR-B-0012	Alan	Joy					Support the proposed development for Kidlington and Yarnton, as it will provide housing for the younger generation. Supports 4,400 homes to the north of Oxford and considers that moving forward with the expansion for today's needs and more so tomorrow's demands. Pleased that action is now being taken to provide much needed homes whilst improving the travel network. Need to double or more, as trying to tempt talent into Oxford area is proving difficult for both small and large employers, let alone providing homes for the future generations. The new Oxford Parkway Station is wonderful and would approve plans to re-open the northern Kidlington Brunelian station (closed in 1964) along with further links from the former Woodstock town line.
PR-B-0014	Rev George	Fryer					A village is a semi-urban entity in its own right and that character and atmosphere should not be changed
PR-B-0017	Fay	Plumb					Find the building of housing estates all around our villages a blight on the landscape and they look such heartless places to live. As someone who deals with tenants, find a lot of people don't want the responsibility of a garden and maintenance of a building. It would be a far more efficient use of land to build some attractive, landscaped low rise apartment blocks, less land would be required, more people housed and lower priced accommodation achieved. It is common in Switzerland, France, and Germany.
PR-B-0018	Anumod	Gujral					This rep provides a detailed objection to the planning decisions made at Blenheim Estates. Shipton-on-Cherwell quarry is suggested for housing development, and questions the need for more houses in the Woodstock/Bladon/Upper Campsfield area before 2031 as sited in an Oxfordshire plan. Didcot/Witney and Abingdon would be better suited for large developments.
PR-B-0020	Dr Bridget and Mr Richard	Atkins and Clarke					This rep provides a detailed and lengthy objection to development on GB land and open countryside at Kidlington. It also has concerns for the roads and public services with the high number of houses proposed.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0022	L	Brennan					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0023	Frances	Cotton					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0024	Carolyn and Benjamin	Capel					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0025	P F	Green					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0026	Mr and Mrs A	Drury					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0027	Shirley	Steventon					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.

Green Belt is a permanent designation and should continue to be protected.
PR-B-0032	Damian and Sharon	Hill					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0038	Ernest	Edgar					When are you going to stop ruining the countryside of our beautiful island to satisfy mass immigration?
PR-B-0040	Karl	Bushell					The building of 4,400 homes is not sustainable as the roads are already at capacity due to the proximity of the A34 and Oxford Parkway. The school at Yarnton is at capacity as is the doctors. The greenfield sites are an important corridor for wildlife, and mass building would destroy Yarnton and Begbroke.
PR-B-0047	Steve and Julia	Cross and Taylor					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0048	C L	Goldsworthy					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.

Green Belt is a permanent designation and should continue to be protected.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0056	S	Virrill					4,400 homes is not an appropriate requirement and unrealistically high. Local infrastructure and services are already stretched, in particular schools and the health services. GB which is enjoyed by many for its walks and views will be sacrificed. It's habitats are of great local importance and it protects the historic city of Oxford from overdevelopment. The government's promise and Cherwell's policy to protect GB should be upheld.
PR-B-0061	Mr and Mrs R	Gynes					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0096	Philip P	Skipp					Strongly oppose the proposed building around Begbroke and Kidlington. GB must be maintained to protect open space and stop urban sprawl. The villages of Yarnton, Kidlington and Begbroke will lose their identity as ancient villages, as they are swallowed up by roads and houses. Local schools and doctors already struggle to cope with demand. Congestion, pollution and accidents would increase. Open space isn't dormant land, it is farmed or grazed and provides open space for all ages to enjoy. Woods provide valuable habitat and corridors for wildlife. I appreciate the need for housing especially affordable housing for key workers. Smart thinking by planners and architects is required for housing that doesn't impact heavily on the environment.
PR-B-0097	M	Eastley					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Green Belt is a permanent designation and should continue to be protected.
PR-B-0133	Miss L E	Jackson					Strongly opposed to the efforts of Oxford City to over-ride our council and attempt to build in Kidlington, Yarnton and Begbroke. These villages are already full, and their characters will be destroyed if they become a suburb of Oxford. Traffic and parking is already a problem.
PR-B-0135	CG and RW	Lewis					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Green Belt is a permanent designation and should continue to be protected.
PR-B-0160	Dr Matthew	Cheetham	Summertown Health Centre				Development would have a significant impact on general practice in the area.Has any thought been given to a new Health Care facility?
PR-B-0163	Wendy and John	Castle					Concerned that Kidlington would merge with Yarnton and Begbroke and become a suburb of Oxford. The majority of employment within Oxford is not in the northern section. Kidlington will not alleviate the housing needs for Oxford as Oxford Parkway will expand London's commuter belt, and it's unlikely that affordable houses will be available due to buy to let landlords. Kidlington already has congested roads and stretched services and facilities.
PR-B-0187	Christine	Brooks					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0255	Andrew	Platt					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.
PR-B-0256	Mrs Anne	Sharp					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.
PR-B-0257	J C	Webb					Object to the proposed building of 4,400 new houses north of Oxford, these figures are unrealistically high and should be challenged by CDC. It is unsustainable, traffic problems would become worse and schools and health services would be overstretched. Walks and views would be lost, and natural habitats of local importance destroyed. Object strongly to development on GB which is well used and enjoyed by many. It protects the historic City of Oxford from over-development, and the government's promise and CDC's policy to protect it should be upheld.
PR-B-0268	Mrs Margaret Gwynneth	Seume					Am pleading with you not to accept the housing development around Begbroke, Yarnton and Kidlington along with those around Woodstock, the Airport, Langford Lane and the A4095. The area along the A44 would become a huge suburb for Oxford, joining Woodstock to Kidlington, with the villages losing their character and boundaries. The villages do not have the infrastructure to cope and traffic congestion would increase. Our schools and doctors are already at capacity and developers promises of new schools rarely happens. Please join with WODC to fight this grossly unfair development.
PR-B-0270	Patricia	Cove					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.
PR-B-0271	Katrin	Magorrian					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.

PR-B-0287	Peggy	Edgington					This rep has questions and concerns about the sewers, the access road and construction traffic at the Moors. Would like to know if the houses will be affordable and if a school and medical centre will be built. Suggests that Oxford City build on North Oxford Golf Course as this will affect less people and the wildlife.

PR-B-0357	Mrs Y	Amner					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.
PR-B-0358	GP	Goddard					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0428	Yvonne	Bunn					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.

PR-B-0429	C	Andrews					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0430	Peter	Clayton					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0431	Gary	Bateman					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.
PR-B-0432	I	Andrews					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0434	R	Hardwick					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0435	PB	Johnson					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0436	Elaine	Simonds					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways.
PR-B-0437	AP	Applegarth					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Local infrastructure already stretched, can not cope at peak times. To build homes without first addressing the impact to the A44, A40 and A43 corridors is irresponsible. Development would further harm Oxford's poor transport network and real productivity (too much time in the traffic jams).
PR-B-0440	N	Carr					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. The GB is a designated area protected (by government) to ensure independence of villages, protecting them from urban sprawl. It should not be used to fill areas between villages and towns. This proposal will have a huge impact on the countryside and local services.
PR-B-0441	Roy	Furniss					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Have lived on the Cassington Road for 30 years, every year the road floods. Just can't believe anyone is thinking of building on Spring Hill. Repairing the existing road and remove all the hump would be more productive. Strongly object to this proposal.

PR-B-0442	Irina	Bystron					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0443	Mr P J	Ibson					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. More GB being used.
PR-B-0444	David	Norris					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Have lived in Water Eaton Lane for 66 years and do not want to see it surrounded by houses. It would destroy the lane completely. Please do not do this.
PR-B-0448	Mr and Mrs A	Thompson					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Agree Kidlington is being spoilt. Too many properties being pulled down, flats being built resulting in not enough parking places. Building on the Co-op car park, that's why we are leaving here.
PR-B-0449	E and N	Morris					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Objection to these proposals of Oxford City becoming joint to Kidlington.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0450	R and B	Davies and Fenemore					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. The Moors is already a rat run because Banbury and Oxford roads are unable to cope as it is.
PR-B-0451	M and C	Orr					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Sheer vandalism of our countryside. Expanding Kidlington either in areas A or B will have a terrible impact. Creating more and more urban sprawl. Kidlington is already outgrown its facilities and roads.
PR-B-0452	MI	Reed					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. It is currently very difficult to obtain GP appointments or access an NHS dentist in Kidlington. The proposed development will significantly exacerbate the problem.
PR-B-0453	Marion J	Wakeling					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Extra homes will put too much pressure on clinics, schools, houses, parking and traffic flow etc.
PR-B-0454	Roger	Panaman					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. In desperate need of fewer people not more housing.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0455	Michael John	Wilton					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Area between The Moors and the river is not suitable because of risk to flooding each year. Area between Kidlington and Yarnton should be totally developed because access from Kidlington is totally inadequate.
PR-B-0456	DJC	Lyke					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Wish to stay with CDC, do not wish to lose every green field and be joined to Oxford. Nicola Blackwood does not do anything for Kidlington only North Oxford and Abingdon which have no connections with us. The main road through Kidlington is already congested with traffic, same applies to the A34.
PR-B-0458	Laurance and Faith	McKeever					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Making better use of previously developed land in Oxford. Using some proposed employment sites in the city for housing more appropriate. Rather than swallowing Kidlington and melting to a suburb of the city instead of a village with its individual characters and community.
PR-B-0459	H and C	Wardrop					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. No further developments, not enough schools, doctors etc. Also encounter more road problems. More shops needed and more parking in the centre.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0460	Paul	Spokes					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. This area is GB you can not keep destroying this county. No money will be able to bring this back so that we have a countryside. This is wrong.
PR-B-0461	Mr and Mrs J S	Holland					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. 27 days waiting time for doctors appointment. Streets already clogged with parked cars. Where is the infrastructure in these plans. Green spaces are needed in and around Kidlington, they are the lungs of the community, decent air to breath, not further pollution. Kidlington is a village Oxford City should sort this. GB was put in place by our predecessors to protect us all.
PR-B-0462	Mr and Mrs R	Bullock					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Co-op redevelopment with flats must stop. Proposed fever spaces for car parking, causing problems for existing Kidlington residents and people coming to the facilities from local villages. Proposed additional housing with the current infrastructure in Kidlington would totally destroy the character and community.
PR-B-0463	Mary	Lunn					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Low lying floodplains are involved. Protection of GB is vital for wild life including birds, mammals and insects.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0464	Simon	Hedges					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Kidlington's roads over capacity, posing a significant health risk to children in particular when walking to school due to the high concentration of exhaust fumes. Doubling the housing in Kidlington will be completely irresponsible, further increasing the severe problems, other options must be considered.
PR-B-0465	Howard and Joan	James					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. This land is also water logged at times, concerned about flooding.
PR-B-0466	David	Smith					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Objections and reasons have been made clear in this circular. Kidlington would become a residential sprawl, with little or no identity. Oxford City need to have a rethink.
PR-B-0467	NT and R	Simpson					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Kidlington is a village and should remain a village, it has had its fair share of development over the last 50 years. More houses would invalidate all the recent road improvements and lead to greater delays to traffic, stretching our infrastructure which is to breaking point. GB and local parks are precious and should not be destroyed further.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0469	Paula	Hastings					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Under the impression that GB should not be built on unless it is an exceptional circumstance, which this is not. Our local schools and doctors are already struggling with demand let alone adding 1,000 or 4,000 houses.
PR-B-0471	N	Carrier					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Currently suffer many hundreds of cars rat racing on Cassington Road during peak hours. This would be made more unbearable and dangerous for walkers and cyclists along Cassington Road if we increase Yarntons housing.
PR-B-0473	Ken	Marsland					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. My views are really covered by the comments on the postcard. Emphasis in particular referring to page 5 in the options consultation summary leaflet on the GB. Also query how this mysterious figure of the requirement for 4,400 new homes has been arrived at.
PR-B-0474	John	Grain					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. I have lived in Kidlington since 1950, enjoying walking the many areas of green fields and wooded areas. I am amazed that anyone would want to ruin the green areas, other than to make money.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0475	Keith	Nicholson					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. S3 bus service already overstretched/inadequate for the areas transport needs. Proper public transport links need to be in place before any developments occurs. The proposals place an intolerable burden on the lives of people already living in Begbroke and Yarnton. Impossible to see a doctor in an emergency due to the inadequate resources.
PR-B-0477	RP	Nicholson					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Development would cause ribbon development from Oxford to Woodstock. Increased likelihood of more GB being later developed. Increased congestion, pollution and reduced quality of life.
PR-B-0479	M	Beaker					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Traffic is already horrendous, there is no capacity to build these houses within our community. The GB is irreplaceable.
PR-B-0480	MC	Seymour					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. PR-B-0482	DP	Hamill					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Health services are overstretched as it is, resulting in time spent in hospital due to not getting an appointment with a GP. Three to four weeks is the usual waiting time.
PR-B-0483	Peter	Venables					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Consideration to the effects of the present residents have not been considered in anyway.
PR-B-0484	Graham	Clark					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. The proposed destruction of the GB is not acceptable, please support the common sense view by retaining the original GB. For the benefit of future generations and ourselves, nature and wild life.
PR-B-0486	Andrew and Jane	Coggins					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Agree with the comments on the postcard. GB is sacrosanct and should be preserved to prevent urban sprawl. CDC and Oxford City should concentrate on brown field developments implementing low cost and high new building methods.

PR-B-0487	Lisa	Barnwell					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Object due to our Doctors always being full at the moment, without more houses. What about schools. GB should only be built on in exceptional circumstances and what about the extra traffic.
PR-B-0489	Brett	Barnwell					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Traffic already congested on the A34, A44 and A40. Doctors appointments hard to get already. Hard to get placements at schools.
PR-B-0490	E A	Kane					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0491	Stephen	Hewer					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Green Belt is a permanent designation and should continue to be protected.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0500	David	Callicott					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Yarnton has had a number of houses built over the last 5 years, with nothing being done to the infrastructure.Can not take more houses until this is addressed.
PR-B-0501	Fiona	Garratt					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Agree with the comments made on the postcard and object to Oxford City's proposal to build 4,400 houses on the GB for the reasons stated.
PR-B-0502	Robert B	Sim					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Land west of Water Eaton Lane is low lying. Building here would increase flooding of the lower lying houses in the south end of Water Eaton Lane. It would also effect the water levels at Kidlington cemetery. Building on east side of Water Eaton Lane should not be undertaken until a decision is made on the widening of the A43.
PR-B-0503	Edith	Sim					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. The proposal to build adjacent to Water Eaton Lane increases the possibility of flooding in an already high risk area. This would also have adverse effect on Kidlington cemetery.

PR-B-0504	Ann	Martin					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. New schools needed. Healthcare and transport all strapped for cash now. What about the wildlife and the Great Crested Newt at Croxford Gardens.
PR-B-0505	Kim	Martin					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. How many are going to be social houses. Who is going to pay for the additional police in the area of Croxford Gardens. What about the Great Crested Newt in the proposed wildlife areas of Croxford Gardens.
PR-B-0506	J	Nelson					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Proposed massive developments in an existing village with traffic and parking problems. Building in areas of natural beauty and wildlife. Flooding already exists in the fields.
PR-B-0507	WLH	Horlick					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. I would like to be informed of any local meetings for the residents of Kidlington in the near future.
PR-B-0508	Tina	Callicott					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Have lived in Yarnton for 30 years and it has already doubled in size. There has been enough development already. The infrastructure and roads have not been increased or updated to reflect this. Our schools, doctors and road can not cope sufficiently now.

PR-B-0509	Cllr Emilie	Walton					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. There are hundreds of empty houses in Oxford City. Many are owned by companies and greedy landlords. What's to stop the new houses being snapped up by them and not those who need it.
PR-B-0510	VJ	Goodall					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Kidlington is becoming an ugly sprawling mess, is the objective to make us a suburb of Oxford. Please save the GB. When is it going to stop. Is it going to go on forever.
PR-B-0511	Patricia	Shaw					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Its vital to provide residents space to relax by walking, running, cycling etc. Children must have space to roam and explore natural habitats. Must have GB to keep housing developments in check. Doctors surgeries can not cope now. Kidlington lacks leisure facilities for all ages, which should be addressed.
PR-B-0512	Alan and Sylvia	Osborn					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Have already lost our local bus along The Moors. If properties were built adjacent to The Moors they would definitely need to be a bus again, otherwise the traffic will increase.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0513	Joan	Davies					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Planned number of houses will almost double the population of Kidlington, causing unacceptable road congestion of planned area west of St Mary's Church. Unacceptable congestion on Church Street and Mill Street. All of this will cause unrest amongst existing residents and crime rates could rise.
PR-B-0514	MR	Cooper					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Having lived in Kidlington for 36 years, have been a lover of the GB by using the many footpaths that go to make the area so beautiful and enjoyable. Would hope that the estimate extra 4,400 residences would not impinge on the area due to the infrastructure to accommodate the extra need for the amenities.
PR-B-0515	P	Foyle					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Object strongly to all the houses being built on and around Kidlington, taking over our GB areas and joining up with Oxford City. There isn't much green area to enjoy for walking in the areas of Kidlington. Being a pensioner don't want to travel far to enjoy the fresh air and to get away from traffic. Want Kidlington to remain as a village and not become part of Oxford.
PR-B-0516	Douglas	Roberts					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Along side the need of additional 4,400 residences in the Kidlington area, it is important for the necessary infrastructure, schools, surgeries, shops and transport requirements. These amenities are at full stretch at the moment. It would be nice to know what is intended.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0517	Pamela M	Cooper					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Have lived in Kidlington for 54 years and loved every minute. Have seen a lot of changes but these proposals are excessive for all the reasons mentioned. The Government's promise to protect the GB should be upheld.
PR-B-0518	Anthony	Morris					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Feel strongly that the GB should not be built on, both to preserve the environment and to prevent Kidlington becoming non-stop urban sprawl from here to Oxford.
PR-B-0519	Lucy	Loveridge					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Proposals to build on The Co-op and Ghurkha Village car park in Kidlington will be a nightmare even without any extra house building, let alone thousands more.
PR-B-0520	Dawn	Glatz					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Extremely concerned about the abuse this will inflict on the GB, brown field sites should be pitched. Excessive number of housing for this area. Affordable housing for locals is imperative but not at such volumes. The present infrastructure can not cope.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0521	LJ	Holstead					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. GB should not be built on to allow for the overspill of Oxford. The area requires a major alteration to the road network, there is already bad congestion at the moment with the A34, A40 and A44 at capacity.
PR-B-0522	F	Lambert					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Concerns over flooding.
PR-B-0523	Peter	Druce					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. The numbers and areas of development clearly show no regard for GB policy. Kidlington amenities, Schools, Doctors etc. already stretched. The proposal will mean Oxford expanding to consume Kidlington, Begbroke and Yarnton and should be resisted at all costs to preserve their identities.
PR-B-0525	Ronald	Phipps					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. On the CDC we have many conservative members, who should be voting against building on the GB and also including farm land.
PR-B-0526	MD	McLean					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. A number of empty houses due to the owner abandoning them. Complaints have been made to the local council about this.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0527	H	Steele					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Really going to reduce the green and pleasant land to concrete. Over development of the worst possible kind, this should be rejected. Our future generations will never forgive us for spoiling our countryside.
PR-B-0528	Anthony F	Bennell					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. The infrastructure in our area does not allow for additional traffic. Our village is already at saturation point. Important now and for future generations that green fields and GB are protected.
PR-B-0530	T	Blake					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Risk of losing village status by becoming an overspill of Oxford. The houses being built will end up as rental properties, charging high rents, people will still not be able to become home owners.
PR-B-0531	D	Burridge					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. GB needs preserving for nature and a place for body and mind. Between the church and Thrupp is especially precious which needs protection.
PR-B-0532	Pat	Hawtin					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. John Prescott over ruled all local councils on the Water - Eaton P and R. The same will happen with 4,000 homes in Kidlington. Government will overrule any objections.

PR-B-0535	Maureen	Gale					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Schools, health services would not be able to cope. Getting a Doctors appointment is difficult now. More houses would stretch the services. Affordable houses never enough.
PR-B-0536	Jane, Elizabeth, Kate	Rendle					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0537	Margaret	Holstead					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. As a walk leader we encourage more people to walk. The loss of the GB around Kidlington would discourage walking by limiting the local countryside in which to walk. Once built on GB you can never get it back. For future generations please keep GB.
PR-B-0538	J	Fossey					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Consultation process by DC has been inadequate, if had not been for development watch poster, Would not have known about it. GB land is essential to maintain health and well being, contributing to public health. What consideration has been given to health and education infrastructure? How were the figures arrived at and what impact does Brexit have?
PR-B-0540	Linda	Nicholls					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. There is no exceptional need to build in this GB area.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0541	Sheila	Churchill					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Concerned about the addition of more than 4,000 houses. Upset about the plan to develop on GB, which is meant to restrict urban sprawl. Kidlington will lose its unique character with this proposed development, it should not be allowed.
PR-B-0542	Helen	Bristow					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Destruction of the GB is a major consideration. The infrastructure, especially travel would not be able to cope. The village would lose its identity.
PR-B-0543	Benito	Wainwright					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. GB were intended to be permanent, so should be immune to development. The countryside North of the Moors is of high scenic value, enjoyed by locals and provides vital habitats for wildlife, like the protected badger. The Moors would be ruined and Benmead Road would become very busy. 4,400 extra houses would double Kidlington's population, the figure for housing needs are widely exaggerated. The lack of infrastructure would be disastrous.
PR-B-0544	Sally	Markham					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. GB land surrounding Kidlington should be protected and not sacrificed. Its use for recreational space and habitat for wildlife is of utmost importance. The scale of the proposed development is alarming and seems unjustified.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0545	Kelvin	Markham					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. The loss of GB land is not justified. The loss of valuable and irreplaceable recreational space which is heavily used and enjoyed by local residents.
PR-B-0546	Trevor	Campbell					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. GB development should only take place when justified. It is not feasible to remove open spaces that is valued by Kidlington and Yarnton residents, to satisfy the housing needs for Oxford. The need is driven by the University who own large amounts of undeveloped land, within the walls of the city.
PR-B-0547	Gwen	Young					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Strongly object to the possible terms of this proposal. Owe it to our children and future generations to preserve open green spaces. This would destroy Kidlington's character and be to the significant detriment of the health and wellbeing of local residents. Question the justification for this scale of development.
PR-B-0549	William C	Gills					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Concerned about increased risk of flooding.

PR-B-0550	Dawn	Williams					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. It is Oxford's problem, if they need houses stop building student accommodation and build houses instead. There is no clarification of house types for these proposals. The sites are waterlogged and flooding is already a problem in Kidlington. No indications of where or if schools, shops, pubs and other amenities would be sited. Oxford has been trying to turn Kidlington into a suburb for yeas and we do not want it.
PR-B-0552	Mary-Louise	Riley					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.

Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0563	Susan	Rivers					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0564	Maxine and Seamus	Ryan					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0565	Amanda	Roberts					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0566	J	Cook					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Proposal for extra dwellings is an environmental disaster on GB sites. Concrete, tarmac in huge proportions equals flooding. In Yarnton, Spring Hill, springs frequently burst and pour down into the village, where would these springs be diverted if possible. Oxford known as a pit of carbon monoxide fumes, with the increase of vehicles the breathing green spaces will be lost.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0567	Gerald	Hunt					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Unhappy with the proposal careful consideration needed.
PR-B-0568	Malcolm	Blackshaw					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Agree that we need extra housing but not 4,000+ in our area. Equating to 6,000+ more cars on local roads, which are already overloaded. Any agreed amount of housing should included more affordable housing.
PR-B-0569	C	Williams					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Chose to live in a quiet village 45 years ago and would not like to see all these changes happen.
PR-B-0570	Roberta J	Lailey					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Concerns about the extra housing are around health and if the health services are able to provide a service. Moving to a village that could lose its character would be upsetting.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0571	Carla	Skinner					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. The loss of the GB especially on Spring Hill, which is a spot of beauty on the Shakespearian Way. Would be terrible and detrimental to all.
PR-B-0572	Christina	Bailey					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Roads are already congested. Need substantial improvements to roads, bus lanes and cycle lanes before additional housing could be considered. Our GB is precious and an essential green lung for Oxford we should not destroy it.
PR-B-0573	George A	Lailey					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Want to object on many grounds but mainly the roads. Congestion is growing and adding more houses will not help. Thought that this area was GB, does that mean nothing nowadays?
PR-B-0574	Julia	Wiseman					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.

Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0583	Marion	Jones					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Strongly object to the building of these houses in the North of Oxford. The roads can not cope as it is and the schools and Doctors surgeries also. Both Yarnton and Rutten Lane flood badly.
PR-B-0584	Rita	White					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Please save the Oxford GB, thank you.
PR-B-0585	CD	Millward					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Appalled that this amount of houses could be built, agree with everything printed on the card. Understand some housing is required, build on brown sites that are there. Imagine trying to get into Oxford or in an emergency to the hospital in the morning.
PR-B-0586	Roger	Pounds					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Feel strongly that the GB should be protected, rather than expand villages, small towns etc. Would it not be wiser or time to build new cities.

PR-B-0589	EA	Bristow					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. To put the majority of the housing requirement in one area would put too much strain on the infrastructure. You need to reconsider.
PR-B-0590	Clive A	Bristow					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Utilise empty properties and brownfield sites in the first instance. Any remaining needs should be spread evenly around ring road and certainly not in one area.
PR-B-0593	G	Thomas					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Chose to live in a small village, not a large town. Want Begbroke to remain a small village. Enjoy open land and country walks and do not want to walk through a housing development.
PR-B-0594	D	Thomas					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Do not want to spoil our lovely village with more homes, traffic etc. Chose to live here for the non hectic life, open space and small community.

PR-B-0597	N	Dresdon					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Having commuted from Begbroke to Oxford for over 30 years by bus and car, the journey time has increased by over 50% even with the new Wolvercote modification. With developments in Woodstock and Chipping Norton, within the planned expansion would cause chaos on the roads.
PR-B-0598	EA	Dresden					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Having worked at both Kidlington and Woodstock surgeries as a Health Visitor. The services are already stretched to capacity. Residents of Begbroke without a car can no longer access Kidlington since the K3 bus was scrapped.
PR-B-0602	Nadine	Wyatt					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. During the new station build, endured 18 months of site traffic, causing noise and dirty everyday. The volume of traffic in the lane was dangerous and made for a miserable year and a half. The area is used by walkers and cyclists as a safe and pleasant route from Kidlington to Cutteslowe/Oxford.
PR-B-0604	Lucy	Pilgrim					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Why should Kidlington be responsible for providing GB housing for Oxford City. Why create jobs in an area of low employment and then build houses for extra people coming into the county. Protect our GB it is there for a reason.

Rep No.	First Name	Surname	Organisation	Question No.	Area of Search Specific	Site Specific	Comments
PR-B-0605	Diana	Cinlott					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Site PR125 is an area liable to flooding, building on this area will increase the risk of flooding. Extensive house building is inappropriate on this ground and is not in the interest of Gosford.
PR-B-0607	Tom	Pilgrim					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected. Why should Kidlington be responsible for providing housing for Oxford City. They will not be affordable for the local people, absolute disgrace.
PR-B-0608	RH	Ryder					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. Protect the GB at all cost. 2,000 houses already planned at Eynsham, so Oxford City only need 400 do not encroach on the GB. Wolvercote roundabout traffic will increase by 6,000 twice a day, Oxford can not cope with the level of traffic.
PR-B-0609	Philip	Williams					Objection to the building of 4,400 new houses north of Oxford because it would inevitably lead to unacceptable destruction of the Green Belt, which most Oxfordshire residents have said they wish to retain and which CDC has undertaken to protect. Objection to more pressure being put on local infrastructure including roads, schools and health services which are already overstretched. Objection to the creation of one congested, urban sprawl, joining Oxford to Woodstock which would be unlikely to solve Oxford City's housing problems and would be used as a dormitory for London commuters. Objection to the loss of our villages' characters, identities and ancient historical settings and the loss for ever of our adjoining countryside, the local walks, scenery and rural pathways. The strain on the existing facilities would be ridiculous, this can not happen.

PR-B-0724	Christine	Daley					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0749	Dr and Mrs M	Wallace					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-0826	Alan	Dobson					Publicity about the exhibition and consultation in the Cutteslowe Pavilion in November was poorly distributed and too short notice. Some people found out by accident and others when it was over. No way to run a credible consultation. However, the two Cherwell staff whom I met were pleasant and helpful.
PR-B-0849	Caroline	Briden					Protest and object to the proposal to build 4,400 houses around Kidlington, Yarnton and Begbroke. The use of GB land which both CDC and Oxford City have undertaken to protect, is unacceptable. The three villages (Kidlington, Yarnton and Begbroke) would lose their individual characters, historical settings etc. The local infrastructure already struggles to cope. This proposal comes on top of developments already proposed in the Cherwell Local Plan, adding intolerable further pressure to the area. Who is taking a holistic county-wide view of development and conservation in which residents can have any faith? Many, if not most residents of the villages wish to retain the green belt and for it to be a "green lung" and an amenity for prosperity.
PR-B-0879	Francis W	Kirkham	JW Kirkham Will Trust				It is noted that a minimum site size threshold of 2ha is proposed, providing a notional density of 50 homes. Suggested that this approach could be modified where a smaller area might provide additional access to the larger one. An example would be my family's field on the northern edge of Kidlington, accessed at the junction of St Mary's Close (off The Moors) and Freeborn Close. The field comprises parcels NG3972 and NG5272, totalling 1.497ha.
PR-B-0882	Julia	Trowles					The Kidlington Framework Masterplan adopted by CDC in December 2016 has not been taken into account.
PR-B-0919	Prof Daphne	Hampson					If going to get 4,400 more homes in Kidlington then it's imperative that there is an adequate town centre to go with the town that we would become. It needs to be pointed out to central Government, CDC and Oxford City that if we accept Oxford's overflow who will be paying for this. Perhaps should not build on the Co-op car park, perhaps pull the building down instead and allow the planners to design the town centre.
PR-B-0934	Chris	Gaskell	Scottish and Southern Electricity Networks				The development land areas detailed in the consultation document are typical of a number of recent sites across Southern England where insufficient discussion has taken place between planning authorities and ourselves prior to planning permission being granted. The land in question is crossed by various 132kV overhead tower line, 33,000ehv overhead lines and 11,000 volt (hv) overhead lines. In the case of 132kV OTL, this is an extremely important link in the transmission system. Modifying such a line is a major undertaking and should be avoided if possible. Details of the Mains Records for each of the Options Consultation sites have been provided.

PR-B-0946	Sarah	Karatzios					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-1064	Karen and Tony	East					Criticism regarding the complicated process to object to the plans. Very difficult to find information as the plans on the website and the documents are very lengthy. This could put a lot of people off objecting.
PR-B-1069	JP	Lyes					Objection to the building of 4,400 new houses north of Oxford. It is unsustainable. It would make traffic problems much worse. Schools and health services would be overstretched. Open countryside in the green belt will be sacrificed, countryside walks and views lost. Natural habitats of great local importance would be destroyed. Cherwell should challenge Oxford City's unrealistically high extra housing figures. Objection to areas of search and development in the Oxford Green Belt. It is appreciated and enjoyed by local residents. It helps protect historic Oxford from over development. Green Belt is a permanent designation and should continue to be protected.
PR-B-1099	Alan	Storah	Oxford City Council				Supports Cherwell in the duty to co-operate through Oxford's OAN. It welcomes the opportunity to discuss with the Cherwell on affordable housing that would meet some of Oxford's unmet need.
PR-B-1261	Sarah	Pyne	Indigo Planning on behalf of McKay Security Services PLC				Rep seeks to promote the Lower Cherwell Industrial Estate, Banbury as a site with potential to deliver mixed-use development in the District. A site location plan is provided. Details in support of the site are provided. Mc Kay Securities PLC is an existing investor in Banbury. It is committed to working with CDC to support the Council's aims for development to address the recognised shortage of housing and presents the Council with an opportunity for mixed-use development in a highly sustainable location.
PR-B-1301	Nigel	McGurk	The Blenheim Palace Estate / Vanbrugh Unit Trust				Full consideration needs to be given to the need for a location within a strategic transport corridor within close proximity to Oxford. In reality, this should limit the Area of Search to land within the A44 Corridor only, but this has not been given sufficient priority in the Options Paper. Consequently, sites lacking sustainability credentials and/or located in areas not immediately accessible to Oxford City are afforded too much weight in the site assessment process. This results in inappropriate scoring of sites.
PR-B-1355	James	Macnamara	Parish councillor/individual				Strong objection to Site PR52. Reasons for objecting are: development size; impact on settlements of Lower Heyford, Caulcott and Upper Heyford; Impact on Conservation Areas of Rousham, Oxford Canal, and RAF Upper Heyford; Lack of road capacity on all roads in the area; lack of railway capacity; unsustainable location; too far from Oxford and unlikely to meet Oxford's needs; concern about cumulative impact; developer's inability to deliver, and conflict with Mid-Cherwell Neighbourhood Plan.

Appendices

- 1. Public Notice and Statement of Representation Procedure**
- 2. Consultation letters/emails**
- 3. Consultation Summary Leaflet**
- 4. Consultation Posters**
- 5. Representation Form**
- 6. Representations to the Proposed Submission Plan**

1. Introduction

This Part 3 of the Statement of Consultation reports on the consultation undertaken on the Proposed Submission Local Plan (July 2017 to October 2017) and subsequent engagement undertaken, where necessary, to assist the consideration of representations and the preparation of focused changes and minor modifications.

The Council has a statutory duty to consult and seek representations in preparing a Local Plan. It must also ensure that there is on-going co-operation with prescribed bodies under a 'Duty to Co-operate'.

The Council's policy on how it engages in plan-making is described in its Statement of Community Involvement 2016. The SCI is available on-line at www.cherwell.gov.uk/planningpolicy

2. The 'Duty to Cooperate'

Section 33A (1) and (3) of the Planning and Compulsory Purchase Act 2004 (as amended) places a duty on a local planning authority to co-operate with other local planning authorities and other prescribed bodies when it undertakes certain activities, including the preparation of development plan documents, activities that can reasonably be considered to prepare the way for such preparation and activities that support such preparation so far as they relate to a strategic matter. This is to maximise the effectiveness with which those activities are undertaken.

Section 33A (4) states that a strategic matter is: *'sustainable development or use of land that has or would have a significant impact on at least two planning areas, including (in particular) sustainable development or use of land for, or in connection with, infrastructure that is strategic and has or would have a significant impact on at least two planning areas.'*

Section 33A (2) requires a local planning authority *'to engage constructively, actively and on an on-going basis'* in respect of the activities that are subject to the duty.

The local planning authorities that border Cherwell District are:

- Aylesbury Vale District Council
- Buckinghamshire County Council
- Northamptonshire County Council
- Oxford City Council
- Oxfordshire County Council
- South Northamptonshire Council
- South Oxfordshire District Council
- Stratford-on-Avon District Council
- Vale of White Horse District Council
- Warwickshire County Council
- West Oxfordshire District Council

The Oxfordshire Councils are assisted in meeting the Duty to Co-operate by an 'Oxfordshire Growth Board' (a joint committee) which includes the local authorities within the Oxfordshire Local

Enterprise Partnership (LEP) comprising; Cherwell District Council, Oxford City Council, South Oxfordshire District Council, Vale of White Horse District Council, West Oxfordshire District Council and Oxfordshire County Council. It also includes co-opted non-voting named members from the following organisations:

- LEP: Chairman
- Oxford Universities
- Oxfordshire Skills Board
- Harwell/Diamond Light Source
- LEP Business Representative
- LEP Oxford City Business Representative
- Homes and Communities Agency
- Environment Agency

In addition, when considering matters that sit under the remit of the Local Transport Board then Network Rail and Highways England have the right to attend the Growth Board as non-voting investment partners.

The Growth Board is supported by officer and working groups as required.

Regulation 4 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) sets out the other prescribed bodies for the purposes of implementing Section 33A of the 2004 Act. Of those bodies listed in the Regulation it is considered that the following bodies are relevant to Cherwell District:

- The Environment Agency
- Historic Buildings and Monuments Commission for England (Historic England)
- Natural England
- The Civil Aviation Authority
- The Homes and Communities Agency (now the Homes Agency)
- The NHS Oxfordshire
- The Office of Rail Regulation
- The Highway Authority – Section 1 of the Highways Act 1980:
 - Oxfordshire County Council (Highways)
 - The Highways Agency (Highways England)
- Local Enterprise Partnerships:
 - The Oxfordshire Local Enterprise Partnership (OxLEP)
 - The South East Midlands Local Enterprise Partnership (SEMLEP)
- The Oxfordshire Local Nature Partnership

The application of the 'Duty to Co-operate' is also informed by the National Planning Policy Framework (NPPF) and Planning Practice Guidance (PPG).

3. Previous consultation

In January 2016, the Council published a consultation paper which highlighted issues that needed to be considered in undertaking a Partial Review of the Local Plan. The Issues Paper invited comments

and discussion of the issues was encouraged; a 'call for sites' was also made. A Statement of Consultation which summarised the issues raised during the consultation was published alongside the November 2016 Options Paper. This forms Part One of this document.

On 14 November 2016 the Council published an Options Paper for consultation. The Paper was prepared to engage with local communities, partners and stakeholders in developing options on how to meet Oxford's housing needs when preparing a Partial Review of the adopted Cherwell Local Plan Part 1. A Statement of Consultation which summarised the comments and issues raised during the consultation was published alongside the July 2017 Proposed Submission Plan. This forms Part Two of this document.

4. Consultation & Engagement

Consultation arrangements

On 17 July 2017 the Council published its Proposed Submission Plan for consultation. This Partial Review plan provides a vision, objectives and specific policies for delivering additional development to help meet Oxford's housing needs. Copies of the Public notices are attached at Appendix 1

How did we consult?

The formal consultation was initially advertised to run for six weeks from 17 July 2017 – 29 August 2017. Subsequently the consultation period was extended to 5pm on 10 October 2017. This extension was to allow more time for comments to be received due to the level of public interest in the proposals.

Distribution

The consultees listed in the Statement of Community Involvement and anyone who had registered on the Council's database were notified by letter or email and were invited to make representations on the submitted plan.

Hard copies were also placed at deposit locations across the district including libraries and Council offices. In addition hard copies were placed at some locations in Oxford (Oxford City Council offices, Old Marston Library and Summertown Library) and West Oxfordshire (West Oxfordshire DC offices, Woodstock Library and Woodstock Town Hall). A consultation summary leaflet and poster were also produced and were made available at these locations as well as on the Council's website.

The consultation arrangements were discussed in advance with officers from Oxford City Council and West Oxfordshire District Council and consultation material provided for them to distribute as they preferred. Publicity material was also provided to the administrators of relevant Oxford Community Notice Boards.

Press Coverage

The statutory public notices were placed in the following newspapers on 13 July 2017:

Bicester Advertiser

Oxford Times

Oxford Mail

Witney Gazette

The notices were again advertised on 10 August 2017 to publicise the extension of the consultation period to 10 October 2017.

Social Media

Press releases regarding the consultation were published on the Council's Facebook and Twitter pages. The press releases explained the purpose of the Proposed Submission Plan and provided details of the consultation including exhibition dates and locations where the documents were available to view.

Public Exhibitions

Staffed public exhibitions were held during July and August 2017 at the following locations:

- Shipton on Cherwell Village Hall, Shipton on Cherwell on Wednesday 19 July 2017 from 4.00pm to 8.00pm.
- Yarnton Village Hall, The Paddocks, Yarnton on Friday 21 July 2017 from 4.00pm to 8.00pm.
- Woodstock Community Centre, 32 New Road, Woodstock on Thursday 27 July 2017 from 4.00pm to 8.00pm.
- Cutteslowe Pavilion, Cutteslowe Park, Oxford on Tuesday 1 August 2017 from 3.30pm to 7.30pm.
- Begbroke Village Hall, 3 Begbroke Lane, Begbroke, Kidlington on Wednesday 2 August 2017 from 4.00pm to 8.00pm.
- Exeter Hall, Oxford Road, Kidlington on Thursday 17 August 2017 from 4.00pm to 8.00pm.

5. Consultation with Statutory and Non-Statutory Bodies

Oxfordshire Growth Board

In 2013, The Oxfordshire Local Planning Authorities (LPA) commissioned a new Strategic Housing Market Assessment (SHMA), supported by joint working on economic forecasting to establish the appropriate level of planned growth across the Oxfordshire Housing Market Area and the level of housing need arising in each District.

Officers from all Oxfordshire Authorities met on 17 May 2013 to discuss how the results of the SHMA should be considered, incorporated in to emerging plans where possible, and used as the basis for further joint working between the Councils. The purpose was to reach agreement and

formalise joint working, provide a common basis on which to progress the SHMA and avoid unnecessary delay to Local Plan preparation.

In April 2014 the Oxfordshire Local Authorities published the SHMA for Oxfordshire. The document suggested that the demographic trends and growth of the County economy and the level of affordable housing need required would necessitate 100,060 additional new homes in Oxfordshire between 2011 and 2031.

In November 2014, the Oxfordshire Growth Board, a Joint Committee which, on behalf of OxLEP is charged with the delivery of projects agreed in the 'Oxford and Oxfordshire City Deal' and 'Local Growth Deals' agreed a programme of work for addressing the unmet need arising from the SHMA. This programme of work would help the Local Planning Authorities meet the Duty to Co-operate whilst protecting the 'sovereignty' of individual councils over their Local Plans.

A Project Team was established to progress the work, co-ordinated by the Growth Board's Programme Manager and reporting to an Executive Officer Group which in turn reports to the Growth Board. This Project Team met regularly to consider the implications of the SHMA and how best to meet the identified unmet housing need of Oxford. This is in the context of recognising that the administrative boundaries of the City of Oxford are constrained and consequently it is seeking effective ways to address this issue in line with the Duty to Cooperate. The members of the formal Growth Board comprise the leaders of each council who were presented with periodic updates and took key decisions at scheduled public meetings.

From January 2015 to September 2016, the Project Team generally met on a fortnightly basis to progress, on a co-operative basis, the following projects:

- An understanding of the urban capacity of Oxford and the level of unmet housing need
- Oxford Green Belt Study to assess the extent to which the land within the Oxford Green Belt performs against the purposes of Green Belts
- Oxford Spatial Options Assessment to help inform the apportionment or distribution of unmet housing need to the district and city councils.
- High Level Transport Assessment of Spatial Options
- Education Assessment of Spatial Options.

This programme of work culminated in a decision of the Growth Board on 26 September 2016 on the apportionment of Oxford's unmet housing need to the individual district and city councils. This programme of work and the Growth Board's decision has informed the preparation of the Partial Review of the Cherwell Local Plan.

All six Councils have continued to meet on matters associated with the Partial Review including a Countywide Infrastructure Assessment (OXIS) and preparations for a statutory Joint Spatial Plan for Oxfordshire.

Other Meetings/Discussions with Statutory and Non-statutory Bodies

Aylesbury Vale District Council	11 October,2017	Aylesbury Offices
Buckinghamshire County Council	Declined offer of a meeting. Representation raised no issues.	
Highways England	13 September, 2017; 9 October, 2017	Bodicote House
Historic England	6 September 2017	Bodicote House
Natural England	15 September, 2017 2 November, 2017	Bodicote House Oxford
Northamptonshire County Council (West Northamptonshire JPU)	18 September, 2017	Telecon
Oxford City Council	15 September, 2017	Oxford City Offices
Oxfordshire County Council	15 August, 2017 12 September, 2017	Bodicote House Bodicote House
South Northamptonshire Council	Monday 9 October, 2017	SNC
South Oxfordshire District Council	Thursday 3 August, 2017	Bodicote House
Stratford-on-Avon District Council	12 September 2017	Stratford Offices
The Civil Aviation Authority	Meeting request sent and contact made. No response received.	
The Environment Agency	Declined offer to meet. Representation received.	
The Homes and Communities Agency	26 September 2017	Bodicote House
NHS Oxfordshire CCG NE + The Key and Gosford Medical Practices	12 September 2017	Bodicote House
The Office of Rail Regulation	Meeting request sent and contact made. No response received.	
The Oxfordshire Local Enterprise Partnership	17 August 2017	OXLEP, Oxford
The Oxfordshire Local Nature Partnership (BBOWT, Forestry Commission, Wild Oxfordshire)	5 October,2017	Bodicote House
The South East Midlands Local Enterprise Partnership	29 November 2017 and 2 February 2018	SEMLEP offices

Vale of White Horse District Council	18 September 2017 27 September, 2017	VoWH Offices
Warwickshire County Council	Declined offer of a meeting. 30/10/17 email raised no issues.	
West Oxfordshire District Council	22 September, 2017	West Oxfordshire Offices

Town and Parish Councils & Other Local Groups

There have been a number of meetings with local parish councils including:

- **1 August 2017 – Gosford and Water Eaton PC**
Presentation and discussions with Parish Council
- **21 September 2017 – Kidlington PC public meeting**
Officer and member attendance at the public meeting.
- **9 June 2017 – Kidlington Voice**
An officer presentation on the Partial Review Plan.

6. Sustainability Appraisal

The Sustainability Appraisal which accompanies the Submission Partial Review Local Plan summarises the representations made to the June 2017 Sustainability Appraisal.

7. Representations – Summary of Issues Raised and Officer Response

Representations Received

A total of 1460 representations were received which generated a total of approximately 6000 comments. A table providing a full summary of each representation is attached at Appendix 6.

This section sets out a brief summary of the representations received. It does not offer a commentary on those representations. It has been prepared to provide an overview of the complex range of positions and views made by respondents. Full copies of each representation can be viewed online at <https://www.cherwell.gov.uk/info/112/evidence-base/369/local-plan-part-1-partial-review---evidence-base> (evidence doc. PR78).

Each section/policy provides an indication of the specific representations received. However, it should be noted that the vast majority of representations were general in nature. These representations are summarised under the ‘general’ heading of the summaries below.

Overview

The majority of representations received made comments without following the standard representation form. The vast majority of the representations raised objections to the Plan.

Over 550 'Post card' type representations were received with the following comments:

*'I object to Policy PR1(a) to build 4,400 houses in this area for Oxford overspill. 4,400 houses is not a **justified or proven requirement. It is unsustainable.** Oxford should do more to meet its own needs.*

*I object to Policy PR3 to remove land from the Oxford Green Belt. The Green Belt preserves open spaces that are much appreciated by local residents, protects both the historic city of Oxford from overdevelopment and neighbouring villages from coalescence. Government guidance says that Green Belt is a permanent designation and that unmet housing need is not a reason for building in the Green Belt. The plan is therefore **not consistent with National Policy.***

*I object to Policy PR11 on infrastructure because it is **unsound.** No costs are shown in the schedule. In most cases no source of funding is identified. There is no indication of how the already congested highway network will cope with the additional vehicles from these new houses and the other developments planned for the wider area.*

***Unreasonable consultation process.** I object to the complexity of the consultation and its timing over the school summer holidays. The Council has not given members of the public a fair opportunity to read and understand the proposals and make their views known.*

*For all these reasons I consider the proposed submission plan is:
Unsound Not Positively Prepared Not Justified and Not effective'*

There was also a space on the postcard for individuals to make their own additional comments.

Summary of Main Issues

A summary of the main issues raised on specific sections and policies are set out below.

Section 1 – Working in Partnership to Meet Oxford's Needs

There were approximately 50 comments relating specifically to this section of the Plan, with most raising objections. These included representations from the following:

Begbroke PC - Whilst there is a need for affordable housing in Oxford the figures are exaggerated. The idea that the housing will be for local residents is misleading as current legislation does not prevent new housing going to outsiders. Affordable housing will not be affordable for the lower paid as it only means an 80% discount. Oxford should do more to meet its own needs. It should be more innovative so as to obtain greater densities. They should use CPO powers; they should not be encouraging more business activity when it does not have the ability to house more people. There are identifiable sites in Oxford that could be built on. There are huge costs involved in improving the transport infrastructure and development will only exacerbate existing problems. We do not see how this can be funded and where the money will come from. The diversion of traffic through Kidlington will only make matters worse. Do not see the exceptional argument for building in the GB especially when people currently commute from Banbury and Bicester and elsewhere in Oxfordshire to work in Oxford. A better way to help communities, rather than building in Green Belt is to have a more structured transport policy that supports all communities rather than the selected few. Our vision is to retain what we have. This is not a joined up sustainable vision for North Oxford. It is the destruction of three villages being incorporated in to North Oxford with irrevocable loss of Green Belt. It is the creation of urban sprawl. We currently have access to the countryside and wide open areas. Not just the proposed narrow areas of green. Can be cynical and believe that Cherwell's interest has been to collect the additional revenue it will get by building these houses. Oxford's requirements are based on old data and before the implications of the EU referendum and the latest new government figures projecting future housing need for England. We do not believe this review is about unmet housing need but more about the University expanding its site, developing its land in our villages and Pear Tree and profiteering at the expense of the GB. CDC may gain from a substantial New Homes Bonus Grant. Oxford City has ignored many smaller sites. Other sites in the County such as at Bicester and Arcott have massive housing potential. They should pursue sites at Marston in the GB.

Bloxham PC - CDC has demonstrated that there are exceptional circumstances that necessitate the release of GB land close to Oxford to meet the City's identified need. It is appreciated that this small release of GB will be unpopular, however, if Oxford is unable to meet its need within its boundaries then this release seems to be the best alternative. Whilst recognising that CDC has a duty to cooperate with the City, it believes that the total required of the surrounding districts is extremely high. It has been suggested that this figure could be reduced if the new Government methodology is used. Concerned about SODC's refusal to accept its allocation.

Begbroke & Yarnton Green Belt Campaign - The twelve circumstances given in paragraph 5.17 are not exceptional and are no more than general planning concepts. The rationale behind the housing target figures is flawed. Given the recent publication of a draft uniform methodology for calculating housing need and the forthcoming publication of Oxford's own housing figures, it is premature for the Council to press ahead with the allocation plans. The requirement in paragraph B.95 of the Local Plan that a partial review of the Local Plan be completed within two years of adoption is predicated on joint working assessing the additional need for Oxford, which has not been finished. The Inspector only recommended in the Non-Technical Summary a joint review of the Green Belt boundaries once Oxford's specific needs were defined, which has not yet happened. The Council's obligation derives only from the agreement of the Growth Board in September 2016 to share the putative unmet housing need. There is no policy trigger, either local or national, which is compelling the Council to pursue the allocation of 4,400 additional units on Green Belt land, in addition to its

own local needs. Land use decisions on Green Belt boundaries should not be dictated by decisions made by bodies outside of the planning process. The exceptional circumstances test must be applied to every Green Belt parcel, to minimise harm to the Green Belt. The Plan is based on insufficient evidence base to justify the extent and location of Green Belt release proposed; there has been insufficient consultation at Regulation 18 and linked to this, insufficient consideration given to reasonable alternatives. There was no attempt to refine broad areas of search, or to examine mutually exclusive alternative packages of site options where each package would provide for a quantum of Oxford's unmet needs.

Other comments on this section included:

- Oxford's unmet housing need is substantially overstated.
- Oxford has not satisfactorily identified the amount of housing they might not be able to meet.
- Housing targets are based on exaggerated, discredited figures.
- The DCLG document 'Planning for the Right Homes in the Right Places' indicates that far fewer houses are required in Oxford.
- Oxford cannot meet its own needs due to deliberate decisions by the City Council not to address the problem and exacerbating it by promoting more industry and growth.
- Oxford City has not yet identified its own housing needs to 2036.
- Based on dubious figures proffered by the SHMA and the Oxfordshire Growth Board.
- The Oxfordshire Growth Board is only concerned with driving economic growth.
- The Plan attacks the core on which Green Belt depends.
- It is wholly inconsistent with national Green Belt policy.
- It will destroy the Kidlington Gap.
- The notion that building on Green Belt will provide opportunities to improve the quality and quantity of new public open space and green infrastructure, access to the countryside and, the provision of additional facilities is not credible.
- Development should be located on sustainable sites elsewhere in the District.
- The Council should set much higher density targets.
- Unlikely that a new railway station at Begbroke will be deliverable.
- Plans for additional housing in North Oxford/South Kidlington should be delayed until the Oxford-Cambridge Expressway route is settled, the E-W railway is re-opened and the full extent of the expansion of Bicester is agreed with its possible new transport infrastructure.
- New high-tech employment sites should be focused at Bicester where large numbers of houses are being built.
- Planned housing at Woodstock will put undue stress on local infrastructure and services, threaten the WHS, damage the rural environment and risk turning this historic town in to an Oxford suburb.
- The Plan will create more demand form London commuters.
- Plan raises serious concerns about the provision of public facilities and resources. Eg lack of provision of secondary schools, health.
- It will destroy existing rural resources and wildlife.
- Increased traffic will result in a further deterioration in the already poor air quality in Oxford.

- There is no consideration of the Kidlington Masterplan which serves to preserve the separate identity of Kidlington.
- The scale of development at Kidlington cannot be accommodated.
- It is premature to make decisions on Cherwell's Partial Review.
- The University's sports facilities are underused. Some could be released for housing within the City boundaries.
- The Plan does not take in to consideration the substantial building plan already underway for Cherwell and the impact this is already having on the local area in terms of increased traffic trying to access the area.
- The Council's exceptional circumstances for building in the Green Belt are unjustified.
- Kidlington, Yarnton and Begbroke would merge and lose their individual identities.
- The exceptional circumstances test must be applied to every Green belt parcel to minimise harm to the Green Belt.
- The Plan is based on an insufficient evidence base to justify the extent and location of the Green Belt release proposed.
- There has been insufficient consultation at the Regulation 18 stage.
- Insufficient consideration has been given to reasonable alternatives.
- The Council is not able to demonstrate that the evidence base was in place well in time to inform consideration of options/formulation of the preferred strategy.
- Oxford's unmet need can only be accurately assessed when the City completes its local plan.
- A number raise the issue of SODC not agreeing to the OGB's apportionment for South Oxfordshire. They consider that these homes should be accommodated elsewhere in the County and argue that there may therefore be a need to amend the Plan to allocate additional sites.
- CDC should not view the development strategy to meet its own and Oxford City's unmet needs as separate. A comprehensive approach should build on the existing vision set out in the adopted local plan which seeks to focus growth in and around Bicester and Banbury.
- Question whether CDC has demonstrated exceptional circumstances for revising Green Belt boundaries. There is no evidence that a comprehensive comparative assessment of alternatives has been undertaken.

Officer Response

Officers consider that there is a need to plan for more houses to meet Oxford's unmet housing need. The adopted Cherwell Local Plan includes a formal commitment to work on an on-going basis with the other Oxfordshire councils under the statutory 'duty to cooperate' (para B.95). The Government appointed Planning Inspector who examined the Plan stated, '*...It is ...essential for clarity and soundness that the Council's firm commitment to help meet the needs of Oxford city as part of the countywide housing market area, jointly with other relevant authorities including through the Oxfordshire Growth Board, as well as in respect of the Oxford and Oxfordshire City Deal (2014), is formally recorded in the plan...*' (Inspector's Report, para. 62, evidence doc. PR45).

His Non-Technical Summary records: '*Add a formal commitment from the Council, together with other relevant Councils, to undertake a joint review of the boundaries of the Oxford Green Belt, once*

the specific level of help required by the city of Oxford to meet its needs that cannot reasonably be met within its present confines, is fully and accurately defined' (Inspector's Report, p.3)

The Oxfordshire councils accept that Oxford cannot fully meet its own housing needs. They collectively committed to consider the extent of Oxford's unmet need and how that need might be sustainably distributed between the districts. The housing capacity of Oxford has been tested by the Oxfordshire Growth Board.

SECTION 2 – Preparing the Plan

There were approximately 20 comments raised in relation to this section of the Plan. These included representations from the following:

Bloxham PC – Firmly believe that meeting Oxford's needs should not compromise the existing strategy in the adopted Cherwell Local Plan.

Hampton Gay and Poyle PM - Oxford City suffers from an extremely poor transport infrastructure when it comes to ease of access for commuters travelling to their place of work within the city. It always has been the case and by building homes to satisfy the City's shortage remotely/outside of its boundaries will only compound the current and foreseeable travel situation. It appears that Cherwell has 'cherry picked' areas, the A to I list, that could be considered for housing development and then rejected them as a way of saying that deep analysis has been completed to arrive at their conclusion and subsequently remove the areas C through I . These areas should never have been selected for consideration. Cherwell's premise of building the additional homes in a dispersed manner will have a huge effect on existing mature villages and exacerbate the already poor travel infrastructure to Oxford City. It must not be forgotten, it is the City that has a housing shortage especially for its 'key' workers and that for efficiency and cost, homes for these essential workers must be provided in close proximity to their place of work. - An Oxfordshire wide joined up strategy is clearly missing between housing requirements for key City workers and travel infrastructure systems. - To re-emphasize, Housing for 'key' workers supporting Oxford City's human resource requirements MUST be in close proximity to their place of work.

Oxford City Council – Supports the overall spatial strategy, vision and the new spatial objectives as they specifically and positively respond to the issue of meeting Oxford's unmet need. It recognises that the strategy needed to be different to that of meeting the wider district needs. The strategy reflects how important it is for the sites to have a good spatial relationship to Oxford and incorporates essential planning principles which align with those identified and agreed in the joint studies undertaken under the Oxfordshire Growth Board.

Aylesbury Vale DC – Considers the Plan to be sound and that the Duty to Cooperate has been met with regard to cross-boundary issues relating to Aylesbury Vale and Cherwell.

Oxford Green Belt Network – Plan is founded on the assumption of a step change to historic levels of growth in Oxfordshire. It suggests that the long established strategy of diverting growth away from Oxford towards the county towns is no longer feasible. The proposed levels of growth are unrealistic. Arguments for a strategy to divert growth away from Oxford remain as strong as ever. For this strategy to work the Green Belt should be retained in its entirety. The Review cannot be effective without a well-founded spatial strategy for the county.

Other comments include:

- Insufficient certainty that affordable housing will be delivered.
- Oxford's housing need should be met close to the city with better transport connections.
- The preferred locations around Kidlington will increase congestion, result in loss of Green Belt and lead to coalescence between Kidlington, Begbroke and Yarnton.
- The identification of reasonable alternatives should have commenced with a review of settlements with good socio-economic and transport links to Oxford.
- In accordance with the Council's adopted settlement hierarchy development should be directed towards Bicester and Banbury as the top tier settlements and all sites within these should be exhausted before considering development at second-tier settlements which include Kidlington.
- Growth at Bicester has not been rigorously tested.

Officer Response

Officers consider that all reasonable options have been considered. The housing capacity of Oxford has been tested by the Oxfordshire Growth Board. The Council has tested Areas of Search covering the entire district to determine which Areas were not suitable for accommodating Oxford's unmet housing needs and which could deliver the Plan's vision and objectives. Within those Areas identified, all reasonable site options were examined. The consideration of alternatives was informed by evidence, consultation feedback and sustainability appraisal

SECTION 3: Setting the Scene

Approximately 10 comments were made specifically relating to this section. These included representations from the following:

Gosford and Water Eaton PC – It should not be considered a given that Cherwell should provide 4,400 new homes. Of this figure 1410 is proposed in the Parish. This will lead to a 208% increase in the number of houses in the Parish. This is a substantial figure which needs to be fully tested in terms of its impact on the Parish and its residents. The PC believes that housing need should be based on up to date economic forecasting. Brexit has already seen a down turn in EU research funding and a decline in the level of recruitment by the University. An independent review of the economic forecasting should be undertaken which takes these factors into account, as they could affect future housing needs.

Hampton Gay and Poyle PM - 1. The 4,400 homes is completely out of proportion in terms of the existing housing stock/numbers of Kidlington and Gosford, Begbroke and Yarnton. The villages will be swamped and lose the village characteristics that has been developed over many years. 2. The current travel infrastructure from this area to Oxford City is completely inadequate with lengthy rush hour commute times to get to a city desk, hospital or university, etc. place of work. Adding additional housing stock with their associated transport medium to the existing chaotic road network will cause gridlock. 3. Oxford City Council's, 'Oxford needs a gear change to tackle congestion' released last Wednesday 27th Sept. is late into the discussion arena and should have been released/discussed months ago. This is completely unacceptable and bad practise to release an initiative so close to the Cherwell deadline of 10th Oct. 4. Instead of building homes including

schools, GP practices, transport systems in areas A and B, focus must be reapplied to the City area and how to maximise the use of brown and greenfield sites. 5. Oxford City must stop providing additional sites for businesses if it cannot provide enough space for the associated housing requirements. 6. Oxford Parkway, a superb link into London Marylebone, will become a London Commuter station with many of the Cherwell planned developments for Oxford key workers being swamped by workers from the capital with greater spending power/salaries grabbing the local area A and B properties. In the Cherwell Local Plan of July 2017, it is stated on page 12 that this is "a coherent and joined-up plan." COMPLETELY DISAGREE, this plan is anything but a coherent strategy and requires urgent reassessment. All of Oxford's six councils, not just from a Cherwell D.C. perspective, MUST sit down and discuss a way forward to resolve this housing and its associated transport issues as a matter of some urgency. This Cherwell Local Plan will NOT work as it stands

Oxford Green Belt Network – Plan is founded on the assumption of a step change to historic levels of growth in Oxfordshire. It suggests that the long established strategy of diverting growth away from Oxford towards the county towns is no longer feasible. The proposed levels of growth are unrealistic. Arguments for a strategy to divert growth away from Oxford remain as strong as ever. For this strategy to work the Green Belt should be retained in its entirety. The Review cannot be effective without a well-founded spatial strategy for the county.

Other comments include:

- The Plan advocates a challenging strategy and much rests on the deliverability of the locations identified to meet the unmet needs of Oxford. If needs fail to be met then land at Upper Heyford could play a significant role.
- The Plan is predicated on provision of 4,400 houses being needed. This assumption has recently been challenged and is likely to be revised downward significantly.
- Growth should be focussed at Bicester and Banbury in accordance with the Council's settlement hierarchy and spatial strategy.
- The Council has not demonstrated exceptional circumstances to release sites from the Green Belt.
- There is insufficient evidence to suggest that opportunities to increase capacity at existing allocated housing sites have been robustly tested.
- There should be a single housing requirement for the Plan.
- The inability of Oxford to accommodate its spatial planning needs is not just confined to housing. Land to meet economic development needs also has to be addressed by the surrounding districts. The Plan should make provision for large scale logistics operators.

Officer Response

The Oxfordshire Strategic Housing Market Assessment 2014 was produced jointly by all the Oxfordshire councils in accordance with Government guidance and has been scrutinised through the examinations of the Cherwell, Vale of White Horse and (currently) West Oxfordshire Local Plans. It provides a clear understanding of housing needs and remains the most up-to-date, cooperatively produced and robust assessment.

As highlighted in representations, the Government, in September 2017 published a consultation document entitled 'Planning for the right homes in the right places' in which a proposed new methodology for assessing housing need was highlighted.

The basic methodology suggested a simplified method involving three components: a demographic baseline, a modification to account for market signals (the price of homes) and a cap to limit any increase an authority may face when they review their plan. 'Indicative' figures accompanied the consultation to demonstrate what the effect of the methodology could be under the circumstances at that time. These suggested that Oxford's basic needs would be 746 dwellings per annum (2016-2026) and that Cherwell's would be 762 per annum (2016-2026) compared to the need identified in the 2014 SHMA of 1400 per annum (2011-2031) for Oxford (mid-point) and 1,142 per annum (2011-2031) for Cherwell. However, the consultation paper included the following paragraph:

'46. Plan makers may put forward proposals that lead to a local housing need above that given by our proposed approach. This could be as a result of a strategic infrastructure project, or through increased employment (and hence housing) ambition as a result of a Local Economic Partnership investment strategy, a bespoke housing deal with Government or through delivering the modern Industrial Strategy. We want to make sure that we give proper support to those ambitious authorities who want to deliver more homes. To facilitate this we propose to amend planning guidance so that where a plan is based on an assessment of local housing need in excess of that which the standard method would provide, Planning Inspectors are advised to work on the assumption that the approach adopted is sound unless there are compelling reasons to indicate otherwise. We will also look to use the Housing Infrastructure Fund to support local planning authorities to step up their plans for growth, releasing more land for housing and getting homes built at pace and scale'

Within the consultation paper were proposed transitional arrangements depending on the stage reached in preparing a Plan. It was suggested that if plan was submitted for examination on or before 31 March 2018 or before the revised NPPF was published (whichever was later), authorities should continue with the current plan preparation. Otherwise, it was suggested that the new standardised method would apply.

The consultation paper stated:

'52. We are also proposing transitional arrangements to set a period of time before which plans would be expected to use the standard method for calculating the local housing need. This recognises that a number of plan makers have already made significant steps in preparing their plan, and we want to encourage them to complete their plan, avoiding further delays and so undermining the delivery of new homes.'

The consultation paper was very clear in its support for authorities seeking to provide more homes than might be required by the draft methodology provided there is a more than the draft figures given in the consultation document, provided there are evidence-based and sound planning reasons for doing so. It was similarly clear that Local Planning Authorities should not hold-up their planning making.

Further consultation of changes to Government policy are expected. On 30 January 2018, the Government's Chief Planning Officer advised,

'NPPF timetable update

We are currently revising the NPPF in order to implement our planning reform package from the housing White Paper, the Planning for the right homes in the right places consultation and the announcements at Autumn Budget. We intend to publish a draft revised NPPF before Easter. We will consult on both new policies from the Budget, and the text of the Framework, to make sure the wording is clear, consistent and well-understood. Our ambition is to publish a final revised Framework in the summer.'

Local Housing Need transitional arrangements

In our Planning for the right homes in the right places consultation in September we set out that the new standardised method should be used, unless the plan will be submitted for examination on or before 31 March 2018, or before the revised Framework is published (whichever is later). In light of the timetable set out above these transitional arrangements will apply to any plans submitted before the final revised Framework is published.'

In view of the fact that the final, revised NPPF will not be published until the summer (an 'ambition'); that the Council had committed to a two-year review programme for the Partial Review beginning in 2015; that there is agreement among all Oxfordshire councils that Oxford cannot fully meet its own housing needs; and, that all Oxfordshire Councils have committed to Plan for and support the delivery of 100,000 new homes between 2011 and 2031 in the Outline Agreement for the Oxfordshire Growth Deal (by reference to the SHMA 2014 at para. 24), it is not considered that the plan-making process be paused.

It might be considered that a risk for the Council would be for the objectively assessed need to fall significantly later in 2018 and for individual local planning authorities within Oxfordshire to start re-appraising Oxford's level of unmet need and its apportionment. This risk cannot be eliminated but is reduced by the following circumstances:

- the need for additional homes, including affordable homes, and the growth of the Oxfordshire economy will remain as key planning considerations;
- the outline agreement for the Oxfordshire Growth Deal (Appendix 11);
- the expected commitments from West Oxfordshire and Vale of White Horse District Councils in their new Local Plans to fulfil their apportioned housing figures;
- the existing and expected commitments from Vale of White Horse District Council in its existing and new Local Plan to fulfil its apportioned housing figure;
- the commitment between all of the Oxfordshire Councils to the production of a new Joint Spatial Plan and the alignment to that Plan in the commitment to deliver 100,000 homes by 2031 in the Growth Deal Outline Agreement.

Section 4 – Our Vision and Objectives

There were approximately 40 comments relating to this section of the Plan. The majority raised objections to the Plan. The comments included representations from the following:

Gosford & Water Eaton PC – The draft vision gives insufficient consideration to the impact of the proposals on existing communities and the environment. In our community local services are already under strain, and cannot just deliver extra capacity for more residents. It should recognise that meeting Oxford’s needs must take account of the impact on the environment and local communities including safeguarding the countryside from encroachment; loss of access to the open countryside for the urban population; removing an established historic leisure facility; removing valuable agricultural land and adding to the parking problems and travel congestion, rather than providing sustainable travel opportunities for the existing and new villagers.

Begbroke PC – Is it vested interests that have shaped this vision? The many objections to the Plan have been ignored by CDC. No confidence that the Council will take any notice of opposition views. The Government is introducing new projections for housing for England. Under these calculations the number of houses Oxford claims it needs falls by over 40%. The Plan should be withdrawn. The Oxford Transport Strategy acknowledges that future housing and employment growth is set to further exacerbate congestion on the A34, the outer Ring Road and other corridors that feed in to the city, unless traffic can be captured before it reaches them. The infirm and shoppers will not be cycling. Catching a bus is not realistic for many people.

Hampton Gay and Poyle PM - We do not support the vision contained within the plan document:

- as it sacrifices local communities and their Green Belt to accommodate the needs of Oxford city, without concern for the wishes of those communities
- by definition the development is to provide commuting homes for Oxford, no consideration is given to how that creates balance and sustainable communities in the villages affected
- we do not accept that development of this scale can be sympathetic to the historic context of the villages or their environment
- clearly development of this scale needs strong connections and transport infrastructure if it is to serve Oxford Commuters but that assumes the basic vision that the village should be sacrificed to help Oxford is accepted which it is not. Also the document does not give enough detail or commitment to developing already overwhelmed transport systems to accommodate this flawed vision
- we accept that development should be well connected to Oxford, if it is to serve the city, but do not accept that proximity is the only factor. Accordingly, investment in transport infrastructure can serve more outlying communities as well as those in the Kidlington/Yarnton/Begbroke area
- we do not believe the vision explains how social/affordable housing for lower paid, key workers for Oxford city will be delivered and reserved for those workers
- we envisage development of this scale will result in unforeseen transport consequences for our Parish, with increased 'rat running' in both directions through Hampton Poyle, worsening an existing congestion/speeding issue. We cannot therefore see how this adds to our Health and Well being

Historic England – welcomes the inclusion of ‘historic environment’ in SO15 as part of the positive strategy for conserving and enjoying the historic environment.

West Oxfordshire DC state that the Vision is an appropriate vision in principle and sets out a range of important factors. The Strategic Objectives rightly recognise the need for Cherwell to work in partnership with other authorities in delivering Oxford’s unmet housing needs. They also recognise the need for transport improvements.

Oxfordshire County Council – The Vision and objectives are supported. The spatial strategy which focuses development on land in North Oxford, Kidlington and along the A44 corridor is fully supported. A number of these locations were identified as potential strategic spatial options for Oxford’s unmet needs and assessed through the Growth Board post SHMA strategic work programme, the outcome of which underpins the Growth Board apportionment of unmet need.

Highways England – welcomes the wider local plan objectives which focus on locating development in sustainable locations in the District and in close proximity to facilities and services, including public transport options. Welcome the commitment to a collaborative approach between the county and district councils in facilitating improvements for sustainable transport to access Oxford. We also wish to be part of this collaborative approach.

Kidlington Development Watch - Considers that the growth and the level of housing need are much lower than estimated. They rely on assumptions of high growth in jobs in Oxfordshire requiring many people to move into the county. These projections of jobs growth are exaggerated in order to support funding bids from the Local Enterprise Partnership. Some growth will of course occur. However much of this can continue to be directed away from the City as under the ‘country towns’ approach which has operated in the past. Indeed, through true co-operation between the Oxfordshire Councils, such an alternative strategy would help to protect the city from over development, would be consistent with the fundamental purpose of the Green Belt, and would be sustainable. In contrast, the expansion of Oxford is unsustainable.

Other comments include:

- Objection to SO17 because the economic growth projections and the 2014 SHMA are obsolete.
- Objection to SO18 as there are no mechanisms to ensure affordability or that the new accommodation will not overwhelmingly be taken by newcomers.
- Objection to SO19 as the infrastructure proposals are merely unjustified and uncosted ideas.
- Oxford’s unmet need is unproven
- It would be better to build nearer to places of employment rather than creating satellite settlements and produce more congestion with people having to commute
- Oxford City must have plenty of sites that can cater for their housing requirements.
- SO16-SO19 are in direct contradiction to the 2015 adopted local plan.
- The Consortium broadly supports the vision and objectives of the Partial Review.
- How can Cherwell agree to an unidentified need until that ‘housing need’ is proven by an EiP for the Oxford Plan.
- Important to provide an appropriate evidence base to justify the level of Oxford’s unmet housing needs.

- The 4,400 figure can only be treated as a minimum to ensure the soundness of the plan.
- The SHMA relies on assumptions of high growth in jobs in Oxfordshire.
- The option of trying to force 40% population increase in a largely rural county has not been discussed with the electorate.
- Cherwell has failed to work with the City Council on strategic employment site planning. There is no joined up thinking on how many knowledge –based or technology/science parks are needed.
- Creating extra jobs will increase housing demand without tackling the local need for more affordable housing.
- Cherwell’s priority should be for the needs of its local communities.
- The Tripartite welcomes and supports the Council’s strategic objectives and spatial planning development approach to meeting Oxford’s unmet housing needs.
- The expansion of Oxford is unsustainable. The more it expands the greater damage to the historic city and the greater the loss of Green Belt which protects it.
- Kidlington is now faced with the worst of all outcomes ie massive structural loss of the Green Belt combined with huge housing schemes that are disconnected from Kidlington and offering nothing for the village in terms of place making and regeneration.

Officer Response

Officers have considered the proposed vision and plan objectives in light of the representations made. No change is recommended. The goals of meeting housing needs; supporting the city’s economy, universities and its local employment base; and ensuring that people have convenient, affordable and sustainable travel opportunities to the city’s places of work, study and recreation, and to its services and facilities are essential to delivering a Plan that truly relates to Oxford’s need. The vision’s aims are central to achieving sustainable development.

Section 5 – Delivering the Vision and Meeting Our Objectives

Housing Mix, Tenure and Size

Over 30 comments were made on this section. These include representations from the following:

Bloxham PC – Oxford’s greatest need is for affordable housing for key workers, people new to the housing market and people working in Oxford’s developing science economy. Such housing must have easy access to affordable and sustainable transport options which development close to Oxford would allow. The policy to allocate 50% affordable housing is noted.

Begbroke PC – Councils should identify and bring back into residential use empty housing and buildings in line with local housing and empty homes strategies.

Oxfordshire County Council – The significant need for affordable housing is the driver behind the scale of Oxford’s OAN as identified in the SHMA. The Plan seeks to meet the need for key worker housing as both the affordable and market housing mix. The City’s definition of key worker housing currently focuses mainly on meeting the needs of those in professional roles. The needs of other key workers in lower paid roles should also be included.

Oxford City Council – Welcomes the target for 50% affordable housing. The City Council's priority for addressing the needs of those on the housing register would be for social rent homes. Supports that 'key worker' housing may be delivered as part of the intermediate affordable housing. The City Council is proposing to take a new approach with the preferred option being an alignment more with income and affordability rather than specific employers or sectors.

Begbroke & Yarnton Green Belt Campaign - The quantum of homes is based on the SHMA 2014 which is now out of date. Publication of a draft standardised methodology for assessing housing needs published in September 2017 indicates a figure 61% lower for Oxford and 50% lower for Cherwell. The Proposed Submission Plan could lead to an oversupply of housing. With this question mark over the OAHN figure Green Belt release cannot be justified. Oxford's housing need is still to be fully and accurately defined through its local plan process. The Inspector's recommendations on the Local Plan envisaged a continuing joint approach whereas Cherwell has forged on alone and sought to defend the Growth Board apportionment. This figure was arrived at on the basis of a rudimentary process of examining sites in isolation through the LUC Spatial Assessment. There is little evidence of other work streams influencing the RAG rating of sites. The figure was not arrived at following SA or HRA work, or any consultation. The Council has not acknowledged the uncertainty associated with the apportionment figure.

Other comments include:

- Number of houses required has been grossly overestimated.
- Vacant properties should be used.
- How many of the new homes will actually be affordable?
- Developers consistently default on their affordable housing quota.
- Most new houses are likely to serve London commuters and buy to let markets.
- Oxford City has consistently failed to develop land for meeting its housing needs.
- SHMA estimates are unjustified.
- Housing figures should be revisited due to publication of Government's consultation document 'Planning for the Right Homes in the Right Places'. It reduces Oxford's needs by 47%.
- Housing densities too high.
- Housing densities too low.
- There is a net need for affordable housing which is not the same thing as a net need for new construction.
- Housing plans for North Oxford will virtually join Oxford with Kidlington. It will become part of Oxford's urban sprawl and lose its unique village identity.
- Strain on infrastructure a concern.
- Support for 50% affordable housing. It is hoped that it can effectively be enforced.
- Need for housing that local people can afford to buy or rent. The intention to build at low densities in desirable locations will not deliver this type of housing.

Officer Response

The many comments on this topic have been noted.

Securing the delivery of affordable housing is critical in helping to meet Oxford's housing needs in the context of the 2014 SHMA and Oxford's Housing Strategy. Officers from the CDC and the City council have been in discussion with a view to agreeing an outline approach for the cross border allocation of housing. The discussions have been broadened out in the context of other Oxfordshire local plans seeking to address Oxford's needs and cooperative work on the Oxfordshire Growth Deal which includes the delivery of affordable homes.

Officers consider that the Plan's approach to tailor the overall need for affordable housing to Oxford's needs to be required and deliverable in the context of evidence including the Plan's viability assessment (evidence doc. PR49). Agreement between the two councils as housing authorities will help ensure timely delivery. The concerns raised in representations about the wider 'affordability' of market housing and the risk that it is not readily available to those working within Oxford go beyond spatial planning issues, but the provision of additional housing would assist movement within the market and officers consider that Policy PR2 - Housing Mix, Tenure and Size would help tailor the new housing to local needs.

In the interest of consistency a proposed focused change includes the addition of the proposed 50% affordable housing requirement to Policy 12b: Sites Not Allocated in the Partial Review.

The Oxford Green Belt

Approximately 20 comments were made on this section. These included representations from the following:

Oxfordshire County Council – Agree that there are exceptional circumstances for removing land from the Green Belt, including the urgent need to provide homes to meet Oxford's significant needs, particularly for affordable homes and the inability of the City to fully meet its own needs within its administrative boundary. Channelling development for Oxford's needs towards other settlements in Cherwell would result in longer distance commuting to Oxford, placing further pressures on the transport network. The new Green Belt boundaries are well defined and can last beyond the plan period.

Hampton Gay and Poyle PM - We do not support the justification for Development in the Green Belt for the following reasons: "Oxford's Urgent and Pressing Housing Need". It is fair to ask whether in the 21st century with fast internet access we require people to travel routinely into employment hubs to work. Clearly there are some workers (teachers, nurses etc) who need to but there appears to have been little thought given to how a burgeoning high-tech centre like Oxford should source its work force. We note that the Oxfordshire Growth Board is supporting housing developments in the Didcot area as well as the West Oxfordshire Garden Village. Surely this makes the case that development close to Oxford is not necessary. "The Clear Inability of Oxford to meet its own housing needs". But the other part is the extent to which Oxford can address this need itself without disturbing the Green Belt. Building on Brown Field sites in Oxford will alleviate many of these issues as well as reducing the issues that relate to commuting. They would also provide a greener solution as people would be more likely to walk or cycle to work than those from outside the ring road. "The absence of sustainable, deliverable and alternative sites". This is simply not correct. There is a lot of land within the Oxford ring road system that could be developed. To say that it is Green Belt ignores the fact that the land proposed for development is nearly all Green Belt. "The opportunity to create

a sustainable joined up vision for the whole of the north Oxford/Kidlington/A44 corridor area". This single statement effectively incorporates the seven statements which precede it - other than the one that relates to Woodstock. This key statement is thus repetitive and we address it here. Many of the statements leading into this key one are not actually the basis for Exceptional Development in the Green Belt. ("relationships between existing site..."; "unique place shaping of land in the vicinity of the Begbroke Science Park and the Oxford Canal"; "improvement to transport infrastructure in the north Oxford/A44/A4260 corridor"; "strengthening of Kidlington village centre related to sustainable transport improvements"; and" the opportunity for improvements to the quantity and quality of new public open space, green infrastructure and recreation facilities and in terms of access to the countryside". Clearly this is an aspirational afterthought sought to partially justify the proposed development. The "unique place shaping" comment is especially risible. However, there are many ways that such a vision could be created without the proposed development. Piecemeal encroachment onto the Green Belt in eight different locations seems a poor basis for such a vision.

Other comments include:

- Strong disagreement that 'exceptional circumstances' exist.
- The Plan is contrary to para 14 of the NPPF. It is also contrary to the twelve core land use planning principles set out in para 17 of the NPPF. Plan is also contrary to guidance in the NPPG.
- Green Belt should be considered as an entity or system not as a collection of individual land parcels.
- Green Belt is a permanent designation
- The overall level of growth is unnecessarily high. Alternatives to development in the Green Belt are available.
- The Green Belt was set up to safeguard the countryside from the City spreading into neighbouring countryside and to preserve the historic setting of the historic city.
- Traffic congestion will increase
- Kidlington is not the right place to build large estates. Yarnton and Kidlington have long histories as villages and do not deserve to be swallowed up in a great anonymous conurbation.
- Development could be located on sustainable sites identified elsewhere in the District rather than Green Belt.
- Traffic congestion and parking already a major problem.
- Why not adopt a Cambridge approach. Whilst taking areas of existing Green Belt create new Green Belt further out.
- The number of houses required has been grossly overestimated.
- The proposed developments contravene the five purposes of the Green Belt as set out in the NPPF.
- The proposals will remove the vulnerable Kidlington Gap.
- CDC is ignoring all aspects of their adopted Local Plan Part 1.
- Green Belt land is widely used for recreational purposes.
- Greater potential for flooding.
- The P&R is not feasible as no bus lane could be implemented due to bottlenecks.
- Shutting Sandy Lane is preposterous.

- There are far better sustainable sites which could make a whole new community.

Officer Response

The national importance given to the protection of designated Green Belts and the 'high bar' set for the removal of land from the Green Belt through Local Plan demonstration of 'exceptional circumstances' has necessarily been a fundamental principle of Plan preparation. The 'exceptional circumstances' test is different from the Development Management test of 'very special circumstances' for 'inappropriate' development within the Green Belt.

Officers have reviewed whether its examination of reasonable alternatives remains robust in the light of representations. The view remains that Areas of Search, other than Areas A and B, are unsuitable for the accommodation of the additional development required to meet Oxford's needs. The Council's approach to assessing exceptional circumstances has also been discussed with its Green Belt consultants in the context of comments made. A re-appraisal of the approach and options is not required. The exceptional circumstances set out at paragraph 5.17 of the Proposed Submission Plan are robust.

Transport Infrastructure

Approximately 30 comments were made on this section. These included representations from the following:

Begbroke PC – The proposed bus lane along the A44 is physically and financially impossible due to the restrictive widths of railway and canal bridge crossings plus the underpasses at Peartree Interchange. The rapid transit route will only be viable with Government funding. These improvements cannot be used to justify large scale housing development adjacent to the A44.

Oxfordshire County Council – The Plan generally aligns with LTP4 and the Oxford Transport Strategy. Whilst the proposed sites score highly in terms of sustainability, it should be recognised that there are high levels of traffic congestion in southern Cherwell and north Oxford which need to be remedied. The highway improvements within the highway boundary that are detailed in the Infrastructure Schedule are supported. The proposals would improve on existing, and provide new, pedestrian and cycle infrastructure between existing and new sites and ensure that the developments and infrastructure complement the LTP and corridor studies.

Highways England – Welcome policies and proposals that incorporate measures to reduce traffic generation at source both through good location and by facilitating and encouraging more sustainable travel behaviour. Note that the Plan seeks to locate the majority of development on land designated as Green Belt but that Cherwell District Council considers the circumstances to be exceptional. We would highlight the risk that if Green Belt development is not permitted it may need to be allocated elsewhere, which could potentially have a far more onerous impact on the highway network than is predicted. Nevertheless consider that if 4,400 dwellings are delivered in the plan period (in addition to the developments already committed in the Cherwell Local Plan) then there could be a significant impact on the operation of the SRN and the importance of the accurate assessment of this impact needs to be emphasised. Welcome the location of development in relatively close proximity to Oxford along key radial routes. There is the potential for frequent, high quality sustainable transport connections from the additional development sites to the Oxford urban

area. Should these not be in place then we consider that the traffic impact upon A34/A44 Peartree Interchange arising from the additional development is likely to be intolerable. We note that the PR does not appear to propose any highway infrastructure improvements to support the development proposal, only public transport infrastructure. However, the residual impacts are yet to be fully understood, as are any mitigation measures that may be a consequence of them.

Note that 1,180 dwellings have been put forward as extensions to the northern edge of the Oxford urban area. Extensions to the urban area could be considered suitable locations for development provided good accessibility to existing services and facilities exists and necessary supporting infrastructure (including public transport services) can be provided. Although we welcome the proximity to existing and planned sustainable transport infrastructure, we consider that the extensions proposed could affect the A34/A44 Peartree Interchange, the A34/Oxford Road junction and potentially M40 Junction 9. We note that the remaining 3,220 dwellings have been allocated to sites adjacent to Kidlington, Begbroke, Yarnton and Woodstock. Whilst some of these sites are located further away from the Strategic Road Network, it is likely car trips from these sites to Oxford will route via the A34/A44 Peartree Interchange and that a number of longer distance trips could also route via A34/A44 Peartree Interchange as well as the A34/Oxford Road junction. We consider that whilst some of the sites may have less of an impact on the strategic road network due to their size and/or proximity, the cumulative impact could be significant and it is recommended that an assessment of this impact is undertaken.

Other comments include:

- A significant number of the representations raise the issue of the existing traffic congestion problems in the area which will only be exacerbated by the proposed development.
- The proposed development will increase A34 use and congestion.
- References to the Oxford to Cambridge corridor are contradictory.
- The Expressway will be in direct competition with the rail link. This is contrary to the sustainable transport policies.
- Emissions will increase. No concern is shown about air quality.
- There are no adequate policies to assist in the necessary transition to the use of ULEVS.
- If development was concentrated along the two railway lines, commuters could access the centre of Oxford and towns /cities further afield without using the car.
- New transport infrastructure is needed to deal with existing needs. It does not model the impact of the additional houses.
- Plans currently unfunded.
- Begbroke and Yarnton will not be served by RTS and will suffer increased traffic.
- Strong objection to the closure of Sandy Lane.
- There are no buses from Begbroke to Kidlington.
- No mention is made of measures to encourage people to refrain from owning cars, such as promoting and providing space for car-sharing clubs.
- The planned new railway station seems to have very restricted access and no parking provision.
- No safe way to cycle to work.

Officer Response

Whilst the proposals for development within the Plan undoubtedly affect a challenging area of the district in transport terms – the interface with Oxford with main transport corridors (A44/A4260) into the city; connections with the A34 and A40; congestion at the Wolvercote, Cutteslowe and Peartree roundabouts and associated air quality issues, it is the view of officers that they represent the best opportunity for maximising the use of sustainable transport, reducing the reliance on the private car, ensuring high levels of accessibility to Oxford's places of employment, its universities, its services and facilities, and developing communities that are well-connected to Oxford.

Officers, with the Council's transport consultant, have worked in cooperation with Oxfordshire County Council from early stages of plan preparation through regular liaison meetings, through issue specific meetings at key stages of evidence preparation which resulted on the joint commissioning of transport modelling, understanding of the plan's effect on local and strategic road network, the identification of transport mitigation measures and culminated on the **joint sign-off** of the Transport Assessment supporting the plan. District and County officers met with Highways England at key stages of transport evidence and plan preparation.

In cooperation with the County Council, development locations were selected based on a 'lowest transport impact' basis, appraised through an iterative stage of model testing.

The County Council's proposals for rapid transit routes and strategic cycleway improvements within the Plan's growth area, its strategy for providing Park and Ride facilities further away from the city to encourage early 'modal shift', and its desire to improve traffic movements along both the A4260 and A44, integrate well with proposals for development immediately to the north of Oxford and along the A44 and provide clear opportunities. The aspirations of the Kidlington Masterplan SPD to improve sustainable connectivity within the wider Kidlington / Begbroke / Yarnton area are also informative.

Alignment with the Oxford Transport Strategy, contained within the County Council's Local Transport Plan, has been a central theme of the Plan. Highways England's view that if Green Belt development were not to come forward, land allocations elsewhere could potentially have a far more onerous impact on the highway network is illustrative of the appropriateness of the proposed strategy in transport terms, notwithstanding the highway capacity challenges that endure.

The representation from Highways England has been considered by the Council's transport consultant and discussed at a meeting attended by Highways England and the County Council.

Officers from the three authorities discussed the effect of the plan on the M40 J9, A34 and A34 junctions and agreed that the main residual issues are concentrated upon the Peartree interchange which suffers from peak traffic congestion even without growth from the Partial Review.

The Plan's concentrated focus on sustainable travel helps to minimise additional impacts and there is an understanding that implementation would need to include improvements to bus services operating through the Peartree interchange and Loop Farm roundabout. There is agreement with the highway authorities that junction 'microsimulation' work may need to be taken forward once there is greater certainty over the precise nature of development.

Through the Growth Board, the Oxfordshire councils have reached an Outline Agreement with Government for an Oxfordshire Growth Deal. Subject to agreement on a required Delivery Plan, it

will commit the Government to a 5 year (2018-2023) £250m funding package which includes addressing the transport infrastructure requirements of growth to 2031. This is in the context of the Oxfordshire councils committing to delivering 100,000 homes (2011-2031) in line with the need identified in the SHMA 2014. The Partial Review's sustainable transport mitigation package is included in the emerging Growth Deal under 'North Oxford All Modes Corridor Improvements'.

It is the view of officers that the Plan's proposals represent the most sustainable approach to addressing the local highway issues. There is clear alignment with the County Council's policies and programmes as Local Highway Authority. Strategic highway schemes have been identified in the Oxfordshire Infrastructure Strategy which will ensure countywide coordination and form the basis for funding bids. Officers will continue to work closely with the County Council and Highways England to secure investment for the transport improvements including strategic funding such as from the Growth Deal and Local Growth Fund, funding from developer contributions and from the capital programmes of the relevant authorities.

The Plan, its sustainability and its deliverability do not depend on the provision of a railway halt/station. Land is safeguarded to assist with a longer term aspiration following discussions with the site promoter (site PR8) and initial exploratory discussions with the rail industry.

Officers from the county and district councils are agreed that the potential closure of Sandy Lane to vehicular traffic would not affect the operation of the Strategic Road Network, that modelling evidence shows that Langford Lane operates under capacity and could absorb displaced vehicular moments; and, that modelling shows that the A40-A44 link road (highlighted by West Oxfordshire District Council) is not required to deliver the growth in the Partial Review. Officers recommend that Sandy Lane's potential closure, aligned with the implementation of rapid transit routes, is retained within the Plan to maximise the potential for the use of sustainable transport, to create a high quality 'green link' between Begbroke/Yarnton and Kidlington, to achieve a high quality of development within site PR8 and to assist Network Rail with the closure of the level crossing for safety reasons.

The potential closure of the Sandy Lane level crossing has been discussed with and welcomed by Network Rail. It has also been agreed to introduce a minor amendment to the Plan requiring consultation with it on the development brief for site PR8 in part to avoid the pedestrian/cycle/wheelchair use of the Yarnton Lane/Green Lane as a preferred route that might lead to more intensive use of the level crossing thereon. It has been agreed that the Plan's proposals do not materially lead to increased vehicular traffic over the crossing. Nevertheless, Network Rail wishes to explore its potential for closure. The closure of both Sandy Lane and Yarnton Lane level crossings would be of significant benefit to Network Rail in terms of health and safety, journey times and rail capacity.

Overall, having reviewed all the comments submitted, officers are of the view that a change is not required to the plan's strategy for transportation but that the focused changes would improve the final document in light of detailed comments made.

General Comments

Approximately 50 general comments were made on Section 5 of the Plan. These included representations from the following:

Gosford and Water Eaton PC -1410 new houses are proposed within the Parish. This represents 32% of the total allocation and would lead to a 208% increase in the number of houses within the Parish. It would lead to the removal of nearly 100Ha of land from the Green Belt, 12% of the total Green Belt in the Parish. This would result in a substantial reduction in the Green Belt at the narrowest point between Gosford and Water Eaton, Kidlington and Oxford. The impact of this level of development on the environment, community and infrastructure of the Parish will be substantial.

Not convinced that the negative effects on the road network can be adequately mitigated and there is insufficient evidence that infrastructure improvements can be delivered. The proposal will lead to the substantial loss of countryside; increase the pollution to the area, impact on recreational facilities and on the landscape wildlife and historic environment. Furthermore, are not convinced that the figure of 4400 is justified or appropriate for meeting Oxford's Unmet Needs. Not convinced that the spatial strategy as put forward is the most appropriate nor will it be deliverable without major impacts on the existing community and environment.

The draft vision gives insufficient consideration to the impact of the proposals on existing communities and the environment. To achieve balanced communities, the needs of the existing villages, and their villagers, need to be taken into account. Local services (schools, transport, parking, and medical centres) are already under strain. An additional 4400 houses in Cherwell (1410 of which are in the Parish) together with further growth at Banbury, Bicester and Upper Heyford will put further pressure on the transport network through our Parish and exacerbate the problem. Additional land will be required, in some cases, to provide additional transport infrastructure whether this is road improvements, bus lane or cycleways. This will result in further development and urbanisation within the Parish and the destruction of further Green Belt/green spaces.

Hampton Gay and Poyle PM - Regarding the Strategic Objectives noted on page 7 of the Submission Plan summary document: -SO16: clearly District, City and County Councils need to work together. However do not agree with this objective as it makes no consideration of the needs and wishes of the Kidlington/Yarnton/Begbroke communities that are being fundamentally sacrificed in respect of their Green Belt and historical/environmental contexts. It makes no reference to the priority that should be attached to the city re-evaluating all opportunities to provide housing for key workers within the city itself. -SO17: as noted above, we do not accept that meeting Oxford's needs is the only consideration to support economic growth in Oxford and Cherwell. Developing local communities with local residents working in local businesses, or in the digital age utilising outlying operations of Oxford centric organisations, should be considered. That approach could consider sites across Cherwell (and Oxfordshire) not just the Kidlington/Yarnton/Begbroke area, representing a dilution and dispersal of the currently proposed intense developments. -SO18: clearly this is an important objective for meeting the needs of Oxford's key workers but we do not agree with it as drafted as it makes no consideration of a priority to re-evaluate opportunities within the city to house such workers, does not consider outlying areas for remote workers as suggested for SO17 above, nor has any reference to guaranteeing how new housing will be reserved for Oxford's key workers and not London commuters from Oxford Parkway. -SO19: this objective is ok as far as it goes but it does not consider developing transport strategy across Cherwell and Oxfordshire to make

Oxford more accessible from developing existing transport links in outlying areas. Implicit is the assumption that transport development is by reference only to the proposed Kidlington/Yarnton/Begbroke developments.

Vale of White Horse DC - welcome the approach taken by Cherwell District Council to deliver the agreed apportionment of un-met housing need for the district, and that this is to be delivered on sites which are demonstrably close to Oxford city.

Oxfordshire County Council – Content relating to rights of way and access to the countryside is supported. The attention that is given to green infrastructure (GI), landscape and biodiversity in the plan and the detailed guidance that is given to these items within the individual site allocation briefs is supported. Although section 5.141 recognises that infrastructure necessary to support planned developments must be provided in a timely manner, no specific reference is made the need for health promoting infrastructure, such as community facilities, walkways and cycle paths to be provided from the outset or as near to the start of the development process as possible.

Oxford Preservation Trust – If it is eventually determined that there are exceptional circumstances sufficient to justify land being taken out of the Green Belt, then some compensation land should be provided, which provides publicly accessible green space & improves biodiversity, together with measures to ensure that this is permanent. In addition, higher contributions put towards enhancement of existing Green Belt & any new local areas of permanent open space.

Other comments include:

- How can green space be improved when houses are to be built on existing Green Belt and a golf course has to be relocated?
- The claim of strengthening Kidlington village centre is wholly unrealistic.
- These proposals benefit Oxford City but are to the detriment of the residents of Yarnton and Begbroke.
- There are no exceptional circumstances to develop in the Green Belt.
- Concerns raised about deliverability of the proposed sites within the timescale of the Plan.
- The figure for new employment is grossly overestimated.
- Broad support for Vision and Objectives.
- Increased risk of flooding.
- The Council needs to reassess the overarching spatial strategy.
- Reassessment of the Green Belt release sites is required.
- The proposed allocations allow for no flexibility if additional need is identified or if sites are delayed.
- The strategy should provide for the allocation of a portfolio of sites at sustainable settlements, notably the service villages.

Officer Response

The varied comments received have been noted and have been considered in reviewing the soundness and legal compliance of the Plan. Many of the representations repeat comments made

under other sections and policies in the Plan and the officer comments applicable to those sections apply equally here.

Policy PR1 – Achieving Sustainable Development for Oxford’s Needs

Over 750 comments were received in relation to this policy. The vast majority raised objections. Comments included representations from the following:

Hanwell PC - The plan substantially overstates Oxford's total housing need and does not satisfactorily identify the amount that Oxford might not be able to meet. Oxford is capable of accommodating all or almost all of it by switching land earmarked for business to housing instead. It is therefore premature for Cherwell to even start the process of accommodating it.

Gosford & Water Eaton PC - Concerned that the figure of 4400 homes of which 1410 (32%) are within the Parish area is not appropriately justified given the impact on the Green Belt, the environment and infrastructure. Not convinced that this level of development can be delivered with the necessary transport and other infrastructure and without detrimental impact on both existing residents and those of the new communities. It is difficult to see how the proposals are consistent with some policies of the existing Development Plan, notably Policy ESD13 of the adopted Local Plan, in terms of the impact on local landscape character. By increasing visual intrusion and harming the local landscape these development proposals would be contrary to these policies. Policy ESD15 seeks to respect an area’s unique built, natural and cultural context. Development on the scale proposed which will increase the number of houses within the Parish by 208% will not secure this goal. Similarly, for the reasons set out above in terms of impact on local communities and the environment the proposals would not achieve sustainable development and would not be consistent with the NPPF.

Kidlington PC - Until the Oxford City local plan has been examined & completed, the exact level of unmet need is uncertain, due to the mismatch between the 2031 date in the SHMA, & the 2036 date in the Plan. The Government's recent "Planning for the Right Homes in the Right Places" document on how OAN should be calculated means both Oxford & CDC's Partial Review Plans (CPRLP) will be subject to the new guidance. Thus, revisions may be required to update the 2014 SHMA. The Government indicate that both CDC & Oxford have overestimated the level of new housing required, & significantly less growth is needed. It is premature to make decisions on the Partial Review Plan, which only concerns accommodating Oxfords unmet need, until the Authorities have progressed to accurate conclusions on an updated OAN for Oxford.

More detailed work is essential to determine the up to date OAN for Oxford City, & to maximise the use of land within the City boundary for new housing. The scale of unmet need can then be properly established. The Oxford Growth Board needs to consider afresh the distribution of newly calculated unmet need between the neighbouring authorities, giving greater weight to the importance of avoiding the release of Green Belt (GB) land in Cherwell in particular, where studies have confirmed that existing GB land performs an essential GB function in terms of the NPPF. Until these processes have been completed, PR1 cannot be proven to be justified or in accordance with the NPPF in relation to the permanence of GB. PR1 provides an unacceptable starting point for the remainder of the Plan, & is premature in advance of up to date research. The scale of growth proposed at 4400 dwellings is too high & needs to be reduced in order to better achieve sustainable development. The

Parish Council considers that any further development will lead to detrimental effects on the community and environment.

Hampton Gay and Poyle PM - Policy PR1 is flawed as it implicitly accepts without question the requirement to deliver these houses, which we have challenged elsewhere. However, the use of the term "sustainable development" is frustrating as there is no clear evidence that these developments will meet any nationally acceptable sustainability criteria.

Oxford City Council - Welcomes that the Partial Review makes provision to accommodate sustainable development to deliver the Cherwell apportionment (as agreed by the Oxfordshire Growth Board) of 4,400 homes, in full & by 2031 (Policy PR1). The lead-in time for such large sites is noted in the Growth Board memorandum, & as such it seems appropriate to prepare the trajectory with a delivery start date of 2021 as the plan also supports earlier delivery where possible. Encourages earlier delivery where possible on the sites allocated in the Partial Review, & is keen to continue the positive joint working & enhanced collaboration as the sites progress towards more detailed design & delivery.

Kidlington Development Watch - Object to the proposal for 4,400 homes in Cherwell to meet Oxford's needs. The 4,400 figure is not justified because it is based on the discredited calculations of the Oxfordshire SHMA which have been heavily criticised since they were made public in early 2014. The existence of Green Belt, as provided for in the NPPF, is a reason not to meet assessed need and the Council should have considered this in its assessment of alternatives. In the recent (Sept 2017) Government consultation "Planning for the right homes in the right places", the method proposed by DCLG in the consultation, which includes uplifts to account for affordability, results in an annual housing need for Cherwell of 762 (compared with 1142 in the SHMA) and for Oxford City of 746 (compared with a range of 1200-1600 in the SHMA). We note that the Oxfordshire SHMA deemed that no uplift for economic growth was necessary for Oxford City even on the most optimistic scenario. The new DCLG figures indicate that the SHMA numbers for both Districts are excessive as we, and others, have consistently argued since they were published. Oxford's need and its ability to accommodate it, has not yet been tested through a local plan examination. Its local plan is under preparation and is due to be submitted in December 2018. The new DCLG method is intended to apply to plans submitted after March 2018 so should apply to Oxford's local plan. It would clearly be premature for Cherwell to plan now to meet Oxford's unmet need on the basis of any number higher than 746 per annum. To plan for more would run the serious risks of over-allocating land and unnecessarily damaging the Green Belt. The Council's definition of "Sustainable Development" is elastic. It means whatever the Council chooses it to mean. Interestingly it is not defined in the glossary. In policy PR1 the Council even chooses to say what is included in the definition "for the purpose of the Partial Review". The use of the phrase in this plan is meaningless. We object to the proposal for 4,400 houses in the Green Belt as it is not sustainable because it would mean that: traffic problems would get much worse, public services and other infrastructure would be even more stretched, open countryside in the Green Belt, which is intended to be permanent, would be sacrificed for ever. Countryside walks and views would be lost to local residents in Kidlington, Begbroke and Yarnton who do not have the benefit of local parks, and for whom the countryside is currently a substitute. Natural habitats would be destroyed. The natural environment will be a major causality. Loss of habitat and increased recreational use of the green spaces that remain will stress and endanger wildlife. We think that the Council's contention that the development will result in a

net increase in biodiversity is implausible and not supported by evidence. Environmental quality and quality of life for existing residents will suffer as air, noise and light pollution would increase.

Other comments include:

- Objection to building 4,400 houses in this area for Oxford overspill. 4,400 houses is not a justified or proven requirement. It is unsustainable, Oxford should do more to meet its own needs.
- In light of the Government's consultation on its new approach to housing assessment, CDC should halt the current process and reassess its figures before continuing.
- The SHMA is discredited.
- It is premature to make decisions on the Partial Review. The Plan should be halted until the Oxford City Local Plan has been completed.
- The apportionment of 4,400 houses can only be treated as a minimum.
- Sufficient flexibility needs to be built in to the Plan to provide for contingency.
- There are no exceptional circumstances to develop in Green Belt.
- Unused property and land in Oxford should be developed first before destroying the countryside.
- The additional traffic has not been factored in to this Plan.
- There is no evidence that the proposed Rapid Transit route will either deliver the required numbers nor be a practical solution at rush hour.
- Without a cheap, effective, reliable and convenient public transport scheme, the linkage between homes in Kidlington and jobs in Oxford fails.
- The villages do not have the infrastructure to support this expansion.
- Oxford City Council has been allocating land in the City for employment instead of for housing. It has ignored the impact on surrounding Districts and failed in the Duty to Cooperate.
- Housing development on this scale is not justified in the Green Belt.
- The University and colleges could do much more with their property in the City rather than building on Green Belt.
- Unfair that Oxford will protect its own Green Belt and green spaces but expects the surrounding areas to destroy their Green Belt and green amenities for their enhancement.
- The character of Yarnton and Begbroke will be destroyed.
- Natural habitats and wildlife would be destroyed.
- Houses will be bought by London commuters.
- Increased traffic congestion.
- Green Belt is a permanent designation.
- Development cannot be guaranteed to provide truly affordable housing.
- Housing allocations in the Kidlington Gap should be removed.
- No consideration of the Kidlington Master Plan.
- The densities proposed are too low.
- All infrastructure should be provided before the development is complete.

Officer Response

These wide ranging comments have been noted. However, officers consider that this policy is 'sound' and no changes are proposed.

Policy PR2 – Housing Mix, Tenure and Size

Approximately 40 comments were made on this policy. These included representations from the following:

Gosford and Water Eaton PC - Supports the overall approach to providing high levels of affordable housing. How will affordable housing be defined so that it is truly affordable for those in need? The same affordability problems exist for residents of Gosford and Water Eaton as for those in Oxford. The Plan should ensure that new affordable housing is equally available to residents in Gosford and Water Eaton. It is important that affordable housing is delivered in accordance with the policy and not watered down as a result of developer pressure. Appropriate mechanisms need to be in place to secure the affordable housing in perpetuity. Providing housing for key workers is welcomed however how this will be made is unclear in the policy and would welcome explicit and secure inclusion. In the case of market housing there is concern that an appropriate mix is provided and not just executive homes. The mix of housing type is not set out in the policy. In addition, are concerned that buy to let landlords may purchase market housing, making it less affordable.

Kidlington PC - There needs to be greater detail in the Policy & supporting text (or an Appendix) regarding how affordable housing will be defined & delivered such that it continues to remain affordable for all local residents working in Oxford. Further details should also be given on the mix of market housing type and how key worker housing will be provided. There are concerns that CDC housing clients might be displaced from the Housing Waiting List by Oxford clients.

Oxford City Council - The City Council's priority for addressing the needs of those on the housing register would be for social rent homes. Welcomes the ongoing dialogue with CDC planning & housing colleagues, to discuss delivery of affordable housing at the sites allocated through the Partial Review, & particularly the allocations policy for rented affordable housing. It is envisaged that these discussions will culminate in an agreed strategy or process for allocating nomination rights to the City Council for those on its housing register. It is supported that 'key worker' housing may be delivered as part of the remaining 20% intermediate affordable housing. Proposing to take a new approach to this issue & not using the term key worker in its emerging policy approaches in the Oxford Local Plan; the Preferred Options proposes an approach aligned more with income & affordability rather than specific employers or sectors.

Other comments include:

- Insufficient certainty that affordable housing will be delivered.
- What is the definition of 'affordable housing'?
- 80% of market value is not affordable.
- There is no visible process for how the affordable housing allocation will work in practice.
- Within the definition of affordable housing specific allowance should be made for key workers employed by the University and Colleges.

- Nomination rights for rented property should be in the control of CDC.
- No provision for people living in CDC who are employed in Oxford.
- A proportion of the housing needs to be allocated for people living in Kidlington, Gosford, Yarnton and Begbroke who are also affected by inflated house prices in the area.
- No visible process for nomination rights.
- There is no agreement on the mix of housing that is required.
- Only land owned by the University should afford key worker status to university staff.
- Policy exclusively promotes self-contained dwellings. The opportunities represented by purpose built HMOs and cohousing have been overlooked/excluded.
- Policy could be expanded to allow provision of employer funded housing and student housing.
- No reference to the need for care homes and nursing homes.
- Criterion for self-build/ self-finish units should be removed.
- Policy requires more flexibility to allow housing mix to be determined on a site by site basis, and a departure from policy where adequate justification and evidence is submitted as part of individual planning applications.
- Concern that Oxford University and its colleges may be exempted from any infrastructure contributions through charitable exemption.

Officer Response

Securing the delivery of affordable housing is critical in helping to meet Oxford's housing needs in the context of the 2014 SHMA and Oxford's Housing Strategy. Officers from the two Councils have been in discussion with a view to agreeing an outline approach for the cross border allocation of housing. The discussions have been broadened out in the context of other Oxfordshire local plans seeking to address Oxford's needs and cooperative work on the Oxfordshire Growth Deal which includes the delivery of affordable homes.

Officers consider that the Plan's approach to tailor the overall need for affordable housing to Oxford's needs to be required and deliverable in the context of evidence including the Plan's viability assessment (evidence doc. PR49). Agreement between the two councils as housing authorities will help ensure timely delivery. The concerns raised in representations about the wider 'affordability' of market housing and the risk that it is not readily available to those working within Oxford go beyond spatial planning issues, but the provision of additional housing would assist movement within the market and officers consider that Policy PR2 - Housing Mix, Tenure and Size would help tailor the new housing to local needs.

In the interest of consistency a proposed focused change includes the addition of the proposed 50% affordable housing requirement to Policy 12b: Sites Not Allocated in the Partial Review.

Policy PR3: The Oxford Green Belt

This policy received the most comments of any in the Plan. Over 850 comments were made, the vast majority of which raised objections. Comments included representations from the following:

Gosford and Water Eaton PC - 95% of the land within the Parish is within the Green Belt. The plan as proposed allocates 3 significant sites for housing and removes 2 others from the Green Belt. In total,

this involves the removal of nearly 100 hectares of land from the Green Belt within the Parish Council's area which represents 12% of Green Belt in the Parish. This loss will occur in the narrow gap between Gosford and Water Eaton Parish and the village of Kidlington with north Oxford reducing the separation substantially leaving very little undeveloped land between the settlements. It will result in the urbanisation of Gosford and Water Eaton Parish with a 208% increase in the number of houses within the Parish. Noted that in the Green Belt Study (April 2017) all the site allocations in the Parish were identified as "High" or "Moderate High" in terms of harm to the Green Belt from their release for development. Indeed, of all the sites considered in the study within Gosford and Water Eaton the majority are also given a "High" or "Moderate High" ranking. It is clear that releasing this land for development of 1410 dwellings will lead to the coalescence or near coalescence of Kidlington, Gosford and Water Eaton and Oxford. The remaining gap is heavily dominated by transport infrastructure (railways and major roads) and therefore does very little to preserve any real sense of openness which is a key function of Green Belt policy. With such a narrow gap it will be much more difficult to retain any real sense of separate identity for Gosford and Water Eaton and for Kidlington. Would also highlight a clear inconsistency in the way Cherwell District and Oxford City have approached the review of Green Belt sites as part of their Local Plan process. Both authorities have carried out Green Belt Studies using the same consultants (LUC) and the same methodology which assesses the harm associated with releasing sites for development. In the Oxford City Council – Background Paper Preferred Options on Housing Needs and Supply June 2017 it states on page 5: "On balance, the proposed policy approach in the Local Plan is to exclude from the site allocations process any sites or parcels which would have a "high" harm or "moderate high" harm impact. These sites are therefore not to be taken forward for further consideration. By contrast all the sites allocated by Cherwell in Gosford and Water Eaton are scored "moderate high" or "high". This is a fundamental inconsistency in the approach adopted and begs the question as to whether Oxford City have really considered all options for development within the City boundary to an equal extent as within Cherwell. In our view this throws further doubt on the appropriateness of the figure of 1410 houses for Gosford and Water Eaton. In conclusion our view is that development of the three sites in the Parish for 1410 dwellings will fundamentally undermine the key purposes of the Green Belt and should not be permitted to go ahead.

Kidlington PC - Delete references to removal of sites PR3c, PR3d, PR6a, PR6b, PR8 from the Green Belt. Exceptional circumstances have not been demonstrated in relation to the scale of need that should be accommodated in Cherwell District. All the proposed sites are categorised as scoring high or moderate/high in importance in the GB study, in respect of preventing neighbouring towns merging into each other (See Figure 4.3 Oxford Green Belt Study 2015). They should be excluded from further consideration for new development & consistent with the findings of the Oxford City Preferred Options Local Plan. The Cherwell GB study 2017 downgrades the importance of some of the sites & scores land south of the railway & land west of Kidlington high in terms of harm. Substantial reduction of the GB is wholly incompatible with the strategic need for a GB. The effects of the planned allocations would be to reduce the width of the GB between the expanded settlement of Oxford & Kidlington to less than 1Km in places, in a location where much of the intervening gap is occupied by transport infrastructure. Exceptional circumstances have not been demonstrated in relation to the scale of need that should be accommodated in Cherwell District. All the proposed sites are categorised as scoring high or moderate/high in importance in the GB study, in respect of preventing neighbouring towns merging into each other (See Figure 4.3 Oxford Green

Belt Study 2015). They should be excluded from further consideration for new development & consistent with the findings of the Oxford City Preferred Options Local Plan. The Cherwell GB study 2017 downgrades the importance of some of the sites & scores land south of the railway & land west of Kidlington high in terms of harm. Substantial reduction of the GB is wholly incompatible with the strategic need for a GB.

Begbroke PC – Do not agree that there are exceptional circumstances for developing in the Green Belt. Have no confidence that the Green Belt will be sustained and that land adjacent to Begbroke Lane will not be proposed for future development. Our residents do not want organisations or other landowners with vested interests to destroy our pleasant environment to satisfy their own interests.

Yarnton PC - Policies PR8 & PR9 propose removal of land from the Oxford GB. This is not consistent with National Policy and is unsound. The 'exceptional circumstances' justifying its removal para 5.17 (p66) are largely implausible. The Plan shoehorns in a number of homes close to Oxford City without regard to the identities of Yarnton & Begbroke & without effective infrastructure.

Hampton Gay and Poyle PM - Policy PR3 is flawed as it sets out to allow for exceptional changes to the Green Belt. 3. Most of the proposals violate a key Green Belt purpose. On page 2, the second of these is stated to be 'to prevent neighbouring towns merging into one another'. Several of the sites, if developed, would directly contravene this purpose.

Weston on the Green PC - Objection to Options A and B as National Planning Policy states that a local planning authority should regard the construction of new buildings as inappropriate in GB. There are no exceptional circumstances for development in the Green Belt.

Wolvercote Neighbourhood Forum - Do not consider that the policy of building on the Green Belt has been based on an "objectively assessed" housing need, and therefore it has not been positively prepared nor justified. We question whether any housing to meet the unmet housing need should be built on the Green Belt without first exploring other ways of meeting Oxford's housing needs, for example by Oxford City Council using land within its boundaries for housing rather than for employment, and building homes at a higher density. The Government has recently put forward a new way of calculating objectively assessed housing need and this suggests that housing needs and therefore unmet housing needs have been wrongly calculated and overestimated. Oxford City Council has not yet prepared a local plan (it is only at the Preferred Options stage) so there is currently no estimate of how much housing it can provide itself and so the unmet need cannot be accurately determined. Proposing to build more homes under these circumstances is irresponsible and makes the plan unsound. Do not support building on the Green Belt. A new community could be built on an existing brownfield site at Shipton on Cherwell quarry. The transport infrastructure could not cope with the additional traffic which building new homes on the Green Belt north of Oxford would bring.

West Oxfordshire DC - Exceptional circumstances have been demonstrated to justify the release of sites from the GB, including sites for housing to help meet Oxford City's unmet housing needs, and sites for necessary transport infrastructure. It is clear from the evidence base for Cherwell's proposed submission plan and from the Oxfordshire Growth Board evidence base that the release of sites from the GB is necessary to deliver the scale of housing required in a sustainable manner. It is important to consider the relationship of sites with Oxford and consider how well they contribute to

helping meet Oxford's needs. The proposed housing sites to be released from the GB relate well to Oxford and to proposed or existing transport infrastructure.

Oxfordshire County Council - The removal of the Water Eaton Park & Ride (P&R) site from the Green Belt (site PR3d) is a positive step and is strongly supported by OCC.

CPRE - The SHMA is explicit that Authorities are not expected to meet OAN (Objectively Assessed Need) in full if e.g. it would necessitate Green Belt development. It has been the unforced choice – not the requirement – of Oxfordshire’s Councils to agree to meet the SHMA need in full despite wide swathes of Oxfordshire being GB and AONB. It is therefore incumbent on Councils to take on each other’s’ “unmet need” if it would otherwise require GB land to be released. As shown, Oxford’s unmet need is very far indeed from being quantified or crystallised, but, if it were, it would be the duty of other Councils to assist Cherwell in meeting its part of that need without releasing GB land, not least by assisting Cherwell to understand how to do so within its own borders. There is no evidence that this has been attempted. CDC should re-visit the process, as and when the final numbers for Oxford have been examined, adopting higher densities and prioritising protection for the GB.

Kidlington Development Watch - Object strongly to the proposal to remove land from the Oxford Green Belt. The Green Belt around Kidlington is mainly pleasant and unspoilt countryside with many well-used footpaths and ‘green spaces’. It is much appreciated and enjoyed by large numbers of local residents. Kidlington does not have many green spaces within it, and no park, and the surrounding Green Belt helps to compensate for this. The submission document does not sufficiently take into account the recently adopted Kidlington Masterplan SPD which is written on the basis that the surrounding Green Belt remains fundamentally unchanged. In particular we draw attention to the objective to strengthen Kidlington’s distinctive character of a ‘village set in the landscape’ and the objective to ‘protect and enhance Kidlington’s landscape and biodiversity assets’. Above all, the Green Belt exists to protect the historic city of Oxford from the effects of over-development as is acknowledged in the adopted Cherwell Local Plan. Government guidance states that Green Belt is a permanent designation and that the existence of Green Belt is a reason not to meet objectively assessed need in full. It also states that unmet housing need is not a reason for building in the Green Belt. Cherwell Council has made no allowance for this in the submission plan. All of the Green Belt around Kidlington contributes to the purposes set out in the NPPF as has been shown in local studies. Government guidance and Cherwell’s existing policy to protect the Green Belt should be upheld.

Other comments include:

- Objection to the removal of land from the Oxford GB. The GB preserves open spaces that are much appreciated by local residents, protects both the historic city of Oxford from overdevelopment and neighbouring villages from coalescence. Government guidance says that GB is a permanent designation and that unmet housing need is not a reason for building in the GB. The Plan is therefore not consistent with National policy.
- In light of the Government's consultation on its new approach to housing assessment, Cherwell DC should halt the current process and reassess its figures before continuing. If or when the process does continue, housing development on this scale is not justified on Green

Belt sites around Kidlington, Yarnton and Begbroke and alternative sites in the district should be reassessed.

- A more thorough Green Belt Review is required which should include a full assessment of the sites against the five purposes of the Green Belt. The additional work needs to explore and justify why the Council has chosen to pursue development at these Green Belt sites which will see the coalescence of three existing settlements over other more suitable development options.
- Green Belt should be preserved at all costs.
- Exceptional circumstances have not been demonstrated.
- The Plan should focus on regenerating and recycling of land within Oxford, increasing densities and prioritising affordable housing over employment sites.
- Plan is not consistent with CDC's adopted Local Plan policies.
- Plan will create urban sprawl. One of the purposes of the Green Belt is to prevent urban sprawl.
- Plan is not consistent with NPPF and Government policy.
- Green Belt preserves green spaces that are greatly appreciated and enjoyed by local residents.
- Housing allocations in the Kidlington Gap should be removed.
- Up to date statistics should be used.
- No development unless infrastructure is provided.
- There is unused land in Oxford which could be developed.
- Roads and infrastructure will be overwhelmed.
- Support for the principle of the revision of the Green Belt boundary.
- If PR3d is removed from the Green Belt it could open the door for other development on the Parkway site.
- The amount of Green Belt to be removed in such a small area is disproportionate.
- CDC should restart their Partial Review once Oxford City's housing need has been properly examined and when Cherwell does this it should have due regard for the importance and functions of the Green Belt.
- The alternative County Town strategy should be adopted to disperse both housing and economic growth throughout the county.
- Cherwell need to repackage and represent the need for a strategic review of the Green Belt and also take a comprehensive approach to include University and inward investor needs given that the prospect of a further Green Belt review is unlikely for a generation.

Officer Response

The national importance given to the protection of designated Green Belts and the 'high bar' set for the removal of land from the Green Belt through Local Plan demonstration of 'exceptional circumstances' has necessarily been a fundamental principle of Plan preparation. The 'exceptional circumstances' test is different from the Development Management test of 'very special circumstances' for 'inappropriate' development within the Green Belt.

Officers have reviewed whether its examination of reasonable alternatives remains robust in the light of representations. The view remains that Areas of Search, other than Areas A and B, are

unsuitable for the accommodation of the additional development required to meet Oxford's needs. The Council's approach to assessing exceptional circumstances has also been discussed with its Green Belt consultants in the context of comments made. A re-appraisal of the approach and options is not required. They are of the clear view that the exceptional circumstances set out at paragraph 5.17 of the Proposed Submission Plan are robust

Policy PR4a – Sustainable Transport

Approximately 70 comments were received relating to this policy. These included representations from the following:

Network Rail - Any development which would result in a material increase or significant change in the character of traffic using these rail crossings should be refused unless, in consultation with Network Rail, it can either be demonstrated that the safety will not be compromised, or where safety is compromised serious mitigation measures would be incorporated to prevent any increased safety risk as a requirement of any permission.

Highways England – Transport Modelling - With the enhanced transport improvement package, modelling shows that the links on the A44 corridor appear to be approaching or over-capacity in 2031 for both morning and evening peak hours, while some junctions along these corridors are predicted to be experiencing delay. We understand that two packages of strategic off-site transport improvements were tested. There is a lack of clarity regarding the schemes included within these model runs (including those discussed in the PR such as a new rail station at Yarnton/Kidlington, the conversion of the A34/A44 Peartree Junction to signal controlled, the severing of Sandy Lane, the A40/A44 link road and the mode shift to cycling). Further clarity is sought on details of model infrastructure inputs in this regard. We note that following the implementation of PR development there are predicted to be capacity issues along the A34 and at M40 Junction 9. It is not fully clear whether or how the operation is predicted to worsen when compared to the Do Minimum scenario. It is requested that a more comprehensive set of outputs is provided to enable HE to assess the impact of the PR development on the SRN and to assess whether the proposed transport improvement measures sufficiently mitigate those impacts. Furthermore, we are unaware of any more detailed junction modelling that has been undertaken. It is recommended that junction-specific models are used to assess the operation of the SRN both without development and with development and the proposed infrastructure measures. In connection with this, sensitivity testing should be carried out for scenarios in which the provision of infrastructure that would affect the SRN is/ is not included.

Consider that if 4,400 dwellings are delivered in the plan period (in addition to the developments already committed in the Cherwell Local Plan) then there could be a significant impact on the operation of the SRN and the importance of the accurate assessment of this impact needs to be emphasised. It should be noted that the development sites away from urban centres may not benefit from some of the existing urban sustainable transport options available. It is therefore important that sufficient sustainable transport solutions are provided to/from the development in these areas to ensure the impact of additional traffic on the network is minimised where possible. Welcome the intention to prepare Transport Assessments and Travel Plans to support all development identified to meet Oxford's unmet housing need.

West Oxfordshire DC - Transport and infrastructure are key issues and growth in Cherwell needs to be looked at cumulatively with growth in West Oxfordshire. The two local planning authorities share the A44 corridor, and this together with the A40 feeds into the congested Wolvercote roundabout. Growth in Cherwell and West Oxfordshire may have implications for northern Oxford and for the A34. The impact of the A44 corridor needs to be carefully considered, and it is vital that both districts work together with the County Council to bring forward the proposed A40/A44 link together with improvements to the A44. Consideration should be given to improving rail links by providing a new station at Begbroke. The two Councils should work together on the delivery of their Infrastructure Delivery Plans. Policy PR4a provides an appropriate framework for this to happen. Agree with the expectation that strategic developments will be expected to provide proportionate financial contributions towards necessary infrastructure and services.

Oxford City Council - The strategy seeks to locate development so that it is well connected to Oxford & supports the city's economy (Policy PR4a); & in addition it seeks to offer people convenient affordable & sustainable travel opportunities to the city's places of work, services, & facilities; These guiding principles are all welcomed.

Begbroke PC - Sandy Lane: Vehicles travelling to and from Kidlington and other destinations frequently use this road. Closure will have a major impact on Begbroke, Frieze Way, Langford Lane and the A4260. Oxfordshire County Council wish to divert traffic from the Kidlington, south bound A4260 along A4095 to A44 and continue through Begbroke. The proposed P&R at Campsfield Rd will again cause further traffic problems. This will cause further problems in Begbroke with attempting to cross the A44 and cause even further delays at Wolvercote and Cutteslowe Roundabouts. This does not even account for the 4500 houses. It will cause further problems in Begbroke with attempting to cross the A44 and cause even further delays at Wolvercote and Cutteslowe Roundabouts. This does not even account for the 4500 houses. Traffic problem pictures are shown of Langford Lane with an event held at Blenheim adjacent to proposed P&R and Campsfield Rd, Langford Lane and Parking Places at Oxford Technology Park. Key commuter routes including Sunderland Avenue and Banbury Road more congested

Gosford and Water Eaton PC - North Oxford suffers from "high levels of congestion and delay" and there are Air Quality Management Areas across the whole city as a whole and on a small section of the Bicester Road due to high levels of pollution. The Parish Council considers that 4400 new homes (with 1410 in the Parish) will exacerbate these problems further and is not convinced that the transport measures set out are deliverable and will address these problems. Gosford and Water Eaton is criss-crossed by the main major highways (A34, A44 and A4165) bringing commuters and visitors to the City. Additional houses allocated within the Parish, and at Begbroke, Yarnton, Woodstock and Kidlington as well as further afield at Banbury and Bicester will all generate extra traffic which will be channelled through the Parish. Whilst the Parish welcomes the proposed transport improvements in the Plan it remains unconvinced that sufficient funding exists or can be secured to deliver these improvements. Even with these changes in place the transport pressures in this area will remain. Appendix 4 provides a list of transport infrastructure improvements to support the growth proposed. Noted that whilst many of these are considered "Critical", costs/funding are to be confirmed. It is unclear whether these improvements will indeed secure the necessary funding. In addition, many of these schemes require developer funding for implementation which are clearly yet to be secured. There needs to be a much clearer link between the transport improvements and new

developments. Development should not go ahead until critical infrastructure is in place. Do not consider that Policy PR4 will achieve sustainable development, nor will it be effective in delivering the necessary improvements over the Plan.

Hampton Gay and Poyle PM - Policy PR4a is somewhat bizarre. It is clearly a requirement that the proposed development should require the delivery of affordable and sustainable transportation into Oxford. However, those of us who have lived in villages and towns north of Oxford for tens of years see no evidence yet of any such delivery. Surely it should be incumbent on the Council to demonstrate its ability to provide a better system to fit current needs prior to promising a wonderful and untested and, as yet, unplanned system that will support the requirements after the new houses have been built.

Hanwell PC - A new railway station 'between Kidlington and Begbroke is extremely unlikely to be deliverable. Plans for additional housing in North Oxford/South Kidlington should be put on hold until the Oxford to Cambridge Expressway route is settled, the East West railway is re-opened and the full extent of the expansion of Bicester is agreed, with its possible new transport infrastructure.

Wolvercote Neighbourhood Forum - Existing roads approaching the north of Oxford are already at full capacity in peak periods. Highway improvements to be effective need to be more extensive than we have experienced so far and it is unrealistic to expect that they will be implemented in the necessary time scale in the present economic climate. Even if adequate improvements are planned there will be a mis-match between the speed of development and the rate of their completion. Buses approaching from out of city Park and Ride facilities will be unlikely to cope with all the increased demand resulting from the 4,400 dwellings planned much closer to the city. The developments proposed by Cherwell District Council to the north of the city seem to ignore the fact that the majority of the employment sites are to the south east of the city. It does not make sense to build in these northerly areas, simply encouraging workers to cross the city by car. In addition, the policy does not appear to take account of the likely effect on the roads of building on the Northern Gateway site, with thousands of employees and hundreds of residents. Policy relies heavily on the implementation of the County Transport Plan. If this is not completed on time, the increase in traffic in north Oxford will just lead to even more congestion than already exists. The policy seems to ignore the fact that many people still prefer to drive their cars.

Canal & River Trust - The canal provides a direct link into Oxford. The canal towpath is an important traffic free route for walking / cycling for both leisure and utility walkers and could provide linkages between the urban areas and for access to local facilities such as schools / train stations. The towpath would also aid in providing a safe, convenient and attractive walking and cycling network to promote health and well-being, consistent with the aims of the NPPF. The Trust would note that the towpath width is restricted and there may be structures, pinch points and narrow sections of canal towpath, such as adjacent locks, within the District which may be a challenge in terms of increased usage and integrating with other towpath users, visitor moorings and anglers.

Other comments include:

- References to the Oxford to Cambridge corridor are contradictory. The Plan supports the existing rail link (between Bicester & Oxford) & onwards (to Milton Keynes, Bedford & Cambridge) but also supports the Expressway that would be in direct competition, probably

preventing the completion of the rail link or making it extremely costly in subsidy. This is contrary to the sustainable transport policies.

- If development was concentrated along the two railway lines (e.g. Shipton Quarry), commuters could access the centre of Oxford & towns/cities further afield without using the car.
- The road network is already heavily congested. The problems will be significantly worse with the proposed developments.
- Congestion will increase problems of air pollution.
- To reduce stress, congestion and numerous accidents on the local highway systems, more housing needs to be built closer to where the jobs are so that local residents can feasibly walk, cycle or use buses to get to work.
- The A44 through Woodstock and the A4095 in Bladon are operating at peak levels of around 70 to 75%. Major planned developments will substantially increase local traffic, private and otherwise, and this has not been factored into the overall Plan. Consequently, these local highway systems will not be able to cope with or sustain themselves with the massive combined developments planned in Cherwell and West Oxfordshire.
- Improving bus services to Oxford mainly rely on Oxfordshire CC subsidies which have recently been removed from many routes leading to withdrawal of services. Even if the frequency of buses was improved, the journey time into the city will increase, as there will inevitably be more traffic on the roads. The rapid transport network that is due to be ready by 2035, is a long way from being approved, or funded, let alone built.
- No mention is made of measures to encourage people to refrain from owning cars, such as promoting and providing space for car-sharing clubs.
- The most appropriate means of achieving sustainable transport arrangements has yet to be the subject of detailed study. It may be that when the effects of a proposed development upon the local highway network are assessed it will determine that some of these measures are no longer appropriate, or indeed that other measures should be prioritised.
- The Plan fails to provide adequate infrastructure. There are no costings or new ideas. There is no evidence that these plans are deliverable
- The costs, sources and identification of funding are not shown.
- No up to date evidence of a traffic or planning assessment.
- The Plans for new transport infrastructure deal with the existing needs and do not model the impact of the additional 4,400 houses.
- Plans will cost millions of pounds and are currently unfunded.
- The Rapid Transit System will not serve Begbroke and Yarnton.
- Sandy Lane provides a valuable and well used link between Begbroke, Yarnton and Kidlington. There is no public transport option to link these villages.
- The traffic increase will compromise road safety.
- There is no way that tripling the size of a village will only lead to a 1.2% increase in traffic.
- Expanding cycleways will not be effective.
- It should be made clear that all new developments must provide a number of ULEVs and charging points and car clubs. Parking spaces in residential areas should be limited to ULEVs and visitors
- The Park and Ride is not feasible.

- The relocation of the P&R site from the Airfield to the Begbroke site should be considered.
- The planned new railway station seems to have very restricted access and no parking provision.
- The Plan does not comply with NPPF paragraphs 29 and 30 in terms of delivering sustainable transport and reducing congestion.
- The Transport Assessment is not based on any feasibility study and so is optimistic about what can be achieved.
- The current infrastructure does not support the current traffic requirements encouraging the use of 'rat runs' through all the villages.
- There are no proposals for any form of innovative car free developments.
- The evidence base has failed to sufficiently consider investment in rail/exploitation of existing rail assets despite investment in the East-West rail project. A thorough exploration of the reasonable alternatives is required.
- There has been no analysis to give any confidence that the public transport improvements will meet the extra demand and achieve a significant modal shift away from private transport.
- There is no safe way to cycle to work.
- Bus operators – general support received.
- Development should not go ahead until critical infrastructure is in place.

Officer Response

Whilst the proposals for development within the Plan undoubtedly affect a challenging area of the district in transport terms – the interface with Oxford with main transport corridors (A44/A4260) into the city; connections with the A34 and A40; congestion at the Wolvercote, Cutteslowe and Peartree roundabouts and associated air quality issues – it is the view of officers that they represent the best opportunity for maximising the use of sustainable transport, reducing the reliance on the private car, ensuring high levels of accessibility to Oxford's places of employment, its universities, its services and facilities, and developing communities that are well-connected to Oxford.

Officers with the Council's transport consultant have worked in cooperation with Oxfordshire County Council from early stages of plan preparation through regular liaison meetings, through issue specific meetings at key stages of evidence preparation which resulted on the joint commissioning of transport modelling, understanding of the plan's effect on local and strategic road network, the identification of transport mitigation measures and culminated on the joint sign-off of the Transport Assessment supporting the plan. District and County officers met with Highways England at key stages of transport evidence and plan preparation.

In cooperation with the County Council, development locations were selected based on a 'lowest transport impact' basis, appraised through an iterative stage of model testing.

The County Council's proposals for rapid transit routes and strategic cycleway improvements within the Plan's growth area, its strategy for providing Park and Ride facilities further away from the city to encourage early 'modal shift', and its desire to improve traffic movements along both the A4260 and A44, integrate well with proposals for development immediately to the north of Oxford and along

the A44 and provide clear opportunities. The aspirations of the Kidlington Masterplan SPD to improve sustainable connectivity within the wider Kidlington / Begbroke area are also informative.

Alignment with the Oxford Transport Strategy, contained within the County Council's Local Transport Plan, has been a central theme of the Plan. Highways England's view that if Green Belt development were not to come forward, land allocations elsewhere could potentially have a far more onerous impact on the highway network is illustrative of the appropriateness of the proposed strategy in transport terms, notwithstanding the highway capacity challenges that endure.

The representation from Highways England has been considered by the Council's transport consultant and discussed at a meeting attended by Highways England and the County Council.

Officers from the three authorities discussed the effect of the plan on the M40 J9, A34 and A34 junctions and agreed that the main residual issues are concentrated upon the Peartree interchange which suffers from peak traffic congestion even without growth from the Partial Review.

The Plan's concentrated focus on sustainable travel helps to minimise additional impacts and there is an understanding that implementation would need to include improvements to bus services operating through the Peartree interchange and Loop Farm roundabout. There is agreement with the highway authorities that junction 'microsimulation' work may need to be taken forward once there is greater certainty over the precise nature of development. Through the Growth Board, the Oxfordshire councils have reached an Outline Agreement with Government for an Oxfordshire Growth Deal. Subject to agreement on a required Delivery Plan, it will commit the Government to a 5 year (2018-2023) £215m funding package which includes addressing the transport infrastructure requirements of growth to 2031. This is in the context of the Oxfordshire councils committing to delivering 100,000 homes (2011-2031) in line with the need identified in the SHMA 2014. The Partial Review's sustainable transport mitigation package is included in the emerging Growth Deal under 'North Oxford All Modes Corridor Improvements'.

Officers have updated the Plan's infrastructure schedule attached to the proposed Schedule of Focused Changes and Minor Modifications. Upon approval of the schedule, it would comprise part of the proposed changes to the Plan. The updates take into account additional information provided by the County Council. It is the view of officers that the Plan's proposals represent the most sustainable approach to addressing the local highway issues. There is clear alignment with the County Council's policies and programmes as Local Highway Authority. Strategic highway schemes have been identified in the Oxfordshire Infrastructure Strategy which will ensure countywide coordination and form the basis for funding bids. Officers will continue to work closely with the County Council and Highway England to secure investment for the transport improvements including strategic funding such as from the Growth Deal and Local Growth Fund, funding from developer contributions and from the capital programmes of the relevant authorities.

The Plan, its sustainability and its deliverability do not depend on the provision of a railway halt/station. Land is safeguarded to assist with a longer term aspiration following discussions with the site promoter (site PR8) and initial exploratory discussions with the rail industry.

On more detailed matters, officers from the county and district councils are agreed that the potential closure of Sandy Lane to vehicular traffic would not affect the operation of the Strategic

Road Network, that modelling evidence shows that Langford Lane operates under capacity and could absorb displaced vehicular moments; and, that modelling shows that the A40-A44 link road (highlighted by West Oxfordshire District Council) is not required to deliver the growth in the Partial Review. Officers recommend that its potential closure, aligned with the implementation of rapid transit routes, is retained within the Plan to maximise the potential for the use of sustainable transport, to create a high quality 'green link' between Begbroke/Yarnton and Kidlington, to achieve a high quality of development within site PR8 and to assist Network Rail with the closure of the level crossing for safety reasons.

The potential closure of the Sandy Lane level crossing has been discussed with and welcomed by Network Rail. It has also been agreed to introduce a minor amendment to the Plan requiring consultation with it on the development brief for site PR8 in part to avoid the pedestrian/cycle/wheelchair use of the Yarnton Lane/Green Lane as a preferred route that might lead to more intensive use of the level crossing thereon. It has been agreed that the Plan's proposals do not materially lead to increased vehicular traffic over the crossing. Nevertheless, Network Rail wishes to explore its potential for closure. The closure of both Sandy Lane and Yarnton Lane level crossings would be of significant benefit to Network Rail in terms of health and safety, journey times and rail capacity. Overall, having reviewed all the comments submitted, officers are of the view that a change is not required to plan's strategy for transportation but that the focused changes and minor modifications would improve the final document in light of detailed comments made.

Policy PR4b – Kidlington Centre

Less than 20 comments were made in relation to this policy. These included the following representations:

Kidlington PC - The Policy is confined to addressing transport and movement issues, while the need is for far wider changes to improve the vitality, viability, scale and quality of services in the village centre. The adopted 2016 Kidlington Masterplan deals with these in more detail, but is limited to matching the restrained local growth anticipated in the adopted CDCLP. If substantial new strategic developments are encouraged in the local area, it is essential that the village centre is assisted to both protect its valuable function in the light of competing new destinations, and to genuinely secure enhancements, rather than accept them if they are offered, as the current Policy suggests.

Other comments include:

- Kidlington has a vital and thriving village centre which is important to the identity of the village. It is a crucial feature of the Kidlington Master Plan. This must be supported and protected by CDC over the impact that major new housing areas and competing commercial development will have upon the High Street. Investment will be required and there is no delivery plan specified for feeding into the Kidlington Master Plan, including ways of accessing the amount of investment needed.
- Support in principle for this policy but would point out that the Kidlington Masterplan refers, in relation to the village centre, to more than just transport but also about improving the vitality, scale and quality of services in the village. The Masterplan was written to meet the needs of the village, as it currently exists. If development takes place in Yarnton and

Begbroke then there will be potential competing centres and as there is less proposed development in Kidlington itself it is difficult to see how proposals in the Masterplan will be funded.

- There is no need to strengthen Kidlington centre through transport improvements. Kidlington is served very well by buses which travel into the centre of Oxford, Headington hospitals and Woodstock. This is not an exceptional circumstance for the development of the Green Belt.
- Concerned about the vitality and viability of Kidlington Village Centre if the proposed developments take place, in the proposals there are sites that have been identified for small local centres which will include retail units, cafes/restaurants, community buildings and opportunities for leisure facilities. With the extra retail and café units it will put a strain on existing businesses in the village. Urge Cherwell District Council to carry out a study into the impacts of the proposed developments on the vitality and viability of Kidlington Centre and to ensure that the Kidlington thrives as a village centre once the development is completed.
- It is difficult to see that this policy will achieve any of the positive investment necessary. The Policy is confined to addressing transport and movement issues, while the need will be for far wider changes to improve the vitality, viability, scale and quality of services in the village centre.

Officer Response

These comments have been noted. However, officers consider that this policy is 'sound' and supports the themes and objectives of the adopted Kidlington Masterplan SPD. No changes are proposed.

Policy PR5 – Green Infrastructure

Approximately 20 comments were made in relation to this policy. These included representations from the following:

Historic England – Welcomes the policy.

Hampton Gay and Poyle PM - Policy PR5. The phrase to deliver "a consolidated and integrated approach to green infrastructure" is a wonderful but tenuous ambition. We do not believe that CDC sees this as a key aim and we find it hard to see how it will be achieved under the current proposals

BBOWT - Welcome the inclusion of a Green Infrastructure (GI) policy to compliment the already existing and adopted Green Infrastructure policy ESD17 from the adopted Cherwell LP 2011-2031, Part 1. Concerned about the lack of a county-wide strategy to identify, protect and enhance GI networks and recommend that the Council continues to work in partnership with the other Oxfordshire Councils with a view to develop a GI strategy for Oxfordshire in the future.

Sport England - Sport England welcomes the Council's references throughout the document and policies requiring developers to include open space, outdoor sport and recreation. However, Sport England is concerned that the Council has yet to publish its evidence base in relation to playing fields and outdoor sports provision and built sports facilities.

Oxford City – Welcomes the sensitive consideration of Cutteslowe Park.

Other comments include:

- The loss of countryside and green space will damage or obliterate what are currently rich and diverse wildlife and habitats. This cannot be compensated by 'wildlife corridors' and nature reserves as the Plan proposes.
- No evidence of how net biodiversity gains and GI etc. will be provided and funded.
- Proposed development will destroy or significantly damage the landscape.
- Potential damage to the Oxford Canal Conservation Area and the biodiversity value of the canal corridor.
- Proposals will increase air pollution.
- Heritage assets will be harmed.
- North Oxford Golf Course is a bio-diverse landscape. It is needed for health and wellbeing.
- Housing allocations in the Kidlington Gap should be removed.
- There are limits to the extent to which the development sites are able to deliver GI measures, based on environmental suitability, long term viability and land ownership.
- Unnecessary duplication with the GI requirements within each strategic development policy.
- Policy wording too restrictive.
- Policy should recognise that not all trees on site are suitable for retention.

Officer Response

The comments received have been noted. Support for the policy is welcomed. Officers consider that this policy is 'sound' and no changes are proposed.

Policy PR6a – Land East of Oxford Road

Approximately 180 comments were received in relation to this policy. The vast majority raised objections. These included representations from the following:

Gosford & Water Eaton PC – Allocation should be deleted and the land retained as Green Belt. This development will result in the loss of agricultural land (48Ha) and a highly valued local landscape which is used by local residents for recreation. Adding 650 houses will lead to a substantial reduction in the gap between Oxford and Kidlington and urbanisation of Gosford and Water Eaton. It will have a major impact on transport infrastructure in particular on the already heavily congested Oxford Road. The Parish considers that traffic from this development will increase congestion further. It is not clear how the transport improvements including new bus lane (and/or cycle lane provision) can be implemented without further problems for Oxford Road residents who already suffer from congestion, delay, air pollution and vibration caused by passing lorries/buses. In the Green Belt Study (April 2017) this site was categorised as "High" in terms of harm to the Green Belt from its release for development. The PC concurs with this view and considers that it would significantly erode the gap between Kidlington and Oxford, especially in combination with removal of the Park and Ride site from the Green Belt. This would result in continuous development up to the railway/A34. This will lead towards the coalescence of Gosford/Water Eaton/Kidlington and Oxford. The area has no easily definable boundary to the east which raises further concerns about how development may be contained in the long run. Affordable housing should be available to residents of the Parish.

Kidlington PC - Development of these sites would significantly narrow the important open countryside gap between Oxford and Kidlington, effectively creating the perception that Kidlington was not a separate village community, but a suburb of Oxford. Evidence does not demonstrate that exceptional circumstances exist to justify a release from the Green Belt, where background studies confirm that both sites are of high importance to the integrity and function of the Green Belt. Would aggravate existing local congestion and air quality issues, and adversely impact on movement between Oxford and Kidlington. The open character of the agricultural land east of Oxford Road forms part of the wider landscape which provides an important setting on the approach to Oxford.

Wolvercote Neighbourhood Forum - Development here will result in a high risk of harm to the Green Belt, according to the LUC Cherwell Green Belt Study (April 2017). To prevent the coalescence of Oxford and Kidlington these sites should not be developed. One of the purposes of the Green Belt is to prevent the coalescence of settlements. Development will harm the existing views of open countryside from Cutteslowe Park. There are other possible sites that have not been given sufficient consideration. This plan is also not justified because it is likely to fail to provide for the unmet housing need. The proximity to the station makes it far more likely that unaffordable expensive homes will be built for the benefit of commuters to London. It is unlikely that development would result in a net biodiversity gain (as required under PR6a clause 11) because Green Belt land would be destroyed by development. The policy is not consistent with national Policy, as it proposes to build on Green Belt, when NPPF outlaws the use of such land to meet unmet housing need when this is accurately determined.

Historic England - The site "Land East of Oxford Road" should not be taken forward without an assessment of the significance of St Frideswide Farmhouse, the contribution of its setting to that significance, and the likely impact of proposed development on that significance.

Oxford City Council – Supports this policy. The City Council supports the analysis that the area south of the A34 is perceptually part of the city of Oxford & that the recent developments at Oxford Parkway Station & Water Eaton Park & Ride reinforce this impression. We consider that this area links more clearly & effectively as part of the urban area to the south than to the rural area beyond. In sustainability terms, the area benefits from being adjacent to existing communities, frequent public transport links into the city, local facilities & services provided in Cutteslowe, Summertown & beyond, & proximity to the planned employment opportunities at Northern Gateway. Improving these existing links & facilities to support residents of the new housing is an efficient and effective way to secure their delivery.

CPRE - Government Policy and the Public Interest both require the GB to be permanent unless truly exceptional circumstances necessitate consideration of release. Oxford unmet need is not an exceptional circumstance, firstly because it has not been defined and secondly because there are ample reasonable alternatives to accommodate it. The LUC GB study was conducted on flawed principles and should be given little weight. Cherwell have cited no other exceptional circumstances which hold any water – and their primary arguments – proximity to Oxford – is in fact a key argument for GB retention rather than release. If at some future time an Oxford “unmet need” has been shown to exist and satisfactorily quantified, and if that requires any allocation to Cherwell, there are alternatives available to the District other than releasing GB land and therefore none should be released.

BBOWT - Have some concerns that 40 dwellings/ha might not allow sufficient space for meaningful green infrastructure such as large native street tree planting within the built-up areas.

Begbroke & Yarnton Green Belt Campaign - There is no proper justification for altering the Green Belt boundaries from where they currently stand. Object to the removal of land described as PR6a, PR6b, PR7a and PR7b from the Green Belt due to the importance of these sites in maintaining the gap between the villages of Begbroke, Yarnton and Kidlington to Oxford City.

Kidlington Development Watch - While we object to any release of land in the Green Belt including the allocated sites, we have a further concern relating to the possible overall location of land for housing in the event that any or all of the allocated sites are confirmed for development in any adopted plan. PR6a, 6b, 7a, and 8, the land areas allocated specifically for residential development (i.e. not the total site areas) are approximately 50% higher than would be necessary to accommodate the stated number of houses at the net densities specified. For example the largest site (PR8) for 1950 houses at 45dpha net should require 43.3ha, whereas the allocation is for 66ha, which is over 50% larger. The definition of net density is not specified in the plan though it usually includes access roads, parking, incidental open space and play areas. There are separate allocations for schools and a local centre, so it appears that the areas allocated specifically for residential development are significantly too large. Given the desirability of this land to developers, there is a clear risk that permission could be sought for significantly higher numbers of dwellings over and above the intended provision, resulting in even greater environmental harm and pressure on infrastructure. We are therefore concerned about the provision in PR12a (para 7) that should more than 4400 houses be built this will be taken into account in meeting Cherwell's own need, which would appear to be an incentive to the Council to approve higher numbers than set out in this plan."

Other comments include:

- Inappropriate development in the Green Belt.
- Site forms a key gap separating Oxford from Kidlington (the Kidlington Gap).
- Site meets all five purposes of the Green Belt.
- Loss of attractive open farmland.
- Will seriously harm the character and setting of St Frideswide Farmhouse.
- Proposals not consistent with NPPF.
- Proposed new Green Belt boundary is not a clear, defensible, permanent boundary.
- Development will lead to urban sprawl.
- Location close to Oxford Parkway will make housing attractive to London commuters.
- Policy needs to acknowledge that connectivity between areas of Oxford is already poor.
- Key worker housing should be required.
- Developers will not deliver 'Key Delivery Requirements'.
- Traffic in North Oxford is already severe.
- Severe pressures on other services including health and education.
- Concern about impact on Cutteslowe Park.
- Loss of wildlife habitats.
- Target density should be increased.
- Cherwell Valley landscape will be compromised.
- Oxford's identity is closely linked to its size and setting in the surrounding landscape.

- Consortium strongly supportive of allocation.
- There is an obvious need for more housing in the area.

Officer Response

The many objections to the development of this site, and the comments on the proposed policy, are noted. Officers remain of the view that the proposed allocation is sustainable and deliverable in view of the evidence. Recommended focused changes include minor changes to the area of land required for primary school use and detailed clarifications and amendments in response to comments received.

Historic England has requested some minor changes to the wording of requirements relating to the historic environment in this and other site policies which are included in the proposed focused changes. It also indicated in its representation that site PR6a should not be taken forward without an assessment of the significance of St. Frideswide Farmhouse, the contribution of its setting to that significance, and the likely impact of proposed development on that significance. However following a visit to the site and further discussion, Historic England confirmed that such an assessment was not required at this stage, but requested minor rewording of point 15.

Policy 6b – Land west of Oxford Road

Over 220 comments were made in relation to this policy. The vast majority raised objections. These included representations from the following:

Gosford & Water Eaton PC - The North Oxford Golf Course comprises: “an important buffer feature on the urban edge, limiting perception of the city, and helps to maintain the gap with Kidlington.” Building 520 houses on this area will significantly reduce the gap between Kidlington and Oxford where it is already at its narrowest. The Golf Course is an extremely important leisure facility which has existed for 110 years. It is highly valued by the local community and well used. Strongly object to it being developed for houses. The Parish questions the viability and practicality of moving the Course given the considerable expense and disruption which will result. Traffic from this development will increase congestion further. It is not clear how the transport improvements including new bus lane can be implemented without further problems for Oxford Road residents who already suffer from congestion, delay, air pollution and vibration caused by passing lorries/buses. In the Green Belt Study (April 2017) this site was categorised as mostly “High” or “Moderate High” in terms of harm to the Green Belt from its release for development. Concur with view and consider that it would significantly erode the gap between Kidlington and Oxford, especially in combination with removal of the Park and Ride site from the Green Belt and also site PR3c. This would result in continuous development up to the railway/A34. This will lead towards the coalescence of Gosford/Water Eaton/Kidlington and Oxford. There is well established tree cover on the site including many TPO trees which could be impacted by this development.

Kidlington PC - This site would perform as urban extensions to Oxford, physically linked to existing communities. Development of these sites would significantly narrow the important open countryside gap between Oxford and Kidlington, effectively creating the perception that Kidlington was not a separate village community, but a suburb of Oxford. The combination of both sites, either side of the Oxford Road, currently provides a valued area of unlit open green space, and a distinct

break in development between the City and surrounding villages, along a major entrance corridor to Oxford. Evidence does not demonstrate that exceptional circumstances exist to justify a release from the Green Belt, where background studies confirm that both sites are of high importance to the integrity and function of the Green Belt. (See 2015 and 2017 Green Belt Studies) Development on either or both sites would aggravate existing local congestion and air quality issues, and adversely impact on movement between Oxford and Kidlington. The landscape of the Golf Course is manmade, but long established, with significant tree belts and groups. It is unlikely to be able to preserve these features unless development is restricted to a low density and larger dwellings. As a result, there would be an inefficient use of an important large area, and potential viability difficulties in accommodating 50% affordable housing. The net benefits do not outweigh the substantial harm to local character. The Golf Course is also a local recreation facility, and KPC consider that its loss is unlikely to be offset by a new Golf Course on a significantly smaller site at Frieze Farm. Development on this site conflicts not only with NPPG Green Belt Policy, but also with paragraph 74 of the NPPG, which seeks to prevent the loss of recreation facilities. Indeed, site owners/promoters have recently made a presentation proposing 600 houses on the Frieze Farm site, and have no apparent intention of creating a new Golf Course.

Wolvercote Neighbourhood Forum - Building on the Green Belt is not sustainable. Development here will result in a high risk of harm to the Green Belt, according to the LUC Cherwell Green Belt Study (April 2017). To prevent the coalescence of Oxford and Kidlington these sites should not be developed. One of the purposes of the Green Belt is to prevent the coalescence of settlements. Development will harm the existing views of open countryside from Cutteslowe Park. If the North Oxford Golf Course is to be relocated it will take some years to develop a similar mature natural environment. In the meantime the proposed relocation will remove a recreational facility also valued for its contribution to biodiversity. There are other possible sites that have not been given sufficient consideration. This plan is also not justified because it is likely to fail to provide for the unmet housing need. The proximity to the station makes it far more likely that unaffordable expensive homes will be built for the benefit of commuters to London. It is unlikely that development would result in a net biodiversity gain (as required under PR6a clause 11) because Green Belt land would be destroyed by development. The policy is not consistent with national policy, as it proposes to build on Green Belt, when NPPF outlaws the use of such land to meet unmet housing need when this is accurately determined.

Oxford City Council – Supports this allocation. The City Council supports the analysis that the area south of the A34 is perceptually part of the city of Oxford & that the recent developments at Oxford Parkway Station & Water Eaton Park & Ride reinforce this impression. We consider that this area links more clearly & effectively as part of the urban area to the south than to the rural area beyond. In sustainability terms, the area benefits from being adjacent to existing communities, frequent public transport links into the city, local facilities & services provided in Cutteslowe, Summertown & beyond, & proximity to the planned employment opportunities at Northern Gateway. Improving these existing links & facilities to support residents of the new housing is an efficient and effective way to secure their delivery. A higher housing density may be more appropriate.

CPRE - Government Policy and the Public Interest both require the GB to be permanent unless truly exceptional circumstances necessitate consideration of release. Oxford unmet need is not an exceptional circumstance, firstly because it has not been defined and secondly because there are

ample reasonable alternatives to accommodate it. The LUC GB study was conducted on flawed principles and should be given little weight. Cherwell have cited no other exceptional circumstances which hold any water – and their primary arguments – proximity to Oxford – is in fact a key argument for GB retention rather than release. If at some future time an Oxford “unmet need” has been shown to exist and satisfactorily quantified, and if that requires any allocation to Cherwell, there are alternatives available to the District other than releasing GB land and therefore none should be released.

Begbroke & Yarnton Green Belt Campaign - There is no proper justification for altering the Green Belt boundaries from where they currently stand. Object to the removal of land described as PR6a, PR6b, PR7a and PR7b from the Green Belt due to the importance of these sites in maintaining the gap between the villages of Begbroke, Yarnton and Kidlington to Oxford City.

Kidlington Development Watch - While we object to any release of land in the Green Belt including the allocated sites, we have a further concern relating to the possible overall location of land for housing in the event that any or all of the allocated sites are confirmed for development in any adopted plan. PR6a, 6b, 7a, and 8, the land areas allocated specifically for residential development (i.e. not the total site areas) are approximately 50% higher than would be necessary to accommodate the stated number of houses at the net densities specified. For example the largest site (PR8) for 1950 houses at 45dpha net should require 43.3ha; whereas the allocation is for 66ha, over 50% larger. The definition of net density is not specified in the plan though it usually includes access roads, parking, incidental open space and play areas. There are separate allocations for schools and a local centre, so it appears that the areas allocated specifically for residential development are significantly too large. Given the desirability of this land to developers, there is a clear risk that permission could be sought for significantly higher numbers of dwellings over and above the intended provision, resulting in even greater environmental harm and pressure on infrastructure. We are therefore concerned about the provision in PR12a (para 7) that should more than 4400 houses be built this will be taken into account in meeting Cherwell’s own need, which would appear to be an incentive to the Council to approve higher numbers than set out in this plan."

Other comments include:

- Inappropriate development in the Green Belt.
- Site forms a key gap separating Oxford from Kidlington (the Kidlington Gap).
- Kidlington Gap should be protected to prevent urban sprawl and maintain village identities.
- Site meets all five purposes of the Green Belt.
- Proposals will result in the loss of the North Oxford Golf Course which is a valuable recreation facility.
- Will seriously harm the character and setting of St Frideswide Farmhouse.
- Proposals not consistent with NPPF.
- Proposed new Green Belt boundary is not a clear, defensible, permanent boundary.
- Development will lead to urban sprawl.
- Location close to Oxford Parkway will make housing attractive to London commuters.
- Policy needs to acknowledge that connectivity between areas of Oxford is already poor.
- Key worker housing should be required.
- Developers will not deliver ‘Key Delivery Requirements’.

- Traffic in North Oxford is already severe.
- Severe pressures on other services including health and education.
- Proposed relocation of golf course to Frieze farm is unviable.
- Frieze Farm should be developed for housing.
- The Frieze Farm site is too small for a replacement golf course.
- Loss of wildlife habitats.
- Target density should be increased.
- Support for allocation.
- Oxford's identity is closely linked to its size and setting in the surrounding landscape.
- Consortium strongly supportive of allocation.
- There is an obvious need for more housing in the area.

Officer Response

The many objections to the development of this historic recreation facility with its mature landscape are noted. The comments on the proposed policy are acknowledged. During the consultation period, the Leader of the Council, with Council officers, met a group of members of the North Oxford Golf Club to hear their concerns. In the light of evidence, officers remain of the view that the suitability of this site for meeting Oxford's housing needs far outweighs the loss of the golf course and that there remains potential to provide a replacement facility on a comparably sized site at Frieze Farm (Policy PR6c). Recommended focused changes include detailed clarifications and amendments in response to comments received.

The Proposed Submission Plan's reference to a lower density of development on land to the west of Oxford Road reflects its well-treed character. However, in the context of other comments received, it is recommended in the focused changes to remove reference to prescribed densities in all site policies in view of the required development brief process and to avoid misinterpretation in light of the different circumstances for each site.

Policy PR6c – Land at Frieze Farm

Approximately 70 comments were made in relation to this policy. These included representations from the following:

Gosford & Water Eaton PC - the Parish Council is opposed to development on the North Oxford Golf Course and therefore to a replacement course being provided on this site. There is very little detail provided on this proposal which is of major concern. Indeed, the size of the site is not stated and there is no evidence provided to confirm that the site is large enough or suitable for a replacement course. It is not clear how the site would be accessed or what constraints exist to influence any future development brief. Whilst the Parish is opposed to the development of Green Belt, if development does have to go ahead within the Parish then we suggest that further consideration could be given to the suitability of Frieze Farm for housing. The site could link to the North Oxford Gateway and to existing road infrastructure. It could also help support the underused Stratfield Brake recreational facility.

Kidlington PC - Consider that the suggested use of this land as a replacement high quality rural character Golf Course is unrealistic, as the site is too small. It is also a fairly featureless open parcel

of land, where formal golf course development would require years of maturity in planting to deliver a scheme compatible with the open character of the Green Belt. The site remains in the Green Belt, and this is strongly supported. If the site was removed from the Green Belt under pressure from other participants/site owners, once the idea of a new golf course is abandoned, alternative development could follow under the provisions of Policy PR12b. Indeed, site promoters have recently publicised a proposal for a 600 unit housing scheme on the site, and appear to have no interest in providing a new Golf Course. This proposal for a golf course appears to be ill-founded. The location of this site means that it would be a freestanding housing development, integrated with neither Oxford nor Kidlington, and probably of insufficient scale to fund on site community provision. This would be an unsustainable form of development, encouraging travel to essential infrastructure such as schools, contrary to the spatial strategy of the adopted Local Plan. The retention of Green Belt designation is supported.

Historic England - Policy PR6c should include a requirement for the retention of the Grade II listed Frieze Farmhouse and an appropriate sensitive setting in any golf course proposal.

Turnberry on behalf of Exeter College - The allocation of site PR6c for the potential construction of a golf course, should this be required as a result of the development of Land to the West of Oxford Road under Policy PR6b, is not justified by the evidence base and is an inefficient use of a sustainably-located parcel of land, which is well-related to Oxford. The site has the capacity to provide for 800 new homes.

Other comments include:

- The farmland, featureless and surrounded by pylons, is unsuitable for a golf course.
- The current owners of the Frieze Farm have not given their approval to have the club relocated there.
- The relocation is unrealistic and unviable.
- It is not clear how this relocation will be funded.
- The site is too small for a replacement golf course.
- Landowners want to develop the site for housing.
- Support for retention of the site in the Green Belt.
- Proposals will significantly alter the character of the landscape.
- The site should be allocated for housing.

Officer Response

The many objections to the potential development of this site for a replacement golf course are noted including comments that it is not suitable for such a facility, and on the proposed policy. The site is not considered to be the optimum size for the development of a new 18 hole course, nor does it have the advantage of the mature landscape that has been created at the existing north Oxford course. However, at only about 2 hectares smaller than the existing course, and being situated very close to the existing course, the site remains to be regarded as a reasonable option for a replacement golf facility, should this be necessary to meet local needs. Officers have considered the deliverability of the site from a land use perspective and are of the view that the proposed reservation of land remains appropriate. In response to comments made, focused changes are

recommended to Policy PR6c to insert criteria for considering potential applications for planning permission, consistent with the approach taken for other site policies.

Policy PR7a – Land South East of Kidlington

Over 100 comments were made in relation to this policy. The majority raised objections. These included representations from the following:

Gosford & Water Eaton PC - The development of this area will result in the loss of 11 hectares of Green Belt land which forms an important part of the gap between Kidlington and Oxford. Building 230 houses in this location will result in a weakening of this gap. The Parish Council objects to the development of this land. In total 1410 dwellings are proposed in the Parish. 230 of these are on this site. In our view this will add to the existing traffic problems which exist and further add to congestion and delay. There is no scope for extra traffic on Water Eaton Lane and there should be no vehicle access onto it from any development. In the Green Belt Study (April 2017) the majority of this site was categorised as partly “High” and with the remainder as “Moderate” in terms of harm to the Green Belt from its release for development. Development would significantly erode the gap between Kidlington and Oxford, especially in combination with removal of the Park and Ride site from the Green Belt, site PR3c and allocations PR6b and PR6a. This would leave a very small gap comprising the southern part of PR7a between Kidlington and Oxford. This will lead towards the coalescence of Gosford/Water Eaton/Kidlington and Oxford. The overflow gravesite from St Mary’s Church is situated very closely to this site with an area built in for expansion. However, any new development in Kidlington and Gosford & Water Eaton is not included in the current growth plan. Agree that additional space needs to be provided in this area. Suggest additional space should be reserved here, in the form of allotments, to be ready for future need.

Kidlington PC - Considers that development on this site could reasonably be considered as an extension to Kidlington, securing a permanent green boundary. While its removal from the Green Belt is regrettable, if justified as exceptional circumstances by PR1, its release could bring long term benefits, offsetting the loss of Green Belt land with a well-integrated village extension of modest scale, compatible with the character of Kidlington. However, the policy needs to be amended to require the footbridge link as described in P 5.96. This site and others around Kidlington including PR7b (Stratfield Farm) should also be required to contribute to improved access arrangements for Stratfield Brake, which have long been identified as unsatisfactory, necessitating longer journeys along congested roads. A new spur to provide access direct from the roundabout is recommended. Otherwise, there is general support for this allocation.

West Oxfordshire DC – Request a review of the proposed densities and the resulting site capacities of the sites to be released from the GB in order to ensure that efficient use is made of this scarce land resource.

Oxford City Council - Supports the analysis that there is a close relationship between Kidlington & Oxford & that new homes to the south of the town would be well related to Oxford & help provide for the needs of the city. We agree that is possible to develop to the south of the town whilst maintaining an important GB gap between the two settlements & maintaining the character of Kidlington. Delivery of good public transport, cycle & pedestrian links to the transport hubs (and

thereafter on into Oxford) are essential & we welcome the provision for these in the proposed policies.

Begbroke & Yarnton Green Belt Campaign - There is no proper justification for altering the Green Belt boundaries from where they currently stand. Object to the removal of land described as PR6a, PR6b, PR7a and PR7b from the Green Belt due to the importance of these sites in maintaining the gap between the villages of Begbroke, Yarnton and Kidlington to Oxford City.

Kidlington Development Watch - While we object to any release of land in the Green Belt including the allocated sites, we have a further concern relating to the possible overall location of land for housing in the event that any or all of the allocated sites are confirmed for development in any adopted plan. PR6a, 6b, 7a, and 8, the land areas allocated specifically for residential development (i.e. not the total site areas) are approximately 50% higher than would be necessary to accommodate the stated number of houses at the net densities specified. For example the largest site (PR8) for 1950 houses at 45dpha net should require 43.3ha. Whereas the allocation is for 66ha, over 50% larger. The definition of net density is not specified in the plan though it usually includes access roads, parking, incidental open space and play areas. There are separate allocations for schools and a local centre, so it appears that the areas allocated specifically for residential development are significantly too large. Given the desirability of this land to developers, there is a clear risk that permission could be sought for significantly higher numbers of dwellings over and above the intended provision, resulting in even greater environmental harm and pressure on infrastructure. We are therefore concerned about the provision in PR12a (para 7) that should more than 4400 houses be built this will be taken into account in meeting Cherwell's own need, which would appear to be an incentive to the Council to approve higher numbers than set out in this plan."

Other comments include:

- Proposals not in accordance with the NPPF.
- Exceptional circumstances for development in the Green Belt have not been demonstrated.
- Site contributes to purposes of the Green Belt.
- Given proximity to Oxford Parkway the housing will be attractive to London commuters.
- Housing unlikely to be affordable for local residents.
- Traffic congestion already a problem.
- No scope for extra traffic on Water Eaton Lane.
- Bicester Road already congested.
- Education, health and other facilities already over stretched.
- Damage to countryside, wildlife and biodiversity.
- Problems with surface water run-off and flooding.
- Land is attractive open farmland that separates Water Eaton from Kidlington.
- Over development and over allocation of dwellings in one parish – Gosford and Water Eaton.
- Water Eaton Lane is well used by walkers and cyclists.
- Location of sports facilities next to main roads is unsafe.
- Loss of wildlife.
- Land subject to flooding.
- Problems with air pollution.

- High density housing and noisy sports pitches would be inappropriate near the cemetery.
- The level of affordable housing required is unviable.
- Greater flexibility is required in the policy. Many of the requirements should be removed and addressed through validation requirements and s106 agreements.
- Site is preferable to the North Oxford sites.
- Site could be extended to accommodate more houses.
- Site should be extended to include Gosford Farm.

Officer Response

The objections to the development of this site, and the comments on the proposed policy, are noted. Officers remain of the view that the proposed allocation is sustainable and deliverable in view of the evidence. Recommended focused changes include detailed clarifications and amendments in response to comments received

Policy PR7b – Land at Stratfield Farm

Approximately 70 comments were made in relation to this policy. The majority raised objections. These included representations from the following:

Kidlington PC - Concurs with the Plan on this Policy, and considers that development on this site could reasonably be considered as an extension to Kidlington, securing a permanent green boundary. While its removal from the Green Belt is regrettable and only to be encouraged if exceptional circumstances are demonstrated, its release could bring long term benefits, offsetting the loss of Green Belt land with a well-integrated village extension of modest scale, compatible with the character of Kidlington. This site and others around Kidlington including PR7a (Land south-east of Kidlington) should also be required to contribute to improved access arrangements for Stratfield Brake, which have long been identified as unsatisfactory, necessitating longer journeys along congested roads by local users of the facility. A new spur to provide access direct from the roundabout is recommended. Otherwise, general support for this allocation.

West Oxfordshire DC – Request review of the proposed densities and the resulting site capacities of the sites to be released from the GB in order to ensure that efficient use is made of this scarce land resource.

Oxfordshire County Council – Two vehicular access points are not necessary for a development of this size. Pedestrian access to the adjacent residential area should be secured.

Oxford City Council - Supports the analysis that there is a close relationship between Kidlington & Oxford & that new homes to the south of the town would be well related to Oxford & help provide for the needs of the city. We agree that it is possible to develop to the south of the town whilst maintaining an important GB gap between the two settlements & maintaining the character of Kidlington. Delivery of good public transport, cycle & pedestrian links to the transport hubs (and thereafter on into Oxford) are essential & we welcome the provision for these in the proposed policies.

Begbroke & Yarnton Green Belt Campaign - There is no proper justification for altering the Green Belt boundaries from where they currently stand. Object to the removal of land described as PR6a,

PR6b, PR7a and PR7b from the Green Belt due to the importance of these sites in maintaining the gap between the villages of Begbroke, Yarnton and Kidlington to Oxford City.

Other comments include:

- Loss of Green Belt.
- Exceptional circumstances for development in the Green Belt have not been demonstrated.
- Contrary to NPPF.
- Existing road network already congested.
- Existing local facilities are already overstretched.
- Given proximity to Oxford Parkway the housing will attract London commuters.
- Existing infrastructure and facilities are already overstretched.
- Would destroy an essential wildlife corridor.
- Objection to vehicular access to Croxford Gardens.
- Light pollution.
- Air pollution.
- Impact on precious wildlife habitats and biodiversity.
- Kidlington roundabout grid-locked during rush hour.
- Flooding problems.
- Site more appropriate for additional recreation facilities.
- Site could accommodate up to 175 homes with listed Stratfield Farmhouse developed for retirement living accommodation.
- Support allocation as a modest extension to Kidlington.
- Site should be required to contribute to improved access arrangements for Stratfield Brake.

Officer Response

The objections to the development of this site, and the comments on the proposed policy, are noted. Officers remain of the view that the proposed allocation is sustainable and deliverable in view of the evidence. Recommended focused changes include detailed clarifications and amendments in response to comments received.

Policy PR8- Land East of the A44

Approximately 200 comments were made in relation to this policy. The vast majority raised objections. These included representations from the following:

Begbroke PC – Strong objection. Site will remove approximately 52% of Green Belt in Begbroke and Yarnton. Our residents do not want organisations or other landowners with vested interests to destroy our pleasant environment to satisfy their own interests. Provision of appropriate facilities for outdoor sport is cynically included to build the development case. This is an exception detailed in National Planning Policy. Begbroke -There is a clear boundary already as shown in associated photograph. This proposal takes development up to FP 7.

Yarnton PC - This site is wholly within Oxford GB. Cherwell Local Plan 2011-2031 Policy ESD 14 (p 114) seeks to prevent the coalescence of settlements & has a strong role in preventing coalescence of Yarnton/Begbroke/Kidlington. PR8 has been titled 'Begbroke' despite the bulk of developments

lying in Yarnton parish. Just where the separation of Yarnton and Begbroke would be is not obvious. This despite Partial Review page 118, para 5.110, point 5 stating 'the necessity to retain the separate identities of Yarnton/Begbroke/Kidlington'. PR8 is not consistent with National Policy & thus unsound. Cherwell Local Plan 2011-2031 Policy Villages 1 (p 246) categorises Yarnton & Begbroke as Category A villages. PR8 is in contradiction with Policy Villages 1. The closure of Sandy Lane: OCC recognises this as an alternative route to A44 & A4260. It is important enough to be salted in winter. It is a vital link between Kidlington/Yarnton. No provision for an alternative, thus it is not justified and unsound.

Kidlington PC - This huge development proposed will have a major adverse impact on the separate identity of Kidlington, which has led the approach in the development of the Adopted Kidlington Masterplan and is confirmed as important in the adopted Cherwell Local Plan. Cherwell Local Plan 2011-2031 Policy ESD 14 aims to prevent the coalescence of settlements and has a strong role in preventing the coalescence of Yarnton, Begbroke and Kidlington. It will also eradicate the open landscape character of the setting of both Begbroke and Kidlington, and reduce to a meaningless scale the Green Belt in this area. The parcels of land to be developed include land which is rated as of high importance in the Green Belt Studies, where in principle new development is unacceptable. The minimal separation distance between Kidlington and the expanded Begbroke will not prevent intervisibility and a perception of coalescence, contrary to the clear objectives of the adopted CDCLP. There is substantial concern that the development would neither be well integrated with Kidlington, or constitute a genuinely free standing village, due to proximity and intervisibility. The proposed scheme is of a scale which warrants its own new centre, but is so proximate to Kidlington Village Centre that it will also act as a competitor in providing local services, and thus undermine the published commitment to investment in this established centre. This matter does not appear to have been considered in developing the strategy. CDC is asked to undertake an urgent assessment of the impact of this substantial allocation on the vitality and viability of, and improvement strategy for, Kidlington Village Centre. A Policy should be developed which promotes and secures investment in the Village Centre if the scheme goes ahead, and this needs to be reflected in the Key Requirements list in the Policy. KPC has concerns about the proposed closure of Sandy Lane. This currently provides a much valued westward link from Kidlington to Begbroke, linking the communities. It is appreciated that if kept open it could provide an undesirable rat-run for traffic from the new development, adding to traffic congestion in Kidlington, but it currently enables Begbroke residents to make use of the Village Centre amenities, and thus support the well-being of the village. A more detailed assessment of the benefits and problems of the proposed closure is required, and mitigation measures developed and required as part of the implementation strategy. If adopted, the Policy should be extended to require substantial investment in offsite transport infrastructure, by reference to Policy PR4a. Without this, it is unlikely to be sustainable and will add to local congestion. Strongly object to PR8 allocation.

West Oxfordshire DC - Exceptional circumstances have been demonstrated to justify the release of sites from the GB, including sites for housing to help meet Oxford City's unmet housing need. It is clear from the evidence base for Cherwell's proposed submission plan and from the Oxfordshire Growth Board evidence base that the release of sites from the GB is necessary to deliver the scale of housing required in a sustainable manner. However, there is a need to make efficient use of land released from the GB for housing purposes. Some of the proposed densities on sites released from the GB do not appear to make efficient use of this land despite their close proximity to Oxford and to

sustainable transport infrastructure and services. By increasing the density on some of the GB sites and by developing the site covered by Policy PR3a Cherwell DC would achieve their target of meeting Oxford City's unmet housing need without requiring development at Woodstock South East (Policy PR10).

Oxfordshire County Council - To provide sufficient benefits to support a business case and be sufficiently attractive to users, the train service will need to operate at least every half hour throughout the day, and have the potential to connect to destinations other than central Oxford, for example the proposed Cowley Branch line. A frequent shuttle service between Begbroke and Oxford is likely to have a bigger impact upon services to and from the North Cotswolds Line than on other lines. Further work will be required to identify how a station would be served, and to evaluate both the operational and commercial viability of a train service. Importantly it needs to prove that there will be no detrimental impact on the wider rail network, and that it is subsidy neutral (i.e. that it will generate enough revenue to offset the cost of providing the service and the station). A station needs to be easy to reach from within the development site and surrounding area. It should have the following minimum facilities: a platform of sufficient length for the longest train likely to use the station, a small building (with ticket machines, toilets, retail outlet/waiting area and a staff office), bus stop, secure cycle storage, pedestrian footways, drop-off area, taxi rank and a car park with around 100 spaces, including provision for disabled parking.

Level Crossings - Development on land east of the A44 (Policy PR8) will have a substantial effect on the risk at Sandy Lane level crossing, which is already recognised as an incident 'hotspot'. An increase in usage of the level crossing will have safety implications and, in the interest of public safety, the level crossing should be stopped up prior to development commencing.

Natural England - Note that the policy requires investigation at the planning application stage of any above or below ground hydrological connectivity between the Rowel Brook and Rushy Meadows SSSI. Further information regarding potential hydrological impacts on Rushy Meadows SSSI is needed to inform the selection of this site allocation. Without this information the plan is unsound with regards to this allocation; evidence that the quantum of development allocated can take place here without a significant impact on the SSSI is needed in order to demonstrate that development in this location is justified.

BBOWT - This large allocation adjoins a number of nature conservation designations including Rushy Meadows SSSI (Site of Special Scientific Interest) and the Conservation Target Area along the Oxford Canal. Welcome the provision and aspiration for a Local Nature Reserve (LNR) to mitigate adverse impacts on Rushy Meadows SSSI. The LNR has the potential to deliver ecological benefits but it is one of two main recreational open spaces in the development and will therefore be subject to a lot of recreational pressure. Much will depend on the design and management of this site but we remain concerned that the area might not be able to fully mitigate indirect impacts on the SSSI. It will be important that the development provides sufficient attractive open space and footpaths for informal recreation (including dog walking) in addition to nature conservation areas to limit the pressure on valuable habitats. Also feel that development densities of 45 dwellings per hectare are likely to offer limited opportunities for Green Infrastructure within the built-up areas.

Begbroke & Yarnton Green Belt Campaign - There is no proper justification for altering the Green Belt boundaries from where they currently stand. On a local level, they particularly object to the

removal of the land described as PR8 and PR9 from the Green Belt due to the significant detrimental impact of that removal on the villages and villagers of Begbroke and Yarnton.

Kidlington Development Watch - While we object to any release of land in the Green Belt including the allocated sites, we have a further concern relating to the possible overall location of land for housing in the event that any or all of the allocated sites are confirmed for development in any adopted plan. PR6a, 6b, 7a, and 8, the land areas allocated specifically for residential development (i.e. not the total site areas) are approximately 50% higher than would be necessary to accommodate the stated number of houses at the net densities specified. For example the largest site (PR8) for 1950 houses at 45dpha net should require 43.3ha; whereas the allocation is for 66ha, which is over 50% larger. The definition of net density is not specified in the plan though it usually includes access roads, parking, incidental open space and play areas. There are separate allocations for schools and a local centre, so it appears that the areas allocated specifically for residential development are significantly too large. Given the desirability of this land to developers, there is a clear risk that permission could be sought for significantly higher numbers of dwellings over and above the intended provision, resulting in even greater environmental harm and pressure on infrastructure. We are therefore concerned about the provision in PR12a (para 7) that should more than 4400 houses be built this will be taken into account in meeting Cherwell's own need, which would appear to be an incentive to the Council to approve higher numbers than set out in this plan."

Other comments include:

- Loss of Green Belt.
- Exceptional circumstances have not been demonstrated for development in the Green Belt.
- Not consistent with NPPF.
- Increased traffic congestion.
- Crossing A44 is already challenging.
- Strong objection to closure of Sandy Lane.
- Pinch points along A44 make it impossible to create a dedicated bus lane to Peartree Roundabout.
- A44 will not cope with increased traffic.
- Cycling will become more dangerous.
- Yarnton Lane should be upgraded as a pedestrian/cycle route.
- There are problems of flooding in the area.
- Will lead to the coalescence of Yarnton, Begbroke and Kidlington.
- Will be urban sprawl.
- Will destroy way of life.
- Developments will more than double the sizes of both Yarnton and Begbroke.
- Begbroke, Yarnton and Kidlington will become a big suburb of Oxford.
- Increases in pollution.
- Infrastructure will not cope with more population.
- Adverse impacts on heritage assets.
- 'Affordable housing' will not be truly affordable.
- Councils lack power to commit developers to the level of affordable housing that is needed.

- Plan is biased towards Oxford University who stand to make significant financial gains, with no regard for the local community.
- Ignores local historic parish boundaries.
- Consideration of education facilities should be independent of Oxford University.
- Contrary to adopted Cherwell Local Plan Part 1 which categorises Yarnton and Begbroke as category A villages.
- Scale of housing proposed is both excessive and disproportionate to the current environment.
- Growth should be evenly distributed across the District.
- The Kidlington Masterplan SPD seeks to strengthen the separate identity of Kidlington.
- Destruction of landscape.
- Existing services and facilities will not be able to cope with extra population.
- Landfill site should be deleted from the allocation.
- The infrastructure plans are an afterthought.
- Need to protect the green corridor of the Rowel Brook and ancient green Begbroke Lane and Rushy Meadows SSSI.
- No development should proceed until appropriate transport infrastructure has been costed, funded and firmly programmed.

Officer Response

The many objections to the development of this site, and the comments on the proposed policy, are noted. Officers remain of the view that the proposed allocation is sustainable and deliverable in view of the evidence. Recommended changes include clarification on required provision for education, and, in response to comments from Natural England, that the Biodiversity Impact Assessment required by Policy PR8 be informed by a hydrogeological risk assessment to ensure the protection of Rushy Meadows Site of Special Scientific Interest (SSSI).

Proposed Policy PR8 contained a requirement for a Biodiversity Impact Assessment supporting a planning application to include investigation of any above or below ground hydrological connectivity between Rowel Brook and Rushy Meadows SSSI. However, Natural England's representation advised that further information regarding potential hydrological impacts on the SSSI was needed at this stage to ensure that the quantum of development allocated was deliverable without a significant impact.

A Hydrological and Hydrogeological Study (evidence doc. PR80) was therefore commissioned by officers which concluded:

"Although a potential hydrogeological connection via superficial sands and gravels is assumed to be present between Rushy Meadows SSSI and the proposed PR8 development land to the south, significant hydrological and hydrogeological linkages were not identified. As a consequence, adverse impacts to Rushy Meadows SSSI as a consequence of the proposed development are considered Negligible."

The study indicates that whilst it is possible that groundwater abstraction could lower groundwater levels within the SSSI, the extent of the impact would be dependent upon the nature of the

abstraction or dewatering activity. The consideration of mitigation measures to control dewatering operations during construction was therefore recommended. Although this would be determined through the planning application process, a proposed focused change clarifies the supporting information required

Other detailed clarifications and amendments are also recommended for Policy PR8 in response to comments received.

Policy PR9 – Land West of Yarnton

Approximately 120 comments were made in relation to this policy. The majority raised objections. These included representations from the following:

Begbroke PC – Site PR9 will remove approximately 16% of the Green Belt in the parish. Our residents do not want organisations or other landowners with vested interests to destroy our pleasant environment to satisfy their own interests. It will have a devastating effect on the Green Belt.

Yarnton PC - Land West of A44 (Yarnton) lies wholly within Oxford GB. Cherwell Local Plan 2011-2031 Policy ESD 14 seeks to safeguard the countryside from encroachment. Policy ESD 13 seeks to secure the enhancement of the character & appearance of the landscape particularly in urban fringe locations. Policy PR 9 is not consistent with National policy and thus is UNSOUND. Policy Villages 1 categorises Yarnton as a Category A village. This is only minor development, infilling or conversion is allowable in or alongside this settlement. PR9 is in complete contradiction with this policy and the plan is inconsistent & thus is unsound. The separation of PR8 & PR9 is the width of the A44, hardly the separation of settlements required by the LP, Policy ESD14 which seeks to separate Yarnton/Begbroke identities. PR9 is not consistent with national policy & thus is unsound.

West Oxfordshire DC - Exceptional circumstances have been demonstrated to justify the release of sites from the GB, including sites for housing to help meet Oxford City's unmet housing need. It is clear from the evidence base for Cherwell's proposed submission plan and from the Oxfordshire Growth Board evidence base that the release of sites from the GB is necessary to deliver the scale of housing required in a sustainable manner. However, there is a need to make efficient use of land released from the GB for housing purposes. Some of the proposed densities on sites released from the GB do not appear to make efficient use of this land despite their close proximity to Oxford and to sustainable transport infrastructure and services. By increasing the density on some of the GB sites and by developing the site covered by Policy PR3a Cherwell DC would achieve their target of meeting Oxford City's unmet housing need without requiring development at Woodstock South East (Policy PR10).

Oxford City Council - Supports the allocation of sites at Begbroke, Yarnton & Woodstock. Our comments on the details of these policies are more brief as the physical links with the city are more limited (although the economic links with Begbroke & the University of Oxford as part of the 'Knowledge Spine' are clear and strong), however we welcome the delivery of sustainable transport links into neighbouring communities & onwards into Oxford to provide access to employment, services & facilities.

BBOWT - This site allocation adjoins Begbroke Wood Ancient Woodland and LWS. Pleased to see that the allocation seeks a considerable buffer to the Ancient Woodland as well as large areas of

public access land, which we assume will be used for informal recreation. Adverse impacts on Begbroke Wood might potentially occur but will depend on the design and management of the woodland and open access land. Welcome these proposals but thoughts should be given whether the open access land (or parts of it) could also be improved for biodiversity.

Begbroke & Yarnton Green Belt Campaign - There is no proper justification for altering the Green Belt boundaries from where they currently stand. On a local level, they particularly object to the removal of the land described as PR8 and PR9 from the Green Belt due to the significant detrimental impact of that removal on the villages and villagers of Begbroke and Yarnton.

Other comments include:

- Loss of Green Belt.
- Exceptional circumstances have not been demonstrated for development in the Green Belt.
- Not consistent with NPPF.
- Increased traffic congestion.
- Crossing A44 is already challenging.
- Strong objection to closure of Sandy Lane.
- Pinch points along A44 make it impossible to create a dedicated bus lane to Peartree Roundabout.
- A44 will not cope with increased traffic.
- Rutten Lane is already a well-used cut through from Cassington Road to the A44 resulting in road safety problems.
- Cycling will become more dangerous.
- There are problems of flooding in the area.
- Will lead to the coalescence of Yarnton, Begbroke and Kidlington.
- Will be urban sprawl.
- Will be ribbon development along A44.
- Will destroy way of life.
- Developments will more than double the sizes of both Yarnton and Begbroke.
- Begbroke, Yarnton and Kidlington will become a big suburb of Oxford.
- Increases in pollution.
- Infrastructure will not cope with more population.
- Adverse impacts on heritage assets.
- 'Affordable housing' will not be truly affordable
- The proposed expansion to William Fletcher School pays no regard to present parking or additional traffic flow this will create.
- The proposed release of GB for William Fletcher Primary School is problematic and fails to give consideration to the practicalities of school expansion on the existing site or to the safety of the children.
- Contrary to policies in the adopted Cherwell Local Plan.
- Development will bring no benefits to Yarnton.
- Area rich in wildlife.
- Will overwhelm local sewerage system.

- Developable area should be increased to take account of the need for connecting infrastructure and mitigation requirements.

Officer Response

The many objections to the development of this site, and the comments on the proposed policy, are noted. Officers remain of the view that the proposed allocation is sustainable and deliverable in view of the evidence. However, it is recommended that the total number of homes proposed is reduced from 530 homes to 440 homes to improve the deliverability of the site and achieve a high quality of design in the context of a representation from the site promoter. Other recommended focused changes include detailed clarifications and amendments in response to comments received.

Policy PR10 – Land South East of Woodstock

Approximately 40 comments were made on this policy. The majority raised objections. These included representations from the following:

Historic England - The site "Land South East of Woodstock" contains the "Blenheim Villa", a scheduled monument comprising a Roman villa and associated field system 200m north east of Little Cote. This site should not be allocated for development until an archaeological assessment has been undertaken and ascertained the extent and significance of archaeological remains on the site as a whole, thus identifying if development is acceptable on this site and, if so, over what area.

Welcomes the reference to the Blenheim Palace World Heritage Site and Grade I Registered Park in paragraph 5.129, its Outstanding Universal Value in paragraph 134 and the Blenheim Villa Scheduled Monument in paragraphs 134 and 135, as part of the positive strategy for conserving and enjoying, and clear strategy for enhancing, the historic environment as required by the National Planning Policy Framework.

West Oxfordshire DC - Concern over the impact of the proposed Woodstock urban extension, including the potential adverse effects on the settings of important heritage assets. It is not clear that Cherwell have appropriately considered the cumulative impact of the proposed urban extension in combination with the proposals in the proposed West Oxfordshire Local Plan. The proposed West Oxfordshire Local Plan proposes 670 new homes on urban extension to Woodstock, including 300 homes to the immediate west of the Cherwell site which now have planning approval subject to a Section 106 agreement. The cumulative effects that need to be considered include the impact on the setting of the Blenheim Palace World Heritage Site. A key issue to consider is the harm that the Cherwell proposal might cause in combination with the adjoining development in West Oxfordshire. Cherwell have not considered that already there is a woeful lack of parking available in Woodstock and there is a real fear that development of this site would create a satellite village whereby shoppers would use the private car to commute to and from Kidlington. Another important issue is the impact of the proposal on this setting of the Blenheim Villa Scheduled Ancient Monument which is within the site itself. The proposed allocation is considered to cause harm to the settings of important heritage assets, it would also impact on the landscape and setting of Woodstock as a result of an incongruous urban extension which is poorly related to the characteristics of the location. The benefits of the proposed allocation do not outweigh these harms, given that there is

scope to deliver housing to contribute towards Oxford's needs in alternative ways, such as through a modest increase in density on sites released from the GB, or by the development of the site Policy PR3a, which is to be removed from the GB but is not proposed for housing development in the proposed submission plan. More efficient use of the GB sites could deliver at least 410 additional homes and therefore eliminate the need for the proposed Woodstock urban extension; as such the proposed allocation is contrary to the NPPF.

Woodstock Town Council - Woodstock is a small market town to the north-west of the city of Oxford. The current settlement has c 1500 houses and c 3000 residents. Housing allocation plans published by Cherwell and West Oxfordshire District Councils would add a further 1080 houses on the south-east, east and northern edges of the town, all on prominent gateway sites into the existing urban core. Such a dramatic increase would inevitably have a substantial impact on the historic town in many ways, such as traffic, infrastructure and services. This report addresses issues specifically relating to the site's rich cultural heritage. It contends that the proposed developments either will cause or have the potential to cause moderate impacts individually on the town and its heritage assets. In a few cases impacts are likely to be moderate to high. The cumulative impact of all four developments (or combinations of them) would be moderate to high. This amounts to substantial harm as defined in the NPPF (paragraphs 132-3). The public benefits (including the conservation benefit claimed for the Blenheim Park Estate) do not outweigh the cumulative harmful impacts.

Oxford City Council - Supports the allocation of sites at Begbroke, Yarnton & Woodstock. Our comments on the details of these policies are more brief as the physical links with the city are more limited (although the economic links with Begbroke & the University of Oxford as part of the 'Knowledge Spine' are clear and strong), however we welcome the delivery of sustainable transport links into neighbouring communities & onwards into Oxford to provide access to employment, services & facilities

Bladon PC - The residents of the Parish of Bladon are concerned with the traffic volumes impact on Bladon. 1. Volume of traffic on A44 and Bladon roundabout. 2. Volume of traffic passing through village via A4095. 3. Pollution caused by increased volume of traffic. 4. Effect of traffic on the World Heritage site of Blenheim.

Begbroke & Yarnton Green Belt Campaign - There is no proper justification for altering the Green Belt boundaries from where they currently stand. They also object to the removal of the land described as PR10, a green field site due to the impact its development will have on the adjacent A44 corridor.

Kidlington Development Watch - While we object to any release of land in the Green Belt including the allocated sites, we have a further concern relating to the possible overall location of land for housing in the event that any or all of the allocated sites are confirmed for development in any adopted plan. PR6a, 6b, 7a, and 8, the land areas allocated specifically for residential development (i.e. not the total site areas) are approximately 50% higher than would be necessary to accommodate the stated number of houses at the net densities specified. For example the largest site (PR8) for 1950 houses at 45dpha net should require 43.3ha; whereas the allocation is for 66ha which is over 50% larger. The definition of net density is not specified in the plan though it usually includes access roads, parking, incidental open space and play areas. There are separate allocations for schools and a local centre, so it appears that the areas allocated specifically for residential

development are significantly too large. Given the desirability of this land to developers, there is a clear risk that permission could be sought for significantly higher numbers of dwellings over and above the intended provision, resulting in even greater environmental harm and pressure on infrastructure. We are therefore concerned about the provision in PR12a (para 7) that should more than 4400 houses be built this will be taken into account in meeting Cherwell's own need, which would appear to be an incentive to the Council to approve higher numbers than set out in this plan.

Woodstock Action Group - The proposed housing on the A4095 border of Woodstock will put further strain upon the town's infrastructure, services and commercial centre. It will adversely affect the approach to the Blenheim Palace World Heritage Site and the local rural environment. Woodstock needs to be protected from such inopportune and damaging development. Other than a couple of the hundreds of policy statements, viz., the plan will "seek to: contribute to improving health and well-being and conserve and enhance the natural environment." There is no mention or consideration of how the plan will cope with the additional noxious nitrogen oxide gases from the up to 6000 or more private cars owned by the 7,400 prospective residents living in the SE area of Woodstock and those in nearby Cherwell District. Public Health England has stated that 5.3% i.e., 276 deaths a year of adults 25 years and older are attributable to air pollution and others suffer with long term conditions such as lung diseases, asthma, cancer and birth defects. The Government has stated that deaths related to air pollution are the second biggest health threat after smoking. And yet, not a mention of this threat is in Cherwell's plans. WSP/Parsons Brinkerhoff compiled a 75-page air quality assessment (AQA) for the development of the 300 houses in the SE quadrant of Woodstock during the 7 year duration of the construction phase as well as the post construction phase on the potential effects of Nitrogen dioxide (No2) and Particulate matter 10 and 2.5 on the prospective affected residents that will occur because of increased volumes of traffic generated by the development. The report concludes that the effects of these concentrations of noxious and deadly gases on those affected, "would be negligible. Not at all convinced that this will be the case as even the authors of this AQA have said, Changes in local traffic volumes and characteristics resulting from the Proposed Development may also have an impact on local air quality". They also state that "road traffic is a major source of the pollutants, NO2 (Nitrogen Oxide), Particulate Matter 10 and 2.5 and the dominant source in many urban areas." This AQA only pertained to the Woodstock East Development of 300 houses Cherwell's plan of 410 at PR 10 will more than double air pollution in the SE quadrant of Woodstock and the nearby area in Cherwell. This has the makings of a worrying cocktail of cumulative and degenerative air quality affecting both human and wildlife receptors. This plan will see more and more development and traffic on a geographic corridor from Oxford along the A44 via villages Yarnton and Begbroke culminating at Woodstock. The GB, once bitten will eventually be swallowed whole. Oxford will expand north to incorporate these villages and become the Greater Oxford Corporation thus making Woodstock and Kidlington suburbs of Oxford and adversely affecting about 18,000- 20,000 residents in these villages and aggravating already congested roads e.g., A4260, A34, A4095 and the A44. Woodstock is only 7km from N. Oxford. The leader of Cherwell Council has said, "... growth must insure that people have convenient, affordable and sustainable travel opportunities to the city's (Oxford) places of work..." We do not see this being the case because of widespread, unabated housing growth in Cherwell and Oxfordshire which is leading to increased levels of inconvenient and unsustainable traffic congestion, gridlock and driver exasperation and anger. It is recognized that change is inevitable but the pace at which it happens is not. We recognize the need for increased housing but not of the magnitude of

4,400 houses, 410 of which are planned just across the A4095 border of Woodstock in Cherwell next to an area, which already has planning permission for 300 houses and possibly more. There are some 1,150 homes in the Shipton Road quadrant which includes Banbury and Hensington Roads and Marlborough Place I & II off Shipton Road plus others. This development will concentrate 1,860 (1,150 + 410 + 300) houses and between 2,500 to 3,000 private and other vehicles in the SE Woodstock quadrant. Many of these residents are those who are most likely to exit onto the A4095 via Shipton Road plus those from the planned Woodstock East development of 300 houses and their counterparts across the border from The Straight Mile. The A4095 is the main artery through Bladon to Witney and beyond and is already congested daily. Traffic on our local highway system; A34, A4095, A44 is now so bad that one does not need to leave one's home to be threatened with injury or worse. Between 1981 and 2011, the numbers of households in the Cherwell District increased by 55% while the number of cars owned by residents increased by 126%. The number of cars per household increased from 0.98 in 1981 to 1.42 in 2011. This was well above the national average of 1.16 cars per household. Using the projected figures of 4,400 houses plus the 60,000 in situ, i.e., 64,400 households, we estimate an increase of 85% of households having one or more cars.

Other comments include:

- Proposed housing on A4095 will put further strain on Woodstock's infrastructure, services and commercial centre.
- Adverse effect on Blenheim Palace WHS.
- Adverse effect on local rural environment.
- Air pollution problems.
- Kidlington and Woodstock will become suburbs of Oxford.
- No coordination with WODC who are also proposing development in their local plan.
- Will dilute historic character of Woodstock.
- Inadequate services and facilities.
- 50% affordable housing will not be achieved.
- Wholehearted support as it provides much needed housing for Woodstock.
- Policy as drafted would restrict the development potential of the site.

Officer Response

The many objections to the development of this site, and the comments on the proposed policy, are noted. Officers remain of the view that the proposed allocation is sustainable and deliverable in view of the evidence.

Historic England's representation on Policy PR10 indicated that the site should not be allocated for development until an archaeological assessment had been undertaken and ascertained the extent and significance of archaeological remains on the site as a whole, to identify if development is acceptable on the site, and if so over what area. Following further discussion, Historic England was provided with archaeological assessment information submitted as part of the previous planning application on the site (14/02004/OUT). On examination, Historic England confirmed that further archaeological assessment was not required in respect of the majority of the allocation site, but that having regard to the information contained in the assessment, it could not support the allocation in

its current form as the area proposed for housing covers part of the areas of archaeological potential. It advised that:

“Any allocation or proposed development should accurately draw on the information gathered already, and as far as possible avoid areas of intensive archaeology shown on the geophysics and other survey reports...”, and

“We recommend that development is withdrawn from areas of known archaeological potential, particularly those of higher potential, and that these areas are included in green space proposals for any allocation or development...”

“We welcome the allocation of the areas to the south and east of the villa as green space, as this reflects comments provided previously ... in terms of preserving the setting of the villa. We note, however, that the Villa area is allocated as retained agricultural land and so would be vulnerable to on-going ploughing and arable planting. To ensure the on-going preservation of the Villa site and associated higher potential deposits, it would be best preserved under controlled grazing or public open space, than under arable.”

The proposed distribution of uses within site PR10 has been amended in response to Historic England’s advice to address these concerns. The Policies Map now indicates archaeological constraint areas and a reconfigured residential development area, and has removed the reference to land retained in agricultural use.

The archaeological survey information submitted as part of the outline planning application did not cover that part of site PR10 allocated for primary school use. It is not yet certain whether this land will be required for a school, playing fields or other outdoor sports provision but following further consultation with Historic England, it indicated that in view of archaeological interest to the south in association with the Scheduled Ancient Monument, a desk based Heritage Impact Assessment and Geophysical survey should be undertaken on the site. This work has commenced but in view of associated timescales Historic England has agreed to some additional wording in the plan to ensure that development on that part of the site will be informed by the outcome of the HIA. It is considered that the proposed reconfiguration of the layout, together with other focused changes requested to policy requirements, have addressed the concerns raised by Historic England.

However, the reconfiguration of the proposed residential area meant that officers needed to review the precise number of dwellings that could be provided on the site. This suggested approximately 489 dwellings. This has been rounded to 500 homes for the purpose of what is a strategic housing allocation and which offsets the reduction in the number of homes (90) planned for land to the west of Yarnton.

Other recommended changes include detailed clarifications and amendments in response to comments received. It is also recommended that the policy makes clear that the development of land for either school or sports pitch use to the north of Shipton Road will be subject to the consideration of a Heritage Impact Assessment in consultation with Historic England-

PR11: Infrastructure Delivery

Over 750 comments were made on this policy. The vast majority raised objections. These included representations from the following:

Gosford & Water Eaton PC - Very concerned about the implications of this development on existing infrastructure. On the basis of current evidence do not believe that infrastructure can be delivered to support this scale of development without adverse effects on both existing and new residents. Opposed to the proposed allocation of 1410 dwellings within the Parish, in part due to the impact on infrastructure.

Begbroke PC - Infrastructure Costs -These will be enormous and there is no plan where this funding will come from. It is doubtful if section 106 monies will suffice.

Yarnton PC - Bus lane improvement along A44 Begbroke to Loop Farm. The proposal is physically & financially impossible owing to the restrictive widths of railway & canal bridge crossings and the underpasses at Peartree Interchange. Further restricted by PR11a (p 167) cycle & pedestrian improvements along A44 between Bladon & Peartree roundabouts. This is a pipe dream & can't be used to justify large scale development adjacent to the A44 at Yarnton/Begbroke. The infrastructure proposals are not justified, not effective & is unsound.

Kidlington PC - An Infrastructure Delivery Plan, rather than a wish-list as in Appendix 4, is essential in order to deliver sustainable development. Policy PR1 should include an additional requirement that all new allocated development makes adequate provision for all relevant infrastructure, unless other arrangements have been secured. Development should not proceed in advance of certainty about the delivery of off-site infrastructure.

Bladon PC - The residents of the Parish of Bladon are concerned with the traffic volumes impact on Bladon. 1. Volume of traffic on A44 and Bladon roundabout. 2. Volume of traffic passing through village via A4095. 3. Pollution caused by increased volume of traffic. 4. Effect of traffic on the World Heritage site of Blenheim.

Oxford City Council - Supports the approach in the Partial Review of progressing each of the proposed site allocations through a development brief. It is the appropriate way to consider the site specific details & infrastructure needs of each proposed allocation in a timely manner. Welcome the opportunity to be involved in the production of the development briefs especially where there are cross-boundary issues to be considered. Acknowledge the on-going partnership work through the Oxfordshire Growth Board & in particular the Oxfordshire Infrastructure Strategy. This is a useful forum for the consideration of the cumulative impacts of planned growth & also cross boundary infrastructure issues. Keen to continue the constructive partnership working & on-going dialogue with Cherwell & to assist in securing prompt delivery of these much needed homes.

Kidlington Development Watch – The policy only sets out “an approach”. It is not therefore a policy and is simply wishful thinking. In the associated infrastructure schedule (Appendix 4) the column for costs contains the letters TBC in every case. In most cases the column for source of funding also contains these letters and in the small minority of cases where a source is identified it is most often “private developers”. This lack of information means that it is impossible to have any confidence that the identified infrastructure needs can be provided. No projects are identified to improve the

already congested highway network for private vehicles and no indication of how the network will cope with the additional vehicles owned by the occupiers of these new houses and the other developments planned for the area. The plan appears to deny people the opportunity to use their cars and relies wholly on people using public transport, cycling and walking. Consider that some of the infrastructure required to support the proposed level of growth together with the growth elsewhere around Oxford would in itself be harmful to the environment which is a further reason why the proposed growth is not sustainable.

Other comments include:

- No costs are shown in the schedule.
- In most cases no source of funding is identified.
- There is no indication of how the already congested highway network will cope with the additional vehicles from those houses and the other developments planned for the wider area.
- New houses on this scale with no real infrastructure improvement are not viable.
- Kidlington and Yarnton will be gridlocked, sacrificing air pollution.
- The assumption that developers will pay for much of the necessary infrastructure and produce record amounts of 'affordable' housing will produce minimal infrastructure and not guarantee that the existing level of educational, health and social services will be maintained, let alone enhanced.
- Wishful thinking.
- Developers will not provide the infrastructure required.
- Underfunded public services (schools and medical services) will deteriorate further.
- Relying on improved public transport, cycling and walking is not realistic.
- Growth should not be approved until infrastructure can be provided.
- There are no effective measures to deal with air pollution.
- Policy as worded is largely meaningless.
- The existing infrastructure already needs substantial investment to address demand.
- There are massive funding shortages and that all attempts to joint fund transport infrastructure improvements have been unsuccessful.
- Consortium welcomes the joined-up and comprehensive approach to the identification and delivery of essential infrastructure to support the development of the sites allocated in the A44 Corridor. This also reflects the recommendations of the National Infrastructure Commission's interim findings. In relation to element 3 of the policy however there must be acknowledgement that financial contributions to the delivery of these infrastructure items must be the subject to an upper limit that, if necessary, can be determined by a viability appraisal.
- Council does not comment on how developer contributions will be secured on sites where there are multiple landownerships.
- Where a developer has provided for infrastructure at the outset, then there should be a recognition in the policy that any 'abnormal costs' associated with this provision can be credited against future planning obligations for the site.
- It is essential that the developer contributions to infrastructure requirements are based on an equitable equalisation or other mechanism.

Officer Response

These comments have been noted. The Infrastructure Schedule supporting the plan has been updated following the receipt of additional information and discussion with service planners / providers such as the County Council (including on education matters), the Oxfordshire Clinical Commissioning Group (with local GP Practice Managers) and the Council's own community/recreation services. A Developer Contributions Supplementary Planning Document will assist in the delivery of required infrastructure. More widely, the completion of an Oxfordshire Infrastructure Strategy (evidence doc. PR35) strengthens the position of the Oxfordshire authorities and is seeking Government funding where required to support or accelerate delivery.

Officers consider the Plan's proposals to be 'sound' with regard to infrastructure delivery. Focused changes are recommended to improve the Plan and bring specific requirements up-to-date.

Policy PR12a – Delivering Sites and Maintaining Housing Supply

Approximately 40 comments were made in relation to this policy. These included representations from the following:

South Oxfordshire DC - The approach that CDC takes to meet their apportionment of Oxford's unmet need is for them to determine. We note this takes the form of 'ring-fencing' as a separate 5 year housing land supply which will be maintained for meeting Oxford City's unmet need. Acknowledge that CDC have proposed to meet their apportionment through 7 strategic sites, however we understand that this could be dependent on the local assessment of their capacity. If it is found that the capacity of these 7 sites is deemed to be lower than initially thought, we assume that CDC are still capable of accommodating the remainder of their apportionment of Oxford's unmet need within their own district?

Oxfordshire County Council - The scale of housing being planned for through the LPPR as Cherwell's contribution to meeting Oxford's unmet housing needs is supported. The proposed 4,400 homes figure reflects the apportionment of Oxford's unmet need between the councils agreed by the Growth Board in September 2016 and which is set out in the Growth Board Memorandum of Co-operation and we also support the proposal to ensure delivery of these homes by 2031. The proposed 2021 start date recognises the likely complexity of the issues needing to be addressed and allows a reasonable lead time for developments to come forward. However, OCC has no objection in principle to earlier housing delivery, provided the strategic infrastructure required to support the new housing exists or can be delivered matched to the accelerated housing.

Bodicote PC - Concerns with paragraph 5.166, which states that "If a five year supply cannot be raised for reasons outside the Council's control, planning applications for unplanned development might be submitted. This paragraph acknowledges that the Council cannot force developers to adhere to house building trajectories. Cherwell District Council's 'Annual Monitoring Report' has already shown us that house building targets have been down on estimated numbers. In reality if the Council has no control over housing delivery rates then they have no real control over the developers, who will of course state that they can maintain a five year housing supply to get the applications through, but then could negate through reserved matters. If developers do not deliver the requirement of 1700 homes within the first period 2021- 2026 there is a real concern that many

of the sites that were put forward for development and dismissed as areas of interest WILL be targeted as additional sites for Oxford's Unmet Housing Need.

Home Builders Federation - Concern expressed in confining the delivery of Oxford's unmet need to the 2021 to 2031 period and ring-fencing Oxford's unmet need from Cherwell's on housing requirement. Whilst we are supportive of the joint working that has taken place to ensure unmet needs within the HMA are delivered we remain concerned that Cherwell, and the other authorities in the HMA, are seeking to separate their own needs from that of Oxford's. The unmet need arising from Oxford should be considered as part of the Cherwell's housing requirement and should be monitored as such. It must be recognised that Oxford cannot meet its needs and that the demand for housing in Oxford will inevitably fall on the shoulders of its neighbours.

BBOWT - Policy PR12a and the Housing trajectory in Appendix 3 suggests that sites will come forward at different times in the plan period with sites PR6a, PR7b, PR8 and PR9 being the first ones to come forward at 2021. Site PR6b is proposed to be released at 2023, and sites PR7a and PR10 are not due to come forward until 2026. The government is currently consulting on a standard method of how to calculate housing need. It is our understanding that if this calculation is adopted, it might be possible that fewer houses are needed to meet Oxford's housing needs and as a result not all site allocations might be required. As mentioned above concerned about the proposed quantum of development in Oxfordshire and neighbouring counties and would welcome if fewer sites would be required for development.

Kidlington Development Watch - While we object to any release of land in the Green Belt including the allocated sites, we have a further concern relating to the possible overall location of land for housing in the event that any or all of the allocated sites are confirmed for development in any adopted plan. PR6a, 6b, 7a, and 8, the land areas allocated specifically for residential development (i.e. not the total site areas) are approximately 50% higher than would be necessary to accommodate the stated number of houses at the net densities specified. For example the largest site (PR8) for 1950 houses at 45dpha net should require 43.3ha; whereas the allocation is for 66ha, over 50% larger. The definition of net density is not specified in the plan though it usually includes access roads, parking, incidental open space and play areas. There are separate allocations for schools and a local centre, so it appears that the areas allocated specifically for residential development are significantly too large. Given the desirability of this land to developers, there is a clear risk that permission could be sought for significantly higher numbers of dwellings over and above the intended provision, resulting in even greater environmental harm and pressure on infrastructure. We are therefore concerned about the provision in PR12a (para 7) that should more than 4400 houses be built this will be taken into account in meeting Cherwell's own need, which would appear to be an incentive to the Council to approve higher numbers than set out in this plan."

Other comments include:

- Dorchester Group considers that the seventh paragraph of the policy should be deleted.
- The Consortium considers that the demand for housing in and around Oxford is such that the phasing of new development solely on the basis of abstract 5 year periods is unnecessary. A number of factors would suggest that the application of such phasing policies is inappropriate.

- The proposed approach that seeks a commencement of the five year supply for Oxford's needs at 2021 is not supported by the NPPF and is inconsistent with Government guidance. CDC's specific housing need and proportion of Oxford unmet need are both to be met within Cherwell administrative boundary and should be combined and planned comprehensively through a single approach over the Plan period.
- The NPPF states that housing needs must be met in full across the housing market area and for the purposes of Cherwell, the housing market area is Oxfordshire. Therefore, any separation of the five year housing land supply calculation would be contrary to the NPPF.
- Delivery plans should be realistic, accounting for and responding to lead-in times and sensible build rates. It should be recognised that no site is the same and that a reasonable and realistic approach to evidence and justification will be required.
- The evidence base prepared to support this policy is not sufficiently robust to justify the strategy. It will provide an over concentration of housing within a relatively small market area with known congestion issues. The plan has failed to consider the reasonable alternatives.
- Policy appears to be an incentive to the Council to approve higher numbers than set out in the Plan.
- The Policy should be amended to allow for the early delivery of sites if they are able to do so. This amendment will ensure the Plan has sufficient flexibility to adapt should some of the proposed allocations not deliver as anticipated or should the unmet needs of Oxford City which Cherwell needs to meet increases.
- The housing delivery trajectory is not considered to be robust or realistic.
- There is an over reliance on the delivery at PR8.
- Cherwell should not be fearful of over provision.
- Plan cannot and should not seek to control the rate of delivery.
- There is no explanation as to why the sites at South East of Kidlington or South East of Woodstock have been identified as having delivery deferred to the final five years of the plan period.
- Plan fails to identify how any harm would arise if Oxford's unmet need were to be met earlier than 2026.

Officer Response

These comments have been noted. Officers consider the policy to be sound but are proposing focussed changes to provide further clarification on how sites will contribute to delivering a five year housing supply.

Policy PR12b – Sites Not Allocated in the Partial Review

Approximately 30 comments were made in relation to this policy. These included representations from the following:

Gosford & Water Eaton PC - Land identified as Green Belt following this review should remain Green Belt permanently and under no circumstances would further development on it be permitted. Note that there is an additional clause requiring consultation and support of the local community. It is unclear how local community support would be considered. It is difficult for us to believe that if the

Council was faced with having to consider other sites to ensure that they meet the housing supply that local community objection would be sufficient to prevent development going ahead. In the interests of providing certainty it would seem more appropriate to have a robust Plan that is deliverable and ensures that remaining areas are fully protected rather than allowing exceptions such as provided for by this policy. This policy should not allow for any additional development or release of Green Belt land within the Parish.

Kidlington PC - Extremely concerned that the Policy makes provision for the release of unspecified sites in the future on the basis that they are sites listed in a HELAA. This for example would include Frieze Farm, and land to the north of the village. These sites have been discarded for valid reasons in the Plan, which is fully supported. The policy should be deleted as contingency sites are not required to meet the Plan's objectives. If the policy remains it should include a requirement for 50% affordable housing; and the support of the relevant Parish Council.

South Oxfordshire DC - More clarity should be provided in respect of how will it be determined or justified as to whether or not a particular application should meet Oxford's unmet need or the district's requirement?

Historic England – The policy should have a requirement for a Heritage Impact Assessment and a desk-based archaeological investigation.

Kidlington Development Watch - Support for the Council's rejection of all Green Belt sites proposed at the options stage (and that are not proposed to be allocated in the draft submission plan). Are unclear about the purpose of Policy 12b in relation to sites within the Green Belt. Green Belt site should never be supported for development precisely because it is in the Green Belt and regardless of the qualifications given in clauses 1 to 5 of the proposed policy. Permitting such development would be contrary to planning guidance which states that unmet housing need does not constitute very special circumstances for building in the Green Belt.

Other comments include:

- The trigger should be the housing land supply to meet Oxford's unmet need.
- The need for 'exceptional circumstances' to exist in all the unallocated sites in the Green Belt should be added to the policy.
- If the Council does not have a 5 year housing land supply then paragraph 49 of the NPPF applies, and not Policy PR12b.
- The ambiguity in 12b should be corrected so the policy is clear that no development would be permitted on Green Belt sites that are not allocated in the partial review.
- Concern that this will be used as a mechanism for the release of land in the HELAA that is land not currently included and discarded in this plan. This could open up unsustainable development in the north of Kidlington and in particular on land at the rear of The Moors between The Moors and the River Cherwell.
- Further contingency sites are not needed to meet the housing targets.
- The requirement for the site to be identified in the HELAA is unreasonable and not justified.
- The requirement of the support of the local community is not consistent with the NPPF.
- Sites should not be identified on the basis of their proximity to Oxford City alone, but their consistency with the adopted spatial strategy.

- Policy should be more specific about safeguarded sites.
- Meets none of the soundness criteria stated in the NPPF (paragraph 182).
- Policy is unnecessary.
- Policy is vague.

Officer Response

These comments have been noted. Officers consider the policy to be sound but are proposing focussed changes to provide a consistent approach to seeking 50% affordable housing for unallocated sites.

Policy PR13 – Monitoring

Less than 10 comments were received on this policy. These included representations from the following:

Oxford City Council - The Partial Review sets out positive measures to ensure delivery of the supply of homes for Oxford, which is welcomed. It is very helpful that the plan includes a very clear trajectory for the sites contributing to Oxford's unmet need, to enable monitoring against the Growth Board apportionment, & for understanding the likely phasing of delivery.

Other comments include:

- Unsure that CDC is able to monitor and carefully scrutinise projects once implemented.
- Plan should identify reserve sites.
- It is unclear how Policy PR13 and PR12b relate to one another with regards to what action the Council would take if the allocated housing sites are not likely to deliver sufficient new homes to meet Oxford's needs.
- Monitoring must ensure that no development proceeds until the necessary transport and other infrastructure is costed, funded, and programmed.

Officer Response

These comments have been noted. Officers consider the policy to be sound but a focussed change is proposed to improve the policy.

Appendix 1

BBOWT - Mapping often only shows the individual site but not the wider development context such as other proposed site allocations in Cherwell DC or neighbouring authorities such as Oxford City Council or West Oxon District Council, which makes it difficult to get the full picture. Recommend that detail on future land use is provided. Key to be considered for woodland/ancient woodland.

Officer Response

These comments have been noted. Focussed changes and minor modifications to the Policies Map are proposed.

Appendix 4 – Infrastructure Schedule

Yarnton PC - Bus lane improvement along A44 Begbroke to Loop Farm. The proposal is physically & financially impossible owing to the restrictive widths of railway & canal bridge crossings and the underpasses at Peartree Interchange. Further restricted by PR11a (p 167) cycle & pedestrian improvements along A44 between Bladon & Peartree roundabouts. This is a pipe dream & can't be used to justify large scale development adjacent to the A44 at Yarnton/Begbroke. The infrastructure proposals are not justified, not effective & is unsound.

OCCG - The intention for the main health hub campus in Kidlington is to have the two existing local practices working together as a single unit to ensure sustainability for the future. The placement of this health hub is undergoing discussion, and is very much reliant on developer contributions for it to go ahead. With the housing proposed in the Kidlington, Yarnton, Woodstock area, all local practices will be significantly impacted upon, with Islip least affected. Three health hub site options have been identified. Object to this development until we are satisfied that sufficient provision is being made for healthcare infrastructure to meet the healthcare needs for the proposed development.

Other comments include:

- Bus Lane improvement along the A44 Begbroke to Loop Farm: This proposal is physically and financially impossible owing to the restrictive widths of railway and canal bridge crossings.
- Rapid Transit Route: Unrealistic.
- Sandy Lane closure: Strong objections.
- The suggestion to redevelop Exeter Hall suggests that Yarnton people would be expected to travel there to see a GP.
- Costs and sources of funding are largely unidentified.
- Delivery dates are vague.
- No risks or mitigations have been identified.
- There needs to be a much clearer link between the transport improvements and new developments.
- The Infrastructure Schedule is incomplete. It should therefore be considered as a 'work in progress'.
- Lack of thought to infrastructure.

Officer Response

Many of the representations received include concerns about the capacity of existing infrastructure such as schools and health services and the timely deliverability of new infrastructure to serve the proposed developments. The Infrastructure Schedule supporting the plan has been updated following the receipt of additional information and discussion with service planners / providers such as the County Council (including on education matters), the Oxfordshire Clinical Commissioning Group (with local GP Practice Managers) and the Council's own community/recreation services. An adopted Developer Contributions Supplementary Planning Document will assist in the delivery of required infrastructure. More widely, the completion of an Oxfordshire Infrastructure Strategy (evidence doc. PR35) strengthens the position of the Oxfordshire authorities and is seeking Government funding where required to support or accelerate delivery.

Officers consider the Plan's proposals to be 'sound' with regard to infrastructure delivery. Focused changes are recommended to improve the Plan and bring specific requirements up-to-date.

Consultation Process

There were over 600 comments relating to the consultation process.

(NB. The Council extended the consultation period to October 2017)

- The Council is pushing the Plan through without considering the effects
- The documentation material is complex, meaning that residents cannot understand it
- The exhibitions were deliberately held during the summer holidays meaning people could not attend.
- The Plan was designed to convince local people to buy new homes.
- The consultation period was too short.
- The volume of material was not possible to review for comment in the period of time allowed for the consultation.
- Only a high level Options paper was published at the 'Regulation 18' stage. The Options consultation failed to appropriately communicate that preferred areas of search (A and B) had been identified and that detailed work had been undertaken to assess sites within these two areas of search only.
- Apart from in the "guidance on representations" it is not clear how comments will be considered in terms of the formal stages.
- The response forms are unclear and people were not made aware that other forms of responses were acceptable.
- There is lack of explanation within the plan of "where we are now" or discussion of "next steps". This is a fundamentally misleading approach contrary to B.95 of the Local Plan which indicates that "Full public consultation will be central to a "sound" process and outcome." For consultation to be lawful, it must take place when proposals are at a formative stage.
- A draft Plan should have been produced before the Proposed Submission.
- If the Council proceeds as planned, it is considered the Inspector will find the Plan unsound due to inadequacy of evidence base and failure to ensure effective consultation and participation by the public.
- Concern that the Council has progressed with the current Plan despite an overwhelmingly negative response to the Options consultation.
- Concern over the Statement of Consultation document and how it captured the public comments.
- The Statement of Consultation material is misleading and inadequate
- There were no questions in the consultation on the release of the Green Belt therefore the public were not given an opportunity to express views on this earlier.
- The Council must provide information in a user friendly style.
- The Council should start listening to other voices than those of the development lobby.
- The content of the plan was predetermined in advance of the consultation
- The Council must rethink and improve its policy for conducting important public consultations.
- Very important documents were missing from the website including the HELAA and Transport Assessment.

Officer Response

The archaeological survey information submitted as part of the outline planning application did not cover that part of site PR10 allocated for primary school use. It is not yet certain whether this land will be required for a school, playing fields or other outdoor sports provision but following further consultation with Historic England, it indicated that in view of archaeological interest to the south in association with the Scheduled Ancient Monument, a desk based Heritage Impact Assessment and Geophysical survey should be undertaken on the site. This work has commenced but in view of associated timescales Historic England has agreed to some additional wording in the plan to ensure that development on that part of the site will be informed by the outcome of the HIA. It is considered that the proposed reconfiguration of the layout, together with other focused changes requested to policy requirements, have addressed the concerns raised by Historic England.

However, the reconfiguration of the proposed residential area meant that officers needed to review the precise number of dwellings that could be provided on the site. This suggested approximately 489 dwellings. This has been rounded to 500 homes for the purpose of what is a strategic housing allocation and which offsets the reduction in the number of homes (90) planned for land to the west of Yarnton.

Other recommended changes include detailed clarifications and amendments in response to comments received. It is also recommended that the policy makes clear that the development of land for either school or sports pitch use to the north of Shipton Road will be subject to the consideration of a Heritage Impact Assessment in consultation with Historic England—exhibitions. Town/Parish Council and stakeholder workshops have been held. Officers consider that legally compliant, appropriate and timely opportunities were provided for the public to engage effectively with the plan making process at the Regulation 18 stage and for people to give intelligent consideration and response in terms of the content of the Plan and its specific proposals. Members have the opportunity to conscientiously take into account the representations in considering the recommendations of officers.

In addition to the requirements as to consultation in the Local Plan Regulations and the Council's SCI, the courts have set down requirements, in particular *R (Moseley) v Haringey London Borough Council* [2014] 1 WLR 3947. They are that: (i) consultation must be at a time when proposals are still at a formative stage; (ii) the proposer must give sufficient reasons for any proposal to permit of intelligent consideration and response; (iii) that adequate time must be given for consideration and response; and (iv) that the product of consultation must be conscientiously taken into account in finalising any proposals. Officers consider that there has been compliance with all these requirements.

There is no statutory requirement to publish a draft Plan prior to the publication of a Proposed Submission document. In the issues consultation paper (January 2016, evidence doc. PR20), the Council advised under 'next steps' that the responses received would be used 'to inform the preparation of the next stage of the Partial Review: consultation on the spatial options for accommodating the additional growth' (para. 8.1). In the options consultation paper, (November 2016, evidence doc. PR47), the Council advised under 'next steps', 'The feedback we receive will be used in the further consideration of issues and options, in completing our evidence base and in

preparing a proposed document which we will publish in 2017' (para. 9.2). The Plan's preparation has been in accordance with these stated intentions.

General comments

In excess of 1200 comments were received that were not necessarily policy specific. The issues raised in these comments include the following (grouped under Issue specific headings).

Growth

- Oxford City should resolve its own housing problems and find brownfield sites to build on
- The country does need more housing and some of the locations in and around Kidlington and Gosford which it is proposed to develop for housing are the best in the circumstances.
- The places need to be built to be self-sufficient
- Scale of the proposal is too large
- Considers the plan to be sound as it directly addresses existing and future issues regarding sustainable transport connectivity to and from central Oxford.
- CDC's vision responds to the specific needs and growth of Oxford, the relationship between housing and employment, and the importance of building sustainable communities that are well related to Oxford while respecting the Cherwell context.
- Not opposed to sensible plans
- Yarnton will be quadrupled and the necessary services will be years behind
- Yarnton and Begbroke would become suburbs of Oxford
- Add 10% (on average) to each existing settlement, improving viability of local amenities.
- Raise the densities within larger towns and cities, where transport and amenities already exist.
- No consultation has taken place with local residents
- This is a gateway to the Cotswolds; it is imperative that these villages keep their identities and grow in a linear approach and not mass building.
- New housing projects should be shared with all Oxfordshire villages
- Fully support the need to build homes to support future intake and families.
- Oxfordshire is already over populated. It will encourage more people to come in the county.
- The council cannot provide services and facilities, which are already at breaking point.
- The road (A44) cannot cope with the increase in traffic. The current situation is bad with traffic at gridlock at peak hours. Traffic lights at Begbroke Science Park lead to tailbacks up to Langford Lane. Palace traffic lights also lead to tailbacks.
- Proposals are driven by Oxford City
- CDC should be serving the needs of the local community and not taking instructions from Oxford
- Proposal is unsustainable, reactive and without consideration for consequences.
- Housing forecast is flawed
- It flies completely in the face of the majority of local voter opinion
- Dividing land use planning between 5 districts creates difficulties
- Cherwell has functional links to the surrounding Districts through wildlife corridors, water catchment and drains/streams/rivers as well as transport links and the housing intended to meet Oxford's needs.

- The scale of the unmet need has not been objectively assessed. It relies on 2014 SHMA that hasn't been scrutinised.
- Local food systems should be promoted
- The overarching vision for the local plan should include objectives for a zero carbon district/city; a water neutral region; not producing any waste water; planning to reduce waste to zero, eliminating waste to landfill, and a net reduction in road traffic growth.
- Urge planners to find alternative sites in the City. E.g. Southfields golf course, move Park and Rides outside the City and use that land for building.
- The City Council should stop building on commercial sites and concentrate on their own housing needs, before going for the easy option to build on local GB. There are several commercial sites that do not have full occupancy
- Can we be sure there is no nepotism, in the decision within the parties concerned?
- Our historic village should be preserved and it should not be an overspill from Oxford and London and should not be merged with Yarnton and Begbroke. Without GB separating us we will become a suburb of Oxford.
- CDC's childish attempts to push this plan through with the minimum statutory consultation are a clear indication that what is being proposed here is not right.
- The case for Oxford's need has been overstated
- If Oxford was to switch land designated for business to housing it would be able to meet its housing obligations.
- The Local Plan Review attacks the core principles on which GBs depend.
- Employment needs to be focussed at Bicester where there are already a large number of new housing being built and infrastructure already in place to manage this.
- The homelessness crisis is acute in Oxford. The Council needs to work harder to reinstate some of the vital services which have been limited or closed, particularly as regards physical and mental health, the most significant causes of homelessness.
- The centre of Banbury is disappearing because of the building of retail parks and housing out of town, and yet there is no refurbishment of the town centre as a residential social hub.
- The greed of Blenheim Palace, Merton College and Exeter Colleges: these can at best be described as commercial, self-serving, and excessively wealthy enterprises.
- Joining all the villages up and then joining it all up to Oxford will create a dormitory.
- The data being used is pre-Brexit. These are not sound data now.
- The proposals need full and wide discussion rather than being rushed through the holiday period, and there should be further, more robust discussions with Oxford City Council.
- There are plenty of large areas south of Oxford. It is Oxford City's problem and Cherwell Council should vehemently object to this Oxford overspill being developed north of the Oxford City boundary.
- Limited space for development exists due to flood plains in and around Oxford, and although reasonable for surrounding villages to expand slightly to keep the region prosperous, the scale of the plan is out of proportion and unsustainable without massive investment in infrastructure.
- GB is there for a reason and we want Kidlington to keep its identity and separation from Oxford, as well as the golf course, trees and wildlife. Think that PR 7a and PR 7b are

manageable and a smaller sized PR8 as the roads could possibly manage. But not PR6 and PR6b. Please keep developments small and manageable.

- Kidlington is big enough for its 'village' status, confirmed years ago by residents voting against being a town. In the 52 years we have been here we have lost green space opposite and the traffic has greatly increased. We don't want to become part of an urban sprawl and we do not want to meet Oxford needs.
- Recognise that the content of this paper is sensible and necessary to maintain our community standards. However, also believe that this is just a paper exercise for officialdom to say 'we have had our say'. Until the government meets the demands of the nation and stops immigration the mandate to build unreasonable amounts of houses will be unstoppable.
- Kidlington has already changed from a village to a small town with few green spaces, and we need green spaces.
- The developments proposed and their infrastructure requirements have not been objectively or thoroughly assessed. Previous work has often simply been integrated without amendment or recognition of new circumstances. In many respects it's a "rip and read" plan
- The proposed developments emanate from the economic self-interest of Oxford City Council. Their claimed unmet housing needs have not been independently tested
- Integration of large numbers of in-comers into what would be an urban tangle of concrete and glass usurping once beautiful countryside is likely to prove extremely problematic.
- Cherwell have set a new precedent in claiming that houses are equal to Green Belt in sustainability terms. They have done a straight swap in their Sustainability Report so there's no loss on the sustainability balance sheet.. The term "sustainable" now has an all-embracing legal definition, diluting its original meaning to the point of uselessness, and downgrading the trust the public can put in it.
- The plan represents a huge increase in housing that would put pressure on related infrastructure, not addressed satisfactorily by the plan. The indication is that housing is aimed at commuters rather than trying to address local housing needs.
- Objection to proposed development of planned 4,400 houses because of traffic, pollution, flood risk, danger to wildlife, lack of planning around statutory services and GB arguments.
- It is also our responsibility to steward recreational areas of the countryside in the crowded S. Midlands and SE England for the sake of future generations.
- The national housing crisis needs to be addressed with new towns e.g. previously Milton Keynes and GB should be preserved. The proposals do not meet the needs of the constituents.

Consultation

- Unreasonable consultation process.
- Objection to the complexity of the consultation and its timing over the school holidays. The Council has not given members of the public a fair opportunity to read and understand the proposals and make their views known.

Development - governance

- Any development north of Cutteslowe roundabout would fill in land between there and Kidlington and be under the control of Oxford City Council.

Housing

- The houses will not be built for local people due to the house prices. They will be for commuters to and from London or buy to lets.
- Housing demand has changed drastically since Brexit,
- In view of Brexit, the scale of housing should be revisited
- 200 extra homes have been built in Yarnton since 2011
- Sandy Lane closure cuts off Yarnton from Kidlington
- People understand the need for housing, but not the numbers and densities planned
- The proposed high density housing will lead to increase in traffic congestion and pollution, loss of the rural character of Kidlington.
- The problems and opportunities of housing the older generation have been underestimated. It should not be looking at housing for the elderly, but ensuring that most/all new developments are suitable for them.
- It is Government policy that self/custom building should be encouraged in order to make a substantial contribution to housing supply.
- The sustainability of custom splitting makes the proposal to spread Oxford out into the Green Belt look comparatively if not extremely unsustainable.
- It is undesirable to build houses directly underneath power-lines and the cost of re-routing this or cabling underground need to be encouraged
- Any more development near the world heritage site is unacceptable.
- The density of 45 dph is very high. It is too much for the local villages and not in keeping with the existing villages.
- The 'promise' that a proportion of the new houses will be made over to the Housing Association and be available for rental, is an attractive one, but we have seen across the country that this very rarely happens, in reality. Younger generations want the opportunity of owning their own homes, and do not want to continue renting
- We must limit the driving effect of windfall profits for one part of the community at the expense of others - and preferably direct some of them into reducing housing costs.
- Concern over homes near Oxford Parkway being bought by London commuters - how will this be prevented?
- Sudden influx of so many families into Kidlington would put enormous pressures on its facilities.
- This is not sustainable and puts a burden on schools, doctors' surgeries and the traffic at the northern gateway – already gridlocked in rush hours. Could cause delays, pollution, potential for road traffic, accidents etc.

Affordable Housing

- Affordable homes within these development will not be affordable
- It will fail to provide truly affordable housing so desperately needed
- Developers will have no interest in low-cost housing where land has become plentiful, work remote and adequate transport and amenities absent.
- Affordable housing is not affordable for our children
- Do not believe that the 50% target of affordable houses will be achieved.
- Our children and friends' children have been forced to move from the area due to astronomical rents and the 'affordable' housing is not affordable.
- It is important that a large majority of housing to be built is affordable.

Infrastructure

- A huge increase in homes without proper infrastructure will only makes this worse.
- There is apparent lack of suitable infrastructure. We need better infrastructure now – let alone for additional housing
- Without detailed costings and guaranteed funding for improved infrastructure, the highway network will be overwhelmed by the additional traffic
- There are no costs shown in the infrastructure schedule. No sources of funding are identified
- Proposals will have detrimental effect on infrastructure
- Infrastructure is at breaking point with the A44 and A34 unable to cope with the amount of traffic.
- The new development at Cresswell Close has drainage problems. This is a fundamental lack of infrastructure planning which concern and fear that this lack of foresight could be replicated again.
- Adversely affect drainage
- Floodplain (most recent major flooding event January 2014 in which the A34 was threatened by water on both sides between the Pear Tree and Botley interchanges): -the Partial Review July 2017' document alludes to the floodplain as a 'major constraint'
- Concerned about the impact on local services
- Does the plan include new schools and GP practices?
- Development will exacerbate the flood risk to housing and adjoining land/conservation area.
- Inadequate local infrastructure to support development of this scale.
- Will need at least 3 more primary schools and one more secondary school and triple the number of Doctors surgeries and dentists. Have not seen any mention of this, although all the documents associated with the consultation are so complicated and wordy it is very difficult to find any facts at all.
- Not enough recreational outdoor space or parks for children in Kidlington
- To take away a sporting facility such as North Oxford Golf Club, which is over 100 years old, is a crime. This needs to be stopped. It does not bear contemplating what it will be like once this nonsense is put in place.
- Provision of Infrastructure - the plan is unconvincing in that no significant new investment is identified or proposed.
- Public services and leisure facilities equally need clear and imaginative plans before the developments start.
- The sewage system is already unsuitable

Green Belt

- The GB was always meant to be permanent and Oxford should stay separate from Kidlington and other villages.
- Local countryside enriches life and maintains health.
- CDC should review the Plan as it is contrary to GB protection
- There are no exceptional circumstances for CDC's proposal to build in the GB.
- GB land is protected by legislation and should not be built upon. It was intended to retain distinct boundaries between settlements.

- Strong objection to building on the GB. Without regard to meeting actual need, effective transport, amenities, true community and catastrophic effects on existing settlements
- GB was constituted to prevent urban sprawl between towns and there are no exceptional circumstances to overcome it and set a precedent.
- The plans would destroy the historic identity of all three communities and cause irreparable damage to the wildlife and beauty of the GB surrounding these villages.
- GB policy prevents development, why are you breaking the law?
- Oxford needs to look closer to home before encroaching on GB which will be lost forever.
- GB encroachment is contrary to its adopted Cherwell Local Plan 2015
- CPRE data – 76% of Oxfordshire residents were in favour of protecting the GB. Viewed as a major threat and they do not want Begbroke to be surrounded by houses.
- Objects to 4400 homes in the GB. Contrary to the GB purposes outlined in the NPPF
- It is crucial to protect the GB and farmland in it as it is a carbon sink for the pollution from Oxford.
- Strongly object to the proposal to build on the GB around Begbroke, Kidlington and Yarnton because it would become an urban sprawl and the A44 and A34 will come to a gridlock.
- High concern for the proposal to build 4400 houses on the GB.
- Building on the GB will put the floodplain under even more pressure, and we will see serious, potentially fatal, flooding problems across the nearby communities. It also provides a unique and precious wildlife habitat.
- The marking out of additional Green Belt sites for nebulous use which can easily be seen as ring-fencing more green-belt for development as required.
- The case has not been made for sacrificing GB land and sufficient consideration has not been given to the 400 homes in the area.
- Deeply concerned about loss of GB and associated impact on wildlife and the environment
- GB legislation is fantastic and should be respected above all else. It keeps the region in check, provides countryside for the natural population and this cannot be eroded - it would be a travesty for present and future generations.
- **Transport**
- It is unreasonable to take 45-60 minutes to go 5 miles on the bus.
- As a cyclist experience high levels of pollution already and buses get stuck in the bottlenecks that remove the bus lanes.
- A34 is a disaster and Junction 9 is one of the worst in the country.
- Very concerned about traffic movement
- It should be a priority to provide a sustainable movement corridor into and through the town for pedestrians, cyclists and public transport. The plan addresses this and provides not only for existing modes of transport but has the potential to provide for other rapid transport and environmentally friendly systems such as autonomous and electric busses, trams or other forms of mass transportation. There is significant growth in this technology which will be implemented during the life of this plan. The plan considers this point well, is "future protected" and that has to be applauded.
- There is no indication of how the already congested highway network will cope, and local wildlife will be pushed away.

- Traffic and congestion on local roads
- Reinstating the station at Yarnton and a tram route to Kidlington, Oxford and Witney is paramount to address the traffic problems in the area.
- Blenheim Palace has been granted additional housing, which will increase the traffic and pollution along the A44
- There is a lack of understanding of the traffic conditions that already exist in this area, and additional houses will add to the traffic problems.
- Traffic congestion problems between Begbroke/Yarnton and Oxford are intolerable
- A44 traffic congestion and 50 mile speed limit add to travel time and cause delays
- Yarnton roads are bad.
- Closing Sandy Lane will create long delays and risk of accidents on the A44. It will remove a key road link between Yarnton and Kidlington.
- This development will contribute to more pollution from traffic and therefore we will suffer from respiratory problems.
- Concerns regarding the existing traffic congestion and pollution in Kidlington
- Volume of traffic on the A44 at present is at capacity during peak hours. With the proposed closure of Sandy Lane the problem will be compounded.
- How will this road address an additional 8-10,000 people using this road?
- Closing Sandy Lane would cause greater congestion to the A44 and A4260
- In the areas bordering A34 allowance should be made for the expansion of the dual carriageway into a 3 lane motorway.
- London commuters will benefit from the new Parkway station and not the homeless from Oxford
- Traffic congestion is magnified with events at Blenheim Estate
- Traffic through Gosford and Water Eaton on the A4260 is already gridlocked during peak periods
- Oxford Parkway Station is already overcrowded at peak times.
- Increased numbers will result in more cars on the crowded roads
- The volume and speed of vehicles along this road puts the children using the preschool, school and park, the elderly living in the residential home and everyone going to the social club and doctor's surgery at risk.
- The proposed new railway station between Begbroke and Kidlington is unrealistic.
- There must be 'joined up' thinking; analysis of real rather than perceived future need, and together with Oxford City, CDC must be more resourceful and creative about finding responsible solutions to housing issues.
- The new housing should be delayed until the Oxford to Cambridge Expressway route has been decided. East West railway reopened and the full expansion of Bicester is agreed with its potential new transport infrastructure.
- The suggestion that the Sandy Lane link can become a wheel-chair access and cycle lane as part of a cycle 'superhighway' into Oxford is ludicrous! In any case, such a project would simply lengthen cycle journeys!
- It should be a priority to provide a sustainable movement corridor into and through the town for pedestrians

- The plans do not sufficiently factor in the fact that the A34 and Bicester Road are already gridlocked during peak times. There must be fully costed and funded plans for road improvement and cycle paths/bus routes.
- Parking in residential streets has become a problem since charging was introduced at the Park and Ride, and this issue will be exacerbated by the additional housing

Health/ Health and Wellbeing

- Surgeries are unable to cope. There is a 4 weeks wait for a doctor's appointment
- Harm to the health and wellbeing of the residents and open countryside.
- It is difficult to get a doctor's appointment. This will exacerbate the problem
- Doctors' appointments take 2/3 weeks. Are there plans to improve the service or provide new facility
- Health services are oversubscribed
- Harm to health and wellbeing
- As far as the Doctors' Surgeries are concerned, they are already under intense pressure and we have to wait three weeks for an appointment. These 4,400 extra households will make it well-nigh impossible to get an appointment! With an ageing population generally, and an increasing number of care homes and sheltered accommodation for the elderly in Kidlington, this makes for an impossible situation.

Education

- Primary Schools have reached capacity and oversubscribed
- Secondary school pupils travel to Woodstock would need to be picked up at 7.30 am to reach in time for lessons
- Schools will be needed to meet the needs of these extra families
- Local schools are at saturation point and struggling to provide a good standard of education to the existing population - how big would class sizes become with new developments?

Flooding, Landscape, Ecology and Environment

- What arrangements have been made to protect deer, badgers, foxes and other habitat?
- Yarnton has historical footpaths relating back to the Civil War
- The loss of chicken and deer farm and other farms around Yarnton, Begbroke and Kidlington will destroy the nature of the area.
- It will have adverse effect on the diversity of local wildlife
- It will undermine protection for the countryside and rural landscape
- There are bats in the copse situated between the field at Water Eaton Lane
- Irretrievable damage to the countryside and serious loss of wildlife habitat
- Loss of Ancient footpaths (Frogwelldown Lane), the bridleways and Shakespeare Way, which give access to walkers, riders and cyclists.
- Loss of countryside and radically alter the character of the area. It will create a town by stealth
- High density development will destroy the ecology, and habitat forever, which give us wellness and wellbeing.
- Loss of open countryside if site south of Kidlington is built upon. Nature Reserve will be adversely affected by the development.
- Flooding at Rowel Brook and residential areas around it.
- Further threat to local wildlife and bio-diversity species

- If the proposal to build 4400 goes ahead then no amount of 'mitigation' is going to lessen the huge impact it will have on the environment and the community.
- Soil quality has been neglected by those engaged in urban development.
- There should be a concerted attempt to coordinate the use of countryside in terms of including strategic tree planting, soil protection, wetland creation, water retention, run-off prevention, food production.
- All open space not given to recreation should be planted
- The water table in the south of Beagles Close is high and building will raise it further. It will be very difficult to get home insurance.
- The plans will lead to increased pollution which will in turn gravely and irreversibly harm Begbroke Wood, Pixey and Yarnton Meads (SSSI), and Cassington Meadows. In addition, there is a roost of bats (possibly Noctule bats) living behind Rutten Lane in Yarnton, yellowhammers (RSPB Red List) can be seen on the allotments, hedgehogs and amphibians depend on the green areas and ditches surrounding the village, the return of otters to the Cherwell will be jeopardised, a plethora of old meadow grasses and at least thirty rare species of flowers.
- Threat to allotments where some allotment holders have been working the land for 40+ years: the pollution created by traffic and building work will make the current allotments unpleasant and unsafe areas in which to grow food. The allotments themselves provide habitats for a wide range of wildlife.
- The fields are an important and very well used amenity for village residents and regular visitors providing walks and views of the village towards St Mary's Church.
- This countryside is used by the people of Kidlington, Yarnton and Begbroke as well as many residents of Oxford keen to escape the confines of the city.
- To build on the golf course will be very detrimental to wildlife
- The natural landscape is also very much degraded (even over the past 10 years noticeably so). Plans must be in place to clearly designate wildlife areas within proposed sites to allow wild corridors to thrive.
- Cutteslowe Park, which now forms part of the country, will become just another urban park and that the rural walks north from it will disappear.
- It would be devastating if the rural walks in the area were spoiled.

Brownfield sites

- There are plenty of brown sites in Oxford to be used for housing.
- Oxford City has not made sufficient effort to meet its housing needs on existing brownfield sites, e.g. Oxford Golf area and other sites around the City have not been identified.
- Build on brownfield rather than cheaper GB option

Financial

- It seems a money making project
- CDC will benefit from increased tax revenues
- Merton College are greedy and these houses might be bought by foreign buyers.
- Kidlington is becoming a more and more costly place in which to buy a house. Property developers are delighted to build more profitable homes for London commuters using the new train station.

- This massive development is almost certainly about greed, financial gain and reward for some rather than an honest assessment of the actual need.
- Objection to the fact that this development appears more concerned with money in the pockets of developers than with an egalitarian desire to home people who find it hard to afford homes such as nurses, healthcare assistants, technicians and other low paid workers.

Energy

- The plan does not confront the main issue of reducing carbon emission by at least 6% up to 2031 and beyond. The potential of the land use planning system to reduce carbon emission by 50% will be missed unless addressed coherently and holistically to achieve sustainable development as per the NPPF
- The Plan must mitigate against climate change and contribute to sustainable development (s19 and 92 of the TCPA 2004)
- Increase in pollution

Tourism and Economy

- Thousands of international tourists will come to visit Blenheim Palace and the very rural approach to this national jewel will be marred and defaced forever by merging the villages. It will leave a negative impression on visitors.
- Harmful to the economy with lorries unable to move on the major roads.
- Contrary to its misguided conclusions Blenheim Palace and the grounds does not benefit the community. Many local enterprises have been put out of business.
- Begbroke Science Park to date has provided no obvious service to its surrounding communities, whatsoever!

Officer Response

The level and depth of feeling in these comments have been noted. The majority of the comments raise issues covered under the specific sections/policies responded to above. Where appropriate focussed changes, have been proposed in response to the representations received. The overall view of officers is that the Proposed Submission Plan has been positively prepared and is justified, effective, consistent with national policy and legally compliant.

The number of representations and objections from affected Parish/Town Councils, local communities, their representatives and neighbourhood areas illustrate the level of local concern. The collective weight of local opinion as represented by BYG, KDW and WAG is noted in particular. The overall response to the Proposed Submission Plan (1460 representations) far exceeds that received to the equivalent stages of the adopted Local Plan (approximately 300-400 representations). Nevertheless, the Plan is also produced in the wider public interest of meeting objectively assessed needs and the weight of objections in itself does not invalidate the proposals.

Omission Sites

The following objections were raised to the omission of sites for development from the Plan:

Reasons for objection include:

- The Council's spatial strategy is not sustainable, justified or sound.
- The promoted site is sustainable, as demonstrated in the Council's SA and or evidence base
- Promoters own assessment or evidence shows that the promoted site is sustainable
- The promoted site is more sustainable than those allocated by the Council
- More than 4,400 new homes is needed in the District meaning additional sites are needed
- There would be positive effects and limited adverse impacts resulting from promoted sites.
- Reserve sites should be identified.
- Sites should be allocated elsewhere in the District
- Sites should be located in elsewhere in the Country and County including in Oxford
- Development should take place on brownfield land.
- Land identified in Policy PR3, as removed from the Green Belt, should be allocated for new homes in the Partial Review.

Land north of the Moors (Site 14 and 27) – Bloombridge and others

- The Moors (site PR14) should be included in the Plan for c300 houses, linked to a regeneration package for the village centre and a new 10 hectare country park. In the alternative, it could be specifically listed as a 'safeguarded site' in Policy PR12b, or this policy could be amended to provide for localised Green Belt reviews for housing where planned for sites are not being delivered by 2021.
- This county and country need more houses and this is an ideal location for a number of them.
- This land has never flooded and the drain was enlarged.
- This part of the Green Belt will not be missed and the countryside is more attractive closer to the river.
- Post-war expansion of the village has provided services and facilities.
- Most of those behind the campaign to stop this development live and benefit from the earlier development and now want to stop others enjoying the same.
- This extra building will bring in more revenue for the Council and may stabilise house prices.

A large number of representations were received in support of the Plan not allocating the land north of the Moors (sites PR14 and PR27) reasons give include:

- The land is in the Green Belt, and should be preserved as such.
- Exceptional circumstances need to be demonstrated to release the site from the Green Belt.
- Footpaths on the fields are much used by local walkers contributing to healthy lifestyles.
- Land behind the Moors and Webbs Way is one of the most popular, accessible and necessary interfaces between town and country in Cherwell.
- The site is prone to flooding, and so is unsuitable for building on and will cause flooding downstream.
- The site is historically important and should be protected.
- The site constitutes a landscape of the last remaining unspoilt corner of Kidlington with wide views across fields to the old village.

- The development would have a direct impact especially on the setting of the conservation area of St. Mary's Church and other listed buildings.
- The landscape with its central focus on the spire of St Mary's Church, 'Our Lady's Needle' – as featured in Simon Jenkins' book England's Thousand Best Churches (1999).
- A unique medieval landscape which contains many listed buildings and should not be developed.
- There is a case for making this landscape an amenity for all by formalising it as a 'reserve' akin to, or even part of, the National Trust.
- In the 1990s, the Ministry of the Environment Inspector ruled.... were development ever to take place it would I fear be significantly harmful to this rural end of Kidlington. ... I feel, without question, that it would be most unfortunate if this north-eastern area of the village were ever to be seriously considered for development".
- The sites are a haven for wildlife which development would adversely affect.
- The Kidlington Masterplan Framework refers to the distinctive views, river corridor, landscape and wildlife.
- These fields with their landscape rural views have been enjoyed by many generations and this should continue.
- This is the oldest part of the village and the landscape contributes to its setting.
- Further damage by light pollution is inevitable from new housing.
- The proposed access, via The Moors, would detrimentally impact the road network and create large traffic volumes near a school and nursery.
- Development here will add to existing road congestion.
- Area is already subject to traffic calming and blighted by rat-running.
- This area of the Moors has had an increased volume of traffic plus parking problems since the Moorlands development.
- Follow Bicester healthy town example by protecting these green spaces for physical activity
- Schools are at capacity in the area.

Land adjacent to The Old School House, Church Lane, Yarnton (Site 75) - Carter Jonas LLP for Oxford Centre for Hebrew and Jewish Studies

- Objects to the Plan making process and states that at least part of Site 75 should be allocated for development as a small scale extension to Yarnton.

Shipton on Cherwell (Sites 19 and 29) - David Jarvis Associates on behalf of Shipton Ltd

- Objects to the Plan making process and states that land at Shipton on Cherwell Quarry should be allocated for housing in the Partial Review.

Land east of the Water Eaton Park and Ride – Carter Jonas on behalf of Mr Smith

- Objects to the Plan making process and states that the boundary of site Policy PR6a should be amended to include the land east of the Water Eaton Park and Ride and the land

allocated for residential development or a mix of residential and other uses in the Partial Review.

Land at the former RAF Upper Heyford - Framptons on behalf of E P Barrus and Lone Star Land limited

- Objects to the Plan making process and states that two parcels of land at Upper Heyford should be allocated for housing in the Partial Review.

Site 24 (Begbroke Lane) and site 74 (Land at no 40 and to the rear of 30 to 40 Woodstock Road East – Begbroke) – RPS on behalf of Richard Davies and resident

- Objects to the Plan making process and states that the land at Begbroke should be allocated for housing in the Partial Review.
- If sites 24 and 74 were developed this would have a significant impact on health and the natural environment and would inconsistent with the Council's own policies.

Land to the south of Oxford Motor Park (includes site PR24) - Walsingham Planning on behalf of Oakhill Group Ltd

- Objects to the Plan making process and states that the promoted land should be removed from the Green Belt.

Land at South Newington Road, Bloxham - Define Planning & Design Ltd on behalf of William Davis Ltd

- Objects to the Plan making process and states that the promoted land should be allocated in the Partial Review.

Land south of Tadmarton Road, Bloxham - Planning Prospects

- Objects to the Plan making process and states that the promoted land should be allocated in the Partial Review.

Land at Loop Farm/ Drinkwater, Oxford - Kidlington & Yarnton Labour Party

- Objects to the Plan making process and states that the land above should be allocated in the Partial Review.

Land North and South of Milton Road, Bloxham - Lichfields on behalf of Taylor Wimpey (Oxfordshire)

- Objects to the Plan making process and states that the promoted land should be allocated in the Partial Review.

Land at Islip - Lichfields on behalf of The Church Commissioners for England

- Objects to the Plan making process and states that the promoted land should be allocated for housing in the Partial Review.

South East Kidlington - WYG on behalf of Barwood Development Securities Ltd

- Supports the principle of development at south east Kidlington but and states that the allocated site at south east Kidlington (PR7a) should be extended to allow for additional homes.

Land at New Alchester - WYG on behalf of Bonnar Allan Ltd

- Objects to the Plan making process and states that the promoted land should be allocated in the Partial Review.

Land at Knightsbridge Farm - Carter Jonas on behalf of Sheehan Group of Companies

- Objects to the Plan making process and states that the promoted land should be allocated in the Partial Review.

Land at Knightsbridge Farm - Suzi Coyne Planning on behalf of Sheehan Haulage & Plant Hire

- Objects to the Plan making process and states that the promoted land should be allocated in the Partial Review for employment.

Land south of Sandy Lane - Carter Jonas on behalf of W Lucy & Co Ltd

- Objects to the Plan making process and states that the promoted land should be allocated in the Partial Review.

Land at Frieze Farm - Turnberry on behalf of Exeter College

- Objects to the Plan making process and states that the site should be allocated for new homes.

Land at Gosford Farmhouse - CRJ Anstey Chartered Surveyors on behalf of Mr P Watson and the Trustees of Gosford Trust.

- Objects to the Plan making process and states that the site should be allocated for new homes.

Land at Upper Heyford - Pegasus Group on behalf of the Dorchester Group

- States that land at Upper Heyford should be allocated for new homes as a reserve site.

Land at Webbs Way, Kidlington - West Waddy ADP on behalf of JA Pye (Oxford) Ltd

- Objects to the Plan making process and states that the site should be allocated for new homes.

Land adjoining Dover Avenue and Thornbury Drive, Banbury (PR45) – Bloor Homes

- Objects to the Plan making process and states that the site should be allocated for new homes.

Policy PR3a - Land at 14-16 Woodstock Road, Yarnton - Edgars on behalf of Mr & Mrs Tomes

- Land at 14-16 Woodstock Road, Yarnton should be allocated for development as part of the PR8 allocation.

Policy PR3b – Land adjoining and west of the railway - David Lock on behalf of the Tripartite

- Amend Policy PR3(b) to remove the reference to 0.7 hectares of land adjoining and to the west of the railway and include it as residential land within Policy PR8 and on the Policies Map.

Policy PR3c – Land south of the A34 and west of the railway - Gerald Eve on behalf of Merton College, Oxford

- Supports the policy but states that the site should be allocated for new homes.

Policy PR3c – Land south of the A34 and west of the railway - Savills on behalf of Christchurch, Exeter and Merton Colleges.

- Supports the policy but states that the site should be allocated for new employment.

Land to the east of Warwick Road, Banbury -Turley on behalf of Bovis Homes Ltd

- Objects to the Plan making process and states that the site should be allocated for new homes.

London Oxford Airport - GVA on behalf of Oxford Aviation Services

- Objects to the Plan making process and states that the site should be allocated for new homes.

North West Bicester - Barton Wilmore on behalf of A2Dominion Housing Group Limited

- Objects to the Plan making process and states that land at North West Bicester should be allocated for new homes.

Junction 9 and 10 – M40 – Framptons on behalf of db symmetry

- Objects to the Plan making process which should consider the relationship between housing and employment and land at the Motorway junctions should be allocated for employment development.

Land at Wendlebury – Gleam Investments

- States that the promoted site should be allocated for development.

Skimmingdish Lane, Bicester – Greenlight Developments

- Objects to the Plan making process and states that land at Skimmingdish Lane should be allocated for a Care Home which can contribute towards meeting housing needs.

Land north of Wykham Lane, Banbury - David Lock Associates on behalf of Gallagher Estates

- Objects to the Plan making process and states that the site should be allocated for new homes.

Land at Launton - Pegasus Group on behalf of Richborough Estates

- Objects to the Plan making process and states that the site should be allocated for new homes.

Officer Response

These representations have been considered and noted. Officers are of the view that no changes are required to the Proposed Submission Plan. All reasonable alternatives have been appropriately considered.

Evidence base

General Comments

- There is insufficient evidence to suggest that opportunities to increase capacity at existing allocated housing sites have been robustly tested.
- The evidence base is inaccurate.
- The evidence base highlights negative impacts which the Council have not taken account of in its chosen strategy.
- Studies may not have been completed in time to inform the Plan and/or SA.
- The key findings from the evidence base confirm many of the concerns about the negative impact of development.

PR 04 a-c Strategic Housing Market Assessment (2014)

- The Oxfordshire Strategic Housing Market Assessment (SHMA) is out-dated and should be revisited.

PR 22 - Interim Transport Assessment (2016)

- The Transport Assessment is a large complex document that is difficult for residents to understand and which would have benefitted from a Non-Technical Summary.
- No evidence of properly costed and funded infrastructure improvements to deal with transport issues.
- Changes in some of the RAG metrics used in the Interim Transport Assessment ('ITA') compared to those used in the High-level Transport Assessment have led to favourable outcomes for Areas A and B.

PR 52 - Transport Assessment (2017)

- The TA was completed in July 2017 with missing Appendices added in August 2017.
- There is little or no evidence to suggest that the TA was available in time to inform consideration of options/ formulation of the preferred strategy.
- The SA report does not draw upon the TA, as evidenced by no consideration of the four "development scenarios" that are a focus of the TA.
- Transport evidence base and the associated environmental assessment work is fundamentally unsound and cannot be relied upon. Criticisms include assumptions for car driver mode share, accessibility to sustainable transport and jobs, and lack of modelling to test the effects of closing Sandy Lane.
- The Transport Assessment has modelled based on the successful delivery of all the proposed critical investments listed in Table 8-2 which are undeliverable.
- Sandy Lane closure as a well-used alternative route is not justified.
- The Shipton on Cherwell site should have scored higher in terms of its potential for sustainable transport links. The site is located in close proximity to a range of the proposed future transport investments and due to its size has the potential to provide suitable infrastructure to capitalise on these.
- There are inconsistencies between the Countywide high level transport assessments and the transport assessment for the Partial Review.
- Application of an urban commuting model onto a clearly rural site is unrealistic
- There are errors in the scoring and colouring in the transport assessment.

PR 32 - Cherwell Level 2 Strategic Flood Risk Assessment (2017)

- It is not clear that work was completed in time to inform consideration of options/formulation of the preferred strategy.
- Land at Shipton on Cherwell was not assessed in the Level 2 SFRA but the majority is in flood zone 1 and offers an opportunity for flood alleviation and ecological enhancement.
- The map does not indicate fields that were historically submerged in water in the heavy rains a few years ago.
- Environment Agency - The Level 2 SFRA does not use updated climate change allowances and therefore is not consistent with national planning policy.

PR 34 - Ecological Advice – Cumulative Impacts – June 2017

- Berks, Bucks & Oxon Wildlife Trust - Welcome that comments have been taken on board and that a cumulative impact assessment has been carried out to inform this stage of the process. However note that it only assesses the impact of seven site allocations and does not include other allocations sites in the area such as the Northern gateway and Wolvercote Papermill allocations in the Oxford City boundary. Understand that consideration of sites outside the district boundary might go beyond the remit of this plan, but are concerned that no strategic overview of potential cumulative ecological impacts in the area has been undertaken considering the amount of development taking place.
- Welcome that scoping surveys were carried out but considers they are high level and subject to considerable limitations. Concerned that surveys might not have been done at the optimum survey time and only from Public Rights of Way meaning that some ecological interest might not have been captured and/or missed.
- Feel that the survey information cannot be fully relied upon and more comprehensive surveys might reveal additional ecological interest that will need to be taken into account in the next stage of the site allocation process.
- Aerial photos suggest that some of the meadows proposed for development might comprise grassland of higher conservation value.
- Also note that impacts on Port Meadow SAC and other designated sites downstream is not considered in the report but, assume that this is covered in the Habitats Regulation Assessment (HRA) and Sustainability Appraisal.
- Questions the recommendation which is taken forward by the Council as proposed policy: "Within the proposed Local Nature Reserve (LNR), it is recommended that habitats be restored to SSSI quality which will enhance the value of the LNR as mitigation for any potential negative impacts on the SSSI" as there is no reason to suggest that it will be possible to create a SSSI.

PR 38 - Oxford - Cambridge Expressway Strategic Study

- The implications of the Expressway are not drawn out for the Partial Review.

PR 40 - Cherwell Green Belt Study and Addendum (2017)

- Questions the assessment of the Shipton-on-Cherwell quarry site as it is assessed as high sensitivity yet it is suggested as a location to be removed from the Green Belt.

- The Study included a Green Belt harm assessment which gives Shipton Quarry a rating ranging from high to moderate. The rating for the area to the east of the railway line should be no greater than moderate as it is proposed for ecological enhancement.
- The Addendum is a very brief study with little systematic analysis.
- The Study is not referenced anywhere else in the current consultation material so consultees will be unaware of the Council's reasons for defining precise boundaries.
- The study shows that there will be high/moderately high impacts should the majority of the sites in and around Kidlington be released to meet housing needs.
- For the sites west and north of Yarnton, the Addendum states that the hedgerow boundary to the north is not a strong feature but is consistent with the proposed new settlement edge to the east of the A44. Commentary such as this within an evidence base is not convincing when considering how to manage further growth because it has already been recognised that the proposed boundary does not present a strong feature as such opens up the possibility for challenges in the future.
- Oxford City Council - Notes that Figure 1 in the Addendum indicates an area for removal from the Green Belt that extends across the boundary in Oxford's administrative area. This approach is generally helpful in the context of the work currently also underway on a new Oxford Local Plan, however it is noted that the site area does not align exactly with the area in the Oxford Local Plan Preferred Options Document. The City Council is proposing to remove two small parcels from the Green Belt in this vicinity. The first, at Pear Tree Farm, aligns with Cherwell's study. The second parcel however is more limited than that shown in Figure 1 of the Cherwell study. The Partial Review map should be amended.

PR 43 - Proposed Submission Sustainability Appraisal (2017)

- The SA is supported by various site promoters
- The SA is too high level and broad
- The Plan does not consider the negative effects highlighted by the SA.
- The SA highlights how the Plan should not proceed due to the negative effects.
- Not all reasonable options have been considered
- Promoted sites outside Areas A and B should be assessed.
- The SA fails to report the adverse traffic congestion impact from the proposed development around Begbroke and Yarnton and is therefore flawed.
- The SA ignores the very special circumstances required to remove land from the Green Belt.
- The assessment process is inaccurate and ineffective.
- Other sites should score better and should be removed from Green Belt and allocated.
- The SA is too complex and inaccessible.
- The SA should have assessed parts of sites.

PR 44 – Habitats Regulations Assessment Screening Report – June 2017

- The Plan provides no explanation of why proposed allocations will not lead to an impact on Oxford Meadows SAC and does not reference the potential for in-combination effects. It relies on mitigating effects of the Plan, rather than avoiding them, contrary to the mitigation hierarchy in the NPPF.

PR 48 - Equalities Impact Assessment Screening

- There is no reference to site policies only development management policies.

PR 51 - Landscape Character Sensitivity and Capacity Assessment

- The quality of analysis and assessment is questionable.
- The various conclusions are not tabulated, and hence the step wise process is opaque.
- Analysis often goes beyond analysis of landscape capacity with little or no justification.
- There are numerous seemingly contradictory statements.
- Maps presented in Appendix E are highly inaccessible.
- No account is taken of nearby sensitivities.
- The LCSCA refers to the linear nature of the railway line not lending itself to residential development. Claimed that this linear part of the site is intended to work with the remainder of the Shipton Quarry and as such provides a potential boundary, travel route, recreation area etc. The Illustrative masterplan (included at Appendix 2) demonstrates how the whole site can accommodate residential development in a manner that is sympathetic to its surroundings.

PR 53 - Sequential Test and Exception Test (Flooding) – June 2017

- The report fails to demonstrate that proposed allocation PR8 is sequentially preferable to other options despite the flood risk.

PR 54 - Housing and Economic Land Availability Assessment (HELAA) - August 2017

- The HELAA has not been applied as an initial first step to inform site selection and this explains why it was only made available subsequent to the start of the consultation and in draft form only.
- The role of the HELAA has not been communicated well and has caused considerable confusion.
- General disagreement with the Council's site analysis and conclusions in the HEELA.
- The Government's new Local Authority Housing needs formula should inform the HEELA.
- The report should be more protective of rural settlement areas with a wording change to prioritise infilling and utilise brownfield land.
- Bloxham Parish Council - With regard to promoted land north and south of Milton Road, Bloxham, the draft HELAA has assessed this site as suitable for 'approximately 61 dwellings subject to more detailed consideration'. Taylor Wimpey's blog suggests the site could accommodate 250 homes which would be contrary to planning policy.

PR 71 - Draft Cherwell Water Cycle Study

- It is not clear that the study was completed in time to inform consideration of options/formulation of the preferred strategy and SA.
- EA – Clarification needed to show that there will be no deterioration in the water quality for the receiving watercourses as a result of the extra growth in housing numbers the Plan.

Officer Response

Officers are of the view that, in accordance with the NPPF, the proposed Plan is based on, adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. The Plan seeks to ensure an integrated approach to the provision of housing by planning to meet the needs of Oxford within a Cherwell context and within shared economic circumstances. It seeks to respond to relevant market and economic signals (for example, see Cherwell Strategic Economic Growth Study- evidence doc. PR41). Evidence cannot be produced in anticipation of all issues but, as required by the NPPF, it is proportionate. Where required by the statutory bodies updates to the evidence base have been sought.

The evidence base supporting the Plan is published on-line at <https://www.cherwell.gov.uk/info/112/evidence-base/369/local-plan-part-1-partial-review---evidence-base>. The Sustainability Appraisal (Appendices 5-7) includes an account of the most relevant evidence base that has informed the Appraisal process.

Evidence was initially gathered through the Oxfordshire Growth Board to support the examination of Oxford's unmet housing need and its apportionment. It continued through the issues and options stages of plan development to the production of the Proposed Submission document. Strategies, studies and assessments have informed the shaping of the Plan's vision, objectives and policies. They have sometimes, necessarily, informed each other (for example the Transport Assessment informing the Sustainability Appraisal). At each stage (issues, options and proposed submission) the consideration of representations has informed the Plan's development. Officers are of the view that the evidence gathering process has been robust, objective, proportionate and informative.

On some matters, it has been necessary to continue with evidence refinement or the production of supplemental evidence in response to representations received / issues raised.

Appendix 1

Public Notice and Statement of Representation Procedure

LOCAL PLAN DOCUMENTS AVAILABLE FOR INSPECTION

Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Need - Proposed Submission Documents

Cherwell District Council has prepared a proposed local plan to provide for additional development to help meet Oxford's unmet housing need.

The following documents are available for inspection and comment from **Monday 17 July 2017 to 5pm on Tuesday 29 August 2017**:

1. The local plan which the Council proposes to submit to the Secretary of State for Communities and Local Government
2. Policies maps showing the changes that would be made to the adopted policies map for the district
3. A sustainability appraisal report of the local plan
4. A statement of consultation setting out:
 - i. the bodies and persons previously invited to make representations
 - ii. how those bodies and persons were invited to make such representations
 - iii. a summary of the main issues raised by those representations, and
 - iv. how those main issues have been addressed in the Local Plan
5. Other supporting documents relevant to the preparation of the local plan
6. A statement of the procedure for making representations

LOCAL PLAN DOCUMENTS AVAILABLE FOR INSPECTION

Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Need - Proposed Submission Documents

Cherwell District Council has prepared a proposed local plan to provide for additional development to help meet Oxford's unmet housing need.

THE CONSULTATION PERIOD HAS BEEN EXTENDED

The following documents are available for inspection and comment from **Monday 17 July 2017 to 5pm on Tuesday 10 October 2017**.

1. The local plan which the Council proposes to submit to the Secretary of State for Communities and Local Government
2. Policies maps showing the changes that would be made to the adopted policies map for the district
3. A sustainability appraisal report of the local plan
4. A statement of consultation setting out:
 - i. the bodies and persons previously invited to make representations
 - ii. how those bodies and persons were invited to make such representations
 - iii. a summary of the main issues raised by those representations, and
 - iv. how those main issues have been addressed in the Local Plan
5. Other supporting documents relevant to the preparation of the local plan
6. A statement of the procedure for making representations

Dear Sir/Madam

Notification of Cherwell District Council Planning Policy Consultation

Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Need – Availability of Proposed Submission Documents for Inspection

I write to notify you that Cherwell District Council is publishing a proposed Local Plan and supporting documents for inspection and submitting comments.

The documents are available from Monday 17 July 2017 and comments should be received no later than 5pm on Tuesday 29 August 2017.

Please find enclosed a copy of a 'Statement of the Representations Procedure' which states where and when the documents can be viewed and how to submit representations. We have also arranged a number of public exhibitions, the details of which are provided overleaf.

You have been sent this notification as your contact details are on our Local Plan database. If you no longer wish to be informed of our planning policy consultations then please let us know by telephoning 01295 227985 or by emailing planning.policy@cherwell-dc.gov.uk.

Please note that we have a separate email address for consultation responses. This is PlanningPolicyConsultation@cherwell-dc.gov.uk. Hard copies can still be posted.

Yours faithfully

David Peckford

Dear Sir/Madam

Notification of Extended Cherwell District Council Planning Policy Consultation

Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Need

I write to notify you that Cherwell District Council is extending the period for receiving representations on the Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Need – Proposed Submission Plan – July 2017 until **5pm on 10 October 2017**.

This is to allow more time for comments to be received in view of the public interest in the proposals. Please find enclosed a copy of a revised 'Statement of the Representations Procedure' which states where and when the documents can be viewed and how to submit representations. Please note that the Council's Housing and Economic Land Availability Assessment (HELAA) will be available on-line from Friday 25 August 2017. An interim statement on open space, sport and recreation will also be published at that time.

Comments should be received no later than 5pm on Tuesday 10 October 2017. If comments have already been made additional comments will also be accepted. **Please note that the email address for consultation responses is PlanningPolicyConsultation@cherwell-dc.gov.uk.** Hard copies can still be posted.

There is one public exhibition still to be held on **Thursday 17 August 2017 - 4pm to 8pm at Exeter Hall, Oxford Road, Kidlington, OX5 1AB.**

SUBMITTING REPRESENTATIONS/COMMENTS

Comments on the documents should be sent:

By email to: PlanningPolicyConsultation@cherwell-dc.gov.uk

Or by post to:

Planning Policy Consultation, Planning Policy Team, Strategic Planning and the Economy
Cherwell District Council, Bodicote House, Bodicote, Banbury, OX15 4AA.

A representation form is available on-line. A hard copy can be provided by telephoning 01295 227985.

Comments should be received no later than 5pm on Tuesday 10 October 2017.

Any comments received will be made publicly available.

You should receive a written acknowledgement. Email acknowledgements will be sent automatically by return. Acknowledgements by post should be received within five working days of your response being received. If you do not receive a written acknowledgement, please contact the Planning Policy Team on 01295 227985.

In making comments, you may request to be notified at your specified email or postal address of the submission of the local plan for independent examination, of the publication of the recommendations of the person appointed to carry out the examination, and of the adoption of the local plan.

Subject: Notification of Extended Cherwell District Council Planning Policy Consultation
Attachments: Statement of the Representations Procedure.pdf

3 August 2017

Dear Sir/Madam

Notification of Extended Cherwell District Council Planning Policy Consultation

Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Need

I write to notify you that Cherwell District Council is extending the period for receiving representations on the Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Need – Proposed Submission Plan – July 2017 until **5pm on 10 October 2017**.

This is to allow more time for comments to be received in view of the public interest in the proposals. Please find attached a copy of a revised 'Statement of the Representations Procedure' which states where and when the documents can be viewed and how to submit representations. Please note that the Council's Housing and Economic Land Availability Assessment (HELAA) will be available on-line from Friday 25 August 2017. An interim statement on open space, sport and recreation will also be published at that time.

Comments should be received no later than 5pm on Tuesday 10 October 2017. If comments have already been made additional comments will also be accepted. **Please note that the email address for consultation responses is PlanningPolicyConsultation@cherwell-dc.gov.uk.** Hard copies can still be posted.

There is one public exhibition still to be held on **Thursday 17 August 2017 - 4pm to 8pm at Exeter Hall, Oxford Road, Kidlington, OX5 1AB.**

Yours faithfully

David Peckford

David Peckford
Deputy Manager - Planning Policy and Growth Strategy

Proposed Submission Plan - Summary Booklet

Page 1807

July 2017

The adopted Cherwell Local Plan Part 1 plans for growth to fully meet Cherwell’s development needs to 2031. It also commits to a ‘Partial Review’ of the Plan to help Oxford meet its unmet housing need. We have previously consulted on the issues and options involved in preparing the Partial Review and we also made a ‘call for sites’. We are now consulting on our Proposed Submission Plan.

This booklet provides a summary of the proposed Plan – its background, vision, objectives, strategy and policies. It highlights the sites that are proposed for development.

As this is only a summary, we recommend that the full Plan is read. It can be viewed along with supporting documents at: www.cherwell.gov.uk/planningpolicyconsultation. It is also available at Cherwell District Council offices, other locations across the district, and at selected locations in Oxford and West Oxfordshire (see p32).

We would like to know what you think of our proposed Plan. Details of public exhibitions and on how to comment are provided at the end of this booklet.

Some planning terms shown in **bold italics** are explained at the end of this booklet.

Background to the Partial Review

The **Oxfordshire Strategic Housing Market Assessment** (2014) indicates that there is a very high level of housing need to be met across the county. The adopted Cherwell Local Plan allocates land for growth to meet the level of housing need identified for Cherwell district. The Government’s **National Planning Policy Framework** and the statutory **Duty to Cooperate** require local authorities to work together to meet development requirements which cannot be met within their own areas.

Paragraph B.95 of the existing Cherwell Local Plan commits the council to seek to address the unmet housing needs arising from elsewhere in the **Oxfordshire Housing Market Area**, particularly Oxford.

This Partial Review of the Local Plan is effectively an addendum to the existing Local Plan. It will sit alongside it and form part of the statutory Development Plan for the district. It is supported by evidence, community and stakeholder engagement and detailed assessments.

The Partial Review is not a wholesale review of the existing Local Plan. It focuses specifically on how to accommodate additional housing and associated infrastructure within Cherwell in order to help meet Oxford's housing need.

Oxford's Unmet Housing Need

The Oxfordshire local authorities have worked together for some time through the **Oxfordshire Growth Board** to identify how Oxford's unmet housing need might best be distributed across the county.

Oxford has a need for about 28,000 homes to be provided from 2011 to 2031.

On 26 September 2016, the Oxfordshire Growth Board decided that Oxford's agreed, unmet housing need (some 15,000 homes) should be apportioned to the Oxfordshire districts as follows:

District	Apportionment – No. of Homes (Net)
Cherwell	4400
Oxford	550
South Oxfordshire*	4950
Vale of White Horse	2200
West Oxfordshire	2750
Total	14,850

**Note: South Oxfordshire District Council did not agree to the apportionment*

Cherwell District Council must test whether a housing requirement of 4,400 dwellings would be appropriate for Cherwell and can be sustainably delivered through its statutory Local Plan process. This consultation is part of that process.

Context for Preparing the Plan

Oxfordshire Context

- The growth of Oxford and countywide planning
- The designation of the Oxford Green Belt to limit Oxford's outward growth
- The economic growth of the county and housing need
- The Oxfordshire Strategic Economic Plan
- The Local Transport Plan (LTP)

Oxford Context

- Development pressures
- Huge demand for market housing
- Pressing need for affordable housing
- Need to support key employment sectors
- Development constraints, scarcity of and competition for land
- Historic environment
- Green Belt
- Oxford Transport Strategy (LTP)
- Relationship between Cherwell and Oxford

Cherwell Context

- Existing communities
- Natural and historic environment
- Local identity
- Traffic and transport
- Delivery of the existing Local Plan strategy

Wider Context

- Growth and planning in West Oxfordshire and Aylesbury
- Constraints such as historic and natural environment and transport
- Oxford-Milton Keynes - Cambridge Corridor

The Oxford Green Belt

The Green Belt provides a generally open setting to the urban area of Oxford and has prevented coalescence with neighbouring towns and villages. It has presented a major constraint on the city's expansion together with the floodplain and sensitive ecological and historical areas.

Land can only be released from the Green Belt through a Local Plan if 'exceptional circumstances' are demonstrated.

The Five Green Belt Purposes

- To check the unrestricted sprawl of large built-up areas;
- To prevent neighbouring towns merging into one another;
- To assist in safeguarding the countryside from encroachment;
- To preserve the setting and special character of historic towns; and
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Our Vision for Meeting Oxford's Unmet Housing Needs

The evidence we have gathered and the consultation feedback we have received, have shaped our proposed vision for meeting Oxford's unmet housing needs.

The vision responds to the specific needs and growth of Oxford, the relationship between housing and employment, and the importance of building sustainable communities that are well related to Oxford and respect the Cherwell context.

Vision for Meeting Oxford's Unmet Housing Needs in Cherwell

To provide new development that meets Oxford's agreed, identified housing needs, supports the city's world-class economy, universities and its local employment base, and ensures that people have convenient, affordable and sustainable travel opportunities to the city's places of work, study and recreation, and to its services and facilities. This development will be provided so that it:

- i. creates balanced and sustainable communities
- ii. is well connected to Oxford
- iii. is of exemplar design which responds distinctively and sensitively to the local built, historic and environmental context
- iv. is supported by necessary infrastructure
- v. provides for a range of household types and incomes reflecting Oxford's diverse needs
- vi. contributes to improving health and well-being, and
- vii. seeks to conserve and enhance the natural environment.

Do you support
this vision?

Our Objectives for Achieving the Vision

The existing Cherwell Local Plan provides fifteen strategic objectives for Cherwell (SO1 to SO15) in the interest of developing a sustainable local economy, for building sustainable communities and for ensuring sustainable development.

We have developed an additional four objectives to specifically achieve the vision for accommodating housing development for Oxford's needs.

Strategic Objective SO16

To work with Oxford City Council and Oxfordshire County Council, and other neighbouring authorities as required, in delivering Cherwell's contribution to meeting Oxford's unmet housing needs with its required infrastructure by 2031.

Strategic Objective SO17

To provide Cherwell's contribution to meeting Oxford's unmet housing needs so that it supports the projected economic growth which underpins the agreed Oxfordshire Strategic Housing Market Assessment 2014 and the local economies of Oxford and Cherwell

Do you
support these
Strategic
Objectives?

Strategic Objective SO18

To provide housing for Oxford so that it substantively provides affordable access to new homes for those requiring 'affordable' housing, new entrants to the housing market, key workers and those requiring access to Oxford's key employment areas, and to provide well designed development that responds to both needs and the local context.

Strategic Objective SO19

To provide Cherwell's contribution to meeting Oxford's unmet housing needs in such a way that it complements the County Council's Local Transport Plan, including where applicable, its Oxford Transport Strategy and so that it facilitates demonstrable and deliverable improvements to the availability of sustainable transport for access to Oxford.

Options Considered in Preparing the Plan

We have examined and consulted upon nine “Areas of Search” in preparing the Plan. They are shown on Figure 1. We considered whether these were suitable for accommodating development for Oxford’s needs individually and in combination:

Option A Kidlington and Surrounding Area

Option B North and East of Kidlington

Option C Junction 9, M40

Option D Arccott

Option E Bicester and Surrounding Area

Option F Former RAF Upper Heyford and Surrounding Area

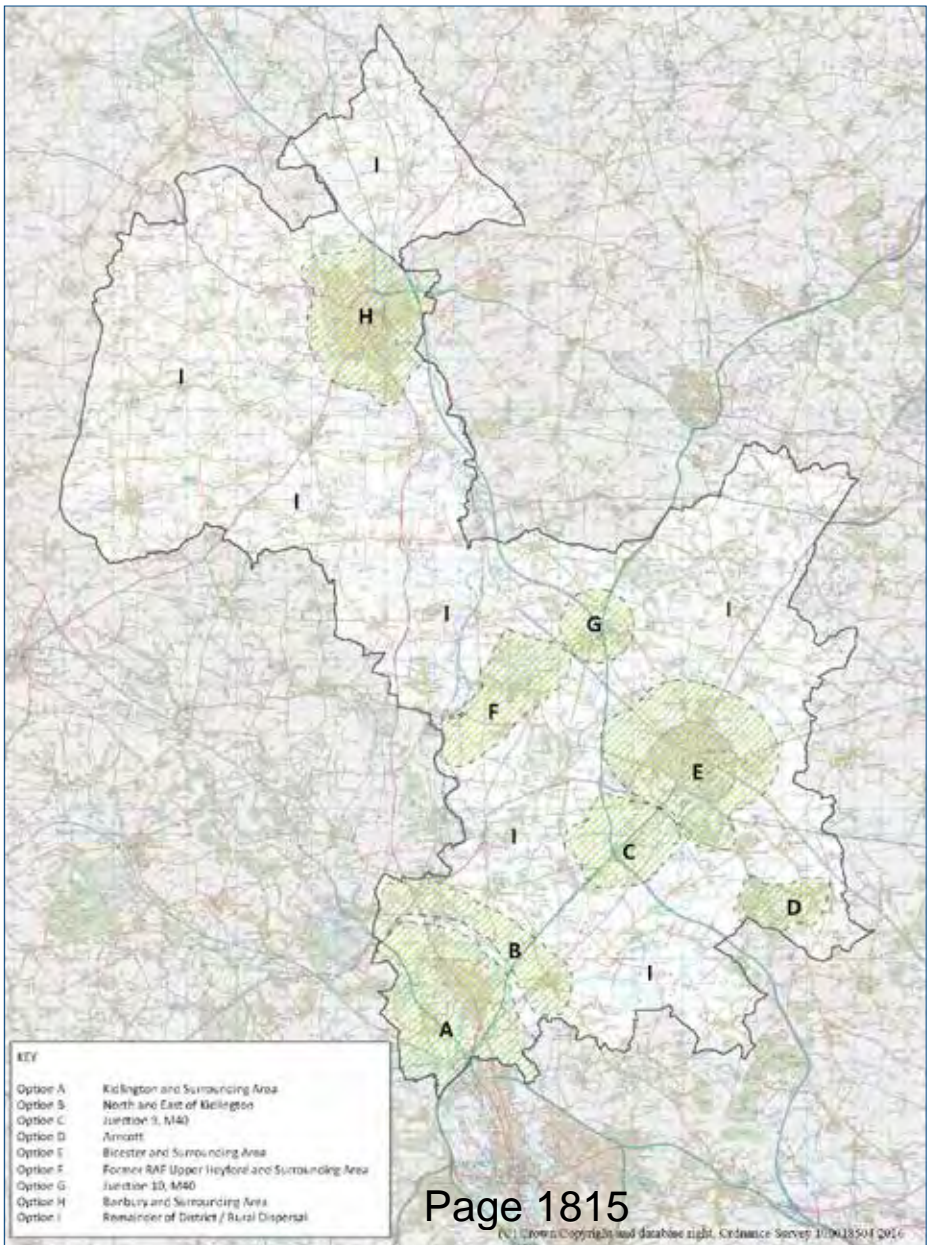

Option G Junction 10, M40

Option H Banbury and Surrounding Area

Option I Remainder of District / Rural Dispersal

Within these Areas of Search were a possible 147 sites each comprising at least two hectares of land.

Figure 1: The Areas of Search Considered

The Rejected Areas of Search

Options C to I were rejected as being unsuitable for meeting Oxford's needs having regard to our evidence base (including a Sustainability Appraisal) and the outcome of consultation and engagement.

The reasons for this are as follows:

Reasons for Rejecting Options C to I

- they were less well situated to build communities associated with Oxford
 - they were less well situated to assist with the delivery of the Oxford Transport Strategy, in terms of existing sustainable travel connectivity and the opportunity for sustainable commuter travel behaviour
 - they were more likely to result in a higher level of commuting to Oxford by private motor vehicle
 - they were likely to result in less affordable transport options for accessing Oxford for potential occupiers of affordable and low cost housing
-
- Do you agree with these reasons?
- more dispersed options provided less opportunity for strategic infrastructure investment (e.g. transport and education)
 - the likelihood that significant additional development could not be built at Bicester, Banbury and former RAF Upper Heyford by 2031 in addition to that in the existing Local Plan

The Selected Areas of Search

Option A (Kidlington and Surrounding Area) and **Option B** (North and East of Kidlington) were considered suitable to meet Oxford's needs and able to deliver the vision and objectives underpinning the Partial Review. The reasons for this are shown on the next page.

Do you agree with these reasons?

Reasons for Selecting Options A and B

- the proximity to Oxford, the existing availability of public transport and the opportunity to maximise the use of sustainable and affordable transport in accessing Oxford's key employment areas and services and facilities
- the opportunity to achieve an overall, proportionate reduction in reliance on the private motor vehicle in accessing Oxford's key employment areas and services and facilities and to achieve further investment in sustainable transport infrastructure
- the deliverability of sustainable transport improvements in comparison to other Areas of Search
- relationship of existing communities to Oxford
- existing economic relationship between the areas of search and Oxford
- the opportunity to provide affordable homes to meet Oxford's identified need close to the source of that need

It was also considered that these options would not significantly undermine the delivery of the development strategy for meeting Cherwell's needs set out in the existing Local Plan.

Site Options within Areas A and B

41 sites within Areas of Search A and B were assessed for inclusion in the Plan. We considered evidence and feedback from consultation. We prepared a **Habitats Regulations Assessment** and a **Sustainability Appraisal** to help consider the likely effects of development and the

cumulative effects of growth. Sites were considered for their suitability in meeting the Plan's vision and objectives. Sites within the Green Belt were only taken forward in the absence of other suitable alternatives.

The Strategy for North Oxford, Kidlington and the A44 Corridor

Our development strategy to meet the vision and objectives is based on

- a coherent, joined-up approach
- prioritising the need for development to be well connected to Oxford
- the need for development to be related to the area of the district that has the strongest economic and social relationships with Oxford
- the need for development to be fully integrated with the County Council's sustainable transport policies
- grasping the opportunities for distinctive place-shaping
- provide a consolidated approach to green infrastructure
- achieving net gains in biodiversity
- not undermining the strategy of the existing Local Plan
- not undermining the delivery of growth already planned at Bicester, Banbury and Former RAF Upper Heyford.

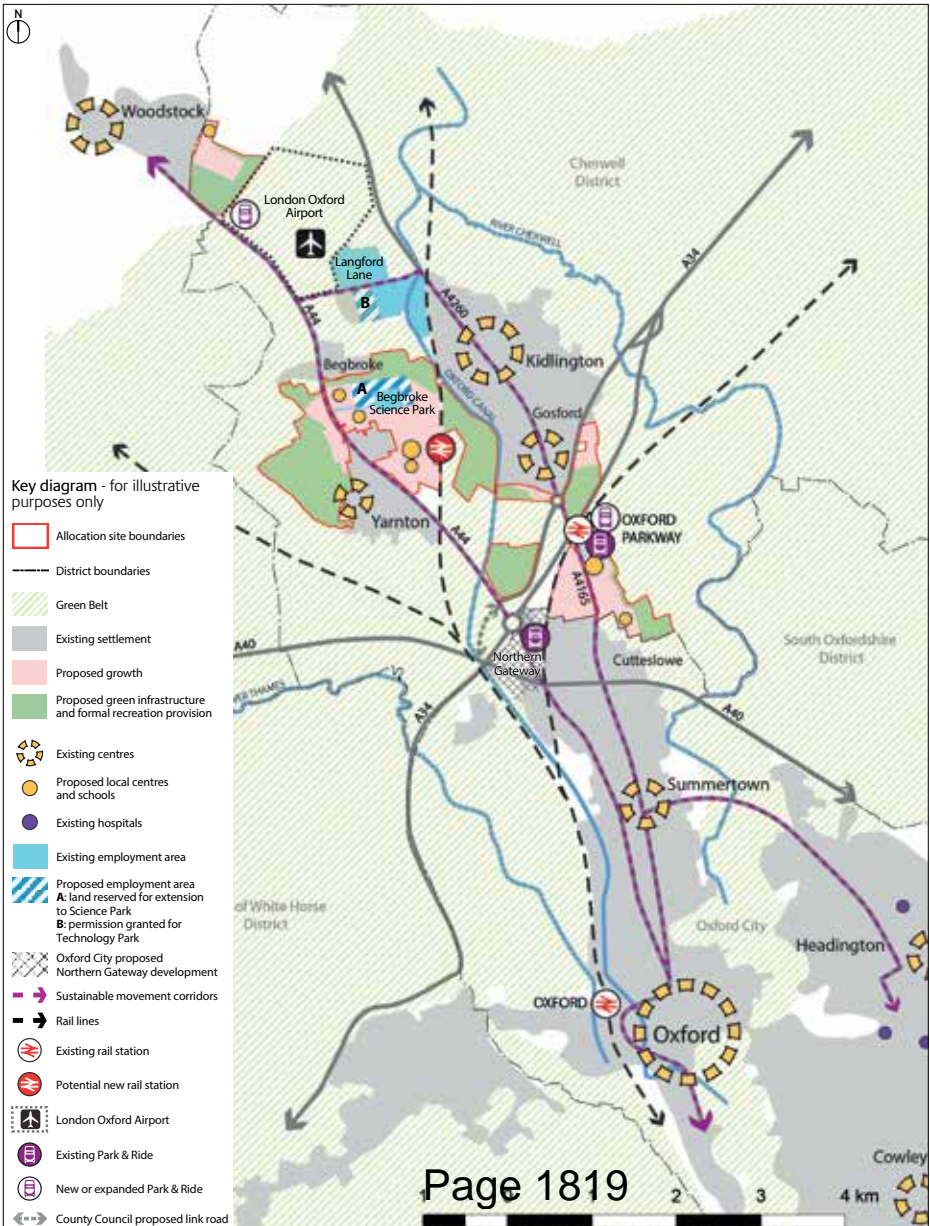

Our new strategy is Oxford specific - to provide homes where people can most readily connect to Oxford and sustainably access the city's employment areas, its universities, its services and facilities and its places of recreation.

To do this, our Plan focuses development in the area immediately north of Oxford, to the south of Kidlington and along the A44 Corridor (see Figure 2).

This directly affects the Cherwell parishes of Gosford and Water Eaton, Kidlington, Yarnton, Begbroke and Shipton-on-Cherwell and Thrupp and neighbouring communities in north Oxford and at Woodstock in West Oxfordshire.

Figure 2: Key Diagram - The Strategy Illustrated

Proposed Strategic Development Sites

We believe that the strategic development sites we have selected best achieve the Plan’s vision and objectives and will achieve sustainable development. The sites are listed below:

Area	Policy / Site	No. of Homes
North Oxford	Policy PR6a – Land East of Oxford Road	650
	Policy PR6b – Land West of Oxford Road	530
	Policy PR6c – Land at Frieze Farm	-
Kidlington	Policy PR7a – Land South East of Kidlington	230
	Policy PR7b – Land at Stratfield Farm	100
Begbroke	Policy PR8 – Land East of the A44	1950
Yarnton	Policy PR9 – Land West of Yarnton	530
Woodstock	Policy PR10 – Land South East of Woodstock	410
Total		4400

Proposed Policies for Delivering the Vision and Objectives

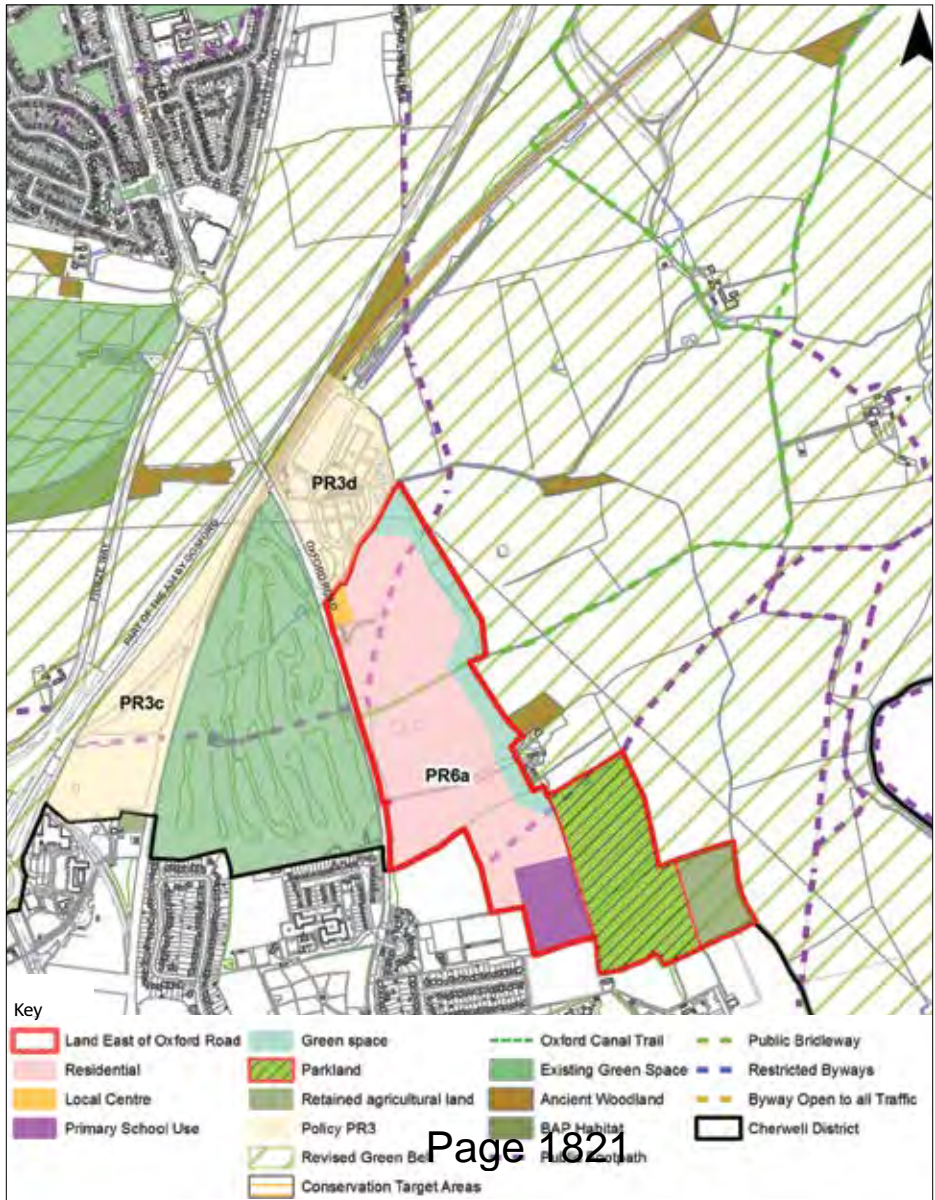

We have also developed policies to ensure that development meets our objectives and achieves sustainable development.

Policy PR1	- deliver the required homes and achieve sustainable development
Policy PR2	- deliver a mix, tenure and size of homes to meet needs
Policy PR3	- allow for exceptional changes to the Green Belt
Policy PR4a	- support affordable and sustainable transportation to Oxford
Policy PR4b	- strengthen Kidlington centre through transport improvements
Policy PR5	- a consolidated and integrated approach to green infrastructure
Policy PR11	- ensure infrastructure delivery
Policy PR12a	- ensure the delivery of sites and maintain housing supply
Policy PR12b	- dealing with sites not allocated in the Plan
Policy PR13	- monitoring and securing delivery

Key Site Proposals

Policy PR6a – Land East of Oxford Road

Policy PR6a – Land East of Oxford Road

Location: Gosford and Water Eaton Parish, South of the A34, North of Cuttleslowe (Oxford)

Key Proposals:

- integrated urban extension to Oxford
- contemporary design
- 650 homes
- 50% affordable housing
- primary school
- local centre – retail, business, café/restaurant, community building, opportunity for health facilities
- formal sports, play areas and allotments
- public green space / extension to Cuttleslowe Park
- wildlife habitats
- green infrastructure network
- net biodiversity gains
- pedestrian, wheelchair and cycling connectivity
- retention of some agricultural land within the Green Belt
- sustainable travel opportunities
- requirement for a Development Brief and a scheme that responds to the ‘gateway’ location at the edge of Oxford

Policy PR6b – Land West of Oxford Road

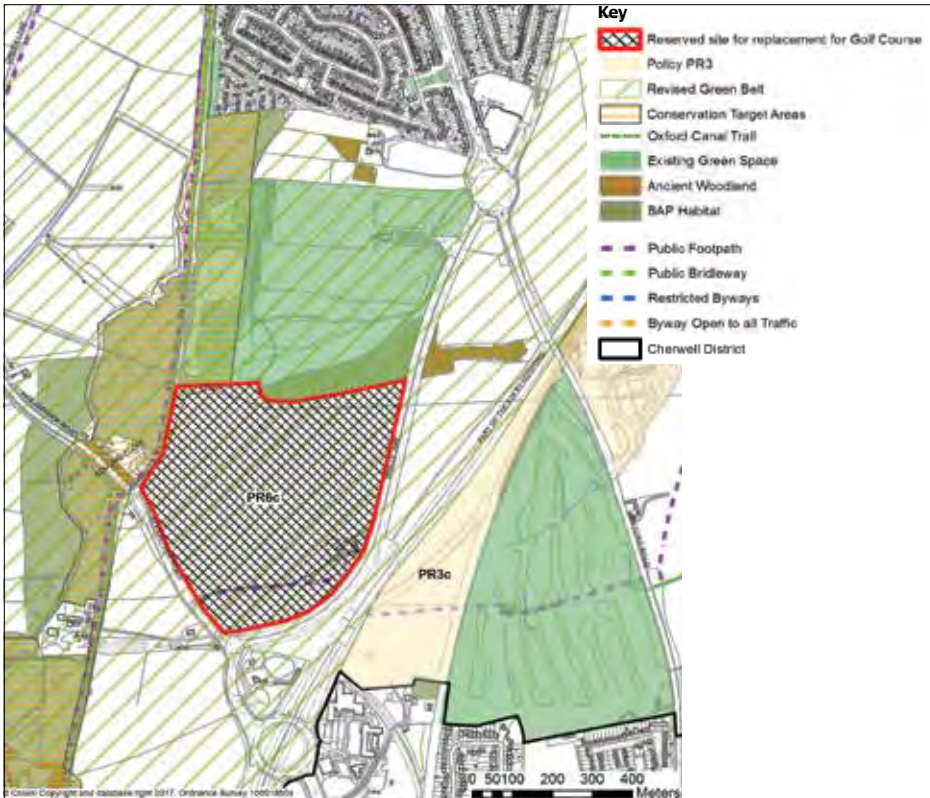

Policy PR6b – Land West of Oxford Road

Location: Gosford and Water Eaton Parish, South of the A34, East of Railway, North of Wolvercote (Oxford)

Key Proposals:

- integrated urban extension to Oxford
- contemporary design
- 530 homes
- 50% affordable housing
- connectivity to land east of Oxford Road and west of the railway
- contributions to delivery of local centre and school to the east of Oxford Road
- formal sports, play areas and allotments
- wildlife corridors
- green infrastructure network
- net biodiversity gains
- scheme for the retention of significant trees, areas of woodland and hedgerows
- pedestrian, wheelchair and cycling connectivity
- sustainable travel opportunities
- requirement for a Development Brief and a scheme that responds to the ‘gateway’ location at the edge of Oxford

Policy PR6c – Land at Frieze Farm

© Crown Copyright and database right 2017. Ordnance Survey 100018504

Policy PR6c – Land at Frieze Farm

Location: Gosford and Water Eaton Parish, North of A34 and Peartree Interchange, Between Kidlington and Oxford

Key Proposals:

- reserved site for potential construction of a golf course
- design principles to respond to landscape and Green Belt setting
- requirement for a development brief
- retention within the Green Belt

Policy PR7a – Land South East of Kidlington

© Crown Copyright and database right 2017. Ordnance Survey 100018504

Policy PR7a – Land South East of Kidlington

Location: Gosford and Water Eaton Parish, Between Kidlington and Water Eaton Lane

Key Proposals:

- integrated extension to Kidlington
- 230 homes
- 50% affordable housing
- extension to Kidlington cemetery
- formal sports provision including modern facilities for the wider community
- green infrastructure network
- play areas and allotments
- wildlife habitats
- woodland planting
- net biodiversity gains
- retention of some land within the Green Belt
- pedestrian, wheelchair and cycling connectivity
- sustainable travel opportunities
- requirement for a Development Brief and to respect the historic development pattern of Water Eaton Lane

Policy PR7b – Land at Stratfield Farm

© Crown Copyright and database right 2017. Ordnance Survey 100018504

© Crown Copyright and database right 2017. Ordnance Survey 100018504

Key			
	Land at Stratfield Farm		Revised Green Belt
	Residential		Ancient Woodland
	Green Space		BAP Habitat
	Nature Conservation Area		Existing Green Space
	Conservation Target		Public Bridleway
	Oxford Canal Trail		Restricted Byways
	Public Footpath		Byway Open to all Traffic
	Cherwell District		

Policy PR7b – Land at Stratfield Farm

Location: Kidlington Parish, South Kidlington, West of Oxford Road

Key Proposals:

- integrated extension to Kidlington
- 100 homes
- 50% affordable housing
- contributions to secure a foot, cycle and wheelchair accessible bridge over the Oxford Canal
- new green link through the site / over the canal
- play areas and allotments and contributions to formal sports
- improvement of orchard for community benefit
- re-creation / restoration of hedgerows and field pattern
- nature conservation area
- wildlife habitats / corridors
- green infrastructure network
- net biodiversity gains
- enhancement of canal corridor
- protection and enhancement of Conservation Target Area
- retention of some land within the Green Belt
- restoration of Grade II Listed Stratfield Farmhouse
- pedestrian, wheelchair and cycling connectivity
- retention of some agricultural land
- sustainable travel opportunities
- requirement for a Development Brief and a high quality landscape setting

Policy PR8 – Land East of the A44

Key

Land East of the A44	Former Landfill Site	Policy PR3	BAP Habitat
Residential	Green Space	Revised Green Belt	Public Footpath
Land Reserved for Employment	Local Nature Reserve	Conservation Target Areas	Public Sideway
Primary School Use	National Conservation Area	Sites of Special Scientific Interest	Restricted Byways
Secondary School Use	Parkland	Oxford Canal Trail	Byway Open to all Traffic
Local Centre	Retained agricultural land	Existing Green Space	Cherwell District
Existing Begbroke Science Park	Reserved Land for Railway Station/Hall	Ancient Woodland	

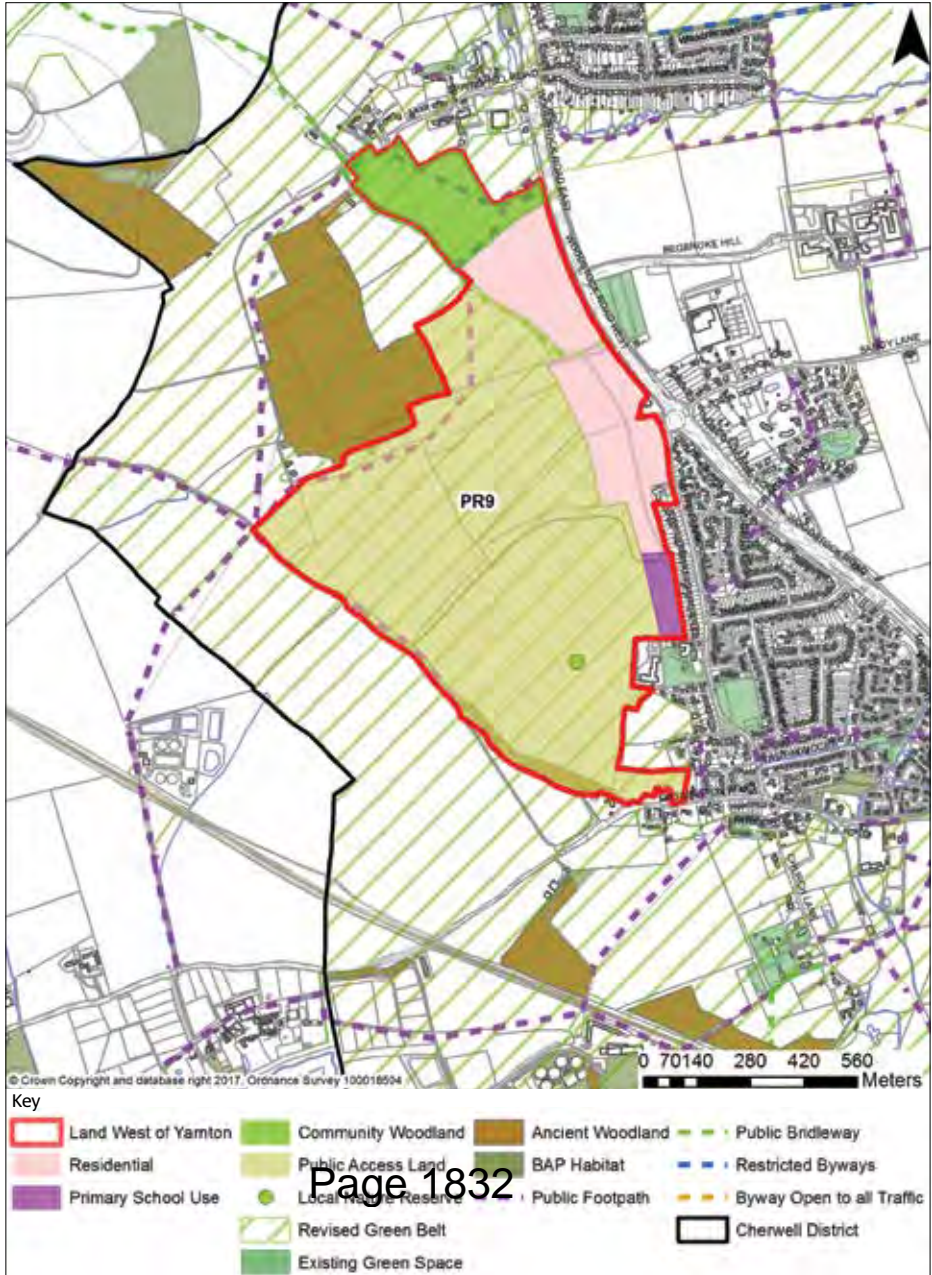

Policy PR8 – Land East of the A44

Location: Yarnton and Begbroke Parishes (small area in Kidlington Parish), Between Yarnton, Begbroke and Kidlington villages

Key Proposals:

- new urban neighbourhood
- 1,950 homes
- 50% affordable housing
- secondary school and primary school(s)
- local centre – retail, business, café/restaurant, community building, opportunity for health facilities
- formal sports and play areas and additional allotments
- Local Nature Reserve along Rowel Brook
- nature conservation area east of the railway
- public open green space / informal canalside parkland
- retention of some agricultural land
- provision for a pedestrian, cycle and wheelchair bridge over the Oxford Canal
- land for future railway halt/station
- land for expansion of Begbroke Science Park
- green infrastructure network
- net biodiversity gains
- improvement of Conservation Target Area (CTA)
- retention of land east of the railway and along Rowel Brook in the Green Belt
- pedestrian, wheelchair and cycling connectivity
- use of Sandy Lane as a green pedestrian, cycle and wheelchair route with railway crossing
- retention of some agricultural land
- sustainable travel opportunities
- remediation and use of landfill site
- requirement for a Development Brief and design which responds to the Science Park and canal location and to historic development of nearby villages

Policy PR9 – Land West of Yarnton

© Crown Copyright and database right 2017. Ordnance Survey 100018504

Policy PR9 – Land West of Yarnton

Location: Yarnton and Begbroke Parishes, North and West of Yarnton, South of Begbroke

Key Proposals:

- integrated extension to Yarnton
- 530 homes
- 50% affordable housing
- land for primary school use
- formal sports, play areas and allotments
- Local Nature Reserve accessible to school
- community woodland
- nature conservation area
- wildlife corridors
- green infrastructure network
- net biodiversity gains
- retention of some land within the Green Belt
- pedestrian, wheelchair and cycling connectivity
- retention of some agricultural land
- sustainable travel opportunities
- requirement for a Development Brief and sensitive approach to topography and landscape character

Policy PR10 – Land South East of Woodstock

Policy PR10 – Land South East of Woodstock

Location: Shipton-on-Cherwell and Thrupp Parish. Adjoins West Oxfordshire boundary, South-east of Woodstock, North of Bladon/ East of Blenheim

Key Proposals:

- integrated extension to Woodstock
- 410 homes
- 50% affordable housing
- provision for school facilities
- provision of a community facility
- formal sports, play areas and allotments
- community woodland
- retention of some land in agricultural use
- nature conservation area
- wildlife habitats/corridors
- green infrastructure network
- net biodiversity gains
- pedestrian, wheelchair and cycling connectivity
- sustainable travel opportunities
- requirement for a Development Brief. A scheme that clearly responds to the internationally and nationally significant heritage and proximity of Blenheim Palace and Blenheim Park and their public approaches. A scheme that enhances the built-up edge of Woodstock

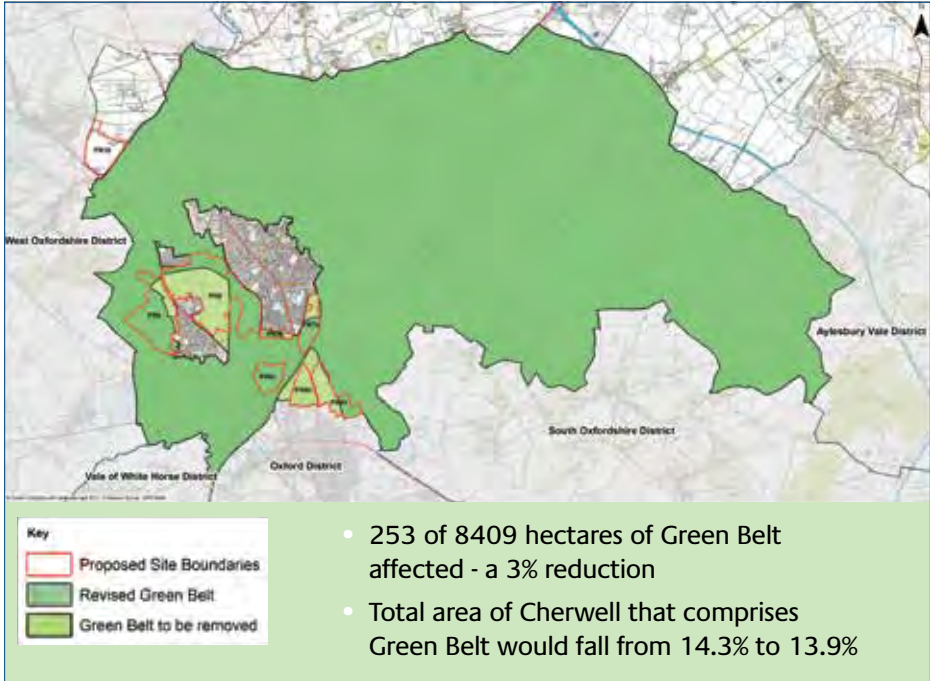

Do you agree with these reasons?

Exceptional Circumstances for Development in the Green Belt

All of the sites we have identified, other than land to the south-east of Woodstock, lie within the Oxford Green Belt. While our proposed policies seek to retain Green Belt land and protect it where possible, we consider that there are exceptional circumstances for the removal of land for development from the Green Belt. In brief these are:

- Oxford's urgent and pressing housing need
- the clear inability for Oxford to fully meet its own needs
- the absence of sustainable, deliverable and appropriate alternative sites
- the relationships between existing communities and the proposed development areas and Oxford
- the relationship of the proposed development areas to Oxford's Northern Gateway site, the University of Oxford's Begbroke Science Park, London-Oxford Airport and the Langford Lane area of Kidlington and the role of these areas in generating housing need
- the unique place shaping potential of land in the vicinity of the University of Oxford's Begbroke Science Park and Oxford canal
- the need for a cautious approach on land outside the Green Belt at Woodstock due to the presence of international and national heritage assets
- the improvement of transport infrastructure in the north Oxford / A44 / A4260 corridor areas
- the strengthening of Kidlington village centre related to sustainable transport improvements
- the opportunity for improvements to the quantity and quality of new public open space, green infrastructure, sport and recreation facilities and in terms of access to the countryside
- the ability to create a sustainable, joined-up vision for the whole of the north Oxford / Kidlington / A44 corridor area

Figure 3: Proposed Changes to the Green Belt

Have your say

Have your say

The Proposed Submission Plan and supporting documents are available at www.cherwell.gov.uk/planningpolicyconsultation
Forms and guidance for making your comments are also available.

Comments can be made from Monday 17 July 2017 until 5pm on Tuesday 29 August 2017.

Your comments should refer specifically to the Plan. This booklet has only been produced as a guide. You may also wish to consider whether or not the Plan is 'sound' i.e. positively prepared, justified, effective and consistent with national policy.

The Plan is accompanied by a Sustainability Appraisal Report on which comments are also invited.

Copies of the consultation documents are available to view at public libraries across Cherwell, at the council's Linkpoints at Banbury, Bicester and Kidlington, at Banbury and Bicester Town Councils and Cherwell District Council's main office at Bodicote House, Bodicote, Banbury.

In Oxford, hard copies are available at the Oxford City Council offices at St.Aldate's Chambers, at Central Library (presently at 41 Castle Quarter) and at Old Marston and Summertown Libraries. In West Oxfordshire, hard copies are available at the District Council Offices at New Yatt Road, Witney, Woodstock Town Council offices, and at Woodstock Library.

You should receive a written acknowledgement. Email acknowledgements will be sent automatically by return.

Acknowledgements by post can be expected within five working days of your response being received.

If you do not receive a written acknowledgement, please contact the Planning Policy team on 01295 227985 to ensure that your comments have been received.

Any comments received will be made publicly available.

Staffed Exhibitions

Wednesday 19 July 2017 - 4pm to 8pm

Shipton-on-Cherwell Village Hall, Shipton-on-Cherwell, Kidlington, OX5 1JP

Friday 21 July 2017 - 4pm to 8pm

Yarnton Village Hall, The Paddocks, Yarnton, Kidlington, OX5 1TE

Thursday 27 July 2017 - 4pm to 8pm

Woodstock Community Centre, 32 New Road, Woodstock, OX20 1PB

Tuesday 1 August 2017 - 3.30pm to 7.30pm

Cuttleslowe Pavillion (next to the café), Cuttleslowe Park, Oxford

Wednesday 2 August 2017 - 4pm to 8pm

Begbroke Village Hall, 3 Begbroke Lane, Begbroke, Kidlington OX5 1RN

Thursday 17 August 2017 - 4pm to 8pm

Exeter Hall, Oxford Road, Kidlington, OX5 1AB

Next Steps

Following consultation on the Plan, it will be submitted to the Secretary of State for independent examination by a Planning Inspector. Your comments will be submitted to the Planning Inspector for consideration.

The purpose of the examination is to consider whether the Local Plan is legally compliant and 'sound' (positively prepared, justified, effective and consistent with national policy). Your comments should therefore refer to those matters.

The main stages for the Plan after this consultation are:

- Submission to Government (Regulation 22)
- Independent Examination (Regulation 24)
- Publication of the Planning Inspector's recommendations (Regulation 25)
- Adoption by the council (Regulation 26)

Glossary of Terms

Duty to Cooperate – a legal duty introduced by the Localism Act 2011. In preparing Local Plans, Local Authorities must engage constructively, actively and on an on-going basis.

Habitat Regulations Assessment (HRA) - HRA is required under the European Directive 92/43/ECC on the 'conservation of natural habitats and wild fauna and flora for plans' that may have an impact on European (Natura 2000) Sites. HRA is an assessment of the impacts of implementing a plan or policy on a Natura 2000 site.

National Planning Policy Framework - national policy produced by the Government to be followed in preparing Local Plans and determining planning applications.

Oxfordshire Growth Board - a joint committee of local authorities in Oxfordshire and including other non-voting members. Through the Oxfordshire Growth Board the Oxfordshire authorities are working together under the legal 'Duty to Cooperate'.

Oxfordshire Housing Market Area - the sub-regional housing market that Cherwell falls within. It includes the whole of the county of Oxfordshire.

Oxfordshire Strategic Housing Market Assessment - a study produced in 2014 by consultants on behalf of the Oxfordshire local authorities which contains an 'objective' assessment of housing needs across Oxfordshire. It is objective in that it does not apply constraints to the level of need.

Sustainability Appraisal - the process of assessing the economic, social and environmental effects of a proposed plan. This process implements the requirements of a European Directive. Required to be undertaken for all Local Plans.

Cherwell Local Plan 2011 – 2031 (Part 1)

Partial Review – Oxford's Unmet Housing Need

your place • your space
your say

Proposed Submission Plan - Summary Booklet

Page 1843

July 2017 (Updated)

The adopted Cherwell Local Plan Part 1 plans for growth to fully meet Cherwell’s development needs to 2031. It also commits to a ‘Partial Review’ of the Plan to help Oxford meet its unmet housing need. We have previously consulted on the issues and options involved in preparing the Partial Review and we also made a ‘call for sites’. We are now consulting on our Proposed Submission Plan.

This booklet provides a summary of the proposed Plan – its background, vision, objectives, strategy and policies. It highlights the sites that are proposed for development.

As this is only a summary, we recommend that the full Plan is read. It can be viewed along with supporting documents at: www.cherwell.gov.uk/planningpolicyconsultation. It is also available at Cherwell District Council offices, other locations across the district, and at selected locations in Oxford and West Oxfordshire (see p32).

We would like to know what you think of our proposed Plan. Details of public exhibitions and on how to comment are provided at the end of this booklet.

Some planning terms shown in **bold italics** are explained at the end of this booklet.

Background to the Partial Review

The **Oxfordshire Strategic Housing Market Assessment** (2014) indicates that there is a very high level of housing need to be met across the county. The adopted Cherwell Local Plan allocates land for growth to meet the level of housing need identified for Cherwell district. The Government’s **National Planning Policy Framework** and the statutory **Duty to Cooperate** require local authorities to work together to meet development requirements which cannot be met within their own areas.

Paragraph B.95 of the existing Cherwell Local Plan commits the council to seek to address the unmet housing needs arising from elsewhere in the **Oxfordshire Housing Market Area**, particularly Oxford.

This Partial Review of the Local Plan is effectively an addendum to the existing Local Plan. It will sit alongside it and form part of the statutory Development Plan for the district. It is supported by evidence, community and stakeholder engagement and detailed assessments.

The Partial Review is not a wholesale review of the existing Local Plan. It focuses specifically on how to accommodate additional housing and associated infrastructure within Cherwell in order to help meet Oxford's housing need.

Oxford's Unmet Housing Need

The Oxfordshire local authorities have worked together for some time through the **Oxfordshire Growth Board** to identify how Oxford's unmet housing need might best be distributed across the county.

Oxford has a need for about 28,000 homes to be provided from 2011 to 2031.

On 26 September 2016, the Oxfordshire Growth Board decided that Oxford's agreed, unmet housing need (some 15,000 homes) should be apportioned to the Oxfordshire districts as follows:

District	Apportionment – No. of Homes (Net)
Cherwell	4400
Oxford	550
South Oxfordshire*	4950
Vale of White Horse	2200
West Oxfordshire	2750
Total	14,850

**Note: South Oxfordshire District Council did not agree to the apportionment*

Cherwell District Council must test whether a housing requirement of 4,400 dwellings would be appropriate for Cherwell and can be sustainably delivered through its statutory Local Plan process. This consultation is part of that process.

Context for Preparing the Plan

Oxfordshire Context

- The growth of Oxford and countywide planning
- The designation of the Oxford Green Belt to limit Oxford's outward growth
- The economic growth of the county and housing need
- The Oxfordshire Strategic Economic Plan
- The Local Transport Plan (LTP)

Oxford Context

- Development pressures
- Huge demand for market housing
- Pressing need for affordable housing
- Need to support key employment sectors
- Development constraints, scarcity of and competition for land
- Historic environment
- Green Belt
- Oxford Transport Strategy (LTP)
- Relationship between Cherwell and Oxford

Cherwell Context

- Existing communities
- Natural and historic environment
- Local identity
- Traffic and transport
- Delivery of the existing Local Plan strategy

Wider Context

- Growth and planning in West Oxfordshire and Aylesbury
- Constraints such as historic and natural environment and transport
- Oxford-Milton Keynes - Cambridge Corridor

The Oxford Green Belt

The Green Belt provides a generally open setting to the urban area of Oxford and has prevented coalescence with neighbouring towns and villages. It has presented a major constraint on the city's expansion together with the floodplain and sensitive ecological and historical areas.

Land can only be released from the Green Belt through a Local Plan if 'exceptional circumstances' are demonstrated.

The Five Green Belt Purposes

- To check the unrestricted sprawl of large built-up areas;
- To prevent neighbouring towns merging into one another;
- To assist in safeguarding the countryside from encroachment;
- To preserve the setting and special character of historic towns; and
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Our Vision for Meeting Oxford's Unmet Housing Needs

The evidence we have gathered and the consultation feedback we have received, have shaped our proposed vision for meeting Oxford's unmet housing needs.

The vision responds to the specific needs and growth of Oxford, the relationship between housing and employment, and the importance of building sustainable communities that are well related to Oxford and respect the Cherwell context.

Vision for Meeting Oxford's Unmet Housing Needs in Cherwell

To provide new development that meets Oxford's agreed, identified housing needs, supports the city's world-class economy, universities and its local employment base, and ensures that people have convenient, affordable and sustainable travel opportunities to the city's places of work, study and recreation, and to its services and facilities. This development will be provided so that it:

- i. creates balanced and sustainable communities
- ii. is well connected to Oxford
- iii. is of exemplar design which responds distinctively and sensitively to the local built, historic and environmental context

- iv. is supported by necessary infrastructure
- v. provides for a range of household types and incomes reflecting Oxford's diverse needs
- vi. contributes to improving health and well-being, and
- vii. seeks to conserve and enhance the natural environment.

Do you support
this vision?

Our Objectives for Achieving the Vision

The existing Cherwell Local Plan provides fifteen strategic objectives for Cherwell (SO1 to SO15) in the interest of developing a sustainable local economy, for building sustainable communities and for ensuring sustainable development.

We have developed an additional four objectives to specifically achieve the vision for accommodating housing development for Oxford's needs.

Strategic Objective SO16

To work with Oxford City Council and Oxfordshire County Council, and other neighbouring authorities as required, in delivering Cherwell's contribution to meeting Oxford's unmet housing needs with its required infrastructure by 2031.

Strategic Objective SO17

To provide Cherwell's contribution to meeting Oxford's unmet housing needs so that it supports the projected economic growth which underpins the agreed Oxfordshire Strategic Housing Market Assessment 2014 and the local economies of Oxford and Cherwell

Strategic Objective SO18

To provide housing for Oxford so that it substantively provides affordable access to new homes for those requiring 'affordable' housing, new entrants to the housing market, key workers and those requiring access to Oxford's key employment areas, and to provide well designed development that responds to both needs and the local context.

Strategic Objective SO19

To provide Cherwell's contribution to meeting Oxford's unmet housing needs in such a way that it complements the County Council's Local Transport Plan, including where applicable, its Oxford Transport Strategy and so that it facilitates demonstrable and deliverable improvements to the availability of sustainable transport for access to Oxford.

Do you support these Strategic Objectives?

Options Considered in Preparing the Plan

We have examined and consulted upon nine “Areas of Search” in preparing the Plan. They are shown on Figure 1. We considered whether these were suitable for accommodating development for Oxford’s needs individually and in combination:

Option A Kidlington and Surrounding Area

Option B North and East of Kidlington

Option C Junction 9, M40

Option D Arccott

Option E Bicester and Surrounding Area

Option F Former RAF Upper Heyford and Surrounding Area

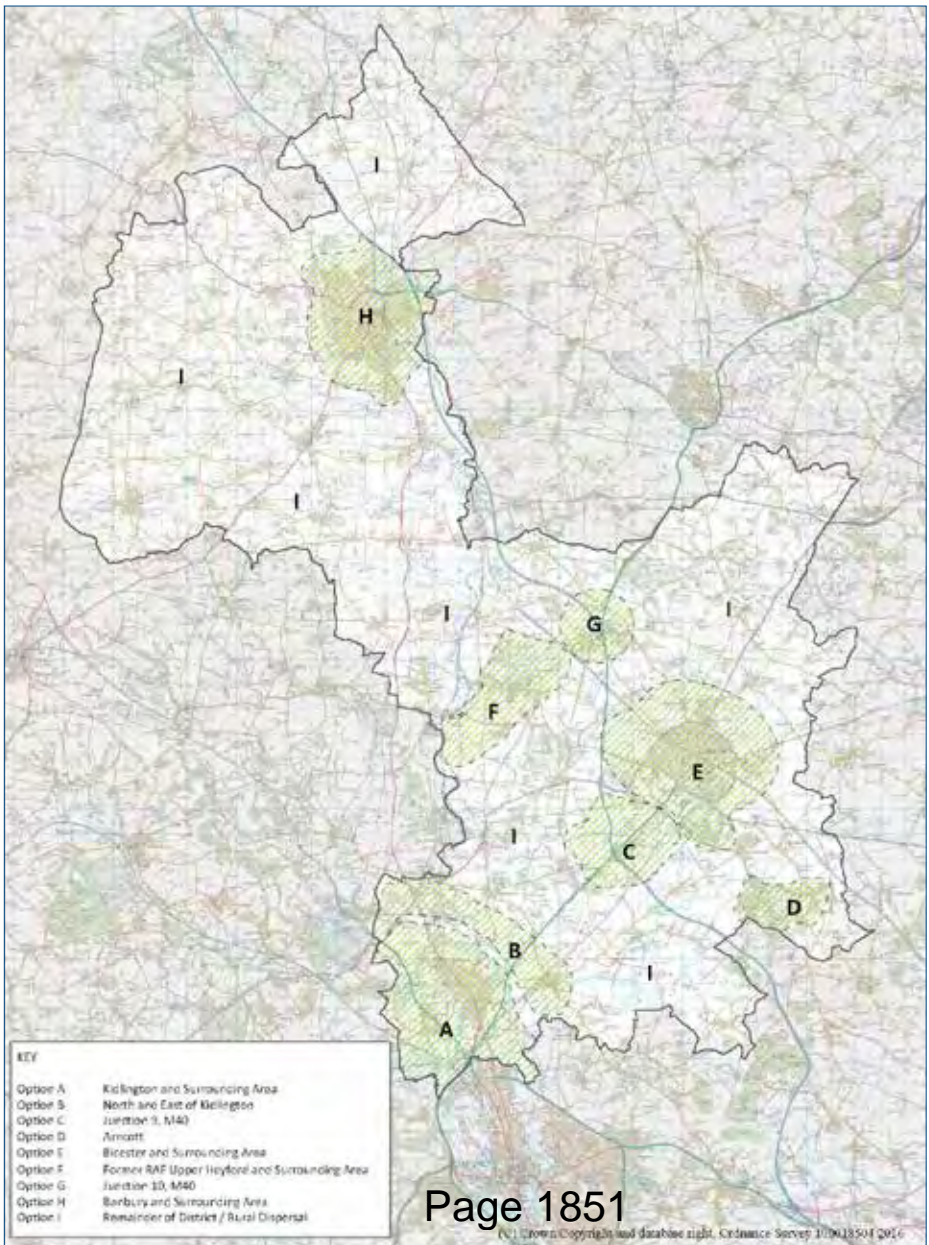

Option G Junction 10, M40

Option H Banbury and Surrounding Area

Option I Remainder of District / Rural Dispersal

Within these Areas of Search were a possible 147 sites each comprising at least two hectares of land.

Figure 1: The Areas of Search Considered

The Rejected Areas of Search

Options C to I were rejected as being unsuitable for meeting Oxford's needs having regard to our evidence base (including a Sustainability Appraisal) and the outcome of consultation and engagement.

The reasons for this are as follows:

Reasons for Rejecting Options C to I

- they were less well situated to build communities associated with Oxford
 - they were less well situated to assist with the delivery of the Oxford Transport Strategy, in terms of existing sustainable travel connectivity and the opportunity for sustainable commuter travel behaviour
 - they were more likely to result in a higher level of commuting to Oxford by private motor vehicle
 - they were likely to result in less affordable transport options for accessing Oxford for potential occupiers of affordable and low cost housing
-
- Do you agree with these reasons?
- more dispersed options provided less opportunity for strategic infrastructure investment (e.g. transport and education)
 - the likelihood that significant additional development could not be built at Bicester, Banbury and former RAF Upper Heyford by 2031 in addition to that in the existing Local Plan

The Selected Areas of Search

Option A (Kidlington and Surrounding Area) and **Option B** (North and East of Kidlington) were considered suitable to meet Oxford's needs and able to deliver the vision and objectives underpinning the Partial Review. The reasons for this are shown on the next page.

Do you agree with these reasons?

Reasons for Selecting Options A and B

- the proximity to Oxford, the existing availability of public transport and the opportunity to maximise the use of sustainable and affordable transport in accessing Oxford's key employment areas and services and facilities
- the opportunity to achieve an overall, proportionate reduction in reliance on the private motor vehicle in accessing Oxford's key employment areas and services and facilities and to achieve further investment in sustainable transport infrastructure
- the deliverability of sustainable transport improvements in comparison to other Areas of Search
- relationship of existing communities to Oxford
- existing economic relationship between the areas of search and Oxford
- the opportunity to provide affordable homes to meet Oxford's identified need close to the source of that need

It was also considered that these options would not significantly undermine the delivery of the development strategy for meeting Cherwell's needs set out in the existing Local Plan.

Site Options within Areas A and B

41 sites within Areas of Search A and B were assessed for inclusion in the Plan. We considered evidence and feedback from consultation. We prepared a **Habitats Regulations Assessment** and a **Sustainability Appraisal** to help consider the likely effects of development and the

cumulative effects of growth. Sites were considered for their suitability in meeting the Plan's vision and objectives. Sites within the Green Belt were only taken forward in the absence of other suitable alternatives.

The Strategy for North Oxford, Kidlington and the A44 Corridor

Our development strategy to meet the vision and objectives is based on

- a coherent, joined-up approach
- prioritising the need for development to be well connected to Oxford
- the need for development to be related to the area of the district that has the strongest economic and social relationships with Oxford
- the need for development to be fully integrated with the County Council's sustainable transport policies
- grasping the opportunities for distinctive place-shaping
- provide a consolidated approach to green infrastructure
- achieving net gains in biodiversity
- not undermining the strategy of the existing Local Plan
- not undermining the delivery of growth already planned at Bicester, Banbury and Former RAF Upper Heyford.

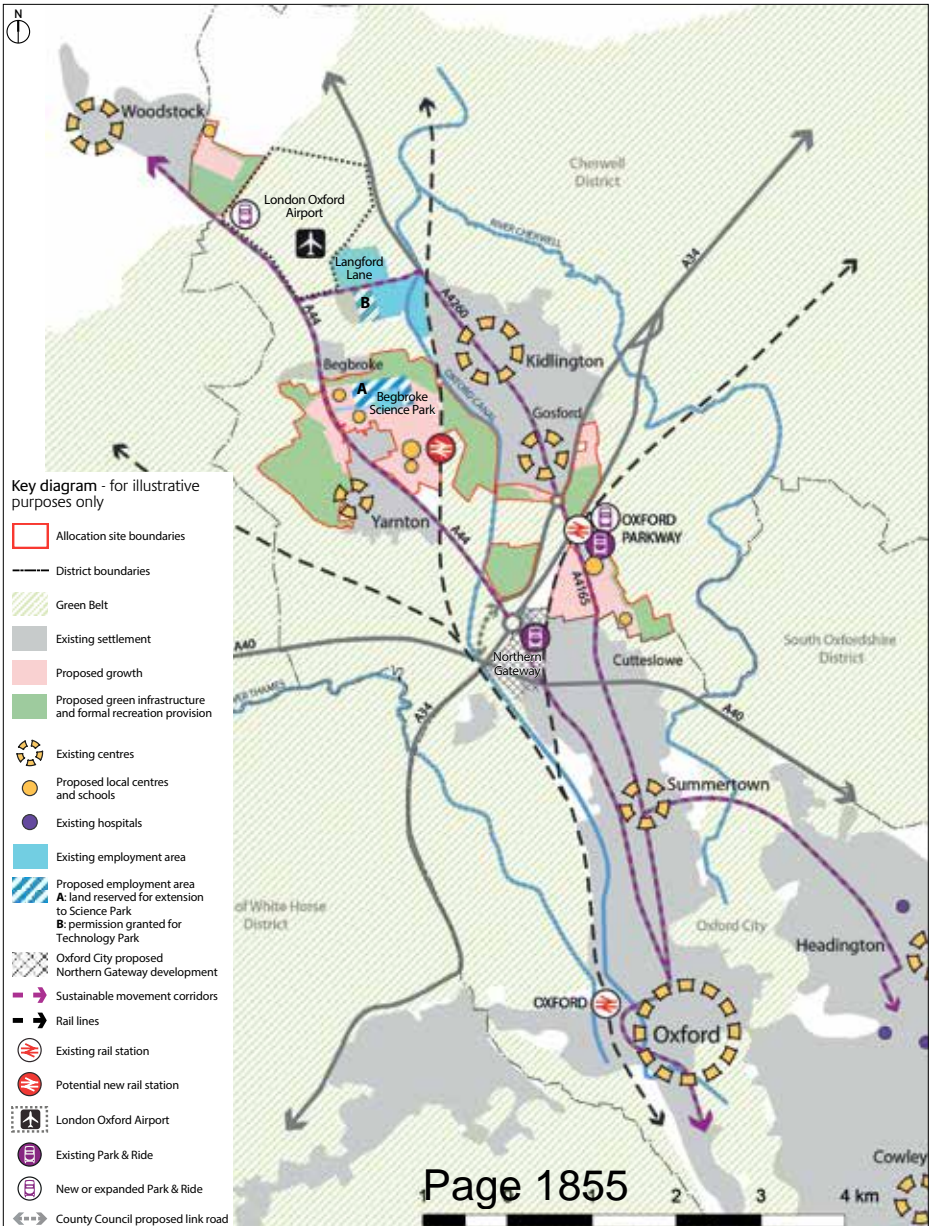

Our new strategy is Oxford specific - to provide homes where people can most readily connect to Oxford and sustainably access the city's employment areas, its universities, its services and facilities and its places of recreation.

To do this, our Plan focuses development in the area immediately north of Oxford, to the south of Kidlington and along the A44 Corridor (see Figure 2).

This directly affects the Cherwell parishes of Gosford and Water Eaton, Kidlington, Yarnton, Begbroke and Shipton-on-Cherwell and Thrupp and neighbouring communities in north Oxford and at Woodstock in West Oxfordshire.

Figure 2: Key Diagram - The Strategy Illustrated

Proposed Strategic Development Sites

We believe that the strategic development sites we have selected best achieve the Plan’s vision and objectives and will achieve sustainable development. The sites are listed below:

Area	Policy / Site	No. of Homes
North Oxford	Policy PR6a – Land East of Oxford Road	650
	Policy PR6b – Land West of Oxford Road	530
	Policy PR6c – Land at Frieze Farm	-
Kidlington	Policy PR7a – Land South East of Kidlington	230
	Policy PR7b – Land at Stratfield Farm	100
Begbroke	Policy PR8 – Land East of the A44	1950
Yarnton	Policy PR9 – Land West of Yarnton	530
Woodstock	Policy PR10 – Land South East of Woodstock	410
Total		4400

Proposed Policies for Delivering the Vision and Objectives

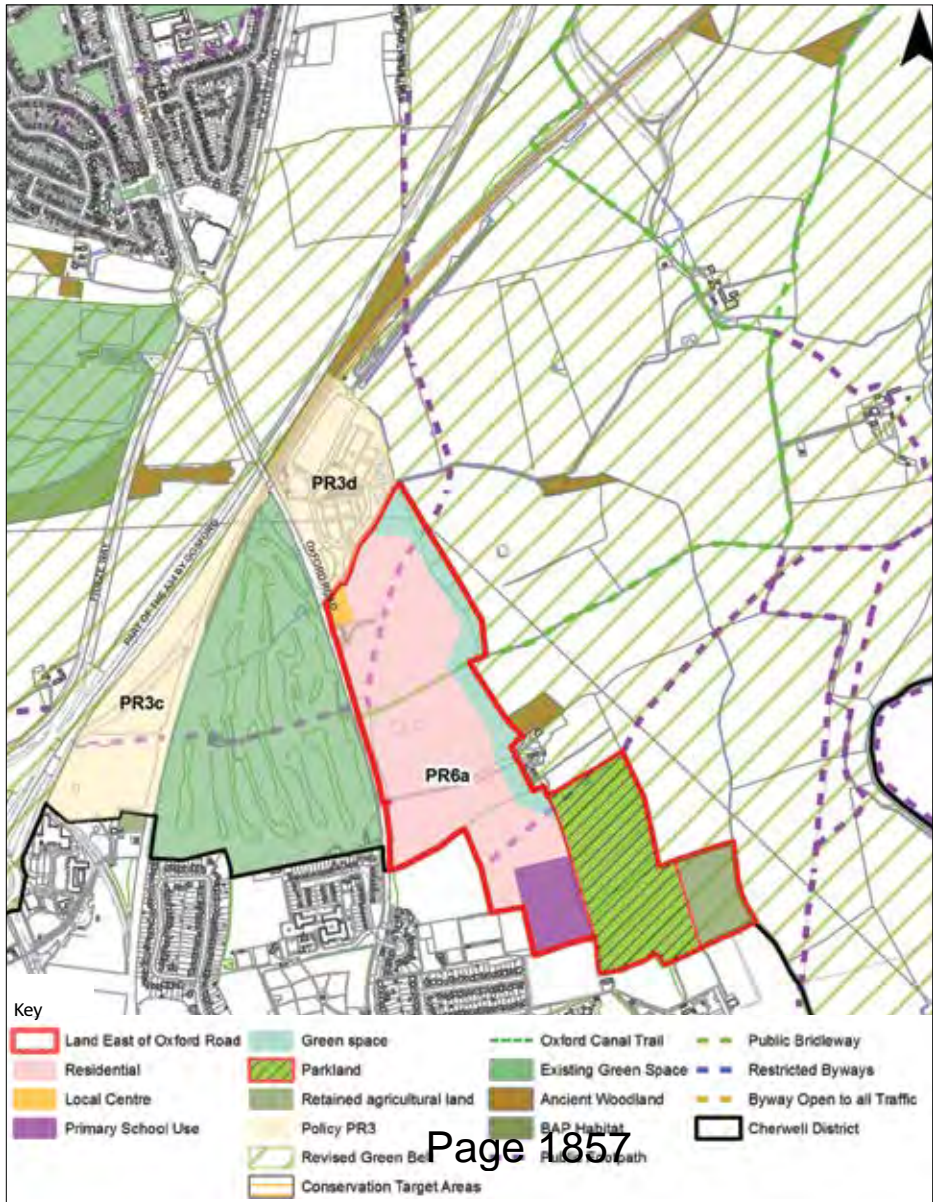

We have also developed policies to ensure that development meets our objectives and achieves sustainable development.

Policy PR1	- deliver the required homes and achieve sustainable development
Policy PR2	- deliver a mix, tenure and size of homes to meet needs
Policy PR3	- allow for exceptional changes to the Green Belt
Policy PR4a	- support affordable and sustainable transportation to Oxford
Policy PR4b	- strengthen Kidlington centre through transport improvements
Policy PR5	- a consolidated and integrated approach to green infrastructure
Policy PR11	- ensure infrastructure delivery
Policy PR12a	- ensure the delivery of sites and maintain housing supply
Policy PR12b	- dealing with sites not allocated in the Plan
Policy PR13	- monitoring and securing delivery

Key Site Proposals

Policy PR6a – Land East of Oxford Road

Policy PR6a – Land East of Oxford Road

Location: Gosford and Water Eaton Parish, South of the A34, North of Cuttleslowe (Oxford)

Key Proposals:

- integrated urban extension to Oxford
- contemporary design
- 650 homes
- 50% affordable housing
- primary school
- local centre – retail, business, café/restaurant, community building, opportunity for health facilities
- formal sports, play areas and allotments
- public green space / extension to Cuttleslowe Park
- wildlife habitats
- green infrastructure network
- net biodiversity gains
- pedestrian, wheelchair and cycling connectivity
- retention of some agricultural land within the Green Belt
- sustainable travel opportunities
- requirement for a Development Brief and a scheme that responds to the ‘gateway’ location at the edge of Oxford

Policy PR6b – Land West of Oxford Road

Policy PR6b – Land West of Oxford Road

Location: Gosford and Water Eaton Parish, South of the A34, East of Railway, North of Wolvercote (Oxford)

Key Proposals:

- integrated urban extension to Oxford
- contemporary design
- 530 homes
- 50% affordable housing
- connectivity to land east of Oxford Road and west of the railway
- contributions to delivery of local centre and school to the east of Oxford Road
- formal sports, play areas and allotments
- wildlife corridors
- green infrastructure network
- net biodiversity gains
- scheme for the retention of significant trees, areas of woodland and hedgerows
- pedestrian, wheelchair and cycling connectivity
- sustainable travel opportunities
- requirement for a Development Brief and a scheme that responds to the 'gateway' location at the edge of Oxford

Policy PR6c – Land at Frieze Farm

© Crown Copyright and database right 2017. Ordnance Survey 100018504

Policy PR6c – Land at Frieze Farm

Location: Gosford and Water Eaton Parish, North of A34 and Peartree Interchange, Between Kidlington and Oxford

Key Proposals:

- reserved site for potential construction of a golf course
- design principles to respond to landscape and Green Belt setting
- requirement for a development brief
- retention within the Green Belt

Policy PR7a – Land South East of Kidlington

© Crown Copyright and database right 2017. Ordnance Survey 100018504

Policy PR7a – Land South East of Kidlington

Location: Gosford and Water Eaton Parish, Between Kidlington and Water Eaton Lane

Key Proposals:

- integrated extension to Kidlington
- 230 homes
- 50% affordable housing
- extension to Kidlington cemetery
- formal sports provision including modern facilities for the wider community
- green infrastructure network
- play areas and allotments
- wildlife habitats
- woodland planting
- net biodiversity gains
- retention of some land within the Green Belt
- pedestrian, wheelchair and cycling connectivity
- sustainable travel opportunities
- requirement for a Development Brief and to respect the historic development pattern of Water Eaton Lane

Policy PR7b – Land at Stratfield Farm

Key

Land at Stratfield Farm	Revised Green Belt	Ancient Woodland	Public Bridleway
Residential	Conservation Target Areas	BAP Habitat	Restricted Byways
Green Space	Oxford Canal Trail	Public Footpath	Byway Open to all Traffic
Nature Conservation Area	Existing Green Space	Cherwell District	

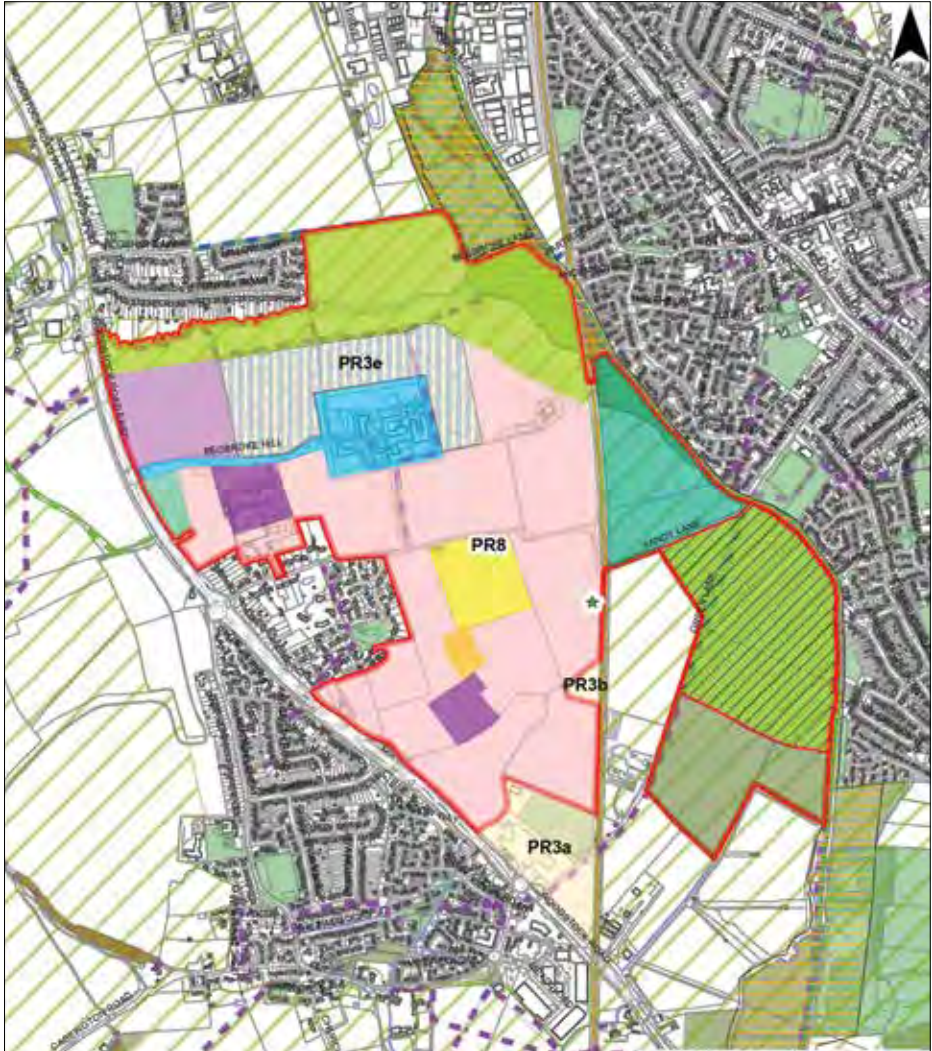

Policy PR7b – Land at Stratfield Farm

Location: Kidlington Parish, South Kidlington, West of Oxford Road

Key Proposals:

- integrated extension to Kidlington
- 100 homes
- 50% affordable housing
- contributions to secure a foot, cycle and wheelchair accessible bridge over the Oxford Canal
- new green link through the site / over the canal
- play areas and allotments and contributions to formal sports
- improvement of orchard for community benefit
- re-creation / restoration of hedgerows and field pattern
- nature conservation area
- wildlife habitats / corridors
- green infrastructure network
- net biodiversity gains
- enhancement of canal corridor
- protection and enhancement of Conservation Target Area
- retention of some land within the Green Belt
- restoration of Grade II Listed Stratfield Farmhouse
- pedestrian, wheelchair and cycling connectivity
- retention of some agricultural land
- sustainable travel opportunities
- requirement for a Development Brief and a high quality landscape setting

Policy PR8 – Land East of the A44

Key

Land East of the A44	Former Landfill Site	Policy PR3	BAP Habitat
Residential	Green Space	Revised Green Belt	Public Footpath
Land Reserved for Employment	Local Nature Reserve	Conservation Target Areas	Public Sideway
Primary School Use	National Conservation Area	Sites of Special Scientific Interest	Restricted Byways
Secondary School Use	Parkland	Oxford Canal Trail	Byway Open to all Traffic
Local Centre	Retained agricultural land	Existing Green Space	Cherwell District
Existing Begbroke Science Park	Reserved Land for Railway Station/hall	Ancient Woodland	

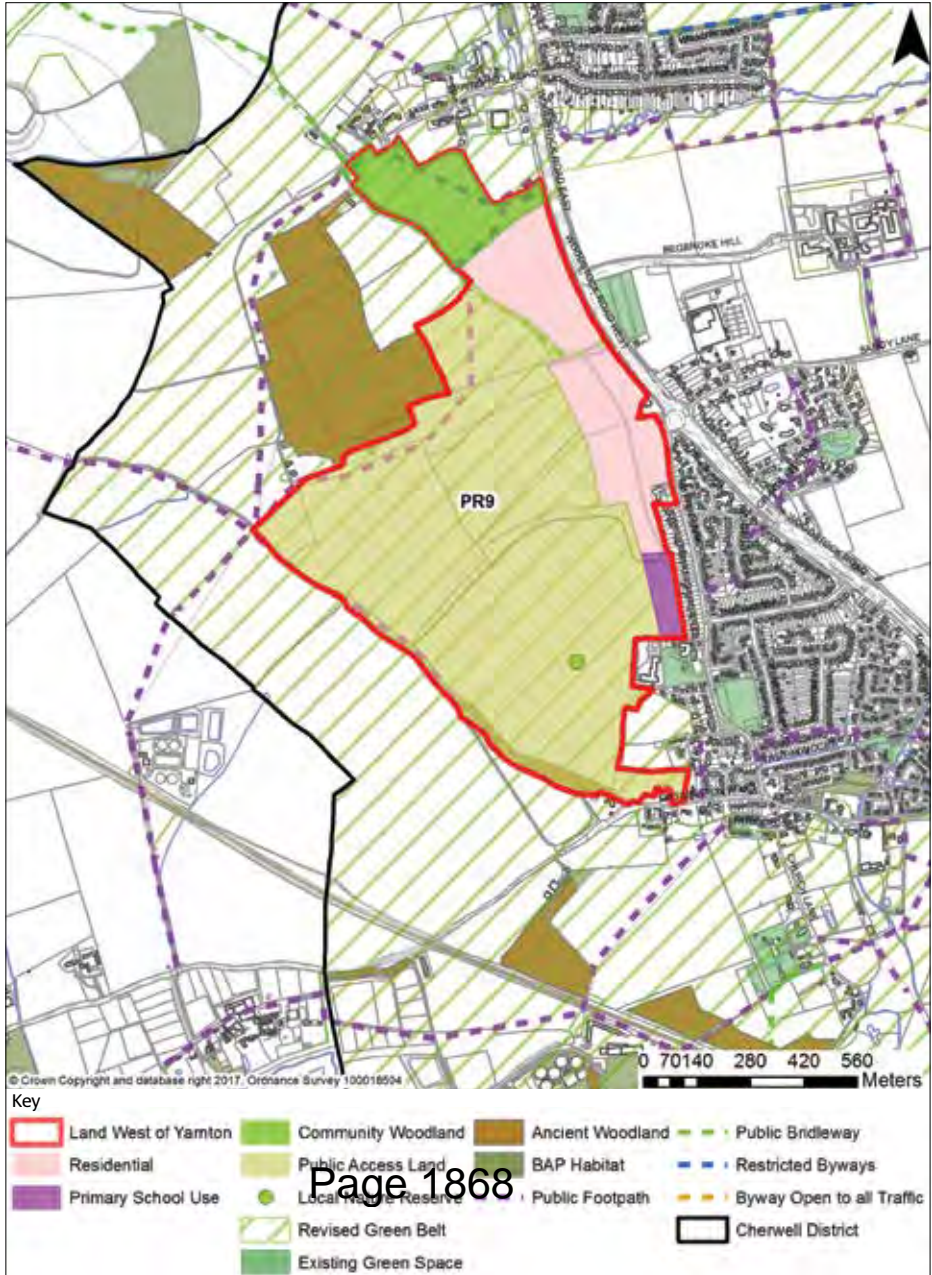

Policy PR8 – Land East of the A44

Location: Yarnton and Begbroke Parishes (small area in Kidlington Parish), Between Yarnton, Begbroke and Kidlington villages

Key Proposals:

- new urban neighbourhood
- 1,950 homes
- 50% affordable housing
- secondary school and primary school(s)
- local centre – retail, business, café/restaurant, community building, opportunity for health facilities
- formal sports and play areas and additional allotments
- Local Nature Reserve along Rowel Brook
- nature conservation area east of the railway
- public open green space / informal canalside parkland
- retention of some agricultural land
- provision for a pedestrian, cycle and wheelchair bridge over the Oxford Canal
- land for future railway halt/station
- land for expansion of Begbroke Science Park
- green infrastructure network
- net biodiversity gains
- improvement of Conservation Target Area (CTA)
- retention of land east of the railway and along Rowel Brook in the Green Belt
- pedestrian, wheelchair and cycling connectivity
- use of Sandy Lane as a green pedestrian, cycle and wheelchair route with railway crossing
- retention of some agricultural land
- sustainable travel opportunities
- remediation and use of landfill site
- requirement for a Development Brief and design which responds to the Science Park and canal location and to historic development of nearby villages

Policy PR9 – Land West of Yarnton

© Crown Copyright and database right 2017. Ordnance Survey 100018504

Policy PR9 – Land West of Yarnton

Location: Yarnton and Begbroke Parishes, North and West of Yarnton, South of Begbroke

Key Proposals:

- integrated extension to Yarnton
- 530 homes
- 50% affordable housing
- land for primary school use
- formal sports, play areas and allotments
- Local Nature Reserve accessible to school
- community woodland
- nature conservation area
- wildlife corridors
- green infrastructure network
- net biodiversity gains
- retention of some land within the Green Belt
- pedestrian, wheelchair and cycling connectivity
- retention of some agricultural land
- sustainable travel opportunities
- requirement for a Development Brief and sensitive approach to topography and landscape character

Policy PR10 – Land South East of Woodstock

Policy PR10 – Land South East of Woodstock

Location: Shipton-on-Cherwell and Thrupp Parish. Adjoins West Oxfordshire boundary, South-east of Woodstock, North of Bladon/ East of Blenheim

Key Proposals:

- integrated extension to Woodstock
- 410 homes
- 50% affordable housing
- provision for school facilities
- provision of a community facility
- formal sports, play areas and allotments
- community woodland
- retention of some land in agricultural use
- nature conservation area
- wildlife habitats/corridors
- green infrastructure network
- net biodiversity gains
- pedestrian, wheelchair and cycling connectivity
- sustainable travel opportunities
- requirement for a Development Brief. A scheme that clearly responds to the internationally and nationally significant heritage and proximity of Blenheim Palace and Blenheim Park and their public approaches. A scheme that enhances the built-up edge of Woodstock

Do you agree with these reasons?

Exceptional Circumstances for Development in the Green Belt

All of the sites we have identified, other than land to the south-east of Woodstock, lie within the Oxford Green Belt. While our proposed policies seek to retain Green Belt land and protect it where possible, we consider that there are exceptional circumstances for the removal of land for development from the Green Belt. In brief these are:

- Oxford's urgent and pressing housing need
- the clear inability for Oxford to fully meet its own needs
- the absence of sustainable, deliverable and appropriate alternative sites
- the relationships between existing communities and the proposed development areas and Oxford
- the relationship of the proposed development areas to Oxford's Northern Gateway site, the University of Oxford's Begbroke Science Park, London-Oxford Airport and the Langford Lane area of Kidlington and the role of these areas in generating housing need
- the unique place shaping potential of land in the vicinity of the University of Oxford's Begbroke Science Park and Oxford canal
- the need for a cautious approach on land outside the Green Belt at Woodstock due to the presence of international and national heritage assets
- the improvement of transport infrastructure in the north Oxford / A44 / A4260 corridor areas
- the strengthening of Kidlington village centre related to sustainable transport improvements
- the opportunity for improvements to the quantity and quality of new public open space, green infrastructure, sport and recreation facilities and in terms of access to the countryside
- the ability to create a sustainable, joined-up vision for the whole of the north Oxford / Kidlington / A44 corridor area

The Proposed Submission Plan and supporting documents are available at

www.cherwell.gov.uk/planningpolicyconsultation

Forms and guidance for making your comments are also available.

Comments can be made from Monday 17 July 2017 until 5pm on Tuesday 10 October 2017.

Your comments should refer specifically to the Plan. This booklet has only been produced as a guide. You may also wish to consider whether or not the Plan is 'sound' i.e. positively prepared, justified, effective and consistent with national policy.

The Plan is accompanied by a Sustainability Appraisal Report on which comments are also invited.

Copies of the consultation documents are available to view at public libraries across Cherwell, at the council's Linkpoints at Banbury, Bicester and Kidlington, at Banbury and Bicester Town Councils and Cherwell District Council's main office at Bodicote House, Bodicote, Banbury.

In Oxford, hard copies are available at the Oxford City Council offices at St.Aldate's Chambers, at Central Library (presently at 41 Castle Quarter) and at Old Marston and Summertown Libraries. In West Oxfordshire, hard copies are available at the District Council Offices at New Yatt Road, Witney, Woodstock Town Council offices, and at Woodstock Library.

Please email your comments to:

Wednesday 2 August 2017 - 4pm to 8pm

Begbroke Village Hall, 3 Begbroke Lane, Begbroke, Kidlington OX5 1RN

Thursday 17 August 2017 - 4pm to 8pm

Exeter Hall, Oxford Road, Kidlington, OX5 1AB

Next Steps

Following consultation on the Plan, it will be submitted to the Secretary of State for independent examination by a Planning Inspector. Your comments will be submitted to the Planning Inspector for consideration.

The purpose of the examination is to consider whether the Local Plan is legally compliant and 'sound' (positively prepared, justified, effective and consistent with national policy). Your comments should therefore refer to those matters.

The main stages for the Plan after this consultation are:

- Submission to Government (Regulation 22)
- Independent Examination (Regulation 24)
- Publication of the Planning Inspector's recommendations (Regulation 25)
- Adoption by the council (Regulation 26)

Glossary of Terms

Duty to Cooperate – a legal duty introduced by the Localism Act 2011. In preparing Local Plans, Local Authorities must engage constructively, actively and on an on-going basis.

Habitat Regulations Assessment (HRA) - HRA is required under the European Directive 92/43/ECC on the 'conservation of natural habitats and wild fauna and flora for plans' that may have an impact on European (Natura 2000) Sites. HRA is an assessment of the impacts of implementing a plan or policy on a Natura 2000 site.

National Planning Policy Framework - national policy produced by the Government to be followed in preparing Local Plans and determining planning applications.

Oxfordshire Growth Board - a joint committee of local authorities in Oxfordshire and including other non-voting members. Through the Oxfordshire Growth Board the Oxfordshire authorities are working together under the legal 'Duty to Cooperate'.

Oxfordshire Housing Market Area - the sub-regional housing market that Cherwell falls within. It includes the whole of the county of Oxfordshire.

Oxfordshire Strategic Housing Market Assessment - a study produced in 2014 by consultants on behalf of the Oxfordshire local authorities which contains an 'objective' assessment of housing needs across Oxfordshire. It is objective in that it does not apply constraints to the level of need.

Sustainability Appraisal - the process of assessing the economic, social and environmental effects of a proposed plan. This process implements the requirements of a European Directive. Required to be undertaken for all Local Plans.

Appendix 5
Representation Form

Cherwell Local Plan 2011-2031 (Part 1)
Partial Review – Oxford’s Unmet Housing Need
Regulation 19 Consultation - Proposed Submission Documents July 2017
Representation Form

The Proposed Submission Documents are available for inspection and comment from Monday 17 July 2017 to 5pm on Tuesday 29 August 2017.

The documents are available online at www.cherwell.gov.uk/planningpolicyconsultation and at the locations specified in the Statement of Representations Procedure.

How to use this form

Please refer to the accompanying Guidance Notes.

Please complete **Part A** in full.

Then complete **Part B for each part of the document you wish to comment on.**

As well as the proposed Local Plan (Partial Review) this form can also be used to comment on the Sustainability Appraisal and other supporting documents.

PLEASE NOTE THAT ANONYMOUS OR CONFIDENTIAL COMMENTS CANNOT BE ACCEPTED. YOUR NAME AND COMMENTS WILL BE PUBLISHED WHEN THE CONSULTATION IS COMPLETE, BUT PERSONAL INFORMATION (SUCH AS YOUR ADDRESS OR EMAIL ADDRESS) WILL REMAIN CONFIDENTIAL.

Please return completed forms:

By Email to: PlanningPolicyConsultation@cherwell-dc.gov.uk

Or by post to: Planning Policy Consultation, Planning Policy Team, Strategic Planning and the Economy, Cherwell District Council, Bodicote House, Bodicote, Banbury, OX15 4AA.

If you have any questions about completing the form, please telephone 01295 227985.

Your details will be added to our mailing list which means that you will be automatically notified of the submission of the local plan for independent examination, of the publication of the recommendations of the person appointed to carry out the examination, and of the adoption of the local plan. If you subsequently wish to be removed from our mailing list please contact us.

PART B – Please complete a separate Part B form for each part of the document you wish to comment on	
Name <i>(to ensure the comments are correctly recorded from each form)</i>	

1. To which document does this representation relate?

Proposed Submission Plan	YES / NO (please delete)
Policies Map within the Plan	YES / NO (please delete)
Sustainability Appraisal Report	YES / NO (please delete)
Other Document <i>(please specify)</i>	

2. To which part of the document does this representation relate?

Paragraph <i>(please specify)</i>	
Policy <i>(please specify)</i>	
Table <i>(please specify)</i>	
Appendix <i>(please specify)</i>	
Other reference in document <i>(please specify)</i>	

3. Do you consider the Proposed Submission Plan to be:

Legally & Procedurally Compliant?	YES / NO (please delete)
Compliant with the Duty to Cooperate?	YES / NO (please delete)
<i>The ‘tests’ of Soundness:</i>	
Positively Prepared	YES / NO (please delete)
Justified	YES / NO (please delete)
Effective	YES / NO (please delete)
Consistent with National Policy	YES / NO (please delete)

4. Please provide the reasons if you have selected 'NO' to any part of Question 3 and consider the Plan to be non-compliant and/or unsound. Please make reference to the part of the document you have identified. Alternatively, please explain why you consider the Plan to be compliant and/or sound.

(Continue on separate sheet if necessary)

5. Please set out what change(s) you consider necessary to make the Local Plan legally compliant or sound. Please provide any suggested wording or re-wording you consider necessary.

(Continue on separate sheet if necessary)

6. If you are seeking a change to the Plan, do you wish to express an interest to participate in the Examination?

I wish to participate at the oral examination	YES / NO (please delete)
--	---------------------------------

7. If you wish to participate at the oral part of the Examination, please outline why you consider this to be necessary:

(Continue on separate sheet if necessary)

Please note: *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate at the oral part of the Examination.*

PLEASE RETURN THIS FORM BY 5PM ON TUESDAY 29 AUGUST 2017 BY EMAIL TO:

Cherwell Local Plan 2011-2031 (Part 1)
Partial Review – Oxford’s Unmet Housing Need
Proposed Submission Plan
July 2017

Guidance Notes for making Representations

Introduction

These guidance notes have been designed to help anyone who wishes to make a formal representation on the Proposed Submission Documents for the Partial Review of the Cherwell Local Plan 2011-2031 (Part 1). Comments are invited on the documents from **Monday 17 July 2017 to 5pm on Tuesday 10 October 2017**.

Copies of the Representation Form can be downloaded at:
www.cherwell.gov.uk/planningpolicyconsultation

This is an opportunity to make comments on the Partial Review of the Local Plan before it is submitted to the Secretary of State for examination by an independent Planning Inspector. All representations received will be submitted to the Planning Inspector with the Submission Local Plan.

The purpose of the examination is to consider whether the Local Plan is **legally and procedurally compliant** (e.g. whether it has been prepared in accordance with Government regulations) and is **sound**. Any representations received on the Local Plan should therefore address these matters. They are explained in more detail within this guidance, but, as a general rule:

- 1) If you are seeking to make representations on the way in which the Council has prepared the Local Plan, it is likely that your comments or objections will relate to a matter of **legal or procedural compliance**.
- 2) If it is the actual content of the Local Plan that you wish to make comment or object, it is likely that it will relate to **soundness**.

Your comments need to be made in writing (either by email or on paper) and received by Cherwell District Council by **5pm on Tuesday 10 October 2017**.

We cannot accept anonymous responses.

Respondents should also note that representations are not confidential and that they will be published on the Council’s website and made available for public inspection. They will also be sent to the Planning Inspector who is appointed to hold the Examination of the Plan when it is formally submitted to Government. For publication purposes, personal information, e.g. addresses, telephone numbers and email addresses, will be removed. Names and company information will, however, be shown.

It is strongly recommended that you use the Representation Forms provided by the Council to make your representation to ensure that it relates to the issues of legal and procedural compliance or soundness.

How to Fill in the Representation Form

Part A: Contact Information

You must complete all your contact details. This is used to identify who has made the comment(s), so it is important that you complete this fully.

The first column relates to representations from individuals. The second column should be completed if an agent is being used. The details of the individual or body being represented by the agent should be provided.

Part B: The Representation

This is where you need to make your comments on legal and procedural compliance or soundness of the Local Plan. **It is important that you use a separate Part B sheet for each comment you want to make.** Please try to keep your comments clear and concise.

Please include your name/organisation at the top of each of the Part B forms that you use so that your comments are recorded correctly.

Question 1

Please state which Document your representation relates to. **If you wish to comment on more than one document and/or issue within a document, please complete a separate Part B sheet for each comment.**

Question 2

Please state which part of the document (Question 1) that your representation relates to. **If you wish to comment on more than one part of a document, please complete a separate Part B sheet for each comment.**

Question 3

Please select:

- whether you consider the Plan to be legally and procedurally compliant
- whether you consider the plan to be positively prepared
- whether you consider the plan to be justified
- whether you consider the plan to be effective
- whether you consider the plan to be consistent with national policy

These are matters that the Planning Inspector appointed to examine the Plan will consider in forming his/her recommendations.

Guidance on these matters is provided below.

- provide your comments and state whether they relate to legal / procedural compliance or soundness and your reasons for this.

Guidance on Legal and Procedural Compliance and Duty to Cooperate

Once it has been submitted to Government, the appointed Planning Inspector will first check that the submitted Plan meets legal requirements - principally those of the Planning and Compulsory Purchase Act 2004 (the '2004 Act') and associated regulations. He/she will then consider the tests for soundness.

You should consider the following points before making a representation on legal and procedural compliance.

- The Local Plan should be within the current **Local Development Scheme** (LDS) and the key stages should have been followed. The LDS is effectively a programme of work prepared by the Council setting out the documents it proposes to produce over a set period. It sets out the key stages in the production of any documents the Council proposes to bring forward for independent examination. The LDS is available for inspection at the Council's offices at Bodicote House, Bodicote, OX15 4AA. It can also be viewed on the Council's website at: www.cherwell.gov.uk/planningpolicyconsultation

The process of community involvement for the Local Plan should be in general accordance with the Council's **Statement of Community Involvement** (SCI). The SCI is a document that sets out the Council's strategy for involving the community in the preparation and revision of documents for the Local Plan and the consideration of planning applications. The SCI is available for inspection at the Council's offices at Bodicote House, Bodicote, Banbury, OX15 4AA. It can also be viewed on the Council's website at:

www.cherwell.gov.uk/planningpolicyconsultation

- The Local Plan should comply with the Town and Country Planning (Local Planning) (England) Regulations 2012. On publication of the Proposed Submission Local Plan, the Council must publish the documents prescribed in the regulations, and make them available at its principal offices and on-line. The Council must notify consultation bodies (as set out in the regulations) and publish a statement making clear that the documents are available for inspection and of the places and times where and when they are available.
- The Council is required to prepare a Sustainability Appraisal when it prepares a Local Plan. This should identify the process by which the Sustainability Appraisal has been carried out, the baseline information used to inform the process and the outcomes of the process. A Sustainability Appraisal is a tool for appraising the sustainability of reasonable alternatives for the preparation of the Plan and the environmental, social and economic effects of the Plan's proposals. The Sustainability Appraisal is one of the Proposed Submission Documents made available for inspection. It is available for inspection at specific locations and on the Council's website at www.cherwell.gov.uk/planningpolicyconsultation
- The Council is required to fulfil the Duty to Cooperate in preparing the Local Plan as required by the Planning and Compulsory Purchase Act (inserted by Section 19 of the Localism Act 2011) and Regulation 4 of the Town and Country Planning (Local Planning) (England) Regulations 2012. This Duty requires local planning authorities to engage constructively,

actively and on an on-going basis with other local planning authorities and other prescribed bodies when it prepares local plans.

Guidance on the 'Tests' of Soundness

Soundness is explained fully in the National Planning Policy Framework (paragraph 182). The NPPF is available from the Government's website at:

<https://www.gov.uk/government/publications/national-planning-policy-framework--2>

The Inspector has to be satisfied that the Local Plan is positively prepared, justified, effective, and consistent with national policy.

To be 'sound', a Local Plan should be:

Positively prepared

The plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development.

Justified

The plan should be the most appropriate strategy, when considered against the reasonable alternatives and be based on proportionate evidence.

Effective

The plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities.

Consistent with national policy

The plan should enable the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework (NPPF).

Question 4

Having regard to the above guidance, please state:

- the reasons you consider the Plan to be legally and/or procedurally flawed
- the reasons you consider the plan to be unsound

Or

- the reasons you support the plan and why you consider it either to be legally and/or procedurally compliant
- the reasons you support the plan and why you consider it to be 'sound'

Please try to be specific by cross referring to procedural requirements or one of the four 'tests' of soundness.

Question 5

If you consider the Plan to be legally or procedurally flawed or unsound, please explain what changes you think are required to make the Plan sound.

If you have particular wording in mind please be specific and provide text that you suggest should be inserted into the Plan.

If you think the Plan is not sound because it does not include a policy, please consider the following before making your comment:

- Is the issue with which you are concerned already covered specifically by any national planning policy? If so, it does not need to be included.
- Is the issue with which you are concerned already covered by any other policies in the proposed Plan or in the adopted Cherwell Local Plan 2011-2031. The adopted Local Plan is available on-line at www.cherwell.gov.uk/planningpolicyconsultation . If so there is no need for repetition
- If the policy is not covered elsewhere, in what way is the proposed Plan unsound without the policy?
- If the Local Plan is unsound without the policy, what should the policy say?

Questions 6 and 7 - The Examination

Please indicate whether you wish to participate in the independent Examination. The Examination will include a series of Hearing sessions on matters which will be identified by the Inspector. The hearings will be chaired by the Inspector and will focus on the legal compliance and soundness of the Local Plan. All representations will be considered by the Inspector.

There is a right to appear and be heard during the Examination but that right is limited to those persons defined in section 20 (6) of the 2004 Act i.e. any person(s) that has/have made representations seeking a change to the plan. However, the Inspector is not precluded from inviting anyone to appear and be heard at a hearing session(s) where he or she thinks that person is needed to enable the soundness of the plan to be determined.

The Inspector will decide who will be invited to speak at the Hearing sessions, not the Council, and the Inspector will decide the topics to be covered in each Hearing session, based on the issues raised by the written representations at this consultation stage.

General Advice

- Representations are only valid if your name and address (or email address) are supplied. If agents are completing forms on behalf of clients, agents should state the full name or organisation that they are representing.
- It would be helpful if representations are clearly presented and concise, making cross-reference to paragraphs/policies/plans/tables in the proposed Plan where relevant
- It should be noted that after this stage of consultation, further submissions will only be accepted at the request of the Inspector.

Group Representations

Where there are groups that share a common view on how they wish to see the Plan changed, it would be preferable for that group to send a single representation which represents that view,

rather than a large number of individuals sending in separate representations which repeat the same points. In such cases the group should indicate how many people it is representing and how the representation has been authorised. Supporting names, addresses and signatures can be provided.

What Happens Next?

At the end of the consultation, the Council will consider the representations received and decide whether or not any changes are required to the Plan. If significant changes are not required, the Council may decide that the Plan should be submitted to the Secretary of State for Communities and Local Government for independent Examination.

A Planning Inspector will be appointed by the Secretary of State and he/she will identify the issues for debate. The Inspector will chair hearings on these issues.

An independent programme officer will be appointed and will be responsible for managing the arrangements of the Examination process, including all documents, organising the Inspector's site inspections and dealing with all correspondence. The Programme Officer reports to the Planning Inspector and will be the main point of contact during the EIP. The Council does not administer the Examination.

The right to appear and be heard during the Examination applies to those seeking a change to the plan at this 'Regulation 19' stage – the publication of the proposed Plan. It does not apply to those who have made a representation at a previous stage of Plan preparation.

Further Help

If you require further assistance please contact the Planning Policy Team on 01295 227985.

We are holding a series of exhibitions during the consultation period, details of which are available on-line at www.cherwell.gov.uk/planningpolicyconsultation

Submitting Representations

The Proposed Submission Documents available on-line at www.cherwell.gov.uk/planningpolicyconsultation or at the locations specified in the separate Statement of Representations Procedure. Any person may request a paper copy of a particular document but the Council may make a reasonable charge.

Representations should be emailed to planningpolicyconsultation@cherwell-dc.gov.uk

Or posted to:

Planning Policy Consultation

Planning Policy Team

Strategic Planning and the Economy

Cherwell District Council

Bodicote House

Bodicote

Banbury, OX15 4AA

Please note that all representations will be made publicly available. Personal details (signatures, personal addresses and personal telephone numbers) will be hidden. We cannot accept anonymous responses.

You should receive a written acknowledgement. Email acknowledgements will be sent automatically by return.

Acknowledgements by post can be expected within five working days of your response being received.

If you do not receive a written acknowledgement, please contact the Planning Policy team on 01295 227985 to ensure that your comments have been received.

Representations may be accompanied by a request to be notified when:

- The document has been submitted for independent examination
- The Planning Inspector publishes his/her recommendations
- The document is adopted

Proposed Submission Plan - Executive Summary

PR-C-0117 25/08/2017 Henry Munday

352 Comments
 Refers to Oxford unmet housing policy and vulnerable people groups. Refers to Northern Gateway lack of unemployment problem. The A44 needs dualling round Oxford. Refers to Kidlington one-way system. Refers to Oxford and Cherwell affordable housing % and key-workers eligibility.
 Changes Sought Reasons for Participation

PR-C-1398 10/10/2017 Ben Simpson WYG on behalf of Bonnar Allan Ltd Y Y N N

5337 Comments
 The representations are submitted on behalf of my client Bonnar Allan with regard to their proposals at New Alchester. The land is identified in the Vision document attached to these representations and will include up to 7,200 new market & affordable homes, primary & secondary schools, creation of a 240 acre country park & watersports centre & the potential to incorporate a new Park & Ride site with connection to the railway line south of Bicester by a new railway station. Our comments on the PSP are confined to issues of soundness. A summary of the alternative Options A to I that CDC considered at the last stage of the Plan is set out at paragraph 2.12. For the reasons we set out in our representations to that stage, we consider that the CDC's proposed approach of allocating land to the north of Oxford & within the Green Belt (GB) around Kidlington as set out in Table 1 is flawed, & that the Partial Review does not pass the test of soundness. The PSP is not Justified as in our view it does not represent the most appropriate strategy for meeting Oxford's un-met housing needs. The logic that appears to underlie the PSP is in essence that the closer the proximity of the required housing to the City, the more sustainable it will be. This logic ignores the fact that there would be better prospects of residents travelling into Oxford as well as the major employment locations in the Science Vale by public transport including by rail from New Alchester. The preferred locations around Kidlington will increase congestion on the highway network & will result in the loss of GB & lead to coalescence between Kidlington, Begbroke & Yarnton, whereas the proposals at New Alchester are located beyond the GB. As we make clear in the Vision document, our proposals can be delivered in a phased manner & there are no impediments to early delivery. The scale of the proposals at New Alchester allows it to meet both the identified needs of Oxford City as well as an element of the future needs of Cherwell District, & in so doing, we recognise the journey that this proposal involves.

Changes Sought Reasons for Participation
 We consider that the PSP should direct a majority of the un-met need to New Alchester which constitutes a more sustainable & justified location for the new homes needed both to meet the City's un-met needs as well as future need within Cherwell District. The PSP should be re-drawn to allocate land at New Alchester in place of the proposed allocations in the Green Belt (GB) around Kidlington. New Alchester can provide a highly sustainable location for the much needed development, at a location outside the GB & on the railway line into Oxford. The development would facilitate creation of a new railway station at New Alchester which would encourage people to travel to Oxford City & also other employment centres within the Science Vale by public transport.

PR-C-1366 10/10/2017 Omattage G Kumara N

490 Comments
 While agreeing with the fact that Oxford has a high level of housing need it cannot be agreed that Oxford cannot meet the need by itself. The statement that there are clear and exceptional reasons for providing development within the GB suggest that the strategy is based on a foregone assumption/conclusion that the Oxford City's unmet housing need cannot be met unless development is carried in the GB. There has not been a comprehensive study to look into the option of developing brownfield sites within the city to build medium (or high rise if necessary) blocks of flats as has been done in London and in other major cities all over the world. Further it is debatable if housing development in the GB will provide affordable and sustainable travel opportunities to Oxford City's places of work. With the current fast rail transport to city of London it will attract a high percentage of workers who commute to London thereby pushing the housing market up in areas outside the city boundary. It is very unlikely that the key objectives SO10, SO11, SO12 and SO13 will be achieved. Particularly on SO11 and noting the flood risk outlined at 3.20 of sustainability appraisal report, measures to deal with increased run off from new development is not adequately addressed.

Changes Sought Reasons for Participation

Proposed Submission Plan - Section 1

PR-C-0272 01/09/2017 Mrs Sophie Law N N N

859 Comments
 1. Oxford's 'unmet need' - Oxford's total housing need is substantially overstated, Oxford has not satisfactorily identified the amount they might not be able to meet. In CPRE's view Oxford is capable of accommodating all or almost all of it by switching land earmarked for businesses to housing instead. 2. GB- The plan attacks the core on which GB depends. Three quarters of Council's own voters want to see GB protected. 3. Sustainability - To lose GB land is the very definition of unsustainability. Development should be located on sustainable sites identified elsewhere in the district. 4. Density - Land is wasted by building at very low densities (houses per hectare). Higher densities would produce more affordable housing required. The Council should set much higher density targets. 5. Transport - It is extremely unlikely that a new railway station 'between Kidlington and Begbroke' to support the development will be deliverable. Plans for additional housing in north Oxford/south Kidlington should be put on hold until the Oxford to Cambridge Expressway route is settled, the East West railway is re-opened and the full extent of the expansion of Bicester is agreed, with its possible new transport infrastructure. 6. Employment - new high-tech employment sites should be focused at Bicester where large numbers of houses are being built/have been provided for on the basis that high-tech employment would be provided, but this has not yet been forthcoming. 7. Woodstock - planned housing for Woodstock will put undue stress on local infrastructure and services, threaten the World Heritage Site prospect, damage the rural environment and risk turning this historic town into an Oxford suburb. Woodstock should be protected from inappropriate development.

Changes Sought Reasons for Participation

PR-C-0279 19/08/2017 William Clements

866 Comments
 The plan is, generally speaking, positively prepared: there is a need for 28000 additional homes (table 2), and the local plan addresses the issue of how to deliver them (paragraphs 1.28 and table 3). The plan therefore does seek to meet objectively assessed requirements, including unmet requirements from neighbouring authorities. However, the plan currently falls a bit short of delivering the required 28000 homes. To meet this target exactly, it seems Oxford city must build 13700 homes (13000 from paragraph 1.28, 550 from table 3, and 150 to make up for the fact that table 3 only accounts for 14850 homes instead of the target 15000). However, Oxford can only build 10,212 homes (paragraph 1.26). There is therefore a shortfall of 3488 homes. Furthermore, South Oxfordshire has not agreed to its apportionment of homes to be built (table 3), potentially leading to an additional shortfall of 4950 homes. Therefore, the current plan may fail to deliver up to 8438 of the required 28000 homes.

Comments

Oxford's urgent and pressing housing need -Whilst there is a need for affordable housing in Oxford, the figures are exaggerated and not as great as suggested. With BREXIT the local economy will have less students and European workers from the EU which will drop the demand for new housing. Also there is no guarantee that the housing will in the long term be for the benefit of Oxford and its local communities. Many of the current stock is being used by commuters from outside Oxfordshire and mainly from London region. The idea that they will be for local residents and those who work in Oxford is to mislead as current legislation does not prevent new housing going to outsiders. Affordable housing also means that it is only those that can afford the 80 percentage of the market rate which for Oxford means that it is unaffordable for the lower paid. The clear inability for Oxford to fully meet its own needs - They have not tried hard enough. Oxford could have built at higher densities which has not been doing. It needs to be more innovative in their development plans so as to obtain greater densities. They should use Compulsory Purchase Orders on sites where the landowners have resisted on building of housing. It should not be encouraging more business activity when it doesn't have the ability to house more people. The absence of sustainable, deliverable and appropriate alternative sites - Untrue - we have identified suitable sites that would satisfy this unfounded need. There are identifiable sites that Oxford could build on, such as Showman's field and Marston Saints Sports field, in addition to their own Green belt. Why build on our greenbelt so that they can preserve theirs. Housing in Oxford will not be sustainable when the cost of housing is out of reach for most of the lower income groups. Also there is no current legislative barrier of preventing people from outside Oxfordshire buying or renting these additional housing. We should not be providing homes for outsiders so that they can commute to London etc. The relationships between existing communities and the proposed development areas and Oxford - Begbroke is 5.2 km (3.3 miles) from 5 Mile Drive Oxford. Other sites are within the city boundaries or nearer. The relationship of the proposed development areas to Oxford's Northern Gateway site, the University of Oxford's Begbroke Science Park, London-Oxford Airport and the Langford Lane area of Kidlington and the role of these areas in generating housing need - This will generate housing need in this area – not Oxford. This "relationship" is more easily argued for Oxford and Littlemore Science Park as one example. We still don't see the exceptional argument for developing in the Greenbelt, especially when people currently commute from Banbury and Bicester and elsewhere in Oxfordshire to work in Oxford. The unique place shaping potential of land near the University of Oxford's Begbroke Science Park and Oxford canal - Do not know what "shaping potential of land" means. However existing industrial development of Langford Locks has forever altered this stretch of the Oxford canal alongside Rushy meadows which are a group of canal side meadows at Kidlington. They have escaped agricultural improvement through ploughing and reseeding or using fertilizers and herbicides. Consequently Rushy Meadows has a rich variety of grassland wildflowers. They are wet and in places tall wet and vegetation with reeds and tall sedges has developed. Meadows such as this are a national priority for conservation. We don't see "shaping the potential of the land" in the greenbelt is an improvement. It's not a valid or an exceptional reason for building in the greenbelt. It will have an adverse effect on the Greenbelt. The planning consent in the past for Begbroke Science Park did not allow or envisage for further development outside the perimeter of the existing Science Park. The need for a cautious approach on land outside the Green Belt at Woodstock due to the presence of international and national heritage assets - This is not a valid reason to not build around Woodstock. The palace views would not be affected unless there plans to build on the palace grounds in full view of the palace which has not been suggested. Other world heritage sites have been able to build around those kind of places. The improvement of transport infrastructure in the north Oxford / A44 / A4260 corridor areas - Huge costs involved and will attract further traffic and problems to exacerbate those existing now. We don't see how this can be funded and where the sources of this funding will come from. The present situation is already congested and the plans that have been put forward do not deal directly with cause of the bottlenecks – the need of building a dual carriage way from Yarnton to the Peartree roundabout which would involve the building of bridges over the railway and canal. Diverting traffic to use Kidlington direction into Oxford will only make matters worse. It is already congested and will lead to Kidlington have more air pollution and greater congestion than what it has now at peak times. The strengthening of Kidlington village centre related to sustainable transport improvements - Kidlington village centre is popular and satisfactory now. No explanation of exactly what is meant by strengthening – just another buzz word. We don't see how strengthening Kidlington when it already has more frequent buses and better routes in comparison to Begbroke and Yarnton. The issue is that there are too many buses running nearly the same time by different companies and hence at a low capacity. The journeys are punctuated with many stops so that the journey time into Oxford and hospitals is very poor. The problem lies with poor management of the transport policy. A better way of helping the communities, than to build in the greenbelt, is to have more structure transport policy that supports all the communities rather than the selected few. The opportunity for improvements to the quantity and quality of new public open space, green infrastructure, sport and recreation facilities and in terms of access to the countryside - We have access now to wide open areas not just narrow corridors of green that will inevitable become busy. Really this is just untrue. The Green belt has got many footpaths that are accessible to the general public including recreational facilities. This is just a ruse and it is not an exceptional reason for building in the green belt. One can understand that if the merging of the three villages with North Oxford then green spaces will be needed and so will the recreational facilities for the extra population and give the impression of protected green belt. The ability to create a sustainable, joined-up vision for the whole of the north Oxford /Kidlington/ A44 corridor area -The green belt is there to do exactly the opposite of this vision. Ours is to retain what we have. This is not a joined up sustainable vision for North Oxford. It is the destruction of three villages being incorporated into North Oxford with the irrevocable loss of the green belt. It is the creation of an urban sprawl and the merging of three villages with Oxford. One can be cynical and believe that Cherwell interest has been to collect the additional revenue it will get by get these houses built.

Comments

Consider Oxford's requirements not sound or justified. They are based on old data and before the implications of the EU referendum and the latest new government figures projecting future housing need for England. We do not believe this review is about unmet housing need – more about the University expanding its site, developing its land in our villages and Pear Tree and profiteering 100 x the agricultural value at the expense of the green belt CDC will may gain from a substantial New Homes Bonus Grant. Oxford have explored housing within their own boundaries and found easy reasons to dismiss them. They have ignored many smaller sites in the city such as Sandy lane west. Other sites in the county such as Bicester Sites A&G Blackthorn and Arcott have massive housing potential. Oxford and CDC appear to have found a simple solution – build on Green Belt owned by co-operative supporters. Oxford have rejected expansion of their nearby Green Belt especially between Oxford and Horspath – near to industrial sites and employment. Oxford should pursue sites in Marston Green Belt. Excluded due to lack of interest by landowners – but these are within the ringroad and near hospitals with main occupations detailed on page 48 of proposed submission plan. Sites such as these should be subject to compulsory purchase. CPRE say that student numbers should be excluded – transient population.

There is no timetable for a comprehensive review of the LP that will provide a plan for a 15 year period (para 157 of the NPPF). Ideally a comprehensive early review of the Cherwell LP drawn up over an appropriate time scale is required in order to provide & accord with paragraph E.22 (which identifies that the LP will be reviewed to roll forward the plan ensuring that both the existing & newly arising needs are planned for & delivered. However, it is important to get the Partial Review in place urgently to address the unmet needs of Oxford City as set out in the LP Part 1. The Partial Review provides a pragmatic approach to address the unmet needs of Oxford City as a matter of priority. Whilst we have in previous representations advocated that the Council should commit to a comprehensive early review following the adoption of the Partial Review to address current strategic needs over an appropriate plan period; it is noted that the work is underway on a Joint Spatial Plan for Oxfordshire. The Oxfordshire Growth Board has agreed (April 2017) the principle of producing a Joint Oxfordshire Plan which would consider longer term issues. It is noted that a business case for an Oxfordshire Spatial Plan/Strategy will be presented to a special meeting of the Oxfordshire Growth Board on 30th October 2017. This is welcomed as it recognises that a strategic approach is required for coherence in plan making and where there are economic and housing challenges and infrastructure challenges across administrative boundaries. Government policy through the Housing White Paper is encouraging joint plans, where it can help overcome constraints in strategic planning and delivery.

Changes Sought

Comments

It has been identified that Oxford City does not have sufficient capacity to deliver its full housing requirement & through the Oxfordshire Growth Board the districts have worked together to address these unmet needs. The Partial Review makes provision for Cherwell's share of the unmet needs arising in Oxford City from 2011 - 2031, this is supported & is consistent with national guidance in terms of the Duty to Co-operate. The Inspector at the Cherwell LP concluded in his report in May 2015 that it was appropriate for the LP to proceed provided that there was a commitment to address the unmet needs of Oxford City, this was set out in para 10 of his report. On 26th September 2016 the Oxfordshire Growth Board agreed the apportionment of Oxford city's unmet need. All of the district authorities with the exception of South Oxfordshire agreed the apportionment & a Memorandum of Co-operation was duly signed. However, South Oxfordshire have agreed to accommodate 3,750 dwellings of their proportion of the unmet needs of Oxford City, leaving a shortfall of 1,200 dwellings. South Oxfordshire do not propose any one site or location from where this unmet need will be delivered and met across the district. It is noted that whilst SODC propose to meet 3,750 dwellings they propose to undertake a partial review of the SODC Local Plan once such time as the Oxford City Plan is adopted and the level of unmet need is known. It is considered that this approach places more pressure on the other neighbouring districts to meet the unmet need of Oxford City not being met by SODC & jeopardises the soundness of the Local Plans as the full OAN would not be planned for across the HMA, without any planning reasons for not doing so. The Council should seek to ensure that South Oxfordshire address their own needs plus the unmet needs of Oxford City through the joint working arrangements. If any of the LPAs do not propose sufficient levels of housing this will affect the soundness of all the Local Plans across Oxfordshire. The apportionment was based on a common start date of 2021 for the commencement of development after the adoption of the respective LP review or LP update/refresh. Although the assumption did not preclude earlier delivery, it did however recognise long lead in times. Originally the Cherwell Partial Review was envisaged to be adopted in 2 years following the adoption of the Cherwell Local Plan Part 1. However, this has been delayed and adoption is now envisaged in May 2018. It is noted from the LDS dated April 2017 that the Council also intend to produce a Part 2 Development Management Policies and Sites which is under preparation.

Changes Sought

Dorchester Group whilst not directly seeking changes to the Partial Review consider that this is a challenging strategy and much rests on the deliverability of the locations identified to meet the unmet needs of Oxford. If needs fail to be met then land at Upper Heyford could play a significant role. Area of Search F provides a sustainable option to meet the unmet needs of Oxford City as it is well-related to Oxford by way of a rail connection. Area of Search F also provides the most sustainable, deliverable option to meet the needs of Cherwell in the longer-term.

Reasons for Participation

Dorchester Group is concerned that the unmet needs assigned to Cherwell district are met in the most appropriate and effective locations and that the proposed locations delivery within the timescale

Comments

I consider the submitted plan to be unsound on the following grounds: 1. It is not based on a strategy which includes an appropriate assessment of unmet requirement of local housing needs in relation to the City of Oxford and adjoining local authority areas. The proposed development will put Oxford Parkway Station within very easy reach of the planned housing development, providing ready access to Central London in a rail journey of approximately 1 hour. This, together with convenient access to the M40, will make it immediately and compellingly attractive to those wishing to commute into London and other major employment centres in the South East and the West Midlands. For this reason, the housing will not support the need for affordable homes for local populations employed in Oxford and the immediately surrounding areas, especially key workers in relatively low-paid employment sectors who will not be able to compete with those in more highly-paid employment in the South-East and West Midlands. The proposed development also raises serious concerns about the provision of public facilities and resources e.g., the lack of provision of secondary education. No mention is made of this in the plan, but it is hard to see how local secondary schools will be in a position to provide adequately for the level of increased population proposed within this development. Similarly, it is clear that health-related resources will find further demands imposed on their already stretched capacity. 2. The proposed submission plan is not justified in terms of its alignment with reasonable local alternatives that would take into account the difficulties outlined above, and would not inflict the scale of damage in relation to the Green Belt. The notion that appropriation of the existing Green Belt land for building would be 'the opportunity to provide improvements to the quantity and quality of new public open space and green infrastructure, access to the countryside; and, the provision of additional facilities that will benefit Kidlington, Gosford, Begbroke and Yarnton' is not credible. 3. The proposed submission plan will not be effective in relation to cross-boundary cooperation between the City of Oxford and local adjoining authorities as the updated local plan for Oxford has not yet been published, and full alignment has not therefore been possible. The specific priorities of the communities of Kidlington, Yarnton and Begbroke will be ill-served by the destruction of the 'Kidlington Gap', which will in effect erase the separate and distinctive social, cultural and economic identities of these communities. It is claimed that the proposed plan will avoid the need to inflict damage to the Cherwell Local Plan. 4. The proposed submission plan is wholly inconsistent with National Policy regarding the Green Belt. The dense and extensive urban development proposed will destroy existing rural resources and wildlife e.g. the presently thriving population of skylarks on the arable land to the east of the Oxford Road. In terms of sustainability, the inevitably dramatic increase in traffic levels that would result from concentrated development on this scale would amount to a further deterioration in the already poor air quality in Oxford. Increasingly compelling evidence demonstrates that this represents a major and unsustainable threat to public health within the region.

Changes Sought

In my view, the basic assumptions underlying this local plan are radically flawed. The proposals call for a major reconsideration, based on explorations of alternative provision within the region that would not entail the wholesale destruction of the irreplaceable benefits of the Green Belt for the people of Oxford, Kidlington and surrounding communities.

Comments

OGBN disagrees with the justification and fundamental basis for this plan. It is founded on the assumption of a step change to historic levels of growth in Oxfordshire, amounting to more than doubling of growth in population, housing and employment. Because of this the plan suggests that the long established strategy of diverting growth away from the city of Oxford towards the country towns is no longer feasible. OGBN disagrees with this because the proposed levels of growth are unrealistic, unproven and therefore unjustified. We consider that the arguments for a strategy to divert growth away from Oxford remain as strong as ever. An essential part of that strategy is the GB, which Cherwell Council supports. However in order for the strategy to work, the GB has to be retained in its entirety. It is not a collection of land parcels that can be picked off one by one. It is inconsistent of Cherwell to support the GB and yet to seek to build on it. It is not possible for Cherwell to satisfactorily produce this review in isolation. Oxford is surrounded by four other authorities and planning needs to be coordinated strategically between all five councils. Infrastructure needs have to be planned across boundaries and certainly cannot be confined to the limited areas covered in this review. The Growth Board has not been an effective mechanism for strategic co-ordination and its analyses of spatial options to date have been simplistic. The Councils – while claiming to be cooperating – have largely acted according to their own agendas. Oxford City Council in particular has sought to promote economic growth within the city, by protecting employment sites, without any regard of the consequences of this for the surrounding Districts such as Cherwell. It appears to be part of its own strategy to expand beyond its borders into the GB, again ignoring the purpose of the GB to protect the character of the historic city. This review cannot be effective without a well founded spatial strategy for the county. We also argue that this strategy should include a commitment to retain the Green Belt in its entirety.

Changes Sought

The plan should be withdrawn and a spatial strategy for Oxfordshire established which can address the issues addressed in this review in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should (a) discourage further employment generating development in the city unless it is absolutely essential and (b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.

Reasons for Participation

OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination is necessary and justified because of our longstanding interest and understanding of the Oxford GB.

	<p>Objections to the expansion of oxford city into the green belt areas between it and the villages close by.</p> <p>Why have Oxford city council allowed more business premises to be built in the northern gateway area near Wolvercote, before they have considered using all the land for new houses, to in part solve the shortage of current accommodation in the city. By allowing more commercial building they are only exacerbating their own problems!</p> <p>As a Kidlington resident rep would be disappointed if the green belt between North Oxford and the villages immediately north were to be used for housing in direct contravention of government policy. Is also a member of North Oxford Golf Club, therefore is also concerned that a leisure facility that was established over a hundred years ago, and has been evolving and improving during all that time should be considered for housing. The club is used seven days a week by the diverse demographic membership, and also by some thousands of visitors each year.</p> <p>There has been land set aside at Frieze farm to build alternative course, believes that the current owners of that land have applied to build a housing estate on it, although it doesn't seem to be in the district council proposed areas for housing, maybe it should be. Has the district council consulted with Frieze farm owners? Then the current course could be left alone to provide a leisure facility for any new building that does eventually go ahead.</p> <p>As the new Oxford Parkway train station is so close to the golf course, doubt that the housing would be what is classed as affordable. Suspect that houses, if they were built here would be expensive 4/5 bedroom places suitable for London commuters. Also the 18 month plus disruption that the supposed improvements to the Cutteslowe and Wolvercote roundabouts, has in my opinion done little to improve the flow of traffic in either direction along the A40. More houses built in this area will only make travelling even more difficult. If houses must be built anywhere in or around Oxford, transport infrastructure must be a priority. In particular more consideration given to the humble BICYCLE, more cycle lanes that are continuous across the city not just piece meal as they are at the moment.</p> <p>There are many green areas owned by the university colleges for the sporting activities of the students, but when passing, has rarely seen any activity during the week. Surely the colleges could share their green spaces using them more efficiently, thus releasing some or most of the land for housing within the city boundaries. Any new housing here would then be at the centre of where the city council claims it needs more accommodation.</p> <p>Since the Government has recently revised its formula for housing requirements, will this be reflected in the final numbers of houses in and around Oxford city. As a number of people at the forum meeting I attended earlier this year pointed out, the total figure for the required housing seemed extremely high anyway.</p>

1653	Comments			Reasons for Participation			
	<p>The whole of the plan, although based on SHMA 2014 (Table 1) and the Oxfordshire Growth Board Apportionment (Table 3) does not take into account the Housing Need figures published with the consultation document 'Planning for the right homers in the right places' by the Department for Communities and Local Government on 14 September 2017. The figures for Cherwell indicate a need for 742 new dwellings a year over the period 2016-26 (equivalent to 14,840 over 20 years) compared with 22,840 in the current Local Plan. The figure for Oxford City is 746 dwellings per year (14,920 over 20 years) compared with the SHMA median figure of 28,000 dwellings. Even if we allow for a 50% uplift in both figures (to allow for relative house prices and special circumstances), then the figures become 22,260 for Cherwell and 22,380 for Oxford City - 5,620 fewer than the SHMA. This renders the basis on which the 4,400 house allocated to Cherwell unsound.</p>						
	Changes Sought			Reasons for Participation			
	Scrap the plan and start again, with a revised (lower) figure for the extra homes to be allocated to Cherwell. The revision should also take note of any reduction in Cherwell's own total which can be used to covert this allocation. So for example the revised housing need on the basis proposed in the consultation document is 20,000, and 2,000 extra houses are allocated from Oxford, then the 2,000 can be covered by leaving the 2015 Local Plan (which provided for 22,840 house to be built) as it is.						
PR-C-0682	08/10/2017	Tara J	Prayag			N	
1673	Comments			Reasons for Participation			
	<p>Based on the plans provided it seems that you have plans to allocate 1410 of 4400 in the Gosford & Water Eaton area. 32% of the total is planned for a tiny community in Oxfordshire which would increase the current area by 108%. This raises several issues:• The original figure of 4,400 has never been tested• These numbers were set before huge changes in the UK economy/political place in Europe and the world• These substantial numbers are to meet the needs of Oxford City. It does not take into consideration the substantial building plan already under way for Cherwell Council and the impact this is already having on the local area in terms of increased traffic trying to access the area.</p>

Proposed Submission Plan - Section 1

PR-C-0736 01/10/2017 Liz & Roy Moore N

1854

Comments

Cherwell's key justification for development of the Green Belt is (item 1) to meet Oxford's urgent need for housing, and notably affordable housing. Not only does it not meet the definition of 'exceptional circumstances' but it is flawed in other important respects. The 2014 SHMA projections of future housing need for Oxfordshire continue to be challenged as overambitious and inflated estimates of future employment growth, measured against current trends and the economic uncertainty of Brexit. The proposed standard methodology for calculating housing need set out in the current NPPF review suggests Oxfordshire's current forecast should be reduced by about a third and Oxford's by a half – considerably lower than the SHMA estimates. The most-recent (2014) DCLG projections of an increase of around 10,800 households in Oxford between 2016 and 2036 is also substantially less than the 28,000 houses Oxford considers necessary to meet its unmet housing need over a comparable time span. Since a realistic and sustainable estimate of future housing need is the critical factor in determining the necessity for Cherwell to accommodate Oxford's unmet housing need, in light of the lower figures arising from the proposed NPPF standardised calculation of housing need, the justification and even legality of Cherwell's current Partial Review must be questioned and the SHMA forecast challenged and reviewed before the consultation process proceeds further.

Comments

Contrary to Cherwell's stated reasons for seeking development in the Green Belt, nowhere in the NPPF or its accompanying guidance does it state that unmet housing need constitutes a valid exception to the prohibition of development on the Green Belt. Cherwell says that the 'exceptional circumstances' do exist and constitute, 12 points quoted from the Plan. NONE of these twelve assertions meet the NPPF definition of 'exceptional circumstances'. They are all unjustified. In respect of item (3), the proposed development would itself cause unacceptable and extensive harm to the existing Cherwell development strategy. All reasonable options have not been considered, and Section 6 below outlines what other option should be considered. Development of economic and social relationships and economic forecasting (items 5 and 6) and the strengthening of Kidlington centre (item 10) are aspirations, not exceptional circumstances. Nor does (item 7) 'place-shaping potential' (which is not defined) constitute exceptional circumstances, and the 'opportunity' [not the intent] to provide improved green spaces and access to the open countryside (item 11) is nonsensical when the proposed large-scale development will itself obliterate swathes of existing countryside and green space. Item 12 barely merits comment – sadly one of many 'visions' expressed in high-flown language that bears no resemblance to the actual outcome of strategic planning decisions.

PR-C-0738 02/10/2017 Mrs Y Thompson N

1871

Comments

Object to the 'exceptional circumstances' justifying this removal of the Green Belt listed at para 5.17 (page 66) are largely implausible and represent a rather pathetic planning exercise to shoehorn in a sufficient number of homes close to Oxford City without regard to the identity of the existing villages of Yarnton and Begbroke, and without effective infrastructure. The Plan Policies PR8 and PR9 are not justified and thus the Plan is UNSOUND. I believe if this plan is approved it will set a precedent that would see other authorities throughout England and Wales to override the Green Belt Policy at will and render it redundant.

Changes Sought

Reasons for Participation

PR-C-0747 06/10/2017 Dr Elizabeth Fry N N N Y

1885

Comments

The figures this proposal was based on are themselves UNSOUND and have been revised down. Surely this means the proposal should be re-thought. Oxford City Council should increase the housing density within the City in line with most modern European Cities. Also many properties are let out to students. Private housing blocks should be built to provide accommodation for students as in other University cities.

Changes Sought

For the reasons given and the representations made by the Begbroke & Yarnton Green Belt Campaign which are additionally supported and adopt as part of this representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.

Reasons for Participation

Begbroke & Yarnton Green Belt Campaign to represent at the Examination should it take place.

PR-C-0761 09/10/2017 David Brown N Y

1917

Comments

The 'exceptional circumstances' listed in the plan for encroaching on the Green Belt speak of "clear economic and social relationships that exist between Oxford and Cherwell's local communities at Begbroke, Yarnton, Kidlington and at Gosford and Water Eaton, and the clear potential to develop these relationships" without in any way stating what these economic and social relationships are. Begbroke and Yarnton have their own churches, their own village halls, their own pubs, their own parish councils; they are separate villages. They are only united now in their opposition to this plan to join their villages together and merge them into one. It is ridiculous to claim a knowledge of 'social relationships' when so little regard is being paid to the views and wishes of those involved. Kidlington is another place, joined to Begbroke and Yarnton by the tenuous link that is Sandy Lane which the plan proposes to close.

Changes Sought

Reasons for Participation

For these varied reasons, the proposals put forward in the plan with regard to the traffic are simply Unsound and Not Effective. Like the Begbroke and Yarnton Green Belt Campaign to act as representative during the Examination by the Planning Inspector.

PR-C-0761 09/10/2017 David Brown N Y

1916

Comments

The plan proposes development that would merge the villages of Yarnton and Begbroke with Kidlington making a huge conurbation on land that is green field Green Belt in contravention of the whole aim of the Green Belt, and the policy on it endorsed by Cherwell District Council as recently as July 2015. The plan purports to be for 'housing need' yet it includes a substantial area around the present Begbroke Science Park for business growth with neither explanation nor justification for this development. The area that has become Begbroke Science Park used to be a farm and ancillary old buildings and its current development as a science park is development on a brownfield site. There is no justification for extending this development into the neighbouring fields of the Green Belt around it. As it is Begbroke Science Park boasts that it is set in a 'rural idyll', and that would be destroyed.

Changes Sought

Reasons for Participation

For these varied reasons, the proposals put forward in the plan with regard to the traffic are simply Unsound and Not Effective. Like the Begbroke and Yarnton Green Belt Campaign to act as representative during the Examination by the Planning Inspector.

Comments

Support with amendments. The consortium recognises the need for an exceptional circumstances case to be demonstrated in order for a review of the boundary of the Green Belt to be undertaken, in accordance with the NPPF, paragraph 83, and taking into account paragraph 1.39 of the Government's Housing White Paper, February 2017.

Changes Sought

Consortium supports the individual elements of the 'exceptional circumstances' case as defined in paragraph 5.17, and recognises their cumulative weight, with some changes. Suggested changes to points 2, 5, 8 and 11 provided. In addition, whilst the existing text at paragraph 5.17 7) speaks of the unique opportunity next to Begbroke Science Park there is no similar explanation of the advantages of the North Oxford Triangle combined sites (PR6a, b and c). In relation to paragraph 5.18, whilst it may not be inappropriate in the Green Belt, it is not necessary to provide for a new golf course to replace the course on the west side of Oxford Road identified as part of site PR6b, and stipulated in clause 21 of Policy PR6b. There are 28 golf clubs in Oxfordshire already and in a declining market there is not the demand to sustain a new golf club. Moreover the current level of membership at the North Oxford Golf Club is not sufficient to fund and maintain a new club facility. Members of the golf club have agreed to relinquish their interest in the present course in return for a capital sum to be reinvested to in an alternative club in Oxfordshire. The allocation at Frieze Farm, under Policy PR6c, should be reconsidered and reworded to make clear that it is not being provided as a compensatory measure. Suggested changes provided.

Reasons for Participation

On behalf of the consortium, given the significance of their land interests, would wish to participate in the oral examination.

Detailed comments on the test of exceptional circumstances for release of Green Belt land provided. The twelve circumstances given in paragraph 5.17 are not exceptional and are no more than general planning concepts. The rationale behind the housing target figures is flawed. Given the recent publication of a draft uniform methodology for calculating housing need and the forthcoming publication of Oxford's own housing figures, it is premature for the Council to press ahead with the allocation plans. The requirement in paragraph B.95 of the Local Plan that a partial review of the Local Plan be completed within two years of adoption is predicated on joint working assessing the additional need for Oxford, which has not been finished. The Inspector only recommended in the Non Technical Summary a joint review of the Green Belt boundaries once Oxford's specific needs were defined, which has not yet happened. The Council's obligation derives only from the agreement of the Growth Board in September 2016 to share the putative unmet housing need. There is no policy trigger, either local or national, which is compelling the Council to pursue the allocation of 4,400 additional units on Green Belt land, in addition to its own local needs. Land use decisions on Green Belt boundaries should not be dictated by decisions made by bodies outside of the planning process. The exceptional circumstances test must be applied to every Green Belt parcel, to minimise harm to the Green Belt. The Plan is based on insufficient evidence base to justify the extent and location of Green Belt release proposed, there has been insufficient consultation at Regulation 18 and linked to this, insufficient consideration given to reasonable alternatives. There was no attempt to refine broad areas of search, or to examine mutually exclusive alternative packages of site options where each package would provide for a quantum of Oxford's unmet needs. The failure in methodology is illustrated with reference to an option at Shipton-on-Cherwell quarry. The Council is not able to demonstrate that the evidence base was in place well in time to inform consideration of options/formulation of the preferred strategy.

Fundamentally, Exeter College considers that both Oxfordshire Growth Board's total apportionment of homes to meet Oxford's unmet housing need and, subsequently, the apportionment figure of 4,400 homes to Cherwell District Council are not supported by the evidence base and are too low to address Oxford's unmet housing need. In addition, Exeter College considers that South Oxfordshire's refusal to accept its Oxfordshire Growth Board apportionment does not mean these homes no longer need to be provided; indeed, it is incumbent to plan for these homes in accordance with the Proposed Submission Plan's vision. The Government is currently consulting on proposals to create a standardised methodology for calculating local authorities' housing need, which would apply to all local authorities in England. The Government is currently consulting on proposals to create a standardised methodology for calculating local authorities' housing need, which would apply to all local authorities in England. The Consultation Document specifically states that 'we [the Government] propose to amend planning guidance so that where a plan is based on an assessment of local housing need in excess of that which the standard method would provide, Planning Inspectors are advised to work on the assumption that the approach adopted is sound unless there are compelling reasons to indicate otherwise.' This approach is supported by Oxford City Council who state that the new figures are only to be considered as a 'baseline' and do not take into account employment growth nor 'reflect the demand for housing' in Oxfordshire.

Revised Housing Targets - The plans are based on out of date numbers produced in 2013/14. In the last month the County's housing target has been reduced and will have a significant impact on the County and District plans that have already been produced. The reduced Oxford City unmet housing needs can now be easily met within Cherwell District's original plans. One of the major issues driving Brexit is control of net immigration, with a nominal target of 100,000 (tens of thousands) has this been taken in to account or has it been assumed that the Government will fail to meet this objective? Long Term Strategy - The current plans to meet Oxford City's unmet housing needs only represent a short-term tactical plan. A strategic plan needs to cover a much greater time frame commencing with more fundamental issues which may be compromised if the Council presses ahead with its current proposed plans. A strategic plan must not be driven purely by housing needs alone. There are other important drivers; long term sustainability, environmental health, pollution issues, protecting the environment we wish to live in, transport, commuting issues, social housing needs, quality of life, etc.

Oxford City has started its Local Plan process well after the other districts. The city draft local plan does not provide a figure for unmet need nor an estimate for how well the city can meet it. Presumably an accurate and robust calculation of the unmet need can only be provided when the city completes its Local Plan. To plan the construction of 4,400 houses which will cause loss of GB land, the coalescence of Kidlington with Oxford, threaten the environment of a world heritage site at Woodstock when there is no robust evidence that these houses are needed is not sensible. Oxford City may well have the capacity to build the majority of its housing need within the city, especially if the estimate is derived from the recent data. It could increase the proposed density of new builds, it could build on brownfield sites and preferentially select to build houses on land that would otherwise be for employment. An example is the proposed Northern Gateway employment area which will attract thousands more vehicles to that area as people commute in from outside Oxford but could be better used for housing.

Changes Sought

The review of the Adopted Cherwell Local Plan is premature and should be suspended until Oxford City has completed its Local Plan and produced a robust figure for the number of houses that it is unable to build. The Inspector for the Local Plan Part 1 specified that a review of the Green Belt should happen but only after the unmet need is fully and accurately defined. If, after Oxford City has a Local Plan in place, Cherwell is called to co-operate with Oxford City by taking extra houses, then there are means for these to be accommodated without building on the Green Belt. Housing density could be increased on several sites in Cherwell as well as in Oxford City. Urban sites can take up to 70 houses per hectare. Higher density houses are necessarily smaller but 63% of Oxfordshire's need is for smaller units.

It is our view that the Proposed Submission Plan represents a positive example of LPA working together to address a strategic cross boundary issue. The Proposed Submission Plan is a focused plan which aims to meet the specific unmet needs of Oxford. The approach taken involves allocating land for 4,400 additional homes in accordance with an apportionment agreed by the Oxfordshire Growth Board (OGB All Council's agreed to the apportionment figures for their area (Table 1 below) except for South Oxfordshire. Earlier this year Thakeham responded to the South Oxfordshire Second Preferred Options consultation for the South Oxfordshire Local Plan (SOLP). At the time South Oxfordshire proposed to make provision for 3,750 dwellings in order to contribute towards Oxford's unmet need. This level of provision results in a shortfall of 1,200 dwellings. In our representation we stated that we considered it necessary for South Oxfordshire to actively try to accommodate the additional 1,200 dwellings. However, South Oxfordshire have recently issued the "Publication Version" of the SOLP which continues to make provision for 3,750 dwellings towards Oxford's unmet need. The opportunity to address the need proactively and to plan positively to address all identified unmet need has therefore not been taken. There does not appear to be any evidence in the Proposed Submission Plan that any discussions have taken place with South Oxfordshire or the other Oxfordshire LPA as to how this shortfall is to be addressed. It is our view that continued and further cooperation is required to meet the remainder of this very substantial unmet housing need with the other Oxfordshire LPA. This is a particularly significant consideration given the unknown capacity of the other LPA to accommodate a similar number of new homes. Whilst we acknowledge that CDC have taken a generally proactive approach to meeting Oxford's unmet need, it is considered that failure to meet the 1,200 dwelling shortfall exposes a weakness in the current DTC across the HMA. There is a risk that a lack of co-operation will result in all Oxfordshire LPA declining to take responsibility for the shortfall. This will make it increasingly difficult for the Oxfordshire LPA to demonstrate a robust housing supply in the future. We consider that further evidence is required regarding the discussions that have taken place to address the shortfall in order to fully comply with the DTC. If the necessary discussions have not taken place it is considered that the Proposed Submission Plan has not been positively prepared as required by the NPPF. There may also be a need to amend the Proposed Submission Plan in light of the necessary discussions in order to allocate additional sites and/or increased flexibility.

The Plan promises to deliver unsustainable growth in housing supply and promote unsustainable commuting patterns. The Plan has considered housing development in isolation as the one and only solution to Oxford's need for affordable housing. It has only considered various housing development schemes in this 'all or nothing' context, when the proportionate evidence suggests that wider policy responses may present more justifiable strategies for addressing the Unmet Need identified by the SHMA. Paragraph 1.11 reads: "Oxford has a high level of housing need and problems of affordable access to the housing market." This bland but no doubt carefully considered sentence encapsulates the Plan's overall lack of integrity. It immediately establishes an erroneous context for all that follows. It seeks to establish the level of housing need as the primary issue with the question of affordability as secondary. It is immediately followed by Table 2, which notes that is "adapted" from the source document, the 2014 SHMA. "Adapted" indeed: most grievously, this table defines its figures for Housing Need as "net" numbers. Thus Oxford is presented in Paragraph 1.14 as having an "objectively assessed" net need for 28,000 new homes for the period 2011-2031. This is a serious misrepresentation of the data presented by the SHMA - a misrepresentation that underpins every argument and conclusion in the Plan. The Plan and the Sustainability Assessment both lack integrity because every part of them proceeds from this misrepresentation. Detailed comments provided on the SHMA. The policy seems entirely self-serving and moreover is in no way consistent with the government's guidance on defining sustainable development. The development proposed in the Partial Review, by imposing a minimum of 2,200 surplus market homes on Cherwell, will cause harm to the delivery of the Cherwell Local Plan by rendering its outcomes unsustainable (for e.g. in terms of commuting patterns, increased congestion and pollution). Thus even by its own definition, the Partial Review is unsustainable and thus Unsound.

Changes Sought

The Plan can only be made Sound by addressing the issue of sustainability - and that means addressing the issue of housing affordability in a wider context than that of new construction. This approach would deliver thousands of unnecessary market homes to Cherwell - a result that flatly contradicts the guiding principle of sustainability in National Planning Policy. The Plan can only be made Sound by recognising the whole range of data in the Evidence Base and basing action upon a reasonable interpretation of that data, rather than cherry picking and misrepresenting data in the tendentious fashion of the Plan as currently presented. It must be noted that certain documents in the Evidence Base, notably the Sustainability Appraisal, are compromised by the fact they explicitly proceed from such tendentious misrepresentations.

We note that West Oxfordshire District Council, Vale of White District Council and CDC seek to meet their full apportionment. However, South Oxfordshire has not agreed to their full apportionment of 4,950 homes. South Oxfordshire District Council's (SODC) emerging Local Plan (Publication Version October 2017), which is currently going through the democratic process for approval only makes provision for an additional 3,750 homes to meet Oxford's unmet housing need (Draft Policy STRAT3: The unmet housing requirements from Oxford City, page 33). A2D seek clarity on how the surplus 1,200 homes from South Oxfordshire will be addressed within the County by the Oxfordshire Growth Board. Will South Oxfordshire be accommodating this unmet need?

Changes Sought

Reasons for Participation

Our objections in part relate to the proposed growth strategy to address Oxford City's unmet need, which we consider to be unsustainable and inconsistent with national policy. This is contrary to the adopted Growth Strategy set out in the Cherwell Local Plan 2011-2031 (Part 1), which focuses new development at key settlements, as identified in Cherwell's settlement hierarchy. The Council has not discharged its duty to demonstrate exceptional circumstances to release the identified sites from the Green Belt, pursuant to paragraph 82 of the National Planning Policy Framework. Further, there is insufficient evidence to suggest that opportunities to increase capacity at existing allocated housing sites have been robustly tested. Finally, there should be a single housing requirement for the Cherwell Local Plan. There is no justification for a separate figure to be applied to meet Oxford City's unmet need, as is currently proposed.

Paragraph 1.42 of the Partial Review states that the "Partial Review is a positively prepared Plan. It avoids undermining the existing Local Plan's development strategy for meeting Cherwell's needs and detracting from the delivery of growth at Bicester, Banbury and former RAF Upper Heyford". CDC should not view the development strategy to meet its own housing needs and its apportionment of Oxford City Council's unmet housing need as separate. A comprehensive approach should be taken which should build on the existing vision as set out in the adopted Local Plan, which seeks to focus growth in and around Bicester and Banbury (Local Plan Part 1, page 10). The vision for the Local Plan Review should address the need to provide a balanced housing supply in locations which are both sustainable and meet the needs of Oxford City Council in a manner that is consistent with the adopted spatial strategy, not contrary. We consider this should be addressed by way of strategic allocations, focused at established settlements with strong links (e.g. transport and socio-economic) to Oxford City. Paragraphs 1.8 and 1.93 of the Partial Review state that the Oxford Green Belt boundaries will need to be amended to deliver Oxford's unmet housing need. Green Belt release is proposed around Kidlington, Begbroke and Yarnton. A2D agrees that identified sites to meet Oxford's unmet need should be well related to Oxford City. However, this does not necessarily mean sites in closest proximity (the majority of which fall within designated Green Belt). It is a question of capacity and contribution to strategic priorities and spatial strategy. A2D question whether CDC has demonstrated exceptional circumstances for revising Green Belt boundaries in the manner proposed. The release of land from the Green Belt generates in our view a comparative assessment of alternatives. We see that no evidence that this this has been undertaken.

It is acknowledged that whilst the emerging Local Plans for Oxford City Council, Vale of White Horse District Council and West Oxfordshire District Council will seek to meet the agreed proportion of Oxford's unmet need, a shortfall of approximately 1,200 dwellings remains across the HMA due to SODC not agreeing to meet the proportion of need identified by the Growth Board. Therefore, at a strategic level the apportionment figures for all other authorities (excluding SODC) should be increased proportionately to ensure positive planning for meeting Oxfordshire's housing needs. Bovis recommend that Cherwell (and the wider Growth Board Authorities) acknowledge this shortfall and seek to meet the residual 1,200 within their emerging Local Plans. Bovis consider that focussing development through Option A (Kidlington & surrounding area) & Option B (north & east of Kidlington) is actually contrary to the adopted Local Plan (2015) given its spatial strategy. Allocating sites within the geographical areas identified by Options A & B in the Local Plan Partial Review is evidently contrary to the adopted Local Plan as it states that there will be no strategic housing growth at Kidlington. It is therefore recognised that the emerging Plan cannot logically be a 'partial review' of the Local Plan (2015) as the emerging allocations fundamentally conflict with the spatial strategy of the adopted plan. It is therefore the view of Bovis that a full review of the plan is required in order to ensure the proper & thorough assessment of impacts resulting from the allocation of sites in & around Kidlington. This should be supported by a fully robust & up to date evidence base commensurate with the need for a full review. Furthermore, Appendix 3 of the Housing & Economic Land Availability Assessment (August 2017) alludes to supporting development in Banbury whereby it states: "1.37 Whilst house prices in Banbury are somewhat lower than elsewhere in the District, there is still very good levels of development activity and housing delivery. Healthy house price rises are evident over the last 12 months, supporting the case that Banbury is an attractive housing market, characterised by good demand for housing. Collectively, this clearly shows that viable residential development occurs in this area." Bovis' land interest to the east of Warwick Road is being promoted as available & suitable for development. Subject to the grant of planning permission the site will be able to contribute immediately towards meeting Oxford's unmet housing needs, in a sustainable & acknowledged suitable location for development, in Banbury.

Comments

The fact that South Oxfordshire District Council (SODC) did not sign the Memorandum of Co-operation in November 2016, remains a fundamental issue, with consequences for the other Oxfordshire authorities. This is further evidenced by SODC publishing its second preferred options consultation on 29th March 2017, where they set out their intention to meet only 3,750 dwellings of Oxford's unmet needs, leaving a shortfall of 1,200 dwellings against the requirement for the Oxfordshire Housing Market Area. In light of this, it is contended that the 4,400 dwellings that CDC have agreed to provide to meet a proportion of Oxford's unmet housing needs, cannot be viewed as a definitive figure. Given the sustainable development opportunities remaining with Cherwell District we consider that it should take a greater proportion of Oxford City's unmet needs. Whilst it is acknowledged that CDC is aware of its obligations to comply with the Duty to Cooperate, & has sought to discharge the statutory requirements, the Local Plan Part 1 Partial Review should not progress until the issue of how & where Oxford's unmet needs are to be met is resolved. Representation includes 3 x Appendices: 1: Five year housing land supply report, August 2017, Turley, 2: Site location plan, 3: Illustrative masterplan.

Incorrect consultation form used. Comments relate to proposed submission plan. Cherwell's Contribution to Oxford's Housing Needs - The number is only appropriate for current Local Plan preparation purposes. It will need to be reviewed very soon as the Government has recently revised Oxfordshire's housing requirement downwards. It will also need to be reviewed in the light of Oxford City's Local Plan, which is also being consulted on. Since any reduction in Oxford's requirement will come off the numbers sought outside the City such reductions would be heavily 'geared'.

Comments Paragraphs 1.12 and following make reference to Oxford's housing need as identified in the 2014 SHMA. However in September 2017 government proposed a new methodology for calculating housing need which significantly reduces the forecast need for Oxford. Leaders of both Oxford City and Cherwell District councils have argued that the supporting documents and associated calculations supplied with the new methodology produce a figure near to that in the SHMA when factors such as projected employment growth and factored in. However, until the full implications of the new methodology are fully analysed and agreed, in public, those assumptions cannot be regarded as reliable. It is clear therefore that the CDC review process should be paused while the revised numbers are fully assessed, in order to guarantee public confidence. The current plan cannot be regarded as sound if it relies on housing need figures which are different from the most recent figures produced by government. The procedural and Duty to Cooperate undertakings at para 1.15 also cannot be relied on for the same reason.								
Changes Sought At the end of Section 1, add text which states that the Memorandum of Understanding agreed at the Growth Board in November 2016 cannot be relied upon in the light of the new projected housing need figures issued in September 2017, and that this review is paused until the full implications of those figures are assessed and agreed				Reasons for Participation To ensure full representation of the views and concerns of local people by their elected representatives

4890	<p>Comments</p> <p>EXCEPTIONAL CIRCUMSTANCES JUSTIFYING THE DESTRUCTION OF THE GREEN BELT NOT PROVEN There is significant doubt whether Oxford has an 'unmet' housing need at all. The Government is currently revising the way housing need is calculated. On top of this, if Oxford prioritised the provision of housing over other development, it would easily be able to meet its needs. It had the perfect opportunity to provide affordable/social housing on the large development on council land adjacent to the A40 northern bypass at Barton, but instead a lot of the housing there will be far too expensive for key workers and young people to afford. No account has been taken of the Brexit effect. According to the ONS report for 2016, net migration is falling and this trend is likely to continue as EU citizens return to their own countries. In 2016 117,000 EU citizens left the UK, up 31,000 from 2015. Post Brexit, when immigration controls are more stringent, net migration is expected to fall further. Less housing will be required. There is no justification for destroying the green belt.</p> <p>Changes Sought</p> <p>For the reasons I have given above AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which I additionally support and adopt as part of my own Representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.</p> <p>Reasons for Participation</p> <p>Would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.</p>

4903	<p>Comments</p> <p>While agreeing with the fact that Oxford has a high level of housing need it cannot be agreed that Oxford cannot meet the need by itself. The statement that there are clear and exceptional reasons for providing development within the GB suggest that the strategy is based on a foregone assumption/conclusion that the Oxford City's unmet housing need cannot be met unless development is carried in the GB. There has not been a comprehensive study to look into the option of developing brownfield sites within the city to build medium (or high rise if necessary) blocks of flats as has been done in London and in other major cities all over the world. Further it is debatable if housing development in the GB will provide affordable and sustainable travel opportunities to Oxford City's places of work. With the current fast rail transport to city of London it will attract a high percentage of workers who commute to London thereby pushing the housing market up in areas outside the city boundary. It is very unlikely that the key objectives SO10, SO11, SO12 and SO13 will be achieved. Particularly on SO11 and noting the flood risk outlined at 3.20 of sustainability appraisal report, measures to deal with increased run off from new development is not adequately addressed.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							

PR-C-1621	09/10/2017	Rufus	Nicholson			N	N	Y
5591	<p>Comments</p> <p>Because Oxford City Council has not yet identified its own housing needs to 2036, it is not procedurally compliant of CDC to unilaterally produce housing targets based on its own assumptions of OCC's as-yet-undecided future needs and/or the dubious figures proffered by the SHMA and the Oxfordshire Growth Board. This situation in fact shows evidence of a lack of cooperation between local authorities, which is in conflict with the Duty's requirement for councils to "engage constructively, actively and on an ongoing basis". Whether any joint working has indeed taken place or not, there are, however, two ways in which CDC is applying this legislation deceitfully, or at least wrongly. Firstly, CDC is not so much working in partnership with another local authority on this matter as with a regional economic pressure group - namely the Oxfordshire Growth Board. Ostensibly the OGB exists to facilitate cooperation between the various district councils of Oxfordshire, but in reality it is (as the name reveals) an organisation which is concerned with driving economic growth. Questioning the status of the Oxfordshire Growth Board. CDC's claim to be bound by DTC legislation to adhere to the figure of 4,400 houses for OCC may then be baseless, repeated only for the ulterior motive of assisting in the supply of housing to meet the intentions of the county-wide OxLEP Strategic Economic Plan. CDC evidently would like this directive to mean that it must agree and accede to all the demands of the partner local authority (supposedly Oxford City Council) with no possibility of rebuttal or compromise; in this case the demand is to build 4,400 houses, and CDC apparently sees no possibility to alter this figure in any way. The DTC legislation says, however, that this stance is wrong.</p> <p>Changes Sought</p> <p>Proposed changes suggested on 6 points: Strategic Economic Plan; unmet housing need; SHMA; Oxford's housing capacity; apportionment; and options.</p> <p>Reasons for Participation</p> <p>Would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.</p>							

PR-C-1621	09/10/2017	Rufus	Nicholson		N	N	N	Y
5534	<p>Comments</p> <p>If Oxford City Council ('OCC') believed this statement to be true, it would not be prioritising large areas of land such as the future Northern Gateway zone for employment use rather than for housing. The fact that OCC is, however, planning to convert the Northern Gateway zone into a primarily industrial area is evidence that it does not think there is currently a pressing need for housing in the city. Furthermore, OCC has not completed its current consultation about its own Local Plan to 2036 (Oxford Local Plan 2036 Preferred Options consultation), in which housing needs are one area of enquiry. Because this legal and procedural process relating to Oxford's housing needs has not yet been completed, Cherwell District Council ('CDC') is therefore 'jumping the gun' in drawing conclusions about it, and making premature and false claims about the level of need. Sections 1.12-1.14 then go on to detail the future housing needs of OCC, and the basis of the figures involved, which originally emerged in the Oxfordshire Strategic Housing Market Assessment ('SHMA') document of 2014. Although it has always been claimed in official council communications that these figures are 'objectively-assessed', they have in fact been the subject of much controversy and criticism because they are likely to be biased in favour of excessive development (having been compiled by a company specialising in property consultancy). Reference made to the independent report commissioned by CPRE (Unsound & Unsustainable). One significant defect in the SHMA, not apparent at the time it was produced, is that international migration into Oxford is likely to be considerably lower than predicted in that document in the light of the UK's imminent withdrawal from the European Union. The 13,000 houses in the calculation added as a result of predicted future international immigration to Oxford (ibid .) is therefore certain to be wrong. Many of the respondees to CDC's last consultation on this issue were highly critical of the SHMA. CDC, however, is turning a blind eye to the inaccuracies and criticisms of the SHMA , even brazenly and ridiculously claiming that "there is no evidence not to rely on the SHMA " (ibid . p.23). Making the forecasts of the SHMA still more inaccurate is the recent news that government methodology for calculating housing requirements is changing, to the effect that Oxford now needs only around half of the original quota specified in the SHMA. If Oxford chose to adopt such a revised figure as its target, there would be no need for any adjoining local authority to accept any 'unmet need', and therefore no controversy over the location of such housing. Oxford City Council has not yet decided itself how many houses it should build up to 2036. Reference made to Oxford City Council's latest Plan and evidence. Proposed destruction of the Green Belt by building on parts of it, and so is not consistent with national policy. Such development would also not be 'sustainable'. The Cherwell/Oxford Green Belt is a natural border, highly valued by local people for its environmental, visual and recreational value, and unique SSIs, SSSIs and history. It fulfils personal and communal needs. Development on it would deprive future generations of the same benefits, and thus must be considered unsustainable and unviable.</p> <p>Changes Sought</p> <p>Proposed changes suggested on 6 points: Strategic Economic Plan; unmet housing need; SHMA; Oxford's housing capacity; apportionment; and options.</p> <p>Reasons for Participation</p> <p>Would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.</p>							

Proposed Submission Plan - Section 2

PR-C-0413	10/10/2017	Theresa	Goss	Bloxham Parish Council				
1975	<p>Comments</p> <p>Any proposals for development to meet this need in the rural villages in the north of the district such as Bloxham, or Adderbury, Milcombe and Deddington for example, where there has already been significant development on greenfield sites could undermine the strategy of the Local Plan. The Local Plan seeks to concentrate development on the urban centres of Banbury and Bicester and at Upper Heyford and recognises the significant contribution to new housing that the rural areas of the district have made in recent years. BPC firmly believes that meeting Oxford's need</p>

1279	<p>Comments</p> <p>It is noted that Nine Areas of Search which included 143 sites were assessed. The areas that were selected as appropriate to meet Cherwell's proportion of Oxford's city's unmet needs are in close proximity to Oxford, i.e.. Option A & Option B as set out in para 2.19 as these locations would not undermine the delivery of the development strategy for meeting Cherwell's needs as set out in the adopted LP. A separate, complementary spatial strategy for this separate housing requirement is therefore supported. The proposed distributions, at locations adjacent to Oxford, with sustainable transport connections all take account of the origin of the unmet needs. It is noted that Options A & B accord with points 1 - 6 below. 1 the proximity to Oxford, the existing availability of public transport, the opportunity to maximise the use of sustainable and affordable transport in accessing Oxford's key employment areas and services and facilities 2. the opportunity to achieve an overall, proportionate reduction in reliance on the private motorvehicle in accessing Oxford's key employment areas & services & facilities & to achieve further investment in sustainable transport infrastructure 3. the deliverability of sustainable transport improvements in comparison to other Areas of Search 4. relationship of existing communities to Oxford 5. existing economic relationship between the areas of search & Oxford 6. the opportunity to provide affordable homes to meet Oxford's identified need close to the source of that need. It is noted that in order to ensure that the necessary housing supply will be maintained this will be managed by maintaining a separate five year supply of housing sites to specifically meet Oxford's unmet needs within Cherwell (Policy PR12a).</p> <p>Changes Sought</p> <p>Dorchester Group whilst not directly seeking changes to the Partial Review consider that this is a challenging strategy and much rests on the deliverability of the locations identified to meet the unmet needs of Oxford. If needs fail to be met then land at Upper Heyford could play a significant role. Area of Search F provides a sustainable option to meet the unmet needs of Oxford City as it is well-related to Oxford by way of a rail connection. Area of Search F also provides the most sustainable, deliverable option to meet the needs of Cherwell in the longer-term.</p> <p>Reasons for Participation</p> <p>Dorchester Group is concerned that the unmet needs assigned to Cherwell district are met in the most appropriate and effective locations and that the proposed locations delivery within the timescale.</p>							
PR-C-0567	09/10/2017	Dr Ian	Scargill	Oxford Green Belt Network		N	N	Y
1434	<p>Comments</p> <p>OGBN disagrees with the justification and fundamental basis for this plan. It is founded on the assumption of a step change to historic levels of growth in Oxfordshire, amounting to more than doubling of growth in population, housing and employment. Because of this the plan suggests that the long established strategy of diverting growth away from the city of Oxford towards the country towns is no longer feasible. OGBN disagrees with this because the proposed levels of growth are unrealistic, unproven and therefore unjustified. We consider that the arguments for a strategy to divert growth away from Oxford remain as strong as ever. An essential part of that strategy is the GB, which Cherwell Council supports. However in order for the strategy to work, the GB has to be retained in its entirety. It is not a collection of land parcels that can be picked off one by one. It is inconsistent of Cherwell to support the GB and yet to seek to build on it. It is not possible for Cherwell to satisfactorily produce this review in isolation. Oxford is surrounded by four other authorities and planning needs to be coordinated strategically between all five councils. Infrastructure needs have to be planned across boundaries and certainly cannot be confined to the limited areas covered in this review. The Growth Board has not been an effective mechanism for strategic co-ordination and its analyses of spatial options to date have been simplistic. The Councils – while claiming to be cooperating – have largely acted according to their own agendas. Oxford City Council in particular has sought to promote economic growth within the city, by protecting employment sites, without any regard of the consequences of this for the surrounding Districts such as Cherwell. It appears to be part of its own strategy to expand beyond its borders into the GB, again ignoring the purpose of the GB to protect the character of the historic city. This review cannot be effective without a well founded spatial strategy for the county. We also argue that this strategy should include a commitment to retain the Green Belt in its entirety.</p> <p>Changes Sought</p> <p>The plan should be withdrawn and a spatial strategy for Oxfordshire established which can address the issues addressed in this review in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should (a) discourage further employment generating development in the city unless it is absolutely essential and (b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.</p> <p>Reasons for Participation</p> <p>OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination is necessary and justified because of our longstanding interest and understanding of the Oxford GB.</p>

1675	<p>Comments</p> <p>In points 1-3 you refer to Gosford & Water Eaton Parish land as North Oxford and continue to do so throughout this document. This assumes that the land has already been put aside for Oxford City and that this entire process is a farce and a lie and that deals have already been made. This land is Gosford & Water Eaton Parish which is a self-contained community separate from North Oxford and Kidlington. As a resident here this feels like a parody of a process – not least because of the complexity of the documentation!</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							

Proposed Submission Plan - Section 2

PR-C-0787	10/10/2017	John L	Broad	CPRE Cherwell South District				N
2013	Comments							
<p>The sites would increase commuting to Oxford, less well situated for Oxford, would not provide the money that might be available for transport, etc. All of these reasons also apply to the proposed developments in the GB although, admittedly, are a bit nearer. What seems to have been forgotten in this range of options is the employment aspect for Oxford City. There is little point in taking valuable housing land within Oxford City for employment, then expecting the employees for the proposed employment to commute from the massive housing estates in the GB along with all those already commuting into Oxford. What is more sensible is to place these employment requirements in areas already allocated for them such as at Bicester, where we were promised the very high tech, university spin off industries for the already allocated employment sites. Bicester also has the housing in the CDC plan for these industries.</p>

PR-C-0787	10/10/2017	John L	Broad	CPRE Cherwell South District				N
2014	Comments							
<p>Agree with the Options A and B. It is interesting that the reasons listed are all ones agreed with but not for the locations suggested. Each reason describes why Oxford City needs to allocate its available land for housing at a reasonably high density rather than use it for employment. The list of bullet points we agree are applicable to Oxford City but not to the proposed massive housing developments in the GB! The proposed development will require extensive new transport infrastructure whereas this is much less within the City. The proposed development is too far out of the City to make the statement that if built it would reduce reliance on the private motor vehicle. The deliverability of sustainable transport improvements is easier within the City. There would be no need for any improvement if the employment were located in Bicester, for example. The relationship of existing communities to Oxford will be destroyed, as Begbroke, Yarnton and Kidlington would be combined into an urban sprawl joined to north Oxford. This 'coalescence' is in direct conflict with the policies in the CDC approved Local Plan! Whilst there is the opportunity to provide affordable homes in the proposal, this is unlikely to happen at the densities suggested. The developers will not wish to build affordable homes as they would reduce their profits. If the density is increased then there is more opportunity to build affordable homes and the land take from the GB would be substantially reduced. The last part of that bullet point sentence is correct in stating that the proposed homes need to be "close to the source of that need"; that is within the Oxford City limits.</p>

PR-C-0839	10/10/2017	Peter	Williams	Aylesbury Vale District Council	Y	Y	Y	
2274	Comments							
<p>Considers the Cherwell LP 2011 - 2031 to be sound & considers that the Duty to Cooperate has been met with regard to cross boundary issues relating to Aylesbury Vale & Cherwell. In particular it is considered that the strategy of meeting Oxford's unmet housing need by limited changes to the GB around Oxford is preferable to any locations away from Oxford & elsewhere within Cherwell as it reduces the potential for development to generate cross boundary traffic along the A41 between Bicester & Aylesbury. The approach to Arncott on the boundary between the two council areas is therefore supported as it reflects the poor access of the location to the employment areas of Oxford which leads to the area being an unsuitable location for meeting Oxford's unmet housing needs. It is noted that the Oxford-Cambridge Expressway is addressed in the Wider Context section of the Plan & the cooperative approach to the Expressway as set out in paragraph 5.64 is particularly supported. It is assumed that the reference at paragraph 5.156 to the delivery of strategic infrastructure emerging from countywide needs including that identified in the Oxfordshire Infrastructure Strategy encompasses the future cooperation in relation to the A41.</p>								
Changes Sought				Reasons for Participation				
<p>For information, the reference in the Plan to "The emerging Vale of Aylesbury Local Plan (Draft Plan, 2016) proposes 33,300 new homes to be built in the district in the period to 2033" whilst factually correct should be amended to reflect the figure of 29,016 as contained in the published Vale of Aylesbury Local Plan September 2017.</p>

2374	Comments							
<p>To accommodate Oxford Housing needs, it would be best served by Kidlington. From the road users point of view, there are more travelling south, from North Oxon, than can be properly accommodated making further developments in the north of the county unsustainable. It makes sense for Oxford's needs to be met as close to Oxford as possible, for those journeying to work, local facilities and the general quality of life. In North Oxon, there are many villages which have already had large housing estates imposed on them; the upshot being that their rural character is being lost and these settlements could rapidly become nothing more than dormer communities. Adderbury, Bodicote and Bloxham have already taken more housing than seems fair, whilst other towns and villages closer to Oxford, seem to have escaped such treatment. Oxford's housing need should be met closer to the city, in those places with superior transport connections.</p>

<p>The representations are submitted on behalf of my client Bonnar Allan with regard to their proposals at New Alchester. The land is identified in the Vision document attached to these representations and will include up to 7,200 new market & affordable homes, primary & secondary schools, creation of a 240 acre country park & watersports centre & the potential to incorporate a new Park & Ride site with connection to the railway line south of Bicester by a new railway station. Our comments on the PSP are confined to issues of soundness. A summary of the alternative Options A to I that CDC considered at the last stage of the Plan is set out at paragraph 2.12. For the reasons we set out in our representations to that stage, we consider that the CDC's proposed approach of allocating land to the north of Oxford & within the Green Belt (GB) around Kidlington as set out in para 2.18 is flawed, & that the Partial Review does not pass the test of soundness. The PSP is not Justified as in our view it does not represent the most appropriate strategy for meeting Oxford's un-met housing needs. The logic that appears to underlie the PSP is in essence that the closer the proximity of the required housing to the City, the more sustainable it will be. This logic ignores the fact that there would be better prospects of residents travelling into Oxford as well as the major employment locations in the Science Vale by public transport including by rail from New Alchester. The preferred locations around Kidlington will increase congestion on the highway network & will result in the loss of GB & lead to coalescence between Kidlington, Begbroke & Yarnton, whereas the proposals at New Alchester are located beyond the GB. As we make clear in the Vision document, our proposals can be delivered in a phased manner & there are no impediments to early delivery. The scale of the proposals at New Alchester allows it to meet both the identified needs of Oxford City as well as an element of the future needs of Cherwell District, & in so doing, we recognise the journey that this proposal involves.</p>								
Changes Sought				Reasons for Participation				
<p>We consider that the PSP should direct a majority of the un-met need to New Alchester which constitutes a more sustainable & justified location for the new homes needed both to meet the City's un-met needs as well as future need within Cherwell District. The PSP should be re-drawn to allocate land at New Alchester in place of the proposed allocations in the Green Belt (GB) around Kidlington. New Alchester can provide a highly sustainable location for the much needed development, at a location outside the GB & on the railway line into Oxford. The development would facilitate creation of a new railway station at New Alchester which would encourage people to travel to Oxford City & also other employment centres within the Science Vale by public transport.</p>

Paragraph 2.12 of the Partial Review9 sets out the 9 ‘Areas of Search’ across Cherwell which were considered as potential broad locations for growth as set out in the supporting Sustainability Appraisal (June 2017). Section 7 of the Sustainability Appraisal sets out the broad locations for growth. Paragraph 7.12 of the Sustainability Appraisal 10 states that the Areas of Search have been “identified having regard to the location of urban areas, the potential opportunities to develop on previously developed land, received site submissions and ‘focal points’ or nodes that might be developable”. As set out above, the Local Plan Review should address the need to provide a balanced housing supply in locations which are both sustainable and meet the needs of Oxford City Council. This does not necessarily mean sites in closest proximity to Oxford City. There should be a single comprehensive approach to meeting Cherwell and Oxford City Councils’ needs. The adopted spatial strategy within the adopted Local Plan is to focus the build of the proposed growth in and around Bicester and Banbury (Local Plan Part 1, page 10). The identification of reasonable alternatives should have commenced with a review of settlements with good socio-economic and transport links to Oxford City, the capacity of existing strategic allocations in these locations (i.e. NW Bicester – Policy Bicester 1), and whether they can accommodate additional housing. ‘Areas of Search’ A, B and C are all found in Kidlington. A2D acknowledge Kidlington is located in close proximity to Oxford, however, the settlement is classed as a ‘Village Centre’ under the Council’s existing settlement hierarchy (Policy SLE211). The adopted Local Plan settlement hierarchy focuses development in Bicester and Banbury. In accordance with the Council’s settlement hierarchy, development should be directed towards Bicester and Banbury as the top tier settlements and all sites within these settlements should be exhausted before considering alternatives and directing development to the second tier settlements which include Kidlington. Growth at Bicester has not been rigorously tested. The Council acknowledge at Paragraph 7.8912 of the Sustainability Appraisal that: “...Areas of Search A and B would be inconsistent with the existing Local Plan strategy of mostly avoiding development in the Green Belt”. Paragraph 83 of the NPPF (2012) states that Green Belt boundaries should only be reviewed in exceptional circumstances. We question whether exceptional circumstances have been demonstrated, on the basis that Oxford City’s unmet need could be met elsewhere in the District outside of the Green Belt, in keeping with CDC’s adopted growth strategy. Opportunities to intensify development at existing allocations should be explored to ensure continued sustainable patterns of growth in accordance with Paragraph 84 of the NPPF13. There is insufficient evidence put forward that accompanies the Partial Review to suggest that opportunities to increase capacity at existing allocated housing sites, such as NW Bicester (Policy Bicester 1), have been robustly tested. ‘Option E: Bicester and Surrounding Area’ includes the strategic allocation at NW Bicester, the boundary of which is defined by the Masterplan Site Area in the NW Bicester SPD (February 2016). As stated in Paragraph 2.1814 of the Partial Review, ‘Option E: Bicester and Surrounding Area’ was discounted on connectivity and transport links to Oxford (reasons 1-4), strategic investment (reason 5) and concerns that additional development could not be accommodated (reason 6). A2D dispute all these reasons. In response to reasons 1-4, we argue that Bicester is situated in a prominent location within the Oxfordshire ‘knowledge spine’ and the wider ‘Oxford Cambridge Arc’. The Site benefits from its close proximity to the M40 and the major strategic link road (Application 3: reference 14/01968/F dated February 2016), which will improve site connectivity and support the major scale proposed development at NW Bicester. Bicester also has good rail access. Bicester North and Bicester Village Stations are located on the Chiltern Main Line with regular train services to Oxford, London Marylebone, Banbury, Birmingham Snow Hill and Stratford-upon-Avon. There are also further significant planned infrastructure improvements that will enhance Bicester’s connectivity including the future phases of the East West Rail (also referred to as the Varsity Line). Considering the scale, quality and type of existing and planned infrastructure, as well as its existing strong transport links to Oxford City, we consider Bicester to be the ideal location to accommodate housing to meet both Cherwell and Oxford City’s needs, rather than smaller settlements such as Kidlington, which have limited infrastructure. Significant infrastructure development is required at Kidlington to support the level of growth envisaged in the Partial Review. The timescales, costs and land use implications of this require consideration. In response to reason 5, there is significant planned strategic infrastructure investment as part of the NW Bicester Masterplan. Most notably, A2D secured resolution to grant in February 2016 for a major strategic link road and railway bridge (Application 3: reference 14/01968/F) that will improve connectivity within Bicester. In response to reason 6, A2D considers additional development could be accommodated at NW Bicester. Our client can demonstrate that land controlled by A2D at NW Bicester is capable of accommodating additional housing need. We consider there to be an opportunity to review the efficiency of the NW Bicester Master Plan and its ability to meet additional housing need. In addition to the above reasons for discounting Growth Option E, Paragraph 7.80 states: “Additional significant development in the Bicester area would provide unwarranted competition for private and public investment potentially hindering the delivery of existing Local Plan policies by 2031”. We refute this reason as it is not a valid reason in respect of Bicester. Whilst we accept that the Council must consider market signals, there is no evidence to support such a restriction. Strategic Allocation (Policy Bicester 1) has identified NW Bicester as being able to deliver 6,000 homes, 3,293 of which are anticipated to come forward within the plan period (up to 2031). The trajectory for NW Bicester, as set out in CDC’s Annual Monitoring Report (March 2017) which covers the period 1 April 2015 – 31 March 2016, anticipates the delivery of 2,998 total homes at NW Bicester including 393 homes at the Exemplar site and 2,605 homes at NW Bicester (Phase 2) up to 2031. A2D considers further housing can be delivered at NW Bicester within the plan period and the Site can make a significant contribution to Oxford’s unmet housing need and Cherwell’s housing need.

Changes Sought

Reasons for Participation

Our objections in part relate to the proposed growth strategy to address Oxford City’s unmet need, which we consider to be unsustainable and inconsistent with national policy. This is contrary to the adopted Growth Strategy set out in the Cherwell Local Plan 2011-2031 (Part 1), which focuses new development at key settlements, as identified in Cherwell’s settlement hierarchy. The Council has not discharged its duty to demonstrate exceptional circumstances to release the identified sites from the Green Belt, pursuant to paragraph 82 of the National Planning Policy Framework. Further, there is insufficient evidence to suggest that opportunities to increase capacity at existing allocated housing sites have been robustly tested. Finally, there should be a single housing requirement for the Cherwell Local Plan. There is no justification for a separate figure to be applied to meet Oxford City’s unmet need, as is currently proposed.

Supports the overall spatial strategy, Vision & the new Spatial Objectives (SO16-SO19) as they specifically & positively respond to the issue of meeting Oxford’s unmet need, & recognise that the strategy needed to be different to that of meeting the wider district needs. The strategy reflects how important it is for the sites to have a good spatial relationship to Oxford, & incorporates essential planning principles which align with those identified & agreed in the joint studies undertaken under the Growth Board; The strategy seeks to locate development so that it is well-connected to Oxford & supports the city’s economy (Policy PR4a); & in addition it seeks to offer people convenient affordable & sustainable travel opportunities to the city’s places of work, services, & facilities; These guiding principles are all welcomed. Supports the sites proposed in the Plan (Policies 6-10), which the evidence base demonstrates will offer residents good relationships to Oxford & sustainable travel options for accessing work & other requirements in Oxford. Welcomes how cross border issues including affordable housing & transport have been addressed for the sites which adjoin the administrative boundary, in order to achieve a joined up approach to design & integrated communities, particularly the links to the Northern Gateway site, access to Oxford Parkway station, & the sensitive consideration of Cutteslowe Park (Policy PR5).

Issue of soundness
At paragraph 2.14 of the Part 1 (Partial Review) Plan it is contended that other options for accommodating Oxford’s unmet housing needs include (6): ‘the likelihood that significant additional development could not be built at Bicester, Banbury and RAF Upper Heyford by 2031 in addition to that in the existing Local Plan (2015)’. The housing trajectory for upper Heyford is 150 dwellings per year. This level of delivery is significantly lower than other major allocations in the Part 1 Plan. The attention to place making and the quality of the urban environment is capable of supporting an increase in housing delivery, particularly following the completion of the community hub. The accessibility of Upper Heyford to the station (with a travel time of 15 minutes, and 12 trains per day) enhances the market delivery, and the opportunity this site, with the adjoining EP Barrus land, provides to meet some of Oxford’s unmet housing needs on land beyond the Green Belt. Upper Heyford Railway Station is within 3.3m of Chilgrove Drive – offering the opportunity to travel other than by motor car." Refers to the NPPF Para’ 79 on GB, the GB 5 purposes (NPPF Para’80), GB exceptions (NPPF Para’89) and Chapter 1 of the White Paper Fixing Our Broken Housing Market to support the submission.

Proposed Submission Plan - Section 2

PR-C-1516	09/10/2017	Councillor Gillian	Hopcroft					N
5101	Comments There is no proof that affordable housing is actually deliverable.							
	Changes Sought				Reasons for Participation			

PR-C-1518	09/10/2017	Peter	Frampton	Framptons on behalf of Lone Star Land Ltd	Y	Y	N	Y
4775	Comments Not Positively Prepared. Not Justified. Not Effective. Not Consistent with National Policy. These submissions are made on behalf of Lone Star Ltd who control the land hatched red as identified on the accompanying plan (Drawing PF/9634.01 LS). A separate submission has been made on behalf of EP Barrus which controls the land hatched blue on the plan. The two landowners are in discussions for a planned release of the two landholdings. The land held by Lone Star Ltd extends to some 11.7 hectares. As shown on the accompanying plan, the land interest adjoins the area of land identified for housing within the Core Strategy Villages 5. A resolution to grant planning permission has recently been made for 79 dwellings on land abutting this land holding (Ref: 15/01357/F). Policy Villages 5 sets out specific design and place making principles including avoiding development on more sensitive and historically significant sites at RAF Upper Heyford, the retention of features which are important to the character and appearance of the site; encourage biodiversity enhancement and secure environment improvement. It is submitted that this landholding displays similar physical and environmental characteristics to the adjoining site, which has a resolution to grant planning permission (albeit acknowledged that the site does not lie within the potential development area as shown on the Proposals Map). This is a detailed submission with references to: The Upper Heyford Landscape and Sensitivity and Capacity Assessment, The Upper Heyford Assessment Interim Final Report 2014, Issues to Soundness and Green Belt Policy. The land identified (red and blue) has a gross site area of some 11.7 hectares. Assuming a 70% gross to net development area to allow for green infrastructure, the dwelling capacity would be 245 new homes (density 30 dph). Developer interest in the land exists. There are no know physical constraints to development. This submission propounds that the allocation of the land edged red on the accompanying plan - as a parcel of land, or in conjunction with the land edged blue at Upper Heyford for housing development would: - Promote a sustainable pattern of development consistent with 'the most sustainable strategy for the District (IR 212) including new homes at RAF Upper Heyford' to meet some of the displaced housing need from Oxford. - Reduce the extent to which GB land may be required for housing to meet displaced housing need from Oxford, and hence - Comprises a reasonable alternative to the loss of GB.

	To participate in the Examination as to whether the Council has properly applied Green Belt Policy.							

PR-C-1542	10/10/2017	Cllr Andrew	Gant	Oxford City Council Liberal Democrat group	N	N	N	Y
4846	Comments Considers that both CDC statements "considered reasonable alternatives" and that it has demonstrated "clear, exceptional circumstances for development within the Oxford GB" are unjustified, non-compliant and unsound as a result. "Reasonable alternatives" must include sites which are within reasonable commutable distance of Oxford but avoid the coalescence of Oxford and Kidlington and northward urban sprawl of Oxford, as required by the NPPF. This must mean that, for example, the Shipton Quarry site is appropriate to meet Oxford's housing need. Similarly, building on both sides of Oxford Rd (policies PR6a and PR6b) clearly breaches the NPPF requirement that settlements must not coalesce. The alternative site at Frieze Way, currently allocated as a replacement golf course, would not have that effect. These alternatives have not been sufficiently considered. Oxford City Council has re-stated the legal definition of GB that among its principal characteristics are "openness" and "permanence" The Council is right to do so. This is not consistent with the assumptions in this plan. We do not believe an "exceptional need" has been demonstrated to justify the breach of GB principles in the way the plan does. The need could be accommodated with far less damage to the GB by better and different use of some of the allocated sites, and by more consistent consideration of alternatives. Without such consideration, the plan is procedurally non-compliant, legally non-compliant with definitions of GB, and unsound in its consideration of alternatives.							
	Changes Sought				Reasons for Participation			
	A fundamental review of site allocations is required, acknowledging that Green Belt must remain open and permanent, as required by the NPPF. Alternative sites within "easy commutable distance of Oxford" which do not cause urban sprawl or coalescence should be more proactively considered.				To ensure full representation of the views and concerns of local people by their elected representatives			

Page 1922

PR-C-1566	10/10/2017	Omattage G	Kumara					N
4903	Comments While agreeing with the fact that Oxford has a high level of housing need it cannot be agreed that Oxford cannot meet the need by itself. The statement that there are clear and exceptional reasons for providing development within the GB suggest that the strategy is based on a foregone assumption/conclusion that the Oxford City's unmet housing need cannot be met unless development is carried in the GB. There has not been a comprehensive study to look into the option of developing brownfield sites within the city to build medium (or high rise if necessary) blocks of flats as has been done in London and in other major cities all over the world. Further it is debatable if housing development in the GB will provide affordable and sustainable travel opportunities to Oxford City's places of work. With the current fast rail transport to city of London it will attract a high percentage of workers who commute to London thereby pushing the housing market up in areas outside the city boundary. It is very unlikely that the key objectives SO10, SO11, SO12 and SO13 will be achieved. Particularly on SO11 and noting the flood risk outlined at 3.20 of sustainability appraisal report, measures to deal with increased run off from new development is not adequately addressed.							
	Changes Sought				Reasons for Participation			

Proposed Submission Plan - Section 3

PR-C-0237	15/09/2017	Karen	East	TMP Planning Ltd on behalf of Gosford and Water Eaton Parish Council				N	Y
809	Comments The 4400 figure is a working assumption to be tested. Our view is that it should not therefore be considered as given that Cherwell should provide 4400 new homes. Of this 4400 figure 1410 is allocated in Gosford and Water Eaton Parish and represents 32% of the total. There are currently 676 dwellings within the Parish so these proposals for 1410 dwellings will lead to a 208% increase in number of houses in the Parish. This is a substantial figure which in our view needs to be fully tested in terms of its impact on the Parish and its residents. We set out in other parts of our response why we believe that the figure is inappropriate given the impact on existing communities, the environment and transport infrastructure. 2. 4400 is not a figure representing true unmet need. It should be continually reviewed in light of Oxford's ability to accommodate its own needs which will change over time and therefore the 4400 figure (of which 1410 or 32% of the total is within Gosford and Water Eaton Parish) should not be taken as a fixed figure for Cherwell to provide. The Parish Council believes that housing need should be based on up to date economic forecasting. Brexit has already seen a down turn in EU research funding and a decline in the level of recruitment by the University. Employment is not set to grow any further at this time. An independent review of the economic forecasting should be undertaken which takes these factors into account, as they could affect future housing needs.								
	Changes Sought				Reasons for Participation				
	The Plan should give greater recognition to the need to test the 4400 figure considering its impact on local communities and the environment				The Parish Council would wish to take part in order to explain the potential impact of the proposed development on local communities and why this should be better reflected in the draft vision.				

Proposed Submission Plan - Section 3

PR-C-0526	06/10/2017	Sarah	Hamilton-Foyne	Pegasus Group On behalf of the Dorchester Group	y	y	N	Y
-----------	------------	-------	----------------	---	---	---	---	---

Comments

The Oxfordshire Housing Market Assessment 2014 highlighted key issues & characteristics that have been relevant in preparing the Partial Review these are set out in para 3.39. It is noted that para 3.54 refers to the Oxford Transport Strategy which states that one of the main aims of the LTP remains to reduce pressure on the road network by encouraging the location of housing close to jobs where people can more easily walk or cycle to work & in places where people will be able to use high quality public transport to get to work. Dorchester Group support the strategy in so far as needs are proposed to be met where they arising, i.e. to meet Oxford's city's needs on specific sites in sustainable locations close to where the needs arise, rather than combining the requirement & supply across Cherwell. The specific sites to meet the unmet needs of Oxford City should be well-related to Oxford as they are required to support the economic growth of the city & therefore the interconnections between these sites & the city will be important. However, should the proposed sites, north of Oxford & Kidlington in Cherwell not deliver the required number of housing to meet needs, then land at Upper Heyford (Area of Search F) is well placed to deliver, with good transport connections to Oxford, (benefiting from a railway service to Oxford) developments at Upper Heyford would accord with objective of the PR to meet the economic needs of Oxford City. Area of Search F provides a sustainable option to meet the unmet needs of Oxford City as it is well-related to Oxford by way of a rail connection. Area of Search F also provides the most sustainable, deliverable option to meet the needs of Cherwell in the longer term. It is acknowledged that many respondents have objected to a separate housing requirement & supply for Cherwell & Oxford City (as this would not support allocations which are less well connected to Oxford) as the NPPF requires that requirements are met across a HMA. However, the disaggregation of the requirement & the supply in the LP (as supported by numerous Inspectors) should be flexible enough to ensure that the needs are addressed across the HMA whilst also providing an appropriate spatial distribution for growth. This can be achieved by introducing appropriate contingency mechanisms to ensure that the OAN of the HMA continues to be provided for, rather than allowing one of the sub-areas to under-deliver without any requirement for this to be addressed in the other sub-area. This can be addressed by the identification of reserve sites which would be supported in the absence of an appropriate supply across the District (or HMA).

Changes Sought

Dorchester Group whilst not directly seeking changes to the Partial Review consider that this is a challenging strategy and much rests on the deliverability of the locations identified to meet the unmet needs of Oxford. If needs fail to be met then land at Upper Heyford could play a significant role. Area of Search F provides a sustainable option to meet the unmet needs of Oxford City as it is well-related to Oxford by way of a rail connection. Area of Search F also provides the most sustainable, deliverable option to meet the needs of Cherwell in the longer-term.

Reasons for Participation

Dorchester Group is concerned that the unmet needs assigned to Cherwell district are met in the most appropriate and effective locations and that the proposed locations delivery within the timescale.

Reasons for Participation

OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination is necessary and justified because of our longstanding interest and understanding of the Oxford GB.

PR-C-0567	09/10/2017	Dr Ian	Scargill	Oxford Green Belt Network	N	N	Y
-----------	------------	--------	----------	---------------------------	---	---	---

Comments

OGBN disagrees with the justification and fundamental basis for this plan. It is founded on the assumption of a step change to historic levels of growth in Oxfordshire, amounting to more than doubling of growth in population, housing and employment. Because of this the plan suggests that the long established strategy of diverting growth away from the city of Oxford towards the country towns is no longer feasible. OGBN disagrees with this because the proposed levels of growth are unrealistic, unproven and therefore unjustified. We consider that the arguments for a strategy to divert growth away from Oxford remain as strong as ever. An essential part of that strategy is the GB, which Cherwell Council supports. However in order for the strategy to work, the GB has to be retained in its entirety. It is not a collection of land parcels that can be picked off one by one. It is inconsistent of Cherwell to support the GB and yet to seek to build on it. It is not possible for Cherwell to satisfactorily produce this review in isolation. Oxford is surrounded by four other authorities and planning needs to be coordinated strategically between all five councils. Infrastructure needs have to be planned across boundaries and certainly cannot be confined to the limited areas covered in this review. The Growth Board has not been an effective mechanism for strategic co-ordination and its analyses of spatial options to date have been simplistic. The Councils – while claiming to be cooperating – have largely acted according to their own agendas. Oxford City Council in particular has sought to promote economic growth within the city, by protecting employment sites, without any regard of the consequences of this for the surrounding Districts such as Cherwell. It appears to be part of its own strategy to expand beyond its borders into the GB, again ignoring the purpose of the GB to protect the character of the historic city. This review cannot be effective without a well founded spatial strategy for the county. We also argue that this strategy should include a commitment to retain the Green Belt in its entirety.

Changes Sought

The plan should be withdrawn and a spatial strategy for Oxfordshire established which can address the issues addressed in this review in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should (a) discourage further employment generating development in the city unless it is absolutely essential and (b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.

Reasons for Participation

OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination is necessary and justified because of our longstanding interest and understanding of the Oxford GB.

On page 38 you talk about a sound infrastructure, high quality of life, protecting the environment and yet if you progress through this document:• You ignore current increases in traffic on the Gosford Link road contributing to a pollution level in that area• Despite increased traffic from Bicester there is no increase in public transport (in fact it has reduced as council investment in public transport has reduced)• You are planning on laying waste to the environment by building on greenbelt. You repeat the same requirement for affordable housing elsewhere in the document but this is evidently not supported in what is actually being built and sold. Oxford Transport Strategy – really? Quotes websites concerning Westgate shoppers and traffic problems. Perhaps you can see why I don't believe you when your own Council members can't back up these plans. Therefore I dispute that this is a concrete plan and once you have permission for your building you will ignore this side of the promise or make residents wait countless years in misery until the infrastructure becomes a priority.

You talk about 'affordable housing' yet on page 43 you then talk about the Barton Development which has been ridiculed by the local press for not being affordable. You say one thing but then demonstrate the complete opposite. Indeed in those houses that were put aside for social housing the tenancy agreements were changed to suit the council! At no point do you define what affordable housing is especially in relation to key workers and standard key worker salaries. It is also noted that affordable housing is substantially smaller, compacted together, with little or no garden space and of a poorer quality. I would ask that you lay out clearly your plans for affordable housing. If Oxford has a 'pressing need for affordable housing' (in relation to your assertions of 'high quality life', protecting the environment') please explain the policy on current new developments e.g. Barton.

Paragraph 3.1916 of the Partial Review identifies Bicester and Banbury as the two main towns in the adopted settlement hierarchy where growth should be focused. Kidlington is recognised as a third 'urban centre' and a 'large village'. Growth should be focused at Bicester and Banbury in accordance with the Council's settlement hierarchy and spatial strategy. 2.27 To the south of the District, north of Oxford City, is designated Green Belt. Beyond the Green Belt, within the southern half of the District is Bicester. The Local Plan Review should address the need to provide housing in locations which are both sustainable and meet the needs of Oxford City Council. This does not necessarily mean sites in closest proximity to Oxford City (the current approach proposed). Bicester has good transport connections to Oxford City via the A31 and A34. Its connectivity with Oxford was boosted by the opening of Phase 1 of the western section of the East West Rail (also referred to as the Varsity Line). This linked Oxford, Bicester and London Marylebone. The future phases of the East West Rail will improve connectivity further, linking Bicester to Bedford. Bicester is also experiencing significant road infrastructure improvements, including increased capacity at the Howes Lane/ Bucknell Road junction and realigning of Howes Lane/ Lords Lane, a potential new south east perimeter road through the strategic development site at Graven Hill, connecting the A41 which leads to the M40, and a new road through the South East Bicester development. Land at NW Bicester forms the principle strategic housing allocation for Bicester (Policy Bicester 1). The site benefits from its close proximity and good accessibility to Bicester Town, via sustainable mode of transport (bus, pedestrian and cycle links) and vehicular access. The Site further benefits from its close proximity to the M40 and as noted above, the major strategic link road (Application 3: reference 14/01968/F dated February 2016) will improve site connectivity further. As identified in the Oxfordshire LEP Strategic Economic Plan: Driving Economic Growth Through Innovation (Parts 1 and 2) (Oxfordshire Strategic Economic Plan) (March 2014) Bicester, Oxford and Science Vale Oxford are recognised as key spatial gateways for growth potential in population, employment and housing. Bicester is also seen as "significant anchor" of the knowledge spine and becoming an increasingly significant location in the Oxford-Cambridge Arc, where new opportunities are arising from for an increase in science and technology based businesses and exploiting innovations and spin-outs from academic research. As stated in the Oxford to Cambridge Expressway Strategic Study Stage 3 Report (November 2016), the Oxford to Cambridge Expressway is a strategic road network which would create a high-quality east-west link between Oxford and Cambridge, via Bedford and Milton Keynes. It is recognised as one of the most significant growth corridors in the country and could unlock strategic growth including the Knowledge Spine (Science Vale to Bicester). The Expressway is estimated to be delivered post 2030. Bicester will also benefit from the new junction from M40 to access the new Garden Town at Bicester, estimated to be delivered post 2030/19 and the upgrade of the A4421 at Bicester into a dual carriageway estimated to be delivered between 2020 and 2025. Paragraph 3.7221 of the Partial Review confirms that there are a series of core route options for the Oxford to Cambridge Expressway will all options improving connectivity along the A34 key strategic route. In terms of economic links, the Oxfordshire Strategic Economic Plan focuses on a corridor to Bicester – the Oxfordshire 'knowledge spine'. Bicester's growing influence and accessibility on the 'Oxfordshire knowledge-spine' and the 'Oxford Cambridge Arc', and the presence of Oxford and Bicester village, means that there are a number of shared economic influences between the settlements. Due to its strong connections with Oxford City, we consider Bicester would be a logical location in which to bring forward new homes to meet the unmet need of Oxford City. In short, the approach to meeting the unmet need from Oxford City should be consistent and responsive to these wider strategic initiatives.

Changes Sought
Reasons for Participation
Our objections in part relate to the proposed growth strategy to address Oxford City's unmet need, which we consider to be unsustainable and inconsistent with national policy. This is contrary to the adopted Growth Strategy set out in the Cherwell Local Plan 2011-2031 (Part 1), which focuses new development at key settlements, as identified in Cherwell's settlement hierarchy. The Council has not discharged its duty to demonstrate exceptional circumstances to release the identified sites from the Green Belt, pursuant to paragraph 82 of the National Planning Policy Framework. Further, there is insufficient evidence to suggest that opportunities to increase capacity at existing allocated housing sites have been robustly tested. Finally, there should be a single housing requirement for the Cherwell Local Plan. There is no justification for a separate figure to be applied to meet Oxford City's unmet need, as is currently proposed.

Proposed Submission Plan - Section 3

PR-C-1519	09/10/2017	Peter	Frampton	Framptons on behalf of db symmetry	Y	Y	N	Y
4776	<p>Comments</p> <p>The following submissions are made on behalf of db symmetry. Submissions made to the Local Plan (Part 1) Partial Review Options Consultation on behalf of db symmetry (dated January 2017) also attached to the representation. The thrust of the Part 1 Partial Review is directed to accommodate some of the displaced housing need from Oxford. The inability of Oxford to accommodate its spatial planning needs is not just confined to housing - the limitations of suitable land also means that land to meet economic development needs also has to be addressed by the surrounding Districts. It is in this context that the following submissions are made. Detailed reference is made to The National Planning Policy Framework. It is submitted that the Part 1 Review prolongs the failure of the Council to recognise that the logistics sector is expanding – with draft policy wording supported during the Local Plan Examination in December 2014 recognising the potential need for release of additional land in response to market signals for very large scale logistics buildings which could not suitably be accommodated on existing allocated sites; and that there is a paucity of land supply for large scale logistics operations, which frustrates investment, jobs, and the needs of existing manufacturers. Efficient logistics is now embedded within the manufacturing supply chain. The Partial Review, like the Core Strategy, again fails to address the spatial needs to the large scale logistics sector serving the manufacturing base of Oxford and the employment needs of Cherwell. It also fails to recognise that ‘the logistics industry plays an important economic role both in its own right and in supporting other sectors to function through movement of goods and components’ (The British Property Federation Delivering the Goods 2015). It is submitted that this Partial Review should have made provision for the spatial needs of large scale logistics operators – to be located at key junctions on the strategic highway network, so as to efficiently serve the needs of manufacturing within the Oxford area, (‘just in time’), and to meet the needs of the hinterland population for electronic purchasing of goods. Logistics sites of regional distribution centre scale should be located so as to support this vital sector of the economy. As presently drafted, the Local Plan has no flexibility to meet the expanding needs of this business sector (Framework 21) and has failed to provide a rapid response to the changes in economic circumstances brought about by modern large scale logistics operations. Although such operations are large scale in the occupation of space, the net additional impact from employment can be accommodated within the economic growth assumptions of the SMA. 1.16 Such an allocation would support the economic growth within Oxford, and the growth agenda for Cherwell District, whose Local Plan purports to ‘support the logistics sector, recognising the jobs it provides and the good transport links that attract this sector’. Cherwell District therefore urgently needs to address this through a future Review/Partial Review of the Local Plan to ensure that the full potential of the M40 corridor to the logistics sector is exploited to deliver maximum benefits to Cherwell and the wider Oxford sub-region.</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>If the Examining Inspector is prepared to consider the relationship of housing growth with employment needs, then attendance on behalf of db symmetry would be welcomed as db symmetry is one of the largest investors in commercial development within Cherwell District Council.</p>							

Proposed Submission Plan - Section 4

PR-C-0237	15/09/2017	Karen	East	TMP Planning Ltd on behalf of Gosford and Water Eaton Parish Council	N	Y		
808	<p>Comments</p> <p>The Parish Council considers that the draft vision gives insufficient consideration to the impact of the proposals on existing communities and the environment. Whilst it sets out a vision for the new development proposed it does not refer to addressing the impacts of The Parish Council considers that the draft vision gives insufficient consideration to the impact of the proposals on existing communities and the environment. Whilst it sets out a vision for the new development proposed it does not refer to addressing the impacts of such development on existing residents and communities. To achieve balanced communities, the needs of the existing villages, and their villagers, need to be taken into account. In our community, local services (schools, transport, parking, medical centres) are already under strain, and cannot just deliver extra capacity for more inhabitants. A primary school already has to be extended, the lack of parking continually increases, and, at peak times, the Kidlington roundabout is very congested with commuter traffic. Travelling into and out of Oxford from our community is already very difficult due to congestion – this is noticeably worse with the new housing that has been developed in other parts of the District (e.g. Bicester) in recent years. An additional 4400 houses in Cherwell (1410 of which are in the Parish) together with further growth at Banbury, Bicester and Upper Heyford will put further pressure on the transport network through our Parish and exacerbate the problem. Additional land will be required, in some cases, to provide additional transport infrastructure whether this is road improvements, bus lane or cycleways. This will result in further development and urbanisation within the Parish and the destruction of further greenbelt/green spaces. There are already recognised air pollution problems due to traffic (as evidenced by the Air Quality Management Areas declared for the whole of Oxford and on Bicester Road). These problems will be made worse by the proposed development within and surrounding the Parish. It is difficult to see how new development on the scale proposed can “enhance and conserve the natural environment” when significant areas of countryside which is Green Belt will be lost to development. The plan as proposed allocates 3 significant sites for housing and removes 2 others from the Green Belt. This represents 12% of the Green Belt within the Parish and will significantly erode the gap between Gosford and Water Eaton, Kidlington and Oxford. In addition, the golf course, a valued historic leisure facility would also be lost. Without fully addressing the impact on local communities the Plan would not be consistent with sustainable development and the National Planning Policy Framework.</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>The draft vision should recognise that meeting Oxford’s needs must take account of the impact on the environment and local communities including: Safeguarding the countryside from encroachment; Loss of access to the open countryside for the urban population; Removing an established historic leisure facility . e.g. closing the North Oxford Golf course and building houses upon that land; Removing valuable agricultural land; and Adding to the parking problems and travel congestion, rather than providing sustainable travel opportunities for the existing and new villagers.</p> <p>The Parish Council would wish to take part in order to explain the potential impact of the proposed development on local communities and why this should be better reflected in the draft vision.</p>

Oxford's Unmet Housing Need is Unproven: The Oxford City's total housing need is grossly overstated as it is based on the flawed Strategic Housing Market Assessment. The Oxford Times also mentioned that there are over 1,800 homes sitting empty in Oxfordshire, which could be used to meet some of this need. Oxford should prioritise solving its own housing crisis ahead of speculative industrial developments to create more employment. It would also be better to build the houses nearer to places of employment rather than creating satellite settlements and produce more congestion with people having to commute.

1261	Comments								
From Atkins report: Morning arrivals at the Peartree, Oxford Parkway, Redbridge and Seacourt P&R sites contribute, in particular, to traffic using the three A34 interchanges to the west of the city. Removing this demand through capturing those users further from the city would have an immediate positive impact on the operation of the A34 and other roads it intersects as vehicles using the sites would no longer need to cross it. The Oxford Transport Strategy acknowledges that future housing and employment growth within Oxfordshire is set to further exacerbate congestion on the A34, the outer Ring Road and other corridors that feed into the city, unless traffic can be captured before it reaches them.- a 7.5 ton weight limit is proposed for Burford - one of the proposed diversions is the A44 from Pear tree - yet more heavy traffic through our village.- The Infirm and shoppers will not be cycling.- There is one Tuesday inter-village bus in Begbroke. Catching a bus in the utopian scene that appears to be set by planners is not realistic for many people.- People will travel to shop – increasing the burden on the roads.- Further expansion at Eynsham, Long Hanborough and Woodstock will impact further on traffic problems.

1262	Comments								
The Need for Inner and Outer Sites As outlined, Atkins' view from the results of the modelling from this commission is that there is unlikely to be sufficient demand based on the model outputs to justify operating a two-tier system of sites (whereby Peartree, Seacourt and Redbridge are retained) in the longer term. It should be noted that the modelling data is focussed on an average weekday and is conservative to ensure compliance with government guidance for modelling and appraisal. Begbroke comment: This would release additional housing sites in the city. Gives detailed list of Catchment of proposed Park & Rides and the A44 Park and Rides: A detailed list given illustrates that people travel from many settlements outside Oxford.- Development of housing options C-I discounted by the above policy is unfounded as people are prepared to travel. Perhaps improved public transport services to these locations would be a better alternative to destruction of green belt?- The catchment area suggest that the Areas of Search considered (Page 9 summary booklet) could have included more areas.Workplace levy- OCC estimates that there are currently of the order of 6,000 private non-residential spaces in the city centre and hence the introduction of the Workplace Parking Levy may theoretically lead to a potential reduction of approximately 600 spaces if the 10% assumption is applied. Based on a broad assumption that those who are no longer able to park at their workplace may instead opt to move onto P&R, car sharing, or other parking areas in the city or other modes of transport (a three-way split), Atkins has estimated the impact that the Workplace Parking Levy introduction could have on demand for P&R in the city. Park and Ride A44 7 Site 7 (Kidlington Airport) – southeast of the A44 / A4095 Junction - Est. Cost £12.5 million.- Various options at or close to roundabout- S3 only able to capture A44 corridor catchment with Kidlington area assumed to be captured by existing bus services, but could offer airport parking. (from Atkins report although this has changed with 500/S7 buses.)

Comments

Refers to Page 6 of summary booklet. "The evidence we have gathered and the consultation feedback we have received, have shaped our proposed vision for meeting Oxford's unmet housing needs. The vision responds to the specific needs and growth of Oxford, the relationship between housing and employment, and the importance of building sustainable communities that are well related to Oxford and respect the Cherwell context" 1. Is it vested interests that have shaped this vision? 2. Around 1300 responses sent to previous consultation - were mostly against the plans and ignored by CDC Executive. 3. Cherwell has simply rolled over and accepted Oxford's request with NO opposition whatsoever. 4. We are not confident, that Cherwell will take any notice of opposition views. The proposals are not justified 5. Layla Moran MP has recently made a public call to Cherwell District Council to stop the consultation immediately in light of the new government figures projecting future housing need for England. 6. Under these new calculations, which are due to be applied from 31 March 2018, the number of houses Oxford claims it needs, falls by over 40% (along with Cherwell's need falling by 33%). 7. It was reported that Councillor Wood told a representative from Begbroke Yarnton Green Belt Campaign to "lawyer up". This is a village with around 658 electors and very limited financial resources to fight this battle. Withdraw the proposals NOW

Changes Sought

Withdraw the proposals.

Reasons for Participation

This is supported. The vision responds to the specific needs & growth of Oxford, the relationship between housing & employment & the importance of building sustainable communities that are well related to Oxford. The Strategic Objectives in meeting Oxford's unmet housing needs are supported. However, we do have some detailed points as follows: The draft vision to meet Oxford's unmet housing needs in Cherwell seeks to provide for new balanced & sustainable communities. However, it is unclear what is meant by 'balanced' communities'. This is often used to refer to a balance between jobs & workers, but that would not be appropriate in this instance. The reason the housing is required is largely to meet the economic needs of Oxford City. Therefore, in supporting these needs, housing needs to be located to reduce commuting & consequently in the most sustainable locations to meet Oxford's unmet needs. Any additional economic development within Cherwell District would compete directly with the economic needs of Oxford City and undermine this objective. Strategic Objective SO17 sets out the commitment to meet Oxford City's unmet needs so that it supports the economic growth which underpins the SHMA and the local economies of Oxford and Cherwell. It is unclear whether the objective is seeking to deliver the identified unmet needs of Oxford City (4,400 homes); or the economic growth identified in the SHMA; or the OAN identified in the SHMA or sufficient housing to support the economies of Oxford and Cherwell. Each of these objectives are distinct & would necessitate a different policy response in the Local Plan Part 1 Partial Review. This would benefit from clarification.

Changes Sought

Dorchester Group whilst not directly seeking changes to the Partial Review consider that this is a challenging strategy and much rests on the deliverability of the locations identified to meet the unmet needs of Oxford. If needs fail to be met then land at Upper Heyford could play a significant role. Area of Search F provides a sustainable option to meet the unmet needs of Oxford City as it is well-related to Oxford by way of a rail connection. Area of Search F also provides the most sustainable, deliverable option to meet the needs of Cherwell in the longer-term.

Reasons for Participation

Dorchester Group is concerned that the unmet needs assigned to Cherwell district are met in the most appropriate and effective locations and that the proposed locations delivery within the timescale.

Comments

OGBN disagrees with the justification and fundamental basis for this plan. It is founded on the assumption of a step change to historic levels of growth in Oxfordshire, amounting to more than doubling of growth in population, housing and employment. Because of this the plan suggests that the long established strategy of diverting growth away from the city of Oxford towards the country towns is no longer feasible. OGBN disagrees with this because the proposed levels of growth are unrealistic, unproven and therefore unjustified. We consider that the arguments for a strategy to divert growth away from Oxford remain as strong as ever. An essential part of that strategy is the GB, which Cherwell Council supports. However in order for the strategy to work, the GB has to be retained in its entirety. It is not a collection of land parcels that can be picked off one by one. It is inconsistent of Cherwell to support the GB and yet to seek to build on it. It is not possible for Cherwell to satisfactorily produce this review in isolation. Oxford is surrounded by four other authorities and planning needs to be coordinated strategically between all five councils. Infrastructure needs have to be planned across boundaries and certainly cannot be confined to the limited areas covered in this review. The Growth Board has not been an effective mechanism for strategic co-ordination and its analyses of spatial options to date have been simplistic. The Councils – while claiming to be cooperating – have largely acted according to their own agendas. Oxford City Council in particular has sought to promote economic growth within the city, by protecting employment sites, without any regard of the consequences of this for the surrounding Districts such as Cherwell. It appears to be part of its own strategy to expand beyond its borders into the GB, again ignoring the purpose of the GB to protect the character of the historic city. This review cannot be effective without a well founded spatial strategy for the county. We also argue that this strategy should include a commitment to retain the Green Belt in its entirety.

Changes Sought

The plan should be withdrawn and a spatial strategy for Oxfordshire established which can address the issues addressed in this review in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should (a) discourage further employment generating development in the city unless it is absolutely essential and (b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.

Reasons for Participation

OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination is necessary and justified because of our longstanding interest and understanding of the Oxford GB.

Writes with a heavy heart regarding the proposed 4,400 new houses to be built in and around Yarnton and Begbroke due to Oxford City's unmet housing need and is saddened greatly that you think building on green belt land is acceptable. Does not believe it has been proven that the number of so called houses required has been grossly over estimated. Also believes that this estimate was taking into account (before?) any new businesses which are to locate to Oxford or indeed to be built. These have not yet happened and so how do you estimate the housing needs? It is pure conjecture which is overly estimated. Oxford City must have plenty of sites that can cater for their housing requirements, or at least a vast majority of it, such as brown belt land, derelict sites and the like. Would also assume that there are properties currently vacant/derelict and have been for some time that could also be used, either in their own ownership or use compulsory purchase orders. They also have better road links and infrastructure to cater for the extra traffic involved or the use of public transport which is also far superior to that we have in this area.

Your Strategic Objectives SO16 – SO19 are in direct contradiction to your plans set out in 2015. You will be back tracking on every single one of those strategic commitments. Quotes a website in the letter concerning affordable housing and the huge price tag which soars above the city average and would ask if you are actually having a laugh? Your proposals suggest ridiculous ideas like moving an established golf course somewhere else (and if that is possible then you should go back to Oxford City Council to discuss what they can do in a similar vein – why is this possible in Gosford & Water Eaton and not in Oxford City)? Your plans in this area will require building on Green Belt. How dare you think this is a viable option. Green Belt is not a 'reserved for planning' notice that can be used up when you feel ready for some new builds. This is not an exceptional need. You haven't even proven you need this many houses. The plans need to be revised to avoid building on any green belt land what so ever. In relation to SO19 refers to news article to indicate how unprepared Oxford City is for the launch of Westgate Centre. You have not addressed the impact on local communities and the Plan would not be consistent with sustainable development and the National Planning Policy Framework. The draft vision should recognise that meeting Oxford's needs must take account of the impact on the environment and local communities including: • Safeguarding the countryside from encroachment; • Loss of access to the open countryside for the urban population; • Removing an established historic leisure facility . E.g. closing the North Oxford Golf course and building houses upon that land; • Loss of 12% of the Green Belt within the narrowest gap between Gosford and Water Eaton, Kidlington and Oxford. • Removing around 110Ha of valuable agricultural land; and • Adding to the parking problems and travel congestion, rather than providing sustainable travel opportunities for the existing and new villagers.

<p>Comments</p> <p>Support. The consortium broadly supports the vision and objectives of the Partial Review, and in particular the strategic objectives that indicate:• the commitment to joint working with the City and County Council to achieve the best possible outcomes;• the support for the projected economic growth that underpins the 2014 SHMA;• the intention to provide housing that meets the needs of Oxford both in its scale and range in terms of tenure, type and affordability; and• meeting the need in a way that complements the Local Transport Plan, specifically improving the availability of sustainable transport options.</p>									
Changes Sought				Reasons for Participation					
				On behalf of the consortium, given the significance of their land interests, would wish to participate in the oral examination.					
PR-C-0775 1961	10/10/2017	Jon	Alsop	Savills on behalf of Christ Church, Exeter & Merton Colleges and Oxford University					Y
<p>Comments</p> <p>Support with amendments. The consortium supports the vision for meeting Oxford's unmet housing need in Cherwell and particularly notes the support that it is intended to give to the city's world-class economy, universities and its local employment base. To be truly sustainable, proposals should contribute to the 3 roles of sustainability as identified by the NPPF, paragraph 7; social, environmental and economic.</p>									
Changes Sought				Reasons for Participation					
The consortium proposes some additions to the objectives for new development (see underlined additions below), so that it; ii) is well connected to Oxford and nearby communities; iii) is of exemplar design which responds distinctively and sensitively to existing local communities as well as the built, historic and environmental context; iv) is supported by necessary infrastructure, including green and social infrastructure; vi) contributes to improving health and well being and to the success of the economy;				On behalf of the consortium, given the significance of their land interests, would wish to participate in the oral examination.					
PR-C-0787 2012	10/10/2017	John L	Broad	CPRE Cherwell South District					N
<p>Comments</p> <p>Disagree with the objectives SO16 and SO17 for the reasons previously stated under our objections to the Vision. Objective SO18 is unlikely to achieve the 'affordable' homes at the densities on the housing estates suggested. The developers will want to build four and five bedroom houses to maximise their profit, taking unnecessary hectares of land in the process. By increasing the density of the proposed housing it is quite practical to reduce the proposed land take in the GB considerably. In fact, if Oxford City used higher densities of their housing, there is not an unmet need at all! Objective SO19 we object to as this presumes the plan is required in spite of a more sensible approach to the issues as described under our objections to the Vision. The County Transport 'Plan' is nothing more than a list of issues and would have to change to take these proposed district developments into account, assuming they are approved through an EiP. The area from Kidlington, Begbroke and Yarnton through Pear Tree roundabout, Woodstock Road roundabout and Banbury Road Roundabouts is already beyond full capacity and with no land available to either increase the size of the roads or add new roads the proposal would bring this area of Oxfordshire to a standstill. The rail system is also at capacity and we submit there is no availability to add any new stations on this major line. Suggesting that the A44 could have one lane closed for a bus lane would create major traffic issues along its whole length to and beyond Woodstock.</p>									
Changes Sought				Reasons for Participation					
PR-C-0787 2011	10/10/2017	John L	Broad	CPRE Cherwell South District					N
<p>Comments</p> <p>Do not support the vision. The first line suggests the plan "... meets Oxford's agreed, identified housing needs ...". How can Cherwell agree to an unidentified Oxford housing need until that 'housing need' is proved by an EiP for the Oxford Plan? Whilst you might agree with the SHMA for Oxford, you have not taken into account or apparently argued with Oxford City Council about their plans to locate their apparent housing need locations. The whole premise from Oxford City is to "ring fence" areas of their land that is available for development to even more employment. Meaning that the desperate need for housing within the City boundary would not be met. This failure would entail those who currently work in the City but cannot find suitable housing to take up something on one of the massive estates proposed by CDC in the GB. Adding to the already congested transport infrastructure in contradiction with both the CDC and the City's prime aims to promote walking and cycling. Item iv suggests the proposed housing estates in the GB will be "supported by necessary infrastructure" but this is not technically feasible as the area is already heavily congested. Item vi suggests these massive housing estates in the GB would "contribute to improving health and well being" but we submit that adding to the already congested and polluted transport system and destroying part of the GB unnecessarily would be bad for health of these residents who are supposed to work in congested Oxford City. Item vii has to be a cynical comment as destroying the GB is hardly conducive to "conserving and enhancing the natural environment"! The suggestion that a few supposed "wildlife sites" might be incorporated into the massive housing estates is just not practical as "wildlife" is unlikely to inhabit these manicured areas.</p>									
Changes Sought				Reasons for Participation					
PR-C-0790 5379	10/10/2017	Chris	Shaw	Bloor Homes Western		N	Y	N	Y
<p>Comments</p> <p>Strategic Objective SO16 - CDC has already committed to helping unmet need from neighbouring authorities. However, without a robust approach to this matter, the plan cannot be found sound. Indeed it was only on the basis of the paragraphs confirming how this unmet need would be addressed within the adopted Local Plan (in particular paragraph B.95) that the Cherwell LPP1 was found sound and the Inspector considered that CDC had appropriately met their duty to cooperate requirements. Strategic Objective SO16 is therefore supported. Strategic Objective SO17 is broadly supported. It is however important to provide an appropriate evidence base to justify the level of Oxford's unmet housing needs. The apportionment of 4,400 can only be treated as a minimum to ensure the soundness of the plan. Strategic Objective SO18 - The apportionment of housing between the Oxfordshire Authorities is likely to need to be increased and therefore the apportionment of 4,400 to CDC can only be treated as a minimum in order to ensure the soundness of the plan. With the ambiguity of appropriately justifying the level of Oxford's unmet need it is not possible to confirm whether the plan and proposed approach are sound or otherwise. Strategic Objective SO19 - The spatial strategy for Cherwell seeks to focus growth within and around Banbury and Bicester. Focussing growth within and adjacent to the key urban areas also supports the delivery of new bus services, allowing new routes to be concentrated along key corridors, maximising the viability of investment in these services. Strategic Objective SO19 is broadly supported.</p>

				It is considered necessary to ensure that the Local Plan Partial Review is legally and procedurally compliant, positively prepared, justified, effective and compliant with national policy.					

Proposed Submission Plan - Section 4

PR-C-0791	10/10/2017	Keiron	Ward				N	Y
2031	<p>Comments</p> <p>The growth and the level of housing need are much lower than estimated in the SHMA. They rely on assumptions of high growth in jobs in Oxfordshire requiring many people to move into the county. Understands that this is driven by the Local Enterprise Partnership's ambition. The option trying to force an increase in population by 40% in a largely rural county has not been discussed with the electorate. Detailed comments provided on Oxford's unmet housing need and capacity. Cherwell has failed to work with Oxford City Council on strategic employment site planning. It failed to take part in Oxford's Northern Gateway EiP, which is a key driver for the current Local Plan revision choice of sites nearest Oxford. There is no joined up thinking on how many 'knowledge based' or technology/ science parks are needed. Consequently there are proposals for several in close proximity at Langford Lane Kidlington, Begbroke Science Park, the Northern Gateway and near Eynsham. This is massive over-provision since the long well-established Oxford Science Park, is incomplete and the buildings are under occupied). Strategic Objective SO17. Object to Strategic Objective SO17 "projected economic growth" . These are not evidence based. Object to planning for massive economic growth in an area that has almost full employment. Creating extra jobs will increase housing demand without tackling the local need for more affordable housing – by that I mean affordable to the average worker. The actual local 'housing need' is shown to be much lower than claimed in the SHMA as shown by the Government consultation "Planning for the right homes in the right places" (September 2017). Such is the overwhelming weight given to economic growth that the plan fails to consider balancing this against social and environmental considerations. Consequently the Plan is not be consistent with achieving sustainable development.</p>							
	Changes Sought			Reasons for Participation				
	The plan should be withdrawn. The Oxfordshire authorities should revise economic growth downwards. They should cooperate on a more flexible and coordinated plan for growth that is responsive to actual rather than wild over projections.			Would like to be represented by Kidlington Development Watch at the oral examination in public. For the reasons given in the Kidlington Development Watch representation.				

PR-C-0801	10/10/2017	Alison and Simon	Street					N
5527	<p>Comments</p> <p>Consider that meeting Oxford's unmet housing need should not supercede the need of Kidlington and Yarnton communities for a better balance between affordable and high market value properties. When considering the connections to Oxford, since the main Banbury Road is already very congested, and likewise the northern ring road roundabouts, any substantial new housing development will exacerbate this already unsatisfactory situation. The proposed developments should include infrastructure that allows optimal access between Kidlington and an expanded Yarnton. It cannot depend only on the existing road network. In addition to reflecting Oxford's diverse needs, Cherwell's priority should be for the needs primarily of its local communities, especially to address the building of affordable housing. House prices in Kidlington are already too high for those starting out on the housing ladder. The review should take into account the Government's recent reassessment of Oxford's housing need which shows reduced numbers. Any breach of the green belt should be kept to a minimum. All brownfield sites within the ring road should be fully developed before any green field sites are allocated within Cherwell.</p>

PR-C-0832	10/10/2017	David	Flavin	Oxfordshire County Council				
5023	<p>Comments</p> <p>OCC agree that the LPPR should provide a vision, set of objectives and a spatial strategy specifically for delivering housing to meet Oxford's unmet needs, in the context of the Plan Part 1 being geared to meeting the needs of Cherwell District, with growth and new infrastructure provision focused on Bicester and Banbury. The Vision for meeting Oxford's unmet needs within Cherwell is supported in that it seeks to provide housing, including affordable housing, where it will be well connected to Oxford's key employment locations and the City centre and will help to deliver the Oxford Transport Strategy. OCC agree that a number of the Key Objectives of the existing Plan Part 1 are relevant to Oxford, especially SO12 which seeks to focus development in sustainable locations and SO13 which seeks to reduce dependency on travel by private car and increase opportunities for travel by public transport, cycling and walking. Additional objectives are also supported, particularly SO16 which refers to joint working on planning and infrastructure delivery and SO19 which is to align the new housing with LTP4 and the Oxford Transport Strategy. The County Council will continue to work with CDC and the City Council for the necessary infrastructure to support Cherwell's share of Oxford's unmet housing need. The LPPR spatial strategy which focuses development on land in North Oxford, Kidlington and along the A44 corridor is fully supported. These locations have strong economic links to Oxford; offer the opportunity to build on existing public transport and other infrastructure capacity e.g. education and help fund the delivery of planned transport investment in Rapid Transit corridors, remote Park & Ride, and cycling and walking improvements set out in the County's Local Transport Plan and as part of the Oxford Transport Strategy. A number of these locations were identified as potential strategic spatial options for Oxford's unmet needs and assessed through the Growth Board post SHMA strategic work programme, the outcome of which underpins the Growth Board apportionment of unmet need.</p>

They rely on assumptions of high growth in jobs in Oxfordshire requiring many people to move into the county. Understands that this is driven by the Local Enterprise Partnership's ambition. The option trying to force an increase in population by 40% in a largely rural county has not been discussed with the electorate. Detailed comments provided on Oxford's unmet housing need and capacity. Cherwell has failed to work with Oxford City Council on strategic employment site planning. It failed to take part in Oxford's Northern Gateway EiP, which is a key driver for the current Local Plan revision choice of sites nearest Oxford. There is no joined up thinking on how many 'knowledge based' or technology/ science parks are needed. Consequently there are proposals for several in close proximity at Langford Lane Kidlington, Begbroke Science Park, the Northern Gateway and near Eynsham. This is massive over-provision since the long well-established Oxford Science Park, is incomplete and the buildings are under occupied). Strategic Objective SO17. Object to Strategic Objective SO17 "projected economic growth" . These are not evidence based. Object to planning for massive economic growth in an area that has almost full employment. Creating extra jobs will increase housing demand without tackling the local need for more affordable housing – by that I mean affordable to the average worker. The actual local 'housing need' is shown to be much lower than claimed in the SHMA as shown by the Government consultation "Planning for the right homes in the right places" (September 2017). Such is the overwhelming weight given to economic growth that the plan fails to consider balancing this against social and environmental considerations. Consequently the Plan is not be consistent with achieving sustainable development.</p>									
	Changes Sought			Reasons for Participation						
	The plan should be withdrawn. The Oxfordshire authorities should revise economic growth downwards. They should cooperate on a more flexible and coordinated plan for growth that is responsive to actual rather than wild over projections.			Would like to be represented by Kidlington Development Watch at the oral examination in public. For the reasons given in the Kidlington Development Watch representation.						

Proposed Submission Plan - Section 4

The Tripartite welcomes and supports the Council's Strategic Objectives (SO) and spatial planning development approach to meeting Oxford's Unmet Housing Needs as set out in SO16, SO17, SO18 and SO19 on page 60 of the Proposed Submission Plan. The University has engaged with the Council, Oxford City Council, Oxfordshire County Council and other authorities on the Oxfordshire Growth Board, including in discussions with the National Infrastructure Commission, DCLG, OxLEP and others, which have all been aimed at helping to address Oxford's unmet housing needs. Detailed examples of engagement provided.

Changes Sought

Reasons for Participation

The land owned and controlled by the Tripartite comprises some 86% of the largest draft allocation within the Plan and as such, occupies a unique and vitally important role in meeting Oxford's Unmet Housing Needs. As such, the Tripartite consider it is essential that it is present [and/or represented] and participates at the Examination in order to assist the Inspector by responding to any queries that may arise and supporting the assessment of the soundness of the Plan.

We welcome the wider Local Plan objectives which focus on locating development in sustainable locations in the District and in close proximity to facilities and services, including public transport options. We welcome the commitment to a collaborative approach between the county and district councils in facilitating improvements for sustainable transport to access Oxford. We also wish to continue to be part of this collaborative approach, to ensure that the impact of development upon the SRN is identified and the need for potential enhancements to the SRN is determined.

SUPPORT the policy. Keen to focus the quantum of development along existing transport corridors where possible or wheredevelopment is concentrated where volumes can justify the provision of a bus service. Having higher concentrations in a place that already has established public transport links will allow this 'network' to grow for the benefit of all residents. Main desire is to ensure that new developments are serviceable by all transport modes including the bus, and that developments are suitable for buses to access new development which can sustain viable commercial bus operation & reduce reliance on public subsidy once "kick-start" funding for new development ceases. This will make developments overall more sustainable environmentally and economically. The various options for developing sites as well as the need to support rural communities with a limited amount of local housing. However for development to be sustainable, not only in terms of transport but also across other services areas (Schools, Health Provision, Sports & Recreation etc.) it would seem reasonable to locate development on the urban fringe at locations which are more sustainable in terms of delivering services and which are contained within elements of this plan. Support the aims of LTP4 however we do have severe concerns about the aspiration of these plans & how they, in some cases, are very little more than academic idealisms. Question the ability to deliver the infrastructure required against the clear gap between aspiration and funding. Whilst the LTP highlights strategic long term aspirations the mid-term is somewhat bereft in what will be delivered and how. It is essential that developments are phased in such a way that allows for infrastructure to be delivered that enables development to be sustainable. This includes how developments will be connected and initiatives to ensure journey times are reduced and journey time reliability is enhanced. To this end as part of this plan there needs to be clear statement of how the authorities will work together in delivering the required infrastructure and how this will be phased. Equally, with new development it needs to be quite clear how developments in areas, for example, Kidlington will be delivered in a phased manner to ensure that development contributions can be best used to enable new or improved bus links that can become financially viable in their own right.

Considers that the growth and the level of housing need are much lower than estimated for reasons given below (see PR1). They rely on assumptions of high growth in jobs in Oxfordshire requiring many people to move into the county. These projections of jobs growth are exaggerated in order to support funding bids from the Local Enterprise Partnership. 2.4 Some growth will of course occur. However much of this can continue to be directed away from the City as under the 'country towns' approach which has operated in the past. Indeed, through true co-operation between the Oxfordshire Councils, such an alternative strategy would will help to protect the city from overdevelopment, would be consistent with the fundamental purpose of the Green Belt, and would be sustainable. 2.5 In contrast, the expansion of Oxford is unsustainable. The more Oxford expands the more will be the damage to the historic city and the more would be the loss of the Green Belt which exists to protect it. The Green Belt would gradually disappear. 2.6 Oxford City Council has contributed to development pressures by encouraging excessive provision for employment land in the city to the detriment of meeting housing need. In doing so we argue that it has failed in its duty to cooperate by ignoring the consequences of this for the surrounding Districts. It has also put at risk the very things that make Oxford an attractive location – such as its historic centre. 2.7 We consider that Oxford should substantially reduce the number of sites it has identified for employment purposes and should reallocate that land for housing. It should also cooperate with surrounding Districts to embark on a strategy to encourage employment growth elsewhere in areas that need and would welcome it both in Oxfordshire and the country as a whole. By taking these actions its assessed unmet housing needs (grossly overestimated as they are) would be reduced further. 2.8 Cherwell has not satisfactorily worked with other Oxfordshire authorities and, in particular, Oxford City Council on the scale and location of sites allocated for employment purposes. This was evident from Cherwell's lack of participation at key stages in Oxford's Northern Gateway EiP, which we consider negligent. The 'knowledge based' or technology sites proposed in close proximity at Langford Lane Kidlington, Begbroke Science Park, the Northern Gateway and near Eynsham represent massive over-provision (given that other well-established sites in the county, such as Oxford Science Park, are still incomplete and far from fully occupied) and indicate a failure to co-operate effectively between the authorities concerned. 2.9 While the authorities point to the Oxford Growth Board as evidence of cooperation, experience of organisations such as KDW suggest that this undemocratic body has not been transparent in its operation and has often had short or cancelled meetings. Genuine debate and co-operation do not appear to have occurred. Cooperation should be effective and more than a token process. 2.10 Strategic Objective SO17. We object to Strategic Objective SO17 because the "projected economic growth" referred to is overestimated for reasons given elsewhere in our representations. These projections of jobs growth are exaggerated in order to support funding bids from the Local Enterprise Partnership and represent wishful thinking. Furthermore, whether or not to plan for such a high level of economic growth is a choice that can be made by the individual councils. There is no reason for Cherwell to accept it and no reason for to accept the consequences of jobs growth that Oxford seeks to encourage within the City by reserving land for employment uses. Such jobs growth will create extra housing demand but does not address the fundamental housing need of either District or the need for housing to be more affordable. The actual 'housing need' of both authorities is much lower than identified in the SHMA as has now been made clear from the Government consultation "Planning for the right homes in the right places" (September 2017). 2.11 The Council (together with the other Councils) has overemphasised economic considerations at the expense of social and environmental considerations and the outcome of this would not be consistent with achieving sustainable development. The plan is unsound, because it is not effective in achieving sustainable development, not justified and not positively prepared because the development requirements are overestimated."

Changes Sought

The plan should be withdrawn and a co-ordinated, balanced and sustainable spatial strategy should be developed co-operatively by the Oxfordshire authorities.

Reasons for Participation

"We (Kidlington Development Watch – KDW) consider this is necessary because of our extensive involvement with the consultations at all stages of the Cherwell Local Plan to date; the considerable work we have undertaken to publicise the consultation ourselves; of the feedback we have received from Kidlington residents; and, the large numbers of them who have responded as a result of our efforts. KDW is a voluntary organisation run by Kidlington residents with experience and interest in planning issues. We believe that effective, informed public participation in planning consultations is vital to democratic policy making. We publicise consultations that directly affect Kidlington and offer advice on how people can best make their views known. In relation to this and the previous options consultation we printed and distributed leaflets, put up posters, ran a stall on many Saturday markets and at other events, participated in public and parish council meetings, provided information on our website and responded to requests for information from Kidlington residents. As a result, we have gained a very good understanding of the views of Kidlington residents, a large number of whom have made representations because of our activities. KDW's representations therefore reflect the views of much of the Kidlington community."

Comments

A2D raise concern that no reference is made to the importance of achieving sustainable patterns of growth as part of the Strategic Objectives SO16 – SO1922 set out in Section 4. Paragraph 1723 of the NPPF sets out the 12 core land use planning principles which plan-making and decision-taking should abide to. CDC sets out separate housing delivery strategies in the Partial Review for the CDC housing requirement of 22,840 homes and the additional housing requirement of 4,400 homes to meet Oxford's unmet need. These should not be considered in isolation from one another. CDC will need to review its housing target within its Local Plan to reflect the additional need. There should be a single housing target for Cherwell. The Cherwell District five-year housing land supply would then need to be reviewed to allow for the unmet need.

Changes Sought

Reasons for Participation

Our objections in part relate to the proposed growth strategy to address Oxford City's unmet need, which we consider to be unsustainable and inconsistent with national policy. This is contrary to the adopted Growth Strategy set out in the Cherwell Local Plan 2011-2031 (Part 1), which focuses new development at key settlements, as identified in Cherwell's settlement hierarchy. The Council has not discharged its duty to demonstrate exceptional circumstances to release the identified sites from the Green Belt, pursuant to paragraph 82 of the National Planning Policy Framework. Further, there is insufficient evidence to suggest that opportunities to increase capacity at existing allocated housing sites have been robustly tested. Finally, there should be a single housing requirement for the Cherwell Local Plan. There is no justification for a separate figure to be applied to meet Oxford City's unmet need, as is currently proposed.

Comments

Refers to LP1 PR paragraphs 3.24 and 3.25 in relation to the Kidlington Framework Master Plan and the draft Plan seeking to strengthen Kidlington's village centre and notes that the housing element was stripped out of the SPD. This was wrong, as a matter of sound planning, and should now be addressed by the Partial Review. The problem is – Kidlington is now faced with the worst of all outcomes, i.e. massive, structural loss of the Green Belt combined with huge housing schemes that are disconnected from Kidlington and offering nothing for the village in terms of place-making and regeneration. This goes to the heart of the draft Plan and its soundness. In turn, this is underscored by the Vision for meeting Oxford's unmet needs (Section 4 of the draft Plan), which is laudably broad-based but therefore plainly out of kilter with the narrow, housing focus of the draft Plan. In a similar vein, Key Objective SO6 (dealing with local identity) is visibly not met given the very substantial impact on the settlements of Begbroke and Yarnton and the threat to the Kidlington Gap at Water Eaton. This same lack of balance also applies to Key Objective SO12, which seeks to focus development on sustainable locations, making efficient and effective use of land, conserving and enhancing the countryside and landscape and the setting of its settlements, yet largely ignoring the potential (and needs) of Kidlington.

Changes Sought

Reasons for Participation

Following the precautionary principle, the Plan should start from the assumption that key strategic components of the Green Belt are considered sacrosanct. These components are identified by LUC (i.e. high impact) and include the Kidlington Gap and Begbroke Gap; acknowledging that some development may be acceptable where there are special locational advantages that only the Gaps offer (e.g. for the University or inward investment), or where the resultant development does not significantly impact on the integrity of the Gaps or their permanence.

We confirm that we wish to attend the examination in public.

Cherwell District Council Strategic Objective S017
 Provide access to AFFORDABLE HOUSING to those requiring affordable housing? NO COMPLETELY DELUSIONAL ! Cherwell District Council has a lower present from developers than Oxford City Council for the amount of affordable housing. Plans to build next to Oxford Parkway rail station are madness and this applies to the immediate surround area in north Oxford as the take-up will be by commuters to London and the present effects of high house prices in north Oxford will mean properties will be bought by speculative investors, NOT THOSE NEEDING AFFORDABLE HOUSING. Cherwell District Council has selected sites nearest to Oxford for greatest financial gain from developers to get the greatest financial return for it's self, not because it fulfils the aspirations it sets for generating affordable housing, since affordable housing is more likely to be affordable if it not so near to Oxford.

Changes Sought

Remove the need for affordable housing, because, there is no way it will be affordable next to northOxford. Be honest with people, tell them their lives in Kidlington and north Oxford are to be blightedwith complete traffic gridlock and damaging vehicle pollution.Be legal by NOT destroying Greenbelt land next to Cutteslowe Park, The Golf course, (an essentialrecreational resource currently), and stopping coalesce with Kidlington and north Oxford.

Reasons for Participation

Believes, with respect, the Inspector would much benefit from really listening seriously to ordinary people, regarding the very real experience and particularly genuine concerns of how these 'grand proposals' to 'illegally' destroy all the immediate greenbelt land around Kidlington and north Oxford, will have a completely devastating impact on the lives, health, well being and free movement of wellestablished existing communities.

Comments

While agreeing with the fact that Oxford has a high level of housing need it cannot be agreed that Oxford cannot meet the need by itself. The statement that there are clear and exceptional reasons for providing development within the GB suggest that the strategy is based on a foregone assumption/conclusion that the Oxford City's unmet housing need cannot be met unless development is carried in the GB. There has not been a comprehensive study to look into the option of developing brownfield sites within the city to build medium (or high rise if necessary) blocks of flats as has been done in London and in other major cities all over the world.Further it is debatable if housing development in the GB will provide affordable and sustainable travel opportunities to Oxford City's places of work. With the current fast rail transport to city of London it will attract a high percentage of workers who commute to London thereby pushing the housing market up in areas outside the city boundary. It is very unlikely that the key objectives SO10, SO11, SO12 and SO13 will be achieved. Particularly on SO11 and noting the flood risk outlined at 3.20 of sustainability appraisal report, measures to deal with increased run off from new development is not adequately addressed.

Detailed comments provided on the five purposes of the Green Belt. Policy ESD 14, paragraphs A.11 and B.260 of the adopted Local Plan Part 1 was quoted. The proposed developments around Begbroke, Yarnton and Kidlington contravene all of the above as they will not maintain the Green Belt's openness, they do conflict with the purposes of the Green Belt and will harm its visual amenities. At the time of writing the Local Plan Part 1, CDC were aware that they may be soon required to assist Oxford City meet its 'unmet housing need' and therefore should have been wary of making bold statements that they would need to completely renege on less than two years later. CDC show themselves to be completely untrustworthy and unfit for purpose by writing such definite and unequivocal policies in 2015 which they are then prepared to tear up and completely ignore in 2017. For example, their proposals in this partial review will remove the 'vulnerable Kidlington Gap' which CDC pledged to protect in the Local Plan as shown above. Indeed, CDC have themselves admitted that they are rushing through this process in order to protect the Local Plan Part 1 from being unadopted which would, they claim, lead to unrestrained and speculative development. However, by carrying out this partial review in this manner, CDC are undeniably ignoring or working directly against aspects of their Local Plan Part 1 which surely must mean that that document is itself not fit for purpose and should be unadopted. Policy Villages 1 of the adopted Local Plan Part 1 quoted. The scale of the development proposed around these two villages is massive relative to the size of the villages so contravenes the first point listed above. The development can not be described as infilling as it cover far too large an area between the two villages so contravenes the second point listed above. Clearly the third point is also not relevant here as new buildings are proposed, not conversions of existing ones. Seeing as this proposal contravenes all three of the points listed above one can only conclude that it is an unsound proposal.

Changes Sought

For the reasons I have given above AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which I additionally support and adopt as part of my own Representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.

Reasons for Participation

I would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.

PR-C-0436	05/10/2017	Steve	Pickles	West Waddy ADP on behalf of JA Pye (Oxford) Ltd	Y	Y	N	Y
-----------	------------	-------	---------	---	---	---	---	---

Comments

The Partial Review of the Cherwell Local Plan 2011 - 2031 (Part 1) proposes to remove a number of parcels of land from the Green Belt whose contribution to the five purposes of including land in the Green Belt was assessed in the Cherwell Green Belt Study (April 2017). This assessment has looked at land owned by J A Pye (Oxford) Ltd at Webb's Way Kidlington (Site Ref: PR32) and come to the conclusion that it only makes a 'low moderate' contribution to Green Belt purposes. It concluded that it did not make a significant contribution to any of the five purposes of including land in the Oxford Green Belt. With regard to purposes 1 and 2 (checking sprawl of Oxford & preventing merger of settlements) it concludes that the parcel plays no role with regard to these purposes. With regard to Purpose 3 of Safeguarding the Countryside it acknowledges that 'the southernmost field [which is the part of the site where J A Pye (Oxford) Ltd are proposing development] is contained by inset development on three sides and so has a stronger relationship with the settlement edge than the surrounding countryside.' On Purpose 4 it is acknowledged that 'The Parcel has insufficient relationship with Oxford to be considered to contribute significantly to its historic setting or special character.' While it is stated that there could be some detracting influence in terms of the wider rural setting of the city through the sites relationship with the Cherwell Valley, the only part of the site proposed for development, as indicated on drawing ASP1 B in the accompanying Landscape & Visual Appraisal, is the inner field which is well screened from the Cherwell valley by a tall, dense hedgerow.

Changes Sought

Amend the strategy to remove, or at least minimise, the amount of land to be removed from the Green Belt in the 'Kidlington Gap' by instead removing other areas, such as the J A Pye (Oxford)Ltd land at Webb's Way, Kidlington (PR32), which the Cherwell Green Belt Study (April 2017) has identified would cause less harm to the Green Belt.

Reasons for Participation

J A Pye (Oxford) Ltd owns land at Webb's Way, Kidlington and wishes to ensure that the argumentis strongly made for the removal of this site from the Green Belt and its allocation for housingdevelopment, which would help to address Oxford's unmet need.

Proposed Submission Plan - Section 5 (Green Belt)

Comments

The proposals conflict with the National Planning Policy Framework, one of the core planning principles of which is 'protecting Green Belts,' (para 17) and the advice in paragraphs 79 and 80, which state that 'The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.' This is particularly the case with the proposals on site PR38 which would lead to virtual coalescence between Oxford and Kidlington, leading to substantial erosion of Kidlington's identity as a separate settlement and the creation of a large area of urban sprawl on the northern edge of Oxford. This impact could be reduced by allocating areas around Kidlington which have a moderate or low harm to the Green Belt, such as my client's land at Webb's Way (site PR32) thereby reducing the number of dwellings that have to be allocated in areas where development would have a high impact on the Green Belt. Even if some development is still required on the PR38 land in order to accommodate Cherwell's allocation of 4,400 dwellings towards Oxford's unmet need, the detailed site Assessment on page 123 of Appendix 1 to the Cherwell Green Belt Assessment indicates that there would be substantially less harm to the Green Belt if only the areas closest to the Oxford City Council boundary were released, as indicated on the plan entitled 'Harm to Green Belt resulting from partial release of site'. The current strategy, which would lead to urban development over most of the 'Kidlington Gap', thereby leading to urban sprawl and significantly eroding the distinct identity of Kidlington as a separate settlement, is contrary to the purposes for which the Oxford Green Belt was designated and due to the scale of development proposed would cause significant harm to it. Given that there are other sites where development could be promoted, which would have less harm on the purposes of the Green Belt, it is not the most appropriate strategy.

Changes Sought

Amend the strategy to remove, or at least minimise, the amount of land to be removed from the Green Belt in the 'Kidlington Gap' by instead removing other areas, such as the J A Pye (Oxford)Ltd land at Webb's Way, Kidlington (PR32), which the Cherwell Green Belt Study (April 2017) has identified would cause less harm to the Green Belt.

Reasons for Participation

J A Pye (Oxford) Ltd owns land at Webb's Way, Kidlington and wishes to ensure that the argumentis strongly made for the removal of this site from the Green Belt and its allocation for housingdevelopment, which would help to address Oxford's unmet need.

Comments

Strong objection to all of the proposed development in the Oxford GB which “was designated to restrain development pressures which could damage the character of Oxford City and its heritage through increased activity, traffic and the outward sprawl of the urban area.” This quote is from paragraph B256 of Cherwell’s adopted Local Plan Part 1 and we fully support it. We also support Policy ESD14 in the Plan to maintain the Oxford GB. The Oxford GB supports all five purposes set out in the NPPF and has been largely successful over the last sixty years. In particular it seeks to protect the setting and character of the historic city of Oxford. The reference to the character of the City, as referred to in Cherwell’s Local Plan. is often overlooked but it is a crucial aim of GB policy. The historic city centre by its nature cannot be expanded or comprehensively redeveloped. It is already under substantial pressure and this is likely to become highly damaging if expansion on the edge of the city is not restricted. The City’s never-ending traffic problems are testimony to this, and there have been calls for even the number of buses in the centre to be limited. The GB also provides accessible open space, footpaths and other recreational opportunities for residents of the city and for the communities within it. It is well used and supported as public opinion surveys have shown. GB is intended to be a permanent designation only to be changed in exceptional circumstances (NPPF). We think that that the overall levels of growth proposed are unnecessarily high and that alternatives to development in the GB are available. We therefore consider that exceptional circumstances do not exist to justify development in the GB.

Changes Sought

The plan should be withdrawn and a spatial strategy for Oxfordshire established in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth, at realistic levels, away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should a) discourage further employment generating development in the city unless it is absolutely essential and b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.

Reasons for Participation

OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination in necessary and justified because of our longstanding interest and understanding of the Oxford GB.

PR-C-0567	09/10/2017	Dr Ian	Scargill	Oxford Green Belt Network	N		N	Y
-----------	------------	--------	----------	---------------------------	---	--	---	---

1439

Comments

Strong disagreement with the assessment that “exceptional circumstances” exist. Twelve “circumstances” are listed. The final ten are not exceptional circumstances at all. Some of them might be described as “opportunities”, some of them are simply descriptions of how development might occur, and others are meaningless, for example “12.the ability to create a sustainable, holistic, joined up vision for the whole of the Oxford/Kidlington/A44 corridor area”. That statement certainly does not constitute an exceptional circumstance. Exceptional Circumstance 1 (urgent and pressing need for homes) is highly contentious. It is based on the assessment in the SHMA which has been heavily criticised and never validated. The proposed DCLG standardised methodology proposes a much lower level of need that takes account of affordability. Exceptional Circumstance 2 (clear inability of Oxford to meet its needs) is also unproven. Oxford’s needs have not been established through its own local plan process and neither has its ability to meet its own needs. It is clear that alternative development strategies could accommodate a significant number of additional dwellings within the city. The submission document in proposing to develop in the GB is in complete opposition to the purpose of the GB and contradicts Local Plan Pt 1. The main purpose of the Oxford GB, (Local Plan Part 1 para B256), is to limit the growth of Oxford to avoid damage to its character and heritage. Oxford City Council itself should have a part to play in this by restricting the growth of employment generating activities to the minimum necessary. This would have the double benefit of releasing some land for housing and reducing the demand for further housing. However its currently proposed policies do the opposite. We have made this point in our representations to the recent Options consultation on the Oxford Local Plan. Alternative development strategies – which have been successful in the past – are possible for Oxfordshire, and include the diversion of growth away from Oxford towards the country towns. Oxford City Council should play its part in this. We also think it would be possible for the Oxfordshire authorities to promote the diversion of some economic growth to other parts of the country which would welcome and benefit from it – possibly through formal ‘economic twinning’ arrangements.

Changes Sought

The plan should be withdrawn and a spatial strategy for Oxfordshire established which can address the issues addressed in this review in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should (a) discourage further employment generating development in the city unless it is absolutely essential and (b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.

Reasons for Participation

OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination in necessary and justified because of our longstanding interest and understanding of the Oxford GB.

Proposed Submission Plan - Section 5 (Green Belt)

Comments

This Plan is contrary to the NPPF which states in paragraph 14 that Local Plans should meet objectively assessed needs unless specific policies in the Framework indicate development – including land designated as GB - should be restricted. It is also contrary to the twelve core land use planning principles set out in Paragraph 17 of the NPPF one of which is that planning should take account of the different roles and character of different areas, promoting the vitality of our main urban areas and protecting the GBs around them. Furthermore, National Planning Practice Guidance makes clear that assessing need is just the first stage in developing a Local Plan and that once need has been assessed, the local planning authority should take account of any constraints such as GB, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need. Cherwell has accepted (or, more accurately, been pressured to accept) the inflated figures of the Oxfordshire SHMA in full and has never followed this guidance to “take account of any constraints such as GB Which may restrain the ability of an authority to meet its need”. The proposed submission plan is therefore not consistent or compliant with national policy.

Comments

We note that the plan calculates the loss of GB to be 3%. There is an implication here that the loss is relatively small and therefore acceptable. This is fallacious as is illustrated by the following example taken from a paper by Professor Dieter Helm, Chair of the Government’s Independent Natural Capital Committee “Think about St James’ Park in central London, set between Buckingham Palace at one end and Whitehall at the other. Suppose a developer comes along with a proposal; to build on a small plot on one corner of St James’ Park. This developer might argue as follows. The marginal value of the patch of grass in a small corner is not that great. After all, all the rest is left. Better still, the developer might pay such an enormous price for the small bit of land that perhaps a hospital could be built elsewhere with the proceeds. The marginal value to the ultimate owner of this house is so great relative to the marginal value of the small corner of St James’ Park that it makes marginal economic sense to build on it. There are two problems with this argument. The first is that the same marginal case can be made for the next small bit of St James’ Park. Indeed the value to the developer is even higher now because the Park is now slightly smaller. And for the next bit, the argument just gets stronger. Carried to its limits there is a great marginal case for incrementally building all over St James’ – and Hyde Park, and Regent’s Park and indeed all the green spaces in London. That is indeed what would have happened if the market had been left to allocate the land as if St. James’ was a private good. It is what would happen to the GB too. The second problem is that the reason why the land is so valuable is because it is not surrounded by other houses in close proximity. The very rich person who buys this house on the corner of St James’ is paying so much because others are not able to do so, and because it is St James’. We cannot all have green spaces around our houses – green space is in fixed supply. Carry both of these arguments across to the GB. Each marginal bit has a marginal economic case for developing it, and as each bit is chipped away, the value of the whole public good – the GB system – diminishes. The core point here is that the marginal case if carried through to its logical conclusion leads to no GB – there is a good marginal case for building on each and every marginal bit of land, as there is for building on each and every bit of St James’ Park.” The loss of a small proportion of GB therefore increases the likelihood of further loss. GB should be considered as an entity or system not as a collection of individual land parcels. This is a further reason why we fully endorse Government Policy (NPPF para 79) that GB is a permanent designation.

Changes Sought

The plan should be withdrawn and a spatial strategy for Oxfordshire established which can address the issues addressed in this review in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should (a) discourage further employment generating development in the city unless it is absolutely essential and (b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.

Comments

We consider it to be a serious omission that at the options stage a question was not asked about the acceptability of development in the GB. This is probably the most important matter raised in this review. The plan may therefore be rendered procedurally noncompliant.

Changes Sought

<p>Objection to large areas of land being removed from the GB. The GB was set up to safeguard the countryside from the city spreading into neighbouring countryside and to preserve the setting of the historic and beautiful city of Oxford. It now seems that present claims are not justified. Transport - Before the construction of the M40 volume of traffic along the A44 increased year by year. Completion of the motorway saw a significant drop in use of the road to Oxford. Since that time numbers of both lorries and cars have increased. If there are problems now, what can we expect when the new houses are built. The roads into Oxford through Yarnton and Kidlington will not be able to cope. Closing Sandy Lane - Sandy Lane is frequently used. The rail crossing and the canal bridge cause no problems. The bridge that was built about 1790 copes with 21st century traffic - if it needs strengthening surely this should not be a problem for today's engineers. If Sandy Lane is closed that traffic will use Sunderland Avenue just adding to the turmoil. Access to Oxford is most important to people in this area. The Kidlington area already has problems Are there better areas with easier access to Oxford? The Heathfield area would have the existing routes into Oxford plus access through Islip and Bayswater (and even through Woodeaton and Marston, although these are country roads). The Islip route has the addition of rail contact with the city. The Kidlington district is not the right place to build large estates. Yarnton and Kidlington have long histories as villages and the people living there do not deserve to be swallowed up in a great anonymous conurbation.</p>

<p>Objection relating to Kidlington, Yarnton and Begbroke on the following grounds: Development could be located on sustainable sites identified elsewhere in the district rather than GB which Government says should only be used as a very last resort. A high proportion of the new homes should be affordable for young people and families from the local area. Infrastructure such as roads and schools should be put in place, as well as adequate parking facilities for the new residents. Traffic congestion and parking is already a major problem in Kidlington and the surrounding area, especially in the rush hour. Support for Cherwell's decision not to include land behind the Moors for development, as this is GB land used for recreation by local people, and would cause yet more traffic problems. I am appalled at the prospect of Kidlington becoming simply another suburb of Oxford.</p>

<p>The proposed submission plan lays emphasis on the need to build appropriate infrastructure to match construction of dwellings – except for movement of vehicles in particular where little is detailed, relying on the Oxon Transport Strategy, which has not been designed to cope with the 4400 new dwellings. For example – there will be an obvious need for much more public transport – vital yet quite difficult to arrange as a planning condition – if commuting is to be avoided. More emphasis and detail of movement management please. Dwelling densities [at 40 or 50 to the hectare] are way too low, and do not recognise the need to maximise the utilisation of land resources intensively. More extensive dwellings would allow more funding for infrastructure - 70/80 dwellings /ha would be a better target – achieved by a greater variety of heights than on most estates, and a wide variety of smaller flats etc. – much needed in Oxford. The recent downgrading of Strategic Housing Management Assessment’s overall housing numbers for Oxon will presumably impact on the north Oxford numbers? Why not adopt the Cambridge approach and, whilst taking areas of existing GB, create, further out, new GBs – even increasing the new areas. This would help considerably in persuading public opinion of some of the advantages of the proposals. Cheaper housing of all types is currently dependent not only on factory built structures [low cost, speed and quality] but, above all, on cheaper sites. Offer farmers and land owners double the current market value of their land, compulsorily only if necessary. Build cost would be unaffected, but overall cost very much reduced, and all housing – for sale or for rent would be much nearer to being affordable, however it is financed. Cherwell’s proposals or similar, no doubt amended in the light of public opinion, are essential if Oxford’s acute housing shortage and unaffordability are to be cracked.</p>

1665	Comments					
<p>Oxford's unmet housing needs - it has been proven that the number of houses required has been grossly overestimated. Oxford City must have plenty of sites that can cater for their housing requirements such as brown belt land and derelict sites. Also long term vacant properties could be used either in their ownership or under compulsory purchase orders. GB - Greatly saddened that building on GB land could become acceptable. Brown belt land nearer better road links such as along the M40 should be seriously considered. Building this amount of houses on 2 - 3 existing communities would actually swamp and destroy them. This GB land is widely used for recreational purposes by many locals and visitors. GB is integral to my business. It differentiates the villages and their own identities. This proposal will create another form of Oxford where one area blends into another, all clumped together. Villages will triple in size which is just madness. There will also be greater potential for flooding. Once this GB has gone it will be lost forever. Density - the proposed density will result in everyone living in each others pockets and paying a premium for the privilege. Affordable housing is needed in the form of cheaper homes or council houses enabling the younger generation (and some older people) to be able to afford their own houses in this area. The proposed affordable housing makes me laugh and will not be affordable for local people. We have enough luxury houses already and people attracted to these houses are likely London commuters or investment properties to be rented out. Transport - Road structure is already at capacity and this development would swamp roads that are already congested. The roads are already not really fit for purpose with little or no maintenance. A park and ride would not be feasible as no bus lane could be implemented due to the bottle neck areas. The idea of shutting Sandy Lane is extremely preposterous - this carries a lot of local traffic which would have to use other congested options. A survey was done showing how much Sandy Lane is used. How would this work as there are houses right up to the level crossing? Employment - The figure for new employment is grossly overestimated. Existing and part built Science Parks and the like already add to the traffic problems on inadequate roads, while a lot of units remain empty. These sort of developments should be located near or have easy access to motorways and be fit for purpose. I feel like I am being pushed out of the village I was born and grew up in. There are far better sustainable sites which could make a whole new community. Please leave our GB alone.</p>

<p>Suggests that by keeping on taking little bits of the GB it doesn't matter. The diagram shows how close to taking a complete slot out of the GB this proposal is. This is the wrong way to protect the GB as nibbling away all the time will reduce it to unconnected bits of land that can no longer be called a GB. Perhaps this is in reality the long term plan for the County?</p>

Proposed Submission Plan - Section 5 (Green Belt)

PR-C-0832	10/10/2017	David	Flavin	Oxfordshire County Council				
5025	Comments							
<p>LPAs should only amend Green Belt boundaries in exceptional circumstances and through a review of a Local Plan. OCC agree that there are exceptional circumstances for removing land from the Green Belt and allocating it for housing as set out in LPPR para 5.1, including the urgent need to provide homes to meet Oxford’s significant needs, particularly for affordable homes, and the inability of the City Council to fully meet its own needs within its administrative boundary. When reviewing boundaries LPAs should seek to promote sustainable patterns of development. Apart from land SE of Woodstock, all the proposed allocations in LPPR lie within the Green Belt, with the land at Woodstock being adjacent to the Green Belt. These locations offer the most sustainable options for meeting Oxford’s needs; channelling development for Oxford’s needs towards othersettlements in Cherwell would result in longer distance commuting to Oxford, placing further pressures on the transport network. The LPPR seeks to set new Green Belt boundaries which are well defined and which can last beyond the plan period. There is no objection to land at Frieze Farm remaining in the Green Belt and being used as a golf course as appropriate facilities for outdoor sport which preserve the openness of the Green Belt are not inappropriate uses in the Green Belt.</p>

<p>These comments are specifically in respect of Policy PR3(b) as separate representations have been made by the Tripartite on Policy PR3. The Tripartite notes that under Policy PR3(b) it is proposed to remove a small area of land from the Green Belt that lies adjacent to the proposed allocation (Policy PR8) and bounded to the east by the railway line. The railway line is to become ‘the consistent and strong Green Belt boundary at the eastern edge to the proposed allocation’ (Policy PR8).The land the subject of Policy PR3(b) is owned by the University of Oxford (part of the Tripartite) and is coterminous with and closely-related to the remainder of the proposed allocation at Policy PR8. Whilst the Plan states that there is no need for PR3(d) sic – meant to be PR3 (b) – to be allocated, reserved or safeguarded for development, equally the Tripartite considers that there is no clear or valid reason why this land should not be incorporated within the red line boundary of the proposed allocation at Policy PR8.The Tripartite has requested (elsewhere in its representations on Policy PR8) that land be excluded from the proposed allocation because of different land ownerships, willingness to develop/collaborate and nature of the land-use contribution towards the aspirations of Policy PR8. However, none of these apply to land at Policy PR3(b), which could usefully be included in the proposed allocation to contribute towards the development, the delivery of homes and place-making principles of the new urban neighbourhood at Begbroke. It would also contribute towards offsetting the removal of land from the proposed PR8 allocation for deliverability and other reasons (e.g. land contamination). The land is available, suitable, deliverable and achievable so is developable in the context of Paragraph 47 of the NPPF in conjunction with the remainder of Policy PR8 and it would be reasonable, rational and logical to include it as ‘residential land’ within Policy PR8 and on the Policy PR8 Policies Map. As already established in the Plan it would make no contribution to the purposes of including land within the Green Belt as set out in the NPPF.</p>								
Changes Sought				Reasons for Participation				
<p>Amend Policy PR3(b) to remove the reference to 0.7 hectares of land adjoining and to the west of the railway (to the east of the strategic development site allocated under policy PR8 as shown on inset Policies Map PR8); and include the 0.7 hectares of land referred to above as ‘residential land’ within Policy PR8 and on the Policies Map. This is on the basis that it would make no contribution to the purposes of including land within the Green Belt as set out in the NPPF and would offset (in part) land recommended by the Tripartite to be removed from the Policy PR8 allocation because of deliverability and other issues (e.g. land contamination).</p>				<p>The land owned and controlled by the Tripartite comprises some 86% of the largest draft allocation within the Plan and as such, occupies a unique and vitally important role in meeting Oxford’s Unmet Housing Needs. As such, the Tripartite consider it is essential that it is present [and/or represented] and participates at the Examination in order to assist the Inspector by responding to any queries that may arise and supporting the assessment of the soundness of the Plan.</p>

1655	Comments							
<p>Strong objection to building on Oxford's GB and on North Oxford Golf Club. Why is Cherwell helping to alleviate Oxford’s housing problem to the extent it is? The roads into the city via the A40, A4260 and A44 are already jammed. As far as I am aware there are no plans to improve the road network. Local services in the shape of schools and particularly GP surgeries can barely cope now. Oxford City Council persists in attracting industries which need employees but cannot house them. It is their problem, not Cherwell’s. They are not building on their own land but trying to get the county to do it for them. Firstly, the aim of the GB is to stop sprawl, reduce pollution and preserve the unique character of historic towns and it’s separate, surrounding villages. Villagers north of the city especially those in Kidlington, Begbroke and Yarnton do NOT want to merge with Oxford absorbing into a large urban sprawl. The GB was set up to prevent this and preserve the identity of individual villages. This is an essential aspect. There is no area more suitable for this purpose than what is known as the “Kidlington gap”. Building will destroy walks and views. Once built on, the GB will be lost for ever. Pollution will increase; people will need to drive further to see some green space and breathe clean air, which leads to more pollution. Future generations will not forgive this action. Secondly, The National Planning Policy Framework (NPPF) stipulates certain conditions must be fulfilled to dispose of recreational and sports facilities (para 74 under “health”) . North Oxford Golf Club (NOGC) is a thriving well used club with nearly 500 members of all ages; it has over 2500 visitors a year for golf and numerous others for bridge, Pilates, business meetings, yoga and social events. To close it would contravene the NPPF. The NPPF states “existing open spaces, sports and recreation facilities including playing fields should not be built on unless not required”. NOGC is “required” by its many members, thus NOT surplus to requirements. Close the club and people lose the many benefits, physical, psychological and social that being a member of a thriving club brings. Thirdly, The NPPF states recreational facilities shouldn’t be closed unless new facilities are better than those already on offer. The council’s proposal to provide a golf club on a smaller site at Frieze farm with no natural features such as exists at NOGC contravenes the NPPF. That area has electricity pylons and a problematic/difficult access. It will take at least 10 years and many millions of pound to build the equivalent of an established course which has been in existence since 1907. Fourthly, The flora and fauna of NOGC makes a contribution to biodiversity in the form of many different species of trees, shrubs bushes and flowers along with the great variety of wildlife including the rare great crested newt, bats, roe deer, birds water fowl etc. All this would be lost were this site to be built on. The GB helps to preserve such important habitats for future generations. The plan states housing on NOGC will be of a low density. This will not help Oxford’s housing need, especially as they are likely to be bought by London commuters!</p>

<p>Kidlington is identified as the key Existing Centre, but development is located in the Begbroke Gap, separated from the village by the A44 (for PR9) and railway line and canal. The new train station at Sandy Lane seeks to justify development in the Gap, but it would make much more sense to locate the train station at the intersection of the Banbury Road and Langford Lane, close to existing customer generating uses at the airport and established industrial area, linking with the Rapid Transit and also being accessible to the existing population of Kidlington. The problem with the 1,950 houses at Begbroke is that these are too few units to fund a new railway station, with too few customers to ensure viability, and given that this is only a ‘potential’ piece if infrastructure it should not be included as a factor of location to justify the allocation (i.e. its an idea, not evidence).</p>								
Changes Sought				Reasons for Participation				
<p>Following the precautionary principle, the Plan should start from the assumption that key strategic components of the Green Belt are considered sacrosanct. These components are identified by LUC (i.e. high impact) and include the Kidlington Gap and Begbroke Gap; acknowledging that some development may be acceptable where there are special locational advantages that only the Gaps offer (e.g. for the University or inward investment), or where the resultant development does not significantly impact on the integrity of the Gaps or their permanence.</p>				<p>We confirm that we wish to attend the examination in public.</p>				

Proposed Submission Plan - Section 5 (Green Belt)

Rep Number	Date Received	First Name	Surname	Organisation	Legally Compliant	DtC Compliant	Sound	Participate
PR-C-1409 5601	10/10/2017	Richard	Cutler	Bloombridge Development Partners			N	Y
<p>Comments</p> <p>Explains that in terms of the exceptional circumstances listed at paragraph 5.17 of the draft Plan, there is nothing here that would not also justify The Moors (PR14). Contest the following exceptional circumstances listed at paragraph 5.17:</p> <ul style="list-style-type: none"> •Circumstances 1 & 2 – These are not exceptional circumstances in the context of the proven alternative case for development that is University-related or by a major inward investor. 4,400 houses (in the context of the Oxford housing stock) is not of a scale that will assist affordability (i.e. create a substantial supply-side price shift). It is also highly unlikely that the people most in need of new housing will be able to afford to live in these new houses. •Circumstances 3 to 6. These are not exceptional circumstances. They could equally be applied to justify the continuing existence for the Green Belt and its strategic importance between the built up area of Oxford and South East Kidlington (see the first three points at paragraph 5.32 of the draft Plan). •Circumstance 7. Begbroke does not have any more exceptional place shaping potential than The Moors, but its scale (at 1,950 houses) is totally out of proportion to the environmental sensitivities and landscape and village character in this area, including the strategic need to protect the Begbroke Gap. •Circumstances 8 & 9. These are just general statements, not part of the exceptional circumstances test, noting the acknowledged importance in Green Belt terms of the ‘rural setting’ along the A44 between Woodstock and Peartree. •Circumstances 10 & 11. These are relevant, but none of the proposed sites acts to strengthen Kidlington village centre or provide additional facilities that will benefit Kidlington/Gosford, Begbroke and Yarnton. •Circumstance 12. A joined up Vision is an output from an assessment process (i.e. requirement if the test is passed) not an input or a reason to justify the loss of GreenBelt land in itself. <p>They are based on the false premise that housing need is a compelling exceptional circumstance. It is not, given some of the 4,400 housing units could be sited in Cherwell outside of the Green Belt, as illustrated by West Oxfordshire’s proposals at Eynsham. There is also the need to safeguard land close to Oxford for the University and major inward investors, thus competing away the capacity of PR6 and PR8. Moreover, it is normal for the exceptional circumstances test to address the reasons for allocating land as GB (i.e. paragraph 5.32 of the draft Plan) as well as how the development proposals would ensure a long-term defensible GB boundary, thereby grounding the case for a GB release in the special characteristics and value of the particular part of the GB. This seems to have been omitted, noting that it is particularly tough for development to be supported in strategic gaps given the first three points listed at paragraph 5.32. The whole of the draft Plan fails on this point (and also because of the false premise) and is therefore unsound. There is a need for an alternative strategy (and thereby omission sites).</p>								
Changes Sought				Reasons for Participation				
Following the precautionary principle, the Plan should start from the assumption that key strategic components of the Green Belt are considered sacrosanct. These components are identified by LUC (i.e. high impact) and include the Kidlington Gap and Begbroke Gap; acknowledging that some development may be acceptable where there are special locational advantages that only the Gaps offer (e.g. for the University or inward investment), or where the resultant development does not significantly impact on the integrity of the Gaps or their permanence.				We confirm that we wish to attend the examination in public.				
We note that paragraph 1.19 of the draft Plan records the LPP1 Inspector’s advice that Oxford’s unmet need must be considered within the context of a “countywide housing market area”. It is difficult to see the case for the loss of strategically important Green Belt given this context. Cherwell need to repackage and represent the need for a strategic review of the Green Belt and also take a comprehensive approach to include University and inward investor needs given that the prospect of a further Green Belt review is unlikely for a generation.								
PR-C-1422 5839	10/10/2017	J K	Jutton					Y
<p>Comments</p> <p>Paragraph 5.17 -I consider paras. 1-10 to be unsound and unjustified. I find para. 9 particularly perverse as it suggests that the need to “improve the transport infrastructure in the north Oxford/A44 corridor area” justifies the building of 4400 houses on Green Belt land in the area. Surely the reverse is the case! Building a massive housing development and prioritising the A44 over the A4260 for private vehicles is what would make transport infrastructure improvements necessary.</p>

<p>Comments</p> <p>Transport into Oxford is already poor and inadequate. In the mornings, the traffic is often queued right back to Yarnton. Even the current bus lane has little effect until you get past the Peartree Roundabout. Even more houses can only make this worse.This is Greenbelt land- the whole purpose of Greenbelt land is to keep a green area. I have major environmental concerns and strongly believe the environment will be harmed by this new development.Oxford City have not yet identified their current housing needs, to the idea that we need this development to help with the housing needs just doesn't make sense.There are already issues with flooding. More houses will add to this problem, which occurs on a regular basis. Fields flood, and roads flood. More houses will cause more flooding. This response though separate and my own should be read in conjunction with the Representations made by the Begbroke & Yarnton Green Belt Campaign "BYG".</p>								
Changes Sought				Reasons for Participation				
For the reasons I have given AND the Representations made by the Begbroke & Yarnton, Green Belt Campaign which I additionally support and adopt as part of my own Representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.				I would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.

Protest about the housing plan for the green belt surrounding the villages of Yarnton and Begbroke. Understand that the plan proposes the removal of land from the Oxford Green Belt. This goes against national policy. There are no exceptional circumstances in this case as Oxford City has many options for meeting their own needs within their boundary. Furthermore, this area is the only beautiful open space left that separates the villages of Yarnton, Begbroke and Kidlington north of the City. Lived in Yarnton for 43 years and have seen massive growth of housing during this time, in fact the village is now about 4 times the size of the mid-70s. The recent large development of the Cresswell estate filled the last green space within the Rutten lane, Cassington road and A44 triangle. Please, please do not encroach on our green belt.

5627	Comments								
The proposal takes no account of GB policy to protect settlement gaps. The amount of countryside proposed for development is too large and with no consultation of neighbouring developments already agreed in neighbouring Woodstock and Long Hanborough. Both will grid lock the existing road networks and explode the population causing harm to the environment. There are no exceptional circumstances that require the housing proposed to be located close to Oxford. Figures quoted are notionally based. Employment should be supported across Oxfordshire and not focused within the City. Please save our green belt and do not overpopulate this area.

The housing density of the new developments will be 45 houses per hectare on the main site to the east of the A44. This is 50% higher than the density of the Creswell Close/Pixey Close/Hay Day Close development in Yarnton a few years ago. Indeed, Cherwell stated when given planning permission that the number of houses on that site must be restricted to prevent over development. Doesn't understand the reason when this policy has been changed now. Therefore the proposal is irresponsible!

CUTTESLOWE PARK: Jewel in the crown of Oxford's parks and recognised by a Green Flag Award. Has a wide range of recreational activities and attracts many thousands of visitors every year. Views and countryside around the park of great value to surrounding communities. states " The public open green space/extension to Cutteslowe Park and agricultural land to be kept free of buildings to avoid landscape impact2. This is insufficiently robust it is naive to expect the Oxford college that owns the land to protect the setting of the park rather than get the land allocated for commercial development.									
Changes Sought					Reasons for Participation				
The Cherwell Plan is fundamentally unsound and I suggest it should be rejected. Cherwell should re-start the process at a future time when the amount of housing needed has been realistically calculated. Cherwell should have due regard for the NPPF an in particular the parts of the framework which apply to the Green Belt.

It is clear that Oxford's greatest need is for affordable housing for key workers, people new to the housing market and people working in Oxford's developing science economy who require easy access to Oxford's employment areas. Such housing must have easy access to affordable and sustainable transport options which development close to Oxford would allow. BPC particularly notes the policy proposal to allocate 50% of any housing mix to affordable housing.

Oxford has 300 empty properties, West Oxford around 450 empty properties, Cherwell around 1000 empty properties, South Oxfordshire has 800 empty properties. Local planning authorities should identify and bring back into residential use empty housing and buildings in line with local housing and empty homes strategies and, where appropriate, acquire properties under compulsory purchase powers.They should normally approve planning applications for change to residential use and any associated development from commercial buildings (currently in the B use classes) where there is an identified need for additional housing in that area, provided that there are not strong economic reasons why such development would be inappropriate A three bedroom home will cost at least £595,000- £300,000 price tag for a one-bedroom flat at Barton Park which soars above city average- A two bedroom flat will cost at least £350,000- Is this "affordable" for new entrants and key workers specified in S018? (healthcare, teachers and many others)- Price inflation is what will happen with the green Belt proposals in Begbroke and beyond.- Would houses be Freehold/Leasehold/Rented and how would the prices be controlled?									
Changes Sought					Reasons for Participation				
					Please review our PowerPoint presentation for the comments of Begbroke parish council. This is necessary as we believe Cherwell Executive will ignore any representations as they have already made their mind up. We believe that The Planning Inspectorate will take more notice of what we have to say.

<p>Objection relating to Kidlington, Yarnton and Begbroke on the following grounds: Development could be located on sustainable sites identified elsewhere in the district rather than GB which Government says should only be used as a very last resort. A high proportion of the new homes should be affordable for young people and families from the local area. Infrastructure such as roads and schools should be put in place, as well as adequate parking facilities for the new residents. Traffic congestion and parking is already a major problem in Kidlington and the surrounding area, especially in the rush hour. Support for Cherwell's decision not to include land behind the Moors for development, as this is GB land used for recreation by local people, and would cause yet more traffic problems. I am appalled at the prospect of Kidlington becoming simply another suburb of Oxford.</p>

<p>Oxford's unmet housing needs - it has been proven that the number of houses required has been grossly overestimated. Oxford City must have plenty of sites that can cater for their housing requirements such as brown belt land and derelict sites. Also long term vacant properties could be used either in their ownership or under compulsory purchase orders. GB - Greatly saddened that building on GB land could become acceptable. Brown belt land nearer better road links such as along the M40 should be seriously considered. Building this amount of houses on 2 - 3 existing communities would actually swamp and destroy them. This GB land is widely used for recreational purposes by many locals and visitors. GB is integral to my business. It differentiates the villages and their own identities. This proposal will create another form of Oxford where one area blends into another, all clumped together. Villages will triple in size which is just madness. There will also be greater potential for flooding. Once this GB has gone it will be lost forever. Density - the proposed density will result in everyone living in each others pockets and paying a premium for the privilege. Affordable housing is needed in the form of cheaper homes or council houses enabling the younger generation (and some older people) to be able to afford their own houses in this area. The proposed affordable housing makes me laugh and will not be affordable for local people. We have enough luxury houses already and people attracted to these houses are likely London commuters or investment properties to be rented out. Transport - Road structure is already at capacity and this development would swamp roads that are already congested. The roads are already not really fit for purpose with little or no maintenance. A park and ride would not be feasible as no bus lane could be implemented due to the bottle neck areas. The idea of shutting Sandy Lane is extremely preposterous - this carries a lot of local traffic which would have to use other congested options. A survey was done showing how much Sandy Lane is used. How would this work as there are houses right up to the level crossing? Employment - The figure for new employment is grossly overestimated. Existing and part built Science Parks and the like already add to the traffic problems on inadequate roads, while a lot of units remain empty. These sort of developments should be located near or have easy access to motorways and be fit for purpose. I feel like I am being pushed out of the village I was born and grew up in. There are far better sustainable sites which could make a whole new community. Please leave our GB alone.</p>

<p>How many of the new homes will be actually affordable? Developers consistently default on their affordable housing quota. Predicted prices for starter homes at Barton Park are already beyond the reach of first time buyers. Most new houses are likely to serve the London commuter and buy to let markets, which means that Kidlington's young people and the County's key workers still won't get the affordable housing they need. What hope will young people have of secure affordable housing and does Cherwell want to price essential workers out of the housing market? If affordable housing can't be guaranteed, there is also the further likelihood that already struggling public services will deteriorate.</p>

PR-C-0718	01/10/2017	Daniel	Walround					
1807	Comments							
<p>Oxford City has consistently failed to develop land for meeting its housing needs. There is so much land within the Oxford City ring road that has not been developed, especially brown field sites. Much of the housing needs in the area are for jobs within Oxford City. Huge number of people commute into Oxford to meet the demand of jobs. Yet housing has failed to keep pace. Housing should first be developed closer to where people work, which would be consistent with meeting emission targets set out by central Government. Thus these proposed plans are ineffective because Oxford City has failed to develop within the ring road. Believes that the District Council plans are inaccurate and have been prepared in such a way to present an biased view. Cherwell District Council are not taking this consultation seriously. This concern is drawn from attending a Public Meeting on 21st September in which CrBarry Wood attended. Several respected members of the local community put forward sound arguments and questions all of which Cllr Barry Wood failed to answer. If the leader of Cherwell District Council cannot directly address the concerns at such a meeting it undermines the whole consultation. It is deeply concerning that Cllr Barry Wood has stated that he does not believe the developers cannot meet or even get close to the affording housing targets. Thus these plans should be rejected. It is also deeply concerning to hear Cllr Barry Wood give such negative (and unprofessional) references to lawyers and implied that he and the Council are being forced into allowing developers to build in wholly inappropriate ways that will have a negative impact on Kidlington and Yarnton. Layla Moran MP in a public meeting put forward several suggestions that should be considered. Namely that the projected growth and requirements for housing in the proposed plan should be reviewed given that revised figures are soon to be updated. With considering public opinion expressed at the same meeting it would be very unwise for Cherwell District Council to ignore Layla Moran MP's very reasonable request. The housing in these plans do not appear to be suitable for sustaining the affordability for local people. Essentially people are being priced out of the area they grew up in. There are complaints that people on lower paid but essential jobs for Oxford's infrastructure are unable to live in the locality. Yet the plans appear to be targeting larger four to five bedroom houses at low density to supply demand for London based commuters. This is not a local plan for a local city, it is to supply demand for people to work in London and live some where less urban, whilst ruining vital Green Belt land between Oxford and Kidlington. Considering that we may be seeing the first price drop in the London market for some time which has a high chance that it will propagate to the whole South-East I believe it to be reckless of the District Council to allow an already compromised affordability housing targets to be further compromised. This is before considering the negative impact current Brexit talks are having on the economy, the prospect of a hard Brexit, and with a Government targeting net migration of tens of thousands. A responsible council would be planning for the worse cliff edge Brexit will bring.</p>

Comments

The Government has published a consultation document Planning for the right homes in the right places. This document sets out Government proposals to assess housing needs in different areas of the country. It has been welcomed by many professionals who regarded the earlier SHMA estimates as overblown and unjustified. Rep quotes Helen Marshall of CPRE as saying that the housing needs in Oxford had been reduced in the new estimates by no less than 47%. For more than 60 years the Green Belt that forms the Kidlington Gap has successfully checked urban sprawl, and it has prevented the merging of Oxford and Kidlington, provided access to countryside to residents of north Oxford and Kidlington, and preserved the setting of the historic town of Oxford. In view of the new assessment of housing need in Oxford, and the lack of a completed local plan by Oxford City Council informed by accurate data on the land available for housing within Oxford, it would be irresponsible and reckless for Cherwell District Council to proceed with its plans to build on the Kidlington Gap. The above Government consultation document also notes that the pressure on housing is much greater in London, and is set to increase further over the next decade. Given that the proposed housing in PR6a and PR6b is approximately 10 minutes walk from Oxford Parkway station it is obvious that those sites east and west of Oxford Road (A4165) will be very attractive for London commuters. It is hard to imagine how key workers in Oxford in need of affordable housing will be able to compete with the market pressure of London commuters for this housing. The proposed housing density on the golf course is only 25 per hectare, and it is highly unlikely that any of it will be affordable to those who need cheaper housing in Oxford. One of the greatest attractions for families living in north Oxford is the wide range of available secondary schools. If 1,180 new households were built on either side of Oxford Road there would be even more car journeys to schools inside the Ring Road to prolong the commute into Oxford. Following a Freedom of Information request Oxford City Council has admitted recently that the new road layout and traffic lights at Cutteslowe roundabout have not improved traffic flow along Banbury Road. This continues to be an area of severe traffic congestion during school term, and the proposed housing can only make it worse. The only good transport link is from Oxford Parkway station, but even there the huge station car park is already filled by London commuters during week-days, less than 2 years since the station opened. We understand that Cherwell District Council have been obliged by the "Duty to Cooperate" with Oxford City Council to solve Oxford's perceived housing problems. But Oxford City Council has chosen to allocate land to employment at the Northern Gateway development instead of housing. Further employment growth is unnecessary and unsustainable in an area of full employment and a shortage of housing. It only exacerbates the housing problem, and leads to even more people commuting into Oxford. Rather than helping Oxford City Council in this way Cherwell District Council should challenge the lack of thinking displayed by the City Council. We recognize that Oxford has a housing problem, especially for key workers. But building on the Kidlington Gap is unjustified by the information available, and by Oxford City Council's own policies to develop land for employment rather than housing. Once the Green Belt has gone it has gone forever, and it is difficult to see how further urban sprawl to the east of Oxford Road could be contained since the nearest road is the B4027, which is several miles to the east (National Policy Planning Framework, paragraph 85). We urge Cherwell District Council to postpone any decision on the development of the Green Belt around Oxford until all the facts are made available.

Oxford City Council's requirement in their unmet housing need is specifically for affordable homes (2.31 of Oxford CC Local Plan). Much of the Cherwell DC contribution will be located in the Kidlington gap close to Oxford Parkway Station. This land will be seen by housing developers as prime land for the development of houses for the London commuter market and will be marketed and priced accordingly. Developers will be keen to reduce the amount of affordable homes on these sites from the required 50% and will plead that such sites will not be viable unless a smaller proportion are affordable. Oxford's unmet housing need will not be achieved in this way. Therefore the proposed submission is ineffective.

Dramatic increase in housing density: Cherwell District Council seems to be rewriting its own policies to try to make this plan 'sound'. When giving planning permission for the new development in Yarnton a few years ago (Cresswell Close/Pixey Close/Hay Day Close), the council stated that the number of houses on that site must be restricted to prevent over-development. However, the housing density of the new developments will be 50% higher – at 45 houses per hectare on the main site to the east of the A44. This density of houses is completely inconsistent with the existing community, and will increase the risk of flooding in these areas while also increasing pressure on local infrastructure and services. Risk of flooding: There are many streams in the area around Begbroke – Rowel Brook, the spring on Spring Hill, etc. – and many of the surrounding fields flood after periods of wet weather. If vast swathes of the countryside are tarmacked over, there is a real risk of serious flooding.

Reasons for Participation

Proposed changes to the plans
In light of the objections outlined above, I would suggest:

- reviewing the housing forecasts on which the current Local Plan is based. As mentioned above, the calculations used to make these forecasts have been revised recently and the number of new homes required has fallen as a result.
- looking to build on brownfield sites within Oxford itself. This would significantly reduce the impact on local transport infrastructure, and provide housing where it is actually needed.
- looking to build on sites closer to the main industrial areas of Oxford (namely the City Centre, Headington and Cowley); again, this would reduce the impact on local transport infrastructure and increase the likelihood that these houses would be bought by people working in Oxford rather than people looking to commute to London.

I would like the Begbroke and Yarnton Green Belt Campaign to act as my representative during the Examination by the Planning Inspector

Agree that there is 'exceptional need' for affordable housing in Oxford and Oxfordshire, but dispute that this development plan will provide young people and key workers with the truly affordable housing that they so desperately need. It is risible to believe that Cherwell's 'vision' of 50% of affordable housing will be realised when developers consistently default on their affordable housing obligations; Oxford itself fails to uphold its affordable housing targets in new developments such as Templar Square (where it settled for 20%), while predicted prices at the huge new Barton Park development on land that the City owns are already beyond the reach of first-time buyers. Unless a statutory mechanism is introduced to oblige developers to meet their affordable housing obligation they will continue to default. The proximity of the proposed development to Oxford Parkway rail station will attract London commuters (the reverse of the housing's intended occupancy by Oxford workers), and the high-rent buy-to-let sector will also prosper. There is already 50–70% rental occupancy in large areas of Kidlington, to the detriment of neighbourhood cohesion and attractiveness, and most certainly to the availability of low-cost housing and the financial capacity of young people to save for their own property while meeting high rental costs. It is irresponsible of Oxford to intensify the need for affordable and social housing by continuing to create more low-paid jobs in the City, such as at the new Westgate shopping centre, that add to the already high demand from key workers in essential public services like the City's extensive health sector.

5667	<p>Comments</p> <p>The quantum of homes is based on the SHMA 2014 which is now out of date. Publication of a draft standardised methodology for assessing housing needs published in September 2017 indicates a figure 61% lower for Oxford and 50% lower for Cherwell. The Proposed Submission Plan could lead to an over supply of housing. With this question mark over the OAHN figure Green Belt release cannot be justified. Oxford's housing need is still to be fully and accurately defined through its local plan process. The Inspector's recommendations on the Local Plan envisaged a continuing joint approach whereas Cherwell has forged on alone and sought to defend the Growth Board apportionment. This figure was arrived at on the basis of a rudimentary process of examining sites in isolation through the LUC Spatial Assessment. There is little evidence of other work streams influencing the RAG rating of sites. The figure was not arrived at following SA or HRA work, or any consultation. The Council has not acknowledged the uncertainty associated with the apportionment figure.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>

5024	<p>Comments</p> <p>The significant need for affordable housing is the driver behind the scale of Oxford's OAN as identified in the SHMA. OCC support CDC in seeking to respond to Oxford's affordable needs whilst ensuring development remains viable. The LPPR seeks to meet the need for key worker housing as part of both the affordable and market housing mix. The City's definition of key worker housing currently focuses mainly on meeting the needs of those in professional roles. The needs of other key workers in lower paid roles essential to the functioning of the Oxfordshire economy (e.g. care workers and school support staff) should also be included.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>								
PR-C-0837	05/10/2017	Dr James	Jocelyn						N
5677	<p>Comments</p> <p>Oxford's current housing development plan calls for the construction of nearly 14,000 new homes - almost sufficient to meet the net need under CEG. Nowhere in the Plan can one find recognition of the fact, laid bare in great detail in the SHMA, that Oxford's so-called "housing crisis" and "unmet need" are almost entirely questions of affordability, not lack of housing per se. Quite the contrary, as from the above cited Para. 1.11 onwards, the Plan repeatedly refers to the figure of 28,000 as connected to objective needs driven by economic growth and the markets. For example. Paragraph 3.16 contends: "Having regard to the economic growth of the county, the total housing need for the county identified by the SHMA was about 100,000 homes...including...approximately 28,000 for Oxford." This is an egregious misrepresentation. Additional pressure would also be placed on the transport network in the area through this unsustainable demographic expansion, increasing congestion and pollution and undermining the Cherwell Local Plan's compliance with the NPPF's sustainability requirements. Detailed comments provided on the SHMA.</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>The Plan can only be made Sound by addressing the issue of sustainability - and that means addressing the issue of housing affordability in a wider context than that of new construction. This approach would deliver thousands of unnecessary market homes to Cherwell - a result that flatly contradicts the guiding principle of sustainability in National Planning Policy. The Plan can only be made Sound by recognising the whole range of data in the Evidence Base and basing action upon a reasonable interpretation of that data, rather than cherry picking and misrepresenting data in the tendentious fashion of the Plan as currently presented. It must be noted that certain documents in the Evidence Base, notably the Sustainability Appraisal, are compromised by the fact they explicitly proceed from such tendentious misrepresentations.</p>								
PR-C-0837	05/10/2017	Dr James	Jocelyn						N
5676	<p>Comments</p> <p>Analysis of the data actually presented in the SHMA reveals a quite different picture. Referring to Tables 54 and 55 in the final SHMA report we find the conclusions regarding the level of need for affordable housing in Oxford - a very considerable number in excess of 20,000 over the plan period. This number is NOT to be considered as a net need for newly built housing; it is a net need for affordable housing, which is not the same thing as a net need for new construction. Changes in the market and/or in housing policy could equally provide an increase in availability of affordable housing. To provide this many affordable homes for Oxford purely through new building, even under Oxford and now Cherwell's optimistic requirement that 50% of new projects should be "affordable", would require the construction of more than 40,000 new homes. Cherwell's plan to build an additional 4,400 homes will provide at most 2,200 affordable homes that may be relevant to supporting Oxford's unmet need for affordable housing. The market housing built in Cherwell is unlikely to be supported by economic and demographic growth in Oxford, as the SHMA's economic and demographic projections make clear. Detailed comments provided on the SHMA.</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>The Plan can only be made Sound by addressing the issue of sustainability - and that means addressing the issue of housing affordability in a wider context than that of new construction. Oxford City Council insists that developers include "affordable" housing in their plans then fail to implement that policy. Two recent examples of this have been the Templars Square development and the Barton Park Development. Furthermore they do not refuse planning permission when family houses become houses of multi occupation and buy to let properties. Recently a study has concluded that Oxford's demands have been overstated and yet our District Council will not stand up to Oxford.

Question the volume of unmet need accepted by the Oxfordshire Growth Board on the grounds that factors emerging since the publication of the Partial Review have a material effect on the predictions and thus invalidate the Plan. Implications of Brexit to be considered. Government's consultation document on housing need suggest a lower level of housing need. Oxford City Council could do more by identifying more housing, similar to what was suggested in the Cundall Report 'Unlocking Oxford's Development Potential. It is worth noting that local authorities do not have an obligation to meet housing need when it arises. Taking account of all the above, we consider Oxford City's unmet housing need to be grossly overstated and unjustifiable in the present climate and the steps proposed to accommodate unmet need are excessive and damaging, but most of all unnecessary.

Housing density is also something that could be manipulated although this has implications either way. Higher densities will produce a higher number of dwellings on a given space, whereas lower densities would be more in keeping with existing space in smaller villages. It's clear from the very low housing density numbers being applied to areas such as PR8 and PR9 that these houses are being ear-marked as high value investments. Whilst increasing housing density in these areas would be out of keeping with the existing built environment, it's not unusual for developers to increase density anyway once a project is underway. This maximises profit for them whilst increasing potential problems on local infrastructure. Let's not forget that the housing numbers being discussed here are not set in stone. There's a very good chance that we will see many more dwellings eventually being built than are being claimed now."

To have an opportunity to make a personal representation at the appropriate time and when further information is available about the scale of response to these plans. There will likely be many changes in circumstances between the submission of representations and the consideration of the outcome. I would like to be able to add additional relevant information at that time if appropriate. Also as Green Party Parliamentary candidate for many parts of the area under consideration I feel I should be able to give voice to the views of the Green Party supporters and voters when the time comes								

Proposed Submission Plan - Section 5 (Housing)

PR-C-1385	10/10/2017	Ian	Middleton	The North Oxfordshire Green Party	N	N	N	Y
5318	<p>Comments</p> <p>Discussions around the over-used term 'affordable housing' is something that should be considered as part of these proposals. Given that a great deal of justification and validity being claimed for these plans is based on the idea of providing housing for key workers it's worth noting that the current assessment of affordability, as defined by the NPPF, is a house price representing 80% of market value. Also given that in Oxfordshire the average house costs 11 times the average salary, this equates to a definition of affordability set at roughly 9 times the salary of any new home buyer. It's extremely unlikely that key workers or those at the lower end of the salary scale will find a mortgage provider prepared to lend on that basis. Reference is made to the house prices & provision of affordable housing at the Barton Park Development. North Oxfordshire is already an area of high value housing. Is it really credible that developers are going to provide lower cost units without a fight? In the last major housing development in the area, building had to be forced kicking and screaming to provide any so-called affordable houses. Even then the provision was less than 10% of the total development and the 'affordable' houses were hived off into a fenced off section away from the other dwellings being sold even 15 years ago for close to half a million pounds. We should not be conned into giving away our green heritage to these sorts of projects to enrich developers at the price of a rural landscape that we can all enjoy now for free."</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>To have an opportunity to make a personal representation at the appropriate time and when further information is available about the scale of response to these plans. There will likely be many changes in circumstances between the submission of representations and the consideration of the outcome. I would like to be able to add additional relevant information at that time if appropriate. PR-C-1398	10/10/2017	Ben	Simpson	WYG on behalf of Bonnar Allan Ltd	Y	Y	N	N
5338	<p>Comments</p> <p>The representations are submitted on behalf of my client Bonnar Allan with regard to their proposals at New Alchester. The land is identified in the Vision document attached to these representations and will include up to 7,200 new market & affordable homes, primary & secondary schools, creation of a 240 acre country park & watersports centre & the potential to incorporate a new Park & Ride site with connection to the railway line south of Bicester by a new railway station. Our comments on the PSP are confined to issues of soundness. A summary of the alternative Options A to I that CDC considered at the last stage of the Plan is set out at paragraph 2.12. For the reasons we set out in our representations to that stage, we consider that the CDC's proposed approach of allocating land to the north of Oxford & within the Green Belt (GB) around Kidlington as set out in Table 4 is flawed, & that the Partial Review does not pass the test of soundness. The PSP is not Justified as in our view it does not represent the most appropriate strategy for meeting Oxford's un-met housing needs. The logic that appears to underlie the PSP is in essence that the closer the proximity of the required housing to the City, the more sustainable it will be. This logic ignores the fact that there would be better prospects of residents travelling into Oxford as well as the major employment locations in the Science Vale by public transport including by rail from New Alchester. The preferred locations around Kidlington will increase congestion on the highway network & will result in the loss of GB & lead to coalescence between Kidlington, Begbroke & Yarnton, whereas the proposals at New Alchester are located beyond the GB. As we make clear in the Vision document, our proposals can be delivered in a phased manner & there are no impediments to early delivery. The scale of the proposals at New Alchester allows it to meet both the identified needs of Oxford City as well as an element of the future needs of Cherwell District, & in so doing, we recognise the journey that this proposal involves.</p> <p>Changes Sought</p> <p>We consider that the PSP should direct a majority of the un-met need to New Alchester which constitutes a more sustainable & justified location for the new homes needed both to meet the City's un-met needs as well as future need within Cherwell District. The PSP should be re-drawn to allocate land at New Alchester in place of the proposed allocations in the Green Belt (GB) around Kidlington. New Alchester can provide a highly sustainable location for the much needed development, at a location outside the GB & on the railway line into Oxford. The development would facilitate creation of a new railway station at New Alchester which would encourage people to travel to Oxford City & also other employment centres within the Science Vale by public transport.</p> <p>Reasons for Participation</p>							
PR-C-1404	09/10/2017	Andrew	Hornsby-Smith		N	N	N	Y
5365	<p>Comments</p> <p>Fully accepts the 50% affordable housing requirement, and hope that it can be effectively enforced. On 14 August the Secretary of State announced a consultation on a revised means of calculating the SHMA, Planning for the right homes in the right places. The net effect is to reduce the assessment level of annual housing need. A detailed explanation of the proposed formula for assessing housing need is provided.</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>Has spoken as a platform speaker at three public meetings in Kidlington and Gosford. Made a substantial representation at the Issues and Options stage. As a former parish councillor, has represented Kidlington Parish Council at the North Oxford Area Action Plan examination in public, and likewise was invited to the Examination in Public of the Local Plan. Has an MSc in Transport Planning, so part of representation covers that area. Also offers a distinctive perspective as a local resident, who agrees with the principle of a Green Belt review, but does not support the current planned site allocation. Has no interest in promoting a particular site, but only have some sympathy with those who would wish to preserve the Green Belt intact. Believe views represent many in Kidlington who recognise the need for local housing, but see these plans as strategically unacceptable. Representation contains primary research evidence which could be presented.</p>							
PR-C-1436	10/10/2017	Patsy	Dell	Oxford City Council				
4577	<p>Comments</p> <p>Affordable Housing It is welcomed that the Partial Review sets a target for 50% of development to be affordable, & that within the 50%, that priority is given to tenures which help those most in need (Policy PR2). The policy proposes the priority should be affordable rent or social rent. Please note that of those tenures, the City Council's priority for addressing the needs of those on the housing register would be for social rent homes. Welcomes the ongoing dialogue with CDC planning & housing colleagues, to discuss delivery of affordable housing at the sites allocated through the Partial Review, & particularly the allocations policy for rented affordable housing. It is envisaged that these discussions will culminate in an agreed strategy or process for allocating nomination rights to the City Council for those on its housing register. It is supported that 'key worker' housing may be delivered as part of the remaining 20% intermediate affordable housing. Oxford CC is proposing to take a new approach to this issue & not using the term key worker in its emerging policy approaches in the Oxford Local Plan; the Preferred Options proposes an approach aligned more with income & affordability rather than specific employers or sectors.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							

Proposed Submission Plan - Section 5 (Housing)

5281	Comments				
"We do not believe there will be affordable homes built. These will be for commuters to other towns and cities such as London. The new Oxford Parkway station and linked bus routes give a prime opportunity to cater for these groups. • Recent houses for sale on Barton Park are a three bedroom home will cost at least £595,000. • £300,000 price tag for a one-bedroom flat at Barton Park which soars above city average • A two bedroom flat will cost at least £350,000"

Objection regarding the Green Belt in particular • Its purpose aims at preventing urban sprawl • If Green Belt boundaries are re-defined, the way to define those using physical features would need to be readily recognisable and permanent. Right now this is not the case on the area to the east of the A4165 (Oxford Road) because there are no such features and therefore no eastern boundary. There is a high risk to lead to unrestricted sprawl of large built up areas – which is contrary to the Green Belt purpose. In relation to the Golf Club proposal • The proposal is to relocate on a fairly flat and largely arable land which does not fit a golf course need • The current owners of the Frieze Farm manifested their approval to have the club relocated there • In addition it is not clear how this relocation will be funded Housing needs • The proposal is focusing on being close to the Parkway Station: I strongly doubt this will fulfil the need to have affordable housing. • The developers are likely to have to pay a premium on this land because of its location • It is clear that these new houses are likely to be purchased by London commuters due to the proximity of the station. Traffic • We already have severe congestion in this area. What are the plans to improve the local road network? • Pollution wise, All of Oxford is an Air Quality Management Area because of the high levels of nitrogen dioxide. Cutteslowe Roundabout is a pollution hotspot where Nitrogen Dioxide levels regularly breach international guidelines. • The proposal will result in more traffic in an already congested zone and I have not seen any strategy to deal with the future situation. Cutteslowe Park. • There is at the moment no guarantee of the additional park land and that the arable land will stay as such in permanence either. • The Area is to be built on the Green Belt Land which first aims at preventing urban sprawl and neighbouring towns merging into one another. It also supports in preserving the setting and special character of Oxford.

Housing location/densities 1. There is indeed a need for housing that local (Kidlington and Oxford) people can afford to buy or rent, as opposed to 'affordable housing' which most could not afford to buy or rent, but the intention to build at low density in the most desirable locations, e.g. close to Oxford Parkway, does not resonate with that need. It is not an effective way of solving a housing shortage. 2. If housing density were increased in some sites it would be possible to spare others. 3. Social housing would, no doubt, be acceptable at a higher density so could then both justify the use of some green belt while using less of it. 4. Oxford has free land now but it is set aside for business use. This could be used for housing, thus in part solving its housing problem rather than exacerbating it.

Objections to the proposed submission plan to build 4,400 houses in Kidlington using the identified parcels of land outlined in the Partial Review. The plan 'aims' to provide 50% social housing within the 4,400 houses built. However, from speaking with people involved with the plans there is no guarantee around this. Know from numerous other examples (the Barton development for one) that the social housing target is almost never met, and that there is no minimum target for social housing. Also know that the largest proposed development is adjacent to Oxford Parkway station and the other parcels are within easy reach of this direct connection to London. The new properties will clearly be attractive to commuters and buy to let landlords, who will have money to spend, and have confirmed there is nothing to stop the new properties being purchased by these groups. All this will serve to do is increase the price of the new housing stock, pricing out local residents and Oxford's key workers and failing to deliver the key objective of meeting Oxford's unmet housing need. Have yet to speak to someone involved with the plans who can give me an answer to this, and as Oxford's unmet housing need is the only reason the plans exist, if there's a risk that the plans will fail to deliver the objective, they should never go ahead. How can this be justified as an 'exceptional circumstance' if you have no confidence that it will actually work?

5571	Comments				
Confident that any affordable housing targets would not be met as they almost never are (as demonstrated by the new Barton Park development near Headington). As Kidlington is now only an hour from London by train, developers are going to want to ensure most of the new homes are suitable for wealthy commuters to maximise profits. Doubt much of the housing built would be truly affordable for existing locals. It is clear that the main motivation for the proposed development is the opportunity for lots of people to make lots of money. The plans refer to the historic and popular North Oxford Golf Course in several places but then say that the club will be destroyed and the land made available for housing. Where is the sense in closing a popular and historic course just to possibly build another close by?

Proposed Submission Plan - Section 5 (Transport)

PR-C-0019	24/07/2017	Daniel	Scharf		
23	Comments				
References to the Oxford to Cambridge corridor are contradictory. The Plan supports the existing rail link (between Bicester & Oxford) & onwards (to Milton Keynes, Bedford & Cambridge) but also supports the Expressway that would be in direct competition, probably preventing the completion of the rail link or making it extremely costly in subsidy. This is contrary to the sustainable transport policies. Why are there no further investigations into the Expressway? Another reason for opposing the Expressway is the effect it would have on the A34, A44 & other link roads at both ends of the "corridor". On the contrary, East/West rail would enhance connections to Cambridge, Norwich & Felixstowe to the east & Swindon (inc. Research Council offices), Bristol, Bath, Cardiff, Swansea & Exeter to the West. Even without the Expressway, the Plan refers to & relies on the suggestion that conditions on the A34 will improve. The proposed development will increase A34 use & congestion, which is an international (i.e. Route Euro05 from Algeciras to Greenock), national (Southampton to Preston) & local (knowledge spine). Why is this trunk road junction a suitable place for further development? It is Government policy that GB development should not be supported until reasonable alternatives have been properly explored & rejected. Meeting the needs of Oxford City by concentrating development on its outskirts is a road centred policy that will add to congestion & increase emissions (CO2, NOX & particulates). Also the propensity of residents of this housing will be commuting from Oxford Parkway to other employment centres & not meeting Oxford's need. No concern shown about air quality & the impact on residents being next to a heavily trafficked trunk road with a high proportion of freight. There are no adequate policies to assist in the necessary transition to the use of ULEVs. Parking at workplaces, local centres (& the City centre) should privilege ULEVs. Parking spaces in residential areas should be limited to ULEVs & visitors.					
Changes Sought			Reasons for Participation		
If development was concentrated along the two railway lines (e.g. Shipton Quarry), commuters could access the centre of Oxford & towns/cities further afield without using the car. It should be made clear that all new developments must provide a number of ULEVs and

2042	<p>Comments</p> <p>The Proposal is irresponsible as it will have a major negative impact on transport with extra pressure being placed on already congested roads. The plans for new transport infrastructure deal with the existing needs and do not model the impact of the additional 4,400 houses. These irresponsible plans will also cost millions of pounds and are currently unfunded. The Rapid Transit system (remember these are long buses, NOT TRAMS) will not pass through either Begbroke or Yarnton but will instead go from the new proposed Park & Ride site at Bladon roundabout to Kidlington along Langford Lane. Traffic that normally passes through Kidlington will be encouraged to use the A44. This means our villages will not be served by the Rapid Transit system and will suffer increased traffic, and that is before considering the new houses. This is very irresponsible! The CDC has not consider how an additional 4,400 houses in the area will affect the daily routine of the residents, particularly those that commute to and from work everyday. Therefore the CDC's Proposal is very irresponsible as it does not consider the commuting needs of the people who go to work and it will affect people going by car or cycling to work too. The transport plans indicate that Sandy Lane will be closed to through traffic at the level crossing. Sandy Lane, by the admission of Oxfordshire County Council and Cherwell District Council, is a well-used road. We also know that it provides a valuable link between our two villages and Kidlington. There is no public transport option planned to link these villages together with the only option being to travel further by car (which is already being discouraged) or walking or cycling. The traffic increase resulting from the CDC's Plans may well produce casualties including those cycling to work. Therefore the proposal is very irresponsible.</p>							
Changes Sought				Reasons for Participation				
For the reasons given AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which are additionally supported, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.				Would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.				
PR-C-0260	10/10/2017	Rhian	Pye		N	N	N	Y
5560	<p>Comments</p> <p>The roads in the vicinity of policy sites PR8 and PR9 are already congested at busy times of day and the addition of another 2480 homes in this area, plus the additional 410 homes just north of this area in Woodstock, will make travelling to work significantly slower and more arduous. It is not uncommon to see traffic queuing to get into Oxford all the way up the A44 from Loop Farm roundabout to Sandy Lane roundabout during morning rush hour. Any plans for transport infrastructure improvements are based on the current situation and do not model the effect of the additional houses being proposed, so are likely to be completely swamped once the residents of the new houses join the daily commute in this area. The proposed sites PR8 and PR9 will not be able to access the proposed new Rapid Transit System as this will not run through this area but instead service Kidlington. Therefore, it is unlikely that significant numbers of people dwelling in these new houses will be able to use public transport to get to their employment areas which therefore makes this an unsustainable development plan. The Proposed Submission Plan states that Sandy Lane will be closed to vehicles in order to form a cycle/pedestrian link to Kidlington. This is completely unacceptable and should not occur under any circumstance. The proposal to provide a safe route along Sandy Lane for pedestrians and cyclists is very sensible and would be well received by local residents, however, this should not be at the expense of access along this road by vehicles. Sandy Lane is a well-used road which provides a crucial link between the villages of Yarnton and Begbroke, and the amenities in Kidlington. Traffic flow along here is consistent and steady meaning that many vehicles use this route each day but that this does not cause congestion or hold-ups. CDC have described this road as a 'pinch point' but having driven along this road several times most days for the last few years, I can confirm that this is not true. CDC recently ran a series of staffed exhibitions and when I visited the Begbroke exhibition on 2nd August 2017 I discussed this point with one of their representatives. The arguments put forward for closing Sandy Lane were effectively only relevant to the future small section of the enlarged Yarnton community who would live in the proposed new development and were capable of walking or cycling several kilometres in each direction. In effect, the CDC representative indicated that CDC had given no consideration at all to the requirements of the current residents of Begbroke and Yarnton and how the closure of Sandy Lane would undeniably adversely affect their daily lives. Residents would now need to travel far further by going north along Langford Lane or south via Frieze Way to access the shops, local schools, health facilities, and recreational facilities within Kidlington. This would result in longer journey times and greater traffic congestion - hardly the goals of a sustainable development plan. It is worth noting also that there are currently no public transport options linking Begbroke and Yarnton, with Kidlington. On a personal level, I use this route twice daily to take my children to school at the nearest local Catholic primary school situated in Kidlington. From here, most days I then continue my journey to work or other locations. I could not possibly do this by walking or cycling due to the distances involved. Closure of Sandy Lane will mean I will have to make a journey to take my children to school each morning which will be nearly three times as long both in terms of distance and time. In doing so, I will be adding to the general congestion of traffic within Kidlington village centre or I will be forced to use side streets as rat-runs in order to get my children to school on time. Again, this can not be viewed as being a sustainable option and therefore makes this part of the Proposed Submission Plan unsound.</p>							
Changes Sought				Reasons for Participation				
For the reasons I have given above AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which I additionally support and adopt as part of my own Representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.				I would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.				
PR-C-0406	29/08/2017	Sara	Sheppard					
1053	<p>Comments</p> <p>The Banbury road during the morning rush hour is currently a hazard due to the amount of buses, cars, cyclists and pedestrians using the road. The danger will only increase if the proposal goes ahead as there will be more people using Banbury Road.</p>							
Changes Sought				Reasons for Participation				
PR-C-0515	06/10/2017	Jeffrey	Wright	Begbroke Parish Council			N	Y
1264	<p>Comments</p> <p>Begbroke Lane Identified in Appendix 6 page 191 as a: STRATEGIC CYCLING ROUTE - This lane is a recreational area enjoyed by many people (Picture of the lane provided) – Walking, taking dogs out or simply to have a stroll and a sit on one of the four seats installed by Begbroke parish council.- Whilst many people also cycle to and from Kidlington – this lane certainly does not meet the thematic distinction of strategic and too much cycling would spoil the existing balance between pedestrians and cyclists. Buses: Stagecoach said:- ...It has taken us longer to design these timetables than we had hoped, and we have tried to take account of our customers' aspirations, deal with the worsening traffic congestion in to and out of Oxford at busy times, to put together a robust timetable with buses turning up on time. It has become clear that outside the busy peak periods there are rather too many buses between Woodstock and Oxford.- We have therefore reduced the number of buses from five to four an hour – two S3 buses and two route 7 buses..Not very positive given overall strategy on public transport. The Stagecoach company did not consult the Begbroke Parish Council when asked about the 7A service not coming through Begbroke(neither does the 500 or 7) as this is after all a commercial route. We did not consult Begbroke, we opened this up publicly. Bodes well for the future. - Bus lane along the A44 Begbroke to Loop Farm. This 'proposal' is physically and financially impossible owing to the restrictive widths of railway and canal bridge crossings plus the underpasses at Peartree Interchange. Further restricted by Project 11a (Page 167) being 'cycle and pedestrian improvements along A44 between Bladon Roundabout and Peartree Roundabout', the so called 'Rapid Transit' route along the A44 (only capable of funding if Government grants are forthcoming) This cannot be used to justify large scale housing development adjacent to the A44 at Yarnton and Begbroke. The infrastructure proposals are not justified, nor effective and the Plan is UNSOUND.</p>							
Changes Sought				Reasons for Participation				
				Please review our PowerPoint presentation for the comments of Begbroke parish council. This is necessary as we believe Cherwell Executive will ignore any representations as they have already made their mind up. We believe that The Planning Inspectorate will take more notice of what we have to say.				

Proposed Submission Plan - Section 5 (Transport)

PR-C-0580	03/10/2017	Lorna	Bennett					
1466	<p>Comments</p> <p>The road structure in this area is already at full capacity and some. If you were to develop this land and add a further 4,400 or whatever new homes there is a good chance these houses will have at least 2 cars +. This would then swamp the roads that are already congested. The Council cannot even maintain what is already here, under your own admission, as the state of the roads are evident. The road are currently not really fit for purpose as it is and to add a potential 8,000 more cars is ludicrous. As for local transport, this is also not going to be fit for purpose and from what I can see no bus lane will be able to be implemented as there are too many bottle neck areas to negotiate. Therefore a park and ride would also not be feasible. The idea of shutting Sandy Lane is also extremely preposterous. The road carries a lot of local traffic from both Begbroke and Yarnton to Kidlington and vice versa. If that was to shut all traffic would then either have to go Loop Farm roundabout and Frieze Way or Langford Lane. Both of which, I think you will agree, is also not really an option as, again, these are already congested. Believes a survey was done down Sandy Lane which showed how much that road was used and also believe you do in fact have these figures. I cannot see how this would work in any event as there are actually houses along that road right up to the level crossing.</p>

PR-C-0747	06/10/2017	Dr Elizabeth	Fry		N	N	N	Y
1884	<p>Comments</p> <p>As residents of Yarnton with a grown family living at home four cars are used. There is no SAFE way to cycle to work and the public transport either does not travel close enough to the place of work or would require substantially more time than is feasible but the cars are needed at work for operational purposes. Like many households cars will run and this won't change however much public transport is improved. The current infrastructure DOES NOT support the current traffic requirements encouraging the use of 'rat runs' through all the villages. The traffic reaches a standstill on the A34, the ring road, the Woodstock and Banbury roads into the City Centre, this backs up to the Pear Tree roundabout and most of the way to Woodstock on the A44 and to Eynsham on the A40. The traffic from Bicester impacts greatly on the roads in the area. It would be unthinkable to increase the housing level in this area without improving the road network. Many hours of work have been lost due to the current road situation and it is a huge worry. There is no money allocated for new infrastructure.</p>							
	Changes Sought			Reasons for Participation				
	For the reasons given and the representations made by the Begbroke & Yarnton Green Belt Campaign which are additionally supported and adopt as part of this representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.			Begbroke & Yarnton Green Belt Campaign to represent at the Examination should it take place.

1904	<p>Comments</p> <p>No mention is made of measures to encourage people to refrain from owning cars, such as promoting and providing space for car-sharing clubs. Strongly suggest this be added here and in each of the policies for specific areas.</p>							
	Changes Sought			Reasons for Participation				
PR-C-0761	09/10/2017	David	Brown				N	Y
1918	<p>Comments</p> <p>The houses proposed for Begbroke and Yarnton on either side of the A44 will produce more traffic onto a road that is already at its limit. The land labelled PR8 on the east of the A44 is proposed to accommodate 1950 houses and the land labelled PR9 on the west side of the A44 is proposed to accommodate 530 houses, a total of 2480 houses. All the traffic to and from these houses will come off the A44; with the closure of Sandy Lane there would be no other road. These houses would generate a traffic of over 1000 vehicles per hour at peak hours and this would swamp the A44 which is already at its limits. Traffic survey undertaken and results from the survey provided.</p>							
	Changes Sought			Reasons for Participation				
				For these varied reasons, the proposals put forward in the plan with regard to the traffic are simply Unsound and Not Effective. Like the Begbroke and Yarnton Green Belt Campaign to act as representative during the Examination by the Planning Inspector.

Sandy Lane, by the admission of Oxfordshire County Council and Cherwell District Council, is a well-used road. We also know that it provides a valuable link between our two villages and Kidlington. There is no public transport option planned to link these villages together with the only option being to travel further by car (which is already being discouraged) or walking or cycling. The traffic increase resulting from the CDC's Plans may well produce casualties including those cycling to work. Therefore the proposal is very irresponsible.</p>							
	Changes Sought			Reasons for Participation				
	For the reasons given AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which are additionally supported, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.			Would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.

Proposed Submission Plan - Section 5 (Transport)

PR-C-0817	10/10/2017	G	Davies				
5664	Comments						
<p>Transport & Commuting - two fundamental transport issues that Oxford(shire) has failed to address; the A34/Oxford Ring Road requiring a bypass north of Abingdon to the M40, either to the North East or North West of Oxford, and the Ring road pinch point at Sunderland Avenue; requiring a short bypass. Work recently completed at roundabouts at either end of Sunderland Avenue to improve traffic flow for the planned Northern Gateway project has been an abject failure. Approval of this project should be relocated to a more appropriate location which can support the housing needs for the project. Locating housing close to jobs where people can more easily walk/cycle to work or use high quality public transport. The County Council estimates there could be a 25% increase in journeys within the city boundary by 2031. Without improvements to transport network and changes of travel behaviour, this could result in approximately 13,000 more commuter car trips each day causing major congestion and pollution. The Park & Ride schemes need to be relocated outside the city boundary. Congestion, Pollution, Noise, Air Quality, Building Decay and Health - There are two major aspects to pollution. The first is health. The second, significant to Oxford is the corrosive affect it has on collage buildings which are constructed from soft sandstone/limestone. Oxford does not have any heavy industry so primary cause of pollution is from motor vehicles. It is vital that Oxford does not encourage more people to commute into Oxford for employment. It is currently urgent that Oxford discourages the current levels of traffic flowing into and out of the City. Oxford needs to consider both congestion and pollution schemes, reducing the number of public car parks and build on them, charging employers who provide car parking for employees, charging home owners with cars living in the city boundary, free at the point of use Park & Ride schemes (parking & bus travel). Reducing the levels of congestion, pollution and noise will significantly improve the health of people living in Oxford. It will also have benefit in reducing the level of decay of buildings and necessary expensive restoration work.</p>

PR-C-0832	10/10/2017	David	Flavin	Oxfordshire County Council			
5032	Comments						
<p>The proposals would improve on existing, and provide new, pedestrian and cycle infrastructure between existing and new sites, including to Northern Gateway, Water Eaton / Oxford Parkway and North Oxford; and ensure that the developments and infrastructure complement the LPT and corridor studies. Would however highlight that the Primary Rapid Transport services along the A44 should not all be required to divert into sites (although secondary services could do so).</p>							
	Changes Sought			Reasons for Participation			
<p>The Oxford Transport Strategy encourages low-car developments where appropriate (as is proposed at Northern Gateway) in order to restrict car use and encourage sustainable transport use. Given the improved connections between the sites and to / from Oxford that would be delivered, this should be included in the site policies / AAPs and ensured through design and the implementation of parking controls.</p>

<p>Proposed changes suggested.</p>							
	Changes Sought			Reasons for Participation			
<p>On page 79, para 5.49, mention is made of “the fullest possible use of public transport, walking and cycling”. There is an opportunity here to mention that the AHTS outlines plans for Door to Door travel (i.e. walking and/or cycling in combination with public transport). There are a couple of references to this in the text, but it would be good to explicitly mention the AHTS and how public transport use can incorporate an element of walking or cycling, especially in terms of access from development sites to core transport corridors such as the A44. * On page 80, para 5.54 reference is made to “how infrastructure is piecemeal, with junctions on to the A4260 and parking on southern service roads creating hazards”. Reference to the new Cycling Design Guide should be made here. * On page 81, para 5.59, Door to Door travel should be mentioned again. Something like “creating safe routes and cycle parking facilities at popular bus stops can encourage and enable an element of active and healthy travel in a Door to Door journey”.</p>							

PR-C-0832	10/10/2017	David	Flavin	Oxfordshire County Council			
5031	Comments						
<p>The plan generally aligns with Local Transport Plan 4 and the Oxford Transport Strategy (OTS), with the proposed allocation of sites within close proximity to Oxford and thus offering excellent opportunities for making use of existing transport infrastructure and for enhancing sustainable links into Oxford. Whilst the proposed sites score highly in terms of sustainability, it should be recognised that there are high levels of traffic congestion in southern Cherwell and north Oxford which need to be remedied. Work on identifying solutions to the highway capacity problems requires a collaborative approach across the local authorities and should therefore be considered through future planned strategic development that is likely to be progressed through the Growth Deal. The highway improvements within the highway boundary that are detailed in the Infrastructure Schedule are supported. There is concern from recent experience as to whether the policy requiring ‘a single, comprehensive outline scheme’ will be strong enough to ensure the allocations come forward as a single planning application. It is unclear why there is a requirement for vehicular access by emergency services – is this separate from other highways considerations and is it to do with concern over too many houses off of one access?</p>							
	Changes Sought			Reasons for Participation			
<p>The following should be considered within the site ‘Development Briefs’ that are required for each site: i) Walking distances –whether all developable areas of the proposed sites will be within the maximum 800m walking distance of a local centre and 400m of a bus stop once built out. ii) Bus infrastructure to serve the sites, including Real Time Information displays. Iii) Provision of car charging points and cycle parking.</p>							

PR-C-0841	10/10/2017	Catherine	Newman			N	N
5690	Comments						
<p>Closure of Sandy Lane should not be closed to traffic at the level crossing. Sandy Lane is a well-used road, I myself use it several times a week saving me several miles by not using the A44 via Langford Lane or Stratfield Brake. When the A44 is clogged up due to an incident at Pear Tree Roundabout or one on the A34 it is also an alternative route to reach Oxford and the hospitals. The queues into Oxford are very often horrendous especially at peak times and can reach back to Langford Lane.</p>

Proposed Submission Plan - Section 5 (Transport)

PR-C-0845	10/10/2017	Christine	Cook				N	Y
5693	<p>Comments</p> <p>Transport- the A44. How is anybody going to get around at the times they need to? Most days of the week, the traffic is backed up on the A44 going towards Oxford. Often this is to Sandy Lane and sometimes back further. Photographic evidence provided. If you close Sandy Lane to through traffic, the problem will be exacerbated as when people see the queue, they try going towards Kidlington. They have no choice but to use the A44. You clearly haven't considered the transport infrastructure very well at all.</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>Would like the Begbroke and Yarnton Green Belt Campaign to act as my representative during the Examination by the Planning Inspector.</p>							
PR-C-0850	10/10/2017	Colin	Homans				N	
5701	<p>Comments</p> <p>Transport routes are already very busy in the area. The A34, A40, A44 and A4260 roads are busy at all times and are reduced to stop start running during peak commuting times. Oxford Parkway is drawing extra traffic into the area as rail users avoid travelling into central Oxford. Increased road traffic will only increase levels of air pollution experienced by local people. What has happened to the plans for the new station for Kidlington at Flatford Place? A new station within Kidlington at Flatford Place would be beneficial in avoiding some local road journeys.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							
PR-C-0864	05/10/2017	Reverend Peter	Hewis					
2350	<p>Comments</p> <p>The planners fail to realise that Kidlington is the nearest shopping centre, place for major doctors' surgeries, the centre of entertainment and exhibitions (Exeter Hall) and the place of major shops and banks for Yarnton. I have done the return journey by car from our home and the closure of Sandy Lane will greatly increase the mileage between the two communities. The planned new railway station or halt seems to have very restricted access and no parking provision. Kidlington residents will have no access other than on foot or bicycle as no buses serve that area. To create a bus lane will involve widening the canal bridge and railway bridge at Yarnton yet the District Council recently gave planning permission for new housing very close to the canal bridge.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							
PR-C-0875	04/10/2017	Mrs Frances	Bishop				N	N
2372	<p>Comments</p> <p>The proposed policy depending on less use of cars, seems more hopeful than justified by evidence. The document does not seem to show any real ways that the very overcrowded and noisy road network could be made to cope with so much more traffic. Family life for most people requires car use and there will also be increased public transport, delivery vehicles, service vehicles and traffic related to use of schools, doctors, leisure facilities etc. Air quality is also an serious issue.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							
PR-C-0896	10/10/2017	N	Simpson					
2412	<p>Comments</p> <p>Traffic problems during rush hours. All the modifications to the Cutteslowe and Wolvercote roundabouts will be of little avail if get further traffic thrown onto them due to the proposed development. Already the A34 cannot cope with the volume of traffic passing through.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							
PR-C-1385	10/10/2017	Ian	Middleton	The North Oxfordshire Green Party			N	N
5322	<p>Comments</p> <p>The plans are being sold on the premise that they provide easy access into the city by simple virtue of their straight line proximity to the city centre. This is highly simplistic and initially ignores all the limiting factors imposed by the existing road network, peak traffic flows and local network geography. When these salient facts become evident the review seeks to divert attention away from them by broad references to aspirational projects such as a "Rapid Transport Scheme" or Green Infrastructure'. None of these concepts are defined in the review beyond these loose buzzwords. When questioned at one of the local presentations, planning officers obviously had no clue how many of these projects would work in practice. It's not enough to simply aspire to improved transport systems, there is a need for specifics about how they could be achieved, especially if additional burdens are going to be placed on already overstretched existing infrastructure by massive increases in population. Without a clear and workable plan, and most importantly, the funding to make it reality BEFORE additional houses are built, further development will simply serve to make an already intolerable set of circumstances much worse leading to a reduction in the quality of life for both existing and new residents alike. Proposals within the review surrounding transport infrastructure are some of the most audacious, fantastical and speculative within a document that is an exemplar of those qualities. There are several wild assumptions made about existing and additional traffic flow, private car use and availability of public transport. The terms 'sustainable' and 'green' feature heavily throughout these proposals, but as with so much else within this review, there is very little substance to the aspirations and no realistic assessments or explanations of how they could be delivered. Detailed arguments to support this view are given. Whilst I would support any moves towards sustainable transport initiatives, it's clear that these areas of north Oxfordshire are singularly unsuited to such projects in the short term and it would be very unlikely to seem such additional transport infrastructure implemented within the timeframe encompassed by this partial review. Transport Infrastructure It is arguable that many of these transport improvements are already desperately needed for the people already living in these areas, so perhaps if such projects come to fruition over the coming years there may be more scope to consider additional development. But it would seem unlikely that anything on the scale being proposed now would be viable without significant and major improvements over the next 10-20 years."</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>To have an opportunity to make a personal representation at the appropriate time and when further information is available about the scale of response to these plans. There will likely be many changes in circumstances between the submission of representations and the consideration of the outcome. I would like to be able to add additional relevant information at that time if appropriate. Also as Green Party Parliamentary candidate for many parts of the area under consideration I feel I should be able to give voice to the views of the Green Party supporters and voters when the time comes</p>							

Proposed Submission Plan - Section 5 (Transport)

PR-C-1388	10/10/2017	David	Abbott	Highways England				
4493	Comments							
<p>Highways England is responsible for the operation, maintenance and improvement of the SRN, which, in Cherwell consists of sections of M40, A34, and A43. As a key delivery partner for sustainable development promoted through the plan-led system, and as a statutory consultee we have a duty to cooperate with local authorities to support the preparation and implementation of development plan documents.</p> <p>While we are aware of the relationship between development planning and the transport network, and we are mindful of the effects that planning decisions may have on the operation of the SRN and its associated junctions it is understandably unrealistic to expect it to cater for unconstrained traffic growth generated by new developments. We therefore welcome policies and proposals which incorporate measures to reduce traffic generation at source both through good location and by facilitating and encouraging more sustainable travel behaviour.</p>								
Changes Sought				Reasons for Participation				

PR-C-1388	10/10/2017	David	Abbott	Highways England				
4491	Comments							
<p>Spatial Strategy</p> <p>We note that the PR seeks to locate the majority of development on land designated as Green Belt but that Cherwell District Council considers the circumstances to be exceptional and meet the conditions set out in NPPF Section 9 in allowing development on Green Belt land. We would highlight the risk that if Green Belt development is not permitted it may need to be allocated elsewhere, which could potentially have a far more onerous impact on the highway network than is predicted within the PR. The case in support of Green Belt development needs therefore to strongly emphasise this.</p> <p>Nevertheless, we consider that if 4,400 dwellings are delivered in the plan period (in addition to the developments already committed in the Cherwell Local Plan) then there could be a significant impact on the operation of the SRN and the importance of the accurate assessment of this impact needs to be emphasised.</p> <p>We acknowledge that development locations have broadly been allocated along the A44/A4260 Corridor between North Oxford and Woodstock, with some locations on the edges of the Oxford and Kidlington urban areas and some in more rural areas. It should be noted that the development sites away from urban centres may not benefit from some of the existing urban sustainable transport options available. It is therefore important that sufficient sustainable transport solutions are provided to/from the development in these areas to ensure the impact of additional traffic on the network is minimised where possible.</p> <p>We welcome the location of development in relatively close proximity to Oxford along key radial routes. There is the potential for frequent, high quality sustainable transport connections from the additional development sites to the Oxford urban area. Should these not be in place then we consider that the traffic impact upon A34/A44 Peartree Interchange arising from the additional development is likely to be intolerable. We note that the PR does not appear to propose any highway infrastructure improvements to support the development proposal, only public transport infrastructure. However, the residual impacts are yet to be fully understood, as are any mitigation measures that may be a consequence of them.</p> <p>In addition to the A34/A44 Peartree Interchange, we consider that there could be an impact on the operation of other sections of the strategic road network, including other links and junctions on the A34 and M40 Junction 9. It is unclear yet from the PR what these impacts could be. Whilst we support the intention of Cherwell District Council to seek developer funding for the infrastructure schemes listed in the PR, it should be clarified whether the developer funding is intended to fully cover these schemes or whether further additional funding would be required. An approach would be welcomed where planning permission for the proposed developments would be conditional on including proportional funding for the infrastructure set out by the PR.</p> <p>We note that 1,180 dwellings have been put forward as extensions to the northern edge of the Oxford urban area. Extensions to the urban area could be considered suitable locations for development provided good accessibility to existing services and facilities exists and necessary supporting infrastructure (including public transport services) can be provided. Although we welcome the proximity to existing and planned sustainable transport infrastructure, we consider that the extensions proposed could affect the A34/A44 Peartree Interchange, the A34/Oxford Road junction and potentially M40 Junction 9.</p> <p>We note that the remaining 3,220 dwellings have been allocated to sites adjacent to Kidlington, Begbroke, Yarnton and Woodstock. Whilst some of these sites are located further away from the Strategic Road Network, it is likely car trips from these sites to Oxford will route via the A34/A44 Peartree Interchange and that a number of longer distance trips could also route via A34/A44 Peartree Interchange as well as the A34/Oxford Road junction.</p> <p>We consider that whilst some of the sites may have less of an impact on the strategic road network due to their size and/or proximity, the cumulative impact could be significant and it is recommended that an assessment of this impact is undertaken.</p> <p>We welcome the intention to prepare Transport Assessments and Travel Plans to support all development identified to meet Oxford's unmet housing need. Transport Assessments should endeavour to establish the potential impact of a development on the SRN and what measures may be required to mitigate these impacts. The PR indicates that developers will be required to make a contribution to infrastructure measures identified within the adopted Local Plan and Oxford Transport Study. Transport Assessments could therefore also be used as a basis to establish the quantum of each contribution, each development should make, together with type and form of the mitigation measures required.</p>								
Changes Sought				Reasons for Participation				

PR-C-1389	10/10/2017	Nick	Small	Stagecoach in Oxfordshire				Y
4495	Comments							
<p>Stagecoach is very encouraged by the manner in which this Plan Review has been progressed by Cherwell District Council, supported by key partners and stakeholders, and OCC in particular. It is positively prepared in that it seeks to meet in full, the development needs that have been judged to require accommodation within the District arising from the Oxfordshire Growth Board's apportionment. The Plan is properly justified, backed by a comprehensive suite of relevant and proportionate evidence as required by NPPF paragraph 182. There is a proportionate and relevant transport evidence base that underpins the Plan, and this evidence base has been available suitably early in the Plan-making process. The OTS and the dLPPR are both now each supported further by work to establish in more detail the feasibility and design options for key measures set out within it. Therefore, the Plan is supported by a deliverable series of transport mitigations. Stagecoach wishes to publicly commend the Councils for the depth and breadth of partnership working in addressing not only the need to accommodate the City's development requirements beyond the City's boundary, but the transport and movement issues that arise from this. Preparing the STA and the Corridors Study has demanded intensive partnership working with a wide range of stakeholders within very ambitious timescales. Stagecoach recognises and also applauds, that the dLPPR progresses a development strategy that is focused on several key principles, which align excellently with the principles set out in the NPPF. The only area where Stagecoach has some small residual concern is that the Plan could make rather clearer that the A44-A4260 Corridor Study has shown that opportunity clearly exists for comprehensive bus priority on the A44 South of Bladon, of equivalent standard to that proposed on the A4260 BRT Corridor. We would urge that this is rather more clearly signalled within the STA, the Infrastructure Delivery Plan (IDP)/infrastructure Schedule, and the draft policies for Strategic Allocations proposed North East of Woodstock, North of Yarnton, and at Begbroke. The STA makes clear that south of Yarnton, the A44 is already subject to severe peak delays and that without substantial measures to address this, these conditions will substantially deteriorate. The significance of the A44 Bus Priority within the Plan, as part of its supporting transport mitigations strategy, is that much the more important when regard is had to the development strategy proposed in West Oxfordshire, which will directly impact on the A44 south of the Bladon Roundabout. The Corridor Study shows that the rail bridge on the A44 south of Yarnton evidently is a very significant constraint limiting the scope to cost-effectively add capacity for general traffic. Even if it could be, providing for general traffic would serve only to add pressure on key links and junctions at pear tree and Cutteslowe. However, north of Yarnton, the existing A44 carriageway has been largely ""hatched out"" as redundant. As a result, the Corridor Study shows that bus lanes could be delivered very cost-effectively making use of this currently unused highway pavement, with limited need to construct new carriageway with its attendant costs. South of the rail bridge, the Study is more agnostic, as it looked only at what could be achieved within the public highway. However, allocations are made alongside the A44 in the Plan, and it is vital that the Plan and supporting IDP references the potential for bus priority along the A44 to resume, through provision of a widened carriageway incorporating bus lanes, over a relatively short stretch on approach to the Loop Farm roundabout, and beyond to Pear Tree. The constriction at the bridge can in our view readily be addressed by bus gates. We are also aware that the Corridor Study suggests a new parallel bridge structure could be provided which would allow free-flowing continuous bus priority. We would greatly prefer and strongly recommend that this is taken forward if at all possible. We would therefore welcome further work being undertaken to establish the feasibility, costs, and benefits of the alternatives to the rail crossing. Finally, we note that the Infrastructure Schedule does not specifically reference the bus lanes on a stretch of A44 between Langford Lane and the Begbroke Science Park access road, which forms an important part of the A44 Bus Priority proposals set out in the Corridor Study, and is an essential element if the necessary seamless rapid transit pathway is to be provided.</p>

Comments

Detailed comments are provided in relation to transport including traffic generation, modes of transport, and the Park and Ride. The proposals in Submission draft policy PR3b to remove the Park & Ride and Oxford Parkway station from the Green Belt appear to endorse/facilitate the County Council's consideration of extending the Park & Ride site at Water Eaton. This is also endorsed in supporting paragraphs 3.63 and 5.46. However, plans to extend the Water Eaton Park & Ride contradict the County Council's own preferred strategy of locating new capacity away from edge of city locations. Section 2.3 of the Oxford Park & Ride Future Strategy Development – Final Report (PR 37) sets out that: 'Morning arrivals at the Peartree, Oxford Parkway, Redbridge and Seacourt P&R sites contribute, in particular, to traffic using the three A34 interchanges to the west of the city. Removing this demand through capturing those users further from the city would have an immediate positive impact on the Kidlington Oxford operation of the A34 and other roads it intersects as vehicles using the sites would no longer need to cross it. The OTS acknowledges that future housing and employment growth within Oxfordshire is set to further exacerbate congestion on the A34, the outer Ring Road and other corridors that feed into the city, unless traffic can be captured before it reaches them. The OTS concluded that the expansion of the current city-edge P&R sites to meet forecast levels of demand would add substantially to traffic levels on already congested routes, meaning those accessing the city via P&R would encounter significant traffic delays en-route to the P&R sites at peak times.'

Has spoken as a platform speaker at three public meetings in Kidlington and Gosford. Made a substantial representation at the Issues and Options stage. As a former parish councillor, has represented Kidlington Parish Council at the North Oxford Area Action Plan examination in public, and likewise was invited to the Examination in Public of the Local Plan. Has an MSc in Transport Planning, so part of representation covers that area. Also offers a distinctive perspective as a local resident, who agrees with the principle of a Green Belt review, but does not support the current planned site allocation. Has no interest in promoting a particular site, but only have some sympathy with those who would wish to preserve the Green Belt intact. Believe views represent many in Kidlington who recognise the need for local housing, but see these plans as strategically unacceptable. Representation contains primary research evidence which could be presented.

Langford lane. At peak times traffic queues in both directions to the traffic lights at each end. The queues are often from the airport boulevard. The new Technology Park will generate an enormous amount of addition traffic. Key commuter routes including Sunderland Avenue and Banbury Road are more congested than before the £10m roundabout scheme which caused 15 months of disruption but was designed to improve traffic flows and bolster the road network ahead of thousands of new homes planned by 2031. There will also be increased pollution from traffic and housing emissions. A ridiculous suggestion to close Sandy Lane between Begbroke, Yarnton and Kidlington parishes, which forces Kidlington traffic to go via the pinch point at Yarnton or a very busy Langford lane generating even more traffic in Begbroke. We have no controlled crossing and these proposals do not provide one either. It is very difficult at times to cross the A44. The 'proposal' for a bus lane along the A44 Begbroke to Loop Farm is physically and financially impossible owing to the restrictive widths of railway and canal bridge crossings near to the Turnpike and Cassington Lane. The underpasses at Peartree Interchange would create further unsolvable problems. There would be restrictions with Project 11a (Page 167) 'cycle and pedestrian improvements along A44 between Bladon Roundabout and Peartree Roundabout', the so called 'Rapid Transit' route along the A44 – reliant on Government grants. This cannot be used to justify large scale housing development adjacent to the A44 at Yarnton and Begbroke. The infrastructure proposals are not justified, nor effective and the Plan is unsound. Begbroke Science Park Road - 01/00662/OUT - It was not permission to justify huge developments.

"Stagecoach: "It has taken us longer to design these timetables than we had hoped, and we have tried to take account of our customers' aspirations, deal with the worsening traffic congestion in to and out of Oxford at busy times, to put together a robust timetable with buses turning up on time. It has become clear that outside the busy peak periods there are rather too many buses between Woodstock and Oxford. We have therefore reduced the number of buses from five to four an hour – two S3 buses and two routes 7 buses. Not very positive given overall strategy on public transport."

The proposed submission plan is unsound, despite the details drawing the concept is not fully thought through, not justified and not effective for the reasons given in my specific objections below. Do not believe that this proposal has been considered having regard for other proposals in the immediate area and how that will all impact in the area. It will swamp the local area. Aware of a very similar proposal for Eynsham which will create further traffic for the A40 and therefore also the A44. There is also a huge housing estate near Barton under construction. Oxford has many areas that could be developed, using brown field or green field sites. The impact on traffic on the A44 has been understated and will become unsustainable. In the morning the traffic regularly queues back from The Turnpike roundabout, using both lanes, to Begbroke, changing one of the lanes to a bus lane will extend the queue a further mile, even if it creates more bus passengers. Noted the extra traffic volume has been assessed as very small. If that is so, given its 4,000 houses planned, that must mean the existing volume of traffic is very high, and it should be recognised that any additional traffic in the rush hour will have a significant impact, which is when most of these vehicles will be on the road. The proposed train station would be a good idea but access is being limited by the traffic restrictions so it would not be used as much as has probably been assumed. There is a variety of travel problems and suggestions in the letter. The proposed development will ruin the nature of the village and it will just become an urban sprawl with no identity and will merge into Begbroke and Kidlington. The consultation refers to maintaining the character of the villages, this proposal will not, it will swamp Yarnton and Begbroke, who will probably be separated by a narrow footpath, and both will have just the canal between them and Kidlington. One of the beautiful aspects of living in Yarnton is the green belt and the surrounding countryside walks. Part of this will be destroyed by the proposed development and wildlife lost to the area. The proposed plan to build a new primary and secondary school are totally out of keeping with the character of the villages. The proposals brings little to be attractive to the existing residents, there is no gain for our side of the scales. The proposed density of the housing is also of great concern and totally out of keeping with the existing housing. Oxford could meet its own unmet housing needs by using land earmarked for business use or redevelop brown site land. Most residents who want to live in Oxford do not want to live outside the existing city boundary. This is apparently driven by Oxford housing unmet need. The plan put forward by Cherwell Council seems to be to build everything as near to Oxford as possible. The proposal is preparing Oxford to expand to encompass the local villages. In the 70's and 80's the plan then was, and largely still is, to expand Bicester, Didcot, Abingdon and Witney. That has just created traffic queues. What is needed is a solution that moves some of the employment out to these towns. Not unsupportive of appropriate developments and growth which benefit the local area. This proposal is not appropriate. Also, belatedly noticed that the councils as a group are bidding to increase Oxfordshire population by 40% over the next 20 odd years. Oxford is already an area of low unemployment and housing shortages, traffic issues regularly create issues on the A 34 and other local roads. It seems that the councils are pursuing one plan without having due regard to what the residents want. Whilst the population will increase, building more will draw in more new residents into the area. Oxford has an international brand but does any development need to concentrate everything in a narrow area. Modern innovations means that the skill and jobs could be targeted in areas where housing or redevelopment opportunities would not have a detrimental impact. That proposal would dwarf this one.

SA Submission Report Chapter 3 - Section 3.112 Transport. The Plan is unsound for the following reasons:A. The 4,000 plus homes will significantly worsen the traffic congestion at the Pear Tree roundabout, the Wolvercote roundabout and the Banbury Road roundabout. It is a fantasy to suggest otherwise. The A40 has already ceased to function effectively as part of a ring road and this extra traffic will cause massive delays.B. North Oxford is a poor generator of extra employment being very largely residential. Those employed from these 4,000 plus homes will for the most part have to travel round the ring road, adding significantly to other traffic congestion points. If instead they work further out from Oxford then their housing is in the wrong place, pointlessly damaging the green belt. There is no attempt in this Plan to identify where employment is growing or should grow and develop housing accordingly.C. The entire Plan is unsound because Oxford should have an accepted planned maximum population with either a new town or new villages outside Oxford created to manage the growth in population.

Changes Sought

To make the Local Plan sound it is necessary to abandon the building of 4,000 plus homes on the green belt as set out and to plan for extra housing either east of Oxford beyond the green belt and nearer to employment possibilities or in a completely new village outside of Oxford with good communications.

Reasons for Participation

I wish to discuss the poor positioning of the proposed housing for employment and the necessity of planning for an upper limit to Oxford's population with development beyond the green belt.

Transport: Sandy Lane forms part of my daily commute. The closure of it to cars will sever the link between Kidlington and Yarnton, necessitating several extra miles travel either through the congested Pear Tree interchange, or the equally congested airport road, putting unbearable pressure on these areas. This will make access to local amenities more difficult and increase traffic congestion. It is fundamentally flawed, and the proposals have not made clear its impact on existing homes and businesses on both sides of the railway line. It does not serve the stated objective of improving access between communities, but actively hinders it. This has not been thought through, and is hugely detrimental. The proposed new station is shown with a small star on the development plan. No space is actually shown for the station, car park and associated access. It will either take a significant amount of space out of the area allocated for homes, or will require land east of the railway line, outside of the red line, and would amount to further development by stealth. Indicating it as a mere star on a plan suggests that no real thought has gone into this. What guarantee is there be that Network Rail would agree to it? The loss of Sandy Lane will make it of no benefit to those east of the line. This response though separate and my own should be read in conjunction with the Representations made by the Begbroke & Yarnton Green Belt Campaign "BYG".

Changes Sought

For the reasons I have given AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which I additionally support and adopt as part of my own Representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.

Reasons for Participation

I would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.

Object for the following reasons: 1. The closure of Sandy Lane will divert all traffic onto the A44 and cut a vital link between the villages of Yarnton, Begbroke and Kidlington. Many elderly people or those with health issues would be physically incapable of cycling.2. According to the plans that were presented by CDC at the exhibitions held in the summer, the only way out of the new development on the Eastern side of the A44 is via the road leading from the Science Park. This is clearly inadequate on safety grounds.3. The traffic lights at this junction currently prioritise traffic entering and leaving this road. This, coupled with the sequence of lights regulating the increased flow of traffic from Langford Lane and the new development/park and ride at Woodstock would make it virtually impossible to get out onto the A44 from Begbroke and even more dangerous than it already is crossing the dual carriageway from one side of village to the other without a pedestrian crossing. The representative from CDC I spoke to made it clear that no change to the A44 was planned. 4. More traffic will be using the A44 due to the new developments. Already we have traffic diverting from the A40 which passes through Bladon and down the A44 to avoid the queue on the A40 at the Wolvercote roundabout. All this traffic, including the proposed Rapid transit buses will be caught in the bottleneck from the Turnpike pub to the Loop Farm roundabout where the road becomes single lane. Widening it not an option due to the canal and railway bridges. 5. No consideration has been given to the additional traffic generated by events at Blenheim Palace. 100,000 cars were expected at Countryfile Live this year.6. The A34 is up to capacity. Since the M40 extension it is now a major north-south route as well as being a bypass for Oxford. The road is taking much more traffic that it was ever designed for. It could not cope with the added amount of traffic that a development of this size would generate.

Comments

The proposals to develop transport infrastructure listed in this section are vague, piecemeal and insufficient to enable 'sustainable' transport for the area involved. Alarming, there appear to be no clearly defined plans to improve the efficiency or capacity of the A44, where it is planned that the majority of this housing (2500 homes) would be built (Policy PR8/PR9). The only proposal concerning this road appears to be the attempt to divert car traffic off the route and through Kidlington before it reaches the lower stretches of the road (e.g. through Begbroke and Yarnton) (Sec.5.59). How this scheme would work is not explained, however, and it is extremely doubtful that it could be achieved because of the very high levels of congestion already experienced along the A4260 through Kidlington. This would result in the continuation of the existing traffic flows and problems along the A44, compounded later by the addition of several thousand new cars using the route due to the new housing. If, however, there were any increase in the traffic flow through Kidlington, residents would be further disadvantaged by this, given that the centre of the area is a designated AQMA zone, with no management plan currently in place to deal with this problem. Reference to the Interim Transport Assessment. Detailed comments provided on car journeys. Observations also make a mockery of CDC's claims (Sec. 5.50) that locating the proposed developments in other areas would not lead to sustainable commuting when this will not happen even when the housing is located close to Oxford. Other locations, such as Banbury and Bicester, are reasonable alternatives, and development here would arguably increase the possibility of sustainable commuting to Oxford since there are well-established bus and rail connections from these towns. The newly-built station at Oxford Parkway is perfectly positioned to link Bicester with Oxford, and its potential should be promoted and maximised for this purpose. Commuting by train (and tram where possible) is likely to become evermore important in the UK, because of the advantages it offers in terms of reliability, cost to the commuter and speed, and local authorities should be prioritising this mode of transport over piecemeal, short-term and ineffective modifications to existing road networks. The proposed improvements to road networks claimed in the Proposed Submission (e.g. remodelling the Langford Lane/A44 junction; introducing 'RT' bus services through Kidlington) will make an insignificant contribution to the present infrastructure difficulties at best. Even if these plans are implemented, they do not contribute to the requisite "joint working on cross boundary strategic priorities" necessary to make the plan effective. This is because the Oxford-Cherwell border as a whole suffers from intractable problems with the road network, particularly on the immediate approach to the Northern Oxford suburbs, which are insoluble without radical change (e.g. an underground metro system). There are well-known congestion flashpoints at the 'Sainsbury's Roundabout' in Kidlington, the Peartree Interchange and the Wolvercote and Cutteslowe roundabouts during rush hour. Detailed comments provided regarding Section 9 of the NPPF (Protecting Green Belt land).

Changes Sought

Proposed changes suggested on 6 points: Strategic Economic Plan; unmet housing need; SHMA; Oxford's housing capacity; apportionment; and options.

Reasons for Participation

Proposed Submission Plan - Section 5 (Other)

PR-C-0145	30/08/2017	Fred	Jones						
560	Comments								
Object to the outlined proposals. Many of the paragraphs 1-12 depict Oxford's inability to identify sites within its own boundaries (of which there are many) that could very easily accommodate additional housing without the decimation of the green belt. Some of the reasoning is nothing more than a matter of convenience to absolve the Oxford City Council from its responsibilities. The claims of enhancing green space areas across the Kidlington/Gosford/Yarnton/Begbroke area is just the opposite to what will happen should these plans be approved. How can green space be improved when houses are to be built on existing green belt and a golf course has to be relocated. The claim of strengthening Kidlington Village centre is wholly unrealistic, there is no room to do so. It is my view that these proposals provide benefit for Oxford Council only and are to the detriment of residents living in both Yarnton and Begbroke.									
Changes Sought					Reasons for Participation				
PR-C-0237	15/09/2017	Karen	East	TMP Planning Ltd on behalf of Gosford and Water Eaton Pari			N	Y	
811	Comments								
The proposals within the Plan are for 4400 dwellings of which 1410 are within the Parish. This represents 32% of the total allocation and would lead to a 208% increase in the number of houses within the Parish. It would lead to the removal of nearly 100Ha of land from the Green Belt, 12% of the total Green Belt in the Parish. This would result in a substantial reduction in the Green Belt at the narrowest point between Gosford and Water Eaton, Kidlington and Oxford. The impact of this level of development on the environment, community and infrastructure of the Parish will be substantial. Not convinced that the negative effects on the road network can be adequately mitigated and there is insufficient evidence that infrastructure improvements can be delivered as evidenced by recent development within Oxford City. Rather than provide additional parking for the Westgate Centre shoppers, old and new, are being advised to use the Park and Rides. There has been little thought by the City Council on the impact of additional parking on the Park and Rides, the impact when they become full (especially for special events or seasonal events) on parking in local areas and especially no thought on the increase of traffic through the villages to get to the City. This has direct implications for the Parish in terms of the Water Eaton Park and Ride and routes to/from the city centre which pass through Gosford and Water Eaton. Such problems will be further exacerbated by additional housing development within Cherwell. The proposal will lead to the substantial loss of countryside, increase the pollution to the area, impact on recreational facilities and on the landscape wildlife and historic environment. Furthermore, are not convinced that the figure of 4400 is justified or appropriate for meeting Oxford's Unmet Needs. Not convinced that the spatial strategy as put forward is the most appropriate nor will it be deliverable without major impacts on the existing community and environment.									
Changes Sought					Reasons for Participation				
Request that Cherwell reconsider the proposed strategy as the impact on Gosford and Water Eaton, it's community and environment is considered unacceptable.					The Parish Council would wish to take part in order to explain the potential impact of the proposed development on local communities and why this should be better reflected in the draft vision.				
PR-C-0237	15/09/2017	Karen	East	TMP Planning Ltd on behalf of Gosford and Water Eaton Pari			N	Y	
810	Comments								
The draft vision gives insufficient consideration to the impact of the proposals on existing communities and the environment. Whilst it sets out a vision for the new development proposed it does not refer to addressing the impacts of such development on existing residents and communities. To achieve balanced communities, the needs of the existing villages, and their villagers, need to be taken into account. In our community, local services (schools, transport, parking, medical centres) are already under strain, and cannot just deliver extra capacity for more inhabitants. A primary school already has to be extended, the lack of parking continually increases, and, at peak times, the Kidlington roundabout is very congested with commuter traffic. Travelling into and out of Oxford from our community is already very difficult due to congestion – this is noticeably worse with the new housing that has been developed in other parts of the District (e.g. Bicester) in recent years. An additional 4400 houses in Cherwell (1410 of which are in the Parish) together with further growth at Banbury, Bicester and Upper Heyford will put further pressure on the transport network through our Parish and exacerbate the problem. Additional land will be required, in some cases, to provide additional transport infrastructure whether this is road improvements, bus lane or cycleways. This will result in further development and urbanisation within the Parish and the destruction of further greenbelt/green spaces. There are already recognised air pollution problems due to traffic (as evidenced by the Air Quality Management Areas declared for the whole of Oxford and on Bicester Road). These problems will be made worse by the proposed development within and surrounding the Parish. It is difficult to see how new development on the scale proposed can “enhance and conserve the natural environment” when significant areas of countryside which is Green Belt will be lost to development. The plan as proposed allocates 3 significant sites for housing and removes 2 others from the Green Belt. This represents 12% of the Green Belt within the Parish and will significantly erode the gap between Gosford and Water Eaton, Kidlington and Oxford. In addition, the golf course, a valued historic leisure facility would also be lost. Without fully addressing the impact on local communities the Plan would not be consistent with sustainable development and the National Planning Policy Framework.									
Changes Sought					Reasons for Participation				
The draft vision should recognise that meeting Oxford's needs must take account of the impact on the environment and local communities including: <ul style="list-style-type: none"> • Safeguarding the countryside from encroachment; • Loss of access to the open countryside for the urban population; • Removing an established historic leisure facility. e.g. closing the North Oxford Golf course and building houses upon that land; • Loss of 12% of the Green Belt within the narrowest gap between Gosford and Water Eaton, Kidlington and Oxford. • Removing around 110Ha of valuable agricultural land; and • Adding to the parking problems and travel congestion, rather than providing sustainable travel opportunities for the existing and new villagers. 					The Parish Council would wish to take part in order to explain the potential impact of the proposed development on local communities and why this should be better reflected in the draft vision.				
PR-C-0251	09/10/2017	Antonio	Corbi				N	N	N Y
2041	Comments								
Detailed comments provided on the five purposes of the Green Belt. Plan is contrary to Policy ESD 14 of the adopted Local Plan Part 1. Paragraphs A.11, B.260 and Policy Villages 1 of the adopted Local Plan Part 1 quoted. Land can only be removed from the Green Belt if exceptional circumstances can be demonstrate. Cherwell's 12 points under exceptional circumstances quoted. Disagree that these are acceptable exceptional circumstances. Cherwell DC is irresponsible carrying out these Plans to favour the Oxford's unmet housing needs to the north of the city when the major employment centres are in the south. CDC loyalty is to their own residents and not to the residents of Oxford and in my opinion they will pay a political price for being irresponsible.									
Changes Sought					Reasons for Participation				
For the reasons given AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which are additionally supported, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection. 5559	<p>Comments</p> <p>Land can only be removed from the Green Belt if exceptional circumstances can be demonstrated. CDC have provided twelve points (shown below) which they claim constitute the 'exceptional circumstances' needed to justify removing land surrounding Begbroke, Yarnton and Kidlington from the Oxford Green Belt. Detailed comments provided on each point.</p> <p>Changes Sought</p> <p>For the reasons I have given above AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which I additionally support and adopt as part of my own Representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.</p> <p>Reasons for Participation</p> <p>I would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.</p>							
PR-C-0262	10/10/2017	Richard	Pye		N	N	N	Y
5573	<p>Comments</p> <p>For this proposed development to take place requires the removal of the land from the Oxford Green Belt. Under the National Planning Policy Framework ('NPPF') the removal of land from the Green Belt requires exceptional circumstances to be proven. Detailed comments provided on the exceptional circumstances. Would however encourage a cohesive and holistic approach for Oxfordshire that sees the five districts working together to prepare their respective local plans in a manner that truly will meet the future needs of the county. This is currently fragmented with no coherence between the different plans due to substantial timing differences in their preparation. How does it make sense for one plan to be based off the housing figures from a 2014 report, while other local plans will use new calculations? The proposed new housing figure for Oxfordshire is lower and means that this requirement to work collectively becomes more important than ever. Consequently, the CDC Partial Review should be immediately stopped to allow the other districts to catch-up with their local plans and the true housing need for Oxfordshire to be identified.</p> <p>Changes Sought</p> <p>For the reasons I have given above AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which I additionally support and adopt as part of my own Representation in this document, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.</p> <p>Reasons for Participation</p> <p>Would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.</p>

913	<p>Comments</p> <p>Although Historic England do not consider it a matter of soundness, Historic England would like to see the Vision include "that conserve or enhance the historic environment and heritage assets therein".</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							
PR-C-0306	10/08/2017	Anthony	Hall					N
915	<p>Comments</p> <p>There is nothing exceptional about need for housing - everywhere in the South East has the same problem. Oxford's inability to meet it's own needs is self-inflicted, deliberately encouraging growth thus increasing pressure on housing. Why is harm to the Cherwell Development Strategy - a local and relatively minor matter - more important than harm to the GB - a policy of national importance continually reinforced by government in word (though not in deed)? The main aim of the GB is to prevent urban sprawl which is precisely what this proposal will achieve. What has the A44 corridor got to do with this? Building on the GB so we can have more industry will cause more pressure on the GB. 8. Introducing the strawman alternative of building round Woodstock is unpalatable and says nothing about the absence of other alternatives. Strengthening Kidlington Village Centre is not a crucial objective that should override national policy. It is not justified to build on GB by claiming it provides quantity and quality of new public space and infrastructure. Finally "the ability to create a sustainable, holistic, joined-up vision for the whole of north Oxford/Kidlington/A44 corridor area" is in other words, we want the ability to do precisely what the GB is there to prevent.</p> <p>Changes Sought</p> <p>It is not a matter of rewording. The whole plan is completely unsound.</p> <p>Reasons for Participation</p>							
PR-C-0336	10/10/2017	Kevin	Bezant					
5565	<p>Comments</p> <p>Paragraph 5.17 of the proposal lists the exceptional circumstances for removal of land from the Oxford Green Belt. None of the listed reasons are exceptional. The Green Belt is permanent and this proposal goes against local and National policy. In their Summary Booklet, Cherwell point out that the removal of 253 of 8409 hectares of Green Belt is a reduction of 3%. However they fail to mention that this is in the county context. In the local context it more like a 50% reduction.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>

Comments

Money is sought to bring forward infrastructure investment to pump-prime three major development schemes: 1. Didcot Garden Town – £171m is bid for transport improvements including a Didcot Science Bridge and A4130 dual carriageway, a new river crossing at Culham and Clifton Hampden Bypass. This would support the delivery of over 22,000 homes in Didcot, Culham, Harwell and Berinsfield. Additionally up to £70m of cycle and other sustainable transport improvements are proposed for inclusion in the bid plan. 2. West Oxfordshire Garden Village – £135.4m is bid for further upgrades to the A40, building on existing schemes and based on the approved A40 Long Term Strategy including development of the Rapid Transit network and additional highway capacity on A40 transport corridor. This would support the delivery of over 10,000 homes in Witney & Carterton, and around Eynsham. 3. North of Oxford – £152m is bid for the development of Rapid Transit lines on upgraded A44 and A4260 corridors, a new Park & Ride, and strategic cycle infrastructure plus. Support is also sought for additional education requirements (as yet un-costed). This. Would support the delivery of 5,570 homes in Woodstock, Begbroke/Yarnton and the Northern Gateway. The bids submitted to the £2.3 billion Housing Infrastructure Fund are ranked as above according to the Government’s scoring method, with the guidance that the strongest bid be put first. The Oxfordshire Infrastructure Strategy, commissioned by the Growth Board, was used to identify infrastructure priorities that offered the prospect of a step-change in housing provision in a defined area. The Government will consider Oxfordshire’s bids along with those from other areas and the highest ranking schemes will go through to a second stage in Spring 2018, with final funding awards announced from Summer 2018". Consequently, the issue is whether the Oxfordshire HIF bid will be successful when considered alongside others, the outcome will not be known until the summer of 2018, this may well have implications for the delivery of the urban extensions proposed in the Cherwell Partial Review. It is noted that para 5.155 states that “The Partial Review is also supported by an infrastructure schedule for the planned development and the delivery of the 4,400 homes by 2031. This supplements the updated Infrastructure Delivery Plan (IDP) for the existing Local Plan. The delivery of infrastructure will be monitored through the Council’s Annual Monitoring Report process.” Page 9 of the Executive Summary of the Cherwell Local Plan Partial Review states that: Para xxi “The Plan seeks to ensure that the necessary housing supply will be maintained by managing planned delivery and maintaining a separate five year supply of housing sites to specifically meet Oxford’s unmet needs within Cherwell (policy PR12a). It also makes clear that applications for planning permission for development to meet Oxford’s needs that is not allocated in the Plan will not be supported unless the Council has taken a formal decision that additional land beyond that allocated is required to ensure the requisite housing supply, that the demonstrable support of the local community has been gained through pre-application consultation and subject to other criteria.”

Changes Sought

Reasons for Participation

Dorchester Group is concerned that the unmet needs assigned to Cherwell district are met in the most appropriate and effective locations and that the proposed locations delivery within the timescale.

Comments

Given the high level of housing need consideration should be given to meeting these needs sooner rather than later. Dorchester Group's concerns are about the deliverability of the proposed locations. Recently Nathaniel Lichfield & Partners produced a report in November 2016 “Start to Finish - How Quickly do Large-Scale Housing Sites Deliver?” The report found that: “Large-scale sites can be an attractive proposition for plan-makers. With just one allocation of several thousand homes, a district can – at least on paper – meet a significant proportion of its housing requirement over a sustained period. Their scale means delivery of the infrastructure and local employment opportunities needed to sustain mixed communities. But large-scale sites are not a silver bullet. Their scale, complexity and (in some cases) up-front infrastructure costs means they are not always easy to kick start. And once up and running, there is a need to be realistic about how quickly they can deliver new homes. Past decades have seen too many large-scale developments failing to deliver as quickly as expected, and gaps in housing land supply have opened up as a result.” The study found that: “the planning approval period and subsequent time to first housing delivery reveals the total period increases with larger sites, with the total period being in the order of 5.3 – 6.9 years. Large sites are typically not quick to deliver; in the absence of a live planning application, they are, on average, unlikely to be contributing to five year housing land supply calculations.” Other factors need to be taken into account, the report concludes that it is not realistic to assume 100% of planning permission granted in any given location will deliver homes. There may be a number of issues for example, • supply chain constraints hindering a start; • Pre-commencement conditions take longer than anticipated to discharge; • An alternative permission is sought for the scheme after approval, perhaps when a housebuilder seeks to implement a scheme where the first permission was secured by a land promoter. Consequently, factors reflect that land promotion and housebuilding is not without its risks. In addition there are infrastructure requirements associated with large scale development on the edge of Oxford, it is noted that: The Oxfordshire Growth Board has provided unanimous support for an application to the Government’s Housing Infrastructure Fund (HIF) as part of a package of investment to deliver the transport infrastructure necessary to allow the development of new garden towns and villages across the county.

Comments

Supports the strategy to meet the vision & objectives which prioritises the need for development to be well connected to Oxford, to be well related to the area of the district that has the strongest economic & social relationships with Oxford, which is fully integrated with the County Council’s sustainable transport policies, with the proviso that the sites actually deliver to meet housing & employment needs. If the locations do not deliver then land at Upper Heyford is well placed. It is noted that the strategy is part of a wider economic context , Oxfordshire’s Strategic Economic Plan (2016) highlights the county’s important to strategic locations in relation to London, Heathrow Airport & as a part of the UK’s Golden Triangle between Oxford, London and Cambridge. It highlights the economic potential of the Oxford – Milton Keynes- Cambridge corridor, a focus of work undertaken by the NIC. Para 5.10 states that the Council’s strategy for meeting Oxford’s unmet needs seeks to avoid undermining the strategy of the existing LP, whilst this is supported, the key issue is delivery. It is noted that the AMR published in March 2017 which covers the period April 2015 – April 2016 with a base date of 31st March 2016, indicates that the Council have a 5 year supply for the period 2016 – 2021 of 5.4yrs & for the period 2017 – 2022 of 5.6 yrs. However, the housing completions over the period 2011 – 2016 have been below that anticipated. The Cherwell LP housing requirement for the period 2011 – 2031 is 22,840 dwellings i.e. 1,142 per annum. However only in one year out of the last five has the plan delivered in excess of 1,142 dwellings. In fact against the annualised housing requirement of 5,710 dwellings only 3,477 have been built. Over the 5 years from 2011 – 2016 this shows a persistent under delivery in meeting Cherwell's housing needs to date. Using the rolling three year average Cherwell has only delivered 81% of that required in the plan. Whilst the application of the housing delivery test in the Housing White Paper has been delayed, it nevertheless must be noted that if an authority falls below 85% of the housing requirement, authorities will be expected to produce an action plan & in addition be expected to plan for a 20% buffer on their five year land supply if they have not already done so. It is noted that the strategy in the PR is to focus development on a geographic area extending north from Oxford to south Kidlington, along the A44 corridor to Yarnton & Begbroke & up to Woodstock in West Oxfordshire. Whilst Dorchester Group support this strategy in terms of meeting Cherwell’s proportion of Oxford’s unmet needs at locations which have the strongest economic & social relationships with Oxford & are well connected to the city; should these locations fail to deliver as required, land at Upper Heyford is well placed to meet housing needs of not only Cherwell district but also needs that are failing to be met elsewhere through the Partial Review. There are long lead in times to strategic sites and whilst it is noted that Oxford’s unmet needs do not necessarily need to be met to 2021 (as stated in the Oxfordshire Growth Board), this ignores the fact that Oxford City's unmet needs are derived from the SHMA & therefore are for the period 2011- 2031.

Changes Sought

Reasons for Participation

Dorchester Group whilst not directly seeking changes to the Partial Review consider that this is a challenging strategy and much rests on the deliverability of the locations identified to meet the unmet needs of Oxford. If needs fail to be met then land at Upper Heyford could play a significant role. Area of Search F provides a sustainable option to meet the unmet needs of Oxford City as it is well-related to Oxford by way of a rail connection. Area of Search F also provides the most sustainable, deliverable option to meet the needs of Cherwell in the longer-term.

Dorchester Group is concerned that the unmet needs assigned to Cherwell district are met in the most appropriate and effective locations and that the proposed locations delivery within the timescale.

Proposed Submission Plan - Section 5 (Other)

PR-C-0533	09/10/2017	Mr P	Watson	Gosford Trust	Y	Y	N	Y
1309	<p>Comments</p> <p>Do not consider that the Proposed Submission Plan ('The Plan') has been positively prepared as it fails to remove from GB status a small area of land situated at Gosford Farm, Gosford, (Site plan provided) which has no justification in remaining within the GB. The Plan is therefore unsound in that it fails to address the removal of the Subject Site which forms part of Gosford Farm, Gosford despite the policies expressed in para.5.37 of Policy PR3. 2. Whilst we believe that The Plan is based on the most appropriate strategy when considered against the reasonable alternatives, we maintain that it can only be justified if it removes areas of the GB for unmet residential housing needs. Such areas are referred to in para. 5.37.2 of Policy PR3. The Subject Site at Gosford Farm has no reason to remain within the GB and could be used to meet the identified housing need. 3. We do not consider that The Plan is effective as it currently stands. Every area of the GB needs to be carefully considered for removal and the Subject Site that we are proposing to be removed has no justification in remaining as GB for those reasons set out in Section 5 below. 4. We do not consider that The Plan is consistent with the National Policy as it fails to address the purpose of the GB given that the small area of the GB (the Subject Site) that we are proposing should be removed has no justification for inclusion within the GB. 5. Paras. 5.37.4 and 5.39 of The Plan clearly state that the revised GB boundaries should be capable of enduring beyond the Plan period. We do not consider there is any planning justification in retaining the Subject Site within the GB and that its proposed continued inclusion could be overturned at a later date as being totally wrong and unjustified.</p> <p>Changes Sought</p> <p>1. It is necessary to amend the Local Plan to make it sound. 2. Our view is that to make the Local Plan sound, Policy PR3 needs to be amended as follows: ...'Policy PR7a Removal of 11.35 hectares of land as shown on inset Policy Map PR7a'.... 3. Policies Map PR7a will need to be amended on its northern extremity to show Gosford Farm, to include Gosford Farmhouse and the remainder of the land shown edged red on the attached plan. 4. This will comprise a minor amendment to "Policy PR3: The Oxford GB" and can be justified on the grounds that to retain the Subject Site within the GB would not meet the four basic purposes of GBs all as set out under Government Guidance (lists Green Belt principles). 5. The Subject Site is contained on three sides by existing development and on the fourth side by a long established and mature field boundary hedge which will be retained and enhanced.</p> <p>Reasons for Participation</p> <p>Wishes to participate at the oral Examination and consider this to be necessary so that the Inspector will be fully able to understand the justification for our proposed amendment to Policy PR7a and Policy PR7a - Proposals Map contained within the Proposed Submission Plan. 2. Acknowledges the Subject Site, comprising some 0.55 so hectares or thereabouts, hectares or thereabouts, is of minimal relevance to the Submission Plan and the Partial Review of the Cherwell Local Plan 2011 - 2031(Part One). For the reasons stated above, it is important that all areas of the GB are examined at this moment in time and we believe it is only right that the Subject Site should be excluded from falling within the boundaries of the future Oxford GB.</p>

1435	<p>Comments</p> <p>See reasons for participation</p> <p>Changes Sought</p> <p>Reasons for Participation</p> <p>OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. It comments regularly on planning applications in the GB and in planning policy consultations, particularly on matters affecting the GB. OGBN has made representations on all stages of the Cherwell Local Plan Part 1 and participated in the Public Examination in December 2014. We have also commented on earlier stages of this Partial Review. The membership of OGBN includes many of the Parish Councils whose areas include GB land. The OGBN fully supports the aims of GBs as set out in the NPPF and earlier planning guidance and in particular it strongly endorses the fundamental principle that GB is a permanent designation. We consider that our participation in the examination is necessary and justified because of our longstanding interest and understanding of the Oxford GB.</p>							
PR-C-0567	09/10/2017	Dr Ian	Scargill	Oxford Green Belt Network	N	N	Y	
1434	<p>Comments</p> <p>OGBN disagrees with the justification and fundamental basis for this plan. It is founded on the assumption of a step change to historic levels of growth in Oxfordshire, amounting to more than doubling of growth in population, housing and employment. Because of this the plan suggests that the long established strategy of diverting growth away from the city of Oxford towards the country towns is no longer feasible. OGBN disagrees with this because the proposed levels of growth are unrealistic, unproven and therefore unjustified. We consider that the arguments for a strategy to divert growth away from Oxford remain as strong as ever. An essential part of that strategy is the GB, which Cherwell Council supports. However in order for the strategy to work, the GB has to be retained in its entirety. It is not a collection of land parcels that can be picked off one by one. It is inconsistent of Cherwell to support the GB and yet to seek to build on it. It is not possible for Cherwell to satisfactorily produce this review in isolation. Oxford is surrounded by four other authorities and planning needs to be coordinated strategically between all five councils. Infrastructure needs have to be planned across boundaries and certainly cannot be confined to the limited areas covered in this review. The Growth Board has not been an effective mechanism for strategic co-ordination and its analyses of spatial options to date have been simplistic. The Councils – while claiming to be cooperating – have largely acted according to their own agendas. Oxford City Council in particular has sought to promote economic growth within the city, by protecting employment sites, without any regard of the consequences of this for the surrounding Districts such as Cherwell. It appears to be part of its own strategy to expand beyond its borders into the GB, again ignoring the purpose of the GB to protect the character of the historic city. This review cannot be effective without a well founded spatial strategy for the county. We also argue that this strategy should include a commitment to retain the Green Belt in its entirety.</p> <p>Changes Sought</p> <p>The plan should be withdrawn and a spatial strategy for Oxfordshire established which can address the issues addressed in this review in a co-ordinated and consistent way. Through such a strategy the Oxfordshire authorities should continue with their previous approach of actively encouraging further employment and housing growth away from Oxford. Oxford City Council and Cherwell in particular should co-operate more effectively and as part of this Oxford should (a) discourage further employment generating development in the city unless it is absolutely essential and (b) use some of the land it has currently allocated for employment, together with other previously developed land, for well planned high density housing.</p> <p>Reasons for Participation</p> <p>OGBN was established in 1997 to help to protect the Oxford GB and to support those wishing to resist proposals for inappropriate development within it. 1467	<p>Comments</p> <p>Is sure the figure for new employment is also grossly over estimated. There are various science parks and the like in this area and indeed, as you know, another is being built at Langford Lane. Not only does this add to the traffic problems, which the roads are totally inadequate for, but a lot of units seem to remain empty. These sort of developments, to my thinking, should be located near or have easy access to motorways etc. and should be fit for purpose.</p> <p>Changes Sought</p> <p>Reasons for Participation</p>							

Proposed Submission Plan - Section 5 (Other)

PR-C-0682	08/10/2017	Tara J	Prayag						N
1687	Comments								
Object on these grounds:The proposals within the Plan are for 4400 dwellings of which 1410 are within the Parish. This represents 32% of the total allocation and would lead to a 108% increase in the number of houses within the Parish.The proposals would lead to the removal of nearly 100Ha of land from the Green Belt, 12% of the total Green Belt in the Parish. This would result in a substantial reduction in the Green Belt at the narrowest point between Gosford and Water Eaton, Kidlington and Oxford.The impact of this level of development on the environment, community and infrastructure of the Parish will be substantial. There is no evidence in current 'live' developments that you have been able to mitigate against the damaging impact of new development on the environment, community and infrastructure of the Parish.For example - Rather than provide additional parking for the Westgate Centre shoppers, old and new, are being advised to use the Park and Rides. There has been little thought by the City Council on the impact of additional parking on the Park and Rides, the impact when they become full (especially for special events or seasonal events) on parking in local areas and especially no thought on the increase of traffic through the villages to get to the City. This has direct implications for the Parish in terms of the Water Eaton Park and Ride and routes to/from the city centre pass through Gosford and Water Eaton. Such problems will be further exacerbated by additional housing development within Cherwell. The bus from Sainsbury's down to the Kings Arms (via the Gosford Link Road) should take approx. 5 minutes. Most evenings during rush hour this takes a minimum of 20 minutes due to excess traffic accessing the A34.The proposal will lead to the substantial loss of countryside, increase the pollution to the area, impact on recreational facilities and on the landscape wildlife and historic environment.

Support. The consortium broadly supports the Vision and Objectives for North Oxford, Kidlington and the A44 particularly the aim to;• achieve a coherent, holistic and joined-up approach which prioritises the need for development to be well connected to Oxford;• relate to the area of the district with the strongest economic and social relations with Oxford;• integrate with the County Council's sustainable transport policies;• grasp the opportunities for distinctive place making;• provide a consolidated approach to green infrastructure;• achieve net gains in biodiversity; • minimise the need to travel and encourage trips by sustainable modes of transport; • protect and enhance green assets and the water environment;• make green infrastructure and biodiversity of core importance to how new development is planned; and• provide homes in locations that create a close connection between people and the city's employment areas, its universities and its services and facilities. In short, the consortium supports the strategy of meeting the need for homes as close as possible to where that need arises and in this case that means either in, or on the edge of, Oxford. In so doing this supports Oxford as the principal economic hub in the county, which provides a third of all jobs in Oxfordshire and whose ongoing success is key to the future of the county and the wider sub-region.

Having reviewed the Proposed Submission Plan, welcome the approach taken by Cherwell District Council to deliver the agreed apportionment of un-met housing need for the district, and that this is to be delivered on sites which are demonstrably close to Oxford city.									
Changes Sought					Reasons for Participation				
					Would welcome the opportunity to attend Examination in Public following submission of the plan to the Secretary of State, should it be required.				
PR-C-0784	10/10/2017	Nick	Freer	David Lock Associates on behalf of Gallagher Estates	Y	Y	N	N	
2000	Comments								
Table 4 sets out the spatial strategy for the Plan and identifies 7 sites that are proposed to deliver Oxford's unmet needs. This strategy concentrates growth solely across a small number of strategic sites all closely geographically related. This rigid strategy could have severe implications for delivery of homes. Gallagher Estates considers that a range of sites will be required to meet Cherwell's own needs and Oxford's Unmet Housing needs jointly, an approach that will provide housing delivery benefits, and will offer increased variety and choice in the market.									
Changes Sought					Reasons for Participation				
The addition of development on land north of Wykham Lane, Banbury (HELAA site-HELAA026) would complement the delivery of a mixed, balanced & planned community at SouthWest Banbury (Banbury 17). Banbury is the larger of Cherwell's two towns & has a significant commercial, retail, employment& housing market. The growth identified at Banbury through the Local Plan Part 1 will serve to bolster the economic & social function of the town for its residents & businesses. Additionalgrowth at Banbury will serve to support the foundations laid by the Local Plan Part 1. Pursuing a strategy that seeks a mix of sites from various sustainable locations across the District, to include growth at Oxford, but also incorporating sites in sustainable towns such as Banbury, would result in a more effective policy. Variety in location & choice of sites would also help embed choice & competition in the market as part of that strategy, assisting in the delivery of homes against the required target and compliant with NPPF.									
PR-C-0787	10/10/2017	John L	Broad	CPRE Cherwell South District					N
2015	Comments								
Do not agree with these sites for the reasons previously stated. Policies PR1 to 13 would not achieve the housing requirements for Oxford City but they would destroy parts of the GB for no practical reason. For example, policy PR3 does not provide "exceptional" reasons to take the GB for development. Policy 4a identifies one of the problems with this proposal in that it would require unnecessary massive investment in some kind of infrastructure. Policy PR12b seems to suggest that further sites might be put forward?

Cherwell have barely attempted to demonstrate that Exceptional circumstances for release of Green Belt exist. The reasons given for rejecting alternative sites seem to be they were not in the Green Belt, or too far from Oxford to be assimilated into the City. To argue that urban sprawl into the Green Belt is justified by the fact that only the Green Belt is close enough to the City seeks to undermine the core purpose of the Green Belt. Clearly these reasons are not acceptable. The proposal for release of Green Belt land is massively surplus to requirement for the 4,000 extra housing figure it is meant to take. The density of housing proposed is far too low. Others will quote actual figures. The Plan would land from the Green Belt that will likely result in the development and assimilation of the villages North of Oxford stretching into and coalescing with Woodstock. There is no justification for taking so many parcels – would highlight the ludicrous proposal to move a 100 year old, thriving golf club a few 100 metres – when the entire proposed urban extension of Oxford could be accommodated on PR8 by using appropriate build densities. Cherwell claim that the amount of Green Belt taken is a modest 3% of the total Green Belt in Cherwell. However they seek to concentrate development where the Green Belt is at it's narrowest – the Kidlington Gap between Kidlington and Oxford. Development here will result in the coalescence of Oxford with Kidlington, Gosford and Water Eaton, Begbroke and Yarnton. Currently the built areas are separated by a few fields. Yet there is clear sense of separation and the individual villages retain their rural character.

Changes Sought

Green Belt land should not be released. The real housing need for Oxford should be assessed and validated. The Councils should cooperate to protect the Green Belt and to protect Oxford from over-development. The current draft plan should be withdrawn.

Reasons for Participation

Would like to be represented by Kidlington Development Watch at the oral examination in public. For the reasons given in the Kidlington Development Watch representation.

Detailed comments on the 5 purposes of the Green Belt. Policy ESD 14 of the adopted Local Plan Part 1 quoted. Paragraphs A.11, B.260 and Policy Villages 1 of the adopted Local Plan Part 1 quoted. Plan is contrary to the adopted Local Plan Part 1. Land can only be removed from the Green Belt if exceptional circumstances can be demonstrate. Cherwell's 12 points under exceptional circumstances quoted. Disagree that these are exceptional circumstances. Cherwell DC is irresponsible carrying out these Plans to favour the Oxford's unmet housing needs to the north of the city when the major employment centres are in the south. CDC loyalty is to their own residents and not to the residents of Oxford and in my opinion they will pay a political price for being irresponsible.

Changes Sought

For the reasons given AND the Representations made by the Begbroke & Yarnton Green Belt Campaign which are additionally supported, the Plan cannot be changed to make it legally compliant or sound and should therefore NOT be submitted for Inspection.

Reasons for Participation

Would like the Begbroke & Yarnton Green Belt Campaign to represent me at the Examination should it take place.

Green Belt - The Green Belt land surrounding Oxford City was created to stop urban sprawl. The current plan effectively swallows up the local villages into Oxford City's sphere of control. The Oxford Green Belt has a tight inner boundary around the built-up area of the city and provides an open setting to the urban area of Oxford and has prevented coalescence with neighbouring towns and villages. Are we prepared to sacrifice the character of Oxford City and its surrounding villages to meet increased alleged housing needs? Encroachment into the Green Belt will also encourage the continuation of a north-south divide within the district.

Comments

Protection of Green Belt as identified in the NPPF and Cherwell's Adopted Local Plan 2011-2031. The proposed development in policy PR3 and sites in the Green Belt contravene both these national and local policies. Government policy requires the GB to be permanent unless truly exceptional circumstance necessitate release of land. Oxford's Unmet Housing Need is not an exceptional circumstance and Cherwell have not provided robust evidence to contradict this. This is because Oxford's 'Unmet Need' has not yet been accurately quantified. The figure used in this submission document is based on Oxfordshire's Strategic Housing Market Assessment (SHMA) whereas the government's revised Objectively Assessed Need (OAN) calculation quantifies the housing need to be 50% less than the SHMA estimate.

Changes Sought

The review of the Adopted Cherwell Local Plan is premature and should be suspended until Oxford City has completed its Local Plan and produced a robust figure for the number of houses that it is unable to build. The Inspector for the Local Plan Part 1 specified that a review of the Green Belt should happen but only after the unmet need is fully and accurately defined. If, after Oxford City has a Local Plan in place, Cherwell is called to co-operate with Oxford City by taking extra houses, then there are means for these to be accommodated without building on the Green Belt. Housing density could be increased on several sites in Cherwell as well as in Oxford City. Urban sites can take up to 70 houses per hectare. Higher density houses are necessarily smaller but 63% of Oxfordshire's need is for smaller units.

Although section 5.141 recognises that infrastructure necessary to support planned developments must be provided in a timely manner, no specific reference is made the need for health promoting infrastructure, such as community facilities, walkways and cycle paths to be provided from the outset or as near to the start of the development process as possible. To maximise the behaviour change potential of new development, we strongly recommend that developers are required to provide health promoting infrastructure as soon as practicable possible.

Content relating to public rights of way and access to the countryside is supported, in particular policy 4a (Sustainable Transport), 5 (Green Infrastructure) and PR1 1(Infrastructure Delivery) as they meet the aims of the adopted OCC Rights of Way Management Plan 2015-2025. Where development sites are crossed by public rights of way this can be addressed on a site by site basis as applications come forward. The Plan provides a reasonable amount of protection and potential for enhancement and mitigation. It also has the potential to significantly increase access for non-motorised residents and visitors which is fully supported.

The attention that is given to green infrastructure (GI), landscape and biodiversity in the plan and the detailed guidance that is given to these items within the individual site allocation briefs is supported.

Changes Sought

Reasons for Participation

The multi-functional nature of GI is frequently referred to. There would be value in highlighting more specifically the role that high quality Green Infrastructure can play in the health and well-being of communities, climate change, water management and landscape design. For example: i) At para 5.67 / 5, the following requirements could be added: • integrating with sustainable urban drainage systems • creating high quality and distinctive local landscapes that can be sustained in the long term. ii) At para 5.69 the following requirements could be added: • enhancing the health and well-being of individuals and communities. iii) Policy PR5 could include the following requirements: "Applications will be expected to:- • demonstrate how green infrastructure has been designed to contribute to the future health and wellbeing of people in the locality; • demonstrate how green infrastructure has been designed to help communities adapt to future climate change." The site specific policies state "The application(s) shall be supported by the Biodiversity Impact Assessment (BIA) based on the DEFRA biodiversity metric (unless the Council has adopted a local, alternative methodology) to be agreed with Cherwell District Council". It should be noted that Thames Valley Environmental Records Centre have recently issued a biodiversity metric, based on the DEFRA metric, that is specific to Oxfordshire. It would be helpful to refer to this specifically."

Comments

The failure of the Plan to recognize and accurately define the nature of the unmet need in Oxford undermines its contention that there is an "exceptional case" justifying removing land from the Green Belt. The Plan can only make its case by obscuring the facts contained in its own Evidence Base. National Planning and ministerial guidance have made it clear that unmet need by itself does not constitute an exceptional circumstance. Oxford's circumstances are indeed unusual, but their unusual nature is rooted in the imbalance in the housing market that has priced most local people out of the market, plus the failure of the authorities to come up with policy prescriptions to help redress this imbalance. Instead, Oxford City Council is attempting to "export" its problem by inciting the surrounding Districts to engage in a huge and unsustainable building program.

Emphasize the point that Oxford's 'unmet need' is principally for affordable housing. Addressing that need through a massive program of additional housing, purely in order to generate affordable housing as a by-product of that additional construction, is using the bluntest of instruments to address a difficult and complicated problem. It promotes unsustainable growth in market housing supply, with severe consequences for economic, social and environmental sustainability. To do this anywhere would be irresponsible; to do it on Green Belt land would be reckless indeed, as well as being in clear contravention of the national Planning Practice Guidance.

Changes Sought

Reasons for Participation

The Plan can only be made Sound by addressing the issue of sustainability - and that means addressing the issue of housing affordability in a wider context than that of new construction. This approach would deliver thousands of unnecessary market homes to Cherwell - a result that flatly contradicts the guiding principle of sustainability in National Planning Policy. The Plan can only be made Sound by recognising the whole range of data in the Evidence Base and basing action upon a reasonable interpretation of that data, rather than cherry picking and misrepresenting data in the tendentious fashion of the Plan as currently presented. It must be noted that certain documents in the Evidence Base, notably the Sustainability Appraisal, are compromised by the fact they explicitly proceed from such tendentious misrepresentations.

The Tripartite strongly supports the summary of exceptional circumstances identified by Cherwell District Council as set out in paragraph 5.17 on page 66 of the Proposed Submission Plan as justifying the removal of land from the Oxford Green Belt in accordance with national policy as set out generally in the NPPF and other national guidance..In addition, the Tripartite supports the additional, more site-specific exceptional circumstances referred to in Policy PR8. This identifies some of the economic, transport, sustainability, topographical and other characteristics of the land at Begbroke that justify its allocation for the creation of a new, balanced, high quality, innovation-led, cohesive community in the Local Plan Partial Review. This is both on its own merits and when considered against reasonable alternatives, sustainability objectives and national policy in the NPPF and other documents. These include Paragraphs 83 and 84 of the NPPF, advice in Planning Practice Guidance and the Housing White Paper – ‘Fixing our broken housing market’ (2017). It has also been already established (through the adopted Cherwell Local Plan 2011-2031 Part 1) that ‘exceptional circumstances’ exist to justify a small-scale local review of the Green Belt to meet employment and expansion needs at Begbroke Science Park. See Policy ESD14: Oxford Green Belt in the Local Plan Part 1, which is supported by the Council’s Employment Land Review (2012), the Local Plan Part 2 and the report by LUC with BBP Regeneration “Small-Scale Green Belt Review Accommodating High Value Employment Needs at Kidlington/Begbroke in Cherwell District” (November 2016) which concluded that approximately 14 ha was required to accommodate about 45,000 sq. m of B class employment uses and that this would not harm the Green Belt if the Science Park was extended to the north, east and west as shown indicatively on the Policies Map accompanying Policy PR8. The Plan at Paragraph 5.17 (7) refers to the Science Park as a ‘facility of international significance and..of great importance to the local and Oxfordshire economy.’ Detailed comments on National Infrastructure Commission (NIC) provided. Although not explicitly set out in Paragraph 5.17 of the Plan, it is clear that Oxford City is unable to accommodate all of the housing it requires to meet its objectively assessed needs because of significant constraints as a consequence: of flood risk areas; heritage assets and their settings; open areas that contribute significantly to the character of the City; nature conservation assets and a tightly constrained boundary adjacent to neighbouring local authorities. It is also clear that in order to meet the significant unmet need for homes (and affordable homes) which cannot be accommodated in Oxford there needs to be proximity to the City, which continues to be a major employment generator, service centre, retail focus and hub of academic, research and other activity. This points to new homes being provided close to centres of employment, railway stations, park-and-ride facilities, Oxford Airport, existing communities, transport corridors (North Oxford/A44 corridor) in order to be sustainable, meet the community’s need for homes, offer a high quality of life, promote healthy lifestyles, facilitate access to jobs, reduce the need to travel by car and be served by community facilities and services. Access to transport modes other than the car is crucial and the North Oxford/A44 transport corridor provides this to link homes and jobs. To do otherwise would create longer distance commuting into and out of Oxford due to the Cherwell Local Plan 2011-2031 (Part 1) - Partial Review – Oxford’s Unmet Housing Need –Proposed Submission Representation Form significant employment provision in the City. This would add to greater use of the car, more vehicle miles, congestion, carbon emissions and other detrimental impacts upon the environment (e.g. reduced air quality, pollution, etc.) Although not explicitly set out in Paragraph 5.17 of the Plan, it is clear that Oxford City is unable to accommodate all of the housing it requires to meet its objectively assessed needs because of significant constraints as a consequence: of flood risk areas; heritage assets and their settings; open areas that contribute significantly to the character of the City; nature conservation assets and a tightly constrained boundary adjacent to neighbouring local authorities. It is also clear that in order to meet the significant unmet need for homes (and affordable homes) which cannot be accommodated in Oxford there needs to be proximity to the City, which continues to be a major employment generator, service centre, retail focus and hub of academic, research and other activity. Access to transport modes other than the car is crucial and the North Oxford/A44 transport corridor provides this to link homes and jobs. To do otherwise would create longer distance commuting into and out of Oxford due to the Cherwell Local Plan 2011-2031 (Part 1) - Partial Review – Oxford’s Unmet Housing Need –Proposed Submission Representation Form significant employment provision in the City. This would add to greater use of the car, more vehicle miles, congestion, carbon emissions and other detrimental impacts upon the environment (e.g. reduced air quality, pollution, etc.) Land around the Science Park has the advantage of being on a key transport route (A44 premium route) with excellent opportunities to provide enhanced public transport services, park-and-ride, a rail halt, convenient cycling and footway facilities and easy access to Oxford Airport. The Science Park already generates some 500 jobs and with further expansion offers the sustainable prospect of co-locating housing and employment, which can reduce vehicle movements and commuting by private car. There is also the scope to improve facilities for existing residents in Kidlington, Begbroke and Yarnton (rail halt, community facilities, jobs) to improve the quality of life, travel options and access to facilities of those living in existing communities. In line with the Housing White Paper, the removal of land from the Green Belt will result in compensatory improvements to the environmental quality or accessibility of remaining Green Belt land, with more generous ‘green infrastructure’ contributions than can normally be secured from development as a consequence of land being released from the Green Belt. These are all ‘exceptional circumstances’ justifying the removal of land from the Green Belt to the north of Oxford/along the A44 and the allocation of land at Begbroke via Policy PR8.

Changes Sought

None except to note the elaboration of ‘exceptional circumstances’ set out.

Reasons for Participation

The land owned and controlled by the Tripartite comprises some 86% of the largest draft allocation within the Plan and as such, occupies a unique and vitally important role in meeting Oxford's Unmet Housing Needs. As such, the Tripartite consider it is essential that it is present [and/or represented] and participates at the Examination in order to assist the Inspector by responding to any queries that may arise and supporting the assessment of the soundness of the Plan.

Comments

Reference to the Housing White Paper regarding exceptional circumstances. The lack of a formal definition of exceptional circumstances in the NPPF has resulted in some case law. Reference to case laws.

Changes Sought

For the reasons given above AND the Representations made by the Begbroke & Yarnton Green Belt (BYG) Campaign which are additionally supported, the Plan in its current form cannot be changed to make it legally compliant or sound and should therefore be withdrawn and NOT be submitted for Inspection.

Reasons for Participation

Would like the Begbroke & Yarnton Green Belt (BYG) Campaign to represent at the Examination should it take place.

Comments

The Green Belt has been designated as an amenity for everyone, to prevent urban sprawl and preserve the separate identity of local towns and villages. Green Belt land should only be built upon in exceptional circumstances and should not be included in the development plan. We owe it to future generations to preserve our dwindling green spaces.

"Paragraph 5.17 of the review document refers to ""The exceptional circumstances for the removal of land from the Oxford Green Belt"" The reasons given are largely speculative, spurious and specious and in no way offer sufficient justification for the incursion into green belt land that is being proposed. A detailed critique of each exceptional circumstance is provided. These 12 statements are posited as the central arguments for removing land from the green belt. Few of them stand up to anything above a perfunctory examination and virtually all of them are rooted in extreme speculation, nationalism and doubletalk. They do not meet anything like the level of proof required to claim exceptional circumstances required by the NPPF and consequently are not positively prepared, not justified and are unsound."

Changes Sought

Reasons for Participation

To have an opportunity to make a personal representation at the appropriate time and when further information is available about the scale of response to these plans. There will likely be many changes in circumstances between the submission of representations and the consideration of the outcome. I would like to be able to add additional relevant information at that time if appropriate. Also as Green Party Parliamentary candidate for many parts of the area under consideration I feel I should be able to give voice to the views of the Green Party supporters and voters when the time comes.

Flooding - New infrastructure including roads, add to flood risk as part of urban development and there has been an increase of incidences of flooding in the Yarnton area over the past several years. The building of nearly 2000 new dwellings on open farmland can only serve to increase the likelihood of flooding in an area already prone to these events. Other Infrastructure - An increase in population will require additional services such as schools, doctors and other health facilities. There is no mention about additional health service provision.

Comments

The representations are submitted on behalf of my client Bonnar Allan with regard to their proposals at New Alchester. The land is identified in the Vision document attached to these representations and will include up to 7,200 new market & affordable homes, primary & secondary schools, creation of a 240 acre country park & watersports centre & the potential to incorporate a new Park & Ride site with connection to the railway line south of Bicester by a new railway station. Our comments on the PSP are confined to issues of soundness. A summary of the alternative Options A to I that CDC considered at the last stage of the Plan is set out at paragraph 2.12. For the reasons we set out in our representations to that stage, we consider that the CDC's proposed approach of allocating land to the north of Oxford & within the Green Belt (GB) around Kidlington as set out in Figure 10 is flawed, & that the Partial Review does not pass the test of soundness. The PSP is not Justified as in our view it does not represent the most appropriate strategy for meeting Oxford's un-met housing needs. The logic that appears to underlie the PSP is in essence that the closer the proximity of the required housing to the City, the more sustainable it will be. This logic ignores the fact that there would be better prospects of residents travelling into Oxford as well as the major employment locations in the Science Vale by public transport including by rail from New Alchester. The preferred locations around Kidlington will increase congestion on the highway network & will result in the loss of GB & lead to coalescence between Kidlington, Begbroke & Yarnton, whereas the proposals at New Alchester are located beyond the GB. As we make clear in the Vision document, our proposals can be delivered in a phased manner & there are no impediments to early delivery. The scale of the proposals at New Alchester allows it to meet both the identified needs of Oxford City as well as an element of the future needs of Cherwell District, & in so doing, we recognise the journey that this proposal involves.

Changes Sought

Reasons for Participation

We consider that the PSP should direct a majority of the un-met need to New Alchester which constitutes a more sustainable & justified location for the new homes needed both to meet the City's un-met needs as well as future need within Cherwell District. The PSP should be re-drawn to allocate land at New Alchester in place of the proposed allocations in the Green Belt (GB) around Kidlington. New Alchester can provide a highly sustainable location for the much needed development, at a location outside the GB & on the railway line into Oxford. The development would facilitate creation of a new railway station at New Alchester which would encourage people to travel to Oxford City & also other employment centres within the Science Vale by public transport.

Proposed Submission Plan - Section 5 (Other)

PR-C-1399	10/10/2017	Ms Jennifer	Mitter	Lichfields on behalf of The Church Commissioners for Englan	N		N	Y

Comments

The overarching spatial strategy being pursued by the Council within the Local Plan Partial Review is summarised in Table 4 and Figure 10, with supporting text provided in Paras 5.1-5.18. This strategy defines the direction of the plan and sits behind each of the draft policies contained within it. The Church Commissioners for England (CCE) has reviewed this strategy and considers it to be fundamentally flawed and thus undermines the remainder of the plan. In particular, CCE objects to the concentration of development around the Kidlington /Yarnton/ Begbroke area and, as set out in our representations to Policies PR3 and PR4a, it is considered that this is not the appropriate strategy for delivering new homes and is unsustainable. The Council has not adequately considered all reasonable alternatives. CCE has submitted representations to previous iterations of the Local Plan Part 1 Partial Review including to the Options consultation and Call for Sites in January 2017. In addition, a submission was made to the NIC Call for Sites in August 2016. These representations demonstrated that Islip is in a highly sustainable location and is, therefore, a suitable location to direct additional growth. Its sustainability credentials are exemplified by the high score that it achieves in Cherwell’s Village Categorisation Update (2014) – meeting seven of the eight criteria: nurse, primary school, retail service, food shop, public house, recreational facilities, village and community hall. In terms of CCE’s land, the representations submitted by CCE in January 2017 demonstrate the ability to develop a ‘holistic vision’ for Islip by bringing forward important infrastructure in the form of a new link road around Islip, a potential new school, community facilities and shops, improved cycle links (Oxford is circa 40 minutes cycle) and a significant amount of new homes and jobs. The vision presented recognises the existing qualities of Islip and identifies potential opportunities for its long term position within the context of the Cambridge – Milton Keynes – Oxford ‘growth corridor’. The key benefits of development at Islip are listed. As is apparent from the published HELAA, Islip has been overlooked to date due to its location within the Green Belt. However, as referenced in CCE’s representations to Policy PR3, there is a significant gap in the Council’s evidence base which has meant that a thorough exploration of the reasonable alternatives has not been undertaken. In this regard, it is considered that the lack of development directed towards Islip is a clear oversight and missed opportunity which can now be rectified through these exceptional circumstances which justify releasing land in the Green Belt. Although in Green Belt, CCE’s sites in Islip are not located in any particular landscape designation, are located outside of the AONB and their release from Green Belt would not result in coalescence. Importantly, Islip is ideally located to allow for a strategic release of land which would be sustainably connected by rail to major settlements such as Oxford, Bicester and London, but that would not lead to the ‘outer growth’ of Oxford or merging of towns or villages. It is notable that the published HELAA assessed land parcels HELAA145 and HELAA146 within Islip as being suitable, available and achievable for circa 205 residential units. The wider site (HELAA249) submitted by CCE appears to have been marked down due to its location in the Green Belt and a perceived impact on the landscape, character and setting of the village. However, no detailed assessment has been undertaken and this has not been appropriately weighed in the planning balance with very limited consideration given to the benefits of locating development adjacent to an existing rail station on a mainline route. As a significant and sole landholder, sites within CCE’s ownership could deliver development quickly at varying scales from circa 100 units on a single discreet parcel to a new settlement of circa 1,700 units. Soundness - The evidence base prepared to support the spatial strategy (as defined within Table 4 and Figure 10) is not sufficiently robust to justify the approach being progressed in the draft Local Plan. The overarching spatial strategy is therefore flawed with all proceeding policies undermined. The key issue with the strategy is the proposed over concentration of housing within a relatively small market area with known congestion issues. The Plan has failed to consider the reasonable alternatives and is unsound. The draft Plan is not Effective due to overcentration of growth in one area and is unsound. The spatial strategy for growth is flawed with significant gaps in the evidence base, a misdirected onus on the road network improvements over rail and a lack of thorough exploration of the reasonable alternatives. The Plan is not consistent with national Policy as unsound.

Changes Sought

The Council needs to reassess the overarching spatial strategy as defined within Table 4 and Figure 10. Reassessment of the proposed Green Belt release sites is required, to include Green Belt release at Islip for housing.

Reasons for Participation

Due to the complexity of the matters discussed in relation to the Spatial Strategy

PR-C-1408	10/10/2017	Andy	Pearce	Barton Willmore on behalf of A 2 Dominion Housing Group Lt	N		N	N	Y

Comments

A2D do not consider Option A ‘Kidlington & Surrounding Area’ and Option B ‘North & East of Kidlington’ to be suitable. Growth in these areas would be inconsistent with the existing Local Plan growth strategy. CDC should have a single growth strategy, which responds to both Oxford and CDC’s housing needs. Growth areas should focus on key settlements as identified in Cherwell’s settlement hierarchy. Opportunities to intensify development at existing allocations should be explored. A2D notes that allocated sites identified to meet Oxford’s unmet needs are set out in Table 4. These equate to exactly 4,400 units. The current proposed allocations allow for no flexibility if additional need is identified. Furthermore, it builds in no flexibility if sites are delayed in coming forward. This would put the Council at risk of departure applications, which can result in piecemeal development across the District, contrary to NPPF paragraph 17. CDC should clarify whether the number of homes identified for each allocation reflects each site’s total capacity.

Changes Sought

Reasons for Participation

Our objections in part relate to the proposed growth strategy to address Oxford City’s unmet need, which we consider to be unsustainable and inconsistent with national policy. This is contrary to the adopted Growth Strategy set out in the Cherwell Local Plan 2011-2031 (Part 1), which focuses new development at key settlements, as identified in Cherwell’s settlement hierarchy. The Council has not discharged its duty to demonstrate exceptional circumstances to release the identified sites from the Green Belt, pursuant to paragraph 82 of the National Planning Policy Framework. Further, there is insufficient evidence to suggest that opportunities to increase capacity at existing allocated housing sites have been robustly tested. Finally, there should be a single housing requirement for the Cherwell Local Plan. There is no justification for a separate figure to be applied to meet Oxford City’s unmet need, as is currently proposed.

PR-C-1450	10/10/2017	Mark	Rose	Define Planning & Design Ltd on behalf of William Davis Ltd	Y		Y	N	Y
-----------	------------	------	------	---	---	--	---	---	---

5204

Comments

Whilst Policy PR1 identifies the scale of Oxford’s unmet housing need to be provided for in the District, the Submission Plan does not actually include a policy that clearly sets out the proposed development strategy that will be implemented in order to address that need. The Submission Plan simply jumps to the allocation of specific sites, and consequently there is no clear demonstration that the housing requirement referred to in Policy PR1, which itself should be regarded an absolute minimum, will indeed be met within the plan period. William Davis are firmly of the view that a District wide approach that reflects the development strategy embedded within the extant Part 1 Local Plan is needed to complement the release of sites from the Green Belt close to Oxford and maximise the contribution the District makes to accommodating Oxford’s unmet housing needs. Moreover, as part of that strategy, Bloxham could and should accommodate further growth within the plan period, and the land to the east of South Newington Road would be an entirely appropriate site option to deliver the required housing. A detailed Transport Assessment and Flood Risk Assessment have been submitted together with a comprehensive justification for the allocation of this site within the Local Plan. For the reasons set out above, William Davis Ltd, therefore, object to Policy PR1, which is considered unsound on the basis that it:

- has not been positively prepared and does not ensure that the unmet development requirements arising in Oxford will be met within the plan period;
- is not justified in that it is not the most appropriate strategy and has not properly considered reasonable alternative strategies; and
- is inconsistent with national policy in that it does not fully reflect the Government’s priorities and policies in terms of boosting the supply of housing to meet identified needs.
- is not effective in that some allocations sites cannot be delivered in their entirety within the plan period as the Submission Plan currently assumes, and the identified needs will not therefore, be met.

Changes Sought

Add a new policy that sets out the development strategy and the sites to be allocated to meet the minimum level of Oxford’s unmet need identified in Policy PR1 based on a robust housing trajectory.
The strategy should provide for the allocation of a portfolio of sites at sustainable settlements, notably the Service Villages.
The sites to be allocated for residential development should include:
- Land to the East of South Newington Road to the south of Bloxham for the delivery of 150-175 dwellings.
Also refer to objection to Policy PR1.

Reasons for Participation

This matter is critical to and a key element of the development strategy that underpins the Proposed Submission Plan.

4625	Comments							
Whilst there is a need for affordable housing in Oxford, the figures are exaggerated and not as great as suggested. New government figures suggest a lower need than claimed. Oxford has not tried hard enough to find suitable sites near or within the city. Where sites have been found, they have been dismissed on grounds of being too small, having no landowner interest or some other reason. There are suitable sites that would satisfy this unfounded need:-- The "Northern Gateway" should be housing and not industry – near to Oxford than Begbroke or Yarnton.- Although in Green belt - Frieze farm would be better for housing (near to city than Begbroke or Yarnton)- Build on North Oxford Golf course – nearer to Oxford- A planned golf course on Frieze Farm could be sited elsewhere –permitted in the green belt.- Industrial City sites reserved for employment such as Blanchford's in Headington (near to healthcare employment centres such as hospitals)and Blackwell's in Marston Street could be used by moving the business to industrial parks out of residential areas.- Southfield Golf Course could be built on to provide low cost housing –near to hospitals. This is a large site – recently permission has been granted to build on nearby land.- Playing field at Meadow lane Donnington is an ideal site. Near to transport links/employment and has Iffley Meadows and Rivermead Nature park for residents' enjoyment.- Oxford Greyhound Stadium and The Kassam stadium areas are ideal for residential development and near to a science park.- When Brookes campus relocates to Oxford – Wheatley campus would make good key worker accommodation.- Eastwyke Farm is another site with potential. Begbroke is 5.2km (3.3 miles) from 5 Mile Drive, Oxford. Other sites are within the city boundaries or nearer. It would make more sense to develop land near to the city and to areas where it is claimed housing is needed and near to employment. (Headington and Cowley). The relationship of the proposed development areas will generate housing need in this area – not Oxford. This "relationship" is more easily argued for Oxford and Littlemore Science Park as one example. Existing industrial development of Langford Locks has forever altered this stretch of the Oxford canal alongside Rushy Meadows, a group of canal-side meadows at Kidlington that have escaped agricultural improvement and are a protected habitat. Meadows such as this are a national priority for conservation and nearby development is bound to have a profound effect. Why the need for a 'cautious approach' on land outside the Green Belt at Woodstock due to the presence of international and national heritage assets? Plenty of properties near Buckingham Palace and similar sites – what is the difference? Huge costs are involved and it will attract further traffic and problems to exacerbate those existing now. There is no explanation of what is meant by strengthening Kidlington village - it is popular and satisfactory now. We have access now to wide open areas not just narrow corridors of green that will inevitably become busy. Coalescence of villages is exactly what the Green Belt is there to protect against. We believe this is just a means of exploiting the potential of land that is much easier to develop than brownfield sites and capitulating to the views of Oxford University, colleges and others that own land at the sites and the developers that wish to profit. We consider Oxford's requirements not sound or justified. They are based on old data before the implications of the EU referendum and before the latest government housing need projections. WE do not believe this review is about Oxford's unmet housing need. CDC could gain from a substantial New Homes Bonus Grant. Oxford have explored housing within their own boundaries and found easy reasons to dismiss them. They have dismissed many smaller sites in the city such as Northfield House, Sandy Lane West, Littlemore. Other sites in the county such as Bicester Sites A&G Blackthorn and Arncliffe have massive housing potential.

PR-C-1473	10/10/2017	Debbie	Dance	Oxford Preservation Trust	Y	N	N	Y
5220	Comments							
Once established, Green Belt boundaries should only be altered in exceptional circumstances (NPPF, para. 83). OPT acknowledges that CDC has a legal duty to cooperate with neighbouring authorities; that Oxford cannot meet its housing needs from within its administrative boundary; & that consequently, a review of the Oxford Green Belt is justified in terms of seeking to meet that unmet need in sustainable locations close to the City. OPT notes also the exceptional circumstances listed at paragraph 5.17 in the Proposed Submission Plan. However, while these might be justified, regard must also be had to striking a balance between the requirement for housing & the obligation to preserve the special character of historic Oxford, one of the key components of which is its green setting and the separation between the City & surrounding towns and villages. In our view, if the Local Plan Examination eventually determines that there are exceptional circumstances sufficient to justify land being taken out of the Green Belt, then some compensation land should be provided, which provides publicly accessible green space & improves biodiversity, together with measures to ensure that this is permanent. In addition OPT would want to see higher contributions put towards enhancement of existing Green Belt & any new local areas of permanent open space as stated at NPPF Paragraph 81 " local planning authorities should plan positively to enhance the beneficial use of the Green Belt, such as looking for opportunities to provide access; to provide opportunities for outdoor sport & recreation; to retain & enhance landscapes, visual amenity & biodiversity; or to improve damaged & derelict land."								
Changes Sought				Reasons for Participation				
				"OPT considers that there are important matters relating to the soundness of the plan that need to be discussed at the Examination and therefore wishes to reserve the right to participate at the Oral Examination. We take a forward thinking and positive approach to development, looking to influence change rather than stopping it. We are recognised as a professional and experienced voice, able to speak with conviction on matters relating to landscape, views and the impact of development on the city of Oxford and its green setting and surrounds, and are committed to ensuring that Oxford can continue to flourish and prosper, whilst protecting its historic character and setting."				

PR-C-1542	10/10/2017	Cllr Andrew	Gant	Oxford City Council Liberal Democrat group	Y	N	N	Y
4847	Comments							
The plan talks in several places about provision of balanced housing. It uses the term "affordable" in a variety of ways, sometimes in inverted commas. The plan should be clear where it means social rented housing. Specific to this point, there is reference at several places to a good balance between "affordable", market and "key worker" housing. However there is no commitment to the detail of how "key worker" housing will be provided. Planning matters such as size, density, tenure, ownership, price, qualification and other factors are simply ignored. Without them the commitment to "key worker" housing is meaningless, and the policy and associated statements cannot therefore be regarded as sound. The plan states that it will use Oxford City's percentages of housing types, and that it expects this policy to deliver balanced communities. It will not. Barton Park has delivered a large amount of much-needed and extremely welcome housing for social rent, and a slightly larger amount of market housing, currently priced at an average of £450,000. There is therefore no housing for those who do not qualify for social rent, and cannot afford the market prices. This accounts for the large majority of people in Oxford and surrounding, including "key workers" and others who represent the real housing need for Oxford. This model does not provide for them. If the plan aims to provide social rented housing, market housing, and little in-between, it should say so. The current plan does not meet its own aspiration to provide sufficient homes for those on average incomes. It cannot therefore be regarded as sound								
Changes Sought				Reasons for Participation				
The plan must give more detail in planning terms of how the aspiration to house "key workers" and others on average incomes is to be met.				To ensure full representation of the views and concerns of local people by their elected representatives				

PR-C-1615	10/10/2017	Victoria	Carruthers					
5528	Comments							
Objections to the proposed submission plan to build 4,400 houses in Kidlington using the identified parcels of land outlined in the Partial Review. Land will be permanently removed from the Green Belt to satisfy the development plans. Government guidance states land may be permanently retired from the 'permanently designated' Green belt in exceptional circumstances. Oxford's unmet housing need is not an exceptional circumstance. Brownfield sites in Oxford city centre have not been exhausted, the provision is way in excess of what is actually needed, and points further below that suggest the development will actually be ineffective in relieving Oxford of its unmet housing need.

Objections to the proposed submission plan to build 4,400 houses in Kidlington using the identified parcels of land outlined in the Partial Review. 'Cart before the horse' - there is no defined plan to provide the infrastructure required to support the 4,400 new homes. Quote from a Guardian Editorial on using the green belt for development: 'Legitimate interests have to be balanced, land well used and things such as schools, roads and open space provided for'. Taking traffic as an example, there are already serious issues with getting into Oxford from Kidlington at many times of the day. The largest parcel of land with >1,800 homes proposed is directly on either side of this main road into Oxford, which is already busting at the seams. How will this road cope with another 1,000+ cars trying to filter on to it every rush hour, along with the other thousands of new road users created by the other developments? It's an absolute disaster waiting to happen. That's even before considering the school places, GP places, dentists, water services, that will be needed from day one but not supplied, and worsening of air pollution (already in the knowledge that Oxford is one of the most polluted areas in the UK). Even if we accept development needs to happen, we can not accept that the infrastructure to give residents a minimum standard of support to live their day-to-day lives would simply not be factored in.

Opposes the additional 4,400 Housing Development Areas - Yarnton, Begbroke & Kidlington. When do you say "enough is enough". Our green & pleasant land is diminishing through the building of houses. It will never be returned to us. Britain is / was re-known for its pubs and villages, with its beautiful countryside. Most of the pubs are now gone, built on with flats, houses and supermarkets. How much more land should be sacrificed? Villages are being expanded to more than their capacity, until they can no longer be called villages. But how far do you go before it's stopped? Green belt land is there for a good reason, and is unbelievably being challenged as if there will be no consequences. We feel it's unfair that Oxford University should have more say than the residents of these villages. All too often we hear that houses have been built on the Thames Flood Plain, and then a solution has to be found when problems arise. It will be the same for some of these areas. It is impossible not to see or be affected by the growing gridlock of traffic at peak times or when there are shows / events on at Blenheim Palace etc. now, yet alone if there were even more traffic! Is there to be yet more congestion? The transport infrastructure can never be made to cope with expansion to hold more. Local facilities will suffer. Doctors, schools, police, fire, ambulances and shops will be unable to cope. Waiting time for the doctors at present are two to three weeks, unless an emergency appointment is made. Any social housing being incorporated in these plans will bring additional crime and antisocial behaviour. Our insurance premiums will go up and our house prices will surely go down. We understand how fortunate we are to live in Yarnton ourselves, but like most people here we did pay a 'HEFTY' premium to do so. This was far from easy for us as we could barely afford it. We moved from the Headington area due to the ever growing dense housing and population. We believe the different councils should communicate and convene more with each other. The Oxford City Council has just built just 12 luxury flats on the old Northway School site. Surely with such shortage of standard houses, this site would have been ideal for 100+ houses. Could this be happening all too often? Why should the 'protected' green belt boundaries be reduced when this must be happening everywhere? Then a decision of 'exceptional circumstances' would not apply to this situation.

Objection to using Kidlington Greenbelt land. Daily walks with dog on the Green Belt areas would be a great loss of pleasure. The villages do not have the infrastructure to support this expansion without serious loss of standard of services delivered (Schools / Roads / Doctors). Traffic gridlock already very bad, which will only increase and cause increased noise and air pollution. If this is not stopped now-where will it end, not until all the countryside habitat is gone.

	Particularly object to PR1(a) and PR3. There is seemingly plenty of land on unused property in Oxford itself. If there is a need for more housing, this should be exploited first, before destroying the countryside. This decision seems to have been made on a financial basis with a number of organisations and people standing to make significant sums. The ultimate irony is destroying and building on a golf course (owned by a college in Oxford?) to then build a golf course later. It seems that the additional traffic has not been factored in to this plan, and the local infrastructure can only just cope as it is. Additional building will only bring more of the roads to a standstill.

It is based on out of date information and wildly optimistic assumptions, especially after Brexit. It also goes against Government policy to ensure fair distribution of economic prosperity nationwide. The 'Economy first' plan of Oxford puts economic expansion above the resulting destruction of several local communities in the cause of a 'housing need' that has yet to be proven.

Past experience proves that overspill-type schemes rarely go to plan or work properly. The plan is cheap social engineering with little consideration of existing communities. The latest mantra of 'affordability' and 'sustainability' has been corrupted to accommodate schemes that would otherwise have sensibly been rejected. The future of the GB is dire and makes that legislation totally unsustainable.

The plan largely assumes that most newcomers will have easy access bus travel to Oxford via the Rapid Transit route. There is no evidence that this system will either deliver the required numbers nor be a practical solution at rush hours. For many people travel to employment in Oxford will require a further onward journey within Oxford, thereby swamping the whole bus network there. This difficulty alone will make the plan self-defeating. Without a cheap, effective, reliable and convenient public transport scheme, the linkage between homes in Kidlington and jobs in Oxford falls apart, and the 'housing need' of Oxford will not get fully addressed anyway

Proposed Submission Plan - Policy PR1 - Achieving Sustainable Development for Oxford's Needs

PR-C-0231	31/08/2017	Kate	Nash	Hanwell Parish Council					
796	Comments								
The plan substantially overstates Oxford's total housing need and does not satisfactorily identify the amount that the Oxford might not be able to meet. Oxford is capable of accommodating all or almost all of it by switching land earmarked for business to housing instead. It is therefore premature for Cherwell to even start the process of accommodating it.

PR-C-0237	15/09/2017	Karen	East	TMP Planning Ltd on behalf of Gosford and Water Eaton Parish Council				N	Y
812	Comments								
Concerned that the figure of 4400 homes of which 1410 (32%) are within the Parish area is not appropriately justified given the impact on the Green Belt, the environment and infrastructure. The Parish has 676 dwellings so this development will lead to a 208% increase in the number of houses. Not convinced that this level of development can be delivered with the necessary transport and other infrastructure and without detrimental impact on both existing residents and those of the new communities. The policy goes on to state that proposals will be supported if they "comply with other material Development Plan policies" and "achieve sustainable development". It is difficult to see how the proposals are consistent with some policies of the existing Development Plan, notably Policy ESD13 of the adopted Local Plan, in terms of the impact on local landscape character. By increasing visual intrusion and harming the local landscape these development proposals would be contrary to these policies. Policy ESD15 seeks to respect an area's unique built, natural and cultural context. Development on the scale proposed which will increase the number of houses within the Parish by 208% will not secure this goal. Similarly, for the reasons set out above in terms of impact on local communities and the environment the proposals would not achieve sustainable development and would not be consistent with the National Planning Policy Framework.									
Changes Sought					Reasons for Participation				
The scale of growth proposed at 4400 dwellings is too high and needs to be reduced to better achieve sustainable development. The Parish Council considers that any further development will lead to detrimental effects on the community and environment. However,if development has to be accepted then growth should be restricted to no more than 25% of the existing number of dwellings within the Parish.					The Parish Council would wish to take part in order to explain the potential impact of the proposed development on local communities and why this should be better reflected in the draft vision.				

PR-C-0253	10/10/2017	Layla	Moran, MP				Y	Y	N	Y
1985	Comments									
Object to Policy PR1(a) to build 4,400 houses in this area for Oxford overspill. This is not a proven requirement and not justified. It is based on a highly inflated estimate of housing need in the county. It is unsustainable. It would hugely worsen traffic problems and pollution. Schools and health services would be overstretched. The Green Belt's open countryside in which nearly 4,000 of the houses would be built would be sacrificed for ever and its walks and views lost. Natural habitats and wildlife would be destroyed. Oxford City Council has been allocating land in the city for employment instead of for housing. It has ignored the impact on surrounding Districts and failed in its duty to cooperate. The City Council should do more to meet its own needs.										
Changes Sought					Reasons for Participation					
In light of the Government's consultation on its new approach to housing assessment, Cherwell DC should halt the current process and reassess its figures before continuing. If or when the process does continue, housing development on this scale is not justified on Green Belt sites around Kidlington, Yarnton and Begbroke and alternative sites in the district should be reassessed. Local residents strongly express the view that should building happen on the Green Belt, it should be a last resort, meet local need, is fully supported by infrastructure and be affordable to the community. This plan meets none of these criteria.					In my role as Member of Parliament for Oxford West & Abingdon constituency, which includes Kidlington, Yarnton & Begbroke, it is my job to represent the views of my constituents at the Examination.					

PR-C-0265	09/10/2017	Ellis	Davies				N	N	N	Y
5537	Comments									
Can't see any exceptional evidence on what basis that 4,400 homes are justified and is a proven requirement for Oxford. There is much scope for Oxford to meet its unmet demand. a) Oxford has its priorities wrong in that it is using its brown field sites for business development rather fulfilling its housing needs. b) Oxford needs to set higher densities by better, innovative and judicious use of the building plots that become available. This entails taller buildings, under-ground parking, conversion of existing low density stock and other innovative ways of achieving higher densities. There are many historical cities in Europe that have far higher densities than Cambridge or Oxford and still maintained their character and have far better infrastructure and public transportation. Cambridge city has been cited as having done more to achieve higher density than Oxford city. Even in the last few years Oxford City has failed to construct houses at greater density. There are houses recently built that are no more than two storey high when they could have easily have been much higher without any detrimental effect on views or the local ambience. C) The conversion of existing stock to make better use of land and space. There should be schemes to convert existing low rise houses to those that are taller with multiple storeys in a style such as Edwardian Mansions as seen in London and on the continent. D) There are many sites in Oxford that can be used for building housing, including Littlemore, rather than in the greenbelt. E) University of Oxford and colleges could make better use of their historic buildings for the public good rather than for the elites, which would ease the issues of Oxford needing more business building and wanting to build on the green belt for their own institutional expansion. A very high proportion of the planned development will be on Oxford University estate. They could be more innovative by building satellite or outreach places in the UK where there is a high degree of unemployment and much needed development i.e. North East of England and South Wales valleys for example. This would encourage those areas to improve with better employment prospects and encourage businesses to develop there. F) The university and the colleges could do much more with their property within the city rather than placing more buildings in prime agricultural land that is within the greenbelt. What are future generations going to think on the kind of example Oxford university is setting. G) Oxford should not be encouraging more business development on land within Oxford when it has not got the capacity to house the associated increases in the resulting population. It should prioritise fulfilling the existing housing needs before bidding for more business developments. There doesn't seem to be a coherent transport policy or a purposeful infrastructure to meet the current needs without the future needs of new developments. H) It is totally unfair that Oxford will protect its own green belt and green spaces but expects the surrounding areas to destroy their green belt and green amenities for their enhancement. This will be at the expense of sacrificing Begbroke, Yarnton and Kidlington merging them into a conurbation. i) Building within the city would reduce the need for commuting, less pollution, closer to employment and local facilities. Building in the greenbelt will mean more commuting, exporting pollution to Begbroke, Yarnton and Kidlington. Need to build more infrastructure and facilities for people to live. J) Even in the last few years Oxford City has failed to construct houses that can be more than two storeys high when it could have easily have been done. Building densities are much too low for a modern city especially when compared to European cities. K) There isn't much evidence that Oxford City supports the greenbelt. Its attitude to the greenbelt is that it is a resource to build on if it is not within the city's boundary. It expects the surrounding district to support them yet there is no evidence that Oxford supports the districts that surround it.
