What should its key Scoping Report that accompanies this	Question 14: Call for Sites - Do you wish to propose any sites for the Cherwell Local Plan Review 2040? What should its key Site promotion - Land off Bloxham Road, Banbury	Question 15: Preparing the Plan - Do you have any comments specifically on the Sustainability Appraisal Scoping Report that accompanies this	Question 16: Methods of Engagement - Are there any specific methods of engagement you would like us to consider in preparing the Local Plan	General comments
LPR-A-027	09/09/2020	Pegasus Group	Berwood Development Securities Ltd	In addressing the effects of COVID-19 the Council should require larger dwellings and broadband to account for home working.	The evidence required to underpin a Local Plan is significant and covers a number of broad metrics such as housing, the economy, transport and infrastructure, the natural environment and monitoring.	The identification of the affordability of housing as a key issue affecting the District is supported but the lack of the planning system in addressing the changes to the standard method, need to be considered. There should not be a blanket requirement for development to be at the top of the hierarchy; what the capacity constraints at Banbury, for residential growth, might be perceived to be (and how new planned residential development may assist in addressing them).	The key issues are absent in identifying: how the Local Plan Review might affect existing both market and affordable housing need at Banbury; what limitations are perceived upon strategic directions for future growth; what role Banbury should play in any future settlement hierarchy; what the capacity constraints at Banbury, for residential growth, might be perceived to be (and how new planned residential development may assist in addressing them).														
LPR-A-028	10/09/2020		Sibford Ferris Parish Council																		
LPR-A-029	10/09/2020		Defence Infrastructure Organisation																The MOD wish to continue to work closely with the Planning Authority to bring forward proposals to enhance and develop MOD sites and operational development and consider the scope for their rationalisation where appropriate. In line with the NPPF it is important that planning authorities and development plans remember that MOD Establishments are of strategic military importance to the UK. Operational development on MOD establishments should be supported. In turn, due to the need to maintain operational capabilities, development

LPR-A-031	10/09/2020	Bluestone Planning	Oxfordshire County Council: Estates and Strategy																		
LPR-A-032	10/09/2020	Sibford Gower Parish Council		There will be an increase in development of modern technology and work patterns will affect leading to more people working from home, which will help to reduce traffic flow and urban congestion, placing an increased emphasis on local communities for the wellbeing of our society. The revised planning proposals from government will serve to create and dominate the national climate and priorities for the development of the Local Plan 2040. Given the frequent changes and reversals by central government as they respond to the challenges of the pandemic, consideration should be given to a "coming together" of local Councils to create the opportunity for developing independent capacity at local level.	An on-going awareness of climate change, green infrastructure development and low carbon measures are key factors in leading to future proof society. The Cherwell Local Plan, while addressing local provision, must consider national initiatives to develop public awareness and understanding of the need for significant changes to our way of life.	While the term "affordable housing" is widely used, there needs to be a clearly defined understanding of the term "affordable" in the context of the Local Plan 2040. The Council should be pro-active in collaborating with CPRE Oxfordshire to protect agricultural land. It is vitally important that development has built-in safeguards which serve to positively reflect and recognise our heritage and the environment within our forward planning.												All points are important but points 3,4,5 & 6 have a particular resonance with rural settlements. The Parish is of the view that the objective and impartial analysis generated by the 2014 CRATULUS report was ignored. There is a need to understand how information will be specifically scaled for the individual parishes and whether the criteria for determining the designated colour coding be determined before or after the data gathering activity.	For significant and meaningful consultation to be achieved, it is essential that the correct and purposeful consultation is undertaken with all interested bodies, with particular reference to individual Parish Councils. Failure to undertake this will render the entire Review process as little more than an administrative desk top activity, further eroding our collective understanding of local democracy.		
LPR-A-033	10/09/2020	The Canal & River Trust		COVID-19 has increased the importance of good quality, accessible green space and the canal towpath	The Canal and towpath are an important traffic free route for walking, cycling and leisure purposes	The Trust support the District wide issues identified.	The Trust welcomes proposals to enhance the canal corridor. Lack of planning around transport will have knock on issues later on the commuter route into Oxford.	Lack of planning around transport will have knock on issues later on the commuter route into Oxford.	Question the type of housing will be built in Kidlington and would like to see a village green, places to eat and providing health facilities should be a priority.	Lack of planning around transport will have knock on issues later on the commuter route into Oxford.	There has been years of underfunding in services and facilities and affordable housing provision has not been a priority. Recent proposals at Kidlington have not protected the coalescence of villages and environmental impacts.	It does not feel the Council is being genuine and protecting Green Belt and accountability should be added to this.	Consider policy approaches that will enhance the opportunities for economic self-sufficiency by fostering education, training and skills development and local business growth.	There needs to be a genuine commitment to tackling climate change.	Village services and facilities, houses with gardens, including bungalows, should be built and kerbs lowered to cater for older people. Open spaces have been taken away in Gosford.	There should be accountability for decisions.	The points in the document are buried in jargon. Raises concern over the consultation process and the forms.

Question 14: Preparing the Plan - Do you have any specific methods of engagement you would like us to consider in preparing the Local Plan?	General comments		
LPR-A-045	11/09/2020	Land & Partners South East Limited	Mr Kevin Bishop and Mrs Emily Bishop	The COVID-19 pandemic has led to a sharp increase in homeworking which will continue as long as the outbreak persists. The reluctance to return to normal after the initial lockdowns suggests that homeworking will continue. There has been a corresponding upturn in interest in living in rural areas, as people focus on improving their working environment in the knowledge that they will spend more time there and less time travelling to the office. Research shows that it is possible that COVID-19 will make rural areas more attractive places to live. Consequently, there is likely to be an increased demand for homes in rural areas and villages. Without a supportive framework for development in rural areas of a mix of types and tenures, affordable could become increasingly unaffordable. Future policies should take account of the anticipated shift away from urban lifestyles to help revitalise rural communities. Services and facilities in	In the context of COVID-19, over the next 15 years it is likely that there will be a significant decrease in commuting between Oxford and Bicester and to other urban centres within and outside of the district. Cultural and economic hub of Oxford. The issues specific to Cherwell should be identified at least in broad terms at this stage.	The issues are broadly appropriate but the suggestions for addressing the issues are too vague. Cherwell is a rural area with a strong relationship with the neighbouring towns and villages. The need for home working space or shared work hubs in otherwise residential areas should be expected to increase and flexibility should be built into the Plan Review to allow for growing demand. What impact upon the local economy would a reduction in demand for commercial floorspace, or a change in the type demanded, have? What policies can the Local Plan include to encourage the reuse of commercial floorspace needs change? It would be useful for these more specific questions to be raised at this early stage to ensure the Plan is resilient and takes account of emerging trends.														
LPR-A-046	11/09/2020	Barton Willmore University College, Oxford		The Council need to robustly respond to the challenges of the future with sufficient housing to facilitate working from home with access to private and public open space. It should support housing growth on the periphery of existing urban areas so that residents can cycle to centres such as Bicester. The Standard Method set out within this consultation document would result in a 73% increase for the number of homes required and result in a requirement to deliver 1,205 homes per annum in Cherwell. In addition, employment needs also require detailed consideration. The plan should explore opportunities to increase connectivity by allocating development sites in these locations.	Any such policy should recognise that the Plan should be based on the Standard Method as set out within the Government's Changes to the current planning system consultation. The Standard Method set out within this consultation document would result in a 73% increase for the number of homes required and result in a requirement to deliver 1,205 homes per annum in Cherwell. The Council should capitalise on the opportunity presented through transport improvements including improved highway connectivity, which can improve public transport and cycle connectivity by allocating development sites in these locations.	As identified in the Oxfordshire LEP Investment Plan for 2018-2020, there is significant potential for Bicester to become a vital strategic interchange for East-West Rail and the Oxford-London Marylebone line, as part of the wider development and connectivity of the Oxford-Cambridge Arc. In addition, Cherwell is located on the Oxfordshire Knowledge Spine. Despite recent substantial allocations and development, Bicester remains well placed to accommodate further population growth. However, given the relatively unconstrained nature of the town in terms of landscape sensitivity and lack of Green Belt														
LPR-A-047	11/09/2020	RHPC Hargreaves Residential Developments Ltd		Greater emphasis is needed on delivering the right mix of the provision of a sufficient supply of land for new homes to meet the needs of the existing and future population.	Notwithstanding significant provision having been made for new housing development, demand has fallen short of requirements. Greater emphasis needs to be placed on the deliverability of new homes to ensure landscape studies should be reviewed	As the largest town in the District, Bicester is well positioned to meet the needs of the local population. Bicester is able to continue to make a significant and increased contribution to new housing development in the future. Previous landscape studies should be reviewed														
LPR-A-048	11/09/2020	Oxfordshire County Council		There will be a greater need for homes that incorporate home office space and space for children to study as well as better internet connectivity. Accessible green spaces are vital for mental and physical wellbeing. The pandemic has reinforced the importance of reliable broadband capacity, including digital infrastructure. Any infrastructure strategy will need to include digital connectivity. Policies need to allow for social distancing, including the segregation of pedestrians and cyclists where possible. Support the provision of public transport that helps services to become commercially viable. Allow for radical redesign of town centres as retail declines. Ensure delivery vehicles can access homes.	Recognition that there is not enough social housing. The definition of key workers should be as wide as possible. Reference the recently published Oxfordshire LIS investment Plan. Joint working with OCO to understand school planning needs. The local infrastructure requirement and provision. An understanding of current movement patterns by mode. Transport modelling work.	Banbury has excellent transport links to the M40, M42 and the A41. Circular economy. Protection of sustainable travel also needs to include cycle and walking connections to transport hubs, including rail stations and P&R. School sports facilities should be for schools and pupils. The school catchment area is the right to refuse planning applications. There should be reference to the protection of archaeological remains, particularly in town centres. Policies need to allow for social distancing, including the segregation of pedestrians and cyclists where possible. Support the provision of public transport that helps services to become commercially viable. Allow for radical redesign of town centres as retail declines. Ensure delivery vehicles can access homes.	Reference needed to opening of Banbury Village station and the town centre. The site of the proposed bus route to Oxford. Agree with the need to continue to reserve land for a bypass south Banbury, land that can be identified in the NE of Banbury, which would provide a mixed-use development opportunity. The Plan must consider the role and function of the A41 corridor through the town within the context of further growth and be aware of the wider regional connectivity work. OCC looked at options for a bypass for the SE Banbury road as part of Cherwell Local Plan Part 2. As part of the preparation of this Local Plan Review OCC will reconfirm its position on this scheme.	There is potential for conflict between the historic significance and character of the site and the provision of modern facilities such as schools. Support the need for policies for healthy and sustainable travel, but the issue of increasing congestion should be reflected in higher developer funding. The Plan also needs to reflect its consistency with the strategic transport network, both road and rail.	Site protection is identified as a factor determining the hierarchy of heritage assets above and below ground. The subdivision of family homes into apartments and the potential parking congestion should be considered.	Yes, agree with the key themes. The issue of bus reliability with regard to the impact of increasing congestion in town centres. It is important to provide a mix of transport modes. Measures to improve the connectivity of the rail station to the town centre. Need to improve pedestrian and cycle connections with the town and surrounding villages. The increasing uptake of e-bikes will make the gradients in some parts of the town less of a barrier.	Ensuring the provision of sufficient good quality key homes to meet the requirements of the existing and future population should be identified as a key theme. The provision of adequate shelter is a fundamental component of sustainability which	Ensuring the provision of sufficient good quality key homes to meet the requirements of the existing and future population should be identified as a key theme. The provision of adequate shelter is a fundamental component of sustainability which	Ensuring the provision of sufficient good quality key homes to meet the requirements of the existing and future population should be identified as a key theme. The provision of adequate shelter is a fundamental component of sustainability which	Site promotion - Land to the north and east of Little Chesterton, Chesterton		
LPR-A-049	11/09/2020	Planning Prospects		Homes working has led to major reductions in car use and congestion, which could lead to significant changes and service demand in urban centres, shifting demand to a local level. The Council continues to monitor impacts of COVID-19 before drafting its longer term policies. Facilitating improvements to internet and communications should be a key element in any event.	The consultation document appears to have identified the key areas of evidence that will need to be produced.															
LPR-A-050	11/09/2020	Defence Infrastructure Organisation																		
LPR-A-051	11/09/2020	Horton cum Stridley Parish Council		Public transport volumes need to be adequate. Additional cycle routes. Adequate bus stops in existing developments. Major developments should fund technology provision. Design principles need to reflect sustainability and maintenance of local distinctiveness. In rural areas, economic regeneration and the need to focus on essential retail provision rather than industrial/commercial units. Extend consultation periods to enable consultation with parishioners	Ful understandings of actual housing need for the region, both in range and volume. The Council continues to monitor impacts of COVID-19 before drafting its longer term policies. Facilitating improvements to internet and communications should be a key element in any event.	Oxford's unmet housing needs appear to be inflated. Green Belt is being used as a buffer zone for development. There is a lack of concrete objectives regarding tertiary education/vocational training and demands for apprenticeships.	Given the emphasis on improving skills training and employment opportunities, there is a range of apprenticeship units with associated green spaces. Changing employment patterns and the growth of commercial offices, increasing home working and the resultant impact on transport requirements.	Development at Bicester is encouraging additional traffic and encouraging more people to live in adjacent communities. Need to consider categorisation of Kidlington given the level of possible expansion.	Insufficient consideration is given to the effect of out-of-town growth on adjacent communities. Need to consider categorisation of Kidlington given the level of possible expansion.	Villages do not have adequate public transport. To meet the needs of the rural population, there is a need to encourage more people to live in adjacent communities. Need to consider categorisation of Kidlington given the level of possible expansion.	With improved rail links to London the district is becoming a commuter belt. This is pushing up house prices and leading to the loss of green belt land. Commuting to the Green Belt as part of SDC Local Plan Volume, speed and type of traffic eg. HGVs impact village life. 20mph limits should be considered as beneficial to rural communities.	Provision of social housing must be paramount, linked to sufficient infrastructure.	With improved rail links to London the district is becoming a commuter belt. This is pushing up house prices and leading to the loss of green belt land. Commuting to the Green Belt as part of SDC Local Plan Volume, speed and type of traffic eg. HGVs impact village life. 20mph limits should be considered as beneficial to rural communities.	Provision of public transport. Cycling/walking routes and infrastructure. Encouraging more people to live in adjacent communities. Encouraging more people to live in adjacent communities. Ensuring that housing developments do not promote car dependency. The aim should be for zero carbon building and lifestyle.	Ensure adequate green space. Encourage outdoor facilities such as play areas and safe spaces for walking and cycling. Engage health providers to support rural communities especially the old and young.	Missing is a post COVID-19 vision which also addresses transport and making technology available to everyone. CDC should focus on apps rather than a website which can be difficult to navigate. Must be a focus on access to green spaces for all, covering both exercise and tranquil spaces for people to practice mindfulness.	Chester should look at the whole of the Otmoor area as one natural area as part of the area to be preserved. The Roman Road needs to be preserved and its history including the Otmoor riots celebrated.	The consultation has not been widely publicised; the plans made it difficult to engage. There should be more information including stories and letter drops. It would have been an idea to include a timetable of the plan's consultation when notifying residents of council tax and electoral register correspondence.

Question 15: Preparing the Plan - Do you have any specific methods of engagement you would like us to consider in preparing the Local Plan?	General comments			
LPR-A-053	11/09/2020	Christopher Yap			The Cherwell District Council has shown a lack of interest in addressing existing inequalities regarding access to outdoor space. New housing developments should guarantee access to outdoor public green spaces. The Council should ensure that telecommunications infrastructure is in place to facilitate homeworking. Poor mobile phone signal restricts home working.	The Council should use participatory approaches to research that engage directly with groups of residents across the District in ways that formal consultations cannot. There should be a focus on the local context and the distribution of risk with regards to the impact of up-stream development on the frequency and severity of downstream flooding. Consider embodied carbon in housing and development. Recent studies have shown that it is possible to remove existing dwellings and structures than to build new developments when the carbon cost of new materials is taken into consideration. Embodied carbon estimates should be provided in the planning application process.	Banning: Building safe. The Council should encourage the reuse of existing buildings to reduce dependency on new building. The Council should use participatory approaches to research that engage directly with groups of residents across the District in ways that formal consultations cannot. There should be a focus on the local context and the distribution of risk with regards to the impact of up-stream development on the frequency and severity of downstream flooding. Consider embodied carbon in housing and development. Recent studies have shown that it is possible to remove existing dwellings and structures than to build new developments when the carbon cost of new materials is taken into consideration. Embodied carbon estimates should be provided in the planning application process.	Economy: New green infrastructure is required to connect suburban and rural settlements to urban centres. Development of bus routes and cycle paths would contribute to the urban labour force and make businesses in peripheral settlements more economically viable.	Community Facilities, Sport & Recreation: The Council should protect and enhance undeveloped open, green spaces as critical social infrastructure.	Transport: Key challenge is reducing car dependency by building safe	Issues - Do you have any observations on the Banbury issues we have identified? Are there any others you like? LPR-A-059	13/09/2020	Savills (UK) Ltd	Christ Church and The Water Eaton Estate		It is too early to determine how policies should be shaped in response to the pandemic. Site boundaries, layout and open spaces can be determined at the application stage in the meantime. The Plan covers the period to 2040 it may therefore not be appropriate to allow it to skew place making standards and densities.	Appropriate evidence is needed to justify the strategy and approach.	In general the issues identified are supported. The housing needs of not just Cherwell, but of Oxford and other adjacent authorities should be taken into account. Support for the potential affordable housing for key workers but the list should be expanded to include staff of higher paid jobs working at Oxford University. Overall support positive and justified policies for economic growth, sustainable	The implications of the development of the Partial Review sites should be taken into account. This includes the sustainability of the area and potential review of the Green Belt to allow further development in sustainable locations and density of development of existing sites to make most efficient use of land before allocating new greenfield sites.	The Local Plan should concentrate on ways to ensure sustainable development via economic, social and environmental measures, reinforcing local communities and high quality place making.	In order to boost the economy adequate housing needs to be taken into account. This includes the sustainability of the area and potential review of the Green Belt to allow further development in sustainable locations and density of development of existing sites to make most efficient use of land before allocating new greenfield sites.	This is a key issue for the plan. Much development via economic, social and environmental measures, reinforcing local communities and high quality place making.	This is a key issue for the plan. Much development via economic, social and environmental measures, reinforcing local communities and high quality place making.	This is a key issue for the plan. Much development via economic, social and environmental measures, reinforcing local communities and high quality place making.	This is a key issue for the plan. Much development via economic, social and environmental measures, reinforcing local communities and high quality place making.	These measures are supported.	Yes, the plan needs a new vision. It should build on the Oxfordshire 2050 vision, recognising the increasing interdependence on the wider Oxfordshire area and the spatial strategies that it sets out.	Site promotion - Land at St Frideswide's Farm and Water Eaton Estate (Site PR6a)	The SA Scoping Report is comprehensive. One area that is missing is reference to the recently published White Paper.	The SC will need to take account of the White Paper. Three proposed Reg 18 consultations seems excessive.

LPR-A-066	27/09/2020	Croopdyke Parish Council			Agree that COVID-19 has emphasised the importance of planning policies that promote the local economy, provide for a range of housing types, offer opportunities for recreation, parks and footpath, and focal points for communities. There is an opportunity to think how we use urban space. If working from home persists policy should consider the provision of hubs where home workers can meet from time to time and coalesce of adjacent	Understanding housing demand over next 10 years in terms of market, understanding the need for greenfield sites, understanding the need for growth and the need for growth in the rural areas.	We consider the key issues correctly address housing, economy, community facilities, transport, agriculture and environment. What is important is that a village like Croopdyke is a mix of people and is not just a collection of houses. It is important that the need to maintain services, the need for housing to meet local needs; the need to identify important gaps and avoid coalescence of settlements, the need to protect local distinctiveness and settlement pattern of villages when assessing	As Banbury is our nearest town, we welcome policies to ensure the town centre remains vibrant and adapts positively to the changes in retail. We believe that the development of the town centre is important and will be complemented by a focus on independent shops, cafe etc. We would welcome improvements to pedestrian access to the railway station and enhancement of the canal side area in a way that is sensitive to the heritage and natural environment.	We agree with the rural issues identified. We welcome a review of village classification based on updated information on level of service. The issues around regeneration and the future of the town centre are important and will be addressed by the town centre masterplan.	We agree with the three key themes.	We welcome this theme but would suggest that economic development policies need to protect and enhance the character and beauty of the countryside and the importance of preserving and enhancing the historic environment.	We welcome the focus in the local plan on ways to slow climate change through policies on location and protection methods, and agree with the focus on energy efficiency and renewable energy in new build and existing dwellings, community and commercial buildings.	We welcome the focus on policies to improve health and wellbeing and identification of the particular needs of older age groups.	The vision should include climate change. Regarding housing provision, we would welcome something on development being proportionate to the available land. We would like the high quality design is defined in a way that includes harmonising with and complementing the built environment of existing settlements.	We agree with the topics identified in Table 3.1 of the SA Scoping Report and welcome a full evidence-based assessment of policies against the baseline in terms of economic, social and environment factors.	We welcome regular consultation with parish councils. In the context of COVID-19, consideration should be given to online presentations and virtual public meetings.

LPR-A-086	14/09/2020	Brown & Co	Mr H R N Stilgoe																	
LPR-A-087	14/09/2020	Barnes4Business Limited			Policies that promote long term sustainability are needed. Policy to encourage home working, will include the relaxation of planning on some developments that have covenants that prevent a business from being at home.	Need to understand the need and expectations of businesses and residents. Comprehensive review of road infrastructure will be critical as towns expand. Identify facilities such as sports grounds, better transport, swimming or leisure pool facility, performance theatre, etc. Need to understand the expected population growth and commuting patterns.	New roads must be the primary focus before any new development is considered. Ensure new developments have access to modern technology e.g. ultrafast broadband and anticipate future technology that can be easily added at a later date.	Road network is already becoming full and the existing perimeter ring road is starting to become an inner ring road as developments are being built beyond it. Any expansion of the town needs to be a sensible manner to avoid traffic going through town. It is critical for businesses and residents to have good access in and out of town. Lessons can be learnt from Aylesbury on how to do it. Planning and consultation work as this will always be the primary choice of travel. Electric vehicles will happen naturally over the next 10-25 years so specific policies will be needed. Need to consider the needs and expectations of people when planning for cycle paths. Ensure that housing developments are built quicker. The Kingsmead development is taking a long time to complete. Ensure facilities as part of a development such as schools and sport facilities are	Remove Kidlington from the Cherwell boundary as this is a suburb of Oxford.											It is important that as many opinions of residents and businesses are sought to map out the future development of the area. It needs to be as inclusive as possible. Use local network groups to gain knowledge, business groups in particular.
LPR-A-088	14/09/2020	Brown & Co	Mr M Smalley																	
LPR-A-089	14/09/2020	JCP Ltd	Mr P W Deely, Mr W A Deely

LPR-A-091	14/09/2020	RPS Planning	Mr Will Bratt		It is currently unclear what long-lasting effects COVID-19 will have on daily lives, practices and domestic and social lives. Living close to places of work could be less important as more people continue to work from home. Maintaining local services and facilities for people living out of population centres, such as making allocations at edge of centre locations. Re-use of town centre properties to use other than retail will help ensure centres remain vibrant. Potential design-led approaches such as providing larger gardens to accommodate home offices or opportunities for hub working and live work developments, where small commercial premises are combined with homes. There is preference for people to shop for food and day to day items at local shops, avoiding the need to travel into larger stores in central areas. Consider providing well-defined retail in rural areas, particularly more people are working	Evidence on the delivery timescales for new housing allocations including consideration of small-medium sized sites. This would support the theme emerging through the Planning White Paper by providing alternative options for delivery and reuse/redevelopment, delivering a diverse range of housing types and tenures. Evidence on the employment density of commercial sites in rural areas and consider whether opportunities exist to make better use of existing buildings. Expansion/intensification of existing business premises. Reconsider agricultural buildings that have been converted into B class as the full potential may not be realised. This may mean that people will need to travel/commute longer distances and potentially reduce pressure on development of greenfield sites in other locations. Review how small supermarkets and convenience stores in the villages and rural areas are being used. Review the potential for														
LPR-A-092	14/09/2020	Brown & Co	Mr John Miller and Mrs Karen Elizabeth Miller																	
LPR-A-093	14/09/2020	Begbroke and Yarnton Green Belt Campaign	Honour the provisions of the Green Belt, to retain green spaces.		Endorsed the comments made by Cherwell Council.	Endorsed the comments made by Cherwell Council.	Kidlington is lumped in with the rest of the Cherwell area due to its proximity to the A429. It has been constructed as a Greater Bletchingley, Begbroke and Yarnton are not part of the growth area, nor are sites PR8 and PR9.		Begbroke and Yarnton have lost a great deal of green space due to the local Plan Partial Review. The Green Belt gap between the two villages is lost and has led to coalescence. The										Endorsed the comments made by Cherwell Council.	
LPR-A-094	14/09/2020	Gladman		Home working has led to major reductions in use of public transport, which could result in service delivery from urban centres to a local level. Facilitating improvements to internet and communications should be a key element of the Plan.	Evidence must be up to date and robust in light of changing circumstances. The changes brought about by the revised NPPF 2019 and potentially the Planning White Paper. Evidence should also be adequate and proportionate and take into account relevant market signals.	Housing: The Plan will need a balanced strategy. It is important to overview the range of options such as those that could hinder housing delivery. The Council should maximise housing supply. The widest range of sites, by size and market location are required so that all households have access to suitable housing in Oxford. Cheshire Arc is important to ensure there is a balance of locations and types of growth proposed are sustainable. Distribution of development should be based on evidence. The Plan should consider growth within and on edge of villages and introduce a criteria-based policy.	Economy: Encouraging economic growth is fundamental importance. The Oxford-Cheshire Arc is of significance. The Council should continue to work alongside the other Oxfordshire authorities.	Transport: Infrastructure requirements should be considered	The Plan should direct growth to all settlements in the district including the rural areas. Oxfordshire will be the three main centres plus significant growth of the lower order settlements including Bloxham. This allows for maintaining and enhancing of rural vitality and viability. It is important to consider existing services and facilities when assessing suitable locations for new growth. Daily needs are particularly important with a primary school, shop and access to public transport being the key considerations. New developments should have some services and facilities, particularly access to public transport.											
LPR-A-095	14/09/2020	Quod	Albion Land	The Plan should support economic growth across all sectors, most notably in logistics and manufacturing due to the employment benefits. Settlement hierarchy to be updated to ensure a broader number of the most sustainable settlements are identified for future growth. Create more land around settlements and suitable/established strategic locations for higher levels of growth. Utilise existing infrastructure such as the M40 corridor to meet the locational and efficiency demands of specific sectors.	To inform the District's future employment land supply the Council should prepare a review of the delivery/viability and success of strategic allocations within the adopted Plan; detailed economic needs assessment that consider broad-based economic growth and mitigate the impact of employment sites on the environment.	The Council's proposed approach to assess and consider the allocation of employment land, to meet local and occupational needs is generally appropriate. The Council should have regard to pursuing higher growth scenarios to maintain the town's current status as a regional centre and future resilience. Bicester focused policies should concentrate on attracting investment, growing its existing strategic employment locations and positively meeting business needs, recognising the role of locations with good access to the strategic highway network.	Some rural areas should be considered for development, and such sites may also benefit from environmental enhancement. Policies are needed to protect more sensitive areas for the duration of the local plan by ensuring there is sufficient range of mitigation measures for such allocations/policies may set out suitable/necessary planning obligations and/or financial contributions to facilitate the improvement of nearby rural settlements infrastructure and facilities.	The key themes should clearly reflect the NPPF's economic, social and environmental objectives. They should broadly cover all sustainability issues and clearly note that they are mutually supportive and beneficial to one another. The Council should incorporate and reflected in their entirety in strategic and non-strategic policies exemplify this key consideration.	The aims and objectives between Key Policies should provide clear commitment to support developments that incorporate measures to meet the Council's carbon reduction aims. The Council should incentivise this by committing to fast-track decisions where appropriate.	Policies should provide clear development and policies and masterplans should be defined early as these are considered to be the most effective way of delivering social and environmental infrastructure to benefit healthy lifestyles alongside new development.	The Council should have clear regard to issues facing the planning system. Ensure planning decisions are efficient, predictable and made quickly, which can be helped by the allocation of broad development locations and frontloading resolution of contentious issues.							The Council should ensure that there is targeted and comprehensive consultation with business owners and local employment developers to increase understanding and embellish evidence regarding market drivers/trends; understand how best to engage with them and recognise in the plan; ensure that the CIS has the support of key stakeholders and is deliverable alongside the plan.

LPR-A-118	14/09/2020	Boyer Planning	Wates Developments		Plan should respond positively to the challenges and the corresponding changes in behaviours and preferences. Policies should promote innovative design that creates functional and attractive environments. The importance of access to outdoor open spaces, particularly where this facilitates social interaction. The importance of local networks and social capital is also highlighted. Policies on design and location should place a stronger emphasis on this. These issues are likely to have implications for development densities. Therefore proportionately more land is required to meet housing needs. At a minimum, more people are less likely to drive into town centres in favour of areas that are perceived as being more rural and open. Rural towns and villages may not be a less sustainable option as there is less public transport and online shopping. There have also been advances in delivery drones and car pooling of autonomous electric	There may be merit in considering specific research in how the Plan can react positively to the COVID-19 environment. Given proposed innovative design that creates functional and attractive environments. The importance of access to outdoor open spaces, particularly where this facilitates social interaction. The importance of local networks and social capital is also highlighted. Policies on design and location should place a stronger emphasis on this. These issues are likely to have implications for development densities. Therefore proportionately more land is required to meet housing needs. At a minimum, more people are less likely to drive into town centres in favour of areas that are perceived as being more rural and open. Rural towns and villages may not be a less sustainable option as there is less public transport and online shopping. There have also been advances in delivery drones and car pooling of autonomous electric		The consultation document makes reference to the settlement's 'Garden Town' status, as well as retail and employment matters. Such concerns are all very relevant to the Local Plan Review. Considering the 'key issues' do not give significant attention to housing-related matters. This omission is significant, because housing affordability, the mix of available dwellings, as well as representation of different age groups will be impacted upon by the approach to housing growth at or around Bicester, Bicester, together with Banbury, has provided a focus for the supply of new homes in recent years. This is a positive development. This strategy is sound and based on a clear logic in continuing to focus housing provision at Bicester and the question of how this is achieved within, adjoining and at satellite settlements, is a key consideration.	Acknowledges that it is necessary to direct some growth to rural settlements, including where this reinforces service provision and supports the rural economy. It is important that any review of the current NPPs, as detailed at Paragraph 12, takes account of changing preferences and lifestyles through appropriate weighted criteria. This should recognise and be reflective of the way people live today, including in the post-COVID-19 environment. The methodology of village categorisation / settlement hierarchy should be subject to consultation. Likewise, as referenced in our response to Question 2, there would be merit in carrying out research to establish how behaviour changes and revised preferences, have impacted on assessments of locational sustainability.	The issues identified in this key theme are broadly supported. However, if it is envisaged that additional requirements / standards be applied, then this should be factored into the Viability Assessment which will need to be prepared to support the Plan. Consideration also needs to be given to meeting housing needs, increasing rates of delivery and achieving good design / 'beauty'. Bicester and the surrounding area, including the A40, should continue to be a focus for growth and this should remain a key tenet of the Plan's spatial strategy. The continued direction of growth to Bicester will require a new vision for the town and its surrounding area and determine whether development continues in the form of peripheral expansion at the urban edge or extends to satellite settlements or other development concepts.	The issues identified in this key theme are broadly supported. However, if it is envisaged that additional requirements / standards be applied, then this should be factored into the Viability Assessment which will need to be prepared to support the Plan. Consideration also needs to be given to meeting housing needs in full.	The issues identified in this key theme are broadly supported. However, if it is envisaged that additional requirements / standards be applied, then this should be factored into the Viability Assessment which will need to be prepared to support the Plan. Consideration also needs to be given to meeting housing needs in full.	The new vision will need to align with the NPPF and subsequent successor documents, which articulate the negative score be applied to greenfield sites, whereas a minor positive effect is applied for brownfield sites. The new vision needs to be prepared to support the Plan. Consideration also needs to be given to biodiversity net gain requirements, including mechanisms for offsetting / strategic provision.							
LPR-A-119	14/09/2020	Savills (UK) Ltd	Christ Church, Oxford		It is too early to determine how planning policies should be shaped in response to the pandemic. Space standards, layout and open space can be developed at the earliest opportunity. Adequate access to open space and green networks is generally supported. The Plan will cover the period to 2040, and whilst COVID-19 is a serious issue it may not be appropriate to allow it to skew place making standards and densities.	Appropriate evidence is needed to justify the strategy and approach. The plan for the issues and needs being identified clearly needs to be properly assessed, through robust assessment and targeted consultation.		An appropriate methodology is needed for undertaking the review of village categorisation. The Plan should look to allocate sufficient housing in sustainable rural areas including small site allocations.	The Local Plan should concentrate on ways to ensure sustainable development via economic, social and environmental measures, reinforcing local communities and appropriate, high quality place making.	This is a key issue for the plan. Much of the energy efficiency measures suggested will be controlled via the proposed changes to the Building Regulations. The Local Plan should encourage developers to build at higher environmental standards if they recognise the viability implications.	These measures are supported.	Yes, the plan needs a new vision. It is suggested that this builds on the wider Oxfordshire 2050 vision, recognising the increasing interdependence on the wider Oxfordshire area and the spatial strategies that it sets out.								
LPR-A-120	14/09/2020	Turley	LSQ Estates		Support the range of issues and needs identified by the Council. The Plan will need to be sufficiently flexible. It is important to take into account the emerging Oxfordshire Plan 2050, the reforms to the planning system, and the emerging Spatial Framework for the Oxford-Cambridge Arc.	Whilst the necessity of identifying the topics as separate elements is understood, it is important to recognise the relationship between these key issues. For example, the delivery of housing will have an important role to play in supporting the economy through both direct and indirect employment as well as supporting local services and the delivery of housing development can also have an important role to play in the provision and enhancement of community facilities, outdoor sport, indoor recreation and open space as well as achieving better connectivity. Through the delivery of an appropriate spatial strategy the Council will also ensure new housing development will respond positively to transport opportunities by locating developments in suitable locations, and supporting infrastructure and amenity delivery across the District. Meeting housing needs will be a key issue particularly in light of the significant affordability issues.		Support the proposed review of the services and facilities on offer in the villages in the District in order to direct development to more sustainable settlements. This will have an important role to maintain the viability of these settlements and provide a wider choice of housing available to meet a variety of needs, including the needs of the elderly and disabled. The long term implications of the COVID-19 pandemic are unknown, however it has clearly demonstrated the achievability of homeworking and will likely increase levels of teleworking and remote working. The development of new homes in villages will likely have greater connectivity to the surrounding rural environs, thereby providing greater leisure and health benefits. Development at a variety of scales and locations is therefore likely to be required and appropriate in order to achieve sustainable development and reduce commuting patterns.

Are there any specific methods of engagement you would like us to consider in preparing the Local Plan	Question 14: Call for Site - Do you wish to promote any sites for the Cherwell Local Plan Review 2040?	Question 15: Preparing the Plan - Do you have any comments specifically on the Sustainability Appraisal Scoping Report that accompanies this	Question 16: Methods of Engagement - Are there any specific methods of engagement you would like us to consider in preparing the Local Plan	General comments
LPR-A-122	14/09/2020	DP9 Ltd	Value Retail		COVID-19 has impacted across sectors and planning policies must recognise the need for flexibility and adapt to these changes. We welcome recent changes to UoC and expect that this will be reflected in future Local Plan policies.	The following evidence is required: Retail Losses from Covid-19 - specifically the impact of e-commerce trends at home delivery services which will mean for retail centres and traffic congestion. Tourism sector - positive impact of key attractions and their wider role in the district and associated employment benefits. Car parking demand and supply - COVID-19 shift back to private car usage away from public transport. The implication for car parking needs. Transport - The impact of changing consumer behaviour on wider growth. Evidence to support the development of sustainable transport networks to cope with growth. The congestion impact of future growth along key transport corridors and on town centres needs consideration.	Concur with key issues identified. Retail Losses from Covid-19 - specifically the impact of e-commerce trends at home delivery services which means for retail centres and traffic congestion. Tourism sector - positive impact of key attractions and their wider role in the district and associated employment benefits. Car parking demand and supply - COVID-19 shift back to private car usage away from public transport. The implication for car parking needs. Transport - The impact of changing consumer behaviour on wider growth. Evidence to support the development of sustainable transport networks to cope with growth. The congestion impact of future growth along key transport corridors and on town centres needs consideration.	Support the issues identified. Suggestion of measures to include retail destinations such as Bicester Village should be recognised as positive contributors to the retail landscape and that continued evolution, flexibility and consolidation should be supported. The importance of the role of tourism in towns such as Bicester Village is to tourism partners play to the success of this industry should be leveraged and acknowledged in future policies. The broader challenges in the retail environment should also be recognised in the key issues, which has accelerated the re-thinking of the role of town centres and retail. This will require a more flexible approach to land use in towns to allow for the creation of fit for future spaces. New consumer shopping habits and the growth of internet retail and take-away/delivery food providers should be considered.	Do you have any observations on the Kidlington issues we have identified? Are there any others you	The key themes are considered to be appropriate. 'Adaptation' could be developed further to include recognising current challenges and future changes to the planning system.	Welcome the attitude towards developing long term partnerships with local business and infrastructure providers that can lead to improved collaboration that will help town centres grow sustainably. Strongly supportive of the intention of setting of flexible planning objectives and targets will assist the growth of town centres and their ability to adapt and be flexible in this unprecedented economic climate.	The ambitious climate change and environmental goals are supported. Value Retail continues to review new ways of introducing sustainable travel, delivering sustainable development and promoting sustainable operation of Bicester Village.	Any new vision and objectives should respect to the existing drive for resilience, the economy and also that the continued growth and development of the economy is important.	Support the development and activation of secure, safe and accessible green infrastructure where appropriate.	Site promotion - Bicester Village A41 site, Bicester - Bicester Village Oxford Road site, Bicester Station Road site, Bicester	Engagement with all local stakeholders is required to identify the broad range of issues for the district.

LPR-A-128	14/09/2020	Laws & Fennies	Stratton Audley Estate													Site promotion - Former Sewage Works, Launton Road, Stratton Audley					
LPR-A-129	14/09/2020	Savills (UK) Ltd	Lone Star Land Ltd		Suggest a cautious approach when assessing the potential effects of the pandemic. Whilst it will have short term negative impacts, the long-term headline target in terms of growth will remain ambitious. Existing trends such as the decline of the traditional high street and the rise of online shopping are being hastened. There is evidence of a demand for larger gardens and more space to facilitate home working.	The Council should publish a list of the evidence base documents it intends to commission and publish. It is important to have a clear focus on the long-term growth potential of Banbury. The increasing densification of Banbury town centre will not be a solution to the housing growth required. Sustainable active travel will be highly important. Walking and cycling should have a much higher priority. Requiring new development to provide for cycling and walking will be ineffective if there are no measures in place to redesign	The Plan must take its lead from the Oxfordshire Plan 2050 and welcome the fact that the LDS indicates that the key stages of the Local Plan will be delivered by 2036. Agree with the Oxfordshire Plan's meticulous in assessing the deliverability of sites and will have to wait behind the Oxfordshire Plan	Banbury and Bicester should be a focus for new development. Agree that landscape studies should be revised to reflect the long-term growth potential of Banbury. The increasing densification of Banbury town centre will not be a solution to the housing growth required. Sustainable active travel will be highly important. Walking and cycling should have a much higher priority. Requiring new development to provide for cycling and walking will be ineffective if there are no measures in place to redesign					The pandemic will cause a permanent increase in online retail which will increase the need for large B8 storage units in suitable locations close to major junctions on the road network. Banbury is ideally located to meet this demand.			Site promotion - Land north of Broughton Road, Banbury Site promotion - Land at Bretch Hill, Banbury	In preparing the Local Plan consideration is needed of National Guidance, including White Paper, Outcomes for Growth, Cambridge to Oxford Growth Arc, and Duty to Co-operate. The need for Reg 18 consultations is questioned. Any White Paper consultation on the structure of local government and/or boundaries should be taken into consideration in preparing the new plan.

LPR-A-132	14/09/2020	Edgars Limited	Bicester Motion Limited		It is vital for planning policies to promote, support and encourage economic development to secure economic recovery. This can be supported through the creation of policies which allow for flexibility for complementary uses. This will be particularly important in the tourism and recreation sectors. The tourism and recreation sectors have key roles in supporting Bicester's economy. The Council should update its Tourism Development Strategy to deliver post COVID-19. Experience offers opportunities for Bicester Motion to become a tourism magnet for the Oxford and Chiltern area. To unlock the potential of Bicester Motion, an Integrated Transport System through Bicester and its key sites should be prioritised with a focus on pedestrian connections to rail, park and ride and other sustainable transport systems. Better connectivity would deliver a more connected community. Town Centre and Retail tourism and recreation offer will enable more visitors to access more leisure and cultural facilities in the town centre. Objectives and policies should support the development of live/work units to provide people with the opportunity to move away from lengthy commutes and avoid less sustainable forms of transport.	Economy - The introduction of policies which support the implementation of flexible complementary uses will provide the opportunity for Bicester's key sites to fully capture the value it can deliver post COVID-19. Experience offers opportunities for Bicester Motion to become a tourism magnet for the Oxford and Chiltern area. To unlock the potential of Bicester Motion, an Integrated Transport System through Bicester and its key sites should be prioritised with a focus on pedestrian connections to rail, park and ride and other sustainable transport systems. Better connectivity would contribute more effectively to the economic recovery; and provide opportunities for the delivery of local and cultural benefits for the community. Local Plan policies should support the development of live/work units to provide people with the opportunity to move away from lengthy commutes and avoid less sustainable forms of transport.	Agree that the Council should assess what additional land should be allocated for employment generation uses and providing sufficient land to support high-tech knowledge-based industries; providing sufficient land for the growth of Policy Bicester 8 to meet the needs of a growing local population and economy. Additional land should be allocated as part of Bicester 8 to include land at Elm Farm Quarry. The key issues do not adequately recognise the contribution of the tourism and recreation sectors to the economy. To safeguard the Bicester tourism economy, it is recommended that Bicester Motion be identified as a key leisure and tourism asset.	Bicester Motion consider that land to the north of the Bicester Motion site, known as Bicester Drive, be included within Policy Bicester 8, and that the whole of Policy Bicester 8 be included within any forthcoming settlement boundaries. This would positively support the enterprise and better enable the site to fulfil its vision of becoming a leading leisure and business destination.	Agree that policy should be formulated to respond to the challenges which arise from the pandemic and should support and enhance the strengths identified in the local economy. Vital that policies unlock the potential of key sectors/communities and ensure that sufficient land is provided where necessary. Agree that it is important to secure growth within the high-tech, knowledge based and innovation sectors.	The new Local Plan should support the delivery of healthy places, including the objectives of supporting the creation of leisure and recreational activities that promote physical, mental and social health and wellbeing; create a unique centre for lifelong education, business, culture, arts and leisure; and support and enhance the local economy.	The vision needs to be changed. The District's response to the pandemic cannot be within the status quo. Greater emphasis should be made of supporting the district's economy, attracting world-leading businesses, promoting innovation, job creation and delivering resilient and flexible commercial floorspace whilst supporting key sites.	Site promotion - Land at former Elm Farm Quarry, Stratton Audley, Bicester									
LPR-A-133	14/09/2020	Fernhill Estates													Site promotion - Land west of School Lane, Great Bourton						
LPR-A-134	14/09/2020	Fernhill Estates	Fergus White												Site promotion - Land north of Chapel Lane, Little Bourton

LPR-A-138	14/09/2020	Pegasus Group	Elvin Investments LLP		COVID-19 has highlighted the importance of ensuring sustainable growth. It may be necessary for new homes to provide adequate home working space and walking and cycling provision to support the economic recovery. The need to tackle obesity and plan for healthy living is evident. New development should provide for outdoor sport and recreation with effective pedestrian and cycle linkages.	A forward looking economic and demographic analysis is essential to judge the scale of additional employment and housing sites that are required up to 2040. The emerging base supporting the Oxford-Cambridge Arc's aspiration for Cherwell is essential in establishing the growth requirements for Cherwell. A review of the potential increased use of brownfield land within the district should be undertaken. An assessment of the opportunities to respond to climate change is essential to ensure that recommended policies are appropriate, sit with best practice and are capable of implementation.	Consideration should be given to sustainable transport linkages between Bicester and Heyford Park. The Plan should consider what transport investment is necessary between the two settlements in order to attract and maximise inward investment for economic and residential purposes.	Addressing the place of Heyford Park in the settlement hierarchy is welcomed. Heyford Park is already becoming the fourth largest settlement in the district and with sensitive consideration has potential to grow. Heyford Park is already a significant high quality and successful sustainable development. Services provided at its centre mean it acts as a service hub to neighbouring villages. The OXLEP LIS recognises the importance of Heyford Park as part of the Oxfordshire network of business parks. Heyford Park should be supported and extended in order to continue to attract inward investment and provide new training and employment opportunities. As the proposed Creative City facility grows and develops, the cumulative benefits it provides will generate further spin-off benefits. Heyford Park also has the potential to be a hub for SG, this would result in a faster roll out and delivery to surrounding villages. It would also benefit businesses and	The Plan should support and implement the OXLEP LIS. The Plan needs to consider ways to support and strengthen key local economic clusters and assets such as the business park and developing the Creative City facility in Heyford Park. Heyford Park is already a significant high quality and successful sustainable development. Services provided at its centre mean it acts as a service hub to neighbouring villages. The OXLEP LIS recognises the importance of Heyford Park as part of the Oxfordshire network of business parks. Heyford Park should be supported and extended in order to continue to attract inward investment and provide new training and employment opportunities. As the proposed Creative City facility grows and develops, the cumulative benefits it provides will generate further spin-off benefits. Heyford Park also has the potential to be a hub for SG, this would result in a faster roll out and delivery to surrounding villages. It would also benefit businesses and	It will be necessary for the Plan to allocate sites for new housing and employment growth and this should be located within Flood Zone 1 to ensure that new development is located away from areas that may be affected by flooding. Heyford Park is already a significant high quality and successful sustainable development. Services provided at its centre mean it acts as a service hub to neighbouring villages. The OXLEP LIS recognises the importance of Heyford Park as part of the Oxfordshire network of business parks. Heyford Park should be supported and extended in order to continue to attract inward investment and provide new training and employment opportunities. As the proposed Creative City facility grows and develops, the cumulative benefits it provides will generate further spin-off benefits. Heyford Park also has the potential to be a hub for SG, this would result in a faster roll out and delivery to surrounding villages. It would also benefit businesses and	The vision in the adopted Local Plan Part 1 was drafted to cover a lengthy period and remains appropriate for shaping the growth of Cherwell. The Council should look at how it continues to work positively with the planning system to support the delivery of existing allocated sites whilst considering the opportunity for additional future development at Heyford Park.	The vision in the adopted Local Plan Part 1 was drafted to cover a lengthy period and remains appropriate for shaping the growth of Cherwell. The Council should look at how it continues to work positively with the planning system to support the delivery of existing allocated sites whilst considering the opportunity for additional future development at Heyford Park.	The OXLEP identifies the new settlement being created at Heyford Park and notes the Conservation Area status of the former military airbase of RAF Upper Heyford. In Figure 4, Heyford Park is indicated as a proposed settlement area. The proposed settlement area is located within the Cherwell Target Area and Figure 4.11 identifies parts of Heyford Park as being situated within a wider Nature Recovery Network (NRR) Recovery Zone and the flying field as being in a NNR Conservation Area. This was not considered on the Conservation Target Area designation and early engagement with those defining the NRR areas is requested.

Question 15: Preparing the Plan - Do you have any comments specifically on the Sustainability Appraisal Scoping Report that accompanies this document?	Question 16: Methods of Engagement - Are there any specific methods of engagement you would like us to consider in preparing the Local Plan?	General comments
LPR-A-144	14/09/2020	Walsingham Planning	Linden Limited		Future draft wording of policies you to avoid being too prescriptive and inflexible. Broad reference to housing and the approach to developing sites across the district needs to ensure a 'one size fits all' approach should be avoided. Policies should allow a site by site assessment. Flexibility will help the economy to recover from COVID-19. Currently the Council cannot determine at what stage Admissible access to open space and green networks is generally supported. The Plan will cover up to 2040, and whilst COVID-19 is a serious issue it may not be appropriate to	Affordable housing thresholds in line with paragraph 63 of the NPPF would be acceptable. Reducing the thresholds in the NPPF will be a constraint on smaller plots.	The identified issues are generally supported. Consider a full review of the settlement hierarchy including identification clearly needs to be properly evidenced, through robust assessment and targeted consultation.	Vitality and viability of Bicester town centre should continue to be supported, as well as Caversfield as a commercial. Intent to reduce out-commuting and encourage the ambitions of growth in employment with a focus on hi-tech and knowledge economy. This helps to strengthen Bicester's role in the Oxford-Cambridge Arc.	Banbury is one of 23 sites in Oxfordshire that breach air pollution limits and is over twice the limit. A more dispersed strategy for accommodating growth will reduce pressure on locations such as Banbury and prevent further sites breaching air pollution limits.	Service villages should play an increased role in accommodating development during the plan period. Deddington has a range of local services and good public transport connections to Bicester and Oxford. The highest level of connectivity and telecommunications in terms of fibre to the home is also available enabling remote working and supporting local entrepreneurship.	Adequate housing needs to be provided to encourage skilled labour. Appropriate facilities and services needed to enhance the attractiveness of an area. Housing and a balanced approach to meeting the needs of the labour force should be a key theme. Need to travel by car should be reduced.	Much of the energy efficiency measures will be controlled via the proposed changes to Building Regulations. If higher environmental standards are expected then the Council should recognise the additional cost including affordable housing, via viability assessments.	This is supported.	A new vision is needed. This should build on the wider Oxfordshire 2050 vision, recognising the increasing interdependence on the wider Oxfordshire area and the spatial strategies that it sets out.	Site promotion - Land at South Lodge, Caversfield

LPR-A-168	14/09/2020	David Lock Associates	Mr John Stroud, Trustee of the Beneficiaries																		
LPR-A-169	14/09/2020	Rosconn Strategic Land			Significantly boosting the supply of homes is a key issue. The plan requires sufficient flexibility, including identification of 10% additional housing above the identified needs to allow for growth of reserve sites would also improve the robustness of the plan. Large strategic sites play an important role in delivering homes and infrastructure but overdevelopment could result in a vulnerability to the local supply. A mix of homes on sites of various sizes in the towns and the most sustainable villages would address the needs of Cherwell. A positive planning framework to help stimulate inward investment, growth is important in the current period of uncertainty and recovery.																
LPR-A-170	14/09/2020	Framptons	Skape Banbury LLP	There have been shifts in society as a consequence of the COVID-19 pandemic. These relate to changing patterns of consumption, increasing focus on online purchasing of goods traditionally bought from shops in town centres. It would be unwise for planning policies to assume that instore purchasing will return to pre-COVID levels when the virus is under control. Planning policies will require a shift from retail focussed activities to new uses which foster greater social interaction, community spirit and local identity. New residential accommodation	The evidence base needs to be robust to ensure that the plan is responsive to current and prevailing economic circumstances. The plan needs to provide a clear direction and rationale to promote economic growth. Economic growth and prosperity are not confined to the economic objective of sustainable development as a rise in unemployment will have serious consequences for the social objective of sustainable development.	The introduction of new residential development, mainly in the form of apartments, in town centres will act as a major catalyst to regenerate the town centre and regeneration of town centre, vitality and viability of the town centre is enhanced by residents living in the central area who support existing services and trades. The night time economy becomes more commercially resilient through patronage.	The current Local Plan strategy has successfully encouraged major investment around Castle Quay and the reduction in the number of garages. The introduction and regeneration of town centre, vitality and viability of the town centre as a shopping centre can no longer be maintained. Banbury town centre should embrace the changed economic situation and position itself for the post COVID future. The town centre has limited residential accommodation and the redevelopment of land between Calthorpe Street and Marlborough Road for 300-350 new homes offers														
LPR-A-171	14/09/2020	Walsingham Planning	R2 Developments		Future draft wording of policies needs to avoid being too prescriptive and inflexible. Broad reference to 'housing' and the spatial approach to development across the district needs to ensure a 'one size fits all' approach should be avoided. Policies should allow a site by site assessment. Flexibility will help the economy to recover from COVID-19. Currently the Council cannot demonstrate a 5 year supply, despite the fact that current allocations have not delivered enough homes therefore new allocations will be needed. Brownfield development on suitable sites is preferred but allocating limited amounts of suitable greenfield sites will be necessary.																
LPR-A-172	14/09/2020	Roger Evans		Many sites allocated in the past are poorly connected and rely on private car use. Most major development sites are inward looking and provide a backside to the street network. What could have been a vibrant and bustling environment for civic	The Council needs to understand the significance of the logistics sector to the supply of new employment land to meet the structural economy changes in the economy, particularly in the provision of infrastructure, particularly logistics, and the structure of town centres which have to evolve into centres of mixed land uses.																
LPR-A-173	14/09/2020	Framptons	Tritax Symmetry Ltd	The plan needs bold policies for a supply of new employment land to meet the structural economy changes in the economy, particularly in the provision of infrastructure, particularly logistics, and the structure of town centres which have to evolve into centres of mixed land uses.	The significance of the logistics sector to the local and wider economy and the locational needs of the sector do not feature as a key issue. The plan should substantially address the role of the logistics sector and its crucial importance to the local economy. Manufacturers' Supply chains collapsed due to COVID-19 and many companies have responded by their stock or increasing their stock. Manufacturing now demands resilience in logistics, leading to increased demand for additional logistics space. COVID-19 also resulted in a structural change in retailing and manufacturing needing to be well located to its customers. The PPG sets out the locational requirements.	Bicester is a focus for large scale logistics operations due to its geographic location to the strategic highway network. Southgate and London Gateway are major global gateways for large scale logistics close to the strategic highway network. Bicester's focus upon the strategic highway network should facilitate travel by public transport for workers and should not be appended to existing urban areas. Modern logistics should be regarded as being an integral part of the 'high-tech knowledge-based industries'.

LPR-A-176	14/09/2020	Carter Jonas	OCHJS																	
LPR-A-177	14/09/2020	David Lock Associates	Holland Land Ltd		The Council appears to have identified a comprehensive range of issues and matters to be considered. A key aspect of this is the difficult task of reconciling aims across topics and setting priorities. Recognition of the Government's objective of significantly boosting the supply of new homes is welcomed. A key issue that needs to be addressed in explicit terms is the need to ensure the delivery of the homes and infrastructure that are required. Successful delivery has wide benefits for the plan area and for communities within the area, supporting town centres, delivering green space and community facilities, or in securing infrastructure etc. In addressing issues, delivery needs to be factored into the planning process at the earliest opportunity. This is particularly important given the current context of the pandemic. The identified issues are generally supported. Consider a full review of the settlement hierarchy including consultation on a method for assessment of each settlement. Banbury and Bicester should continue to be a major focus for future development. Housing needs should take account of Cherwell, Oxford and other adjacent authorities. Positive and justified policies for economic	The key issues identified are, rightly, town-wide issues, including supporting and investing in the town centre, in particular the green infrastructure, addressing social isolation and investing in infrastructure such as the Eastern Peripheral Road and London Road level crossing. Development, including housing, has a significant role in supporting wider town wide objectives – and should be conceived in this manner rather than as standalone or fundamentally different developments. Holland Land Management is keen to engage with stakeholders to address the issues surrounding the slow rate of delivery of North West Bicester – and in particular how that development may support aspirations for the town as a whole. By the same token, where key														
LPR-A-178	14/09/2020	Savills (UK) Ltd	Holland Land Management	It is too early to determine how planning policies should be shaped in response to the pandemic. Space standards, layout and open space can be determined at the application stage. Affordable access to open space and green areas is generally supported. The Plan will cover up to 2040, and whilst COVID-19 is a serious issue it may not be appropriate to allow it to skew place making	Appropriate evidence is needed to justify the strategy and approach. The basis for the needs and property identified clearly needs to be properly evidenced, through robust assessment and targeted consultation.	Vitality and viability of Banbury town centre should continue to be supported. Consider a full review of the settlement hierarchy including assessment on a method for assessment of each settlement. Banbury and Bicester should continue to be a major focus for future development. Housing needs should take account of Cherwell, Oxford and other adjacent authorities. Positive and justified policies for economic														
LPR-A-179	14/09/2020	Nicholas Dolden		A technologically led economic strategy is not happening due to an increase in warehouses and these do not square with the Council's objective on becoming greener given the increased haulage traffic that these developments will generate. A future industrial strategy needs to reflect the challenges of COVID-19. Priorities may need to change particularly in relation to office developments if the new town is considered to be a success. Future developments reflect the sustainable standards applied to the eco town?	The Local Plan Review has correctly focused on the town centre. Shop retailers are facing difficult trading conditions fuelled by the attractiveness of internet trading and the effects of COVID-19. There is not an analysis of retail within the town so there is little incentive for Bicester residents to use the town centre. This is compounded by the attraction of Bicester Village, which appears to be an attractive alternative and the new out of town shopping centre.															
LPR-A-180	14/09/2020	Bicester Vision CIC & Bicester Chamber		Policies should be provided that: recognise the importance of Green spaces; promote health and wellbeing; identify land used for food production, forestry, recreation or wildlife as national assets and protected for that primary purpose in order to achieve self-sufficiency in food; support the greening of the environment whilst promoting physical and mental wellbeing; provide wildlife and recreational corridors between "green spaces" to enhance their utility; transfer solar power generation to local energy systems; encourage local green roofs to free land for more pastoral outcomes; and maintain existing allotments and increase them where practicable to ensure there are sufficient allotments for local communities to use grow their own fruit and vegetables.	Evidence that supports: a greater understanding of local sentiment and the need to listen to how people consider the environment in relation to economic and social objectives; the public's perception is to the importance of self-sufficiency in food, water and the energy; the importance of the environment; what sports are catered for and what the requirement is if any; and a viable community hub.	District wide planning requires the conversion of green space into grey spaces. The Council should encourage local consent for these developments more sensibly.	Green spaces should be networked by green corridors and more expensive ones. The Council should encourage local consent for these developments more sensibly.	Rural planning should allow limited residential planning and industrial development in locations which are representative of the local surroundings. This would encourage local employment and save travel. Travellers wishing to make a permanent home ought to be encouraged to move to the countryside. This would be in accordance to planning policy. Allowing those in small numbers, to settle adjacent to existing dwellings would enable and encourage children to attend schools easily.		A sustainable local economy is one that provides full employment opportunities, protects the environment and which delivers Maslow's hierarchy of needs to all.	Support the actions regarding meeting the challenge of climate change by reducing the impact of rural development on local food sourcing and the de-centralisation and use of renewable energy. More bus routes should provide alternatives to the car and better provision for cycling and walking. Encouraging people to live closer to work.	There seems to be a shift in emphasis as to the importance of healthy places. The impact of COVID-19 and the realisation of its consequences. Less people reduce the risk of infection and green spaces, mental and physical well-being. It is therefore a concern whether to meet the future population growth in an era of pandemics and a shortage of adequate housing for the resident community. It can be concluded that population growth is no longer compatible with the aim of healthy place shaping unless growth brings enough wealth to offset current challenges.								
LPR-A-181	14/09/2020	David Lock Associates	The Tripartite	The document right now reflects the impact of COVID-19 as having as yet unknown or uncertain impacts on the way we will live our lives in years to come. The pandemic has highlighted the importance of the following upon daily life: (cont.)	The Tripartite supports the district wide issues identified and make the following specific comments: The Tripartite support the proposed review of affordable housing requirements, taking into account visual and accessibility opportunities for employers to provide co-working accommodation for key workers. The Council is requested to consider the opportunity for employers to provide employer linked housing including for key workers. (cont.)	As paragraph 2.81 states, the Cherwell Local Plan 2011-2031 Part 1 sought to strengthen Kidlington's village centre and to maximise the economic opportunities presented by the village's location on the Oxfordshire 'knowledge spine'. This should remain a key objective of the current review. (cont.)		The Tripartite agree with the three general overarching key themes identified.	The Tripartite welcome the development of sustainable communities is central to meeting the challenge of climate change. Development located close to existing or emerging sustainable transport networks, such as the planned railway to the North of Oxford and the high quality sustainable transport corridors, should be encouraged. Development on a strategic scale, making the most efficient use of land, will also generate the need for co-located and balanced housing, facilities and employment,	The Tripartite consider that the identification of the key issues relating to Healthy Place Shaping and Cherwell District Council's suggestions as to how the Cherwell Local Plan Review 2040 might address the key issues. The Tripartite welcome the identification of a potential policy which will "support housing to meet the needs of the local economy and key workers".	The Tripartite believe that the Cherwell Local Plan Review 2040 should have a new vision, as national policy and the Government's ambitions for the Oxford-Milton Keynes-Cambridge Arc have evolved since the original Cherwell Local Plan was adopted in 2011. The vision should be aligned to the vision of the emerging Oxfordshire 2050 to ensure consistency and to maintain the close working relationships of the Oxfordshire authorities, once the relationship between the Plans has	Site promotion - Land east of the A44, Begbroke (site PR8)	The Tripartite note that there is no mention in the Sustainability Appraisal Scoping Report of the now adopted, Cherwell Local Plan 2011-2031 (Part 1) Partial Review (CLPR) in the report's Section 3 'Review of Plans'. The Tripartite welcome the identification of a potential policy which will "support housing to meet the needs of the local economy and key workers".	As a major landowner and stakeholder in the local area, the Tripartite request to be kept informed and engaged in connection with future stages of consultation on the Cherwell Local Plan Review 2040. In particular, the Tripartite request clarification regarding how the Cherwell Local Plan Review 2040 will sit within Cherwell's development

LPR-A-181	14/09/2020	David Lock Associates	The Tripartite		available neighbourhoods; access to green/open space; connectivity, including strategic cycle connectivity between housing and major employment allocations; flexible use of land/buildings; making efficient use of land; and access to high quality housing and local services. (cont.)														All stage it is no longer for the Cherwell Local Plan Review will date to the adopted Cherwell Local Plan Partial Review- Oxford's Unmet Housing Needs. Clarity regarding how the Local Plan review will sit within the Local Development Plan framework, especially considering the overlapping Plan periods, would be welcomed. This is critical to ensuring that an appropriate strategic and joined-up approach is taken to planning within the district and across the County in the period to 2050, it is also necessary to protect longer-term		
LPR-A-181	14/09/2020	David Lock Associates	The Tripartite		Many of the issues above are important elements of both local and national planning policy. The specific impacts of the COVID-19 pandemic must be considered so the Council should adopt a flexible approach in planning for the period to 2040.																
LPR-A-181	14/09/2020	David Lock Associates	The Tripartite		The Tripartite would support the inclusion of positive policies for economic growth and productivity that build upon the area's strengths. It would like to highlight and encourage recognition of the role of the University, College and Begbroke Science Park in particular as key local employers. Begbroke Science Park represents a key asset and opportunity supporting the development of a new innovation community within the Knowledge Spine and wider Oxford Cambridge Arc. The Oxfordshire LUS highlights the County's world leading science and																
LPR-A-181	14/09/2020	David Lock Associates	The Tripartite		As part of this ambition, the LUS recognises the key role of the University in the period to 2040 and 2020 Times Higher Education number one ranked university in the World which contributes significantly to the UK economy and generates more teaching and research than any other UK University. The growth of this sector in particular should be a focus as part of the Review for the period to 2040.																
LPR-A-182	14/09/2020	Glosson Strategic Land			Promote and encourage open space within new residential development, encourage developments which provide or contribute towards community facilities, and promote the requirement for all development to provide up to date telecommunications to support working from home.	Up to date Call for Sites, revised annually, and that more strictly tests the deliverability of a site.	Affordability ratios must be addressed by proactively seeking to meet emerging housing targets as a minimum, thereby increasing the growth which synchronise with emerging district wide transport strategies.	Existing landscape studies need reviewing to support the long term growth of the town, particularly with housing numbers increasing so substantially. It is no longer acceptable for the town to designate land for its own sake. This need is exacerbated by the objective to promote open space and place making as part of new development. There is not the room to do this whilst limiting and containing the existing settlement boundaries by means of a sea-change towards the approach of a subjective approach to the landscape.				Yes, I agree with the three themes identified. Addressing housing affordability should be added. The Council needs to drive forward a pro-development agenda to help address the chronic housing supply. Cherwell has an ageing population; this will not be addressed until affordable housing supply is increased, which will assist in keeping younger generations in the area.		Actively encourage open space within all new developments that provide new and existing residents with means to enjoy and access the countryside.							
LPR-A-183	14/09/2020	David Lock Associates	Mr M Smith	The Local Plan Review should take advantage of opportunities to maintain economic stability and support local economies where opportunities arise to build on Cherwell's existing economic strengths. There is a plan for resilient employment provision allowing key sectors to come forward where needed and capture quickly. A spatial strategy should be developed to align with County planning objectives and transport plans reflecting Cherwell's close relationship with Oxford City and surrounding districts, thereby supporting job creation patterns for growth. Reflecting current uncertainties arising from COVID-19, policy allocations will be required	Updated economic growth study forecasting will be required, informed by up to date employment and residential projections and infrastructure studies, as well as existing evidence, including OLEP Economic Plan, County-wide infrastructure studies and economic plans. Green Belt review will be required. This should be informed by land availability assessments and in response to employment and housing needs assessment.	The significance of Cherwell's relationship with Oxford City should be recognised as part of the wider strategy for the District. This is key to the town's location, character and intrinsic strengths of Cherwell. It is also important in the context of the specific role of the North Oxford as a Cherwell growth area and the ongoing Cherwell Local Plan Review and other strategies for the area. These plan for the development of a number of housing areas and can support new commercial, employment and service development for Cherwell under the Local Plan Review.	The key issues identified for Kidlington will be required, informed by up to date employment and residential projections and infrastructure studies, as well as existing evidence, including OLEP Economic Plan, County-wide infrastructure studies and economic plans. Green Belt review will be required. This should be informed by land availability assessments and in response to employment and housing needs assessment.	We welcome the recognition of Local Plan Objectives (LOA) and other key local economic assets in the review of Kidlington, including provision of a new park and ride at LOA; support for high value employment uses at LOA, and review of Green Belt protection at LOA. However, we consider that much greater emphasis should be placed on economic development issues, particularly the needs of existing economic assets in/around Kidlington. Helping to meet these needs should be the primary objective of the new Local Plan.	We agree with the Key Themes identified. Additionally, the promotion of sustainable travel should be identified as part of the Plan, either as a separate theme or in relation to the identified three key themes.	We support the issues identified for this theme in particular: implementation of Central Government Enterprise Partnership's (LEP) policies and initiatives encouraging sustainable economic growth and the raising of the value of the economy; and capitalising on Cherwell's role and position in the Oxford Cambridge Arc.	There will be a need to plan for sustainable patterns of development and movement in response to climate change and to reinforce and complement development opportunities under the Local Plan Review 2040. This includes the following in particular: the need to connect the town to the railway for sustainable modes of transport, including buses, cycling and walking; the need to ensure continued delivery and implementation to meet existing objectives; and the need to develop new policies that complement and do not undermine existing commitments.										
LPR-A-184	14/09/2020	Avion Young	Oxford Aviation Services Ltd	The primary objective of the Local Plan should be to deliver a balanced economy and society. Policies should be put in place to ensure that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity, as a means of realising the nation's objective of re-building a strong, responsive and competitive economy. A positive, supportive policy position is essential, with unnecessary planning barriers to economic development removed. In balancing the policy conflicts between economic development and other considerations (e.g. Green Belt protection) it is essential that greater weight is placed on economic development than has been the case	The Local Plan should be driven by primary objectives of delivering a balanced economy and society. Policies should be put in place to ensure that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity, as a means of realising the nation's objective of re-building a strong, responsive and competitive economy. A positive, supportive policy position is essential, with unnecessary planning barriers to economic development removed. In balancing the policy conflicts between economic development and other considerations (e.g. Green Belt protection) it is essential that greater weight is placed on economic development than has been the case	We recommend that the new Local Plan should be driven by primary objectives of delivering a balanced economy and society. Policies should be put in place to ensure that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity, as a means of realising the nation's objective of re-building a strong, responsive and competitive economy. A positive, supportive policy position is essential, with unnecessary planning barriers to economic development removed. In balancing the policy conflicts between economic development and other considerations (e.g. Green Belt protection) it is essential that greater weight is placed on economic development than has been the case	Banbury will be key to accommodating housing growth and large strategic allocations. A review of the landscape studies is needed. Open space provision including for sport and recreation could be provided on site as part of large strategic developments.		Agree that economic development should be the leading theme.	We recommend that the new Local Plan is driven by primary objective of need to re-build/bust the economy, accordingly the issues should be afforded great weight. In line with Government announcements, this is the principal role of the Local Plan. The government's guidance is able to play in managing the effects of COVID-19 in balance with the policy conflicts between economic development and other considerations (e.g. Green belt protection). We consider that more weight on economic development is needed for the new Local Plan than is given. Much greater weight on economic development than has been the case in the past. Furthermore, the economic strategy for the district and sub-region is dependent on a number

Are there any others you	Question 8: Rural Areas Planning Issues - Do you have any observations on the rural issues we have identified? Are there any others you	Question 9: Key Themes - Do you agree with the Key Themes identified? Are there other Key Themes the Plan should address?	Question 10: Maintaining and Developing a Sustainable Local Economy - Do you have any observations on the issues we have identified? Are there any others you	Question 11: Meeting the Challenge of Climate Change - Do you have any observations on the issues we have identified? Are there any others you	Question 12: Healthy Place-shaping - Do you have any observations on the issues we have identified? Are there any others you	Question 13: Establishing a Vision and Objectives - Do you have a new vision for the Cherwell Local Plan Review 2040?	Question 14: Call for Sites - Do you wish to propose any sites for the Cherwell Local Plan Review 2040?	Question 15: Preparing the Plan - Do you have any comments specifically on the Sustainability Appraisal Scoping Report that accompanies this	Question 16: Methods of Engagement - Are there any specific methods of engagement you would like us to consider in preparing the Local Plan	General comments
LPR-A-189	14/09/2020	Weston on the Green Parish Council			We suggest the following policies: 1) Improve connectivity and encourage phone signal to all those working from home (including children). 2) Medical centre planning to be compulsory as part of all planning applications. 3) A policy to encourage the reuse of existing buildings for the development of unused commercial buildings needs to be developed and enforced. COVID-19 should not become an overarching reason for policies that would otherwise be inappropriate. This could include an increase in housing growth and the 'build, build, build' mentality that would ruin our traditional countryside. We propose a future for years to come where decisions understand the challenges of the future, including the direct and indirect implications of the COVID-19 pandemic. We agree with, fair and equitable wages, rejuvenation of older sites, supporting tourism, support for local agriculture and food production.	Housing, health, and employment are essential to the Cherwell. The issue of affordable housing, specialist housing? would meet the need of Cherwell. We encourage caution in deciding these numbers as the drive to build needs to be backed up with accurate and evidence-based data.	Bicester has seen tremendous growth and expansion over the last 10 years with the town centre, and a number of new areas have grown quickly with little time to provide youth services etc. It is easier to get from the town centre to Bicester (3 miles) than it is to travel to Bicester from Weston on the Green (5 miles) using public transport. With a vision that could see rural village housing for employees in Bicester, a bus could be introduced on the route. Weston on the Green has a County Council bus but the businesses in Bicester, and Bicester Village could encouraged to run private routes that could pick up tourists staying in rural B&Bs and young people working in Bicester but use, re-use, re-cycle their set of values. This will encourage local employment as people living in Bicester could travel to rural villages to work.	The agreement to build 4,000 homes in the Oxfordshire Green Belt between Abingdon and Begbroke area will change these villages forever. It is going to be submitted into Oxford suburbs and their rural flavour will disappear. Head to village, keep an individual focus, a sense of history and competitive economy" pg 53.2 To fulfil this dream one key thing needs to be ensured: a supply of land... "on the right type, in the right place and at the right time". The economy of the area needs to be considered in so doing, its infrastructure to be identified. How will we understand Cherwell District amidst this big dream? The Parish Council agrees that overdevelopment will be a challenge to our environment. We agree that there are not enough comments supported by many at the local, regional or national level.	WOTG supports a review of all the key themes identified in the Plan and Question 7 section, in particular: 1. Support a review of village categorisation - we feel WOTG should be a Category B 2. Support the development of wifi and mobile phone signal in our area which would help home working 3. Support the Cherwell Neighbourhood Plan and our vision for growth, biodiversity and design 4. We agree with the view to protect important settlement gaps and avoid coalescence.	Yes, agree with the themes.	"Dream and dream big!" - there is a long history of this in the Plan and quote but most are misquotes. The idea of having a big idea or a dream is something that helps drive us forward. Government planning policies have the strategic objective of building a strong, competitive and sustainable economy" pg 53.2 To fulfil this dream one key thing needs to be ensured: a supply of land... "on the right type, in the right place and at the right time". The economy of the area needs to be considered in so doing, its infrastructure to be identified. How will we understand Cherwell District amidst this big dream? The Parish Council agrees that overdevelopment will be a challenge to our environment. We agree that there are not enough comments supported by many at the local, regional or national level.	The Council has worked with a fairly small group of people which seek to mitigate and adapt to climate change. We fully support efforts to reduce carbon emissions, to use up to date measurements for reducing climate change, to manage rivers more effectively, to reduce flooding and remove obstructions and to train people in flood resilience and removing services that reduce this is unwelcome and lacking vision. The Council's role in the 'Knowledge Spine' shows that the ideas and concepts seem real and fully accepted. We would argue that they are not agreed with and are not fully accepted. We would argue that they are not supported by many at the local, regional or national level.	This is perhaps the most worrying section of the Plan. The Council has a fairly small group of people which seek to mitigate and adapt to climate change. We fully support efforts to reduce carbon emissions, to use up to date measurements for reducing climate change, to manage rivers more effectively, to reduce flooding and remove obstructions and to train people in flood resilience and removing services that reduce this is unwelcome and lacking vision. The Council's role in the 'Knowledge Spine' shows that the ideas and concepts seem real and fully accepted. A Central government broad brush planning approach is impersonal, lacks local knowledge, is irrespective of local values and undermines Neighbourhood Plans. Five years of time spent developing this will involve protecting open spaces for organised sports as well as for outdoor family activities.	We need a vision that is based on what we need, not dreams based on perceived economic need. We need to be both allied with an Authority that saves money AND one that respects local (meaning town and village) plans. The Parish Council has a sense that growth, development and economic vision is not driven from the ground up, but from the top down. The value of the District Council for being responsible for planning is the key role on ensuring that the 'Knowledge Spine' is well considered in particular:	We need a vision that is based on what we need, not dreams based on perceived economic need. We need to be both allied with an Authority that saves money AND one that respects local (meaning town and village) plans. The Parish Council has a sense that growth, development and economic vision is not driven from the ground up, but from the top down. The value of the District Council for being responsible for planning is the key role on ensuring that the 'Knowledge Spine' is well considered in particular.	We are a voice that represents a community and would ask that we continue to have a place in the discussions. Our major concern is that the agenda is set for us by tiers of government that don't even know we exist. Yet, it is our future that will be affected.					
LPR-A-190	14/09/2020	David and Jenny Yates			In regard to industrial and office buildings: consider stipulating that all air conditioning incorporates appropriate levels of filtration and all units have appropriate ventilation, sufficient to ensure effective levels to be incorporated within developments and sufficient public transport to site to be demonstrated. In terms of homes: larger room sizes, larger gardens, wider pavements, sufficient on-site green space, sufficient insulation, space ensuring water and energy capabilities to support home working, and more native trees within developments. Effective policy to put in place to enable growth to happen should be approved and to establish the action that will follow if the approach given.	This is dependent on the Planning for the Future White Paper? Maintaining current housing stock data by type, list the number of approved permissions with the proposed units and establish what the projected housing need over the plan period using ONS forecast data on employment and population. Review the categorisation of villages to include provisions within a village and its capacity. Review information on accessibility, and review mapping of all species priorities to update the required net gain in biodiversity. Establish Local Green Spaces and establish where light pollution should be limited.											The Slade Nature Reserve in Bloxham appears to have been omitted from Table 4.8 of the document.				
LPR-A-191	14/09/2020	David Lock Associates	University of Oxford		The document rightly highlights the impact of COVID-19 as having as yet unknown or uncertain impacts on the way we will live in years to come. The pandemic has highlighted the importance of the following upon daily life (cont.)															The context and planning background to Begbroke Science park is contained in the covering letter. The College of Cardinals plays a key role in leading research and educational institution both in the UK and worldwide. The value of the University of Oxford is recognised by the Government as one of the world's greatest and most widely recognisable centres of learning and part of a wider innovation and learning network extending across the Oxfordshire 'Knowledge Spine', the Cambridge-Milton Keynes-Oxford Arc and beyond. (cont.)	
LPR-A-191	14/09/2020	David Lock Associates	University of Oxford		Sustainable development and walkable/cyclable neighbourhoods; better access to local transport and wider connectivity, including strategic cycle connectivity between housing and major employment allocations; flexible use of land/buildings/local supporting services; making efficient use of land; and access to high quality housing. (cont.)															The government has highlighted the significant opportunity for growth across the Arc as a consequence of a range of factors including the economic characteristics of the area, the role of Oxford and Cambridge Universities and the scope support clusters of employment and innovation. The government has reaffirmed its ambitions and objective for up to 1 million high quality new homes and 1.1 million new jobs if the required infrastructure is delivered within the Arc. (cont.)	
LPR-A-191	14/09/2020	David Lock Associates	University of Oxford		Many of the issues are important elements of both local and national planning policy. The specific impacts of the COVID-19 pandemic are still uncertain and the Council should seek to be flexible so that it is sensitive to the needs of the community, promotes a healthy, safe and buoyant economy and environment. Mixed use spaces, bringing home and work closer is an opportunity that could be pursued. Historically people have had to travel to their place of work. In future, we may see businesses move from city centres to be closer to where their															The Oxfordshire Plan 2020 and the Cherwell Local Plan Review 2040 are vital tools to aid delivery of the Government's aims. The Local Plan Review should pay full regard to and be consistent with the ambitious purpose and outcomes of the Arc's objectives for the Arc, to co-ordinate investment in housing, infrastructure and the environment to deliver transformational growth, in line with the Government's National Infrastructure Strategy White Paper. The White Paper identifies the success of Oxford Nanopore, a University spin out.	
LPR-A-191	14/09/2020	David Lock Associates	University of Oxford		The University is pleased to see an acknowledgement that different sectors of the economy have different location requirements. It is widely acknowledged that Science Parks are eminently successful at clustering similar, spin off organisations and acting as incubators for start-up businesses. Our local LEP authority supports Begbroke Science Park and acknowledges the objective of the University to develop a Global															The position of Begbroke Science Park, Oxford and Oxfordshire within the Arc, national and international context and the specific role of the Collegiate University as a global leader in research, education and innovation should all therefore be clearly identified and highlighted within the Local Plan Review. (cont.)	
LPR-A-191	14/09/2020	David Lock Associates	University of Oxford																	On a County basis the Oxfordshire LEP participated in the rapid growth of high-tech and research activities focussed on high-growth areas including Begbroke Science Park. Oxford's Knowledge Spine is home to the high tech sectors which are expected to create most of the new jobs in the next 20 years and there is further potential in the period to 2050. Begbroke Science Park is therefore a key component of this 'Spine'. (cont.)	
LPR-A-191	14/09/2020	David Lock Associates	University of Oxford																	It is important that the relationship between the Cherwell Local Plan Review 2040 and the Oxfordshire Plan 2020 is confirmed as part of the review process moving forward, in the context of planning uncertainty over timetable for the Local Plan and the Growth Board seeking a time extension to the required date of adoption of the Oxfordshire Plan. Plan making programmes and objectives for both Plans should be developed	
LPR-A-191	14/09/2020	David Lock Associates	University of Oxford																	The Local Plan Review 2040 and the Cherwell Local Plan Review will relate to the adopted Cherwell Local Plan Partial Review- Oxford's Unmet Housing Needs. Clarity regarding how the Local Plan Review will fit within the Cherwell Local Plan framework, especially considering the overlapping Plan periods, would be welcomed. This is critical to ensuring that an appropriate strategic and joined-up approach is taken to planning within the district and across	

Rep ID No.	Date Received	Respondent	Organisation/Co mpany	Responding on behalf of (where applicable)	Question 1: Purpose of this Document - What planning policies might we need to help us if COVID-19 persists? LPR-A-196	14/09/2020	Bicester Town Council			Ensuring suitable employment opportunities, including facilities to support more locally based employment. Excellent broadband standards to support homeworking. Improvements to facilitate active travel and good public transport links. Boosting the vibrancy of town centres, particularly for a more "service led" future i.e those things that cannot be bought online. Improving accessibility, culture and evening economy. Consider the provision of free parking even for limited times to kickstart town	Opportunities to meet the needs and aspirations of the "Knowledge Spine" as part of an economic needs survey linked to Cherwell Industrial Strategy and a long term economic vision. Comprehensive housing needs survey down to locality level in order to identify the specific needs of individual communities. Impact of climate change and planned mitigation on land supply, availability of energy, housing, power sources and building methods. The green capital benefits of green spaces to aid the protection of existing and	Please see representation for detailed comments.	Housing: affordable housing, width of roads on new developments, preservation of green spaces, travelling communities and water saving for new homes.	Economy: the range of employment B units needed, support for higher skilled/higher wage jobs, provision of work training and wider tourism should be encouraged.						Agree with the key themes identified.	New major road building projects, which needs the same importance as physical health. Support local business growth in a high carbon industry would be incompatible with the aim of meeting the challenge of climate change. The Council must work towards climate change targets.	No specific mention to mental health, which needs the same importance as arts and cultural industries. Economic growth should be in low/zero carbon sectors. Fostering local business growth in a high carbon industry would be incompatible with the aim of meeting the challenge of climate change. The Council must work towards climate change targets.	Vision and objectives should reflect the NPPF relevant to the district.	Site promotion - Derwent Green, Bicester (Local Green Space)	Broadly agree with the key principles identified.	Avoid consultation during August and the Christmas period. Use of citizens assemblies to engage with the community.
LPR-A-197	14/09/2020	Walsingham Planning	Richborough Estates																		
LPR-A-198	14/09/2020	JP Planning Ltd	Mr N Wingfield																		
LPR-A-199	14/09/2020	North Oxfordshire Green Party			Businesses may not need huge, expensive premises to operate from in the future. Increase of people working from home. Need better communication infrastructures such as fibre broadband and 5G across all areas, including those harder to reach rural sectors. Support needed on helping smaller retailers, and not spreading them out across retail centres. It is predicted that more than half of all retail sales will be made online by 2040. Specific comment on paragraph 1.2 concerning green spaces. Limited reference to Cherwell's recent Partial Review. Specific comments on paragraphs 1.20 and 1.21. Specific comments on paragraphs 1.14, 1.35 and 2.4. Policies and interventions on environmental matters and zero carbon developments are already included in the adopted local plan but are not applied to planning applications. Limited reference to the Government's emerging policies, however there is a lot of reference to	Re-establish the 19th Century type of housing co-operatives. Funds for social housing building could be raised.	More details needed on the Bicester Marketing Board. Bicester is a growing town but there are a number of empty stores in Sheep Street. Should not measure Bicester's success as a shopping destination based on Bicester Village alone. There should be more to shopping in Bicester, particularly independent retail.	Specific comments on paragraphs 2.83-2.86. Reference to the proposals set out in the Partial Review and Inspector's Report. Support for economic activity in Kildington, specifically improvements to the areas around Exeter Hall, the surrounding estate and others identified in the Partial Review. Employment Business Plan to be updated taking account of the Partial Review. Improvements needed in sustainable transport connectivity particularly if Sandy Lane and Yarnton Road level crossing will be closed. Walking and cycling should be targeted. Welcome an increase in community facility provision in Kildington and surrounding villages. Improve the expansion of enhanced facilities at Oxford Airport and additional park and ride facilities.	There are pockets of digital poverty in rural areas. Free tablets and wifi to be issued to those entitled to pension credit and to children in receipt of free school meals.	More focus needed on support for the arts and cultural industries. Arts in Bicester should be one of the themes in the Plan.	Agree with the majority of the proposals. Appropriate and enforceable policies needed to protect the environment. Specific comments on paragraphs 3.15, 3.18-3.21.	No specific mention of mental health. Welcome policies that prioritise active travel. New developments should join up with existing infrastructure. Specific comments on paragraphs 2.48, 2.54, 2.58, 2.60, and 2.61. Ensure broadband providers to facilitate home working. Upskill and reskill existing workers. Encourage further education and training online lifetime learning. Provision of additional secondary school needed. Identified deficiencies in open space, sport and recreation to be addressed through enhancement of existing facilities or securing new provision.								Use of citizens assemblies to engage with the community.

LPR-A-210	14/09/2020	Robert Lawrence			Better public transport infrastructure; home hubs for people who do not have a car; infrastructure to minimise the need to travel; Local transport and local health authorities; better access to green space; property prices are too high and affordable housing is not unaffordable; new homes are of poor quality and unsuitable for living during a pandemic; support for local community groups but no involvement of Parish Councils; poor access to Oxford from North Oxfordshire particularly across county services; Banbury and the park and ride service; and local roads are unsafe for cyclists.	Transport: poor access to Oxford from North Oxfordshire; parking from the town centre to the park and ride service; Rail service to London from Banbury and Water Eaton has deteriorated sharply in the last 2 years; parking problems at Banbury town centre; cycling infrastructure in Banbury is unattractive. Cherwell's car parking policy for Banbury is unfit for purpose. Noise and air pollution to be improved. A361 between Chipping Norton and Banbury is dangerous and overused.	Housing: high quality housing at reasonable cost. Sustainable housing. Character of local villages to be protected.	Economic: poor infrastructure in Banbury. Local skills training needed	Banbury is becoming less attractive to visit. Cherwell's parking policy is not effective. Impact of the proposed impact of out of town retail parks on the town centre. Agree with facilitating the creation of healthier food environments. Banbury is lacking the feel of a thriving and successful town. Local health care improvements in Banbury are unattractive. Lack of green open space. Need for a south east link road to improve access to employment areas and relieve traffic congestion along the central corridor Street area. Issues with the Cherwell Car Park.	Traffic congestion through Kidlington does not help north-south traffic or local traffic. There is a lack of good transport between the north and Oxford is needed. Current bus service on A4260 is slow and inadequate.	Issue with the A31 between Chipping Norton and Banbury concerning noise pollution. The proposed rail line is needed. Poor provision of public transport. Question the reliance of Parish Councils for surveying the villages. Small villages to be protected from overdevelopment. Local home workers to be supported through home hubs in local villages. Restriction of HGVs and encouraging 20mph speed limits to help the quality of life in small villages. Protection of the countryside from unnecessary developments.	Agree with themes 1 and 2. Question the title of theme 3. No reference to the environment. The proposed rail line is needed. Poor provision of public transport. Businesses and the work of the Council. Parish Councils for surveying the villages. Small villages to be protected from overdevelopment. Local home workers to be supported through home hubs in local villages. Restriction of HGVs and encouraging 20mph speed limits to help the quality of life in small villages. Protection of the countryside from unnecessary developments.	Cycling for all ages including older people to be encouraged and to be made safe.	Aging population in Cherwell is increasing. Importance of investment in infrastructure, leisure and intelligence brings as this could impact residents, businesses and the work of the Council. No reference to health care apps that could offer improved healthcare but also pose a problem. Question how to engage with non-technical and elderly residents.	Promoting high quality design of new homes and places is too weak. It should be changed from 'promoting' to 'ensuring'.				Use of citizens assemblies to engage with the community. They need careful design and implementation to be effective. Parish Council should not be relied upon.

LPR-A-212	14/09/2020	David Young																	
LPR-A-213	14/09/2020	Cherwell District CPRE			<p>Access to good quality green space</p> <p>the enormous mental and physical benefits of access to the countryside and high quality green space needs to be reflected in policy making (https://www.cpre.org.uk/news/we-want-chew-green-spaces/)</p> <p>The pandemic highlights the need for greater provision of accessible green spaces to meet physical activity standards, which are not being met in many areas of the district. ONS data suggests e.g. in Bicester South one in five people lack access to a private or shared garden.</p> <p>(https://www.cabinetoffice.gov.uk/sites/default/files/2020-05/14/the-range-of-planting-biodiversity-of-urban-open-spaces-project-report.pdf)</p> <p>Or merely self-imposed growth to justify jobs being created which have little benefit to the community - Cherwell should make its housing density policy, to reflect the ambition set out in the Oxfordshire Local Industrial Strategy (LIS), CPRE rejects this as the strategy was subject to scrutiny by the</p> <p>Cherwell District Council</p> <p>Supporting home working/ reducing the need to travel may mean the drop in centralised working will be long term and should be encouraged to reduce commuting. This needs to be balanced with increased investment in digital connectivity, plus a more efficient centre management, e.g. develop village hubs that can act as a base for multiple services. In larger settlements plan for how under-utilised retail or office space can be redeveloped into high quality, centrally located housing provision and associated infrastructure including open space. (Continued)</p>	<p>We note para 1.15: '1.15 – Cherwell today remains a predominantly rural District although it is one of the most growing areas in the south East'. Shouldn't the main thrust of the opening consultation be that issue? i.e. do residents want to remain living in a predominantly rural area or do they want to be one of the fastest growing areas in the south East? The drawbacks might offset other advantages e.g. in Bicester South one in twenty years the population of Cherwell has grown by over 16% it is forecast to grow further to approximately 17,000 by 2036. The ONS data suggests growth based on Office of National Statistics population projections? Or merely self-imposed growth to justify jobs being created which have little benefit to the community - Cherwell should make its housing density policy, to reflect the ambition set out in the Oxfordshire Local Industrial Strategy (LIS), CPRE rejects this as the strategy was subject to scrutiny by the</p>	<p>We agree with paragraph 2.62: 'Local residents value the attractive countryside and supporting the town.' We should place it in the context of addressing affordability issues. The town centre is the hub of the town, alongside reference to the importance of local historic areas such as Deddington, the Salt Way, Blenheim and up to the north of the ironstone villages.</p>	<p>We note Para 2.86: 'We anticipate that any new countywide strategic transport links and issues relating to the future development of the Oxford Green Belt should be addressed by all the Oxfordshire authorities.'</p> <p>We accept that Heyford Park is a significant brownfield site. However, we would expect the future development to respect the scale and character of the existing Mid-Cherwell Neighbourhood Plan and be mindful of the site's location in an otherwise very rural area, with limited road and transport options.</p>	<p>We note that Heyford Park is a significant brownfield site. However, we would expect the future development to respect the scale and character of the existing Mid-Cherwell Neighbourhood Plan and be mindful of the site's location in an otherwise very rural area, with limited road and transport options.</p>	<p>The Countryside: Cherwell district remains a mainly rural area despite the Council's continued commitment of protection of the Green Belt and its surrounding areas. It is the balance to be struck but it feels too far one way and risks leaving us committed to green targets before local people are given time. For example, if you look at the Sustainable Local Economy Key issues – these are chiefly about national policies, not for example identifying the right mix of development and audits should be performed for new developments to identify their climate change impact. Council can require higher standards than current national standards for new builds. Government has called for more sustainable buildings, but these are not restricted in their ability to require energy efficiency standards above Building Regulations' (ref UK Green Building Council Cities, 2019, Sustainability Standards</p>	<p>Addressing climate change should be our concern is that the drift of this first on list.</p>	<p>Cherwell District Council has declared a Climate Change Emergency. We welcome that. We call on the Council to take a lead role in the delivery of its Local Plan. In the light of this, CPRE also believes that all the existing FSDs in the current Local Plan should be reviewed and strengthened. As emissions from buildings account for a large component of carbon pollution, we suggest that the proposed plan stresses the importance of protecting 'valued landscapes' and areas of tranquillity' as well as the need to identify areas where development would be inappropriate. We also welcome the suggestion that the Council might protect those areas which are relatively undisturbed by noise and are valued for justifiably different reasons.</p> <p>The proposed changes would be strongly resisted.</p>	<p>CPRE Oxfordshire's guiding principles, and means of realising a vision for Cherwell District are that:</p> <ul style="list-style-type: none">• The amount of development, and its impacts, should be based on natural growth and migration.• Brownfield land should be developed first. Conservation Target Areas, Green Belts and Areas of Outstanding Natural Beauty should be developed as a last resort under proven exceptional circumstances;• Genuinely affordable housing should be made available, in particular to address the need; High density of development should become standard; to avoid losing more land than necessary;• Any new communities must be sustainable and existing rural communities must be allowed to support services and infrastructure;• Job creation should reflect Oxfordshire's existing skill base while making sure that all areas of the community are included in any engagement going forward. As we have said, we welcome many of the	<p>We are pleased that the Council wants to encourage more participation from the District's constituents in the formulation of the Local Plan. We believe that site visits with representatives from the council, ourselves and other interested parties would be a good way of finding some common ground on areas of development and environmental protection. These should take place very early on in the process, and throughout, to ensure genuine, continuous engagement.</p> <p>We also believe that a digital engagement, the use of polls and surveys and other tools to find out what people want and care about, while the pandemic continues - and much of life remains virtual - the use of online engagement is obvious. It is, however, important to make sure that all areas of the community are included in any engagement going forward. As we have said, we welcome many of the</p>

Question 12: Healthy Place-shaping - Do you have any observations on the issues we have identified for this theme? Are there any others you would like to raise?	Question 13: Establishing a Vision and Objectives - Do we need a new vision for the Cherwell Local Plan Review 2020? What should it look like?	Question 14: Call for Sites - Do you wish to propose any sites for the Cherwell Local Plan Review 2020? What should they be called?	Question 15: Preparing the Plan - Do you have any comments specifically on the Sustainability Appraisal Scoping Report that accompanies this document?	Question 16: Methods of Engagement - Are there any specific methods of engagement you would like us to consider in preparing the Local Plan?	General comments
LPR-A-214	14/09/2020	Turley	Vistry Homes	The Local Plan Review should support the range of policies to support the growth of the District and its settlements and provide the levels of development in order to meet the District's needs. As for the impact of COVID-19, it is essential that the Local Plan includes policies which are designed to support economic recovery.	The Government is consulting on proposed revisions to the standard methodology for the calculation of housing needs. Should this change, it would increase the requirement for Cherwell to 1,305 dwellings per annum (leaving aside the likely need to continue to assist in meeting Oxford's unmet housing need). We believe the District will continue to face a significant and likely increasing housing requirement which will need to be met. The emerging Local Plan must have regard to the implications of the nature of many of the District-wide planning issues identified in the consultation document. For example, through planning for new housing growth and housing to meet the needs of the	We welcome the 'key issues' identified for Banbury. Whilst we are encouraged that the 'key issues' refer to the need to provide sufficient employment land, we note that there are no equivalent references to supporting the role of Banbury as a location for the supply of market and affordable housing. Given the District's role as a highly sustainable location, we consider it reasonable to assume that the town should continue as a location where new housing should be focused.	In light of the preceding comments, we consider that the 'key issues' for Banbury should refer to the town's continued role in providing new housing to meet the needs of the														
LPR-A-215	14/09/2020	Historic England		The evidence base for the plan should be robust and comprehensive and sources include: National Heritage List for England: www.historicengland.org.uk/the-list/; Heritage Gateway: www.heritagegateway.org.uk; historic environment records; national and local heritage at risk lists; local history and archaeological advice; e.g. locally listed heritage assets (buildings, monuments, parks and gardens, areas); conservation area appraisals and management plans; heritage characterisation assessments e.g. the extensive urban surveys and historic landscape characterisation programmes or specific proposals; assessing impact of specific proposals; heritage impact assessments looking	Detailed comments in relation to the need for a positive approach to the management policies to cover the following topics: archaeology, conservation areas, listed buildings, registered parks and gardens, battlefields, setting, heritage at risk, non-designated heritage assets, design, landscape and green space, historic shop fronts, green belt, green infrastructure, climate change and renewable energy.	The need to recognise the historic significance and character of the cold war site as a whole when considering future development proposals is welcome. Policies which require development proposals to preserve and enhance this internationally significant heritage asset is also important. A site allocation for development has already been delivered or planned for, mainly in the residential area and the technical area. An application that would entail residential development on land of the former cold war flying field is currently under consideration. We consider that any further encroachment on the flying field would harm the character or appearance of the conservation area.															
LPR-A-216	14/09/2020	Framptons	Paul and Hilary Thompson																		
LPR-A-217	14/09/2020	Teetow King Planning	Aster Group	In order to produce an effective affordable housing policy, strongly advise that a new Strategic Housing Market Assessment (SHMA) is completed, reflecting the state of the evidence base. At paragraph 2.20, the Community Involvement Paper says that affordability is a key issue for the District, particularly social rented properties. If the Council looks to deliver more social rented homes, then the guidance within the MHCLG policy statement on Rents for Social Housing is applied, which permits annual rent increases on both social rent and affordable rent properties of up to CPI+1 percentage point from 1 April 2019. This approach to the affordable housing policy should reflect the NPPF in encouraging a more diverse housing stock, whilst enabling the delivery of sufficient numbers of homes to enable developers to deliver an appropriate and higher quantum of affordable housing. Setting a specific target for affordable housing over the lifetime of the Plan	The recently published Planning White paper proposes that Government would dictate the number of houses that are to be built by District Councils by a new statutory method of calculating, with an overall target of 300,000 nationally per year. Cherwell should be looking to take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, as required by paragraph 119 of the NPPF.																
LPR-A-218	14/09/2020	Hollins Strategic Land	Mr Carl Wright	The plan must incorporate effective policies that deal with the issues, shortage of affordable housing deficiencies in public open space and boost the local economy early in the plan period. Housing allocation should be made where they will deliver early in the plan period. It would be appropriate to focus on large-scale strategic sites which require significant upfront infrastructure and have significant lead in times. Smaller scale sites can deliver housing quickly, such as at land south of Beecham Road, Adderbury. Economic Impact Assessment states that the development would result in 64 FTE jobs per annum over the construction phase and an annual 94 FTE jobs per annum would be supported in sectors across the UK economy. The new homes would also help to	Work should be undertaken to identify housing mix and the Report on Oxfordshire Growth and the Board's Director suggests that the supply for 2020-2025 is likely to fall due to COVID-19. The Local Plan Part 1 Partial Review will not boost the supply as it makes no changes to current needs. The Local Plan 2020 will not be adopted until October 2023 at the earliest, the Cherwell Local Plan Part 2 was abandoned and the Local Plan Review is unlikely to be adopted before July 2023. It is evident that the plan period will not significantly boost housing for some time. The plan must respond to this by focusing on sites that can deliver early in the plan period. There is an identified need for moderately priced homes in Cherwell. ONS data confirms that the affordability ratio in Cherwell is worse than it is in	The AMR 2019 indicates the need to deliver more housing and the Report on Oxfordshire Growth and the Board's Director suggests that the supply for 2020-2025 is likely to fall due to COVID-19. The Local Plan Part 1 Partial Review will not boost the supply as it makes no changes to current needs. The Local Plan 2020 will not be adopted until October 2023 at the earliest, the Cherwell Local Plan Part 2 was abandoned and the Local Plan Review is unlikely to be adopted before July 2023. It is evident that the plan period will not significantly boost housing for some time. The plan must respond to this by focusing on sites that can deliver early in the plan period. There is an identified need for moderately priced homes in Cherwell. ONS data confirms that the affordability ratio in Cherwell is worse than it is in	The plan must deliver a housing mix that reflects the local needs in the rural areas and sufficient affordable housing must be provided in the rural area. Furthermore, deficiency in public open space in the rural area must be addressed and growth must be in the most sustainable settlements.														
LPR-A-219	14/09/2020	Alan Lodwick		Evidence should be objective and collected without a pre-conceived idea of the policies to be implemented.	Cherwell has committed to unprecedented levels of growth over the coming years and is likely to face increased traffic congestion, pressure on public services, loss of countryside and environmental damage. The new plan should plan for very limited growth and address the problems caused by the excesses of previous plans. The Oxford-Cambridge Arc proposals have no democratic mandate and have not been																
LPR-A-220	10/09/2020	Martin Mellett				Why should visitors to the shops on the outskirts of Bicester bother to visit the town centre? Is it good to look forward but do not lose track of the															
LPR-A-221	07/09/2020	Carter Jonas	NCM Real Returns Property GP Limited and																		
LPR-A-222	14/09/2020	Turnberry	Exeter College	The paper identifies the Oxford-Cambridge Arc as an opportunity to sector, particularly in terms of connectivity. The Oxfordshire Housing and Growth Deal is a key mechanism for growth but there is no mention of the relationship between Oxford and the district. The new spatial strategy for Cherwell will need evidence on connectivity to Oxford by sustainable transport.	The paper identifies the affordability and availability of housing as issues in Cherwell and importance of connectivity. Oxford has the Plan should consider whether large urban extensions will be truly sustainable when derived from services and sustainable transport modes are considered. Free-standing settlements can drive better infrastructure provision within walking distance and the plan should consider stand-alone allocations where these prove more sustainable than urban extensions.	Kidlington is becoming over-extended with sprawling residential areas being developed on green spaces from services and sustainable transport modes are considered. Free-standing settlements can drive better infrastructure provision within walking distance and the plan should consider stand-alone allocations where these prove more sustainable than urban extensions.	The paper identifies the affordability and availability of housing as issues in Cherwell. The importance of connectivity for Oxford for the allocation of new housing is not covered in sufficient detail in the paper.	A review of village categorisation should be undertaken.

Question 16: Methods of Engagement - Are there any specific methods of engagement you would like us to consider in preparing the Local Plan?	General comments
LPR-A-223	10/09/2020	Lichfields	The Church Commissioners for England																		
LPR-A-224	14/09/2020	Bloombridge LLP	The Belford Trust	There is little point try to guess the trajectory of COVID-19 - The economy and education are probably the two most important strategic considerations for our country, alongside the direct health consequences for sections of the community.	The economy is probably the lead indicator for land use planning so Cherwell needs to have cutting edge evidence on this, informed by stakeholders active in business and the market.	The Plan needs to provide a reasonably certain framework for strategic planning, but flexibility also needs to be built into the plan, through a specific policy, to enable Cherwell to respond to the uncertain outlook with agility.	Many investors found the Bicester Master Plan to be exceptionally helpful in setting a strategic framework for growth in the town. It would therefore be worth revisiting and updating this document to ensure it continues to set a vision for investors and employers to follow.	This is the plan where the status of Kidlington as Cherwell's 'third settlement' (rather than a village) needs to be accepted and planned for. The significant change adopted for the Bicester Master Plan has changed Kidlington. There are settlements and opportunities, but the case for comprehensive planning is now even stronger (and somewhat urgent). It is unclear what benefits the Partial Plan will bring to Kidlington and the surrounding villages and this is a missed opportunity. Kidlington, in particular, needs to return to the visionary, early work around the Master Plan, which linked growth to a series of social and economic benefits, including improvements to the centre. Kidlington must have a plan of its own and a status that reflects the size of this settlement and its strategic location on the outskirts of Oxford. It can benefit from more growth.	Growth should be focused on Banbury, Bicester and Kidlington in order to protect the rural areas.	An additional key theme needs to be flexibility. This is essential for creativity and innovation as planning cannot predict the market but it can provide a framework for change.	The Plan needs to be much more positive on economic measures. It needs to engage with market and business stakeholders and specifically (in policy) provide for some discretionary flexibility as a response to uncertainty. Too often planning applications for something innovative receive a policy objection.	A vision for Kidlington, which also needs to be raised in profile as Cherwell's 'third settlement'.	Shirehampton - Land North of The Mopps, Kidlington	1. Requires a clearer and more transparent decision making matrix for site selection. Each site should be scored in a transparent way and decisions made based on these scores. 2. Site promoters should be given the opportunity to address any 'red flags'. 3. The 800m walking distance (10 minutes) could be nuanced slightly such that 1200m gets a + score or a similar. 4. The role of the Kidlington Rapid Transit should also be upgraded in sustainability terms. This is not an ordinary bus service, given the regularity of the service, so accessibility to it should receive an additional score. 5. Reference is made to Grade 3 land generally. It is usual to separate out 3a (as 'best and most versatile') from	Encourages Cherwell to engage directly with the development industry and market.						
LPR-A-226	22/09/2020	Leamton Parish Council		Don't assume that the status quo is going to persist for the entirety of the Plan. There should be a degree of flexibility. Pandemic mitigation policies should be considered. The home/work planning guidelines should be addressed and changed highlighted by the changes for example, making sure that homes are built for home working, but does not increase social isolation. Ensure that the infrastructure and transport network	Parish felt that this was left to trained professionals.	The Plan has done a reasonable job of identifying issues. Affordable housing should have more focus and be expanded beyond key workers as it does not address the needs of developing a local community. The current planning policies do not provide enough social housing; there is still a lack of smaller houses both for first time buyers and down-sizers. The system of land banking is an issue.	Unlike Kidlington, the villages surrounding Bicester have no Green Belt protection to prevent coalescence and loss of individual identities. A form of Green Belt buffer needs to be agreed in order to prevent the coalescence of the outlying villages from encroachment. Concern was raised about the town centre together with the loss of businesses, and commercial rates.		The Council strongly agreed with the issues raised. As mentioned above, the prevention of coalescence between the major conurbations of Banbury, Bicester and Kidlington with the outlying villages is imperative. The Council would welcome settlement boundaries.	Yes, the Key Themes are satisfactory and no others came to mind.	Concern was raised about Commercial Rates and the way retail is dying.		One key priority should be having an integrated work place – not just infrastructure.	The Parish Council did not have the opportunity to read the extremely lengthy document.	As with previous consultations, it should be remembered that in order to get the best from Parish Councils, future consultations should not include the month of August and December. Consideration should be made that many Parish Councils do not meet in August and December; some only meet bi-monthly and all usually have a set schedule of meetings.						
LPR-A-227	23/09/2020	Banbury Town Council		Budgetary constraints and the town centre make it easier to change use of offices to other appropriate town centre uses including residential on upper floors; reduce the constraints on commercial users to extend/alter buildings.	Affordability of housing; viability of building to support the town centre; make it easier to change use of offices to other appropriate town centre uses including residential on upper floors; reduce the constraints on commercial users to extend/alter buildings.	The issues identified for Banbury are numerous and wide-ranging and we don't consider that any of them are misfounded. We have some additional comments: we note that the issue of greenfield potential is limited by the lack of capacity whereas Banbury Town Council query whether the limit is also driven by the capacity of the community and infrastructure to absorb more people at the rate it is in the recent past. This suggestion should be identified as a specific key issue in Banbury. As set out in our Transport comments above consideration should be given to the need for a M40 link that is type of road. A comprehensive assessment of existing congestion needs to be undertaken and a strategy for dealing with it and extra traffic resulting from the development proposals that will emerge in Plan; in particular the impact on the extent of the policy area for the town centre should be clearly defined; a site for burial space has been acquired by the			The identified key themes are all necessary and appropriate considerations.	Agree with identified issues on this theme. Banbury Town Council emphasise the need to enhance the opportunities for fostering improved education, training and skills development to strengthen the response to the inclusive and prosperity issue.	Agree with identified issues on this theme. The COVID-19 crisis reinforces the need to promote Homes for Life with adequate space standards etc to ensure that the housing built is adaptable to meet future requirements such as working from home and for future access needs.		Barbury Town Council only owns one area of land that may be appropriate for development - Land east of Grundon's at the end of Higham Way and south of the allotments off Thorpe Way								
LPR-A-228	23/09/2020	Mollington Parish Council																Mollington Parish Council note that the paper does not include anything in respect to unauthorised developments and enforcement of planning controls and feels that this should be addressed in the Local Plan			
LPR-A-229	15/09/2020	Pegasus Group	Elan Homes	In addressing the effects of COVID-19 the Council should require larger dwellings and broadband to account for home working.	The evidence required to underpin a Local Plan is significant and covers a number of broad topics such as housing, the economy, transport and infrastructure, the natural environment and monitoring.	Support the identification of the affordability of housing as a key issue affecting the District but highlights that the changes to the planning system and the changes to the standard method, and level of affordability in the District need to be considered. There should not be a blanket requirement for developments to provide a percentage of plots as self-build plots. Such an approach is 'broad-brush' and does not relate back to the Council's self and custom-build register. Instead, any planning policy relating to self and custom-build should be flexible and only require the provision of plots where there is evidence of need. Such an approach ensures that land is utilised efficiently and the potential of numerous vacant plots appearing, which are suitable for development for traditional market and affordable housing, does not arise. Utilisation of the Nationally Described Space Standards within Cherwell should be			Support consideration of the Green Belt through the Oxfordshire Plan. The new Local Plan should focus on areas beyond the Green Belt away from major centres of urbanities addressing Cherwell specific needs. The Local Plan review needs to not rely on the Oxfordshire Plan in delivering Cherwell's housing requirement, particularly following the proposed abolition of the Green Belt and its re-cooperation through Government's Changes to the Planning System consultation. Support the re-survey of villages. Categorisation should not restrict development and should be open for new services. The Council should recognise the effects of COVID-19 and allow for homeworking. The way to deal with affordability is to provide more new homes.			It is considered that the 'Healthy Place Shaping' theme needs amending to be explicit in ensuring that both market and affordable housing needs are met over the plan period. Housing need should not only be met in terms of quantity, but also quality and geographical location.		Site promotion - Land off Stocking Lane, Shenington							
LPR-A-230	14/09/2020	University of Oxford		The Council is to be commended for recognising that COVID-19 means that many may need to work from home in the future, especially the extent of working at home and the importance of non-car-based transport. To this end, the University of Oxford would encourage more flexible policies to respond to change.	Support recognition that the Plan will follow on from the Oxfordshire Plan 2050 which sets out the strategic framework under which it all progress, including the overall level of housing requirement. A University of Oxford strategic goal is to construct at least 1,000 subsidised homes for University College staff. We request to amend the plan to reflect this urgent need. Whilst it is the role of Oxfordshire County Council to develop the next transport plan, there is much the Council can do to foster greater use of non-car modes of		The Plan should consider opportunities to further strengthen the role of Kidlington. There is suitable and available expansion opportunity at Langford Lane.			The University of Oxford suggests that the Plan should include a housing element that includes a subsumed within the Healthy Place-shaping theme. In seeking to provide sufficient homes of an appropriate tenure, design and size, it is important that this should encourage local employer-led staff accommodation which will go some way into ensuring that provision is meeting a local need. Agree a sustainable local economy is appropriate to align with the Oxfordshire Plan 2050 and the wider Oxford-Cambridge Arc strategies.	The University of Oxford is a world leading research and teaching institution, at the heart of Oxfordshire's Local Industrial Strategy vision.	The University of Oxford agrees that climate change is perhaps the greatest long-term challenge facing society. It is committed to play its part through teaching, research and stewardship of its own buildings and land to reduce net carbon and increase biodiversity.	The University of Oxford suggests that a new vision builds on the wider Oxfordshire 2050 vision.	Site promotion - Land at Langford Lane, Kidlington							
LPR-A-231	14/09/2020	Brown & Co	A S Cole & Son															Site promotion - Land at Fern Hill Farm, Bloxham Road, Milcombe			
LPR-A-232	24/09/2020	Hornton Parish Council		Hornton Parish Council agrees that "the pandemic has highlighted the importance of developing strong, resilient communities where we know our neighbours and support each other" and that the "Local Plan will be a key tool for the sustainability of each activities". Home working, home schooling and recreational use of the internet, has emphasised the importance of broadband connectivity. Hornton Parish Council is concerned that the government's Planning White Paper will reduce the community gains and benefits resulting to local village communities from small and medium scale developments (following the proposed demise of 106 agreements). This might hinder potential investment in community-support facilities	A full consultation with local parishioners is needed to gather evidence of local issues and needs.	The Parish Council supports and endorses the intention to maintain and enhance the traditional character of local villages, including to retain our 'green belt' areas and to Conservation Areas and their vicinity. The Parish supports the proposal to develop a policy on light pollution; protection of local distinctiveness and setting out the principles of Rights of Way; the need to promote sustainable transport; the need to identify and protect those areas which are relatively undisturbed by noise'; the need to introduce new policies to secure biodiversity gain and protect and enhance the natural environment; the need for developers to ensure that an ecosystem approach is adopted, based on natural capital mapping, and a requirement to use the planning system to help the process to provide a local framework for the assessment of development		The Parish Council fully supports the intention to re-survey each village to fully understand current levels of services and levels of accessibility and for a review to determine the approach for distributing any future rural housing and employment growth. Agree that the scope of this work would involve: review existing policies; seek stakeholder input and enhance the natural and built environment; protect local distinctiveness and settlement patterns; review existing policies that seek to protect the countryside from unnecessary development.	The Parish Council supports the three Key Themes identified.	Planning for the future must prioritise support for continuation of these resources and assets.	It is important that the Local Plan includes strong policies to promote walking, cycling and public transport.	The Parish agrees that access to nature and green space can improve people's health and well-being and that local rights of Way and footpaths should remain a priority. They strongly support the provision of healthcare facilities to meet the demand from an increasing (and possibly more elderly) population.			in view of COVID-19, the Council should adopt a variety of virtual and postal methods to engage the public.

Supporting the provision of local facilities and resisting the closure of village shops, pubs and other community assets. Making high-speed broadband available for everyone. Avoiding	Higher priority for protection and mitigation solutions particularly with regard to climate change. Evidence and policies for wildlife and sustainability of natural environment. Access to open spaces and clean air to be increased. Improvement of transport links at the centre of transport links. Supporting the provision of local facilities and resisting the closure of village shops, pubs and other community assets. Making high-speed broadband available for everyone. Avoiding	Enhance town centre and reduce vacant retail premises. Revive public transport in the rural areas to enable residents to access facilities and services in local towns.	Enhance town centre and reduce vacant retail premises. Revive public transport in the rural areas to enable residents to access facilities and services in local towns.	Provision of medical facilities with effective transport links. Provision of retail outlets for everyday needs. Consideration of additional traffic on surrounding villages. Improve cycling and footpath links with surrounding villages. Avoid coalescence and keep village distinctiveness and historical settlement patterns. Ensure the right provision on all school developments. Consider increases in traffic. Support Creative City initiative.	Re-categorisation of villages to reflect size and capacity for sustainable growth and changing level of local habitat. This should be a key theme. A National Environment Strategy should be set up to help map land use, enhance ecological networks and improve quality of habitats. 'Resilience' should be added to the first theme. Improve local opportunities for education and training for skilled jobs at venues linked by good local transport. Local food production, including fresh food grown locally, to increase community security and resilience.	Protection of the natural environment, biodiversity and wildlife transport links are key to local habitat. This should be a key theme. A National Environment Strategy should be set up to help map land use, enhance ecological networks and improve quality of habitats. 'Resilience' should be added to the first theme. Improve local opportunities for education and training for skilled jobs at venues linked by good local transport. Local food production, including fresh food grown locally, to increase community security and resilience.	Effective, affordable and 'green' New homes to be built to highest possible eco-standards. Infrastructure network of car parking points across the District should be reviewed. Protection of public transport options for villages. Serious commitment for new woodland and greater canopy coverage. Targets on new build should be for 20% improvements to existing buildings and 10% tree canopy cover. Measures to assess and record gains should be introduced and monitored. More education on this issue - for adults as well as in schools. Practical, effective solutions that can be implemented by	Maintain the distinctive character of existing towns and villages. Enhance transport links are key to local habitat. This should be a key theme. A National Environment Strategy should be set up to help map land use, enhance ecological networks and improve quality of habitats. 'Resilience' should be added to the first theme. Improve local opportunities for education and training for skilled jobs at venues linked by good local transport. Local food production, including fresh food grown locally, to increase community security and resilience.	Site promotion - Fritwell Heights (small parcel at the end of North Street off Sonerton Road at western edge of Fritwell) (Local Green Space)	Evidence should be gathered from a wider range of ecological, environmental and wildlife groups. Residents to be consulted and more direct methods should be used to listen to residents and record their views and concerns. Be aware of and mitigate against 'Consultation overload'.	The nature and complexity of current planning proposals and online types. How it differs for many residents to be consulted and more direct methods should be used to listen to residents and record their views and concerns. Be aware of and mitigate against 'Consultation overload'.				
LPR-A-236	28/09/2020	Fencott and Murcott Parish Council																		
LPR-A-237	28/09/2020	Kidlington Parish Council			Concern over other bodies determining key elements of the Plan that are not subject to rigid evidence e.g. Oxfordshire Growth Board and Oxfordshire LEP. Issue of funding to address infrastructure deficit such as transport, health and education.	Current plan has failed to deliver significant levels of affordable housing. Concern over Government's guidance regarding viability assessments which impact delivery of affordable housing. Impact of economic in Chelwell needs to be recognised. Provision of more employment land has a ripple effect. Concern over potential development associated with the Oxford-Cambridge Arc. Climate emergency is an overriding consideration. Appropriate policies to cover housing standards and sustainable sources of energy. Increase in traffic congestion and deficit in infrastructure due to the														
LPR-A-238	28/09/2020	Istip Parish Council																		
LPR-A-239	28/09/2020	Ambroden Parish Council			Please see the representation for detailed comments. Comments on the type of infrastructure developments at Bicester; and road networks. Comments on management companies, school capacity, and public transport. Comments on encouraging independent businesses including market stallholders; and the impact of out of town retail parks on Bicester town centre. Comments on the maintenance of local roads; cycle paths; cost of public transport; frequency of bus services; and capacity of the existing road network. Comments on affordable and adaptable housing; and environmentally and sustainable housing. Comments on encouraging and	Encourage independent businesses in the town centre. Consideration of speculative developments and design and appearance of commercial buildings are often poor. Employment offered through developments is low skill retail and warehouse.														
LPR-A-240	15/09/2020	Dan Simes	Conservative Councillors on Bicester Town Council		Policy to help adapt to changing working practices for commercial and retail environments. Residential policies to consider moves towards home working. Mixed use developments should be considered first.	Evidence needed on biodiversity, transport usage, growth and housing targets, need for different employment sectors and carbon reduction measures.	The Flywheel event is not held annually. Little reference of healthcare facilities other than the cottage hospital, which is a community hospital. Community buildings should be considered within the town centre development opportunities. There has been significant provision of B8 units in recent years. Suitable locations for B8 need to be identified that do not			Villages should be protected from speculative development and housing numbers for rural areas need more definition.	Agree with the key themes. Heritage should be a key theme.	Consider flexible working practices.	Reference needed to the different standards of assessing building sustainability. High building specs should be considered as the norm rather than the exception.	Little reference to healthcare provision.	Vision to be adapted for the future to ensure the needs of a growing district whilst maintaining the elements that current residents value.	Site promotion - Catte Market car park, Victoria Road, Bicester Site promotion - Claremont car park, Deans Court and the County Council Buildings on Launton Road	Question how consultation will take place in a socially distanced environment.			
LPR-A-241	30/07/2020	PFT Planning			The Council must be carbon neutral by 2030 and produce an SPD to achieve this. An example of a Climate Emergency SPD is provided.	Please see the Climate Emergency SPD provided in the representation. Policies and decisions should recognise that Upper Heyford represents a Cold War site in the UK and possibly in Europe. The heritage potential of the site has never been expertly assessed and the Council have continued to diminish the character and impact of the Cold War landscape. Precedence has been given to residential and commercial			Policies and decisions should recognise that Upper Heyford represents a Cold War site in the UK and possibly in Europe. The heritage potential of the site has never been expertly assessed and the Council have continued to diminish the character and impact of the Cold War landscape. Precedence has always been given to residential and commercial developments.				Please see the Climate Emergency SPD provided in the representation.	Forest Gardening in the Climate Emergency SPD provided in the representation should be implemented.						
LPR-A-242	31/07/2020	Dewi Roberts			Better broadband to work from home	A second junction on the M40 to Bodicote is needed.														
LPR-A-243	01/08/2020	Elaine Whittaker			Local support for vulnerable people. Simple and easy to understand information.	Consultation with resident group. Good to see housing for 65+. Green space is not adequately protected and there is insufficient priority for walking and cycling.				Yes but make the cycling provision meaningful.										
LPR-A-244	04/08/2020	Natasha Robinson			Policies that recognise the need to reduce traffic, which is currently associated with increased risk of COVID-19. Policies that prioritise housing over commercial development and the provision of reliable wifi for homeworking. Presenting a mix of public realm space development of public realm for socialising and repurposing roads and car parks for walking and cycling space. Policies that recognise the importance of farming for food security. Review food retail and density of fast food outlets in urban	Accurate local housing needs assessment which is based on current need and calculation of organic local population growth. Accurate quantification of available brownfield sites for housing and land with planning permission which is not yet started. Disaggregating of residential and non-residential land use by employment data, education, place of work, sector, age of working population and unemployment figures.	Co-location of local facilities such as library, community centre, health centre, sports and leisure facilities makes management and security more efficient and straightforward.	Kidlington is in danger of losing its identity as a thriving town if a large area of Oxford is developed. The railway station is the intervening Green Belt and the loss of a golf course. This will undermine any coherence of the area as a village/community and needs to be addressed as a matter of urgency.	A need for a transport strategy to encourage non-car journeys to the railway station.

LPR-A-245	12/08/2020	Edith Sim			A thorough assessment of the unique character of the region is key to targeting the local plan to emphasise the strengths of the region. Banbury has a unique historical canal side and potential to improve with active transport links.	Support the council's approach on the whole but it needs to be sped up to realise the potential sooner. A significant effort needs to be made on understanding and building on what is unique about the region.	Traffic, road infrastructure and the safe provision for cycling are big issues.		There are areas in Water Eaton Lane which are not currently on mains drainage. These new developments in Kiddington provide the opportunity to rectify this. Existing ditches and drainage in the area which is liable to flooding needs											
LPR-A-246	23/08/2020	Sam Keegan			Open, flexible outdoor spaces and restaurants with covered outdoor seating are in demand. Use of canalside restaurant spaces and Lock 29 are good examples. Provision of more play areas for future generations.															
LPR-A-247	27/08/2020	Patricia Clossell			More data on movements, journeys, Zoom in Skype meetings. More open space. Langford Fields was invaluable. More cycle tracks to shops or employment centres, so that people do not need to use public transport for short journeys.	Value of Aylesbury Plan will increase traffic along the A41 alarmingly. It is already overloaded. Too much green field space used for housing rather than brown. At one time Bicester was a rural farming centre. It was built up by farms. Protect Bicester from further development.	Too much green field space used for housing rather than brown.	Too much green field space used for housing rather than brown.	Conservation areas. In Bicester more biodiversity very important. LWS must be respected in latest Government advice. LWS's need to be connected by wildlife corridors.		Intriguing and strengthening the unique character of each region.	Continuing to attract employers and manufacturers to the region through zoning and development of transport infrastructure.	The combination of addressing climate change with all aspects of the local plan will ensure it is part of every new development.	The canal and waterways should be included. Watersports have a role to play in staying healthy.						
LPR-A-248	30/08/2020	Adrian Colwell			We do not know what we are seeing is just temporary and short term or a structural shift. The issues for the Local Plan are not clear. They concern the increase in unemployment, business losses and the impact on retail/town centres. The employment issue faced is not just meeting the high tech growth companies but addressing a much broader employment need. The means of employing 'customers' companies as well as providing for the needs of 'breakthrough' companies. There should be an enabling, flexible approach to economic growth. The restoration of the central towns in the Chilterns needs to be accelerated. The role of town centres needs reconsidering and it is unlikely that large Mall style shopping centres will survive the shift to online. In contrast, destination towns like Bicester and Abingdon are likely to survive as they offer a distinctive experience. Cherwell needs to show it is responding to market signals. The key one has been the importance of	There is a need to be much clearer about what the review is trying to achieve. There is a need to undertake a full review of the delivery of the adopted Local Plan sites. Transport links to the town centres are critical. The review should be a full review. It would be useful to have an objective being made to improve access and through Banbury. Without transport issues being resolved it is difficult for new opportunities to support the Garden Town? It should include an assessment of delivering NW Bicester and Graven Hill. Are the policy for the village correct? It is able to judge the scale of additional employment and housing land needed. There should be a review of the actual use of land. More detailed information on the role of the town centre and consider new policies to support new uses and bring new vitality to it. There is a need to review the case for and potential locations for additional employment land to meet needs.	Review should consider the issues arising from the delivery of the adopted Local Plan sites. Transport links to the town centres are critical. The review should be a full review. It would be useful to have an objective being made to improve access and through Banbury. Without transport issues being resolved it is difficult for new opportunities to support the Garden Town? It should include an assessment of delivering NW Bicester and Graven Hill. Are the policy for the village correct? It is able to judge the scale of additional employment and housing land needed. There should be a review of the actual use of land. More detailed information on the role of the town centre and consider new policies to support new uses and bring new vitality to it. There is a need to review the case for and potential locations for additional employment land to meet needs.	The challenge is that the planned growth at Kiddington does not meet the housing needs of Kiddington. There is more to do to support the growth of the town. The review should be a full review. It would be useful to have an objective being made to improve access and through Banbury. Without transport issues being resolved it is difficult for new opportunities to support the Garden Town? It should include an assessment of delivering NW Bicester and Graven Hill. Are the policy for the village correct? It is able to judge the scale of additional employment and housing land needed. There should be a review of the actual use of land. More detailed information on the role of the town centre and consider new policies to support new uses and bring new vitality to it. There is a need to review the case for and potential locations for additional employment land to meet needs.	It is time for the Council to embrace it positively, recognising that growth at Heyford Park means less growth in the surrounding areas and less pressure on the services. There is a need to understand what the Local Plan needs to do to support the Garden Town? What more does the Local Plan need to do to support the Garden Town? It should include an assessment of delivering NW Bicester and Graven Hill. Are the policy for the village correct? It is able to judge the scale of additional employment and housing land needed. There should be a review of the actual use of land. More detailed information on the role of the town centre and consider new policies to support new uses and bring new vitality to it. There is a need to review the case for and potential locations for additional employment land to meet needs.	It is time for the Council to embrace it positively, recognising that growth at Heyford Park means less growth in the surrounding areas and less pressure on the services. More detailed information on the role of the town centre and consider new policies to support new uses and bring new vitality to it. There is a need to review the case for and potential locations for additional employment land to meet needs.	Unclear why the themes set out in the adopted Local Plan are proposed to change. No clear explanation is given.	Given the national effort that is underway to invest in zero carbon and green buildings, but there is a need for the role of planning in supporting economic growth. Is unclear what Local Plans should conform to. It is critical for the driver of planning in England to take into account the needs of industry. Industry would move to the economy of the District and why an incomplete document is referenced. There is risk of confusion and duplication of the OCLP LIS which has been agreed with BEIS and is planned. Local plans should be supported and work to implement the agreed LIS in Cherwell as required by the NPPF. It would be sensible to readjust the categories of development that both had significant impact on the environment and were not delivering exceptional, high quality, sustainable housing. An additional issue is the potential to promote an expansion of woodland cover through the District as part of the response to climate change. A review of the environmental impacts of the proposed development and the proposed mitigation measures should ensure	The topics covered should form part of good planning, but there is a need for a recognition that the driver of planning in England is to take into account the needs of industry. Industry would move to the economy of the District and why an incomplete document is referenced. There is risk of confusion and duplication of the OCLP LIS which has been agreed with BEIS and is planned. Local plans should be supported and work to implement the agreed LIS in Cherwell as required by the NPPF. It would be sensible to readjust the categories of development that both had significant impact on the environment and were not delivering exceptional, high quality, sustainable housing. An additional issue is the potential to promote an expansion of woodland cover through the District as part of the response to climate change. A review of the environmental impacts of the proposed development and the proposed mitigation measures should ensure	Not convinced that there is a need to change the current vision. The adopted vision remains appropriate for securing the growth of Cherwell, subject to the right local conditions. Assessments to come in line with the national agenda of stripping back the plan making process and focussing on the essential aspects of Plan making.	Whilst recognising Local Plans will be changing significantly as a result of the Planning White Paper, new hurdles, such as HEDs, will be introduced. Assessments to come in line with the national agenda of stripping back the plan making process and focussing on the essential aspects of Plan making.				
LPR-A-249	07/09/2020	Jayne Todd			The pandemic has demonstrated that many people wish to work from home. This has led to a significant impact on commuting into places of work, and consequently on climate change targets. Planning which facilitates 'local living i.e. working from home, improved public transport leading to safer journeys to school, easier access to medical facilities will be required.	The impact of the growth of Oxford outward should be considered, and the need for a clear strategic pattern would help to establish where, if any green belt erosion might occur.			The provision of better facilities at Heyford and Tackley railway stations will facilitate the growth of the town. This can only happen if a regular efficient bus service is available.	The network of rural villages must be maintained and cherished. Seven or more properties = can fundamentally alter the delicate balance of these places. Infill should only be allowed if it does not impact on existing properties.							A dedicated webpage. Regular email updates.			
LPR-A-250	07/09/2020	Daniel Hill			Increasing the focus on local connectivity where people live and the local town centres, rather than focusing on the larger towns (e.g. Oxford). Provide better facilities for cycling and walking to allow people to avoid public transport or motorised transport. Improve the environment for those who will spend more time working from home, including reducing noise levels and avoiding inappropriate developments that destroy countryside and green spaces, and ensuring that all new homes have the space for people to work and live comfortably.	If recent significant growth continues unabated, there is a risk of it merging with surrounding villages and becoming a giant dormitory town, impacting our green spaces and agricultural land. Greater focus should be given to the redevelopment of brownfield sites, or repurposing existing industrial/retail sites for housing. Transport is a key issue. There needs to be struck between the amount of new housing that can be delivered and the need to protect green spaces and agricultural land. Greater focus should be given to the redevelopment of brownfield sites, or repurposing existing industrial/retail sites for housing. Transport is a key issue. There needs to be struck between the amount of new housing that can be delivered and the need to protect green spaces and agricultural land. Greater focus should be given to the redevelopment of brownfield sites, or repurposing existing industrial/retail sites for housing. Transport is a key issue. There needs to be struck between the amount of new housing that can be delivered and the need to protect green spaces and agricultural land. Greater focus should be given to the redevelopment of brownfield sites, or repurposing existing industrial/retail sites for housing. Transport is a key issue. There needs to be struck between the amount of new housing that can be delivered and the need to protect green spaces and agricultural land. Greater focus should be given to the redevelopment of brownfield sites, or repurposing existing industrial/retail sites for housing. Transport is a key issue. There needs to be struck between the amount of new housing that can be delivered and the need to protect green spaces and agricultural land. Greater focus should be given to the redevelopment of brownfield sites, or repurposing existing industrial/retail sites for housing. Transport is a key issue. There needs to be struck between the amount of new housing that can be delivered and the need to protect green spaces and agricultural land. Appendix 13 - Extended Summary of Representations

Rep ID No.	Date Received	Respondent	Organisation/Company	Responding on behalf of (where applicable)	Question 1: Purpose of this Document - What planning policies might we need to help if COVID-19 persists? What lessons can we learn from this?	Question 2: Identification of Issues	Question 3: District Wide Planning Issues - Do you have any observations on the district wide issues we have identified? Are there any others you	Question 4: Banbury Planning Issues - Do you have any observations on the Banbury issues we have identified? Are there any others you	Question 5: Bicester Planning Issues - Do you have any observations on the Bicester issues we have identified? Are there any others you	Question 6: Kidlington Planning Issues - Do you have any observations on the Kidlington issues we have identified? Are there any others you	Question 7: Heyford Park Planning Issues - Do you have any observations on the Heyford Park issues we have identified? Are there any others you	Question 8: Rural Areas Planning Issues - Do you have any observations on the rural issues we have identified? Are there any others you	Question 9: Key Themes - Do you agree with the Key Themes identified? Are there other Key Themes the Plan should address?	Question 10: Maintaining and Developing a Sustainable Local Economy - Do you have any observations on the issues we have identified for the local economy?	Question 11: Meeting the Challenge of Climate Change - Do you have any observations on the issues we have identified for climate change?	Question 12: Healthy Place-shaping	Question 13: Establishing a Vision and Objectives - Do we need a new vision for the Cherwell Local Plan Review 2040? What should be its key aims?	Question 14: Call for Sites - Do you propose any sites for the Cherwell Local Plan Review 2040?	Question 15: Preparing the Plan - Do you have any comments specifically on the Sustainability Appraisal Scoping Report that accompanies this	Question 16: Methods of Engagement	General comments
LPR-A-255	14/09/2020	Paul Troop			Encourage walking and cycling, discourage motor vehicles for short trips and reallocate roadspace to people. This will clean the air, encourage walking, allow social distancing. Bicester would make more use of its public spaces. The Market Square should be completely pedestrianised and used for a market, a carpark and traffic junction.	How Dutch towns and villages are designed for people not for motor vehicles.	There is insufficient attention given to biodiversity and need for safe intra-town cycling routes (greenways) to allow commuting by active travel rather than public transport.						Broadly agree.								
LPR-A-256	14/09/2020	Michael Fraser			It is clear that the majority of the working population are able to work productively from home. This should have a beneficial impact on no longer requiring policies that house must be located close to places of work (as per the Cherwell Local Plan review draft). When calculating the number of houses required based on 'economic growth', for example, the overall number should be moderated by a method that	Evidence should be used to determine actual need. Use evidence-based policymaking, not the policy-based evidence-making that was used for the Partial Review, that has resulted in a significant excess of housing being approved against actual need.	Avoid removing green belt or ensuring there is not a greenfield first approach to building and take seriously the climate emergency.							The representation states, 'Well, you have not attempted to address the challenge so far, having agreed it entirely during the Partial Review, so I guess it would require a political change of Council to ensure this happens in the future.'	The representation states, 'Please do not from the term 'place-shaping' or 'place-making' since it often suggests the location for your building plan is a formless void, awaiting intervention from the Divine Architect. Consider my analogy of a combination of spreadsheet and Google maps. The reality is that many of the places which you wish to shape have been perfectly viable places whether rural or semi-rural, for					Claims that the consultation is appealing to landowners to submit sites in the Green Belt and supporting the University. Previous correspondence with the university is highlighted. The Council should listen and actually change plans in response to residents' feedback.	
LPR-A-257	14/09/2020	Roscorn Strategic Land	Christopher Gasson																		
LPR-A-258	14/09/2020	Roscorn Strategic Land	Hugh Robert Nathaniel Stilgoe																		
LPR-A-259	14/09/2020	Bloombridge LLP			There is little point trying to guess the trajectory of COVID-19. The economy and education are currently the two most important strategic considerations for our country, alongside the direct health consequences for sections of the community.	The economy is probably the lead indicator for land use planning so Cherwell needs to have cutting edge evidence to this, informed by stakeholders active in business and the market.	The plan needs to provide a framework for growth in the town. It would therefore be worth revisiting and updating this document to ensure it continues to set a vision for investors and employers to follow.	Many investors found the Bicester Master Plan to be excellently written and well thought through. It needs to be built into the plan through a specific policy, to enable Cherwell to respond to the uncertain outlook with agility.	This is the plan where the status of Kidlington as Cherwell's 'third settlement' (after Bicester and Oxford) needs to be accepted and planned for. The significant change adopted with the Partial Review has changed Kidlington. There are still constraints and opportunities, but the case for comprehensive planning is now even stronger (in its new guise). It is unclear what benefits the Partial Review has offered Kidlington and the surrounding villages and this is a missed opportunity. Kidlington, in particular, needs to return to the principles of the original Alan Baxter Master Plan, which linked growth to a series of community benefits, including improvements to the centre. Kidlington must have a plan of its own and a status that reflects the scale of its surrounding and its strategic location on the outskirts of Oxford. It can benefit from more growth.	Growth should be focussed on Banbury, Bicester and Kidlington in order to protect the rural areas.	A key additional theme needs to be flexibility. This is essential for creativity and innovation (planning cannot predict the market but it can provide a framework for change).	The plan needs to be much more positive economic measures. It needs to engage with market and business stakeholders and specifically (in policy) provide for some discretionary flexibility as a response to uncertainty. Too often planning applications for something innovative receive a policy objection
