

Appendix 1 – Economic Commentary and outlook provided by Arlingclose (8/7/20)

External Context

Economic background: The UK's exit from the European Union took a back seat during the first quarter of 2020/21 as the global economic impact from coronavirus took centre stage. Part of the measures taken to stop the spread of the pandemic included the government implementing a nationwide lockdown in late March which effectively shut down almost the entire UK economy. These measures continued throughout most of the quarter with only some easing of restrictions at the end of May and into June.

Bank Rate was maintained at 0.1% despite some speculation that the Bank of England's Monetary Policy Committee (MPC) might cut further and some MPC members also suggesting that negative rates are part of the Bank's policy tools. In June the Bank increased the asset purchase scheme by £100 billion, taking the recent round of QE to £300bn and total QE to £745 billion.

At the same time, the government also implemented a range of fiscal stimulus measures totalling over £300 billion which had been announced in March and designed to dampen the effect of the pandemic on the labour market.

GDP growth contracted by 2.2% in Q1 (Jan-Mar) 2020 pushing the annual growth rate down to -1.6%. The lockdown only came into force on 23rd March, and the markets are braced for a dire set of growth data for Q2. In April UK GDP fell 20.4% month-on-month. On the back of the 5.8% month-on-month fall in March, this means economic output fell by 25% compared to its pre-coronavirus peak in February 2020.

The headline rate of UK Consumer Price Inflation UK Consumer Price Inflation fell to 1.2% y/y in May, further below the Bank of England's 2% target.

In the three months to June, labour market data remained largely unchanged on the previous quarter. This is likely due to the government's furlough scheme as more than a quarter of the UK workforce was estimated to be supported by it. The ILO unemployment rate remained unchanged at 3.9% while the employment rate fell to 76.4%. However, employers will have to contribute towards furlough payments from August and the scheme is due to stop at the end of October; unemployment is expected to rise as a result.

The US economy contracted at an annualised rate of 5.0% in Q1 2020. The Federal Reserve maintained the Fed Funds rate at between 0% and 0.25% while the US government announced a \$2 trillion fiscal stimulus package. Relations between the US and China, which had briefly improved when Phase 1 of the trade agreement was signed in January, deteriorated over the quarter.

With little room to move on interest rates, the European Central Bank maintained interest rates at 0% and the rate on the deposit facility (which banks may use to make overnight deposits with the Eurosystem) at -0.5% and announced a further huge, open-ended commitment to buy €600bn of bonds under its Pandemic Emergency Purchase Programme (PEPP) which can be reinvested out to 2022. This lifted the ECB's total bond buying support package to €1.35trillion.

Financial markets: After selling off sharply in March, equity markets started recovering in April and while still down on their pre-crisis levels, the Dow Jones and FTSE 100 and 250 have made up around half of the losses. Measures implemented by central banks and governments continue to maintain some degree of general investor confidence, however volatility remains.

Ultra-low interest rates and the flight to quality continued to keep gilts yields low over the period with the yield on some short-dated government bonds turning negative. The 5-year UK benchmark gilt yield dropped from 0.18% at the beginning of April 2020 to -0.06% on 30th June. The 10-year benchmark gilt yield fell from 0.31% to 0.14% over the same period, and the 20-year from 0.69% to 0.52%. 1-month, 3-month and 12-month bid rates averaged 0.04%, 0.28% and 0.44% respectively over the quarter.

Over the quarter (April–June), the yield on 2-year US treasuries fell from 0.24% to 0.20% while that on yield on 10-year treasuries fell from 0.63% to 0.61%. German bund yields remain negative.

Credit review: After rising sharply in late March, credit default swap spreads slowly eased over the quarter

but remained above their pre-crisis levels.

Fitch downgraded the UK sovereign rating to AA- in March which was followed by a number of actions on UK and also non-UK banks from early April onwards. This included revising the outlook on all banks on the counterparty list to negative, with the exception of Barclays Bank, Rabobank, Handelsbanken and Nordea Bank which were placed on Rating Watch Negative, as well as downgrading Close Brothers' long-term rating to A-. Network Rail Infrastructure and LCR Finance's long-term ratings were downgraded from AA to AA-. HSBC Bank and HSBC UK Bank were the exceptions however, with Fitch upgrading their long-term ratings to AA-.

Fitch affirmed the ratings of Canadian banks but revised their outlook to negative. The agency also downgraded the long- and short-term ratings of Australia's four largest banking groups. It upgraded the long-term deposit rating of both Bayerische Landesbank and Landesbank Baden-Wuerttemberg (LBBW) but downgraded the viability ratings, and revised outlooks to negative. Fitch later placed three Singapore banks on Rating Watch Negative.

S&P also took action on a range of UK and European banks, affirming their ratings but revising their outlook downwards due to the economic consequences of COVID-19. Moody's downgraded the long-term rating of Nationwide BS from Aa3 to A1 and S&P downgraded the long- and short-term ratings of HSBC Bank PLC and HSBC UK Bank PLC to A+ and A-1 respectively

In May, Fitch and S&P downgraded TfL's long-term rating to A+ from AA- after the 95% reduction in tube and train fares which make up 47% of TfL's revenue. However, the UK government agreed to a £1.6 billion support package which will help ease some of the stress TfL faces.

As the extent of the losses that banks and building societies will suffer due to the impact from the coronavirus epidemic remains uncertain but is expected to be substantial, in early June following Arlingclose's stress testing of the institutions on the counterparty list using bail-in analysis, a number of UK banks and building societies were suspended from the counterparty list for unsecured deposits. Although much better capitalised than before the 2007-09 financial crisis, under the current economic circumstances these entities were suspended for reasons of prudence. For those remaining on the list, the duration advice remains up to 35 days.

Outlook for the remainder of 2020/21

The medium-term global economic outlook is very weak. While containment measures taken by national governments in response to coronavirus are being eased, it is likely to be some time before demand recovers to pre-crisis levels due to rises in unemployment, the on-going need for virus control measures and the impact on consumer/business confidence.

The responses from the Bank of England, HM Treasury as well as other central banks and governments have been significant and will act to support the recovery when it occurs, by keeping financial conditions stable and many businesses solvent/employees employed than would otherwise have been the case. There will be an economic bounce in the second half of the year, as businesses currently dormant begin production/supply services once more.

However, the scale of the economic shock to demand and the probable on-going social distancing measures necessary before a vaccine is produced will mean that the subsequent pace of recovery is limited.

Arlingclose expects Bank Rate to remain at the current 0.10% level and additional monetary loosening in the near future through further financial asset purchases (QE). While the Arlingclose central case for Bank Rate is no change, further cuts to Bank Rate to zero or even into negative territory cannot be ruled out.

Downside risks remain in the near term, as households and businesses react to an unprecedented set of economic circumstances.

	Sep-20	Dec-20	Mar-21	Jun-21	Sep-21	Dec-21	Mar-22	Jun-22	Sep-22	Dec-22	Mar-23	Jun-23
Official Bank Rate												
Upside risk	0.00	0.00	0.00	0.00	0.00	0.15	0.15	0.15	0.15	0.30	0.30	0.30
Arlingclose Central Case	0.10	0.10	0.10	0.10	0.10	0.10	0.10	0.10	0.10	0.10	0.10	0.10
Downside risk	-0.35	-0.35	-0.35	-0.35	-0.35	-0.35	-0.35	-0.35	-0.35	-0.35	-0.35	-0.35

Gilt yields are expected to remain very low in the medium term. Some shorter-term gilt yields will remain around zero until either the Bank expressly rules out negative Bank Rate or growth prospects improve.
